To Whom It May Concern

THE "TAX-EXEMPT" PARCE

It is estimated that there are approximately \$30,000,000 worth of tax-exempt or semi tax-exempt public improvement or government bond outstanding.

This means that the income derived from such securities escapes the burden of taxation which taxable industry and property must make up.

Figuring that the \$30,000,000 is paying the holders of the bonds a return of 5 per cent, the government is losing the tax on income which it should receive from the greater part of the \$1,500,000,000 these bonds return the holders annually in interest.

Industry or agriculture which produced \$1,500,000,000 return annually would be paying a large part of this amount to city, county, state or federal government through taxes of various forms.

Yet this enormous income from bonds slides out from under paying my part of the tax burden.

Here is a logical point to start to reduce the tax bill—discontinue the issuance of tax-exempt securities which handicap private industry in obtaining funds and add a double burden to remaining taxable property and taxpayers.

Breakfast and Its Relation to Health
 (By HELEN BARR)

Health is a national obligation. Good food habits are necessary for health.

What are good food habits? They are the eating of the right kinds of food; the eating of the right amount of food; the eating of this food at the right time and in the proper manner.

At what age should good food habits be started? The nursing baby should be taught the first good food habit of eating regularly and at stated times. Other good food habits should be started as soon as the child begins to eat solid food. Children may be taught to like almost any food, but it is very hard for adults to learn to like new foods. It is a waste of time and energy to try to break bad habits when good habits might have been started in their infancy.

How can you teach a child to like and food? Be patient but persistent—persuade rather than force. Do not give up—give up or to give in any way spoil the child's health. Do not get something in place of what the child refuses to eat. Introduce new foods gradually. Serve only a small amount of each new food at a time (½ teaspoonful)—serve it frequently until he acquires a liking for it. Make the food as attractive as possible, and prepare in a variety of ways. Serve cereal in an attractive dish. Put cooked dried fruit in the cereal. Conceal spinach in scrambled egg. Add vegetable pulp to white sauce and pour over toast. It may take two years to teach a child to like vegetables, but two years spent educating a child to eat the right foods are better spent than from 2 to 20 years or more of misery with only half working ability.

REACTION

Reaction has the same force as action, but the direction is opposite. Today, the world is starting on a period of reaction against conditions that have upset it. Human beings revolt at pinching, penury and debt. Their natural instincts are to get more out of life.

The world has learned, however, that getting more out of life does not lie along the doubtful line of extravagance. During the profiteering days following our participation in the World War and for nearly two years after peace was declared, we were a people drunk on easy money. Office boys received more pay than their fathers ever had made in the past at skilled labor.

Stenographers revelled in fur coats and costly raiment. It was the habit of life—part of the excitement that got into nearly everybody's blood.

The past two years have taught many bitter lessons—with some prices up so high, it is doubtful that they can come down—or will, even though they can!

There is less desire to spend foolishly, but more determination to invest wisely. The reaction against squandering has set in, as is evidenced by the steady advance in the better classes of securities during the past five months.

With the example of so much waste and devastation, the instincts of the race turn toward building.

The intoxication of irresponsibility and throwing away of money has almost passed. Within a few months, the Nation will be back on an earning, expanding basis—eager to build better than ever before.

This tendency has been shown for several months in the petroleum business. There is more prospecting in progress today than there ever was in the past. More new fields are likely to be opened up—more new fortunes will be made.

Spending for the sake of spending brings regrets. Investing for profit—building for the future—brings happiness.

To see past efforts bud and blossom and grow, is to feel a degree of satisfaction that can be experienced in no other way. To dissipate the fruits of past efforts, is to suffer remorse.

The world has had enough remorse, sufficient recklessness to last it a century, and altogether too much of the destructive elements—in international relations and in business.

The world is not only getting down to work, but it is trying to build anew. It is reacting against the destructive and wasteful methods of the recent past.

And as part of the world, each and every one of us will be sure to feel this urge toward more substantial and lasting things.

That is our heritage—if we will claim it.

The opportunities are present. The balance is decidedly up to us!

GIVE THE CHILDREN PLENTY OF MILK AND WATCH THEM GROW

What everyday proof have we that milk has good growing material for boys and girls? It is the only food the majority of children get for the first nine months of their lives, yet they live on it, they grow on it, they do their work of playing, kicking, and crying on it.

What does milk supply? It supplies building material for the bones, teeth, and muscles, it keeps the heart beating regularly, it strengthens the nerves and every other part of the body. It has a growing force which makes weak bodies grow into strong ones.

Would any other food do as well? No other food could be used in its place. No other one food contains as many of the various growing materials needed by children. No other one food supplies enough building material for bones and teeth. Good bones and teeth need time for building. Children need a variety of growing materials, and they must all be supplied if every child is to be a strong, healthy man or woman.

Trade at Home Week

"You prosper as your town prospers; trade at home and everyone will benefit."

For the first time in the history of the state, business men of Arizona are setting about to drive home to the buying public the fact that keeping home money at home is one of the fundamentals of prosperity, in which all share. They are going to do it by concerted effort, during "Trade At Home—Buy Arizona Products Week" which will be observed throughout the state May 22nd to 27th.

The "Trade At Home—Buy Arizona Products Week" was suggested by the Arizona Industrial Congress and taken up by most of the civic and commercial organizations of the state. The result is that most cities of Arizona will have a real, live campaign.

In every case the campaign will be conducted by the local chamber of commerce or commercial club, the congress cooperating with each to make the movement statewide. Many organizations are planning to make the week a regular celebration, with displays and the like.

The one point which will be emphasized in every town during the week is that every householder will help himself by patronizing his home merchants and business men. Poor business directly or indirectly affects every citizen, and good business means better pay and more work for everybody. Every dollar that is spent outside one's home town hurts that town, the spender with the rest. The only way to bring back prosperity is to keep the money at home.

With the Trade-At-Home idea will be emphasized the direct benefits of using home and state products. Using Arizona products means increasing the production and hence the invested capital of the agricultural and manufacturing industries of the state. And helping these industries to prosper means more taxable assets, with lower individual taxes; it means that more money will be brought into the state and spent in the state, and that everyone will share in the prosperity brought by better business conditions.

The facts are the same in both cases. "You prosper as your town and your state prosper; keep your money at home and all will benefit."

Business travels leisurely, and profitably soon overtakes it.

CO-OPERATION HELPS FARMERS

PHOENIX, May 12.—Arizona farmers are among the most progressive in the country in seeing that the future welfare of agriculture demands cooperation with other industries, in the opinion of officials of the Arizona Farm Bureau Federation, whose attention was called to an article in the April "Farm and Fireside" by Henry C. Wallace, Secretary of Agriculture.

Mr. Wallace, after reviewing the past and present conditions in agriculture, in discussing the industry's future, had the following to say in regard to co-operation:

"In short, we have come to the time when team work is needed; yes, imperatively. There must be sympathy, understanding, and co-operation between agriculture, industry and business. They are alike necessary to a well rounded national life. They must work together for the good of all."

A few paragraphs later Secretary Wallace says:

"Without meaning that they shall be all inclusive, I venture to suggest certain things that ought to be done to foster our agriculture, not for the selfish benefit of the farmer, but for the benefit of all the people. In some cases legislative action will be required; in others, administration by government and state agencies; and still others, co-operation both between the farmers themselves and between farmers and other groups."

Arizona farmers are perhaps the first in the nation to actually carry out the Secretary's idea of co-operating with industry and business. The Arizona Farm Bureau is included in the Arizona Industrial Congress, through which its members are working with all other branches of industry and business in the state to advance the common interests of all by co-operation. The results already obtained have proved that Secretary Wallace is correct in saying that the future welfare of all demands co-operation between agriculture, industry and business.

Idle men work and fools a form treacherous. The industrious man will win the battle today.

THE WEEKLY'S FIELD

In a big city daily a few days ago we ran across this statement, which we want our readers to digest thoroughly.

"Not many country weeklies these days make any pretense of giving a complete or even a partial story of the world's news. There are other publications which can do this better. But there is no home news so satisfying as our country weekly. When the city paper tells it, it may leave most of the facts and figures, but it can't present them in the intimate, personal way of the home editor who really knows the folks about whom he writes."

Do you want any better argument than that in favor of your home town paper, the paper that, as even the big city editor admits, prints the news of Patagonia and community in the only satisfying manner? Think it over.

COLOrado RIVER BULLETIN POPULAR

TUCSON, May 12.—Interest in the problems of the Colorado River is evidenced by the demand for Bulletin 95 published by the Arizona Agricultural Experiment Station two months ago. The edition of 6000 copies is very nearly exhausted, and another edition of 2000 copies has been ordered from the printer. The bulletin discusses the water supply of the river and the irrigation and power possibilities with special reference to Arizona projects. A map shows the locations of the important reservoir sites, and the river cut given an excellent view of the Colorado River from above.

To His Mate

J. Allen Dunn

Copyright Bobbs Merrill Co.

CHAPTER II—Continued. "That makes all the more reason for us lookin' out for things, matey..."

"I have yore bunk changed. You'll come in with me. An' we'll put one an' one together. We'll be mates. Don't forget they fixed yore prog. I had nothin' to do with that. I may be stranded, but if the tide rises..."

"He set the clutch of his powerful fingers deep into Rainey's leg above the knee with a grip that left purple bruises there before the day was over. 'We two, matey,' he said. 'Now you an' me'll have a lot of stuff that ain't doped.'"

"He moved about the little cabin with an astounding freedom and sureness, chuckling as he handled bottle and glasses and measured out the whiskey and water. 'Wen you're blind,' he said, ramming his pipe full of black tobacco, 'they's other things comes to yo. I know the run of this ship, blindfold, you might say. I eud go aloft in a pinch, or steer her. More grog?'"

"But Rainey abstained after the first glass, though Lund went on lowering the bottle without apparent effect. 'So yore a bit of a sailor?' the giant asked presently. 'An' a scholar. You can navigate, I make no doubt?'"

"I hope to get a chance to learn on the trip," answered Rainey. "I know the general principles, but I've never tried to use a sextant. I'm going to get the skipper to help me out. Or Carlsen."

"Carlsen! What in h—l does a doctor know about navigation?" demanded Lund. Rainey told him what the girl had said, and the giant grinned. "I have my doubts whether they'll ever help yo," he said. "Wish I could. But it 'ud be hard without my eyes. An' I've got no sextant an' no lookin' tables. It's too bad."

"His disappointment seemed keen, and Rainey could not fathom it. Why had both Lund and Carlsen seemed to lay stress on this matter? Why was the doctor relieved and Lund disappointed at his ignorance?"

Lund invariably waited for Rainey. Tamada kept the food hot for them. To Rainey, Tamada seemed the hardest worked man aboard ship. He had three messes to cook and he was busy from morning until night, efficient, tireless and even-tempered. The crew, though they acknowledged his skill, were Californians, either by birth or adoption, and the racial prejudice against the Japanese was apparent.

"A week of good wind was followed by dirty weather. The persistence and increasing opposition of the storm seemed to have a corresponding effect upon Captain Simms. He grew daily more irritable and morose, even to his lieutenant. Only the doctor appeared able to get along with him on easy terms, and Rainey noticed that, to Carlsen, the skipper seemed conciliatory even to deference.

"You got it right," grinned Lund. "Simms is no philanthropist. It wasn't so easy for me to get any one to go in with me, son. I ain't the first man to come trallin' in with news of a strike. An' I had nothin' to show for it. Matter of fact, Honest Simms was the only one who didn't laugh at me outright."

"An' we had a hard an' tight agreement drawn up on paper, signed, witnessed an' recorded. 'Course it holds him as well as it holds me, but he gets the long end of that stick. Wen I read, or got it read to me, in the Seattle News-Courier, that the Karluk was listed as 'Arrived' in San Francisco, it was all I could do to get carfare an' grub money. If I hadn't bin blind, an' some of 'em half-wa' human to 'ard a man with his lights out, I'd never have raised it."

"But I'm here an' I've got some say-so. One thing, you're goin' to get Bergstrom's share. I don't give a d—n where the doctor comes in. If he marries the gal he'll get her twenty shares, enyway. Though he ain't married her yet. And I ain't through with Simms yet," he added, with an emphasis that was a trifle grim, Rainey thought.

"It's me an' you ag'in the rest of 'em, seems to me, Boss. The doc's ain't to be the big Boss aboard this schooner. He's got the skipper buffaloid. But not me, not by a jugful." He slammed his big fist against the side of the bunk so viciously that it seemed to jar the cabin. The blow was typical of the man, Rainey decided. He felt for Lund not exactly a liking, but an attraction, a certain compelled admiration. The giant was elemental, with a driving force inside him that was dynamic, magnetic. What a magnificent pirate he would have made, thought Rainey, looking at his magnificent proportions and considering the crude philosophies that cropped out in his talk.

"I'm in life for the lot of it, Rainey," Lund declared. "Food an' drink to tinkle my tongue an' fill my belly, the woman I happen to want, an' bet' able to buy enything I set my fancy on. The answer to that is Gold. With it you can buy most eny thing. Not all women, I'll grant you that. Not the kind of woman I'd want for a steady mate. There's one thing I've found out can't be bought, my son, the honor of a good woman. An' that's the sort of woman I'm lookin' for."

"This is my gold, an' I'm goin' to handle it. If eny one tries to swizzle me out of it I'm goin' to swizzle back, an' you can lay to that. Not forgettin' them that stands by me." Between Lund and Simms there existed a sort of armed truce. No open reference was made to the desertion of Lund on the floor. But Rainey knew that it rankled in Lund's mind. The five, Peggy Simms, her father, Carlsen, Lund and Rainey, ostensibly nessed together, but Rainey's duties generally kept him on deck until Carlsen had sufficiently completed his own meal to relieve him. By that time the girl and the captain had left the table.

"An' that's the sort of woman I'm lookin' for." "My fancy on. The answer to that is Gold. With it you can buy most eny thing. Not all women, I'll grant you that. LAKE MARKET QUOTATIONS. U. S. BUREAU OF MARKETS. Washington, D. C.

Market generally fair at unchanged prices. Receipts light except in southwest where pastures have lessened the demand for hay. Quoted: No. 1 Timothy, New York, \$10.50; Philadelphia, \$10.25; Pittsburgh, \$10.00; Cincinnati, \$9.75; Chicago, \$10.00; Kansas City, \$10.00; St. Louis, \$10.00; Memphis, \$10.00; Dallas, \$10.00; Omaha, \$10.00; Portland, \$10.00.

Potato markets are stronger in middle western states. Northern round whites gained 40c in Chicago, closing \$1.30 to \$1.35 per 100 lbs. North central shipping points up 2c to \$1.60 to \$1.75. New York and northern central round whites firm in eastern markets at \$1.45 to \$2.00. White Mountain potatoes generally higher at \$1.65 to \$2.00. Florida Spaulding, Rose stronger in market, closing \$2.00 to \$2.25.

Chicago hog prices advanced 10c to 15c. Beef steers and butchers cows and heifers up generally 15c to 25c. Stockers and feeders up 15c; veal calves generally 5c higher. Fat lambs advanced 5c to 10c. Fat ewes from 25c to 50c. Yearlings firm to 50c higher. Chicago prices: Hogs, \$10.00 to \$10.50; Feeders, \$6.00 to \$7.00; Light and medium weight veal calves, \$6 to \$8.25; Fat lambs, \$12 to \$17; Yearlings, \$2.75 to \$3. Fat ewes, \$7 to \$9.50.

Butter markets have ruled steady to firm with prices practically unchanged. Supplies have been well cleared and more fine butter is coming. Some shipments show considerable grass flavor. If weather conditions continue favorable for butter making, a break in price is expected. Closing prices, 22 score; Eastern, 40c; New York, 42c; Philadelphia, 45c; Chicago, 38c. Cheese markets active at present prices. Demand good. Prices at Wisconsin: Full cream, 12c to 13c; Daisies, 15c; Double Daisies, 14c; Young Americans, 16c; Longhorns, 15c; square plant, 15c.

Market had heavy undertone during the week and prices closed firm. Chicago May wheat down 1c, closing at \$1.38 1/2. Chicago May corn down 1c at 61c. Big export business had only temporary effect. Principal market factors were: Heavy liquidation on improved crop conditions, slow demand, and lack of buying interest. Closing prices in Chicago cash market: No. 2 red winter wheat, \$1.40; No. 2 hard winter wheat, \$1.45; No. 2 mixed corn, 61c; No. 2 yellow corn, 62c; No. 3 white oats, 35c. Average farm prices: No. 2 mixed corn, 60c to 62c; No. 1 dark northern wheat in central North Dakota, \$1.42; No. 2 hard winter wheat, \$1.45; No. 2 mixed corn, \$1.24; Winthrop May wheat down 1/2c at \$1.38 1/2.

Spot cotton prices advanced 3 points during the week, closing at 17.30c per pound. New York May futures advanced 30 points, closing at 18.21c.

Trade has been good in the beef steer section and a new season top established. The feature of the market was the sale of three loads of choice fancy grade animals, averaging better than 2,200 pounds, for \$8.10. Freight and other charges, 10c per cwt. Total has been paid here this year. Choice steers sold generally from \$7.50 to \$8.00, a good grade round outfit at \$7.75 to \$8.00.

A good active trade, with prices generally firm higher than the close of last week, was reported from the hog section. Choice butchers paid the top price of \$10.25 for one choice load of hogs and bulk of sales were made from \$9.85 to \$10.00. There were about three hundred hogs sold generally at \$8.50 and rough, heavy stags at \$7.50.

Choice fat lambs sold at \$15.25 and good grade killers sold from that price down to \$15. Heavy stock was finding a fair outlet at \$14.25 to \$14.50.

PROBLEMS JUST NOW PRESSING ON AGRICULTURISTS. DENVER BUSINESS DIRECTORY.

The economic problems connected with the advantageous marketing of farm crops and the financing of the movement of those crops are pressing upon agriculture most severely. They will be solved, however, and while that solution is being worked out it is simply good sense on the farmer's part to make his efforts toward production till to the very maximum, as best carrying him through the period of depression and hard times and placing him in the best position to take the greatest possible advantage of the better times to come.

ARMY AND NAVY GOODS—Everything in clothing, shoes, boots, harness, saddles, bridles, blankets and camping equipment. Anderson Bros., 1625 Arapahoe St., Denver—Fueblo, Colorado and Cheyenne, Wyoming.

Information Department. Commercial inquiries answered and information gladly furnished without cost. Address any firm above.

The Tides of Fundy. Extraordinary stories are sometimes told of the immense tides in the Bay of Fundy. The scientific facts in regard to them have been published by the Canadian geological survey. The bay is about 145 miles long and gradually narrows and becomes shallower as it penetrates the land.

ASPIRIN INTRODUCED BY "BAYER" IN 1900. Look for Name "Bayer" on the Tablets, Then You Need Never Worry.

Not the Man for the Job. Thomas Robertson, an official of the Eagles club, recently sent notices to several lodge members appointing them members of a committee to visit the sick. The next day one of those thus notified lashed Robertson on the street.

THANKFUL FOR A LITTLE CHILD. Mrs. Mertz Tells How Lydia E. Pinkham's Vegetable Compound Helped Her.

Two Held for Mail Truck Robbery. New York—Louis and Jack Wolfe and Jacob E. Price were arrested by postoffice inspectors here in connection with the \$2,500,000 mail truck robbery perpetrated in lower Broadway on Oct. 24, 1921. Stolen securities valued at \$75,000 were recovered.

Effort to Reduce Rates Fails. Washington—An attempt by the Oregon Short Line railroad to reduce rates on coal from Wyoming mines to points in Utah south of Ogden by approximately 22 1/2 per cent, was blocked finally by the Interstate Commerce Commission. The lower schedules, filed Dec. 5, 1921, had been suspended. The commission sustained protests of Utah coal mine operators against the lower rate, which would have put coal markets on a competitive basis.

LEGALS

NOTICE FOR PUBLICATION. Isolated Tract (040558) PUBLIC LAND SALE Department of the Interior, U. S. Land Office at Phoenix, Arizona, April 14, 1922.

NOTICE is hereby given that, as directed by the Commissioner of the General Land Office, under provisions of Sec. 2455, R. S., pursuant to the application of Harold J. Brown, Serial No. 040558, we will offer at public sale, to the highest bidder, but at not less than \$2.00 per acre, at 10 o'clock A. M., on the 29th day of May, next, at this office, the following tract of land: Lot 1, Sec. 23, T. 24 S., R. 17 E., G. & S. R. B. & M.

The sale will not be kept open, but will be declared closed when those present at the hour named have ceased bidding. The person making the highest bid will be required to immediately pay to the Receiver the amount thereof. Any persons claiming adversely the above-described land are advised to file their claims, or objections, on or before the time designated for sale.

JOHN R. TOWLES, Register. SCOTT WHITE, Receiver. First publication April 28, 1922. Last publication May 19, 1922.

Office at Phoenix, Arizona, April 22, 1922. NOTICE is hereby given that Oliver J. Rothrock, of Elgin, Arizona, who, on November 12, 1917 made Homestead Entry, No. 631483, for NE 1/4, Section 28, Township 20 S., Range 17 E., G. & S. R. B. & Meridian, has filed notice of intention to make Five-Year Proof, to establish claim to the land above described, before W. A. O'Connor, U. S. Commissioner, at Nogales, Arizona, on the 1st day of June, 1922.

Claimant names as witnesses: Victor J. Winger, Arens Reddock, George J. White, all 3 of Nogales, Arizona; Albert L. Hansen, of Elgin, Arizona. JOHN R. TOWLES, Register. First publication April 28, 1922. Last publication May 26, 1922.

That DEED or MORTGAGE may be only "A SURF OF PAPER" or A LAWSUIT. The seller may think he owns the land—and he may not. We can show you.

Those Wonderful California Herbs Cured Her and the Neighbors of Rheumatism Minburn, Iowa, May 6th, 1920. Rheumatism Herb Co., Ocean Park, Cal. Gentlemen—My mother is suffering dreadfully with rheumatism. We have tried doctors, all sorts of patent medicines and liniments, but no relief, and my sister-in-law (Mrs. W. F. Antle, of Norwalk, Iowa) wrote me and told me to get a pound of your Herbs, for she knew it would do wonders for my mother. SHE SAID IT CURED HER AND SEVERAL OF HER NEIGHBORS. Please send it as quickly as possible. Very Respectfully, Mrs. E. M. Jones. Send for free Booklet of letters from people all over the U. S., testifying to the wonderful results of these Herbs. Men and women agents are building up a good business selling them. Agents wanted everywhere. Price \$1 pound postpaid. RHEUMATISM HERB COMPANY, —Advertisement. Ocean Park, Calif.

TRADE As we pay others, we are paid: Life gives us back just what we give. And so we do not live to trade, But trade that we may truly live. Sale may be made in money, yes; But they are always made to men; And so Goodwill controls success. Bringing folks back to buy again. He cannot profit long or much. Who sells a single time to each; The cost of single sales is such; Prices rise out of common reach. He profits most whose every sale Creates a friend, whose kindly thought Serves to perpetuate the tale. Of what and where and why we bought. Such trading—like the growing grain— Repeats itself an hundredfold. Who trades thus makes a triple gain, In friends, in happiness, in gold. As we pay others, we are paid: Life gives us back just what we give. And so we do not live to trade, But trade that we may truly live. —Charles Henry Mackintosh. GLOOM CHASER The following contribution from the Joy Band is with the consideration of those out of employment—a new recipe for home brew.

THREE WAYS OF EMBALMING Methods Followed in Ancient Egypt Differed According to the Rank of the Deceased. There were three different ways of embalming in old Egypt. The most magnificent was bestowed only upon persons of distinguished rank. When a person of distinction died the body was put into a coffin, the upper exterior of which represented the deceased, with suitable embellishment. The coffin itself was usually made of sycamore wood, which is said to be almost incorruptible. Sometimes deal was used, in which case it was brought from abroad. The embalming of the body occupied 40 to 70 days. It consisted mainly of the introduction of astringent drugs and spices into the body, anointing it with oils of cedar, myrrh and cinnamon, and saturating it with niter. It was then washed and wrapped in linen bands dipped in myrrh and gum—these bands in some instances being 3,000 yards long—commencing at the head and terminating at the feet, avoiding the face. The body was then restored by the embalmers to the relatives, who placed it in the coffin. A less expensive method of embalming was simply to inject into the bowels a liquid extract of cedar, and wrapping up the body in salt and niter; others were sun-dried, or in some thick, boiled in a kind of bitumen made of mixed resinous substances. They were then placed, without any other covering than the bandages saturated with these substances, in sepulchres, and there deposited in rows by thousands.

DANISH MAIDENS HAVE CHARM Pretty Girls in Profusion to Be Seen on the Famous "Streak" in Copenhagen. Nowhere except on Fifth Avenue, New York, do you see so many pretty girls in the space of a short walk as you do on the "Streak." The maid of Copenhagen is nothing at all like one's preconceived notion of what a Scandinavian girl should be. Up in Norway you encounter the flaming red cheeks and yellow locks and robust forms which Anders Zorn has immortalized on canvas. But the maid of Copenhagen, the typical one, the kind that you will always remember when your thoughts dwell on the Danish capital, is not like any of these. She is petite and trim, neatly dressed, with hair that is copper brown as often as yellow. A walk along the "Streak" on a sunny afternoon at the shopping hour reveals to perfection the charm of Copenhagen. And if you stroll up to the Langeltalle, the delightful park that skirts the harbor, or venture into the grounds of the Rosenborg palace, it will be much the same; pretty girls, dozens of them, alone or in twos and threes, or escorted by devoted swains; girls as chic and Parisienne, with complexions that the fogs and winds of the Baltic have made into worthy rivals of those of England, clattering like rattles, bursting into smiles that reveal white teeth of dimples, tripping along with life and mischief in their eyes and charm in every tint of them. No wonder a visitor to Copenhagen can never get too much of afternoon promenading! How sincerely does he growl a curse when dusk begins to shroud the fair metropolis of Denmark and put an end to his enjoyment of the beauty parade on the "Streak."—The World Traveler.

PECULIAR FORM OF SEA FOOD Ghianchetti, Offspring of the Sardine, Greatly Relished Along Parts of the Italian Coast. The Italians along the Italian Riviera are passionately attached to a form of sea food known as ghianchetti. Ghianchetti, Kenneth L. Roberts explains in the Saturday Evening Post, are the offspring of the sardine. They are about one inch in length, and their bodies are about as robust and shapely as an ordinary piece of string. They are transparent and their eyes are black and disjunctive looking; and when the Italians pile them in baskets and trays they give the appearance of lemon jelly full of flyspecks—the flyspecks being the eyes. The approved method of preparing ghianchetti is to roll them into a ball or a fritter, fry them in olive oil and eat until either the ghianchetti or the eater is exhausted. Every good Italian, however, finds it hard to resist them in their raw state. A fisherman walking along with a tray of ghianchetti on her head usually keeps reaching up in an absent-minded manner, removing half a hundred of the little fish from the tray, and tossing them abstractedly into her mouth, a dozen or two at a time. When the ghianchetti season is at its height in February, no two ghianchetti fishermen can get into an argument with each other without spraying each other with ghianchetti fragments whenever they begin to shriek with emotion.

WORDS OLD AS HUMAN RACE Sounds Indicative of What They Describe Were Probably the First Forms of Speech. When your baby first begins to talk, it uses instinctively the oldest words in creation, words as old as the human race itself. They are words whose sound is an imitation of what they describe. A chair falls over in the nursery. "Bang," says baby, just as her great-great-grandmother said when her father dropped his club in the cave that was their home. Baby calls the cow a "moo," because that is the noise it makes. To primitive man the cow seemed to say "koo" — a name that has stuck. What finer imitation of the crow's croak could you have than the Greek word "korax"? Crow (really corow) is derived from the same idea. Hundreds of animals—birds, in particular—retain their ancestral names. The cuckoo has always been so called; he named himself. A whole host of other words describe noises—crash, slam, thump, whack, splash, boom, prattle, and so on. One of the most beautiful of these is murmur, which means the sound made by a gentle breeze among the trees—our mur-mur—Exchange.

JOSEPHINE A. SAXON, Nogales.

FORTUNES IN OIL!

The Big, Quick Fortunes in Oil are always made from the discovery of new oil fields! Time and time again, people who have invested small sums in Texas, drilling new territory, HAVE MADE FORTUNES WHEN OIL CAME IN. When the Discovery well came in at Burk Burnett \$100 jumped to \$20,000! \$1,000 invested with Pattillo Higgins at Beaumont brought \$43,000!

HIGGINS DISCOVERS A NEW FIELD

Pattillo Higgins, who discovered the Beaumont, Humble and Goose Creek Oil Fields—that brought millions to poor people overnight—has discovered a new Oil Field—Barbers Hill! He got on the ground early and secured acreage of enormous value in a field that promises to be one of the greatest in the world! He NOW OFFERS A LIMITED NUMBER CHANCE TO COME IN WITH HIM—TO JOIN AT THE START ON A STARTER'S BASIS.

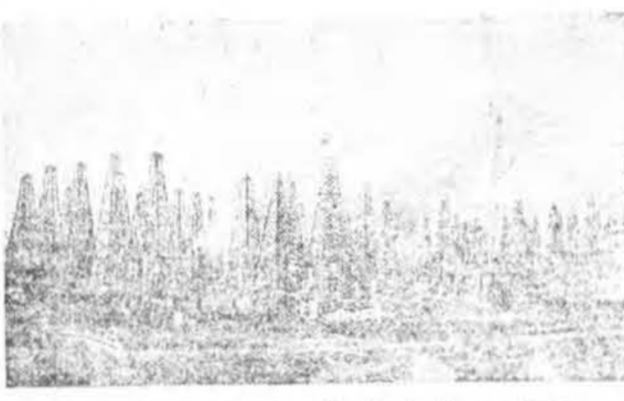

HIGGINS' GREAT RECORD!

Made \$250,000 on Patillo Higgins

Where Poor Men Got Rich Overnight

TO SHOW IT MAY CONCERN THIS SIXTEENTH, that I have known Mr. Pattillo Higgins for twenty years, I regard him as being honest and having great knowledge in locating and developing oil fields.

First Texas Field Discovered by Pattillo Higgins 1901

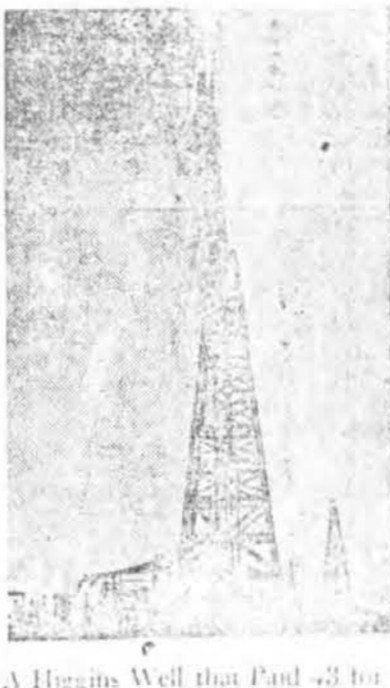

PATILLO HIGGINS, OIL WIZARD Vice-President of S. P. R. R. Endorses Pattillo Higgins SOUTHERN PACIFIC RAILROAD CO.

I have known Mr. Pattillo Higgins in connection with all discovery Beaumont field for the past twelve years, and his reputation is of the best.

THIS IS TO CERTIFY, that we, the undersigned citizens of Beaumont, Texas, are personally acquainted with Pattillo Higgins of this city; we have known him for many years, and believe him to be perfectly reliable and trustworthy. He is a native of Beaumont, Texas. We know within our personal knowledge that Mr. Higgins discovered the Beaumont Oil Field in the year 1892, and he said when the field was developed that it would be worth millions of dollars. He said that single wells would flow thousands of barrels of oil per day. He located the exact spot where all the big gushers are now found. Mr. Higgins deserves the whole honor of discovering and developing the Beaumont Oil Field.
