VOL. IV.

PATAGONIA, SANTA CRUZ COUNTY, ARIZONA, FRIDAY, JULY 28, 1916

SANTA CRUZ PATAGONIAN

Geo, H, Francis for Treasurer; Mrs, Geo, Marsh for Legislature

There has been so many soldiers in Nogales, and more coming every day, that talk has been mostly of a military the state at the preceding election. If a nature, overlooking the fact that the candidate for a county office, member primaries are butsix weeks away. This of the legislature or superior judge, he week, however, some political talk has must secure the signatures of not less been heard, but it will probably be a than three per cent nor more than ten couple of weeks yet before the tickets per cent of the total vote of the party have been completed for the primary and the ball started rolling in real earn-

county seat, one hears the name of Geo. sixty nor less than twenty days before H. Francis being spoken of as the possi- the 12th day of September, 1916. At the ble candidate for the nomination on the same time there must be filed the name Democratic ticket for treasurer. Pata- of each any every individual, with his gonia's postmaster is well qualified for post office address, by or through whom the position, and while he has not yet such candidates have expended or prosignified his intention of making the pose to expend money in defraying the race, considerable pressure is being expenses of their campaign. Should brought to bear by Democrats both at any candidate determine not to author-Nogales and Patagonia to get him to ize or appoint any such person or perrun. It is contended that Patagonia is sons, he shall notify such officer that

considerable talk among Democratic party leaders to try to persuade Mrs. Theodora Marsh to make the race for the nomination on that ticket for state representative. Mrs. Marsh is quite well known throughout the county and in Nogales. She is public spirited and on the 22nd inst. was very nice and well has been identified with most of the big attended. enterprises of this county, both in a business way and as a matter of public concern. While Mrs. Marsh has not Her neighbors miss her very much and yet consented to enter politics, and probably doesn't know that she is being talked of as a possible candidate, her ability is unquestioned and she could do as much good as any other representative the county could send; also the idea of Santa Cruz being represented is the lower house of the legislature by a talented woman, as remarked by a man in the lobby of the Montezuma the other evening, seems "rather classy."

their lids into the political arena are: almost made. Raymond Earhart, who seeks the Demceratic nomination for sheriff; Areus Reddoch, who wants to succeed himself as county recorder; Vic Wager, who wants another term as assessor; Chas. Hardy Jr., wishes the nomination on the Democratic ticket for coun- Tombstone where he is going on busity attorney; A. H. de Reimer wants | ness connected with the State Land the same honor from the Republicans: Geo. H. Fiedler has announced for another term as supervisor on the Democratic ticket, and Mr. McKnight, the town Sunday. Wiley Jones, candidate Nogales, where he went last week to as sheriff.

There seems to be some doubt in the minds of some of those who are seeking office in this county as to the correct

petition, drawn up and circulated for signatures, the number of names necessary depending on the office he seeks. Candidates for state officers, excepting members of the legislature and superior court judges, must secure signatures equal to one per cent of the total number of votes cost for the gubernatorial candidate in at least three counties in

designated in such county. Nomination petitions for all county offices must be filed with the clerk of In the hotel lobbies and streets of the the board of supervisors, not more than entitled to a little place in the political sun, and there is no better Democrat or more qualified man than Francis in the district.

Another piece of political news from the busy county seat, is that there is considerable talk among Democratic preliminary statement, his name may not appear on the official ballot.

race on the Republican ticket for judge But from the pump house into Nogales on the new road, except where the road enters town, traveling is a de-Miss Minnie Stevens left Monday for light. As is well known in this county, Dodge City, Kans., where she is emof course, it is the first new road built ployed as teacher in the kindergarten in the county with part of the recently school. She came to Patagonia last week voted \$150,000 road bonds. It is a little over four miles in length, and is not Harry Stevens, who was killed by gas considered finished as yet. Also there in the Andes mine on Red mountain, was quite a row raised about the classiwhile trying to save the life of a Mexification of the earth removed by the can miner. Miss Stevens was taken as contractors in building the road. Howfar as Fairbanks by her brother Lou in ever this may be, the one great fact is that it is a good road. It is the best road in this part of the seate, better than the Borderland Highway, which in Pima county runs over similar mountainous country, and was built for less A dance will be given at Fruitland money than the Borderland Highway. It is built up on the ridges and mesas instead of in the canyons; and it should Church and Sabbath school were well be a good road fifteen or twenty years from now-more appreciated then perschool at Elgin in the afternoon was haps than it is today. It looks like it will be good for 100 years. The only Prof. T. B. St. John of San Simon bad feature of this road is at the Nogales end. Just as it enters town it is Good rains have made the Elgin vicinmiserable.

The county engineer plans to continue this road from the bridge on to Patagonia, always on the mesas where possible. By his survey of the new route, and, Ohio, are visiting Mrs. Nell Bart- it will slightly lessen the distance belett and daughters. They will go to Los tween the two places, as well as be of the same permanent character as the road from the pump house on to the Mrs. R. T. Fenter and children spent county seat. Recent big rains have demonstrated that the galvanized pipes used on road repairing are hopelessly inadequate to carry oil the water when J. F. Cunningham was an Elgin visithe floods come, and concrete or other permanent culverts will have to be put in. The bridge across the Santa Cruz river, to be built jointly by the state and county, and upon which work has started, will be well constructed, if the other bridges built by the same arrangement with the state engineer's department may be taken as a criterion.

It will be several months before all this work will be completed. The money on the bond issue comes in at the rate of about \$7,500 a month. Sometimes it is necessary to stop work in different sections, awaiting more money. But when it is completed, judging from the new road built from the pumphouse or bridge to Nogales, it will be a good job, and the money will be well spent.

GOOD POULTRY ADVICE

Dry Quarters, Suitable Feed and personal adornment. Exercise Are Essential.

All Perches Should Be Built on Same Level-Permanganate of Potash Recommended for Roup and Colds-Mustard Also Good.

Dry quarters, plenty of feed and exercise are necessary for the getting of winter eggs.

The surplus milk will return a larger profit when fed to the hens than when

fed to the hogs. The dust bath is essential to good

winter management of hens. All perches in the poultry house should be built on a level. built one above another, step-fashion, the hens will fight for the higher

perches with the result that some of them will become injured or eggs will be broken in them. For roup and colds, dissolve permanganate of potash in the drinking

water until the water is of a deep wine color, and keep this before the sick fowls all the time. Ground mustard, fed in the wet mash, is also good. A teaspoonful to each ten or twelve hens is about the right quantity to feed. A good way to insure an even mixture is to dissolve the mustard in water and use the water to moisten

The droppings give an indication of the health of the fowls. In health, the droppings are of sufficient consistency to hold their shape. They are dark in color, tapering off into grayish white, If the droppings are soft and of a yellowish or brownish color, an excessive quantity of fat-forcing foods in the ration is indicated. If, on the other hand, the droppings are watery, and dark, with streaks of mucus in them, it indicates that too much protein, es

A Mixed Flock of Fowls.

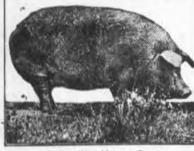

pecially animal protein, is being fed, and the meat food should be greatly reduced or omitted entirely for a time from the ration. A greenish watery diarrhea indicates unsanitary conditions, filthy water or food.

BIVE BROOD SOWS ATTENTION

Best to Have Animals Farrow at Near ly Same Time So Owner Can Watch Them Carefully.

Two weeks before the pigs are expected the sow should be placed in a farrowing pen connected with a dry yard large enough to allow her to exercise. Her bowels should be kept loose. She should have dry, sunny shelter, free from drafts. The sow should be petted, so that she will like to have her feeder handle her.

It is best to have the sows farrow at nearly the same time, and then the owner can watch them day and night during farrowing time. There should be just enough bedding for comfort and dryness. Cut straw or chaff is best. Little pigs often get tangled in

A Healthy Young Sow.

deep straw and are either crushed by the sow or die from exposure.

Give the sow as little attention as possible while she is farrowing, unless she must have assistance. In severe weather place the pigs as fast as they come in a basket in which a blanket is laid over a warm stone. Keep them well covered, and after all are born and have become warm and dry take them to their mother and place each one at a teat. Then cover the mother and pigs.

During the first forty-eight hours watch carefully, and if a pig strays from its mother, put it back against this country, her body where it will be warm.

PEARL HAS FAMOUS HISTORY

Among Other Things, It is the Oldest Object Used for Adornment of the Person.

The pearl is the only gem needing not the hand of man to bring to perfection, and history affords ample evidence of the intense fascination it has exercised upon the people of every age. The pearl is the oldest object of

Indian mythology often speaks of the pearl, attributing its discovery to the god Vishnu, who is said to have caused it to be drawn from the ocean for his daughter Pandaia. The records of the Babylonians, Egyptians, Persians and Romans also contain many references to the gem. The wife of Emperor Caligula, for an ordinary betrothal feast, is said to have decked herself with pearls to the value of \$1,000,000; and Julius Caesar presented Servilla, the mother of Brutus, with a specimen valued at \$250,

Philip II of Spain paid \$200,000 for a single pearl known as "Peregrina." It was found in Panama, was pearshaped and weighed 134 carats. Another king of Spain-Philip IV-purchased a pearl of Indian origin weighing 126 carats.

The largest pearl known is that which was once the property of Henry Philip Hope. Cylindrical in form, it is two inches long, four and a half inches in circumference at one end and three and a half inches at the other. It weighs 1,800 grains and is valued at \$300,000.

It is known that the beauty of the natural pearl sometimes proves evanescent. To retain its shimmering thing but what it was!" splendor it needs air and light. Acids can affect pearls, and emanations from the human skin can, it is contended, destroy the precious luster. which, once gone, cannot be recov ered. Sometimes, too, owing to their comparative softness, pearls become scratched and thus a source of anxiety to their owners.

EFFECT THAT WAS LASTING

Dumas Had Ready Explanation of the Presence of Sleepy Ones in Audience.

The elder Dumas was celebrated for his never-failing repartee in everyday conversation. In illustration there may be cited the following:

One evening he attended a theater in Paris with a literary colleague, witnessing a play written by the latter. The author of "Monte Cristo" noticed quet had gone to sleep during the perpointing to the sleeper, and whispered:

"Is that the effect your plays have upon some people?" Soon after the same couple went to

the same theater on an evening when a play by Dumas was being produced. works."

Why, my dear fellow," was the reply, "that's the same man we saw awake yet."

Allowance for Your Child.

child may be given a small reg lar allowance for his own use. Through this he may learn the joy of immediate indulgence of trifling whims; or he may learn to expend his up before. resources with discrimination; or he may learn the advantages of deferring expenditures for more favorable purburgh Dispatch. The child's claim to such an allowance can be justified to his mind on exactly the same ground as his claim to food and clothing and other material and immaterial wealth shared in the home. He gets these through his status as a dependent member of a household.

Traffic on the Duna.

It is estimated that more than 2,-000,000 tons of freight are transported by one, before there was room to open over the Duna each year. Among its the manhole door and to squirm out tributaries, the Mezha, Usvyat, Kas- over the slab; and I thought they rang also navigable. As is the general but nobody seemed to hear him either. case with Russian rivers, the Duna I got to my boat, tipped a fellow on abounds in fish, a very delicate the towing path to take it back and species of salmon being caught in its rivers.

Reptiles Had Chins Like Humans. Oddly enough, and for some reason quite unexplained, the nearest resemblance to the human chin is found in some of the most ancient reptiles yet discovered-strange and primitive creatures whose remains have been unearthed on the shores of the northern Dwina. It is not to be imagined that they could talk, for they had no brains to speak of. Their chins, which are strikingly humanlike, must have been meant by nature for some entire ly different purpose.

Toye cocked his head at both quesly as Cazalet turned to him before time to recognize?" proceeding.

right-hand drawer of his desk was as it had dropped upon the desk-it guess it's up to me to complete." had upset the ink-and there were cartridges lying loose in the open drawer, and the revolver was loaded. I swept it back into the drawer, turned the key and removed it with the bunch. But there was something else on the desk-that silver-mounted truncheon -and a man's cap was lying on the floor: I picked them both up. My first instinct. I confess it, was to remove every sign of manslaughter and to leave the scene to be reconstructed into one of accident-seizure-any-

He paused as if waiting for a question. None was asked. Toye's mouth might have been sewn up, his eyes were like hatpins driven into his head. The other two simply stared.

"It was a mad idea, but I had gone mad," continued Cazalet. "I had hated the victim alive, and it couldn't change me that he was dead or dying; that didn't make him a white man, and neither did it necessarily blacken the poor devil who had probably suffered from him like the rest of us and only struck him down in selfdefense. The revolver on the desk made that pretty plain. It was out of the way, but now I saw blood all over the desk as well; it was soaking into the blotter, and it knocked the bottom out of my idea. What was to be done? I had meddled already; how could I give the alarm without giving myself away to that extent, and God knows how much further? The most that one of the audience in the par- awful moment of the lot came as I hesitated-the dinner-gong went off in formance. He nudged his friend, the hall outside the door! I remember watching the thing on the floor

to see if it would move. "Then I lost my head-absolutely, I turned the key in the door, to give myself a few seconds' grace or start; it reminded me of the keys in my Again there was a man asleep in the hands. One of them was one of those parquet. "Look," said Dumas' friend, little round bramah keys. It seemed "at the result of your dramatic familiar to me even after so many years. I looked up, and there was my father's Michael Angelo closet, with its little, round bramah keyhole. I asleep here the other night. He is not opened it as the outer door was knocked at and then tried. But my mad instinct of altering every possible appearance, to mislead the police, stuck to me to the last. And I took the man's watch and chain into the closet with me, as well as the cap and truncheon that I had picked

"I don't know how long I was above ground, so to speak, but one of my father's objects had been to make his chasing, says a writer in the Pitts- retreat sound-tight, and I could scarcely hear what was going on in the room. That encouraged me; and two of you don't need telling how I got out through the foundations, because you know all about the hole I made myself as a boy in the floor under the things not as a reward of merit, but ollcloth. It took some finding with single matches: but the fear of your neck gives you eyes in your fingerends, and gimlets, too, by Jove! The worst part was getting out at the other end, into the cellars; there were heaps of empty bottles to move, one plya, Ulla, Disna and Bolder-aa are like a peal of bells, but I put them

"The big dog barked at me like blazes-he did again the other daypay for it-why haven't the police got hold of him?-and ran down to the bridge over the weir. I stopped a big car with a smart shaver smoking his pipe at the wheel. I should have thought he'd have come forward for the reward that was put up; but I pretended I was late for dinner I had in town, and I let him drop me at the Grand Hotel. He cost me a fiver, but I had on a waistcoat lined with notes, and I'd more than five minutes in hand at Charing Cross. If you want to know, it was the time in hand that gave me the whole idea of doubling back to Genoa; I must have been halfway up to town before I thought of

He had told the whole thing as he always could tell an actual experi-Except the Bible, no work has had ence; that was one reason why it rang so true to one listener at every point.

"You figure some on our credulity! was his first comment.

"I don't figure on anything from you. Toye, except a pair of handcuffs as a first installment!"

Toye rose in prompt acceptance of the challenge. "Seriously, Cazalet, you ask us to believe that you did all tion and answer, but inclined it quick- this to screen a man you didn't have out her hand.

'I've told you the facts."

"I went in and found Henry Craven | "Well, I guess you'd better tell It's the other way around, I guess, lying in his blood. That's gospel—it them to the police." Toye took his and about time I did something to was so I found him-lying just where hat and stick. Scruton was struggling he had fallen in a heap out of the from his chair. Blanche stood petrileather chair at his desk. The top fied, a dove under a serpent's spell, as Toye made her a sardonic bow from open, the key in it and the rest of the landing door. "You broke your bunch still swinging! A revolver lay side of the contract, Miss Blanche! I "Wait!"

> It was Scruton's raven croak; he ad tottered to his feet.

"Sure," said Toye, "if you've anything you want to say as an interested party.

"Only this-he's told the truth!" "Well, can he prove it?"

"I don't know," said Scruton.

"You?" Blanche chimed in there. "Yes, I'd like that drink first, if you don't mind. Cazalet." It was Blanche who got it for him, in an instant, Thank you! I'd say more if my blessing was worth having-but here's something that is. Listen to this, you American gentleman: I was the man who wrote to him in Naples. Leave it at that a minute; it was my second letter to him; the first was to Australia, in answer to one from him. It was the full history of my downfall. I got a warder to amuggle it out. That letter was my one chance.

"I know it by heart," said Cazalet, It was that and nothing else that made me leave before the shearing." "To meet me when I came out!" Scruton explained in a hoarse whisper. To-to keep me from going straight to that man, as I'd told him I should in my first letter! But you can't hit these things off to the day or the week; he'd told me where to write to him on his voyage, and I wrote to Naples, but that letter did not get

You Broke Your Side of the Con-

tract, Miss Blanche." smuggled out. My warder friend had got the sack. I had to put what I'd got to say so that you could read it two ways. So I told you, Cazalet, I was going straight up the river for a row -and you can pronounce that two ways. And I said I hoped I shouldn't break a scull-but there's another way of spelling that, and it was the other way I meant!" He chuckled grimly. I wanted you to lie low and let me lie low if that happened. I wanted just one man in the world to know I'd done it. But that's how we came to miss each other, for you timed it to a tick, if you hadn't misread me about the river."

He drank again, stood straighter and found a fuller voice.

"Yet I never meant to do it unless he made me, and at the back of my brain I never thought he would. I thought he'd do something for me, after all he'd done before! Shall I tell you what he did?"

"Got out his revolver!" cried Cazalet in a voice that was his own justification as well.

"Pretending it was going to be his check-book!" said Scruton, through his teeth. "But I heard him trying to cock it inside his drawer. There was his special constable's truncheon hanging on the wall-silver mounted, for all the world to know how he'd stood up for law and order in the sight of men! I tell you it was a joy to feel the weight of that truncheon, and to see the hero of Trafalgar Square fumbling with a thing he didn't understand! I hit him as hard as God would let me-and the rest you know -except that I nearly did trip over the man who swore it was broad daylight at the time!"

He tottered to the folding-doors, and stood there a moment, pointing to Cazalet with a hand that twitched as terribly as his dreadful face.

"No-the rest you did-the rest you did to save what wasn't worth saving! But-I think-I'll hold out long enough to thank you-just a little!" He was gone with a gibbering smile. Cazalet turned straight to Toye at ease.

the other door. "Well? Aren't you going too? You were near enough, you see! I'm an accessory all right"he dropped his voice-"but I'd be principal if I could instead of him!"

But Toye had come back into the room, twinkling with triumph, even rubbing his hands. "You didn't see? You didn't see? I never meant to go at all; it was a bit of bluff to make him own up, and it did, too, bully!" The couple gasped.

"You mean to tell me," cried Cazalet, "that you believed my story all the time?"

"Why, I didn't have a moment's

doubt about it!" Cazalet drew away from the chuckling creature and his crafty gles. But Blanche came forward and held

"Will you forgive me, Mr. Toye?" "Sure, if I had anything to forgive, help." He edged up to the folding door. "This is a two-man lob. Cazalet, the way I make it out. Guess it's my watch on deck!"

"The other's the way to the police station," said Cazalet densely.

Toye turned solemn on the word. It's the way to hell, if Miss Blanche will forgive me! This is more like the other place, thanks to you folks. Guess I'll leave the angels in charge!"

Angelic or not, the pair were alone at last; and through the doors they heard a quavering croak of welcome to the rather human god from the American machine.

"I'm afraid he'll never go back with you to the bush," whispered Blanche. "Scruton?"

"Yes." "I'm afraid, too. But I wanted to take somebody else out, too. I was trying to say so over a week ago, when we were talking about old Venus Potts. Blanchie, will you come?" (THE END.)

ONE ON THE FLOORWALKER

Presumably He Knew Dutles of His Position, But He Was Not Proficient in Spelling.

The worst thing about the following is that it is true, and what's more, that it happened in one of Pittaburgh's

The girl, stylishly attired, stepped up to the still more stylishly-attired floorwalker and inquired where she would find the chiffon. The floorwalker consulted a notebook. Her surprise came when he gravely told her that they did not keep chiffon.

"Why!" she gasped, "you cannot possibly mean that."

In her eagerness she stepped closes to the stylishly-attired man than Eleanor Gale says a stylishly-attired woman should, and looked over his shoulder at the notebook.

"Oh! I see," she said, flatly, as she moved off to ask the girl at the glove had been looking under the s's.-Baltimore Star.

Trapping Partridges, How partridges are trapped in Virginia and North Carolina, in the winter, is described as follows: A net measuring from 15 to 30 feet, and gold is destroyed annually by a Chiabout eight inches high, is put down ness custom of burning small pieces with stanchions; horizontally in the of gold leaf on certain anniversaries. center is an opening similar to the

Food by Proxy. Most of us know some particular food or drink, the desire for which is stimulated in us by reading about it But the writing must be skillful, or if not skillful, artlessly good. The cruder method of the stage produces the same effect; all smokers have experienced the almost overwhelming desire to smoke which comes upon them when someone lights a cigarette on the stage; these strange and rapid restaurant meals of the fashlonable theater, when a party sits down at a table and is whirled through six courses in about five minutes, surrounded by champagne bottles in ice buckets and trays of liquors, have an absurdly exciting effect.

Not a Nation of Singers. In this country, though we have produced many fine volces, we have never become a nation of singers. There are it is true, in most of the leading cities, choral societies, but the singing of large groups of people is comparative ly uncommon among us. Here is a matter for regret, for among all large bodies of singers where there has been afford to live long at the current more or less training the effect is beantiful and inspiring. In fact, there are few things in music more impressive than the singing of bundreds of voices.

Throttling a Scourge,

Prediction is made by government health officials that in a few more years typhoid fever will be almost as rare as smallpox. This prophecy is based on the rapidly increasing use of the vaccine and consequent immunization of entire localities from the dis-

NO BROTHERLY LOVE FOR HIS

Percival Was Anxious to Be Forgotten After Listening to Clarice's Treatment of Wiegan.

At last he realized that she was really in earnest about rejecting him. "At least," he said sadly, "at least,

love me as a brother." "Yes," she agreed sweetly. "Yes, Percival, I'll do that. I'll love you always as a brother."

At that moment little Wiegan, her kid brother, came into the parlor. "Hey, sis, did ya see me kits any-

wheres?" he said, "Get out of here, you little hemstitched, devilish, scheming, sneaking brat!" she cried shrilly. "You know you're sneaking around to see what you can see and hear what you can hear! Beat it, you double-jointed, eloven-hoofed freak!"

Wiegan withdrew. "Clarice," he said, after a thoughtful pause.

"Percival," she responded softly. "I've changed my mind," he said. Don't love me as a brother. Just forget me."-Detroit Pree Press.

Helping Some.

"Please give me something to est," asked the tramp at the back door, "I haven't anything for you to eat," replied the up-to-date woman; "but if you'll come in I'll put you next to the electric current, for I read that a theory has been advanced by a French scientist that electric currents can be made to take the place of food in sustaining life to a considerable degree."

Judged by His Actions. "What do you say to Mr. Twobble when he lingers in town after office hours?" asked Mrs. Dubwalte.

"Oh," replied Mrs. Twobble, "that depends on what he lingers for. If counter about the chiffons. The man Mr. Twobble is exceedingly gay when he comes in and addresses me as 'old girl.' I deliver a short lecture on the evils of intemperance."

Compound made her well, so I took it and now I am just as well as I ever was. cannot understand why women don't see how much pain and suffering they would escape by taking your medicine. I cannot praise it enough for it saved my life and kept me from the Insane Hospital."—Mrs. E. Shel.don, 5657 S.

Halsted St., Englewood, Ill.
Physicians undoubtedly did their best, battled with this case steadily and could do no more, but often the most scientific treatment is surpassed by the medicinal properties of the good old fashioned roots and herbs contained in Lydia E. Pinkham's Vegetable Compound.

If any complication exists it pays to write the Lydia E. Pinkham Medicine Co., Lynn, Mass., for special free advice.

MOSLEM "HOLY CITY"

MECCA ONE OF THE WONDERS OF THE WORLD.

Remarkable Spot to Which Every Mohammedan is Supposed to Make at Least One Pilgrimage During His Lifetime.

Not far from where Arabian lands now form a battleground for Turk and Briton stands the Mohammedan holy city of Mecca, toward which turn countless thousands of Moslems every day at the time for prayer, says a bulletin of the National Geographic soci-

Mecca, the native place of Mahomet, is the principal city of the Turkish vilayet of the Hejaz in Arabia and is located a few miles back from the coast of the Red sea, Jidda being its seaport and the landing place of nearly all its pilgrims who come by sea. Its population is difficult to determine because of its great number of visitors and at the height of the pilgrimage season it is usually much overcrowded.

To this holy city of Islam, Mecca, every good Moslem should make at least one pilgrimage during his lifetime. He must arrange his affairs so that his family will be taken care of in his absence and the money he uses for his journey, it is stipulated in his religion, must have been obtained by lawful means,

The more devout of Moslems usually transact no business either along the way or after arrival at Mecca, although the rules which prescribe conduct on this devout errand do not forbid such a thing. There are, however, many of the pilgrims who must combine religion with business, otherwise they could never find means to accomplish the journey. These, it would seem, have always been in the majority, for Mecca itself has, besides its religious standing, a location as an important

Mecca is surrounded by a great area of uncultivated land, called the haram, or sacred territory, where not even date palms grow, and the city is said by historians to have been founded to carry on trade with Abyssinia in winter and Syria in summer. Its bazaars at pilgrimage time are filled with the finest products of the East and a sin-STOMACH BITTERS gle one of its caravans has represented an investment of as much as \$100,000.

commercial center.

Arriving at the edge of the haram, the pilgrim changes his ordinary clothes for the ihram, the ancient pilgrimage dress, consisting of two cloths wrapped around himself in a certain prescribed manner. Thus attired he proceeds to the city and after the end of his devotions begins the return journey with the honorary title of haji, which is conferred upon all who have made the pilgrimage.

In the center of Mecca is located the great mosque which is really not much more than a great columned wall with seven minarets and is built around the most sacred relics. Inside this wall is called the haram, or sacred spot, and there stands the Ka'ba, the "holy of holies" of the Moslem, a rude stone building about forty feet square, the original of which is said to have been built by Abraham and his son Ishmael. It was the religious center of Mecca drafts. long before the time of Mahomet, who threw out its idols and made of it the sacred place of Islam. Many times it has been destroyed by fire and flood, but it has always been rebuilt approximately in the original design. The Ka'ba has no windows and its door is several feet above the surrounding level, entrance being effected by means of portable steps. Inside its walls are covered with silver, the gift of wealthy Mahommedans, its floor is a mosaic of varicolored marbles and its ceiling is hung with silks of wondrous hue and texture. Outside, much of the time its walls are covered with rich brocade, on the borders of which is embroidered in gold thread quotations from the Koran.

In the wall of the Ka'ba, near its southeast corner and at a convenient were scarcely on a level with Bridget's height, is the famous black stone said to have been given to Abraham by the angel Gabriel. In performing the tawaf, which is the custom of seven deserted canvases! It took some timetimes circuiting the Ka'ba, this great for Anne to recognize the fact that the stone is kissed by the pilgrims each sketches had been made in the time it is passed.

Within the walls of the mosque is found what is supposed to be the tomb of Abraham and stone slabs mark what Moslems believe to be the graves in China. of Hagar and Ishmael. All these are holy spots and must be visited in making the tawaf.

Among the other holy relics inside the city is the famous Zamzam well, said to have been used by Hagar in se- tale about those canvases found in the curing water for her son, Ishmael. The waters of this well are supposed to midic, but the story had novelty and have wonderful curative values and a brisk traffic is driven with the pilgrims large sum. in the sale of jars and bottles for taking away the water. The well is believed to have been lost after the days of Hagar and found later by the grandfather of the prophet, Mahomet.

Bus Conductors' French.

Bus conductors in town really are acquiring some knowledge of the French language. One was heard recently addressing a somewhat startled French passenger somewhat thus: "Piccadilly-circus? Doo pennies, ice-ee moosoo, tray byang." It seemed to give him honest pleasure.--London Evening Standard.

THE ARTIST

By ETHEL VANE.

(Copyright, 1916, by the McClure Newspa-per Syndicate.)

Anne Morrell sighed hopelessly and dashed up from her typewriter. The neighbor's dog barked first at the front of the house and then at the back. In the kitchen below, Bridget sang happily, but excruciatingly, and outside motors in unbroken succession whizzed

Anne was visibly distracted. She had tried every room in the house in her effort to find seclusion and quiet. Apparently such conditions did not exist. Her stories were beginning to show the strain under which she was dragging them from her noise-racked brain. "Soon, at this rate, I shall have no checks coming in," she told herself as she banged out of the noisy house and off through the meadows. There, at least, was freedom from irritation. She could have an hour or two of concentrated thought among the greens and yellows of nature.

Anne had to walk through the village in order to reach that haven of quiet. During that walk, she caught sight of what seemed to her the very things she most needed in life.

At a rustic shop there was displayed a small thatched summerhouse. Anne's heart beat ecstatically. The summerhouse, if the price were not too great, would make a perfectly darling den. It could be placed at the extreme foot of the garden, away from barking dogs and Bridget's singing.

Anne tripped over the threshold of the shop in her anxiety to secure the treasure. It occurred to her suddenly that she was all sorts of a small idiot never before to have thought of such a simple means of seclusion.

The following day, she carried her she left the house with the last load of Irish maid was a treasure even if her song was distracting.

That rustic summerhouse proved to be one of the best investments of introduction, stepping without invita-Anne's literary career. The fifteen tion into the attractive little den. "I dollars which she had paid for it had am the person whose canvases you seemed large enough at the time, but found in the thatch." Then he seated when a few weeks of seclusion within its shelter sent her stories into the better magazines she rejoiced over her purchase. From time to time, small Improvements found their way into the little den. Flowered cretonnes covered Anne's desk and chair and a picture or two crept into the homey atmosphere. A tiny bit of lace draped the single held the rough exterior in loving embrace. She kept her tiny percolator on an improvised shelf within easy reach, and altogether the summerbecame a most satisfactory house workshop. Anne realized that she smile. could never again go back to a house peopled by other personalities and continue to do good work.

It was not until the cool autumn days came on that she realized that a means of protection against chilly days must be considered.

So she purchased tar paper with which to seal up small apertures against the entrance of unfriendly

was while engaged in this la able business of making herself proof ing furiously and she knew it. "I am against wind and chill that Anne discovered several old canvases. They were stored away between the dusty and weather-stained layers of the stances," Granville laughed. wheat straw which formed the roof covering. At sight of them the creative ele-

ment in Anne was seized with sudden inspiration. Surely a worth-while story of some nature should develop from a bad fit of the blues." these abandoned and probably longforgotten paintings. She laughed aloud as she saw the

first one. Surely no less artistic use of ize another tailor?" paint and canvas had ever been made. And each one seemed more absurd and toneless than its predecessor. So far as art was concerned, these paintings singing.

Surely the story of a sad or even tragic finish hung closely about these meadows through which she so often walked for inspiration. One less familiar with the landscape might have mistaken the sorry affairs for scenes

"Poor soul!" soliloquized Anne. "Is there anything so sad in life as missing one's ideals?"

Then she sat down at once and worked out a delightfully romantic thatch. No doubt the plot was brocharm enough to sell for an unusually

In her story, Anne had been so realistic in her treatment as to quote some lines she had discovered on the back of a wooden box which had once held paint tubes. "Farewell to art—Granville," was the touching and suggestive legend. Anne had smiled when she read the words, for really there had been no art to bid farewell to. But apparently the painter had thought differently. Anne wondered if he had gone back to the brushes and was now starving in a garret or haunting magazine offices with straggling hair, wild eyes and an armful of atrocious draw ings.

. As a matter of fact, Jack Granville, a month later, was comfortably ensconced in his most luxurious armchair smoking a good cigar. His hair always willing to come along and was short cropped, his eyes were wild hand it to you gratis."

his general make-up to suggest Bobemia or the artistic temperament.

It was the hour of his rather hearty bachelor breakfast and his six feet of decided masculinity was still envelhis cold bath. A cup of excellent cof- kidneys get sluggish and clog, you suffer fee steamed on a table beside him from backache, sick headache, dizzy spells, and a copy of a popular magazine lay open on the broad arm of his chair. His valet whistled softly in the adjoining room.

"Stubbs!" called out Granville suddenly. "Get Evans on the wire. I want to talk with him."

While Stubbs was getting into communication with the editor of the Write your symptoms and send a sample magazine in which Anne Morrell's of urine for test. Experience has taught story was published, Granville sat with Dr. Pierce that "Anuric" is a most powhalf-closed eyes pondering over the enful agent in dissolving uric acid, and is for nearly 50 years. odd situation. Evans was his intimate friend, it happened, so Granville knew he was on the right track.

"Peach!" was the inelegant exprestion Evans used to picture Anne to his inquiring friend. "Glorious red hair and a pair of eyes that make you blink. I've proposed to her a half dozen times, but there's nothing doing in that line. One of those wedded-toart, temperamental girls, you know."

After sufficient good-natured delay on Evans' part, Granville was given Anne's address, and that afternoon he donned his most attractive habiliments, ordered Stubbs to bring around his car and motored over to the Morrells' home

Bridget pointed to the summerhouse at the foot of the garden when Granville asked for Miss Morrell.

"Sure ye'll be a sorry man if ye disturb her in wan of thim trances," she admonished Granville as he turned quickly toward the thatch.

Anne looked out of her tiny window when crunching footsteps warned her of someone's approach. Then she popped her head over the rustic railtypewriter and low table down to the ing and Granville smiled in appreciathatched and rustic summerhouse. She tion. Evans, he admitted, had not exsmiled affectionately upon Bridget as aggerated. Then memory turned him back to youthful days when he had sat writer's odds and ends. After all, the in that selfsame summerhouse and wasted perfectly good paints, canvases and oil in wanton recklessness.

"I'm Granville," he said by way of himself precariously on a camp stool and beamed geniatty upon the astonished girl, who was quite breathless with interest are amazement.

"But-you-surely you didn't suc-ceed-with that start!" she gasped, ending a covert appraising glance at his prosperous appearance. She drew out from beneath her table some of window, and toward midsummer vines the fearfully inartistic daubs and spread them out before Granville. At which he laughed merrily and

> "I keep them close beside me for inspiration," Anne said, with a dry

POLITICAL ANNOUNCEMENTS

FOR SHERIFF

I hereby announce my candidacy for the Democratic nomination for Sheriff of Santa Cruz county, subject to the will of the voters in the primary election, September 12, 1916.

R. R. EARHART.

FOR COUNTY SUPERINTENDENT OF SCHOOLS

I hereby announce my candidacy for the office of County Superintendent of Schools of Santa Cruz county, subject to the will of the Democratic voters at the primary, September 12, 1916. JOSEPHINE A. SAXON.

FOR STATE MINE INSPECTOR.

I hereby announce my candidacy for the office of State Mining Inspector, subject to the action of the Democratic voters at the primary, Sept. 12, 1916. ED J. GRANT.

FOR COUNTY RECORDER.

I hereby announce myself as a candidate for the Democratic nomination for the office of County Recorder of Santa Cruz County, subject to the action of the voters at the primary, Sept 12, ARCUS REDDOCH.

It Isn't Your Town-It's You.

If you want to live in the kind of a town Like the kind of a town you like,
You needn't slip your clothes in a grip
And start on a long, long hike.
You'll only find what you left behind,
For there's nothing that's really new. It's a knock at yoursef when you knock

your town— It isn't your town—it's you.

Real towns are not made by men afraid Lest somebody else gets ahead. When everyone works and nobody shirks You can raise a town from the dead, And if while you make your personal

stake Your neighbor can make one, too, Your town will be what you want to see; It isn't your town—it's you.
—Linn Digest.

lake and 25% to 25% c for electrolytic.

H. B. Lawrence is now superintendent at the Andes mine on Red Mountain.

An option has been given on the Dixie this week. A deal is on for the purchase of this property by eastern parties.

Secretary Lane has announced that a new mining experiment station will be locaten at Tucson and a safety station Last publication Sept. 15, 1916. at Raton, N. M.

Charley Jones, the Bisbee operator, was in Patagonia this week, looking over different mining properties here in which he is interested.

Six or seven new freight teams have been added to the Duquesne haul this week, and a large increase in tonnage

James P. Harvey, a mining man of Spokane, said to be a representative of 'Patsy" Clark, has been in the district this week, examining the Bland mine in the Alto country.

Poor and almost forgotten, Phillip Deidensheimer, 84 years old, a mining engineer once world famous, died in San Francisco last week. He invented, but never patented, the "square set," a system of underground timbering, now used all over the world.

There is considerable talk heard latey of the starting up of the old smelter at Benson. A representative of the American Smelting & Refaining company was in Patagonia this week, and he said the smelter would again be worked within the very near future, and advised shippers from this district to send their Sonoita, Ariz.; Edward S. Black, of Sonoita, Ariz.; Edward S. Black, of ore there. It would be a considerable saving in freight.

Sonoita; Ariz.

The crosscut at the Hardtmayer mine, a few miles out of town, is in good ore, according to reports. The crosscut is making for a big copper ledge, and will be continued several hundred feet. The Hardtmayer was formerly known as the

ore haul. He was backing down a hill after a trailer, when the brake broke, letting the big machine go over the grade. Elmer "got from under" in time to escape injury, and the cater- First publication July 28-8-25-16 pillar was not demolished as much as would be supposed. It went over the grade and fell about 40 feet, but landed made a trip over to the Rosemont dis-
