DOGS NO MATCH FOR BUCK

Animal at Bay Proved Itself Master of Pack That Had Been Put on Its Track.

Animals of different species do not often fight one another because they cannot comprehend or guard against an attack different from that used by one of their own kind.

The predatory beasts in many cases overcome their prey, not because they are very much stronger, but because of the fear and confusion that their strange method of attack rouses in their quarry.

For example, a dog of a fighting breed charges like a lion, and nearly every member of the deer tribe, including even the elk and moose, flies from him in panie; but when one of these animals learns the real power of the dog it is a different matter.

Hobart Ames kept a number of deer in a park at his winter home in Tenamong them a buck with a fine set of horns. The buck came to have a great contempt and dislike for dogs, and any unfortunate dog that escape with his life.

The buck had learned that no dog could withstand the charge or the thrust of his horns, and running from them was the last thing he thought of. On the other hand, the dogs were greatly puzzled by an animal that ought by all rules to run away, but did not.

One night the big buck jumped out of his yard, and Mr. Ames' foreman put the dogs on the deer's track and found him in a thicket a quarter of a mile from the house. There was a fight, and then the dogs were seen coming home at top speed, followed by the

His hair was turned the wrong way and his eyes burned redly as he charged every dog he could overtake. Several of the bounds were badly hurt and all of them were scared.

They fied to their own quarters, and it required the combined efforts of the kennel men and stable boys to rescue the pack. Probably if a single one of the hounds had learned to fight a deer at bay his example would have been followed by his mates.-Youth's Companion.

His Children's Work. He was certainly a very poor speci-

men of humanity, and, so far as could be seen, was certainly a fitting recipient of the pennies dropped into his box by the charitable-minded. Day after day he sat there, none knowing or caring how he managed the journey to and from his residence, in whatever part of the town that might be, without an accident. "What prought you to this, my poor fellow?" inquired a lady of a rather more practical turn of mind than many. "My childrenma'am," replied the fellow, with pitiful groan. Dropping some coininto the box, the lady passed on, with a remark to her companion as to what some children are responsible for. bystander, who overheard the remark, "The eldest is twelve, and there are four others," replied the knave. "Then you rascal, how could they bring you then feel quite equal to taking up the to this?" "In a handcart, the same as

they take me away," was the self-sat-

"Yes, sign my name, you know." "Oh, right here."

As he was signing his name in the register in came three roughly clothed, unshorn fellow immediately recognizable as Georgia "crackers." One of them advanced to the desk.

Will you autograph?" asked the clerk, his face aglow with the pleasure that comes from the conscious ness of intellectual superiority.

"Certainly,' said the "cracker," his face no less radiant than that of the clerk; 'mine's rye.'-The Argonaut.

Unable to Appreciate Silence. Some people never learn to appreciate the beauty of silence. Perhaps it is an appreciation that cannot be acquired. Perhaps it comes by nature Such people seem to believe that all

apparently human relations must express themselves in speech. They keep up an incessant chatter and they try to make others chatter in return They are among the most fatiguing in fluences in the world. Often they are tormented with personal curiosity. They ask searching questions, and if they do not receive spontaneous and full replies they become suspicious or hurt.

Still Worse.

"My life has been full of disappointments!" said the lank and horse-faced man. "I have never been able to achieve my cherished ambitions or obtain the things I most earnestly desired, Ar-r-r-r-!"

"Ruh!" returned the man on whose brow sat despair like a brooding ben on her nest. "I am worse off than that! My rich uncle left me his biggest motor car and nothing for its upkeep!"-Kansas City Star.

Peasant Women on the Northern Coast of France Are Acknowledged Rulers of Community.

On the northern coast of France the peasant women are more remarkable than the men, and they are far better educated.

It is they who drag the boats in and out of the little harbors, and who sell the fish in the markets. They are thus brought into contact with the peoples and civilizations of all countries. and no class of women in Europe is so emancipated

They are strong and robust, and their outdoor life and masculine habits-for they belong to the sea as much as do their menfolk-harden thier bodies, at the same time giving them a taste for all masculine pursuits

and pleasures. They rarely quarrel with their husbands; indeed, the latter would fare badly did they attempt coercion or illtreatment in any shape or form, for the women are taller than they are and quite as strong; so the "mere men" of the French coast prefer to keep their skins whole, and treat their wives as "jolly good fellows," which is exactly what they are.

They sing their songs and enjoy their glass of cider with the best of their menfolk.

got into the deer inclosure did well to GAIN LIVELIHOOD FROM SEA

French Fishermen at Home in All Wa ters-Have a Brotherhood That Is Worth Emulating.

Besides sailing to the uttermost parts of the earth in pursuit of cod, herring and mackerel, the French do a large trade with the fish in their own

Of these there is a great number, including two sorts of skate, mackerel, soles, turbot, brill, plaice, flounders, bream and oysters.

There are three classes of fisherfolk in northern France. Some of the men have their own boats, and they hire what assistance they require, buy their own nets, find their own bait, etc.; others hire a boat between them and each man gets so much, while the rest goes to the owner; the third class are too poor to do anything but sell their

The boats vary in size from five to refuse the request. fifty tons and generally nine men form

a crew. The brotherhood existing among them extends beyond death. The widow of one of their number has a right to send out her nets with the boat to which her husband belonged, and her share of what is caught is scrupulously handed over to her.

Ald to Sleep.

fective remedies for that kind of sleepthan an earthen bottle as it will retain the heat for hours. The second method is much more simple. Discard stomach with hands clasped under the latish." forehead to lift the head a trifle. This will often send one to sleep.

SYNOPSIS.

COPYRIGHT BY THE BOSBS-HERRILL COMPANY

Le Comte de Sabron, captain of French cavalry, takes te his quarters to raise by hand a motherless Irish terrier pup, and names it Pitchouns. He dines with the Marquise d'Esclignac and meets Miss Julia Redmond, American heiress, who sings for him an English ballad that lingers in his memory. Sabron is ordered to Algiers, but is not allowed to take servants or dogs. Miss Redmond offers to take care of the dog during his master's absence, but Pitchoune, homesick for his master, runs away from her. The Marquise plans to marry Julia to the Duc de Tremont. Unknown N. Sabron, Pitchoune follows him to Algiers. Dog and master meet and Sabron gets permission from the war minister to keep his dog with him Julia writes him that Pitchoune has run away from her. He writes Julia of Pitchoune. The Duc de Tremont finds the American heiress capricious. A newspaper report that Sabron is among the missing after an engagement with the natives causes Julia to confess to her aunt that she leves him. Sabron, wounded in an engagement, falls into the dry bed of a river, and is watched over by Pitchoune, After a horrible night and day Pitchoune leaves him. Julia goes in search of Sabron, reported missing. -8-

CHAPTER XV.

Julia's Romance. From her steamer chair the Mar-

quise d'Esclignac asked: "Are you absorbed in your book, Julia?"

Miss Redmond faintly smiled as she laid it down. She was absorbed in but one thing, morning, noon and night, think waking or sleeping: when and where she should find him; how he was being treated. Had he been taken captive? He was not dead, of that she was sure.

"What is the book, Julia?" "Le Conte d'un Spahi."

"Put it down and let me speak to you of Robert de Tremont." Miss Redmond, being his guest and indebted to him for her luxurious transportation, could not in decency

"He knows nothing whatever of our errand, Julia."

"Ah, then, what does he think?" Miss Redmond on the arm of her blue serge coat wore a band of white. in the center of which gleamed the Red Cross. The marquise, wrapped in a sable rug, held a small Pekinese lapdog cuddled under her arm, and had only the appearance of a lady of leisure bent on a pleasure excursion. She There are two very simple but ef- did not suggest a rescuing party in the least. Her faunty hat was enveloped lessness that comes from overwork or by a delicate veil; her hands were innervous exhaustion, says Nurse. One cased in long white gloves. Now that is to have the feet very warm. Put she had encouraged her energetic niece them against a rubber bag filled with and taken this decisive step, she rehot water. A rubber bag is better laxed and found what pleasure she might in the voyage.

"When we came on board last night, my dear, you remember that I sat with the pillow, turn over and lie on the Robert in the salon until . . . well,

"After midnight?"

"Possibly: but I am fifty and he is thirty. Moreover, I am his godmother. He is enchanting, Julia, spiritual and sympathetic. I confess, my dear, that I find myself rather at a loss as to what to tell him."

Miss Redmond listened politely. She was supremely indifferent as to what had been told to her host. This was Tuesday; they should reach Algiers on Saturday at the latest. What news would meet them there? She held in her book the last dispatch from the ministry of war. Supposing the Captain de Sabron had been taken captive by some marauding tribe and was being held for a ransom! This was the Romance of a Spahi, in which she was absorbed Taken captive! She could not let berself think what that might mean.

"Robert's mother, you know, is my closest friend. His father was one of the witnesses of my marriage. I feel that I have brought up Robert It would have been so perfect." She sighed.

"Ma fante!" warned Miss Redmond, with a note of pain in her voice.

"Yes, yes," accepted the marquise, I know, my dear, I know. But you cannot escape from the yacht except in a lifeboat, and if you did it would be one of Robert's lifeboats! You must no' be too formal with him." She tapped the nose of her Pekinese dog. "Be still, Mimi, that man is only a sallor! and if he were not here and at his duty you would be drowned, you little goose!"

The Pekinese dog was a new addition. Julia tried not to dislike her; for Julia, only Pitchoune existed. She could not touch Mimi without a sense of disloyalty.

The boat cut the azure water with its delicate white body, the decks glistened like glass. The sailor at whom Mimi had barked passed out of sight, and far up in the bow Tremont, in white flannels, stood smoking.

"I had to be very circumspect, my lear Julia, when I talked with Robert. You see you are not engaged to Monsieur de Sabron." The girl colored. The sentimental woman in me," her aunt went on, "has responded to all your fantasies, but the practical woman in me calls me a romantic goose." "Ah." breathed Miss Redmond, open-

ng her book, "ma tante, let me read." tionately. "The most important part even a cargo vessel." of the whole affair is that we are here

-that we are en route to Algiers, is it The girl extended her hand grate-

fully. "And thank you! Tell me, what did you say to him?"

The marquise hummed a little tune, and softly pulled Mimi's ears. "Remember, my child, that if we find Monsieur de Sabron, the circumspec-

tion will have to be even greater still."

"Leave that to me, ma tante." "You don't know," said the determined lady quite sweetly, "that he has the slightest desire to marry you,

Julia. Miss Redmond sat up in her chair,

and flamed. "Do you want to make me miserable?"

"I intend to let my worldly wisdom equal this emergency, Julia. I want Robert to have no suspicion of the

"How can we prevent it, ma tante?" "We can do so if you will obey me." The girl started, and her aunt, looking up at the Duc de Tremont where he stood in the bow, saw that he showed signs of finishing his smoke and of joining them.

"Ma tante," said the girl quickly, 'have you' brought me here under false colors? Have you let him

"Hush Julia you are indebted to him for accomplishing your own desire. "But I would never, never

"Petite sotte," cried the marquise, "then you would never have been on this yacht."

Intensely troubled and annoyed, Julia asked in a low tone:

"For heaven's sake, ma tante, tell ne what the Duc de Tremont thinks!" Her aunt laughed softly. "The intrigue and romance of it all entertained her. She had the sense of having made a very pretty concession to her niece, of having accomplished a very agreeable pleasure trip for herself. As for young Sabron, he would be sure to be discovered at the right moment, to be lionized, decorated and advanced. The reason that she had no wrinkles on her handsome cheek was because she went lightly through life.

"He thinks, my dearest girl, that you are like all your countrywomen: a little eccentric and that you have a

Him."

strong mind. He thinks you one of the most tender-hearted and benevolent of girls."

"Ma tante, ma tante!" "He thinks you are making a little mission into Algiers among the sick and the wounded. He thinks you are

going to sing in the hospitals." "But," exclaimed the girl, "he must think me mad."

"Young men don't care how mildly mad a beautiful young woman is, my dear Julia."

"But, he will find out . will know."

'No," said the marquise, "that he will not. I have attended to that. He will not leave his boat during the excursion, Julia. He remains, and we go on shore with our people." "How splendid!" sighed Julia Red-

mond, relieved. "I'm glad you think so," said her aunt rather shortly. "Now I have a favor to ask of you, my child."

Julia trembled. "Ma tante!"

"While we are on board the yacht you will treat Robert charmingly." "I am always polite to him, am I not?" "You are like an irritated sphing

to him, my dear. You must be different." "I thought," said the girl in a subdued voice, "that it would be like this.

"Nonsense," said the marquise affect Oh, I wish I had sailed on any vesel,

Looking at her gently, her aunt motor car referred to above.

eaid: "Don't be ridiculeus. I only wish to protect you, my child. I think I have proved my friendship. Remember, before the world you are nothing to Charles de Sabren. A woman's heart, my dear, has delusions as well as passions."

The girl crimsoned and bowed her charming head. "You are not called upon to tell Robert de Tremont that you are in love with a man who has not asked you to marry him, but you are his guest, and all I ask of you is that you make the voyage as agree able to him as you can, my dear. Tremont was coming toward them.

Julia raised her head and murmured: "I think you for everything. I shall do what I can." And to herself she said: "That is, as far as my honor will let me."

CHAPTER XVI.

The Duke in Doubt.

The short journey to Africa-over a calm and perfect sea, whose waters were voices at her port to solace her. and where the stars alone glowed down like friends upon her and seemed to understand-was a torture to Julia Redmond. To herself she called her aunt cruel, over and over again, and felt a prisoner, a caged creature.

Tremont found her charming, though in this role of Florence Nightingale, she puzzled and perplexed him. She was nevertheless adorable. The young man had the good sense to make a discreet courtskip and understood she would not be easily won. Until they reached Algiers, indeed, until the night before they disembarked, he had not said one word to her which might not have been shared by her aunt. In accordance with the French custom, they never were alone. The marquise shut her eyes and napped considerably and gave them every opportunity she could, but she was always present.

The Duc de Trement had been often in love during his short life. He was a Latin and thought that women are made to be loved. It was part of his education to think this and to tell them this, and he also believed it a proof of his good taste to tell them

this as soon as possible. He was a thoroughly fine fellow. Some of his forefathers had fought and fallen in Agincourt. They had been dukes ever since. There was something distinctly noble in the blond young man, and Julia discovered it. Possibly she had felt it from the first.

From the moment that the old Juch ess had said to Robert de Tremont: "Julia Redmond in a great catch, my dear boy. I should like to have you marry her," her son answered:

"Bien, ma mere," with cheerful acquiescence, and immediately considered it and went to Tarascon, to the Chateau d'Esclignac. When his mother had suggested the visit he told her that he intended making up a party for the Mediterranean.

"Why don't you take your gedmether and the American girl? Miss Redmond has an income of nearly a million francs and they say she is wellbred.

'Very good, ma mere.' When he saw Miss Redmond he found her lovely; not so lovely as the and it was not until lately that there Comtesse de la Maine, whose invitation to dinner he had refused on the it is prime or not by examining it day his mother suggested the Chateau day his mother suggested was a closely. It black specially the hide is not the throat, especially the hide is not widow. It is not very, very comme first class. The larger the spots the il faut to marry a widow, in the Faubourg St.-Germain. Miss Redmond's beauty was different. She was selfabsorbed and cold. He did not understand her at all, but that was the American of her.

One of his friends had married an American girl and found out afterward that she chewed gum before breakfast. Pauvre Raymond! Miss Redmond did not suggest such possibilities. Still she was very different from a French jeune fille. (TO BE CONTINUED.)

DOGS NO MATCH FOR BUCK

Animal at Bay Proved Itself Master of Pack That Had Been Put on Its Track.

Animals of different species do not often fight one another because they cannot comprehend or guard against an attack different from that used by one of their own kind.

The predatory beasts in many cases overcome their prey, not because they are very much stronger, but because of the fear and confusion that their strange method of attack rouses in their quarry.

For example, a dog of a fighting breed charges like a lion, and nearly every member of the deer tribe, including even the elk and moose, flies from him in panic; but when one of these animals learns the real power of the dog it is a different matter.

Hobart Ames kept a number of deer in a park at his winter home in Tennessee, among them a buck with a fine set of horns. The buck came to have a great contempt and dislike for dogs, and any unfortunate dog that got into the deer inclosure did well to escape with his life.

The buck had learned that no dog could withstand the charge or the thrust of his horns, and running from them was the last thing he thought of. On the other hand, the dogs were greatly puzzled by an animal that ought by all rules to run away, but did not.

One night the big buck jumped out of his yard, and Mr. Ames' foreman put the dogs on the deer's track and found him in a thicket a quarter of a mile from the house. There was a fight, and then the dogs were seen coming home at top speed, followed by the enraged buck.

His hair was turned the wrong way and his eyes burned redly as he charged every dog he could overtake. Beveral of the hounds were badly hurt and all of them were scared.

They fied to their own quarters, and tt required the combined efforts of the kennel men and stable boys to rescue the pack. Probably if a single one of the hounds had learned to fight a deer at bay his example would have been followed by his mates.-Youth's Companion.

His Children's Work.

He was certainly a very poor specimen of humanity, and, so far as could be seen, was certainly a fitting recipient of the pennies dropped into his box by the charitable-minded. Day after day he sat there, none knowing or caring how he managed the journey to and from his residence, in whatever part of the town that might be, without an accident. "What prought yet to this, my poor fellow?" inquired a lady of a rather more practical turn of mind than many, "My children. ma'am," replied the fellow, with pitiful groan. Dropping some coininto the box, the lady passed on, with a remark to her companion as to what some children are responsible for. bystander, who overheard the remark, asked him the ages of his children "The eldest is twelve, and there are four others," replied the knave. "Then you rascal, how could they bring you to this?" "In a handcart, the same as they take me away," was the self-sattafied response.

Ready For It. He was traveling in the South and had to put up overnight at a secondrate notel in western Georgia. He said to the clerk when he entered:

Where shall I autograph?" "Autograph?" said the clerk. "Yes, sign my name, you know."

"Oh, right here." As he was signing his name in the register in came three roughly clothed, unshorn fellow immediately recognizable as Georgia "crackers." One of them advanced to the desk.

"Will you autograph?" asked the clerk, his face aglow with the pleasure that comes from the consciousness of intellectual superiority.

"Certainly,' said the "cracker," his face no iess radiant than that of the clerk; 'mine's rye. '-The Argonaut.

Unable to Appreciate Silence. Some people never learn to appreciate the beauty of silence. Perhaps it is an appreciation that cannot be ac quired. Perhaps it comes by nature

Such people seem to believe that all apparently human relations must express themselves in speech. They keep up an incessam chatter and they of the tavern. 'When they ain't, which try to make others chatter in return They are among the most fatiguing in fluences in the world. Often they are tormented with personal curiosity. They ask searching questions, and if they do not receive spontaneous and full replies they become suspicious or hurt.

Still Worse.

"My life has been full of disappointments!" said the lank and horse-faced man. "I have never been able to achieve my cherished ambitions or obtain the things I most earnestly de-

"Huh!" returned the man on whose brow sat despair like a brooding hen on her nest. "I am worse off than that! My rich uncle left me his biggest motor car and nothing for its upkeep!"-Kansas City Star.

NO DEMAND FOR SUFFRAGE

Peasant Women on the Northern Coast of France Are Acknowledged Rulers of Community.

On the northern coast of France the peasant women are more remarkable than the men, and they are far better

It is they who drag the boats in and out of the little harbors, and who sell the fish in the markets. They are thus brought into contact with the peoples and civilizations of all countries, and no class of women in Europe is so emancipated

They are strong and robust, and their outdoor life and masculine habits-for they belong to the sea as much as do their menfolk-harden thier bodies, at the same time giving them a taste for all masculine pursuits and pleasures.

They rarely quarrel with their husbands; indeed, the latter would fare badly did they attempt coercion or illtreatment in any shape or form, for the women are taller than they are and quite as strong; so the "mere men" of the French coast prefer to keep their skins whole, and treat their wives as "jolly good fellows," which is exactly what they are.

They sing their songs and enjoy their glass of cider with the best of their menfolk.

GAIN LIVELIHOOD FROM SEA

French Fishermen at Home in All Wa ters-Have a Brotherhood That Is Worth Emulating.

Besides sailing to the uttermost parts of the earth in pursuit of cod, herring and mackerel, the French do a large trade with the fish in their own waters.

Of these there is a great number. including two sorts of skate, mackerel, soles, turbot, brill, plaice, flounders, bream and oysters.

There are three classes of fisherfolk in northern France. Some of the men have their own boats, and they hire what assistance they require, buy their own nets, find their own bait, etc.; others hire a boat between them and each man gets so much, while the rest goes to the owner; the third class are too poor to do anything but sell their

The boats vary in size from five to fifty tons and generally nine men form

The brotherhood existing among them extends beyond death. The widow of one of their number has a right to send out her nets with the boat to which her husband belonged, and her share of what is caught is scrupulously handed over to her.

Ald to Sleep.

ective remedies for that kind of sleepis to have the feet very warm. Put she had encouraged her energetic niece them against a rubber bag filled with and taken this decisive step, she rehot water. A rubber bag is better laxed and found what pleasure she than an earthen bottle as it will retain the heat for hours. The second method is much more simple. Discard stomach with hands clasped under the forehead to lift the head a trifle. This will often send one to sleep.

When you are tired and nervous, a good rubbing all over the body with otion here given will be ful. Lie quietly in bed after the rubbing for half an hour and you will then feel quite equal to taking up the daily tasks again; here is the lotion; Diluted alcohol, six ounces; cologne water, six ounces; tannin, ten grains.

Poisoned Seeds Make Odd Plants. Observations on plant variation from poisoning of seeds have been reported in France by Prof. A. Jungel son. After being placed for one to twenty-four hours in a dilute solution of sulphate of copper seeds of maize were planted, and a considerable proportion yielded abnormal spikes, the percentage of the abnormal plants being greatest among those from seeds that had been deprived of their seed coat or otherwise mutilated before exposure to the copper solution.

The mutilation alone produced no change in the character of the plants. The more intimate the contact of the poison the greater was the tendency of the plant to take on new forms.

Appropriately Named.

"I tripped over something in the darkness and nearly broke my leg!" carped the Kansas City drummer who was marooned in Petunia overnight, and had ventured out to a picture show. "Why in torment do you people brag of your White Way when there isn't a street light going in town?

"Because it is tollable white when they are going, replied the landlord I am compelled to say is every now and again, you turn white yourself for fear you'll break your neck every step you take."-Kansas City Star.

Quite Likely.

"You're a swindler," exclaimed Mrs. Gabb as she entered the bird store. 'You're worse than a highway robber. You ought to be ashamed of yourself to cheat a poor innocent woman the way you did. That parrot I bought of you last week is a fraud. You said it was a fluent talker and you charged me a big price for him, too, and that bird hasn't said a single word since 1 got him. Not one word. Do you hear

me? Not-one-single-word!" "Perhaps," suggested the bird fancier mildly, "you didn't give him a shanca."

MARIE VAN VORST

ILLUSTRATIONS OF RAY WALTERS

SYNOPSIS.

COPYRIGHT BY THE BOSBS-HERRILL COMPANY

Le Cemte de Sabron, captain of French cavalry, takes te his quarters to raise by hand a motherless Irish terrier pup, and names it Pitchoune. He dines with the Marquiso d'Esclignac and meets Miss Julia Redmend, American heireas, who sings for him an English ballad that lingers in his memory. Subron is ordered to Agiers, but is not allowed to take servants or dogs. Miss Redmend offers to take care of the dog during his master's absence, but Pitchoune, homesick for his master, runs away from her. The Marquise plans to marry Julia to the Duc de Trement. Unknown & Sabron, Pitchoune follows him to Algieis. Dog and master meet and Sabron gets permission from the war minister to keep his dog with him Julia writes him that Pitchoune has run away from her. He writes Julia of Pitchoune. The Duc de Trement finds the American heiress capricious. A newspaper report that Sabron is among the missing after an engagement with the natives causes Julia to confess to her aunt that she leves him. Sabron, wounded in an engagement, falls into the dry bed of a river, and is watched over by Pitchoune, After a horrible night and day Pitchoune leaves him. Julia goes in search of Sabron, reported missing.

CHAPTER XV.

Julia's Romance. From her steamer chair the Marquise d'Esclignac asked:

"Are you absorbed in your book, Julia ?"

Miss Redmond faintly smiled as she laid it down. She was absorbed in but one thing, morning, noon and night, waking or sleeping: when and where she should find him; how he was being treated. Had he been taken captive? He was not dead, of that she was sure,

"What is the book, Julia?" "Le Conte d'un Spaht."

"Put it down and let me speak to ou of Robert de Tremont." Miss Redmond, being his guest and indebted to him for her luxurious

transportation, could not in decency

refuse the request. "He knows nothing whatever of our errand, Julia."

"Ah, then, what does he think?" Miss Redmond on the arm of her blue serge coat wore a band of white, in the center of which gleamed the Red Cross. The marquise, wrapped in a sable rug, held a small Pekinese lapdog cuddled under her arm, and had only the appearance of a lady of leisure bent on a pleasure excursion. She There are two very simple but ef- did not suggest a rescuing party in the least. Her jaunty hat was enveloped essness that comes from overwork or by a delicate veil; her hands were innervous exhaustion, says Nurse. One cased in long white gloves. Now that might in the voyage.

"When we came on board last night my dear, you remember that I sat with the pillow, turn over and lie on the Robert in the salon until . . . well,

"After midnight?"

"Possibly; but I am fifty and he is thirty. Moreover, I am his godmother. He is enchanting, Julia, spiritual and sympathetic. I confess, my dear, that I find myself rather at a loss as to what to tell him."

Miss Redmond listened politely. She was supremely indifferent as to what had been told to her host. This was Tuesday; they should reach Algiers on Saturday at the latest. What news would meet them there? She held in her book the last dispatch from the ministry of war. Supposing the Captain de Sabron had been taken captive by some marauding tribe and was be ing held for a ransom! This was the Romance of a Spahi, in which she was absorbed Taken captive! She could not let herself think what that might mean.

"Robert's mother, you know, is my closest friend. His father was one of the witnesses of my marriage. I feel that I have brought up Robert it would have been so perfect." She sighed.

"Ma fante!" warned Miss Redmond, with a note of pain in her voice.

"Yes, yes," accepted the marquise, I know, my dear, I know. But you cannot escape from the yacht except in a lifeboat, and if you did it would be one of Robert's lifeboats! You must no' be too formal with him." She tapped the nose of her Pekinese dog. "Be still, Mimi, that man is only a sailor! and if he were not here and at his duty you would be drowned, you little goose!"

The Pekinese dog was a new addition. Julia tried not to dislike her; for Julia, only Pitchoune existed. She could not touch Mimi without a sense of disloyalty.

The boat cut the azure water with its delicate white body, the decks glistened like glass. The sailor at whom Mimi had barked passed out of sight, and far up in the bow Tremont, in white flannels, stood smoking.

"I had to be very circumspect, my dear Julia, when I talked with Robert. You see you are not engaged to Mon-sleur de Sabron." The girl colored. "The sentimental woman in me," her aunt went on, "has responded to all your fantasies, but the practical woman in me calls me a romantic goose."

"Ah." breathed Miss Redmond, opening her book, "ma tante, let me read." tionately. "The most important part of the whole affair is that we are here

that we are en route to Algiers, is it

The girl extended her hand gratefully. "And thank you! Tell me, what did

you say to him?" The marquise hummed a little tune, and softly pulled Mimi's ears. "Remember, my child, that if we find

Monsieur de Sabron, the circumspec tion will have to be even greater still." "Leave that to me, ma tante." "You don't know," said the de

termined lady quite sweetly, "that he has the slightest desire to marry you, Julia. Miss Redmond sat up in her chair,

and flamed. "Do you want to make me miser-

able?" "I intend to let my worldly wisdom equal this emergency, Julia. I want

Robert to have no suspicion of the facts." "How can we prevent it, ma tante?" "We can do so if you will obey me."

The girl started, and her aunt, look-

ing up at the Duc de Tremont where he stood in the bow, saw that he showed signs of finishing his smoke and of joining them. "Ma tante," said the girl quickly,

have you brought me here under colors? Have you let him false "Hush, Julia, you are indebted to

him for accomplishing your own desire. "But I would never, never

"Petite sotte," cried the marquise, "then you would never have been on this yacht."

Intensely troubled and annoyed Julia asked in a low tone:

"For heaven's sake, ma tante, tell me what the Duc de Tremont thinks!" Her aunt laughed softly. "The intrigue and romance of it all entertained her. She had the sense of having made a very pretty concession to her niece, of having accomplished a very agreeable pleasure trip for herself. As for young Sabron, he would be sure to Le discovered at the right moment, to be lionized, decorated and advanced. The reason that she had no wrinkles on her handsome cheek was because she went lightly through life.

"He thinks, my dearest girl, that you are like all your countrywomen: a little eccentric and that you have a

strong mind. He thinks you one of the most tender-hearted and benevolent of girls."

"Ma tante, ma tante!" "He thinks you are making a little mission into Algiers among the sick and the wounded. He thinks you are

going to sing in the hospitals." "But," exclaimed the girl, "he must think me mad."

"Young men don't care how mildly mad a beautiful young woman is, my dear Julia."

"But, he will find out . will know.

"No." said the marquise, "that he will not. I have attended to that. He will not leave his boat during the excursion, Julia. He remains, and we go on shore with our people."

"How splendid!" sighed Julia Redmond, relieved. "I'm glad you think so," said her

aunt rather shortly. "Now I have a favor to ask of you, my child." Julia trembled.

"Ma tante!" "While we are on board the yacht

ou will treat Robert charmingly." "I am always polite to him, am "You are like an irritated sphinx

to him, my dear. You must be dif-

ferent." "I thought," said the girl in a subdued voice, "that it would be like this. "Nonsense," said the marquise affec- Oh, I wish I had sailed on any vesel,

even a cargo vessel." Looking at her gently, her aunt

said: "Don't be ridiculous. I only wish to protect you, my child. I think I have proved my friendship. Remember, before the world you are nothing to Charles de Sabron. A woman's heart, my dear, has delusions as well as passions."

The girl crimsoned and bowed her charming head. "You are not called upon to tell Robert de Tremont that you are in love with a man who has not asked you to marry him, but you are his guest, and all I ask of you is that you make the voyage as agreeable to him as you can, my dear.

Tremont was coming toward them. Julia raised her head and murmured: "I think you for everything. I shall do what I can." And to herself she said: "That is, as far as my honor will let me."

CHAPTER XVL

The Duke in Doubt.

The short journey to Africa over calm and perfect sea, whose waters were voices at her port to solace her, and where the stars alone glowed down like friends upon her and seemed to understand-was a torture to Julia Redmond. To herself she called her aunt cruel, over and over again, and felt a prisoner, a caged creature.

Tremont found her charming, though in this role of Florence Nightingale, she puzzled and perplexed him. She was nevertheless adorable. The young man had the good sense to make a discreet courtship and understood she would not be easily won. Until they reached Algiers, indeed, until the night before they disembarked, he had not said one word to her which might not have been shared by her aunt. In accordance with the French custom, they never were alone. The marquise shut her eyes and napped considerably and gave them every opportunity she could, but she was always present.

The Due de Tremont had been often in love during his short life. He was a Latin and thought that wemen are made to be loved. It was part of his education to think this and to tell them this, and he also believed it a proof of his good taste to tell them this as soon as possible.

He was a thoroughly fine fellow. Some of his forefathers had fought and fallen in Agincourt. They had been dukes ever since. There was something distinctly noble in the blond young man, and Julia discovered it. Possibly she had felt it from the first. From the moment that the old Juck-

ess had said to Robert de Tremont: "Julia Redmond in a great catch, my dear boy, I should like to have you marry her." her son answered: 'Bien, ma mere," with cheerful ac-

quiescence, and immediately considered it and went to Tarascon, to the Chateau d'Esclignac. When his mother had suggested the visit he told her that he intended making up a party for the Mediterranean.

"Why don't you take your godmoth-er and the American girl? Miss Redmond has an income of nearly a million francs and they say she is wellbred.

'Very good, ma mere. When he saw Miss Redmond he found her lovely; not so lovely as the Comtesse de la Maine, whose invitation to dinner he had refused on the

day his mother suggested the Chateau

d'Esclignac. The comtesse was a widow. It is not very, very comme il faut to marry a widow, in the Faubourg St.-Germain. Miss Redmond's beauty was different. She was selfabsorbed and cold. He did not understand her at all, but that was the American of her.

One of his friends had married an American girl and found out after ward that she chewed gum before breakfast. Pauvre Raymond! Miss Redmond did not suggest such possibilitles. Still she was very different from a French jeune fille. (TO BE CONTINUED.)

All Lessons of Life. The worst kind of trouble and son row should only teach us the lesson of a wider sympathy and love. We should never allow ourselves to become immersed in our own griefs, for that only intensifies them. Let us shut them out of our minds as much

as possible.

By letting no day pass without doing some kindness to others who are perhaps far worse off than we are, the trouble, which seemed so gigantic at first, will gradually sink to Lilliputian dimensions. By thinking sunny thoughts and shutting out the intruding dark ones we can rob grief of all its sting. By admitting only the thoughts of love and peace we help ourselves and many others.

to safeguard your health against

will help you very materially. Be sure to get a bottle today.

Cheerful Man Wins. In a recent contest of woman's opinions this type brought first money. He

is described as follows: I vote for a cheerful grin, and for the man who always has it ready at upon as a judge of human nature, a dary. humorist, an optimist, a tactician, ar altruist and a friend. If he's a doctor, I want him when I'm sick. If he's a preacher, I'll go to his church, regardless of denomination. If he's in business, I'd like to work for him. If he wants me to, I'll marry him.

Weeks' Break-Up-A-Cold Tablets A guaranteed remedy for Colds and La Grippe. Price 25c of your druggist. It's good. Take nothing else.-Adv.

ROUT CATERPILLARS

Twenty Thousand Nests Are De stroyed by Fire and Acids in Washington.

Everett, Wash.-Fifteen hundred school children participated in organized warfare against tent caterpillars during the week past in Everett, with the result that about 20,000 nests were destroyed by fire and acids. Interest in destroying the posts was aroused by the principals of schools, and now that the children have learned to burn them it is believed the school youngsters will be an effective means of defeating the annual invasion of the caterpil-

Dr. Pierce's Pleasant Pellets first put up 40 years ago. They regulate and invigorate, stomach, liver and bowels. Sugar-coated tiny granules. (Advt.)

Machine "Breaks In" New Shoes. A Milwaukee inventor has devised s machine which is intended to save us the pain and trouble of "breaking in" new shoes. Leg-like levers, over which an endless belt passes, have suitable foot portions to receive the shoes. When the machine is in operation the shoes are acted upon by a walking movement exactly as if they were on a person's feet.

JOHN SAW THE LIGHT

AND THE WEDDING BELLS RANG IN DUE COURSE.

Fact That Mollie Had Much the Best of the Situation May Have Had Something to Do With His Decision.

It is three years since the report of the ease with which wealth could be acquired in this country reached John Doe's cars in Europe and lured him across the broad Atlantic. To the questions of the immigration, inspectors at Ellis island John Doe answered that he had been twenty-three years in this world; that the blessedness of the married state had never appealed to him, and that he could eke out his existence by plying his trade as a cloakmaker

His first year in American John Doe devoted to earning and saving every cent be could, picking up English meanwhile. The second year found him starting out in business for himself and meeting with marked success. The third year a general strike occurred among the cloakmakers and the manufacturers had a hard time to pull through.

The strike found John with a large batch of unfilled orders contracted for at the lower rate of wages. When the workmen had won their strike for higher pay and returned to work John discovered himself facing bankruptcy and he cast about him for a means to save what he could out of the wreck.

Mollie was an exceedingly pretty girl. Even John, whose thoughts were devoted to ways and means for making money, noticed this fact, and now as he racked his brain for a scheme to save something from the oncoming storm he looked reflectively at Mollie where she sat working at a sewing machine, and a plan suddenly occurred to him. Why not pretend that he was engaged to Mollie and give her valuable presents of jewelry in honor of the fictitious event, and when the bankruptcy had blown over reclaim his property and start up again with the money thus spared?

When first she heard of it Mollie demurred at being a party to such a project, but upon John's offering her a substantial consideration she consented to undertake the role of temporary flancee. John then presented her with several pieces of diamond jewelry, such as a ring or two, a lavalliere and earrings, and to make the engagement seem more plausible he fitted out a flat with nice furniture.

After the bankruptcy took place John was forced to testify to the various presents he had made to his flancee, and the court thereupon ordered that all the jewelry be turned over to the receiver in bankruptcy. As to the furniture, the judge held that it was personal and household property, and as such exempt under the bankruptcy act.

In the course of time John's case was completed and he was free to night. Mother Burton told them it start over again. Accordingly he determined to sell the furniture he had the mountain where the giant lived, bought for his supposed bride-to-be, but by this time Mollie had become so | they ever did reach the top the giant attached to the furniture and so might keep them, but as they never reconciled to the thought of getting had heard of the giant taking chilmarried that she refused to give up dren, they started for the mountain. the right time. He can be depended the property. John was in a quan

"You promised to return it to me when I bought it and put it here," said John, as he looked around the cozy little flat.

"But all my friends think we are really and truly going to be married soon, and if I return it to you and we don't get married I may never get another young man. If you are going to break off the engagement you should at least leave me the furniture sc that I will have it for a dowry

when I do get married." John looked at Mollie and she was

really good to look upon. "I was only fooling you," said he with a smile. "Come, let's get married right away."

Age of Oysters.

As the result of examinations of the surface lamellae of the shells of over six hundred oysters of known age, and of various ages from eighteen months to six years, made by Miss A. L. Massy, and noted in the "Scientific Investigations" under the section on fisheries, the following conditions prevailed as to the relation between age and the number of surface lamellae, or growth rings. Miss Massy states that an oyster of eighteen months or two summers appears to possess at least two rings, but may have as many as five; one of three summers has at least two rings, but may have six. A fouryear-old oyster may have only three rings, or may possess seven or eight

GIANT OF THE MOUNTAIN.

Did you ever hear of the giant who lived on the top of a great high mountain? He slept all day, and at night he would go into the valley and walk over houses. He could step over a house easily. Sometimes he would strike it with his club and make it rock, and they were so small he liked to look at the people would say, "How hard the wind blows." Then he would strike large. The boys were quite frightthe rocks and make sparks fly, and was like thunder, and when he sneezed or whistled they called it a tornado. Sometimes he would drink all the water in the wells, and the people would say, "What a terrible drought." And when he carried off a cow-and he could easily take one under his dance?" arm-and once in a while a barn with giant had been there.

One morning Farmer Burton awoke to find all his winter supplies gone, and his old horse Nancy, which his little boys, Hans and Oscar, loved very much.

"What shall we do?" cried Mother Burton. "We shall starve, and poor

He Could Step Over a House Easily.

Nancy, we never shall see her again.' After breakfast Hans and Oscar talked it over themselves and decided to try to find Nancy. They told their mother they were going to hunt for Nancy, and they wanted some lunch, as they might not be back that was useless to hunt anywhere but on and they could not go there, and if

They climbed all the morning, and at noon sat down to eat their luncheon under a tree. A little old man came along, and they gave him some of their food and told him what their errand was. He told them that he knew about the wickedness of the giant, and would help them a little. He had a staff in his hand, which he gave to Oscar and Hans and told them it would help them up the mountain. He also told them that if they could get the big belt which the giant wore he would lose his power and become as small as an ordinary man, and do no more harm. The boys thanked him and started on their journey.

Hans had the staff, and soon he was well up the mountain, and poor Oscar was far behind, so Hans waited for his brother to come up to him; then Oscar took the staff, and in a few minutes he was far ahead. He waited for Hans, and they decided it must be the staff, so they both took hold the mountain at a rapid rate, for the staff.

Soon they were on the top of the disappears. mountain, and they could see the giant's feet sticking out of a cave.

"Shall we go closer?" asked Hans. did we come for? There is old Nancy over by that tree."

Nancy saw them and neighed and step, which brought him beside the and die in the early summer time, boys.

"What are you doing here, you little scamps?" he roared.

"If you would sit down, we could see your face, and we want to talk to you."

"Oh, you do?" said the giant. "What do you want to say? You are so small I could pick you up with my thumb and finger and drop you off the moun-

"But that would not do you any me. Will you please come down nearer the ground?"

The giant walked around and made a roaring noise, but the boys stood still, although their hearts were beating fast. The giant pulled up a tree Don't you wish you could paint as well and threw it on the ground, and seated himself upon it.

"Now what do you want?" he asked. Oscar did the talking, so he told the giant that he had their horse Nancy and they had come for her. "You cannot have her," said the giant. "I am going to eat her."

"She will not be very tender," replied Oscar, "for she is very old." He was almost crying at the thought of poor Nancy's fate.

"Oh, that will not bother me," said the giant; "look at my teeth." He opened his mouth, and the boys moved away, for it was large enough to swallow them whole, and his teeth looked like big stones.

He laughed when he saw the boys were frightened, and it shook the mountains; the boys were glad when he became serious again. But he would not let Nancy go, and told them he thought he should keep them also; them, and it made him seem so very ened, and Hans, who had remained they would call it lightning. His laugh silent till then, said, "If you don't let us go home in a few days we will stay and work for you."

"What can you do?" said the giant, "We can try to do anything you ask us," replied Hans. "Well, amuse me, then. Can you

"Not very well, but we can sing," everything in it, then they knew the said Hans, who had been struck with a happy thought.

"Well, sing then," said the giant. The boys sang a funny song, and the old giant laughed so hard that he rolled off the tree onto the ground. Then the boys began singing soft, low songs. The giant pulled a big stone under his head and listened. Soon his eyes began to close, and after a while he was fast asleep.

Hans stopped singing, but told his brother to keep on while he crept over to the giant and very gently unfastened the belt he wore. Then he brought Nancy to where Oscar was still singing, and they both mounted. Hans told Oscar to hold the staff in both hands while he held the belt. Nancy trotted away with the boys, but soon she seemed to be flying so fast did they go, and almost before they knew it they were at the foot of the mountain, and there the little old man was waiting for them. They returned his staff, and thanked him very much for lending it to them. He told them to bury the belt in the ground when they reached home.

The sun was just setting when they rode into the yard, but they told their father and mother about the belt, and Father Burton said they must bury it at once, which they did and in the morning they went to the mountain and recovered all the supplies which had been lost.

That night, after Oscar and Hans were in bed, Oscar said: "I should like very much to have seen the old giant when he awoke and found he was only as large as an ordinary man." "Yes," said Hans. "But I am glad I am at home."

EASY WAY OF MAKING MONEY

Refraction of Rays of Light Causes all the house is hushed in order that Curious Illusion-Clever Little Trick Illustrated.

money, as the following trick will the child's health are often very serishow. First pour clear water into a ous and cling to it all through life. glass until it is half full; then throw a bright piece of money into the paramount characteristic of the young cover the glass with a plate. If the glass is now turned And any mother who observes the around rapidly, the piece of money

CHILDREN HURT BY NOISES

How the Little Ones Suffer From the Various Commotions of a Big City.

Very few mothers realize how exremely sensitive young children are to noises of all kinds and how much of their "naughtiness" is due to nervous irritation set up by all the household noises of the day. To a certain extent every woman

who has the care of children realizes this fact. When the baby goes to bed it may sleep. But once the child awakens no con-

sideration is shown to its tender One need not be a magician to make nerves, and the evil consequences to Doctors are always insisting on this

child-its great nervous sensibility child when a door is banged, a dog barks or a street trader shouts will notice its distress. At every bang or other sudden noise there is a nervous, frightened start. The result of a day's noise of all

kinds to young children, especially if they are delicate, is a state of nervous depression and Irritation.

This is commonly mistaken for temper and naughtiness, but it is real nervous illness. They not only become petulant, but their appetite fails and their digestion is thrown into disorder.

No doubt the evil effects of city life

on children are due in great part to the incessant noise.-- Kansas City Star.

ONE ON THE FLOORWALKER

Presumably He Knew Dutles of His Position, But He Was Not Proficient in Spelling.

How to Tell a Train's Speed. Count the clicks of the wheels on one rail (because joints alternate.) for 20 seconds, and the result will be the miles per hour the train is running. There are 176 30-foot rails in 5,280 feet. The train, say, is traveling at 45 miles per hour. It covers 125.5 rails in one minute, or 2.25 rails in one second, which, multiplied by 20, equals 45 rails in 20 seconds, or 45 miles per hour. If 32-foot rails are used the results would be 40 rails in 20 seconds at 45 miles per hour, but it is fairly accurate and can be done easily with a tittle practice.

SAN RAFAEL

The biggest snow storm ever recorded in the time of the pioneers of this section occurred a couple of weeks ago. The greater portion of the adobe house of Miss Grace Van Osdale collapsed under the weight of the snow, as did the barns of S. J. Pressler and E C. Dunham. Mr. Dunham had just finished a good adobe addition to his residence, and this also is a wreck. The tent occupied by Geo. Bagley on his ranch went down by the breaking of the ridge pole, and by a narrow escape Mr. Bagley was saved from being injured by the jagged end of the tentpole strik-ing near his head.

It was teared for a time that many head of stock would be lost, but owing to the fact the temperature during the storm did not reach a very low point, it is not thought any damage will be sustained by the stock-

Later information concerning the damage by the storm is to the effect that a considerable portion of the new porch at Geo. Parker's house went down, and Notice is hereby given that the tents of Miss Loreta Lawless, Mr. Ringwald and Mr. Kinsley, new homesteaders, are all wrecked. They feel that they make three year proof to estab. and took the family out on

In Memoriam.

(By G. M. WILLARD) I will dedicate these verses To the corporation clau, And I'll brave their wrath and curses

As must any free born man.

Ere the leaves began to fall, That the czar-could he be sober? breamed of Gov. Hunt's recall. And addressing thus the council, As the air with fist he smote: Bre we get our cherished tax bill We must get the governor's

goat. "Though we had a Legislature Proud to heed our least con mand;

Frowning stood that devilish creature With a veto in his hand."

'Creighton, keep the presses go-

Fool the people all you can. Anything to make a showing That will help our latest plan." Then the bunch of copper beauties Each one girded for the fight, catter far to face their duties, Like the shadows of the night.

Starting out in bright November With petitions of recall, Finds the gang, when ends Dec.

So the hireling hosts of Copper, Now have learned, and learned

it proper, That they cannot pull the stunt.

Sad indeed it was to see 'em-These petitions gently dying; So we'll sing a sad requiem, Where the Hunt recall lieslying.

L'ENVOI To the man who does not falter, Whoso long has been our guide; Here's a toast to 'Old Gibraltar' Still our balwark and our pride.

Are You a Tin Can Farmer?

Mr. Farmer, are you realizing as much as you can the great value in cash, health and happiness of a good home garden and supplies? Or, are you living largely out of tin cans?
