PATAGONIA, SANTA CRUZ COUNTY, ARIZONA, FRIDAY, SEPT. 15, 1916

No. 39

Primary Returns Give Hunt Big Majority; Francis May Win

Returns from over the state of the result of Tuesday's primary election, while yet incomplete, seem to assure the renomination of Geo. W. P. Hunt for governor by a majority of several thousand votes. Other Democrats probably nominated are: Ross for supreme court, Jones for attorney-general, Osborn for secretary of state, Bolin for mine inspector, Case for superintendent of public instruction, Betts for corporation commissioner, and Howe, tax commissioner. Boyce for auditor had no contest. Kibbey has been nominated by the Republicans for United States senator and probably Eads for representative in congress. A very small vote was polled throughout the state.

The race between Francis, McIntyre and Fitch for the nomination for county treasurer on the Democratic county ticket, was the only real contest at the primary, yet at this date, two full days and nights after the election, the result is still uncertain. The latest information from Nogales and other points in the county, late Thursday night, was that Francis was still in the lead 3 votes and Mr. McIntyre had conceded him the nomination. Sonoita precinct is still to hear from, and it is believed this vote will add to Francis' plurality. There may be a small precinct or two in the west side country yet to come in, which however, is not expected to overcome Francis' probable gain at Sonoita, although it is admitted Mr. McIntyre will be the stronger candidate in the west side.

Following is the result of the Primary held in Patagonia last Tuesday:

Presidential Electors: Democrats, Dougherty 29, Pickett 21, Cobb 43, Wood 26, Republicans, Gardner 19, Hubbell 13, Cook 13, Greenway 19. Socialist and Prohibition none.

Congressional—U. S. Senate: Ashurst, Democrat, 66. Republicans, Stillwell, none, Kibby 14.

U. S. Representative: Democrat, Carl Hayden 54, Worsley 14. Republicans Nelson 5, Eads 7.

State—Judiciary: Democrat, Ross 17, Duffy 52. Republican, Baughn 13.

Governor: Democrat, Hunt 51, Olney 17. Republican, Campbell 13.

Sec. of State: Democrat, Osborn 53, Simms 9. Republican, Prochaska 11.

State Auditor: Democrat, Boyce 51. Republican, Merrill 12.

State Treasurer: Democrat, Johnson 50. Republican, Campbell 13.

Attorney General: Democrat, Jones 37, Struckmeyer 4, Curley 16, Johnson 4. Republican, Gus 13.

Supt. Public Instruction: Democrat, Case 32, Boehring, 22, Riggins 6. Republican, Matthews 12.

Corporation Commission: Democrat, Betts 20, Miller 31. Republican, Cloonan 10.

State Mine Inspector: Democrat, Bolin 35, Grant 20. Republican, McKinzie 10.

Tax Commission; Democrat, Mur-

phy 30, Howe 26. Republican, Smalley 12.

County Attorney: Democrat, Hardy 56. Republican, DeReimer 13.

Sheriff: Democrat, Earhart 50. Republican, McKnight 13.

Treasurer: Democrat, 7, McIntyre 14, Francis 49. Republican, Bur-

gess 11.

School Superintendent: Democrat, Saxon 63. Republican, Kenshaw 1.

Recorder: Democrat, Reddock, 63. Republican, Fowler 15.

Assessor: Democrat, Wager 57.

State Senate: Democrat, Farrell 57. Republican, Ferguson 12.

Representative: Democrat, Marsh 46. Republican Collier 14.

Precinct Officers—Justice of the Peace: Price 62.

Constable: Lou Stevens 15.

Ashburn and Shultz Democratic committeemen and Ferguson Republican committeeman.

Arcus Reddock, candidate for reelection to the office of recorder, and Mrs. Josephine Saxon, for school superintendent, each received 63 votes, the highest of any candidates on the ticket in this precinct.

Mr. and Mrs. A. J. Hook were in town a short time Monday from the Alto district. Three shifts are now working on the Royal-Blue, and work is also being done on the Wandering Jew. A 20-ton mill has been ordered to treat the ores of these two properties, and Mr. Hook is expecting its arrival within a few days.

A movement is said to be on foot by a few of the big operating companies in this county to erect a hospital in some convenient place, probably at Patagonia, for use of the mining companies adjacent. Relief or temporary hospitals may be put up at each mine where a large crew is employed, and the main hospital used as the base.

W. A. Sloan went to Nogales yesterday afternoon to bring Mrs. Sloan back to their home at Harshaw. Mrs. Sloan has been sick at the hospital in Nogales, and her friends will be pleased to hear she has sufficiently recovered to be taken home.

Mrs. F. A. Stone is in Nogales in attendance upon her daughter Isabelle, who is reported ill.

CONCENTRATES

James Keating is doing his annual work on the Pittsburgh in Flux canyon.

The Andes on Red Mountain is still drifting on the 90-foot level.

"San Simon Jack" Laister is doing his annual assessment work on his group of claims up in the Red Rock district.

W. A. Calderhead, a mining man of Douglas, interested in the Hardsbell, came in Wednesday and went out to that property.

Jewel Trask has reported a rich find of silver-lead ore out in the Tyndall district. Croppings assay 83 oz. silver and 17 per cent lead.

Clark and Peterson are reported to have made a rich strike on the American Boy. It is said that the pay vein is from three to four feet wide and runs high in silver and copper values.

The Pinal mine, formerly the Hoesey, has finished placing its compressor and development work is progressing more rapidly. They are piling out good ore with every shot.

Herb McCutchan, who has the contract for doing the excavation work for the new 100-ton oil flotation mill at the Three R, was in town one day this week. He expects to finish his contract within a few days.

A carload of machinery is on the platform here for Kennedy Bros., who are operating the Rupert mine, adjoining the Mansfield. This is an old producer. They are shipping a carload of lead-silver ore this week that looks good.

Dave Putman, the veteran prospector and booster, did a nice bit of publicity work for the mines of the Patagonia district when the brigade of soldiers was in town this week. He took specimens of ore from different properties, broke them up into small pieces, and distributed them among hundreds of the soldier boys, explaining to them the mineral contents of the ore, and at the same time giving a short lecture on the mineral output and resources of the district.

HERE AND THERE

Mrs. C. E. Travis is visiting home folks at Huachuca for a few days.

Mrs. James Richie returned from Nogales Thursday morning, after a short trip.

D. C. Chalmers and Chas. Harrison were in town from the Lochiel country last Saturday.

Postmaster Shuckmann and Editor Miller of Nogales were greeting friends in Patagonia one day this week.

Miss Hilda Trask of Benson is visiting at the home of her brother, C. J. Trask and wife, in Patagonia.

The old settlers' picnic held at Canelo (Fruitland) last Saturday, was well attended by people throughout the county.

Burglars forced an entrance into Hayden Pendergrass' soft drink establishment one night this week, and secured \$20 from the till.

A fine big Democratic son was born to Mr. and Mrs. A. D. Page in Nogales Tuesday of this week. Grandpa Jim Reagan is receiving congratulations.

If early indications are a criterion, the harness races at the state fair at Phoenix this fall will be by far the largest ever held in the southwest.

At the christening ceremony of the little son of Mr. and Mrs. Rafael Amado last Saturday, at which a priest from Nogales officiated, Mayor Wm. Powers was godfather.

Mrs. Jack Price and sister, Miss Rodriguez, who had been visiting in Patagonia for the past few weeks, left last Saturday for El Paso for a two months visit with home folks.

For the primary election here Tuesday, Tom Shultz was appointed inspector; Mrs. Anna H. Fortune and Ed Ellis were the judges; Mrs. E. P. Cook and P. M. O'Neill were the clerks. This made a very good board.

Two regiments of California militiamen, the 7th and 2nd, were through town Monday, en route to Fort Huachuca from Nogales. The band concert given on the ore platform by the regi-

State of Ohio, City of Toledo, Lucas County, ss.

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of HALL'S CATARRH CURE. FRANK J. CHENEY Sworn to before me and subscribed to my presence, this 6th day of December, A. D. 1916. A. W. GLEASON, (Notary Public.)

Hall's Catarrh Cure is taken internally and acts through the Blood on the Mucous Surfaces of the System. Send for testimonials, free.

mental band was greatly appreciated by Patagonians.

Dr. Shappell, father of the two Shappell boys who have been engaged in mining in this county for the past several months, is spending a few weeks in the district.

Mrs. Sullenger, wife of the undersheriff of Pima county, with her little daughter, are enjoying a visit at the home of Mrs. John Archer, at the Forsyth place, down the river.

C. L. Scheler, interested in the Rupert group of mines, was very painfully but not seriously injured one day this week while employed repairing the road between the Gringo and Mansfield.

Joe Davenport of Elgin is planning to bring down his machine and starting an auto stage line from here to Nogales and Tucson, the car not to run by a regular schedule, but as ordered.

Miss Lottie Wilson left last week for Tempe, Arizona, to attend the State normal. Miss Lottie is one of the best scholars ever graduated from the local schools, and last term substituted on different occasions for the regular teachers. Her progress at the state's big normal will be watched with interest by her many friends here.

Mrs. Schultz cooked some pumpkin pie for the boarders at the Patagonia Smokehouse Restaurant yesterday, which came near causing a riot among Buck Nix, Pat Patterson, Paul O'Neill and several other young hunkies who are regular feeders at that restaurant. It seems a waitress sliced Buck Nix a larger cut than the others—then the trouble started.

Put one pint of white tepary beans to soak at night in cold water, adding one-half teaspoonful of baking soda stirred in well. Next morning wash and put to cook in cold water, allowing about 30 minutes to boiling point, boil for three hours. Now add salt to taste and season with two heaping table-spoonfuls of Crusto or cooking compound; boil for two hours longer, and serve. For a change, bake for two hours with or without tomatoes. Boil or bake until juice is thick and creamy, but not dry. Never add salt or seasoning until beans are cooked soft. Remember that the richness and flavor of beans depends upon the proper cooking and not alone on the seasoning.

Work on Two Parks for Patagonia Has Started This Week

Work has been started this week upon what will be the biggest piece of civic improvement that Patagonia has ever had, and which few towns of the same size and relative importance in the country can boast of. Two parks, consisting of several lots each, one located in the northern end of town, above the Powell place, and the other in the eastern edge of town, on the Nogales road, are being cleared, preparatory to setting out trees, flowers, shrubbery, etc.

First work on the two parks will consist of having wells put down, reservoir tanks and pipes placed. An attractive and durable fence will enclose each of the two tracts. Each park is to contain not less than six lots.

The total cost of the work will amount to several thousand dollars, as the lots alone have a ready market at from \$200 to \$250 apiece. Col. R. R. Richardson is donating the property for park purposes and is also spending the money for their improvement and beautification.

L. L. Gilman, the jeweler and optician, at Bisbee, Leave watches and other repair work at Fessler's Barber shop. Prices reasonable and work guaranteed.—Adv.

Henry Carnes, familiarly known as "Bastus," an account of whose wedding was published in last week's Patagonian, has been appointed deputy county ranger and will be stationed in the west side country to take the place of Pat Patterson, who has resigned to devote his entire time to the promotion and construction of the new telephone system for Patagonia and vicinity.

MOST BEAUTIFUL WORD

CHOICES MADE BY STUDENTS OF DIFFERENT AGES.

Some of Them Are Interesting, Pa-thetic, and Some Amusing—College Professor Gives Result of His Investigations.

What is the most beautiful word in the English language? A college professor, who has been teaching for a number of years, has collected some interesting facts concerning the preferences that schoolgirls and schoolboys entertain for certain words. He has made the experiment with some 20 classes, all the way from an ungraded class in a country school to the senior class in college.

At the conclusion of a recitation the teacher has had little slips of blank paper distributed. He has then requested each pupil to write down—without consulting his neighbor—what he thought the most beautiful word in the English language, giving consideration both to sound and to sense.

Of the 600 pupils that he has had, 405 wrote the name "mother;" 82 wrote "home;" 22, "father;" 18, "daddy;" 16, "vacation;" 11, "baseball;" 9, "football;" 7, "love;" 3, "sister;" 2, "aunties," and 2, "grandmother."

The following words received one vote each: "Grandpa," "vesper," "moonlight," "hope," "rose," "hyacinth," "angel," "music" and "swimmin' hole."

Of the remaining 14, one, a response from a very bright boy, puzzled the professor. That boy wrote "cellar door." When asked about it, he pronounced it "cellah doah," and explained, "Oh, it just sounds pretty."

The other 13 ballots, all for the same word, amused and perplexed the professor. They were all handed it at the same time from a class of 29 healthy, growing, hard-working country boys. There was, the teacher insists, no opportunity for collusion. The ballot was taken silently. Each ballot was then folded and dropped into a hat that the teacher asked one of the boys to pass around.

Those 13 citizens-to-be deliberately wrote down the ugly-sounding, greasy-looking, thoroughly unattractive word "victuals." What could have been more suggestive of that teacher's opportunity than the fact that nearly half of a class of 29 immortal souls thought "victuals" the most beautiful word in the English language?

And what higher compliment could be paid to motherhood and the American home than the fact that 527 of these 600 boys and girls, young men and young women, independently, and at various times and places, selected words that suggested family relationship as the sweetest words in their language?—Youth's Companion.

DEFENSE OF THE FAIRY TALE

Writer Points Out Its Importance in the Scheme of Education of the Child.

Ignorance of fairyland is the punishment of intellectual vanity—the vanity of the average pedagogue, who has forgotten that education means leading forth and not stuffing in.

It is the vanity of the physiologist who, forgetting that the germ-plasm is a faculty of influence and enterprise, not an arrangement of molecules, thinks to create it in a test-tube.

It is the vanity of the eugenicist who believes he will improve upon those ancient ways of life which, for a few ages before Mendel and Weissmann, managed, all untutored, to evolve a reverent man, something more marvelous than these modern academic things who seem so ignorant of their native virtues.

To the fairy tale we must often look, if we are to mend our ways with the child and lead him forth to find that mighty world, that true self, which is the idea of him laid up in the heart of God.—New York Telegram.

Under False Pretenses.

Many persons are under the impression that America has few, if any, native plants worthy of cultivation in the home garden. They have been accustomed to look upon them as weeds and wild things, and so unfamiliar are they with native flowers that they fail to recognize them when they meet them outside their native haunts. A writer tells how he transplanted a stalk of goldenrod from a fence corner in the pasture to a place in his garden. It flourished luxuriantly, and sent up many stalks as high as a man's head, each crowned with a great plume of brilliant flowers.

A neighbor was attracted by the beauty of the plant, and declared it must have cost its owner some dollars. When told, however, that numbers of the same plant were flourishing behind his barn, he exclaimed: "What! You mean to tell me it's yallerweed!" And he went away with the air of one who had been imposed upon.—Country Gentleman.

Ventilating Profits.

Cracks in the wall ventilate the profits out of the stable.

LOVE ALWAYS FINDS A WAY

Liver and Onions, or a Struggle Between Love and Appetite—Letter Was Written First.

That night, 600 miles from home, in the dining room of the Travelers' Retreat, Higginson Bukettshop battled long and bravely with his appetite.

He hadn't written Clarabelle the daily letter yet, and all the hotel offered for supper was liver and onions, onions and liver, and liver as well as onions.

"What shall I do?" moaned the unhappy man. "I am famished, yet how can I send Clarabelle my usual kiss at the end of the letter after eating those onions? She will be sure to detect them—she is so sensitive—and then the engagement will be off!"

Meanwhile the waiter was standing patiently at his elbow, remarking, "De liver'n onions is very good, sah. De onions'n liver is right toler'ble, sah."

"Hang it all, was ever man in such a fix!" cried Higginson Bukettshop. "Love or liver? Onions or Clarabelle?" Suddenly his handsome face lit up.

"Liver and onions!" he ordered. "By suspenders, I'll send the letter before I eat!"

And, though the letter was unusually impassioned, he had finished writing it, kiss and all, before the liver and onions arrived.—Detroit Free Press.

Plain Diagnosis.

"Now, doc," said the patient who wasn't so very sick, "I want you to get me a nurse. What I want is a nurse with golden hair, blue eyes, pretty figure and melodious voice."

"You don't want a nurse," retorted the doctor with some authority. "What you want is a front seat at a musical comedy."

BRITISH BUSINESS METHODS.

"Has your son brought back any business methods from London?"

"Oh! yes. He thinks we ought to serve tea afternoons and that all the stenographers ought to be blondes."

Overlooked.

"Are you the editor of the paper?" asked the lady with the drab spats, calling.

"I am," replied the man with the poised pencil.

"Well, I called to ask if you wouldn't get larger type. My name was in your paper five times last week and a neighbor of mine told me she never saw it."

Nobody Loves a Fat Man.

Biggins (a man of abundant girth)—The doctor said I need iron.

Badger—Internally?

Biggins—What a question! How else?

Badger—I didn't know but he meant externally in the shape of a hoop or two.

Not Easily Swallowed.

Bacon—This paper says a camera small enough to be swallowed to photograph the interior of the stomach has been invented by a Danish surgeon.

Egbert—Do you believe it?

"Certainly I believe it."

"Well, some people will swallow most anything."

Then He Ducked.

Mrs. Bacon—I see it is said that many of the women of Chile are employed as car conductors.

Mr. Bacon—Never would do over here.

"Why not? I'd like to know."

"Why, the rear platforms are crowded enough already by men."

Man of Excuses.

Mr. Crimsonbeak—How long do you suppose it would take to come from the moon to the earth, dear?

Mrs. Crimsonbeak—I don't know and, what's more, I don't care; but if you are going to give that as your excuse for getting home late last night, it won't go."

Perhaps.

Mollie—I see an English inventor has equipped his flying machine with an acetylene flare, which would burst into flame and form a signal should he fall into the sea.

Chollie—But wouldn't that frighten the fish?

His Rank.

"I suppose the man who has charge of the coining of 25-cent pieces has an army rank."

"What army rank could he have?"

"That of quartermaster."

Fine Cut.

"I certainly like the way our new cook prepares spaghetti."

"How's that?"

"She runs it through the meat chopper first."—Juda.

EVERLASTING NAY PRODUCES LAWLESSNESS IN CHILDREN

By SIDONIE MATZNER GRUENBERG

Mother, May I Take Off My Shoes and Stockings?

LAWRENCE came running up to the porch, where his mother and a visitor were sewing. Pausing long enough to satisfy the conventions, he asked breathlessly: "Mother, may I take off my shoes and stockings and go barefoot this afternoon?" The negative answer came short and sharp. Then Lawrence began to tease. "You let me Monday and last week," he reminded her. "I know I did," said mother, "but not this afternoon." There was no reason given, and none required, apparently. It was merely a question of having the last word. Of course, mother had the last word.

NUNAMAKER IS HITTING HARD

Catcher Let Go by Boston Red Sox Is Proving Valuable Man for Manager Bill Donovan.

Leslie Nunamaker, the catcher of the New York Americans, has been a real batting sensation to date. Nunamaker was let go by the Red Sox to the Yanks and has proved a valuable

Leslie Nunamaker.

man for Bill Donovan. His work with the stick has been gilded so far this season. If he keeps up his slugging it will be hard work to keep the team from the top, with the other strength it has acquired this year.

Many People in This Strange City Never Saw the Light of Day

In Galicia there is one of the most remarkable underground cities in the world. It has a population of over a thousand men, women and children, most of whom have never seen the light of day.

It is known as the City of the Salt Mines, and is situated several hundred feet below the earth's surface. Its being is due to the greatest salt mine in the world, which, though it has been mined for many generations, seems inexhaustible. The city has its town hall, church, theater, and assembly room, all made from the crystallized rock salt. It has long, wide streets and big squares, lighted by electricity.

There are numerous instances of families in this underground city where not a single individual in three or four generations has seen the sun.

eggs beaten stiffly. Fill the ramekins and bake for 15 minutes in a medium oven.

Triplex Soup.

Use equal quantities of beef, lamb or mutton and veal, add a pint of water to each pound of the meat. Cut the meat in small pieces, adding the bones, then cover with cold water and simmer for four hours. Strain and season with salt. Cool to remove the fat before serving.

For Her Coiffure.

Much attention to the tresses is paid these days.

To wear smart hats one's hair must be fashionably arranged.

For evening occasions there are many beautiful hair ornaments.

The fan-shaped Spanish comb is quite the vogue just now—it suits the new high form of dressing the hair.

Fascinating little winged and flower effects, worked out in rhinestones on imitation shell, may be worn with the hair high or low.

IT MADE A DIFFERENCE

ARE YOU AND PAPA GETTING ALONG ANY BETTER, NOW, FRED?

Pointed Paragraphs.

Some people think anything tiresome that is a duty.

It's easy for a man to get married if he doesn't want to.

Some women have a mania for collecting marriage certificates.

A woman can believe only half she hears when she so chooses.

Most of us believe in everlasting punishment for our enemies.

GIRLS TRAINED IN BUSINESS SUCCESS IN HOME FINANCING

By JOHN M. OSKISON.

Forty-four girls recently completed a course of training in an association supported by New York department stores. They are the pioneers of a new idea.

In establishing this training school the store directors broke away from the old theory that since the store girl was not expected to stay permanently at work, but would get married, nothing beyond "welfare" work was fitting in her behalf.

Under the new plan the girl is to make a serious study of department store employment. She is to find out what elements enter into the success of the particular department in which she works. She is to know costs and efficiency in handling goods; she is to be trained to look upon her job as one leading to promotion.

From such a store experience, based on the new training, the girl who marries will go into the home with the purpose to study its economic problems and make it a financial success.

DADDY'S EVENING FAIRY TALE

MARY GRAHAM BONNER

FAIRIES PLEASE MR. BOOK-CASE.

"The fairies are the best little peace-makers in the world," began daddy, as he saw that the children were ready to hear what the fairies had been doing all day.

"Last night," he went on, "the book-case in a nursery became very, very angry. He just talked and muttered to himself all night. Every little while the children would wake up for they could hear the book-case scolding away. Of course they didn't know that the book-case was really talking and scolding. They thought it was only a creaking they heard but it woke them up ever so many times.

"That was just what the book-case wanted. He was feeling so angry, he just wanted to wake up the little boys and girls who were sleeping in the nursery.

"Well," he creaked, "I am too mad to stand here any more. I think I will just fall down. That would be a

"Now, Don't Be Angry, Mr. Book Case."

good joke. That would make all the little boys and girls appreciate what I am. What would happen to all their favorite picture books if I fell down? Yes, what indeed?

"And how about those books of ships and pirates and adventures that the creatures they call boys like! What would happen to them if I fell down and dropped them all? Or the books they paint in and cut out paper dolls from?

"They would all have their covers broken and no doubt the pages of a great many would fall out. They would have fallen out long ago, and the covers would have been broken if they had not had me to hold them.

"Now what makes me so mad is that these children were talking today, and they said they could use me out in the back yard for their snowballs, snow ice cream and such nonsense in the winter—and in the spring, dear, dear me, and at this the book-case would have cried if he had only known how they even said I could be used for mud pies. They said they didn't need me any more. They could put their books in the closet. In the cold, dark, dreary closet. Poor, dear books. And I have treated them so well and been so fond of them. I will just have to fall down and lose my temper and crash with rage for I am not appreciated. Oh, it's very sad!

"All this time the fairies had been listening. They had felt very badly that the book-case was behaving so disgracefully and when they saw he was really in earnest they just began to talk to him.

"They ran along the shelves and crawled in and out of the books and said to the book-case:

"Now, don't be angry Mr. Book-case. It really won't do the slightest bit of good. And as for that creaking. It is most unkind of you. Poor little boys and girls! Wouldn't you let them have a good night's sleep? We don't really think you mean to be unkind but see how they are tossing every time you creak, and they are so tired."

"But," said the book-case, "I have been so good to all their books. My broad shelves have held them up and I have taken such care of them. I am hurt because they think that now I don't need to look after books but can be used for snowballs and mud pies to go on my shelves."

"They really love you," said the little fairies, "but how they have grown thoughtful. They will love you just as much later on for holding their books and in the meantime we will keep you cheered up playing hide-and-go-seek between your precious books."

YOUNG PEOPLE SELDOM SAVE

Boys and Girls Should Be Taught Early to Put Away Money—Give Up Harmful Habits.

Young people seldom love money for its own sake. They are usually so eager to spend it for the pleasures it will bring that they need to be urged to save a part of it. Boys and girls should be taught early to save money for the future.

Not so many men and women would miss marriage and parentage and the joys of a home of their own if the boys and girls were taught that \$3.30 a week saved for thirty years at savings bank interest becomes something more than \$10,000—a handy sum to educate your boys and girls if you begin in the teens to save so much by giving up things which are useless if not also harmful.

—Christian Herald.

IN A KERRY VILLAGE

THE historical and political importance of Ireland has created in the minds of many Americans an exaggerated idea of the island's physical proportions and the density of its population, two vital factors in England's task of suppressing the rebellion which had its inception in the capital and largest city, Dublin. According to the National Geographic society's bulletin the whole of Ireland embraces an area slightly less than the state of Maine, but with a population almost six times as dense. In comparison with the governing country, it is three-fifths as large as England and Wales, with one-ninth the population. The island is one of the very few sections of the civilized world where the population has shown a marked decrease during the last century. The first census of the island, taken in 1821, recorded a population almost 50 per cent larger than at the present time, while the census of 1841 showed the high-water mark of more than eight millions, nearly twice the present population of 4,375,000. This remarkable decrease, due largely to emigration, began after the famine brought about by the destructive disease which attacked the potato crops of 1845. This calamity resulted in the withdrawal of more than a million acres from cultivation within two years. Incidentally the potato, which has played such an important role in the life of Ireland during the last 300 years, is not indigenous to the island, but was one of the food gold mines discovered by the Spaniards in their conquest of Peru. The country is directly indebted to Sir Walter Raleigh

TORC CASCADE

for its "Irish" potatoes, as it was he who brought them from what is now North Carolina and planted them on his estate near Cork in 1585. **Mountains, Bogs and Lakes.** Ireland lies on the western rim of what was once a part of Continental Europe. It has numerous mountains, the highest being the McGillicuddy Reeks (3,414 feet), in the Killarney region, but there is no mountain chain or elevated "backbone." There is a more or less well-defined central plain, however, the distinguishing feature of which is its bogs—the black bog producing the famous peat fuel, differentiated from the brown bogs of the mountains. If the whole island were brought to a mean level it would rise 400 feet above the sea. **The lakes, or loughs, of Ireland** are among its most widely appreciated physical characteristics their scenic beauty being the inspiration of poets, painters and musicians. Nor have the Irish rivers been overlooked in appraisals of the island's beauties. The Shannon, which flows for 250 miles from the county of Cavan in the northwest to the Atlantic in the southwest, is the longest water course in the United Kingdom. It is navi-

gated by large steamers for half its length, and is connected with Dublin by means of the Grand and Royal canals.

Although coal is found in most of the 32 counties into which the island is divided, and there is considerable iron ore, mining is not an important industry. Gold was being mined in a modest way in County Wicklow at the time of the rebellion of 1798, but the works were destroyed and the source of the metal has never been re-discovered.

Industries of the Island. Agriculture and stock raising are the chief occupations of the inhabitants. At one time the woolen manufactures of the island were formidable rivals of English factories, but hostile legislation gave the industry a check from which it has never recovered. As the Irish have raised flax for centuries the manufacture of linen early became one of the important industries of the country. Irish whisky is an important article of export and one of the largest breweries in the world is located at Dublin. The island's production of beer is three and a half million barrels annually.

Shipbuilding in the great yards at Belfast is one of the most widely known of Irish activities, and the deep-sea and coast fisheries afford a livelihood for many thousands. Thanks to the temperate influence of the west winds from the Atlantic, the thermometer rarely reaches freezing point in winter, while the average for a summer day is 60 degrees. At Toor Head on the north the distance to Scotland (Mull of Cantiri) is only 13 1/2 miles. The Giant's Causeway, a short distance to the east of this point, is the outcropping basaltic formation which in a former age joined the two islands.

NOT THE OLD MONTE CARLO

War Has Had Decided Effect on the Great Gambling Resort of Europe.

The noonday train draws slowly into the station. A flood of passengers pours forth, writes a Monte Carlo correspondent of the London Times. Leaving the station, the crowd surges up into the marble steps and skirts the vast edifice which crowns the abrupt hilltop; it is soon swallowed up within the portals of the great building. It is a shabby, dowdy crowd, mostly women.

Can this be Monte Carlo? Can this crowd be hurrying so feverishly to the gaming tables?

The sunshine is benignly warm, the soft breezes fragrant with the mingled scent of a thousand flowers. Yet the terrace is deserted. Now and then a black figure passes hurriedly and disappears into the casino, without lingering for an instant to enjoy the magic beauty of the scene.

I make my way slowly to the casino. The doors of the gaming rooms are thrown open by the familiar frock-coated attendants. In the gloom-filled halls a somberly dressed crowd is clustered about the gaming tables. I go up to the first roulette table. The players seem to be chiefly housewives and shopkeepers of the lower middle class, recruited apparently from among the natives of the neighboring towns. Officers and men of no matter what rank of all the allied armies, whether in uniform or not, are rigorously excluded. Today 80 per cent of the players are women, unlike the old clientele; plain bourgeois and peasant types of faces abound.

The glitter and brilliance of the multitude who gathered here in former days has disappeared. The gold coin that shone so lustreously against the green baize of the gambling tables has vanished. The atmosphere of bacchic beauty of this enchanted landscape, of these hanging gardens which rise tier upon tier above the sea, of this environment of sensuous splendor which made of Monte Carlo a pagan sanctuary unique in the world, has faded away. Can it be otherwise when the temple of Janus stands open?

World's Largest Sponge Market

TARPON SPRINGS, on the west coast of Florida, claims the distinction of being the largest sponge market in the western hemisphere. Over a hundred schooners with their diving boats sail from its little river harbor to the sponge beds in the gulf; and a local colony of 2,000 Greeks are engaged almost wholly in the sponge business. They have imported their native methods uncuffed, even employing the same picturesque boats with high prows and brilliant colors that are used in the Mediterranean.

The Greeks have a monopoly of the business of diving for sponges, writes Frederic J. Haskin. They go down into 100 feet of water in rubber suits and helmets, cut the sponges from the bottom with a knife and bring them to the surface in nets. Now and again a man gets his rubber lines tangled and his air supply is cut off, or he remains below too long and becomes paralyzed. Sometimes a big man-eating shark becomes unduly curious and makes a menacing swoop at the diver. His usual defense in such a case is to open his sleeve and let out a rush of air bubbles, which almost invariably frightens the shark away.

At any rate these undersea adventures do not appeal to the Americans. They are willing to take a risk for sufficient cause, but not for a diver's wages. Before the Greeks came to Florida sponges were taken only by colored men, who went out in rowboats and "hooked" sponges in comparatively shallow water with long poles. It was a primitive and ineffectual method and all Florida did not produce a fraction of what is now exported annually from Tarpon Springs alone.

The Greeks saw their opportunity and went first to another Florida town

farther south, where they invested \$5,000 in a schooner and began diving for sponges with great success. The local people held a mass meeting, decided they did not want any "furriners," ran the Greeks out of town and burned up their boat. The Greeks then went to Tarpon Springs, where they received a very different reception. The people realized that Greeks could develop the sponge industry to the great benefit of the town. So they purchased boats and equipment for these men from the Mediterranean and set them to work.

Both the Greek colony and the sponge business grow apace. The Greeks now own their own boats and about half of the local firms dealing in sponges are owned by Greeks. They also conduct all of the ice cream parlors, barber shops and poolrooms in Tarpon Springs.

Greeks Have Their Own Quarter. Although the Greeks dwell in their own quarter of the town and preserve their national customs, they live in perfect amity with the Americans. There are very prosperous firms in the sponge business which are conducted by Greeks and Americans working in partnership.

The Greek likes American business methods, American money, American "movies" and many other American things; but when it comes to cheese, wine and candy, he insists on having his own. Hence there are in Tarpon Springs many picturesque little shops dealing in these things and in other strictly Greek dainties which are beyond the appreciation of an American palate. There are also Greek coffee houses, where you may see the divers in from the gulf, sipping the drink from little cups and smoking water pipes.

Sponge Divers at Work.

As sponges become scarcer the fleets have to go farther and farther out into the gulf to get a good harvest. They now usually remain for two or three months at a time, returning all together at certain times of the year, when the great sales are held. Early fall, Christmas and Easter are the times of the most important sales, and upon these occasions Tarpon Springs becomes one of the liveliest little towns upon the globe. The Greek diver is a daring, happy-go-lucky chap who makes big wages and does not believe in saving them. When he hits town he usually collects several hundred dollars and proceeds zealously to spend it all before going to sea again. He is a liberal and boisterous patron of wineshops and coffee houses and movies. He decks himself in the gaudiest and most expensive clothes that money can buy. He rather overruns the town, but seldom does any harm either to himself or anyone else.

Easter is the most important occasion of all, being a great Greek holiday. There is much feasting and candle light processions through the streets at night. At the time of Christmas sale, the Greek Cross day is celebrated. The whole colony gathers at the bayou behind the town. The young men, all expert swimmers, line up on the bank, clad only in trunks. The priest throws a wooden cross into the water and there is a race for it, the boy who wins it receiving a prize.

Several Kinds of Sponges. When the sponges are brought up by the divers they bear no resemblance whatever to what you buy in a drug store, for the commercial sponge is merely the skeleton of an animal. In the natural state it is covered with a thick mucus. This is pounded and

Calomel salivates! It's mercury. Calomel acts like dynamite on a sluggish liver. When calomel comes into contact with sour bile it crashes into it, causing cramping and nausea.

If you feel bilious, headache, constipated and all knocked out, just go to your druggist and get a 50 cent bottle of Dodson's Liver Tone, which is a harmless vegetable substitute for dangerous calomel. Take a spoonful and if it doesn't start your liver and straighten you up better and quicker than nasty calomel and without making you sick, you just go back and get your money.

If you take calomel today you'll be sick and nauseated tomorrow; besides, it may salivate you, while if you take Dodson's Liver Tone you will wake up feeling great, full of ambition and ready for work or play. It's harmless, pleasant and safe to give to children; they like it.—(Adv.)

One Way to Make a Friend. There are several kinds of hypocrisy, but the one that masculinity most favors is spurious devilishness. Nothing brings the beam of contentment so fervently to the mediocre eye as a Don Juan accusation. Dig him in the ribs and wink as you call him a sly dog—and he loves you. He may be the quintessence of domestic respectability, but if you will but insist that you believe him capable of maintaining a seraglio with consummate deceit, you are his friend.

For any cut use Hanford's Balsam. Adv.

Missed Big "Successes." The death of George Edwardes recalls how he sold "Dorothy" for a song, and how a song—"Queen of My Heart"—made a fortune for the piece. The death of Lewis Waller recalls the case of "Monsieur Beaucaire." That play, when "tried on the dog" at Liverpool was a dead failure. The "dog's" verdict was wrong. Produced as a mere stop-gap at the Comedy, "Beaucaire" proved a big and instant success. It ran for some 400 times, and had the crowning triumph of a royal command performance at Sandringham.

"Anuric" cures Backache, Lumbago, Rheumatism. Send 10c Dr. V. M. Pierce, Buffalo, N. Y., for large trial package.—Adv.

Something New in Knives. Every device which helps to make housework easier should be welcomed, and one of the best things that have been invented in this connection is the new stainless steel. Knives made of it have not to be cleaned in the old way; they merely have to be wiped and ought soon to be in universal use. Here is a paragraph from a trade paper:

"Sheffield appears to have made up its mind that stainless cutlery has come to stay, in spite of the fact that it is appreciably dearer than ordinary cutlery."

This stainless cutlery is said to last three times as long as common steel, but as yet it has not been placed generally on the market.

The Best Liniment. For falls on icy walks, sprains and bruises, rub on and rub in Hanford's Balsam of Myrrh. Apply this liniment thoroughly and relief should quickly follow. Adv.

Keep Hens Hungry. In feeding it is a good idea to keep the hens slightly hungry during the day and never fully satisfy their appetites until just before they go to roost at night.

URIC ACID--GOING-GOING-GONE

"Anuric" Will Not Fail to Stop Your Backache

People are realizing more and more every day that the kidneys, just as do the bowels, need to be flushed occasionally. The kidneys are an eliminating organ and are constantly working, separating the poisons from the blood. Under this continual and perpetual action they are apt to congest, and then trouble starts. Uric acid backs up into the system, causing rheumatism, neuralgia, dropsy and many other serious disturbances. Doctor Pierce of Buffalo, New York, advocates that every one should drink plenty of pure water between meals. Every day should exercise in the outdoor air sufficiently to sweat profusely, and from time to time stimulate the kidney action by means of "Anuric." This preparation has been thoroughly tried out at his Sanitarium, in the same way as his "Favorite Prescription" for

weak women and "Golden Medical Discovery," the standard herbal system tonic, (both of which now come in tablet form for convenience of carrying and taking). "Anuric" is now being introduced here, and many local people are daily testifying to its perfectness.

If you have backache, dizzy spells or rheumatism, heed nature's warning. It means that you are a victim to uric acid poisoning. Then ask your druggist for "Anuric" and you will very soon become one of hundreds who daily give their thankful indorsement to this powerful enemy to uric acid.

If you have that tired, worn-out feeling, backache, rheumatism, neuralgia, or if your sleep is disturbed by too frequent urination, get Dr. Pierce's Anuric Tablets at drug store, full treatment \$1.00, or send 10c for trial package to Dr. Pierce, Invalids' Hotel, Buffalo, N. Y.

Decline in Status. "I heard Mabel say when she was engaged that she had selected the very flower of her admirers. I wonder what particular one she likened him to!"

"Well, when they were first married, she considered him the very pink of perfection, but now the baby has put his nose out of joint, he's just a plain poppy."

Sore Eyes. Granulated Eyelids, Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by Marlowe Eye Remedy. No Smarting, just Eye Comfort. At Your Druggist's 50c per Bottle. Marlowe Eye Salve in Tubes 25c. For Book of the Eye Free Ask Druggist or Marlowe Eye Remedy Co., Chicago

His Third Set.
CALOMEL TODAY, SICK TOMMOROW

Dose of nasty calomel makes you sick and you lose a day's work.

Painting Walls. Before paint or calomine is applied to walls every crevice should be filled with plaster or cement. To the calomine put one-quarter pound white glue in cold water overnight and heat gradually in the morning until dissolved. Mix eight pounds of whiting with hot water; add the dissolved glue and stir together, adding warm water until the consistency of thick cream. Use a calomine brush and finish as you go along. If chlm milk be used instead of water the glue may be omitted.

640 ACRE San Joaquin valley stock and dairy ranch, \$3000 cash, country exchange to \$27,000, balance terms; price, \$55,000. P. O. Box 336, Merced, Calif.—Adv.

Noted the Apology. A young practitioner appeared before a pompous old judge, who took offense at a remark the lawyer made criticizing his decision.

"If you do not instantly apologize for that remark," said the judge, "I shall commit you for contempt of court."

"Upon recollection, your honor," instantly replied the young attorney, "I find that your honor was right and I was wrong, as your honor always is."

The judge looked dubious, but finally said he would accept the apology.

For sore feet rub on Hanford's Balsam. Adv.

That's What. "What is a military attache, father?" "A military attache is an official who has to be recalled as soon as he is caught doing what he is paid to do."

It Cures While You Walk. Allen's Foot-Ease is a certain cure for hot, sweating, callous and swollen aching feet. Sold by all Druggists. Price 25c. Don't accept any substitute. Trial package FREE. Address Allen S. Olmsted, Le Roy, N. Y. (adv.)

No, No. "Doctor Wiley said a man can be a food toper as well as a drink toper. Do you believe it?" "Not at our boarding house he can't."

Sanitary Dairy Floor. The concrete floor is by long odds the most sanitary for a dairy barn, and should be used wherever possible.

For DRUNKENNESS AND ALL DRUG ADDICTIONS. No sickness, no publicity. Ladies treated as privately as in their own homes. Send for free booklet. THE KELLEY INSTITUTE 2408 W. Fico St. Los Angeles

J. B. PRICE - - EDITOR AND OWNER

For fear that they may not have heard it, The Patagonian hereby calls the attention of the big mining operators and other large tax-dodging corporations of the state, that Gov. Hunt has been renominated.

Those worthy democrats who were so energetic in behalf of Geo. Olney for the democratic nomination for governor, can now get in the Hunt band-wagon and ride to certain victory in November.

For Supervisor in District No. 1, Geo. H. Feidler, it is reported, has been beaten by Jas. Harrison by five votes; the former receiving 135 and latter 140. In the defeat of Geo. Feidler, Santa Cruz County has lost the services of a valuable official. However, there is no discredit attached to said defeat for he was opposed by one of the best citizens in the state. Santa Cruz county is safe so long as she has such men as Feidler-Harrison at the head of county affairs.

The most efficient work in the cause of safety must be done by methods which will constantly keep before the mind of every employe that upon him rests an individual and personal responsibility. It is felt that efficiency in safety can only be attained by education and constant agitation of the subject and the hearty co-operation of the employe with the management. This fact implies that the management should show its willingness to do its part in the installation of guards and appliances. — Mining and Engineering World.

Wm. Murphy is reported to be improving at the hospital in Nogales.

Geo. Sayer came up from Nogales yesterday on a short business visit.

Ramon Carbajal has accepted a position as salesman at the "Corner Store."

O'Connor pleasure and commercial Motor Cars are assembled of World-known Standard parts, medium priced, and sold on a convenient PAY-AS-YOU-RIDE plan. Catalogue mailed on request.
