Chamber of Commerce

The Patagonia Chamber of Commerce met at the Commercial hotel lobby on Tuesday night, last. The matter of entrance fee and dues was finally disposed. The initiation, or entrance fee, was fixed at \$2.00, and the monthly dues at \$1 per month.

The matter of permanent secretary was also disposed of, and an allowance of \$75 per month voted for his services. J. LeRoy Lancaster being made permanent secretary.

The matter of a telephone line coming up, the secretary was instructed to address a letter to the Mountain States Telephone Co., asking them to send a representative to the next meeting, Tuesday night, Nov. 11, for the purpose of discussing a toll line to Nogales, and a local exchange for Patagonia, Gowen Peirce, Pat Patterson and J. LeRoy Lancaster were appointed as a committee to solicit subscriptions for phones, conditioned upon first-class connection with Nogales.

It was agreed that on Tuesday night, Nov. 11, the Chamber of Commerce should give a dinner, invite all male citizens of town, and make a strong effort toward a heavy enrollment of membership. At this meeting will probably be a Mountain States Telephone Co. man, and one or two business men from Nogales who feel interested in the move toward a telephone connection, Patagonia with Nogales.

Partial Program Chamber Commerce

Following is a partial programme of the evening, Chamber of Commerce meeting, Tuesday night, next:

- 1st—Luncheon. 2nd—Five minute talks as follows: "Patagonia Schools," H. B. Riggs. "Agricultural Possibilities," C. I. Northcraft. "Our Home Town," J. W. Miller. "Good Roads," John Mc Tehaney. "Sanitation," Dr. J. E. Redden. "Local Improvements," O. F. Ashburn. "A State Smelter," F. B. Kallberg. "The Telephone," J. LeRoy Lancaster. "Banks" (the one you can bank on for the good of Patagonia), W. P. Capehart. "Patagonia's Future," E. H. Evans. "Patagonia, the Supply Point for Large Cattle and Mining Industry," E. E. Bethell. "Patagonia as I First Saw It," Capt. Cady. "The Early Stages of Mining Development," Mayor Powers. "The Growth of Patagonia and Its Tributaries," R. R. Richardson. "Refrigeration, and Its Possibilities for Patagonia," W. H. Barnett. "The Cattle Industry," Judge A. S. Henderson. "The Mowry," W. J. Mitchell. "The Flux," F. B. Kallberg. "The Salero District," Dr. Ferguson. "The Blue Nose," B. B. Smith. "The Harshell," Ed Farley, Tom Frazier. "The World's Fair," C. I. Smith. "The Honey," J. A. McDonald. "The American Boy," J. P. Armstrong. "What a Chamber of Commerce Can Do for Patagonia," C. A. Pierce.

Brands in Danger

Only about half the stockmen of the State have re-recorded their brands with the State Live Stock Sanitary Board as yet. Less than two months remain in which they can insure for themselves the ownership of old time brands. Any brand not re-recorded by December 12th is open for use and will belong to the first man who records it as required by law.

According to Secretary Ed. W. Stephens of the Live Stock Sanitary Board, the re-recording of the brands has been increasing in volume steadily. At the same time, a very large portion of the live brands are still unrecorded. Should the owners overlook their duty too long, there is a possibility that designing individuals may record these brands in their own names. The present owners, with stock running under the brands would then find themselves facing what might prove to be very serious complications if not actual loss.

Orders have been sent to every Live Stock Inspector in the Department to notify all stockmen as far as they can of the necessity of re-recording their brands and to warn them of the shortness of the time remaining in which they may protect their rights to ownership. In this way, the Live Stock Sanitary Board hopes to reduce to a minimum the number of brands in actual use, and not yet re-recorded.

Glidewell Hurt

A. H. Glidewell was out prospecting a few days ago, and while riding over some rough ground his horse stumbled and fell. The momentum of the horse in motion caused him to roll, and he never stopped rolling until he landed

squarely on top of his rider with full weight and force. The result was considerable bruises practically all over Mr. G's body, causing painful suffering and temporarily incapacitating the rider. He is now able to walk.

Methodist Pastor for Patagonia

Rev. Prior, Methodist, arrived in Patagonia Tuesday to remain permanently the coming conference year. He will proceed to organize and have charge of Methodist church work here. There will be Sunday school at 10 a. m. at the school building on Sunday, next and preaching at 11 a. m. Everybody invited to attend, as they probably will.

Saw the Dead Men

Pat Patterson was on the scene within a three hour lapse after the auto racers met their death at Vall. The bodies were not removed for about four hours. Mr. Patterson had the opportunity of inspecting the mangled bodies of these unfortunate victims. The car was a new \$12,000 purchase. It had crossed the road several times, which would indicate something wrong with the steering parts. It was 75 yards from the road when found. The heads of the dead men were practically severed from their bodies. The speed of the car at the time was given by some as 90 miles.

Progress at Red Mountain

Things are moving like clock work at Red Mountain. A 142 compressor is steadily busy, and up Monday, last, the 1,000 foot tunnel reached the distance of 720 feet.

NOTED BACA FLOAT TAX CASE ARGUED IN SUPREME COURT

PHOENIX.—The noted Baca Float No. 5 case, involving taxes on some 100,000 acres in Santa Cruz upon appeal, as argued and submitted in the supreme court yesterday.

Baca Float No. 5 is an old Spanish grant. No taxes have ever been collected upon it. When Arizona was admitted as a state, the 100,000 acres was assessed to unknown owners. This was in 1913. In 1917 the United States supreme court confirmed the title of Texas people, namely C. C. Watts for one-half and Well and Bailey for the other half.

The state sued in the superior court of Santa Cruz county for the collection of taxes as assessed for the years 1914-1917 inclusive. The decision of the Santa Cruz court was divided, giving to the state the right to collect taxes for the year 1916 and 1917, and eliminating the taxes for 1914 and 1915 in favor of the owners.

In the case before the supreme court yesterday, the state and Santa Cruz county were represented by Leslie Hardy, county attorney of that county and by Kingston & Campbell of Tucson for the owners.

Young to Elgin

Stanley E. Young, representing the U. S. Biological Survey and University of Arizona Extension Service, left this week for the Elgin, Sonita, and Canille communities. He shipped 675 quarts of poisoned grain to said farming districts for distribution among the farmers therein to be utilized in poisoning roset pest. Mr. Young expects to demonstrate the use of and have all this grain distributed by the latter part of the month. So far where this grain has been given to the farmers and used, great results are being reported.

Hiram Whitcomb

(Tucson Star, Oct. 27—Crowded out last week)

Hiram Whitcomb, one of the best known mining operators of the south west, died in New York Wednesday evening, Oct. 22, according to a wire received by members of the Whitcomb family here yesterday.

Mr. Whitcomb, who was about fifty years of age, had been identified with mining activities in Arizona and Mexico for the past twenty five years. At the commencement of the revolutionary troubles in Mexico in 1912 he came to Tucson and made this city his headquarters thereafter. He was connected with the Las Guinas Co. for a number of years and, subsequently, leased and operated the World's Fair mine at Patagonia. For the past two years Mr. Whitcomb had made his home in Tucson at 54 Council street, though spending the greater portion of his time at Patagonia. For the past five months he had been in New York, accompanied by Mrs. Whitcomb.

A son, Harold Whitcomb, is at present residing at the home in this city; as is also a daughter, the wife of Charles J. Smith, mining engineer. Both Mr. Whitcomb's son and son-in-law were associated with him in his mining enterprises.

No statement of the cause of his death accompanied the message.

Mr. Whitcomb left Tucson last June for New York, in connection with his operations of the World's Fair mine and the Azland gold syndicate of the Winokeman district. He has been absent ever since.

School Notes

The 8th grade had a test in arithmetic and the 7th grade in history this week. The following pupils were perfect in attendance during October: Agnes Davidovich, Margaret Gardner, Bertha Frederick, Hazel Wilson, Gordon Farley, Lueda Braconante, Charles Cox, Beth Fortune, Lizzie Gardner, Letta Mead, Rminia Perez, Sarah Pierce, Stella Sayre, Clara Valenzuela, Ralph Gallagher, Helen Siebold, Charles Wieland, Ruth Sayre, Alice Ochoa, Frances Moran, Marshall Evans, Andrea Perosa, Joanne Evans, Venetia Soto, Alfredo Villa, Louis Villa, Jesus Gomez, Trina Villa, Orlando Stuchan, Mary Costello, Marjorie Falls, Margaret Fortune, Willie Gardner.

Mrs. M. W. Turner of Los Angeles has taken charge of the advanced first grade and Mrs. Fortune retains the second grade. A partition has been made in what was formerly the second primary room to accommodate the pupils of these rooms.

Grace Kane, Dave Gardner and Chas. Braconante made a grade of 99 per cent or 100 per cent in spelling during October.

Many new non-English speaking children have entered the beginning first work of the month. Two-thirds of the primary pupils are non-English speaking children.

To make school as interesting and as profitable as possible to these non-English speaking children, special work in English will be done. This will be carried out chiefly by means of colored charts picturing common objects; by simple dramatization re-acting out of common activities by singing and music; and by using songs and verses.

A Fair for Benson

A Benson business man who attended the Pomerene and St. David local fairs was struck with the fine displays made at these places, and the idea occurred to him, and to several others to whom he talked, that just such an annual exhibition right here in Benson would be the proper thing. Now is a good time to begin negotiating, and by next fall be ready for the first exhibition. All the surrounding towns and country districts could concentrate their biggest efforts in a fair for the whole valley. Everybody get together and work to establish the San Pedro Valley Fair—Benson Signal.

Charleston Dam

The building of the Charleston Dam has been advocated by farmers of the San Pedro Valley for the past fifteen years. Hon. Carl Hayden, on his recent visit to Arizona and Tombstone visited the proposed site and pledged his support to the project. Government engineers have made several visits to this section in the past few years and all reports submitted by them were to the effect that the Charleston Dam irrigation project is worthy of the expenditure necessary to make it a reality.—Benson Signal.

Dance at San Rafael

The lovers of the terpsichorean art at San Rafael Valley, will, on Friday night, Nov. 7, give a big dance for the entertainment of all. Ed Lawless and Otto Klusley are in charge, and promise good music and a good time.

Elgin Echoes

Mr. and Mrs. Tom Fyatt spent Sunday in Elgin, the guest of Mrs. Barnett.

Mrs. Barnett spent the week end in Patagonia, the guest of Mrs. Joe Kane. M. W. James has left his ranch near Elgin and gone to his old home in Tucson. Mrs. Janca and Miss Gien will visit friends at Tombstone before going to Tucson.

Mr. Chas. Johnson of Canille was an Elgin visitor Monday.

Mrs. Florence McGregor was thrown from her horse one day last week, breaking her hip, but is resting nicely at present.

Miss Nell Niblock spent Monday in Elgin, the guest of Mrs. Barnett.

Mrs. Elmer King passed through Elgin Monday on her way in Patagonia to visit her husband at the World's Fair Mines.

Dance at Canille

On November 15 there will be a big dance given at the school house at Canille. The Ft. Huachuca jazz band will furnish music. Refreshments will be served. Everybody invited.

The Gaiety Theatre is now under the direct supervision of Thomas P. Gardner, Mr. Baker being charge of the machine. Mr. Gardner will make some changes in the general scheme, trying out some items of his own.

Any Person Who Will Build a House on the East Side During the Next Six Months to Cost Not Less Than \$1000 Can Have a Lot Free; if Cost Is Not Less Than \$3000 Two Lots Free—Frame Houses Barred.

Patagonia is situated in the center of a great mining district. The townsite is a beautiful one, located in the valley between the Santa Rita and Patagonia Mountains at an elevation of over 4000 feet. The town has a fine school building, three hotels, six stores, etc. The climate can not be surpassed; there is good water in abundance, and splendid roads lead from Patagonia to all parts of the county.

Patagonia townsite on the east. This new tract has been named East Side Addition and fine lots in this section of the town are for sale at reasonable prices and on easy terms. Lots range in value from \$50 to \$200, terms, one-third cash, one-third in six months and one-third in 12 months. When full payment is made a deed will be given.

Another tract of land situated along the Harshaw road has been laid off, called Linder Addition, which is for sale in acre, five acre and 10-acre lots at attractive prices.

**ON THE WING OF CIRCUMSTANCE.**

Arizona Democrats hear Homer Cummings at Phoenix today.

November 11 is proclaimed a holiday throughout the state, by Gov. Campbell, that being the anniversary of the signing of the armistice.

G. H. Sawyer of Tucson was elected president of the State Bankers' Association, and T. Richardson, Nogales, to the executive committee.

Attorney General's department, Washington, says coal strike is violation of law.

President Wilson, Democrat, congratulates Coolidge, Republican, over the election of the latter as governor of Massachusetts.

The attorney of Jenkins, kidnapped American consul, paid \$150,000, he claims for Jenkins release, then asked the Mexican government to return the money. The Mexican government refused.

Fifteen hundred Gary strikers are notified to vacate the residences occupied by them by November 30.

Feeling runs high in Mexico over the military execution of several notables in the army. They now want to make the military subordinate to the civil law and courts.

National Democratic Chairman Cummins says Republican victories in the East mean endorsement of Wilson's policies.

Kentucky elects a Republican governor by nearly 30,000.

Theodore Roosevelt, jr., has been elected to the New York legislature.

Copper is quoted at 20 to 22, and silver bullion 12 3/4.

West Virginia coal mine operators offer their mines to the state during the strike.

Determined effort upon the part of the government seems to be about to bring both sides to the coal controversy to their senses.

Ammunition smugglers, a German among them, were arrested this week at Nogales.

In the road race, El Paso to Phoenix two persons were killed by the overturning of a car.

John T. Hutchins, one of the racers, El Paso to Phoenix, was shot and killed near Lanark, supposedly by Major P. M. Scanlan, of the U. S. Army.

International trade conference on at Washington.

Chances growing better for settlement of coal strike (Wednesday).

Arizona bankers' association met at Phoenix this week.

National Democratic Chairman Cummins spoke at Tucson Tuesday.

Chas. Roberts of Cochise again declares his candidacy for the Democratic nomination for governor.

Coal operators threaten to sue miners for breach of contract.

Massachusetts and New Jersey seem to have elected Republican governors. The race in Maryland is close.

Tammany Hall is reported defeated in New York City election.

Statement of the Ownership, Management, Circulation, Etc., Required by the Act of Congress of August 21, 1912.

Of Santa Cruz Patagonian published weekly at Patagonia, Arizona, for October, 1919.

State of Arizona, County of Santa Cruz, ss.

Before me, a Notary Public in and for the State and county aforesaid, personally appeared J. LeRoy Lancaster who, having been duly sworn according to law, deposes and says that he is the owner of the Santa Cruz Patagonian and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 21, 1912, embodied in section 443, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor and business managers are:
  - Publisher, J. LeRoy Lancaster, Patagonia, Ariz.
  - Editor, J. LeRoy Lancaster, Patagonia, Ariz.
  - Managing editor, J. LeRoy Lancaster, Patagonia, Ariz.
  - Business manager, J. LeRoy Lancaster, Patagonia, Ariz.
2. That the owners are: J. LeRoy Lancaster, Patagonia, Ariz.
3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: H. T. Wilson, Patagonia, Ariz.

J. LE ROY LANCASTER, Owner.

Sworn to and subscribed before me this 23d day of Oct., 1919.

(Seal) GEO. H. FRANCIS, Notary Public.

"School Notes" were crowded out last week. We apologize to the kiddies and the teachers. If there is anything the Patagonian loves to boost its school teachers, school kids, and school work.

Mr. O. F. Ashburn seems to be strongly in favor of a sidewalk campaign. J. W. Miller, of the Patagonia Lumber Co., has practically worked out a scheme of voluntary co-operation for extension of sidewalks, which he may outline to the Chamber of Commerce soon. The co-operative spirit is growing, and things are looking good for Patagonia.

Several counties over the state are getting busy districting in accordance with a law passed at the last session of the legislature providing for representation by different sections of the county. Has Santa Cruz been districted, or is she too small? Looks like Nogales ought to be willing, and she will,—to give Patagonia one place,—if there be more than one to fill.

An aviation company is being incorporated at Tucson. The objects of the company, as set forth in their articles of incorporation, are, to behave in a general way toward air ships and aviators as do sales and repair garages toward the automobile trade and service. They will buy, sell, repair, house, etc., biplanes, establish lines, teach aviators, etc. Sounds pretty good.

The irrepressible town kid had to have his fun Halloween. The streets were all but blackened in places with tin cans, old logs, wagons turned upside down, etc., etc. A Nogales car ran into some of this fun, and made more for the kids by the manner of the removal of the obstacles. The boys think there is at least one fellow with sore toes from a certain kick he gave an obstinate inanimate obstructor.

The committee appointed by the Chamber of Commerce to formulate bylaws met Saturday night at the office of J. W. Miller, and discussed several important points. One matter of great interest was settled, viz, the admission fee, which was fixed at \$2, and the monthly dues which was fixed at \$1. This, it was thought, would be low enough to admit one, yet high enough to round up sufficient funds for maintenance of the organization.

The international trade conference is now on at Washington. The great peace conference at Versailles is representative of all nations and all interests, but this international trade conference at Washington will probably do more in a short while to adjust unbalanced business and to bring about stability than the peace conference at Versailles. Stripped of all political embarrassments and considering only trade relations, these men will be able to locate and uncover obstacles in the way of trade which no other body could do. It may be expected that common sense suggestions will emanate from this body, and they will hereafter be incorporated into international agreements.

**SHALL WE INCORPORATE?**

The Patagonian has had nothing to say on the subject of incorporating our town so far, for the reason that it is usually the case that unless there be some strong reason for so doing, and some immediate advantage to result from incorporating, heavy taxpayers oppose it. On further investigation and acquaintance the Patagonian is now convinced that there are several good reasons for incorporating, many excellent and immediate results to follow, and that heavy taxpayers are not opposed to it. Col. Richardson is probably as heavy a taxpayer as Patagonia has, and might reasonably be expected to flinch at mention of the expenses of an incorporated town. In an interview with Col. Richardson he unhesitatingly authorized the Patagonian to say that he is not opposed to incorporating, remarking, "I am for anything and everything which will benefit the town."

C. L. Northcraft we understand to be strictly in favor of incorporating.

O. F. Ashburn the Patagonian has not interviewed, but judging from his strong approval of a sidewalk campaign, his continuous activities in building and investing money for the improvements of the town, he cannot be presumed to oppose incorporating until he so says.

From other sources come suggestions of the necessity of incorporating at an early date. The Patagonian so far has not heard the first objection to incorporating. In fact the citizens of Patagonia seem to be of that calibre to desire good things, do not seem inclined to take to the cheaper way of getting by, and take the same view with regard to incorporating and other enterprises as that taken by E. H. Evans of the C. of C. directors, viz, that to do things will take money, but things "must be did."

To enumerate the reasons for incorporating would require some space, and to enumerate the business reasons and direct benefits to be derived would require more space than one article could well contain.

Dr. Redden lives by the physical ailments of the population, yet keeps an eye out for public health. We have never met a physician of high standing yet who did not stand for public health. Pure water is one of the best guarantees of good health, and pure water is usually produced by the installation of a water system. This and the matter of sidewalks are two problems which will probably be among the first to be grappled with by the young corporation.

Of course care should be taken,—and none need fear but that care will be taken,—to consider carefully each step, both before and after incorporating, to avoid financial pitfalls and extravagant expenditures. But if incorporations are to be deferred because of the cost, the same logic would never allow a new mine opened, nor any other enterprise, because it costs money. So far as the Patagonian can observe, it has this to say: "If Patagonia business men put into the management of a small incorporation the same business energy and management they are now putting into their own business, we are safe to incorporate."

**"THE DOUGLAS INTERNATIONAL SPECIAL"**

The Patagonian is in receipt of a copy of the big special of the Douglas International, published at Douglas, Arizona. On picking up the paper one would naturally presume that he was picking up a paper gotten out in Los Angeles or Frisco. There was a field that special started out to cover. That field was by no means narrow. And that field was certainly covered. We are not acquainted with the staff of the International, but certain it is that the man, or men, back of this edition had the gray matter, the geographical and historical knowledge, and the true boosting spirit of the west. Having the foundations in fact, one blow like that will knock dollars for Douglas faster than a school boy can shake ripe plums from a tree.

On the first page of the second section our eyes caught a headline which is of interest to Patagonians. It read: "Smelting Chief Asset of City." From the first few lines of this article we clip the following:

"Douglas has many advantages that could in themselves have created a city here, but without the copper smelting industry and the activities incident thereto it never would have come into existence."

The article elaborates upon the actual results of the location of large ore reducing plants at Douglas. And this brings to mind the fact that there was a time when Douglas was no larger than Patagonia.

No wit may be premature to say much about a large ore reducing plant at Patagonia. But to our way of thinking it is never premature to give a thought once in a while to those events which are even now casting their shadows before. If we grasp the situation at Patagonia the field is fuller of potentialities by far than was the Douglas field when Douglas wore short pants. The time surely cannot be far distant when Patagonia will be handling ores in thousands of tons instead of in tons. If this be true we have a suggestion to make, which though perhaps visionary, will serve to focalize thought on a single point. The suggestion is this:

Assuming a mine, say the Flux, (it having stock now on the market), starting out to sell \$1-worth of Flux mine stock. Let it print a coupon similar to the above, and accept 80c for stock,—80% of the dollar sold,—and 20% for a smelter. The purchaser becomes a holder, not only of good mining stock, but a holder of stock in a smelter at Patagonia, which smelter stock, by its reaction on the mine stock, makes the 80 cent investment worth in itself really a dollar. It is said that mines are made, rather than discovered. Reducing ore is one step in the process.

Now, if every mine in the Patagonia field adopt this plan, stock would surely be more salable for the reason that it is more valuable. Mine stock,—the 80%, would get more cash, and get it more readily. If the combined capital of the Patagonia mines were \$1,000,000, 20% of this would aggregate \$200,000 smelter stock. This would mean a smelter, and a smelter would mean that the 80% would be worth a dollar.

There is another headline in this special of the International which carries thought for Patagonians. It reads: "Chamber of Commerce Active Body in Behalf of City." Then follows true history of actual accomplishments by organized effort. There is one word added to the name, which is novel: "Chamber of Commerce AND MINES." This last, "and mines," may not be suitable for Patagonia, lest the farmer and the cattleman feel left out, which should not be. The farmer, however, can readily see that, in the Patagonia field, his salvation, almost, depends upon the development of the mining industry. But if it be not proper to add this name to "Chamber of Commerce," then there ought to be an association of mine owners in the Patagonia field. Perhaps it would be promotive of spirit to say "Chamber of Commerce, Agriculture, and Mines." But the present Chamber of Commerce covers all grounds in spirit, and will do so in action and results, so there's not so much in the name where this is true. The uninitiated know nothing of the hugeness of the task of getting out a special edition, and the layman fails utterly, in most cases to calculate its value to its home town.

**AROUND THE WORLD WITH THE AMERICAN RED CROSS.**  
Junior Red Cross.

Early in the participation of the United States in the world war, the American Red Cross perceived the value of mobilizing the school children of the country and the Junior Red Cross was organized. Before the war ended nine million children were enrolled and helped in the war fund and membership campaigns, in chapter production of relief supplies and manufacturing furniture for the refugees whose homes and household goods were destroyed.

Children everywhere in the United States responded to the call to service sounded by President Wilson as head of the American Red Cross. This photograph is that of an enthusiastic young Japanese member of the Junior Red Cross of Spokane, Wash., starting out on the ambitious undertaking of collecting "a mile of pennies" for war relief. A comprehensive peace program is now being worked out for the Junior Red Cross, which is being held intact.

**AROUND THE WORLD WITH THE AMERICAN RED CROSS.**  
In Serbia.

As far back as the first winter of the war, the Red Cross sent to Serbia a sanitary commission that effectively checked the scourge of typhus, but after the United States entered the conflict, the Red Cross was able, in August, 1917, to send a full commission that carried on extensive relief operations among the suffering refugees of the tortured nation. Hospitals were established, the refugees fed, clothed and given medical attention, the army supplied with much needed dental treatment, farm machinery, and seeds provided to help the Serbs redeem their land to productivity, and, not least, measures undertaken for the succor of the children. The terrible condition into which these helpless victims of the war had fallen is well portrayed by this photograph of a little Serbian girl wearing the rags and expression of hopeless dismay that were all she possessed when the Red Cross came.

Prospectors and Miners may find it advantageous to dispose of small lots of High Grade or Shipping Ore in Nogales, Arizona, or Sonora to HUGO W. MILLER Assayer and Chemist

Cold Storage Market
J. F. BURLESON, Proprietor. First Class Meats. Home Made Bread and Pastry. Open From 7 A. M. to 6 P. M. Henderson Building Patagonia, Arizona

LOCAL AND PERSONAL NOTES

WANTED—Fresh buttermilk. Patagonian. Geo. Pratt, now of Nogales, visited his family here Tuesday.

Unfurnished room for rent. Call at Patagonian office. Gowan Peirce, of the Peirce Auto & Machinery Co., was in Nogales Wednesday for supplies for the Mowry and the Consolidated Arizona.

Why eat at home when you can get such service as is afforded by the Patagonia Cafe? Geo. C. Everett, formerly of the San Miguel Copper Co., of Sonora, N. M., and L. Goff were in town Thursday. Mr. Everett had his paper changed to Duquesne, Ariz.

Roof paint on hand now. American Garage. Local merchants are parceling out sugar in small quantities to their customers, the reason being the difficulty in obtaining a supply.

The masque ball was fairly well attended on Hallowe'en. The music was there, and the managers of the theatre "came out" financially O. K.

Electric Laundry—Laundrying and clothes cleaning. Mrs. Isinhood, Amado Building.

Joe Collie was taken to Nogales the latter part of last week for an operation for appendicitis. He is reported as having stood the operation fine.

J. M. Little paid Bisbee a business visit Tuesday. Stop scrubbing. Use linoleum. See our selection.—Washington Trading Co.—Adv.

J. A. McDonald has finished his contract for shaft at the Hokey, the depth called for being 300 feet instead of 500.

Bear brand hosiery for boys and girls. Washington Trading Co.—Adv. Ed Collie of the American Boy, visited Nogales Saturday to be at the bedside of his brother Joe.

When considering the purchase of any kind of jewelry or watches don't forget that I have a very nice assortment for you to select from right here in Patagonia. V. L. McCutchan

Mr. McChutehan and J. M. Little paid Bisbee a business visit last Tuesday. The old rule of requiring license by military authority to buy fire arms has been restored. This does not include .22's, nor shot guns.

Dr. Chenoweth, county health officer, was in Patagonia Monday night. He was called out on the road to Patagonia, and drove in for car repairs. Dr. Chenoweth would renew his advice that in case of epidemic Patagonians boil their drinking water. He seems to think that if the well at the school building is of sufficient strength it would serve admirably as a source for city water, since, by analysis, it showed not to be contaminated.

Electric Laundry—Laundering and clothes cleaning. Mrs. Isinhood, Amado Bldg

First Class Cafe and Ice Cream Parlor
Come to the First Class Cafe and get anything you want to eat, cooked to your taste and the way you want it. Cold and hot drinks and anything in the confectionery line. The very best of service. Open from 8.30 a. m. to 9 p. m. Light lunch served till 11 p. m. Mrs. A. L. Bennett.

Mr. and Mrs. C. B. Wilson left Wednesday for Solomonville, to visit Mr. Wilson's brother, W. A., on his big alfalfa farm, before his departure for Rochester, Miss.

Short order restaurant opened up in connection with Mrs. Bennett's ice cream parlor. Meals served from 8 a. m. to 10 p. m.

Tom Frazier, of the Hardshell mines was in Tuesday and incidentally met with the Chamber of Commerce.

Roof paint on hand now. American Garage

T. O. Gallager and family left Wednesday in their car for the State Fair at Phoenix.

Justin's cowboy boots can't be beat for men. Washington Trading Co.—Adv.

J. F. Burleson, formerly of the Col. Storage Market, is now meeting his old friends and customers at Valenzuela's market.

Roof paint on hand now. American Garage

Messrs. E. H. Evans and O. F. Ashburn spent a few days this week at Tucson as Federal Jurors.

Charley Miller and Carl Peterson of Mowry were visiting valley friends on day this week.

Mr. and Mrs. Bethell visited Tucson this week to hear the great Scotch comedian and singer, Lauder.

Fountain Syringes, Hot Water Bottles, Fever Thermometers, Atomizers, etc., etc. PATAGONIA DRUG CO. GEO. H. FRANCKS, Registered Pharmacist.—Adv.

BORN—At Harshaw, Sunday a. m. to Mr. and Mrs. Antonio Valenzuela a fine ten-pound girl.

For Sale—Seed Barley \$4.00 per Hurdredor \$3.85 per Ton F. O. B. St. David Station. A. G. Barrow St. David, Ariz.

J. W. Mitchell, of the Mowry, and the Consolidated Arizona, was in town Tuesday. He said he had no new news to give out at present, but he was in a mighty good humor about something.

Watches, clocks, jewelry, pipe-cigars, tobacco, candy, magazines and soda water for sale by V. L. McCutchan.

Mr. Paul W. Meyers, of Philadelphia, has been in the Patagonia district now some ten days. He is a competent mining engineer, and has come out to make personal inspection of the Happy Jack properties, and to submit a report. His visit, of course, pertains to new interests and renewed or increased activities in these mines.

Now that the 3-R deal with the Magna people is closed, many questions are asked as to when they begin actual operations. The Magna people intimated to Col. Richardson that they would perhaps be busy on the ground within ten days from the time of passing papers, which was last week. They will open up first with the operation of a diamond drill, and may continue that for several months. Of course there's no use speculating as to the proportions of their activities, as the Magna long ago reached the point where they do not play small games.

San Rafael Notes
Perry Wilson has this week baled a fine lot of hay for J. D. Rountree and reports his new baler doing good work.

Harry Frier was a Patagonia visitor Monday and Tuesday.

Mr. Armstrong's shafting has been finished, the depth being 150 feet instead of the 500 foot level as reported last week.

W. D. Parker and family were week-end visitors in Patagonia, guests at the J. F. Burleson home.

R. N. Keaton and wife were business visitors at Nogales last of the week.

Geo. W. Parker and wife were Nogales visitors Tuesday and Wednesday and were accompanied by Miss Mabel Gates.

Mrs. T. G. Dunham has returned from several days visit with Mr. Dunham at Douglas.

Mrs. Geo. Curtis is at their valley home again after a visit of several months with relatives in Oklahoma.

Ed Lawless and sister, Miss Loretta, motored to Nogales one day last week and enjoyed the movies.

We are sorry to report Mr. Lawless on the sick list. On Monday and Tuesday he was in Patagonia for medical attention, accompanied by his son Ed.

Bad Baldwin and wife motored to Patagonia and Nogales Monday on business.

Valleyites were right royally entertained Hallowe'en at the J. D. Rountree home. Mrs. Rountree and Mrs. Kinsley were the hostesses, the house and grounds were decorated to suit the occasion and refreshments served included cake, pumpkin pie, apples, popcorn and coffee. Games and dancing were enjoyed by the many guests until well after midnight.

On Friday evening, November 7th our valley school will give a free entertainment at the school house, beginning 7.30 p. m. Mrs. Farrell, the teacher, especially desires the attendance of school patrons. After the entertainment dancing will be in order under management of Ed Lawless and Otto Kinsley who promise the best of music and a good time for all.

Pipe Built Like a Cornet. A tobacco pipe of unusual design has been invented by Warren Murray (nephew of Hagerstown, Md. Every pipe smoker knows that the longer the stem of his pipe the cooler will be the smoke. Pipes with stems a few feet long have been in use in different countries for many years, but their awkward length precluded their use outside of the house. The inventor of the pipe circumvented the difficulty by coiling the stem of the pipe like the tube of a cornet or signal horn. The coils are connected at their lower end to form a dripping chamber for receiving the saliva which accumulates in the stem. Each coil has an independent opening into the dripping chamber and a screw cap at the bottom gives access to it for the removal of the accumulated saliva. The smoke, in passing through the coils of the stem, is drained several times of saliva and nicotine.

In the City Square of Treves, Germany, headquarters of the allied military forces, an ancient cross surmounted monument marks the city's center of traffic. For this reason American Red Cross officials converted it, as shown by this picture, into a directory of all Red Cross activities in the city.

DIME NOVELS COMING BACK

In Eighteen Months "Nick Carter" Has Had Sales That Have Been Record Breaking. Nick Carter has come into his own again. The king of the "paperbacks" has made a record-breaking return to popularity. About eighteen months ago his sales began to mount steadily until the entire supply of Nick Carter books was exhausted, says the Sun.

His return to fame was unexpected. It was not the result of an advertising campaign, for the publishers of the paper-bound books do not advertise. They depend instead for the sale of their books on the lists printed in the back pages of each volume.

And Nick Carter was not the only member of the "paperback" tribe to return. All the old favorites—Laura Jean Libbey, Bertha M. Clay, Mrs. E. D. E. N. Southworth and Augusta J. Evans—have "come back" surprisingly.

Five years ago everyone was willing to predict that the movies had killed the production of cheap books. Thrills could be absorbed more quickly from the screen than from the printed page—and the price was the same.

Publishers of the paper books are uncertain whether their old reading public has tired of the motion picture or whether a new class of readers has arisen. Of one thing they are certain, though: the demand for the 10 and 15-cent book has increased fourfold. If it were not for the increased cost of production these publishers would be counting the harvest of their lives.

Stories of American life—as seen by Bertha M. Clay and other writers of her class—and detective stories are not in demand. Fortune-telling, books and better writers also have a large steady sale. "Dream" books were never so popular as they are today. Their publishers say.

PETE HAD OBEYED ORDERS
Literally-Minded Soldier Came Near Getting His Commanding Officer Into a Bad Mess.

There is a certain young officer who, according to his own story, is thinking his stars that General Pershing had a sense of humor.

"Some of my men were Polish, and better soldiers never lived, but I guess in Poland life has been one long, sad story," said the officer. "Anyway, I never ran across a bunch who took things so literally. One night the Germans sent out a three-inch shell that landed square in the trench. In the morning I told one of my men, Pete, we called him, to take it away.

"Where shall I take it?" he asked. "Oh, anywhere," I answered peevishly, "put it to bed in Pershing's tent."

"A little later a brother officer came along and said: 'The old man wants you, and there's something doing.' "I couldn't imagine what was up until I stood before the chief. He eyed me sternly and then pointed to his bunk, and would you believe it, there was that blamed shell. Pete sure had obeyed orders. Well, I thought I was in for it, but Pershing suddenly began to smile. He said: 'I just want to caution you not to order Pete to capture Berlin until the rest of us are

ready to go with him. He might go and do it, you know.'"—Rehoboth Sunday Herald.

All That Affected Her. That the Empress Eugenie is not prone to brood sentimentally over the past is evidenced by an incident that occurred some years ago. She visited Windsor castle, a palace in which in the golden days of the empire she was received as an honored guest. Those who accompanied her on this second visit hovered near her, fearing that she would be overcome with the contrast between the past and the present, especially when she viewed the apartments fitted up for her use and which had not been changed. But it was merely her artistic sense that was offended. The hangings of the huge bed were of imperial purple with the green of Napoleon, and the empress remarked disapprovingly, "Toujours ces affreux rideaux!" "Always those frightful curtains."

No Woman Passenger Pilot. In England women will not be given permission to serve as pilots on passenger airplanes. An official of the air ministry gave the reason for this decision to a writer on the London Sketch as "physical disability as well as nerves," declaring that women's nerves are much more likely to give way than men's.

"I think there are no women in this country capable of passing the air ministry's test. If one does succeed, however, she will be permitted to fly her own private machine, but whether she will be allowed to take a friend with her is a point that remains to be decided.

"In any case women will be barred as pilots of passenger-carrying machines."

A Senator's Lunch. Being addressed by a striking head waiter as "Senator," means nothing to the gay life of Senator McCumber of North Dakota.

Instead of dining at the senate restaurant, where senatorial dignity and fitting white-apron garbed waiters predominate, when night sessions prevent him from going home, the senator repairs to a nearby cafeteria, collects tray, napkin, knife, fork, spoon and other implements of table warfare, nestles his liver and bacon and other seasonal delicacies on the tray, walks over to a table and lays out his spread.

AROUND THE WORLD WITH THE AMERICAN RED CROSS. In Italy.

Arriving at one of the most critical stages of the war, when the Italians were forcing the Italian army back to the Piave, the American Red Cross rushed emergency relief from Paris and revived the drooping spirits of the whole country.

FIND STEAMER LONG BURIED

Dredging Operations in the Mersey Disclose Remains of Vessel That Had Been Forgotten.

For some time past the Mersey docks and harbor board has been conducting dredging operations in the neighborhood of the Burbo bank, one of the huge accumulations of sand which impede the navigation of the Mersey entrance, and these have resulted in a "find" of remarkable interest.

It is the remains of a steamer which have evidently been embedded for generations. Her date is long anterior to that of iron shipbuilding. Of sound English oak were her timbers and framing, to which circumstances doubtless is due the fact that they still retain cohesion and shape, and have so wonderfully resisted the forces of decay as to supply an abundant quantity of material for the souvenir manufacturer. Her beams, in point of fact, are described as being as "hard as iron."

REMAINS OF ROMAN SMELTER

Intensely Interesting Discovery Said to Have Been Made in the North of England.

A lady member of the Cumberland and Westmorland Antiquarian Society of England has had the good fortune to discover what is believed to be a Roman bloomery, or ancient smelting furnace. Her attention was drawn to the place by the work of moles, which recently exposed some of the remains, and again later by the burning of the whins formerly concealing the hearth and other features of the bloomery, near Forest How.

Hadn't Seemed to Work.

An oldish man in rusty-brown clothes and with a rusty-brown beard met up with a pin. It was shining sharply bright on a flagging, and he stopped to pick it up.

Curious Clubs.

The recent announcement that an English "Red-Headed Men's club" had just met—the first time since 1915, owing to the war—serves to recall one or two odd clubs.

Important Notice

The public will please take notice that any person by using any kind of property from J. J. Isinhoff, of Isinhoff, Patagonia, Arizona, must obtain a bill of sale signed by me. Otherwise I will take action for recovery of said property. Also take notice that I will not be responsible for any indebtedness incurred by him.

CAUSED A CHANGE IN MIND

Circumstance That Made Mill Owner Somewhat Relax His Ideas About Strict Discipline.

"I personally began with the idea that people might be hired and good work gained from them," Julius S. Carr, Jr., in System, writes. Mr. Carr, who is president of the Durham Hoopery Mills, goes on: "I thought in my youth that rules made order and that a certain military discipline was essential; that it was foolish to humer people and all that, nor was I going to recognize certain local traditions about days on which no work should be done. For instance, I made up my mind that quitting work to go to the circus was not in accord with the best industrial practices."

"The first circus came to town about three months after we took charge of the mill, and I was keen for the test. We posted positive orders that the regular hours of work were to be observed on that day, and that any person who went off to the circus would be discharged. The full force reported as usual on the morning of circus day, and I went home to dinner confident that at last we had brought order. It gave me a bit of a pang, for I should have liked to go myself!

MANIFOLD USES OF THE OX

Animal May With Truth Be Said to Be Most Useful of All the Domestic Animals.

Of all our domestic animals the ox is certainly the most useful, writes Henri Fabre in Our Humble Helpers. During its lifetime it draws the cart in mountainous regions and works at the plow in the hills of the fields; furthermore, the cow furnishes milk in abundance. Given over to the butcher, the animal becomes a source of manifold products, each part of its body having a value of its own. The flesh is highly nutritious; the skin is made into leather for harness and shoes; the hair furnishes stuffing for saddles; the tail serves for making candles and soap; the bones, half tanned, give a kind of charcoal or bone black used especially for retting sugar and making it perfectly white; this very charcoal, after this being used; is a rich agricultural fertilizer; heated in water to a high temperature, the same bone yields the glue used by carpenters; the largest and thickest bones go to the tanner's shop, where they are manufactured into buttons and other small objects, the horns are fashioned by the maker of small wares into snuff boxes and powder boxes; the blood is used concurrently with the bone of black in refining sugar; the intestines cured, twisted, and dried, are made into strings for musical instruments; finally, the gall is frequently turned to account by dyers and cleaners in cleaning fabrics and partially restoring their original luster.

Catarrah Cannot Be Cured. With LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrah is a local disease, greatly influenced by constitutional conditions, and in order to cure it you must take an internal remedy. Hobb's Catarrah Medicine is taken internally and acts thru the blood on the mucous surfaces of the system. Hobb's Catarrah Medicine was prescribed by one of the best physicians in this country for years. It is composed of some of the best tonics known, combined with some of the best local purifiers. The perfect combination of the ingredients in Hobb's Catarrah Medicine is what produces such wonderful results in catarrah conditions. Send for testimonials free.

P. J. CHENEY & CO., Props., Toledo, O. All Druggists, etc. Hobb's Family Pills for constipation.

Will Film a Big Game Hunt. Writing of East Africa reminds me of a young man of greater enterprise than financial resources who has fixed up a contract with a motion picture firm to go on a big game shooting expedition in East Africa and take with him operators and camera. His own cheerful view of the undertaking is that he will get his shooting, and the movie firm will get their pictures, and both will reap substantial profits.—Manchester Guardian.

RED CROSS GIVES FULL ACCOUNTING

War Council Tells How Millions Contributed by Public Were Used For Relief.

BIG TASK IS DESCRIBED

In Twenty Months \$154,000,000 Was Spent Overseas and \$119,000,000 in the United States.

Washington, (Special).—Through a complete report of the work of the American Red Cross in the war by Chairman Henry P. Dutton, on behalf of the war council, the organization on the eve of its annual enrollment of members during the Third Red Cross Roll Call, November 2 to 11, has rendered an accounting of the many millions given it by the American people to help our fighting men and our allies. The statement is, in part, as follows:

"The war council of the American Red Cross is now prepared to make a complete accounting to the American people of money contributed and expended, as well as the work done by the American Red Cross during the period in which the war council was in control of its affairs. The war council was appointed May 19, 1919, and went out of existence February 28, 1919.

"It was the practice of the war council to give complete publicity to its policies and finances, but it is only now that a picture of the war period as a whole can be presented. It is the feeling of the war council that a report in this summarized form should be made directly to the public which provided the money and gave the officers which made the American Red Cross a success.

"A statement of the American Red Cross effort and finances since the war council relinquished its control will be made to the public through the executive committee, and it is important, therefore, that the fact that this report covers the period only until March 1, should be carefully noted."

Following are certain round figures covering American Red Cross participation in the war, as revealed by the war council's report:

Some Outstanding Figures. Contributions received (General and medical), \$400,000,000. Red Cross workers, 31,000,000. Relief articles produced by volunteer workers, 371,377,000. Families of soldiers aided by American Red Cross, 500,000. Refreshments served by canteen workers in U.S., 40,000,000. Nurses employed for service with army, navy or Red Cross, 23,822. Kinds of comfort articles distributed to soldiers and sailors in U. S., 2,700. Knives and articles given to soldiers and sailors in U. S., 10,900,000. Supplies shipped overseas, 191,000. Patients treated in U.S. hospitals in France, 1,156,000. French hospitals given material aid, 3,780. 8000 supplied American iron soldiers, 294,000. Gallons of nitrous oxide and oxygen furnished French hospitals, 4,340,000. Men served by Red Cross canteens in France, 15,375,000. Refugees aided in France American consular-entitled soldiers attending Red Cross movies in France, 3,120,000. Soldiers carried by Red Cross ambulances in Italy, 142,000. Gallons served for by Red Cross in Italy, 155,000.

Of the \$400,000,000 in money and supplies, contributed to the American Red Cross during the twenty months the war council was in existence, \$273,000,000 was allotted to national headquarters, while \$127,000,000 went to the chapters to finance their activities. Expenditures in the twenty months totalled \$273,000,000, divided as follows: By national headquarters in France, \$57,000,000; elsewhere overseas, \$94,000,000; in the United States, \$18,000,000; by chapters in the United States, \$13,000,000; cost of chapter-produced articles distributed in France, \$25,000,000; elsewhere overseas, \$5,000,000; in the United States, \$28,000,000, making total expenditures in France, \$82,000,000, elsewhere overseas, \$99,000,000, in the United States, \$119,000,000.

HAPPY NATIVES OF SARAWAK

Under Wise Government, People Live Easy Lives in Their Gloriously Fertile Country.

The tribe of Kayans, inhabiting the head waters of the Iram and Rejang rivers of Sarawak, have lived for unknown generations almost isolated in the interior of the island of Borneo. There are many reasons for believing them to be originally of Caucasian origin. Many of them have very light skin, and they probably reached Borneo by way of the Malay peninsula from lower Burma. rigid discipline is characteristic of the domestic menage, resulting in good manners and recognition of authority.

For a good many years Sarawak was under the independent government of a white rajah, Sir Charles Brooke, who controlled his misgled subjects with unusual wisdom and sympathy. Among other far-sighted edicts he instituted stringent game laws, so that the island is one of the best protected parts of the world in this respect. Birds, beasts and butterflies are protected, not more than two specimens of any one species being allowed to the collector. In this way the very beautiful and rare trees and insects of the country are being maintained for the enjoyment of future generations.

Another wise move of the rajah was to continue the native costume—what there is of it—in place of introducing the unsuitable, ugly and artificial modern clothing of Europeans. This, as Stevenson points out, has usually exactly the opposite effect from that intended by well-meaning missionaries, and the happy natives of Sarawak are very well off as they are.

GOOD WORK WITH CAMERA

Explorers in Northwestern Canada Have Photographic Studies of Wilderness Wild Life.

After a three years' hunt with the camera in the almost unknown Laird river district in northwestern Canada, H. A. Stewart and John Sonneklund have come back to civilization by way of Peace river, Alberta, bringing several thousand photographic studies of the manners and customs of the wild life of these remote woods and streams. The explorers, for they well deserve the name, worked into the wilderness by way of Hudson's Hope and the forks of the Findlay and Parslop rivers as far as Fort Graham. Their negatives illustrate the habits of the porcupine, moose, beaver, Canadian wild geese and other animals and birds that have seldom been observed with anything like thoroughness by means of the camera. The travelers had devices of various sorts whereby their subjects were enticed to spots upon which the hidden lenses were focused; and upon reaching these spots an ambushed camera man "snapped" them by twitching a long cord attached to the lens shutter. A single negative of some specially shy animal was often the only fruit of many hours of patient waiting. Sometimes for days the explorers would watch a single spot through their field glasses awaiting the favorable moment to "shoot." But it was all worth it.

Gleaning the Stumps.

The rapid decrease in the number of tall stumps which have been so familiar to the traveler through the coast hills of Oregon, is regarded as an indication of their approaching extinction. Hitherto some 20 feet of each stump has been left standing, silent relics of former monarchs of the forest, too thick for most saws to compass and too full of pitch to suit the sawmills. But now the need for timber is greater and men no longer climb high upon to boards thrust into notches in the trunk to suit the saw and the sawmill. They have learned thrift and they cut low down last good lumber be uselessly wasted. Only as a record of past wastefulness are the tall stumps that their deep notches still visible.

A Filipino Vassar.

What the occidental ideals of universal opportunities of education are to mean to women of the Orient takes on a large significance with the establishment in the Philippines of a university for girls only. This university is to be part of an educational group called Centro Escolar de Sonorita, where until now the instruction for girls has been only in the primary, secondary and intermediate grades. That this Filipino Vassar will develop traditions characteristic of girls' colleges in the United States cannot be doubted by anyone who has observed how wholeheartedly though shyly, girl students from the Orient have entered into the undergraduate studies, festivities and pastimes at American colleges.

Coquelin's Memory.

"How many parts do you know well enough to play tonight if need be?" somebody asked Coquelin. He took a sheet of paper and wrote down the names of 53 plays of his repertoire. His friends laughed.

"You are boasting surely, non ami?" said the Visconte de Lovenjoul.

"You have every one of these plays in your library," said Coquelin quietly. "Get them all out and put them on the table." The visconte did so. "Now," said Coquelin, "let anybody select a cue from any one of these plays at haphazard and give it to me."

They tried him with 16 plays out of the 53 and he never missed a single cue or made one mistake.—Fortnightly Review.

BULWARK AGAINST WINTER SHORTAGE

Some Facts About Cold Storage and the Charges of Manipulation and Exorbitant Prices.

Once again the subject of cold storage has come into the limelight of public attention; and this time in connection with the nation-wide search after the cause for the high cost of living. There can be no argument in behalf of hoarding and holding back food supplies for speculative profits. But this is a matter quite apart from the true and legitimate purpose of cold storage; and, unfortunately, because of the much agitation and damaging publicity that have centered about the subject from time to time, the real service performing function of cold storage has been largely obscured.

Laying in Winter Stocks.

City-wise people, and even country-wise people, have long since forgotten, amidst the conveniences of modern life, that there was a time in the history of our country when "laying in a winter's stock" devolved upon each household individually. Today, one does not even need to remember that eggs are not an all-year-around product; that butter is produced in scant amount in the winter, and cheese likewise. Not a few would be completely surprised to know that even meat production has its seasons of scarcity. The buyer for the household in these days simply goes to the store, any day in the year, expecting to find these and similar commodities on the market.

Are Storages Overstocked?

However, we are told that storage stocks of certain commodities are at the present above the normal as compared with this time last year. It has been computed that the combined excess of a number of important foods in cold and dry storage amount to 19 per cent. While on the face of it this looks like undue hoarding of reserves, yet it must be remembered that comparisons with last year are altogether misleading. Demands for a great number of commodities have increased tremendously. Our exports for June were double what they were a year ago, and 40 per cent of these exports were foodstuffs.

Moreover, our reserves last year were inadequate. Those who recall some of the extraordinary prices of certain foods last winter and spring know precisely what it means to have too small holdings in storage. That we are better prepared for next winter than we were for last should not be used as the basis of a wholesale condemnation of our methods of providing for our future wants.

How Prices Are Determined.

Cold storage has been criticized severely as an instrumentality that lends itself easily to the taking of unfair profits. Without a question its ability to extort has been grossly exaggerated. Storage warehouses are scattered throughout all portions of the United States and their contents are owned by thousands of competing firms and individuals. About half the storage space in the country consists of public warehouses that rent space to whoever wants it, either for small lots or big ones. Tabulated figures of the amounts in storage are gathered and disseminated by the government monthly; and the amounts in holding from month to month figured against what should normally be in storage during those months (or the estimated demand) form the basis for prices.

Some Figures on Profits.

But the best information as to profits in the cold storage business consists of actual figures, and such are published regularly by the federal Department of Agriculture. These show, for instance, that in the season of 1915-1916 butter stored in June and July at an average of 25.64 cents a pound, sold from November to March at an average of 27.45 cents a pound, giving a gross profit of 0.81 cents a pound, or scarcely enough to pay for storage and nothing for net profit or interest on investment. In 1916-1917 the gross profit was 7.79 cents a pound, and in 1917-1918 it was 5.86 cents. These gross amounts must cover storage charges and interest on the money tied up for several months before the net profits are arrived at. It is apparent from these figures that storing of foods is an uphill and downhill business with its fat and lean years, and affords an average profit which is not excessive in view of the risks that are run. Figures on storage eggs for 1915-1916 show a net loss of 2.2 cents a dozen; for 1916-1917, an unusually prosperous year, the net profits were 5.54 cents a dozen; and for 1917-1918 there was a net loss of 1.42 cents a dozen.

Extraneous charges of manipulation and control of prices are preposterously absurd in view of these seasons of losses. The ups and downs of profits simply indicate the hazards of the game; for the best laid plans of men can not foresee when a warm spell may come which will start the hens to laying, nor, on the other hand, a cold snap that will shut off current production entirely. Year in and year out, as the figures would indicate, the consumer pays but a modest sum for the blessing of cold storage, which takes upon itself, with all risks involved, the task of laying in his winter stores for him.
