PATAGONIA, SANTA CRUZ COUNTY, ARIZONA, FRIDAY, OCT. 27, 1916

No. 45

Patagonia Leads the County in Its Babies, Schools & Chickens

At the Santa Cruz County Fair, held at Sonoita three days of last week, Patagonia won the blue ribbon and sweepstakes for best babies, schools and chickens. The little daughter of Mr. and Mrs. Chas. E. May won first prize in the baby show; other winners being the little boy of Mr. and Mrs. Robert Bergier, the son of Mr. and Mrs. Albert Gatlin, all of Patagonia, and the fourth baby winner was the daughter of Mr. and Mrs. Herbert Turner of Sonoita. The sweepstakes for all chicken entries was awarded to Mr. Ray Ferguson of Patagonia, who had on exhibition a coop of thoroughbred Crystal White Orpingtons.

The fair was well attended, especially on Saturday the last day, many from Nogales and almost the entire population of Patagonia being present. Exhibits from the farmers and others were varied and interesting, the products from the farms attracting much favorable mention. A good many people made a picnic of the day, and enjoyed themselves meeting old friends and forming new acquaintances, candidates especially being numerous; office-seekers from Pima, Santa Cruz and Cochise counties were very much on the job. The program of sports was given Saturday, and everything moved along nicely, only one small row happening to mar the day's enjoyment, and that was a case where too much personal use was in evidence, and was promptly squelched by the officers. At night a big dance was given. Following is a list of the awards:

- LIVESTOCK.**
 Best colt, 1 year, Mark Manning.
 Colt, under 1 year, C. L. Beatty.
 Stallion, 2 to 4 years, G. S. Bryant.
 Mare, 2 to 4 years, R. T. Fossett.
 Farm team, H. F. Sprung.
 Brood mare with 10 or more colts, R. T. Fossett.
 Sweepstakes for colts, any class, R. T. Fossett.
 Sweepstakes for stallions, any class, G. S. Bryant.
 1916 calf, any breed, O. J. Olson.
POULTRY.
 Best White Leghorn cock, G. S. Bryant.
 White Leghorn hen, G. S. Bryant.
 White Leghorn pen, Mrs. W. H. Bar-

Passing of Orton Phelps of the Mowry

Judge Orton Phelps, a highly respected and venerable citizen of Mowry, died at the Commercial hotel in Patagonia Tuesday, October 24, at 1 p. m., at the age of 70 years. Judge Phelps was a native of Vermont. He came to this country about sixteen years ago, and for many years was employed as expert mechanic for the old Mowry company, while that company was operating. He accumulated considerable property at Mowry and after the company shut down he continued to make this place his home, acting as watchman for the company and attending to his own private interests. His hospitable home was frequently visited by many friends and strangers who had business in that district, and the fine, genial old gentleman who ever had a welcome to all will be missed.

A brief funeral service was held in Patagonia, the service being read by Judge A. S. Henderson, after which the body was taken to the Mowry for interment. Deceased leaves a wife who was with him at the last sickness, and a daughter, Mrs. S. P. Boucher, of Douglas, who arrived in time to attend the funeral, besides many friends to mourn his loss. The Patagonian joins in extending sympathy to the bereaved family.

- PLUMPTRE ROCK COCK, H. R. TURNER.**
 Plymouth Rock hen, H. R. Turner.
 Plymouth Rock pen, H. R. Turner.
 Black Minorca cock, G. S. Bryant.
 Black Minorca hen, C. Ferris.
 Black Minorca pen, C. Ferris.
 White Orpington cock, Mrs. Ray Ferguson.
 White Orpington hen, Mrs. Ray Ferguson.
 White Orpington pen, Mrs. Ray Ferguson.
Special sweepstakes, best chicken pen, any breed, Mrs. Ray Ferguson.
HOGS.
 Best boar, 1 year, R. T. Fossett.
 Boar, under 1 year, M. G. Rouse.
 Sow, over 1 year, J. S. Carver.
 Pair pigs, under 6 months, M. G. Rouse.
 Sow with litter, J. S. Carver.
CORN.
 Best June corn, O. J. Olson.

(Continued to page four)

LOCAL AND PERSONAL NOTES

Frank Sweeney, the popular drummer, was in town this week, interviewing the trade.

Geo. H. Francis went down to Nogales Wednesday evening on a business trip, expecting to return in a day or two.

S. P. Boucher came over from Douglas Wednesday to attend the funeral of his father-in-law, Judge Orton Phelps.

Oscar F. Ashburn, the cattleman, returned yesterday morning from Nogales and continued on to Tucson on a business trip.

Roy Peterson is this week painting the new house of J. W. Miller. Mr. Peterson finds a good demand just now in Patagonia for his services as painter.

A meeting of the directors of the Santa Cruz County Fair association has been called for Saturday evening at 8 o'clock, Oct. 28, at Sonoita.

Frank Blackledge has gone to work at the Three R mine, running a hoist, while ex-Judge Geo. T. Coughlin is attending court in Nogales.

A motor cycle race is being planned from Douglas to take place some time during the holidays, to come from that city by way of Patagonia to Nogales, then on to Tucson and return to Douglas by way of Tombstone. About 15 or 20 entries are expected.

Preparations are being made for a big dance at Elgin tomorrow, Saturday evening. Nogales music will be secured and a fine time is promised. Many will go from here, and Nogales will also probably be well represented, as many of the candidates intend to be present.

Frank T. Rigby, president of the Santa Cruz County Fair association, who with many other citizens of the northern part of the county, is doing jury duty in Nogales this week, slipped and fell while walking up the pavement to the courthouse the other day and sprained his wrist.

Dr. Smelker, a popular physician of Nogales, had a narrow escape from death one day this week when his automobile ran off a bridge. He was taken

to a hospital and will be out within a few days. "Bill" Cody, well known here, also had a bad accident with a jitney he was driving on the streets of Nogales, but with no serious results.

"Grandpa" Rouse, living north of Sonoita, was taken seriously ill Monday night. Dr. Fitts, who was called on the case, succeeded in warding off a threatened attack of appendicitis, and Mr. Rouse is now considered out of danger.

In the Superior court, last Monday, in Nogales, Judge O'Connor postponed pronouncing sentences in the cases of the Pima county deputies, Wiley, Johns and Salazar, convicted of murder in the second degree. Sentences will be imposed Saturday, October 28.

A concentrating plant for treatment of the ores of the Wandering Jew and Royal Blue mines, in the Tynjall district, was received in Patagonia this week and freighted out to the property by Elmo Wilson. The plant will treat about 20 tons a day. The Royal Blue and the Wandering Jew are being operated by A. J. Hooks on a bond and lease proposition.

Starr K. Williams, a Blabee attorney who is defending Jack Falls, charged with the murder of Tom Castleberry in Patagonia last spring, which case was called in the Superior court at Nogales this week, on arrival at Nogales late Monday night was compelled to sit up in the lobby of a hotel on account of being unable to find a bed. For this reason the case was postponed until Wednesday.

The U. S. civil service commission announces that on Nov. 25, 1916, an examination will be held at Sonoita, to fill a contemplated vacancy in the position of postmaster at that place. The compensation of the postmaster at Sonoita last year was \$269. Full information concerning the examination may be secured from the postmaster at Sonoita, or from the U. S. Civil Service Commission, Washington, D. C.

Don't forget the big moving picture show this week. Extra good program.

FOR SALE—Business lot in Patagonia, 35x150 ft. James Finney Sr., Bisbee.

New Industry to Be Started in Arizona

Southern Arizona has been chosen by a large company for the conducting of the most important agricultural experiment in a decade. It is the attempt to grow guayule, or the rubber shrub by cultivation. The agricultural product corporation is a subsidiary of the International Rubber Company, which has been operating very extensively in the guayule rubber country of Mexico. The company has purchased 9,200 acres of land about thirty miles south of Tucson for the experiment. A concrete water tank with a capacity of 50,000 gallons for domestic use and fire protection has been completed, and 200 acres of ground has been cleared and good roads have been built to all parts of the ranch.

If the growing of the guayule is successful it is the intention of the company to build a large mill on the ground for extraction of rubber.

According to Forest Examiner A. Leopold, who is taking a wild game census in the Arizona-New Mexico district, black tail deer are on the verge of extinction in the southern Arizona mountains, while white tail deer are holding their own. In the northern part of the state the reverse is said to be true. Wild turkeys are practically exterminated in southern Arizona, although a few years ago they were plentiful. The word "Chiricahua" means turkey. Just one flock of mountain sheep is left in the Catalinas, it is believed. Their location is not made public for fear of their immediate extinction.

Mrs. A. L. Kinsley and son, Wilfred, came in this week from a visit of several weeks at their former home in Inyo county, California. Mr. Kinsley arrived a few days later with stock and farming implements, for their new home in the San Rafael valley.

James Reagan was the first of the many up county men attending court this week to get away from the county seat, and he was excused only until Saturday morning.

"Kid" Baker, a Patagonia boy who was called back to Kansas several weeks ago, when war with Mexico seemed imminent, returned last evening. Mr. Baker reports a very pleasant time in the East, but says he is glad to be back in Arizona again.

For Sale—One Davis horse whim. Apply at this office.

Moving picture show Sunday night.

Notice to Creditors
 In the Superior Court of Santa Cruz county, state of Arizona.
 Estate of Harry A. Stevens, deceased.
 Notice is hereby given by the undersigned, G. L. Stevens, administrator of the estate of Harry A. Stevens, deceased, to the creditors of and all persons having claims against the said deceased, to exhibit them, with the necessary vouchers, within four months after the first publication of this notice to the said Administrator at Patagonia, Ariz., or at the law office of S. F. Noon, at Nogales, Arizona, the same being the place for the transaction of the business of said estate, in said county of Santa Cruz.

G. L. STEVENS,
 Administrator of Harry A. Stevens, deceased.
 Dated Nogales, Ariz., this 6th day of Sept., 1916.

Battleship Arizona Is Greatest Fighting Craft in U.S. Navy

Subscription blanks for donations to the silver service for the battleship Arizona have been received in Patagonia, and those wishing to make a contribution now have the opportunity. The service cost several thousand dollars and is a credit to the State. Of the amount to be raised Santa Cruz county is expected to make up \$500, and citizens of Patagonia are requested to aid the work.

The new super-dreadnought [Arizona, with her sister ship, the Pennsylvania, the most formidable fighting craft in the United States navy and perhaps in the world, was declared a unit of Uncle Sam's fighting fleet Tuesday amid brief but impressive ceremonies.

The ship will remain at the New York navy yard for a few days, it is expected, before joining the fleet at sea. To gather a crew three ships (the Vermont, the Kansas and the New Hampshire) were placed in reserve and parts of their crews were selected. Naval constructors at the navy yard are especially pleased with the Arizona, which they regard as the finest craft to be built in the history of the yard. Her keel was laid in March, 1914, and she was launched on June 19, 1915. She was completed at a saving of more than \$1,000,000 from the estimated cost. She carries twelve 14-inch guns, which are declared by naval officers to be superior to the 15-inch guns of the Queen Elizabeth, Great Britain's greatest sea-fighter.

"Make sure it's a buck. If you can't see his horns, she's a doe." is the slogan issued this year to warn hunters against breaking the game laws. All forest rangers have been instructed to make a special effort to aid in the enforcement of the laws and to report all offenders for prosecution. The cooperation of all public spirited sportsmen is requested in preventing illegal slaughter of our fast vanishing game.

Catarrah Deafness Cannot Be Cured
 by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surfaces. Hall's Catarrh Cure acts thru the blood on the mucous surfaces of the system. We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Cure. Circulars Free. All Druggists, 75c.

PATROL DRIVES SAILORS MAD

Letter From a British Tar in the Atlantic Blockade Makes Pathetic Reading.

The peril, hardship, cold and loneliness that has driven mad some of the tars who man the British blockade fleet outside the three-mile limit of our Atlantic coast, has been written of by an Englishman riding "The Tides of Barnegat" aboard the Sydney, to an old mate in this city. This is the same Sydney that ran the notorious German raider Emden ashore on an Indian ocean island and shot her to bits. The Sydney recently has been transferred to the Atlantic blockade fleet. The letter says in part:

"Dear Jerry: It looks as though we were to spend another Christmas on the briny deep. It has been terribly cold out here and we have had a hard time of it. The other night we ran short of coal and had to shoot down to Bermuda.

"Jerry, of all the places God ever made, Barnegat, or whatever they call it, is the worst. If it ain't blowing it's snowing or raining, and there is a continual swell running that keeps your insides snug against your main companionway for days at a stretch.

"Give me the life of the North sea, chasing perrys (submarine periscopes). You could get a bit of a thrill doing that—and it was worth while getting hit. Out here you might as well be on a training ship. The men are mostly sickly and you can't exactly call them happy. They have nothing to think of except the arrival of the cutter with papers and letters. Lord save us from another job like this.

"I heard some of the boys in the Caronia (former Cunard liner, now converted cruiser) went crazy, and I don't blame them a bit. A lot of us will be going the same way before long. We are looking for the cutter today and expect to get a supply of fresh greens. But she'll smash herself to pieces against our side, I suppose, and lose everything. That's what happened last time. The bloody pilot must have been a tram conductor in Putney.

"We lost a man over the side who was reaching for a sack of lettuce or something. God! He shot down between us and the rotten little tug so quick that there was no chance to save him. He was a young fellow, too, and had a mother living in Fulham Palace road, Hammersmith."

SYMMETRY OF THE FEET

As Ugliness Disappears Pedal Extremities of the Human Race Become Beautiful.

Darwin points out, in his great aggregation of facts called the "Descent of Man," that beauty tends to increase and ugliness to disappear. Study of past family histories, archeology, the transmission of hereditary characteristics and scientific observations show that the types of feet which are rapidly disappearing from the earth are the large and horrid-looking ones, whereas the small and pretty feet are rapidly increasing, the New York Sun says.

The Zulus have one type, the Africans another and the Greeks have the ideal type. In America and England there is a mixture of all types; the Germans have a type of foot like the Zulus. This one is also rather too common in Chicago.

Repeated observations upon 5,000 people show that there is a vast improvement in the average symmetry and beauty of the human foot, as compared with measurements, portraits, pictures, statuary and excavations of the middle ages, pre-Christian times, Egyptian and Babylonian days and further back.

The feet of unborn and newborn babies seem to retain some of the contour of those out of date and far from ideal feet.

The beautiful, small and symmetrical foot which the human race is approaching, but which is as yet unknown in any race or any Greek statue, is shown in the great painting by Burne-Jones, called "Sibylla-Dephica." The foot is perfect in symmetry, tiny and slim; the toes are long and slender, particularly the second toe, which is longer than the big toe.

Obviously this beautiful type is soon to be approached if the researches of these anthropologists are correct.

Drawing to a Head.

"My dear," remarked Grumbly, as he opened a letter at the breakfast table the other morning, and a milliner's bill dropped out, "this is the third bonnet you have had in less than six months. You must have bonnets on the brain."

"Well," queried Mrs. Grumbly, innocently, "isn't that the proper place for them?"

Working Under Difficulties.

Raising a vessel submerged in tropical waters is dangerous business, according to an account in Shipping Illustrated of the salvage of a gunboat that had been sunk in the harbor of Progreso, Yucatan. The sailors were in constant danger owing to the attacks of "voracious fishes, some of which are more ferocious than sharks, and far more determined in their methods of attacking human prey."

PUTS THE INTELLECT FIRST

Educator Asserts That Its Training is of More Importance Than is That of the Body.

Commenting on the theory, now so popular, that educators should concentrate on the training of hands rather than the training of minds, if the young persons of our land are to grow into useful men and women, Mary Leal Harkness, writing in the Atlantic, gives it as her opinion that "it is a tremendous fallacy the possessor of only the trained hand can hope to be included in that desirable company which is both interesting and interested.

"If you could persuade every woman to sweep a floor properly, I doubt much if she could still be guaranteed an agreeable companion for a rainy Sunday," continues the writer. "If you could teach every 'white wing' in any city to remove the dirt of the streets in the most dustless and sanitary manner known to science, I still question whether you would wish him to come to your library for an evening of uplifting conversation. And he would be equally lacking in resources for self-entertainment in his unemployed hours.

"If there is anything beneath the stars more pitiable than the elderly man or woman with no intellectual resources from which to draw occupation and interest, I have not yet seen it. On the other hand, there is nothing which so effectively robs the prospect of old age of its terrors as the sight of the scholarly wearer of whitened hair which crowns a head still vigorous and young through the happy preservative agency of a trained and much-used intellect.

"No mechanical process can guarantee to us an interesting life, or insure us against boredom. But just because it is something more than a mechanical process a college education of the right sort comes nearer doing this than any other agency we know—certainly nearer than any drill in cow-milking or scientific cooking. Its value to us and to the future of our country is beyond estimation. If the time ever comes when 'vital' is taken to be synonymous with 'lucrative,' when the life of the mind and the training of the mind are set below those of the body; when intelligence, as a means to a full and satisfying life, is superseded by prophylaxis and hygiene—then we may well wish that we had listened to a wiser teacher."

Servant Problem Solved.

Just to show how lucky are those parts of France which the Germans have overrun with fire and sword, an ingenious German press agent has invented the following story, the scene of which is laid in what is left of a once smiling village in the north of France. A worthy dame whose house has survived the gunnery practice of the Kaiser's artillerymen—possibly because of its remoteness from the quaint old village church, now a heap of ruins—is talking to another of her species, presumably equally fortunate in having a roof over her graying head.

"You've no notion," says the first dame, "how clean and in what perfect order everything is in our house. I never in all my born days saw the place so spic and span."

The second dame nods to show her natural and proper interest in this bit of housewifely gossip.

"I'm so glad, my dear," says she, "that at last you've got a really good servant."

"Servant!" exclaims the first dame with Gallic vivacity. "Who said servant? It's the dear German soldiers that's billeted in the house. They done the cleaning!"—New York Evening Post.

Guncotton as Bait.

A part of the equipment of some cavaliers just returned to France from a few days' furlough in England is a fishing-rod and several varieties of floats. But there are others who prefer to fish for the pot in more sudden and ruthless manner. Their method is very different. They operate in those parts of the canals where roach and dace are thought—not always with reason—to be numerous. The final attack, as in all modern aggressive operations, is opened by the expenditure of explosives. But in this case the expenditure is not great. A small wad of guncotton neatly exploded under water is enough to account for all the fish within a considerable radius; and a few moments after the discharge the undersides of the roach and dace appear on the surface. The idea was suggested by the accidental havoc wrought among the fish by a certain Jack Johnson.

The Lion of St. Mark's.

The famous winged Lion of St. Mark, symbol of the old Venetian republic, which was endangered by the Austrian air attack on the city of the lagoons, is one of the most composite monuments in existence. It is of bronze with eyes of white agates—though Venetians tell you they are diamonds—and it is believed to have ornamented some ancient Assyrian palace before it came to Venice and was raised on the top of a column in the Square of St. Mark.

The whole figure, as it now stands, belongs to many epochs, renovated again and again, and the only portion of the original animal remaining is the head—except the crown—and part of the body. When last renovated in 1891 the whole lion was found to be a mass of disconnected fragments bound together with iron bands.

IDAHO NATIONAL PARK

IDAHO NATIONAL PARK, "the Switzerland of America," is short-lived to take its place as one of the greatest natural show places on the western half of the continent. This wonderful of mountains, lakes, streams and forests in the heart of Idaho is to be set apart and dedicated for all time as a pleasure ground for the people of the whole country. It is to be added as an additional jewel to that strand that reaches from Colorado to the Pacific coast, writes M. F. Cunningham in the Utica Globe.

All America is interested in this for the reason that all the great parks of the West, including the Rocky mountain in Colorado, the Yellowstone in Wyoming and Idaho, the Idaho in the Sawtooth mountains in Idaho, the Glacier in Montana, the Yosemite in California, the Grand Canyon in Arizona and others of lesser note are to be connected by a system of fine automobile highways. Good roads and trails are to be constructed in the parks and good hotel and camping facilities are to be provided for all tourists.

There are no large glaciers in the Sawtooth mountains, but aside from this there is no scenery in America more beautiful, wild and varied. It beggars description. Senator Borah, after a hurried tour of the park last summer while home on his vacation, said:

"Force seems to sit incarnate here and one feels, somehow or other, that he is not far from the breeding ground of hurricane and storm."

Geographer Marshall's Tribute.

Mr. Marshall, the chief geographer, was equally impressed after making his tour of inspection in October. In the course of his report he said:

"This section of the Sawtooth range is unusually striking in mountain sculpture and is a brilliant composite example of the characteristics of three of the main mountain ranges in the United States. The southern portion strongly resembles the Rocky mountains in Colorado; the middle section is a counterpart of the Sierras in California, and the northern end is a rugged brother of the Cascade range in Washington. The lakes are rare in their brilliant transparency, reflecting the mountains and the black pine fringing their edges, making most inviting places for campers and tourists to rest and enjoy nature in all her glory."

The mountains in this section are bold, jagged and precipitous. From a distance the range gives the impression of a great inverted crosscut saw, hence the name. Mount Hyndman, the highest peak in Idaho, 12,078 feet, is found here within easy reach of the end of the railroad at Ketchum. The wild and grotesque mountain scenery on all sides leads all travelers to compare the country with the Alps in Switzerland.

Three rivers of inestimable value for irrigation in the valleys far below have their common source in the mountains of the proposed park. They are the Salmon, the Boise and the Payette. These streams, together with a number of smaller ones, swarm with trout and other game fish. This is equally true of the lakes, some sixty in number. The redfish, found in but few places on the continent, is common here. It has given its name to the largest of the lakes.

Streams Full of Salmon. David Starr Jordan, speaking for the United States fish commission in a recent report, tells how the Chinook and Colorado river salmon ascend the streams, shooting the rapids and leaping the falls, until they reach their favorite spawning beds in the headwaters of the Salmon river in the Sawtooth mountains of Idaho, more than

I'm Sorry; I Was Wrong

There may be virtue in the man Who's always sure he's right, Who'll never hear another's plan And seeks no further light; But I like more the chap who sings A somewhat different song, Who says, when he has messed up things: "I'm sorry; I was wrong."

It's hard for anyone to say That failure's due to him— That he lost his fight or way Because his lights burned dim. It takes a man aside to throw The vanity that's strong, Confessing: "'Twas my fault, I know; I'm sorry; I was wrong."

And so, I figure, those who use This honest, manly phrase, Hate it too much their way to lose On many future days. They'll keep the path and make the fight Because they do not long To have to say, when they're not right: "I'm sorry; I was wrong." —Richmond Times-Dispatch.

Every Boy Can Have Whistle—Here's How

When off to the park or country and loafing along a shady stream, watching a boat drift idly or a fishline cork rest upon the still surface, it is a fine time to employ an hour or so in making those delights to every boy, bark and plug whistles. The skillful boy learns the method and his first effort at least toots in a fashion, while others may hardly get a whisper out of their initial attempt. Later perfection of method and getting the knack result in a shrill blast that endangers one's eardrums.

Cut a straight willow twig about the length and twice the diameter of a lead pencil, one end of which is cut bevel, as here shown. At three or four inches from the end cut through the bark all around; this will be the length of the whistle. This section should be free of knots or roughness. On your knee, or better, on a flat wooden surface, hammer the bark

Whistles in the Making.

smartly, turning it so as to strike every portion; use the back of your knife, a stout piece of stick, or a smooth stone.

This hammering separates the fiber from the sapwood, and with a little gentle twisting and pulling the bark will slip off the twig. Cut the twig the same length as the bark and at the bevel end flatten one side, as shown. About an inch back of the end cut a thumb-nail-shaped hole in the bark to come above the flat side of the twig and insert the twig. Then blow.

Some Things That Are New.

Experts have listed more than 10,000 varieties of orchids.

A water-cooled motorcycle has been invented by an Englishman.

Among the jewelry novelties is a combination penknife and lead pencil.

The six state capitals of Australia have been connected by wireless telegraphy.

Concealed under the flap of a new cap for men is a pocket for money or valuables.

The world's greatest wireless station has been built in Italy, powerful enough to communicate with North and South America when similar stations are erected on this side of the Atlantic.

To facilitate rapid writing there has been invented a metal device to be clamped to the little finger and with a shelf on which to rest the next finger and slide over a surface written upon.

To insure the owner of a private shaving cup kept in a barber shop that he is its only user there has been invented a paper cap to cover it, which cannot be removed without breaking a seal.

In the last few years Moscow has been increasing in population more rapidly than at any time in a century and, if the present rate be continued, it will have more than 2,000,000 residents in 1920.

Facts and Figures.

United States last year produced 1,731 tons of asbestos.

Alaska's 1915 mineral production was valued at \$32,854,229.

Virginia, in 1915, mined 8,132,596 tons of coal, valued at \$7,962,984.

American exports of canned salmon are valued at \$7,000,000 yearly.

Over of Russia's income is estimated to be \$80 every 60 seconds.

President Wilson has opened to settlement 148,676 acres of land in Salinas valley, California.

STAR OF THE MOVIES

Miss Grace Darmond, Well-Known Film Actress Who is Being Starred in a New Serial.

Beauty Sleep Brings A Clear, Fresh Skin

There are a few fundamental laws in regard to a clear, fresh skin. The first of these is sleep, and, say what you may, there is no better adage in the English language than the old rhyme of "Early to bed." Too little sleep leaves its traces on the face as clearly and definitely as if some demon or nightmare had written it there with pen and ink for all the world to read. The eyes are heavy and dull, the mouth sagging, faint lines appear around the mouth and eyes, and the skin, instead of being fresh and pink, is of a grayish hue. Not only is there a physical effect, but the mental result produces irritability, a nagging temper and a nervousness which go far toward producing wrinkles and "crow's feet."

It should be remembered that one hour of sleep before midnight is worth two after. Eight hours' sleep is sufficient for the average adult; those who do brain work require more. Let your room be filled with fresh, cold air—the colder the better—and see that the bedclothing is neither too heavy nor too light.—Sperry's Magazine.

Around the World.

Plans are under way for establishing wireless telephone system in several cities in Spain and to connect with Spanish vessels and Spanish colonies in Africa.

Development of the incandescent lamp represents an improvement of 1.075 per cent in the amount of light obtainable from a given consumption of electricity.

In a machine invented in England to test the durability of textiles, dulled blades are rubbed by an electric motor against the fabrics until they are worn through.

Statistics gathered from colleges throughout the country show that residents of the United States, both men and women, are growing taller, more robust and stronger.

French scientists have decided that carrier pigeons are influenced by magnetism and that, with the growth of wireless telegraphy, much less dependence can be placed on them.

Medicine river, Fort Sill reservation, Oklahoma, has the most unusual crossing in the United States. A concrete roadway constitutes the ford across the river and water flows over it continuously.

We imagine there are a lot of halos in heaven that won't be called for.

The man who always gets what he wants usually makes a noise like a bank roll.

Horses are not partial to wild oats, which may explain why they possess horse sense.

Eventually a man quits wandering around with a chip on his shoulder.

Single gardenias are seen now and then on hat brims.

San Francisco thus far this year has erected 18 new factory buildings, valued at \$4,150,000.

A clock is wound up to make it run, but a business is wound up to stop it.

The milk of human kindness would be much richer if it wasn't skimmed so often.

With One Exception.

"I presume Dubwatts thinks his little son is just about the smartest boy ever born."

"Oh, no. Dubwatts remembers that he was a youngster once."

Its Farewell Stunt.

Scribbles—Here's one of my jokes in this patent-medicine almanac.

Dribbles—So? Then it must have passed the age limit.

A New Remedy for Kidney, Bladder & all Uric-Acid Troubles

Successfully Used by Many Physicians and Surgeons in Their Hospital Practice.

Dr. Weir Mitchell once said: "What we call diseases are only symptoms of conditions. Allow the man's vitality to be reduced to a certain point, and he is ripe for any of these weaknesses, or certain conditions which we call disease."

Through failure of kidneys to act, thru congestion, inflammation, any person's condition is ripe for disease to fasten its hold upon the system.

"At Dr. Pierce's Invalids' Hotel and Surgical Institute, Buffalo, N. Y., there has been tested for the past few years a new remedy for kidney, bladder, uric acid troubles, rheumatism, gout, and such ailments as follow, and so many cases both acute and stubborn have yielded to this wonderful remedy that Dr. Pierce decided to name it "An-Uric" and arrange for its distribution to the public through medicine dealers everywhere.

If backache, scalding urine or frequent urination bother or distress you, or if uric acid in the blood has caused rheumatism, gout or sciatica, if you suspect that you have kidney or bladder trouble, write Doctor Pierce, at Invalids' Hotel, Buffalo, N. Y., send a sample of urine, and describe symptoms. A physician and chemist will examine it without charge and you will be under no obligation whatever. These "An-Uric" Tablets cannot fail to help you, because their action flushes the kidneys of impurities and puts strength into them.

Obtain a 50-cent box of these tablets to-day from your druggist here in town. From personal observation in large hospital practice, Doctor Pierce knows these tablets will give you speedy help if you are suffering from uric acid trouble, and to show his sincere faith this prescription is sold under a positive guarantee to any person who has taken a full box and has not been helped.

Gill, McGill, Gillespie.

The name of Gill is probably older than that of McGill as the prefix Mac signifies "son of," and the name would therefore in olden times be borne by one whose father was a Gill. It is extremely doubtful if there is any connection at all between the above names and that of Gillespie. In Gaelic this name is Gillesbuid, translated in English by Archibald. For example, the earl of Argyll, who was famous in the wars of the seventeenth century, was known as Gillespie Grumach or "Archibald the Grim."

Pimples, boils, carbuncles, dry up and disappear with Doctor Pierce's Golden Medical Discovery. In tablets or liquid.—Adv.

Hertzian Waves.

Hertzian waves are electric waves, so called from Heinrich Hertz (1857-1894), a German engineer and scientist, who first demonstrated the possibility of wireless telegraphy. In the course of his investigations he demonstrated some new principles regarding the transmission of light and electricity, and his premature death was regarded as a distinct loss to science. Wireless telegraphy is sometimes called Hertzian telegraphy. The present Marconi method of telegraphing without wires is by means of "Hertzian waves," which pass through the ether—the medium that fills all space, and remains after air has been exhausted. The apparatus generates and transmits these waves, the existence and operation of which were first demonstrated by Hertz.

Pneumonia? Apply Hanford's Balsam. Rub it on and rub it in thoroughly, until the skin is irritated. Adv.

His Good Qualities.

"How do you like your new minister?"
"Very much, indeed. He's the right sort. One of those 'man-among-men' ministers, you know. Comes over to the house occasionally and smokes a pipe; plays on our baseball team; good at tennis and golf and seems to believe in getting pleasure out of this life."
"I see."
"Yes, and he's interested in the things we laymen are interested in. He discusses the problems of the day. I tell you, he's a fine fellow."
"I know, but what sort of sermons does he preach?"
"Well, that I can't tell you. I haven't been over to hear him preach yet."—Detroit Free Press.

CALOMEL MAKES YOU SICK, UGH!

"Dodson's Liver Tone" better than calomel and can not salivate.

Calomel loses you a day! You know what calomel is. It's mercury; quicksilver. Calomel is dangerous. It crashes into sour bile like dynamite, cramping and sickening you. Calomel attacks the bones and should never be put into your system.

When you feel bilious, sluggish, constipated and all knocked out and believe you need a dose of dangerous calomel just remember that your druggist sells for 50 cents a large bottle of Dodson's Liver Tone, which is entirely vegetable and pleasant to take and is a perfect substitute for calomel. It is guaranteed to start your liver without stirring you up inside, and can not salivate.

Don't take calomel! It makes you sick the next day; it loses you a day's work. Dodson's Liver Tone straightens you right up and you feel great. Give it to the children because it is perfectly harmless and doesn't gripe

Mark Twain "Dandy" But Also a Student In His Pilot Days

Old pilots of that day remembered Samuel Clemens as a slender, fine-looking man, well-dressed, even dandified, generally wearing blue serge, with fancy shirts, white duck trousers and patent leather shoes. A pilot could do that, for his surroundings were speckless, says Albert Bigelow Paine in St. Nicholas.

The pilots regarded him as a great reader—a student of history, travels and the sciences. In the association rooms they often saw him poring over serious books. He began the study of French one day in New Orleans when he discovered a school of languages where French, German and Italian were taught, one in each of three rooms. The price was \$25 for one language, or three for \$50. The student was provided with a set of conversation cards of each, and was supposed to walk from one apartment to another, changing his nationality at each threshold.

The young pilot, with his usual enthusiasm, invested in all three languages, but after a few round trips decided that French would do. He did not return to the school, but kept the cards and added textbooks. He studied faithfully when off watch and in port, and his old river notebook, still preserved, contains a number of advanced exercises neatly written out.

POULTRY NOTES

Do not be continually disturbing the sitting hen or turkey, or duck or goose, but leave them pretty much to themselves and they will make a better job of hatching.

Turkey roosts should be located toward the roof, allowing only ample space for the birds to stand erect. Don't be afraid of overfeeding the ducks. They should be fed four or five times a day.

Good water is a necessity at all times in the poultry yard, and don't forget the loose, dry earth for the dust bath.

Ducklings and goslings should never be allowed to swim, even in warm weather, because it will set back their growth.

Be sure that the hovers in the brooders are cleaned every day and disinfected once or twice a week.

After the chicks are a few days old a run out on clean green grass in the open air every fair day is necessary for their health and growth.

Chicks with hens or in brooders should have ample indoor run so that they can secure plenty of exercise during bad weather.

Ten turkey eggs may be set under a good five-pound hen.

All portable chicken houses should be elevated to keep out the rats.

"Keep Busy," Advice To Those Who Would Reach Ripe Old Age

A number of well-known persons who have passed the allotted three-score-and-ten period all have a defense against old age. Hetty Green, the world's richest woman, says: "The best advice I can give those who live to an extreme old age and still retain their mental and physical health is to keep the mind occupied on some business endeavor, walk as much as you can and chew a baked onion between meals."

Chauncey M. Depew says the reason he is so well at eighty, is because he keeps busy. "My universal observation has been that men who have led active lives and who stopped work when they arrive at eighty years or thereabouts, died, while those who continued at their tasks lived for many years more."

Mrs. Thomas Whiffin, who has

GOOD JOKES

Extremes Meeting.
"That was a remarkable idea of contrasts the animal painter had in his latest zoo picture."
"What was it?"
"He painted a laughing hyena standing under a weeping willow."

Smokeless Confagration.
Omar—Hello, Heiny! Are you still working at old Skinner's store?
Heiny—Not me. Old Skinner had a big fire last week.
Omar—Much of a loss?
Heiny—I should say so. He fired me.

His Finish.
Trotter—When I left here five years ago old Graspit was worth nearly half a million. How much has he now?
Homer—Not a dollar.
Trotter—What! Did he fail?
Homer—Not exactly. He died.

Strange Behavior.
Doctor—I regret to inform you, Mrs. Tightwad, that I fear your husband is suffering from softening of the brain.
Mrs. Tightwad—Goodness gracious! What makes you think that?

CAMPING TRIP BEATS HUSBAND HUNTING ON PIAZZA OF HOTEL

By LAURA JEAN LIBBEY.

(Copyright, 1916.)

Something there is more needful than expense, And something previous even to taste. 'Tis sense, Good sense, which only is the gift of heaven, And, though no science, fairly worth the seven.

If nine girls out of ten could have their way about it, no one should accuse them of going husband hunting under the pretense of leaving home for a summer outing. They would go in for a season of camp life with all its free, life-giving joys, letting the girls who dawdle around hotel piazzas catch the weak fish who are as eagerly intent upon heiress catching.

It's only within a very few years that girls have gone in for camp life during their vacations. There are a dozen good reasons to champion it. In the first place, there's no fine, expensive new wardrobe to buy. The winter's half-worn-out blue serge skirt, with a few dark shirt-waists, and the winter's thick-soled walking boots, a sweater and wool tam o'shanter cap, with a few needful accessories, constitute the wardrobe outfit. A crowd of happy, exuberant

passed her eightieth year, says early to bed and early to rise makes old people young. Charles R. Flint, the well-known captain of industry, says that sunshine and not moonshine is the real thing.

Window Washing Science In This Big Steel Mill

There are 3,000,000 window panes in the Bethlehem Steel company's mills, and formerly these windows were washed at irregular intervals by men who worked on day wages and did whatever amount of labor they chose. Today the company has charts of all those windows and, by experiment, has determined the time and the number of men needed to wash the glass in each building. The work is standardized. The price set for washing the windows in one of the immense machine shops is \$443. The work is now done on schedule, the windows are kept clean (for steel mills), and the increased light inside has a perceptible effect on production. The cost is about one-fifth what it formerly was, per unit of window space.

Making a Room Look Cool.

Everybody has noticed that some houses look cooler in summer than others. Upon examination it will generally be found in the house which always looks cool and livable that for one thing there is no heavy stuffed furniture that has to be covered up each summer. No room looks cozy and comfortable with all the furniture shrouded in those tan-and-white-striped covers that many people think they must put on in June.

Nor can a room look cool and homelike with long bare windows. Instead of heavy lace curtains that must be washed painstakingly each spring, stretched on a frame and put away till fall, there may be used plain hemmed or hemstitched curtains made of cheesecloth. They are as easy to wash

young girls, under the care of a genial woman of middle age, can enjoy a season of camp life just as heartily and thoroughly as young men can.

The exhilaration of outdoor life puts a wonderful amount of vim in girls even languidly disposed. There's a newness in responding to the tin horn which means up and out at five o'clock in the morning. The camp is always pitched near a brook and the way the girls make a dash for it for their morning dip makes an experienced sprinter open his eyes with amazement. Oh, the joy of dashing and splashing the face in that cool, sparkling brook water.

The girl who could only take chocolate, toast and an egg the first morning after her arrival could eat a whole chicken and all the good things that go with it after she has led the exhilarating life a week. In camps where money is not considered, a cook is taken along, but where young girls must count their pennies each girl takes her turn at getting the meals, showing how expert she is in the culinary art, and she is pleased to do it.

There are marching trips to some good farmhouse every day or so, which means all the milk they can drink—gratis usually—and as many fine vegetables for a dollar or so as they can carry back with them. They are such fine, healthy, happy girls when they break camp and come home! No wonder they get, without trying, the good, sensible husbands the hotel girls angled for in vain.

and iron as a tea towel and they cost so little they can be easily replaced when they wear out.

STAR OF MOVIE SERIAL

Ruth Roland. Star in "The Red Circle," a Pathé serial which has been one of the biggest attractions of the movie world.

Here and There.

It is estimated that one seed of cotton, given the application of all possible care and skill, would produce 40,000,000 seeds in six years.

To enable a physician to carry medicines without using a customary case a cane has been invented in which there is a tubular metal slide to hold vials.

Air sirens for short distance signaling have been invented by a French man and, mounted on the masts of ships, have been heard as far away as two miles.

Glass that will not splinter when broken is being made in France by pressing together under heat two sheets of glass with a sheet of celluloid between them.

An ingenious new guard for finger rings is worn inside a ring and presses against the finger to prevent it turning, at the same time being almost invisible.

It costs Paris nearly \$100,000 a year to care for the trees on its streets and boulevards and in its parks, more than 1,000 new ones being planted annually.

Refurbishing the Couch.

Don't be discouraged if your couch cover seems hopelessly soiled. It isn't ruined by any means. One girl, who expected to become a bride shortly after she received her degree at college, was saving her couch because the cedar lining was so handy for linens and frocks. But the bespotted exterior of faded green denim caused her much annoyance. A friend suggested recovering the whole thing in tones to match the girl's boudoir. Now it is a charming affair in delft blue-and-white striped chintz, with a full, ruffled valance at the front, and oval pillows, made from left-over pieces of the same.

WINCHESTER

"LEADER" AND "REPEATER" SHOT SHELLS
For the high flyers, or the low flyers, "Leader" and "Repeater" shells have the reach, spread and penetration. Their great sale is due to these qualities, which insure a full bag. Made in many gauges and loads. BE SURE TO ASK FOR THE W BRAND

Knew What He Had.

A newsie saw the driver of a certain make of motor car throw a blanket over the hood of the car. The boy had heard all of the jokes about this particular brand of car and decided to take a shot at it himself.

While the man thus carefully tucked the blanket down around the hood the youngster looked at him grinningly and remarked:
"Oh, you don't need to try to hide it. I know what you've got."

To Break in New Shoes

Always shake in Allen's Foot-Ease, a powder. It cures hot, sweating, itching, swollen feet. Cures corns, ingrowing nails and bunions. At all druggists and shoe stores, 25c. Don't accept any substitute. Sample mailed FREE. Address Allen S. Olmsted, Le Roy, N. Y. (adv.)

In Advance.

"I want a cent's worth of candy."
But the cent was missing. Hole in Arthur's pocket. The storekeeper told him to go out and find his penny. After a short time he came back and said:
"Maybe you'll find it when you sweep."
"Well, if I do, I'll give it to you."
"Do you sweep tomorrow?"
"Yes, sir."
Arthur looked at the storekeeper as much as a half a minute and said:
"All right, I'll take the candy to-day."

Sore Eyes

Granulated Eyelids, Eyes inflamed by exposure to Sun, Dust and Wind quickly relieved by **Murine Eye Remedy**. No Smarting, just Eye Comfort. At Your Druggist's 50c per Bottle. **Murine Eye Salve** Tubes 25c. For Book of the Eye treat Druggists or **Murine Eye Remedy Co., Chicago**

WANT TOO MUCH HAPPINESS

Trouble With Humanity is That It Would Have Its Enjoyments Come in Chunks.

We are told that happiness comes by pieces, and that it is these small bits linked together that make our lives worth while. Some of us are not content to take our happiness by degrees or at intervals. We want it all the time in big pieces, and if we cannot have it that way we think we are deprived of our natural rights and look upon ourselves as injured beings. It is a rather singular expression of human nature how happiness affects the individual. With some of us it makes us friendlier toward others and anxious that they should experience like joys; with others it makes us too satisfied with ourselves to think very much of our neighbors. Perhaps those of us who know what the joy of living means have experienced both of these attitudes at different periods of our lives and are in position, therefore, to appreciate a varying viewpoint, but even so it is only after we lose something of that joy of living and have found out for ourselves that there are shadows which no amount of sunlight can dispense that we can readily appreciate the blessing of whatever happiness may find its way into our lives. The little things that count so much in our intercourse with each other are not always regarded as highly as they should be, and for this reason we pass by much that would give us joy if we only knew how and where to find it.

Sometimes Apply It Lightly

For cuts, burns, scalds, sores and open wounds always apply Hanford's Balsam lightly, but be sure that it covers and gets to the bottom of the wound. A few light applications are generally all that is needed to heal this class of difficulties. Adv.

Good Ground From Garbage.

Most cities burn their garbage, and the expense of disposing of it is not small. Seattle, in the state of Washington, has hit upon a plan that not only does away with the cost of an incinerating plant, but increases the value of city property. A swampy piece of ground near the city limits was selected, and on this the garbage was dumped day by day and spread over the surface. An antiseptic solution was sprayed over this, to prevent decay, and porous sand or crushed ashes were used as the top layer. Finally grass seed was sown over the plot, and a highly fertilized piece of ground was the result, instead of a useless swamp.

BRAZIL A LAND OF PROMISE

Tremendous Possibilities That the Future Holds for the Great Republic to the South.

Brazil is not Spanish America. It is Portuguese America, and the republic of Brazil is distinct and separate. No one unacquainted with Brazil seems to realize what a tremendous area it represents and to confuse it with the west coast and even the River Plate is to make a commercial mistake.

In the very first place, experience with Spanish America does not necessarily carry an intimate acquaintance with Portuguese America. Brazil by itself deserves all the time a man can give to it. For instance, there is south Brazil, which includes the states of Rio Grande do Sul, Santa Catharina and Parana, and the new railroad which crosses them is opening up a good territory for future settlement. Rio Grande do Sul and Puerto Alegre do not control the whole of this interior.

It must be studied with the same purpose which was given to Washington and Oregon a generation ago. The climate is not dissimilar, nor, in a broad sense, are the civilizing influences at work very dissimilar. It is not unlike parts of Peru, Ecuador and Bolivia.

For frostbites use Hanford's Balsam. Adv.

Politicians' Letters.

President Van Buren had the reputation of being the wisest politician of his day. His political enemies named him the "Kinderhook Fox." Among the political aphorisms attributed to him was this advice to his son, popularly known as "Prince John": "My son, never write on political matters, if you can avoid the necessity by making a trip of 150 miles." This was in stage coach days, when a journey of 150 miles means as much in waste time and practically in money cost as a trip across the continent means today. Politicians generally have been popularly credited with having taken this advice to heart and followed it as closely as possible; but every once in a while something crops up to show that the popular impression on this subject is a delusion. Politicians, like other people, continue to write letters, and letters written in the past continue to appear, occasionally to the confusion of writers, even when the precaution has been taken in writing to attach the injunction: "Burn this letter." Often it is the letter which should have been burned which is the one and only one to be retained and to reach ultimate publicity.

POLITICAL ANNOUNCEMENTS

Santa Cruz Patagonian

Sheriff I hereby respectfully solicit the support of the electorate of Santa Cruz county for the office of Sheriff at the election Nov. 7, 1916.

Supervisor I hereby announce myself as a candidate for the office of Supervisor, from the Third Supervisorial district (San Rafael, Sonoita, Elgin, Conito, etc.) of Santa Cruz county, subject to the action of the voters at the election Nov. 7, 1916.

County Superintendent of Schools I hereby announce my candidacy for the office of County Superintendent of Schools of Santa Cruz county, subject to the action of the voters at the election Nov. 7, 1916.

County Recorder I hereby announce myself as a candidate for the above office and respectfully ask the voters of Santa Cruz County for their support.

Representative I hereby respectfully solicit the support of the electors of Santa Cruz Co. for the office of Representative in the lower house of the State Legislature.

County Attorney I hereby announce my candidacy for the office of Representative in the lower house of the State Legislature from this county, subject to the action of the voters at the election Nov. 7, 1916.

County Assessor I hereby announce my candidacy for the office of State Senator from Santa Cruz County and most respectfully solicit the votes of the electorate upon my past record.

Senator I hereby announce my candidacy for the office of State Senator from Santa Cruz County and most respectfully solicit the votes of the electorate upon my past record.

County Attorney I hereby announce my candidacy for the office of State Senator from Santa Cruz County and most respectfully solicit the votes of the electorate upon my past record.

County Attorney I hereby announce my candidacy for the office of State Senator from Santa Cruz County and most respectfully solicit the votes of the electorate upon my past record.

Subscription \$2.00 a year. Entered at the postoffice at Patagonia, Arizona, as second-class mail matter.

J. B. PRICE - EDITOR AND OWNER

One of the keenest disappointments of the present presidential campaign is the willingness shown by ex-Justice Hughes to revive sectional animosity between North and South.

VAUGHN

This community was well represented at the county fair, but of course all persons who are progressive and not selfish will always attend fairs and take exhibits.

Wm. H. Anderson has applied for a homestead in the forest. He likes the country very much.

H. L. Stoddard has an automobile on the way here. He is going to work for a real estate firm in California.

Mrs. Howard Kidge, who was suffering from nervous trouble, is very much improved since her trip to Phoenix.

Thursday the 18th was little Miss Thyra Harrison's birthday. She got several nice presents.

The children of Elgin school played "hooky" and didn't go to school, so their parents punished them by not letting them go to the fair Saturday.

NOTES OF THE FAIR Attendance at the second annual fair compared favorably with last year, although court being in session at the county seat prevented many from leaving Nogales, who would otherwise have attended.

The display of agricultural implements was especially fine, and received critical and appreciative attention from the progressive farmers of Santa Cruz.

One of the notable exhibits was the poultry entries. The birds shown were all prize specimens and an example of careful and scientific breeding.

An interesting display was the work shown in the children's department. Mapping, drawing, needlework, all gave evidence of painstaking care and talent on the part of the youngsters.

The ladies' department was more than creditable to the matrons and maids of Santa Cruz county. In dainty and artistic creations of needlework there were many beautiful examples.

The good things of the pantry were also plentiful, jams, jellies, preserves and pickles of appetizing appearance and home-made purity.

Raymond R. Earhart, county treasurer, was in town yesterday, looking after his candidacy for sheriff. In speaking of taxes, the first instalment of which is now due, Mr. Earhart says the rate will be gradually decreased from now on.

This year the State and county taxes amount to \$1.65 on the \$100 valuation, while last year it was \$1.91. This decrease, of course, is due to a wise and economic Democratic State and county administration.

Any Republicans got anything to say about this?

Notice for Publication 020804

Department of the Interior, U. S. Land Office at Phoenix, Arizona, Sept. 28, 1916.

Notice is hereby given that Francisco Pons of San Rafael, Arizona, who on Feb. 1, 1913, made Homestead Entry No. 020804 for neq section 13, and on Sept. 7, 1916, made Additional Hd. Entry No. 030944, for Lots 1, 2 and 3, section 13, all in township 23 S., range 17 E., G&SR Meridian, has filed notice of intention to make three year final proof to establish claim to the land above described, before W. A. O'Connor, U. S. Commissioner, at Nogales, Arizona, on the 20th day of November, 1916.

Claimant names as witnesses: Geo. W. Parker, Wm. D. Parker of San Rafael, Arizona; Victor J. Wager, Raymond R. Earhart, of Nogales, Ariz. Thomas F. Weedin, Register. First publication 10-6-11-3-16
