FRANKLIN KEPT HIS LAURELS

Appropriately, Apostle of Thrift Was Allowed to Retain Ornaments for Exceptional Time.

New York, the Sun of that city states, is one place where there are almost laurels enough to go around. It is the custom of the city to be generous with them, but they never last. Three days is about the limit.

That is, three days marks about the length of time when the crowd will endure the sight of them on the living. After that they view them with amusement. But when hung on a bronze or marble statue by common consent and the custom of the park department they are given thirty days.

Benjamin Franklin was permitted to keep his last crop of laurels longer than most statues. Although it was by reason of his very many illustrious qualities that his statue became a landmark in Park row, it was particularly because of his position as the patron saint of all those who hold thrift as a cardinal virtue that he was adorned some weeks ago with more wreaths than any Hawaiian ever managed to hang on himself.

He kept them, too, until they were of absolutely no more use. The day they were put up people traveled from all five boroughs to gaze at the bronze likeness of the publisher of "Poor Richard's Almanac"—that first of all the best sellers of America—and to consider their own sins or to contemplate their own virtues in the matter of thrift. But this week when they were cut down no one paid the slightest attention to the two "white winks" who were climbing about the pedestal looking down at the wreaths and slinging them on the pavement.

OUR PUBLIC PROBLEMS TODAY

Maintenance of sound and efficient government, maintenance of our school system and maintenance of our public highways are the three most important problems affecting our people today.

Business methods and economy must be injected into our political organizations.

While maintaining our public school system at the highest level we must curb the tendency to develop an over expended and top heavy educational machine loaded with duplications and fads.

The future of our public highways is of the gravest concern to every taxpayer. We must see that permanent highways are so constructed that they will last as long or longer than the bond issues which pay for them, without excessive maintenance charges. We must see that the highways built for the use of the public are not monopolized and destroyed by commercial truck and passenger lines.

Always the Extra Woman.

It is true that for every even 100 births of girl infants there are 105 boys born, but of those belonging to both sexes remaining alive at the end of the first year, there are just 100 girls alive to 95 boys.

Moreover, the ratio of survival increases slightly in favor of the girls throughout life. Therefore at all age periods there is a more or less decided excess of females over males.

Primitive men found this out for himself, without the aid of mortality tables or adding machines. He met the problem in his own naive fashion, according to taste, by dropping the extra babies, selling them into slavery, or letting them grow and practicing polygamy.—Caroline E. MacGill in Scribner's Magazine.

Hereditary Talent.

Uncle Si, from across the road, watched Professor Jenks enter the grocery.

"Nobody knows how many letters he's entitled to write after his name," said someone.

Uncle Si nodded. "But what I can't just make out is how he come by all his smartness. Par's I know none of his forebears ever amounted to much in a literary way."

"What are you talkin' about?" demanded Lew Carker, warily. "You know's well's I do that his father could spell Nebuchadnezzar quicker'n any other boy in school!"

HAVE KEPT GALLIC QUALITY

People of Anatolia Believed to Be Survivors of Those Who Founded Ancient Galatia.

Below the surface of the general Turkish-Moslem unity of Anatolia of today singular strains appear, both religious and racial. In the central ranges of the Pontine range, for instance, lie the villages of a people called in Turkish, "Kizilbashe"—"Redheads." They differ markedly in physical type from the other Anatolian peasants about them, being either light brunette or blond. The beards of the men are light brown and curly, unlike those of the Turks. They are in all probability the survivors of old Gallic tribes who hewed their way into central Anatolia in the Third century before Christ, founded the Galatian kingdom, and later accepted Christianity. They now profess to be Mohammedans. But they do things that no orthodox Turk will do, writes W. L. Westermann in Asia Magazine. Their women, for example, go unveiled; and they eat with the men. Once a year a priest appears among them and in secret they partake of the communion. These Kizilbashe present a case of incomplete conversion to Islam, as well as incomplete racial mixture. Throughout the Near East many such strange survivals are to be found, broken bits of ancient peoples, of primitive Christian beliefs, even of pre-Christian pagan religious rites—curious relics of the past.

SUCCESSFUL METHOD OF FEEDING CHICKENS

Based on experiments carried on last year by the Iowa agricultural experiment station, J. J. Warren gives the following as the method of feeding chicks at the Iowa state college poultry plant and recommended as poultrymen:

Excellent results can be obtained by keeping buttermilk or clabbered skim milk before the little chicks from the time they are first placed around the brooder until they are at least four weeks old—and longer if you can obtain the milk. During this period, the chicks will thrive better without any water to drink.

After the chicks are forty-eight to sixty hours old, fine scratch feed can be fed. This can be either a good grade of commercial chicks feed of a homemade mixture of equal parts by weight of rolled oats, corn cracked fine, and cracked wheat. This scratch can be fed five times a day for the first day or two—giving the chicks all they will eat up readily each time.

Then a dry mash can be placed before the chicks, made up in those proportions: 3 lbs. wheat bran, 2 lbs. corn meal, 1 lb. dried buttermilk, 1/2 lb. bone meal, 1/4 lb. charcoal. The charcoal may be omitted after the chicks are two weeks old. If the chicks do not eat the mash readily, it can be fed once or twice a day moistened with buttermilk.

One or two light feedings each day of hard boiled eggs, ground up, shell included, can also be fed. Eggs tested out of the incubators as infertile and even containing dead germs, if the latter are not too far advanced, can be used for this purpose.

Do not be alarmed if the odor of these eggs are offensive. If they are thoroughly cooked, all harmful bacteria will be destroyed. The chicks like these ground eggs and will thrive on them. Quite frequently the number of eggs tested out of the incubators is limited. Where this is the case, market eggs can usually be fed to the little chicks economically for the first two weeks.

If their scratch feed is fed in short litter, the little chicks will get plenty of exercise. Be sure there is plenty of fresh air in the brooder house. A little runway or yard in front will encourage the chicks to take further exercise in the open.

A little clean, sharp sand spread on the floor will furnish the chicks the necessary grit. Sand which contains clay or other foreign materials may become hard and packed.

It is a good plan to "barnyard" sterilize all chick fountains and feed pans daily.

Chicks do best if given green food. However, if none is available, suitable factory results can be obtained if alfalfa or clover, chopped fine, is used as litter.

Good results will be obtained if the temperature is 100 degrees F when the chicks are first placed around the brooder. The heat can be reduced one degree each day until the temperature has been dropped to about 80 degrees F. The thermometer will give the correct readings if hung about six or eight inches in from the edge of the brooder and two and a half inches above the floor.

One hundred and eighty nine chicks under this system of feeding, weighed 99.5 pounds at four weeks of age.—Ontario Poultry Journal.

Do What You Can.

It is the greatest of all mistakes, to do nothing because you can only do little, but there are men who are always clamoring for immediate and stupendous effects, and think that virtue and knowledge are to be increased as a tower of Babel. As it is increased, when the tower of its magnitude can be measured only by the day, and you cannot approach it without perceiving a fresh pillar, or admiring an added pinnacle.—Samuel Smith.

"Oh, That's Different."

Hazel—Why did you tell Edith that secret that I told you not to tell?
Helen—I didn't tell her. I just asked her if she knew.

"THE DAUGHTER OF JAIRUS" ENTERTAINS PATAGONIANS

A crowded house greeted the singers from Nogales Monday night at the local opera house. The oratorio, "The Daughter of Jairus," by Sir John Strainer, under the direction of Rev. G. W. Forman, was well rendered, and enjoyed by those in attendance.

The accompanist, Mrs. Hanerick, was supported by E. R. Purdon on the saxophone.

Previous to the rendition of the regular program, the audience was entertained by Mr. Gamble, who sang several old favorites, which were heartily applauded.

Mrs. Duane Bird, especially deserves praise for her solos, which were well received.

Among Nogales visitors, besides the chorus and musicians, were Judge and Mrs. W. A. O'Connor and Mr. Duane Bird.

PATAGONIA SCHOOL CLOSING FOR TERM

With appropriate exercises attended by a large gathering of parents and children, the Patagonia school closed for the summer vacation season, Tuesday night.

There were three graduates, Miss Gladys Doyle, Louis Valenzuela and Arthur Patterson. Superior Judge William A. O'Connor addressed the gathering and Mrs. Josephine Saxton, county superintendent of schools, presented the diplomas to the members of the graduating class.

The teachers of the Patagonia school which enjoyed a prosperous school term, are Miss Edna Honley, principal; Mrs. Anna Potune, Mrs. Geucy Slater and Miss Gaffin.

NEW LINE OF GOODYEAR TIRES

Addition of a complete new line of cord tires to sell at popular prices has been announced by W. H. Vining, manager of the El Paso branch of the Goodyear Tire and Rubber Company of California.

The new line will be called the cross-rib cord, on account of the cross-rib tread design. It will not supplant the well-known all-weather tread tire of the company, but will be a companion line to it.

The new tire will be marketed through Goodyear service stations only and will sell at 20 to 25 per cent less than the all-weather tread tire.

It has been in course of development and testing for a number of months and will be ready for general distribution in June.

"There are two reasons for bringing out the new line," says the Goodyear statement. "One is to give our dealers a tire to meet the needs of customers to whom first cost is an important factor. The other is to give the dealers a tire for so-called commercial accounts, meaning firms that have a number of trucks and buy in quantities."

20,994 MILES AND TREAD ONLY 1/3 WORN

MOST MILES per DOLLAR

Firestone CORD TIRES

The tire section above at the left shows the condition of a Firestone 33x4 1/2 Cord Tire after 20,994 miles on a Yellow Cab in Chicago.

The section at the right was cut from a new Cord of the same size. Careful measurements show that only 1/3 of the tread of the tire on the Yellow Cab has been worn away after this long, gruelling test. The carcass is intact after more than 11,000,000 revolutions.

Firestone Cords have averaged over 10,000 miles on Chicago Yellow Cabs (1,200 cabs all Firestone equipped). In thousands of instances, they have given from 15,000 to 30,000 miles.

Look at the tread—scientifically angled against skid, massive

and heavy in the center where the wear comes, tapered at the edges to make steering easy and to protect the carcass against destructive hinging action of high tread edges. The carcass is air bag expanded to insure uniform tension and paralleling of every individual cord. It is double "gum dipped" to make sure that each cord is thoroughly insulated with rubber.

This is the reason why Firestone Cords unfailingly deliver extraordinary mileage. It explains the unanimous demand of thoughtful tire buyers for these values. The local Firestone dealer will continue to provide the personal service that makes Firestone tire comfort and economy complete.

GIRLS CLOSE EYES IN MOVIES

Were Determined for Once to See a Picture From Its Beginning to Its End.

The last scenes of a film drama were flickering to their inevitable denouement. The fight between the hero and the villain was over, the closing of automobiles had been so far exhausted that there was hardly a character who hadn't chased or been chased by every other character.

Suddenly a woman in the audience noticed two nice girls near her whose eyes were peacefully closed. Her heart went out to them in sympathy, for she assumed that they were blind and that they went to the movies just to hear the professor punch the piano, although that seemed too awful to be true.

But when the picture ended and the lights flashed on, the two girls opened four perfectly good eyes, looked at each other and smiled.

"Did you really keep your eyes shut?" demanded one. "Honest to goodness I did—but did you?" countered the other.

"Ness my heart and hope to die," averred the first, "but it took a lot of self-control. However, I was determined for once to see a picture from the beginning instead of from the middle."—New York Sun.

SANTA CRUZ COUNTY MEN TO GET MILITARY TRAINING AND EXPENSES

Through the Citizens' Military Training camps to be maintained this summer by the government at 12 of the military posts in the United States, an opportunity will be given every young man of Santa Cruz county, who desires, to receive one month's military training free of charge.

The camps will be maintained by the government from July 27 to August 26, and all expenses of the candidates incident to the training will be paid by the government, including transportation, to and from the camp.

All candidates from Arizona will be sent to Fort Bliss at El Paso, Texas. For the purpose of giving full information concerning the appointment to those interested Capt. A. Rooks, adjutant of the 25th infantry at Camp Stephen D. Little has issued a circular in which are given all details of the camps.

Complete information concerning the course, application blanks and other data concerning the camp may be obtained from Capt. A. Rooks on application.

These camps are the outgrowth of the Plattsburg, New York, camps of 1913, 1914 and 1915, and are open to all citizens of the United States between the ages of 18 and 25 years. The camps will be conducted by the War Department under the provisions of an act of June 4, 1920, which authorizes it to conduct training camps each summer for the training of American citizens. The first camps under the act were maintained last year.

To all those accepted for training in the camps, the government will at low mileage to the camps at the rate of 5 cents a mile and will furnish candidates with a ticket and 23 a day expenses of the trip home. Complete uniforms will be furnished without cost by the army which may be purchased at the end of the training by the candidate at cost. Meals, quarters and laundry will be furnished without cost.

Three courses of training will be given at each camp. The Red course for those who have never had any military training, the White course for the enlisted men of the organized reserves and the Blue course which provides advanced training for warrant officers and non-commissioned officers of the regular army, national guard and organized reserves.

The 1922 camps promise to be more beneficial because of the experience by the War Department in conducting the camps last year. It is expected that about 8000 applicants will be received this year of which approximately 3000 will be accepted in order of their priority and it is suggested that each candidate get his application in as early as possible.

Tom Castello of Patagonia will be one of the boys to take advantage of the training.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more when they are in poor health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE consists of an Ointment which Quickly Relieves by local application, and the Internal Medicine, a Tonic, which assists in improving the General Health. Sold by Druggists for over 40 Years. P. J. Cheney & Co., Toledo, Ohio.

FOR SALE OR LEASE—Mining properties. We have for sale or lease some very promising lead, silver, copper and other mining properties; some prospects; others well developed, with large bodies of good grade ores blocked out. Reasons for selling: owners haven't sufficient capital to operate them. All dress inquiries for details and full information to Santa Cruz Patagonian Patagonia, Ariz.

FOR SALE—About 20 pairs of mated Red Curlew pigeons, \$1 a pair takes the lot. No better squab producers known. Inquire at Patagonian office.

FOR RENT—Two-room cottage, furnished for housekeeping. Apply Mrs. E. D. Parley, Commercial Hotel, Patagonia.

When in Tucson, stop at the Ordway Hotel. Will house you and your party for \$1 a day.—Advertisement.

FEROUS DENIZEN OF SEA

California Spotted Moray is a Creature Which the Fishermen are Anxious to Make.

The California spotted moray, or "sea eel" as it is popularly called, is credited with being the most ferocious marine animal in existence. The commonly observed specimens are about three or four feet long, and about the size of a man's wrist. Their mouths are provided with needle-like teeth, and their jaws are so strong that cutting off the animal's head does not leave the slightest doubt in releasing its hold. Hence a man can only be relieved by cutting the head to pieces so that the jaws cannot hold together.

Stories are told of fishermen being driven from their boats when a large specimen got loose after being hauled up, and these stories may easily be credited, considering the disposition of the small ones, which are common to the California coast. Some of those found in the deeper water reach a length of six or eight feet, and a weight of 100 pounds. The animal can actually be used in a boat, and makes use of its extraordinary strength for holding objects which it is eating, and for twisting and pulling around reefs.

UNABLE TO 'FIGGER IT OUT'

Come to Think of It, Uncle Zeke Was Up Against Something of a Problem.

In a Georgia town dwells an old negro, who is supported by his wife. Uncle Zeke spends most of his time fishing in the nearby pond; not that he expects to catch any fish, but "just to have some harmless amusement, eh?" Aunt Mary makes in washing.

One day one of Aunt Mary's patrons broached the subject to her, and suggested that she should not encourage her husband's laziness by supporting him in idleness, but Aunt Mary protested.

"Need, honey, nark ole man ain't lazy," she declared. "It's jest them scientific notions he got when he was a wauklein' at de college."

"But what have scientific notions got to do with his not working?" "Got a whole lot to do, honey." Aunt Mary said, gathering up her basket. "Yo' see, dem ideas he's got was dat it wasn't healthy to work after mebbe; an' he ain't been able to figger out no way to 'complish dat, not yo', less he gives up eneb' an' course he can't do dat."

A Complete Angler.

"Cherice, come in to dinner!" Mrs. Jones stood at the door of her cottage, looking over toward a small boy who was fishing with a bent pin and herring bone on the bank of a pond.

"Cherice—dinner?" "Burr! Cherice fished. "Cherice?" No answer.

"If you don't come in to dinner at once, my son," threatened Mrs. Jones, "I won't give you any at all!" Only a sudden tension of the small boy's frame as he gazed eagerly into the depths of the murky puddle.

Mrs. Jones' patience was at an end. Silently she crept up behind the delinquent and then, suddenly seizing him by the shoulders, shook him violently to and fro.

"You rascal!" she cried. "Didn't you hear me enb'?" "No, ma," said the youngster stoutly. "I didn't hear you the first three times and the last time I had a bite!"—Exchange.

Dweller in a Cave.

Cave bears were great big beasts, weighing half a ton or more. They lived in Europe during prehistoric times, and were contemporaries with our ancestors. They got their name from the fact that their bones are usually found in caves. All bears, as a matter of fact, prefer a den in some rocky hole to live and die in.

Cave bears are all extinct now, but their near relatives, the Siberian brown bear and the Alaskan Kodiak bear, are alive. Scientists were at a loss as to where to place these huge beasts until they discovered Pleistocene affinities for them. Although a cave bear stood as big as a small cow, he was relatively inoffensive. He preferred rooting in the ground or robbing an occasional bee tree to preying on animals and men.

The army air service of Sweden reports that a six-mile section of telegraph cable was successfully laid by an airplane in eight minutes. Six of the eight minutes were spent in flight and the other two in making connections.

A Man To His Mate

By J. ALLEN DUNN

COPYRIGHT BOBBS MERRILL CO.

GUN-PLAY.

Synopsis.—Littering on the San Francisco waterfront, John Rainey, newspaper reporter, is accosted by a giant blind man, who asks Rainey to lead him aboard the sailing schooner Karluk. In the cabin they find Captain Simms and a man named Carlsen. Simms recognizes the blind man, calling him Jim Lund. Lund accuses Simms of abandoning him, blind, on an ice field, and denounces him. Simms denies the charge, but Lund refuses to be pacified. He declares his intention of accompanying the Karluk on its expedition north, where it is going in quest of a gold field which Lund has discovered. Pezzy, Simms' daughter, is aboard, and defends her father. Carlsen, who is a physician, drugs Rainey. Awakening from his stupor, Rainey finds himself at sea. Carlsen informs him he has been kidnapped. He offers Rainey a share of the gold, and Rainey is forced to declare himself as such. Lund gives him a brief account of a former expedition of the Karluk, tells him he distrusts Carlsen, and suggests a "partnership." Rainey to act as Lund's "eyes." Rainey is made second mate. Captain Simms is ill and the navigation is entirely in the hands of Carlsen. At the latter's suggestion, a shooting match is staged and the seal hunters exhaust their ammunition. Carlsen shows his skill with the pistol and Lund does some astonishing shooting "by sound." Sandy, the ship's boy, is swept overboard and is rescued by Rainey.

CHAPTER IV—Continued.

Her eyes flashed and then she made a visible effort to control herself. "But it was very brave of you, and I want to ask your pardon," she concluded, with the crimson of her cheeks flooding all her face before she turned away, and made abruptly for the companion.

"You'd better get into some dry togs, Rainey," he said. "And I'll prescribe a stiff rum or grog-hot. Take your time about it." Rainey, conscious of a wretched feeling in his side, a growing nausea and weakness, thanked him and took the advice. Half an hour later, save for a general soreness, he felt too vigorous to stay below, and went on deck again. Sandy had been taken forward. Lund had disappeared, but he found the giant in the triangular forecabin by Sandy's bunk.

"That you, Rainey?" Lund asked as he heard the other's tread. Then he dropped his voice to a whisper: "The lad's grateful. Make the most of it. If he wants to spill anything, get all of it. Best day's work you've done in a long while, matey. Pump that Sandy. Pump him dry. He'll know almost as much as Tamada, an' he'll come through with it easier."

"Just what are you afraid of?" asked Rainey.

"Son," said Lund, simply, "I'm afraid of nothing. But they're primed for somethin', under Carlsen. We'll be makin' Unataska tomorrow or the next day. Here's hopin' it's the next. An' we've got to know what to expect. Here's somethin' for you to chew on: Inside of forty-eight hours there's goin' to be an upset aboard this looker an' it's up to me an' you to see we come out on top. If not—"

He spread out his arms with the great, gorilla-like hands at the end of them, in a gesture that supplanted words. Beyond any doubt Lund expected trouble. And Rainey, for the first time, began to sense it as something approaching, sinister, almost tangible.

CHAPTER V.

Sandy Speaks.

The next morning Rainey, going on deck to relieve Hansen at eight bells, in the commencement of the forenoon watch, found Lund in the bows as he walked forward, waiting for the bell to be struck. Lightly as he trod, the giant heard him and instantly recognized him. "Seen Sandy yet?"

"I haven't had a chance. I imagined it would be the best not to be seen talking to him."

"Right. Matey, things are comin' to a head. There's ice in the air. I can smell it. Feel the difference in temperature? Ice, all right. An' that means two things. We're high one of the Aleutians, an' Bering strait is full of ice. Early, at best, but there's nothin' regular 'bout the way ice comes. I've got a strong hunch somethin' will break before we make the strait."

"There's one thing in our favor. Yore savin' Sandy has set you solid with 'em."

the hunters. They won't be so keen to maroon you. An' they'll think twice about puttin' me ashore blind. I used to get along fine with the hunters. All said an' done, they're men at bottom. Got their hearts gold-plated right now. But—"

He seemed obsessed with the idea that the crew, with Carlsen as prime instigator, had determined to leave them stranded on some volcanic, lonely barren islet. Rainey wondered what actual foundations he had for that theory.

He found no chance to talk with Sandy. He noticed the boy looking at him once or twice, wistfully, he thought, and yet furtively. Carlsen did not appear during the morning, neither did the hunters. Nor the girl.

At noon Carlsen came up to take his observation. He said nothing to Rainey, but the latter noticed the doctor's face seemed more sardonic than usual as he tucked his sextant under his arm.

With Hansen on deck they all assembled at the table with the exception of the captain. Tamada served perfectly and silently. The doctor conversed with the girl in a low voice. Once or twice she smiled across the table at Rainey in friendly fashion.

"Skipper enjoy better?" asked Lund, at the end of the meal.

Carlsen ignored him, but the girl answered:

"I am afraid not. It was not often she spoke to Lund at all, and Rainey wondered if she had experienced any change of feeling toward the giant as well as himself.

Carlsen got up, announcing his intention of going forward. Lund nodded significantly at Rainey as if to suggest that the doctor was going to foregather with the hunters, and that this might be an opportunity to talk with Sandy.

"Goin' to turn in," he said. "Eyes hurt me. It's the ice in the wind."

Carlsen had already vanished and the girl went to her room.

The door from the galley corridor opened, and a head was poked in cautiously. Then Sandy came into the cabin.

"Beg pardon, Mister Rainey, sir," said the roustabout, "I was through with the dishes. I wanted to have a talk with yer." His pop-eyes roamed about the cabin doubtfully.

"Come in here," said Rainey, and ushered Sandy into his own quarters.

"Now, then," he said, established on the bunk, while Sandy stood by the partition, slouching, irresolute, his slack jaw working as if he was chewing something, "what is it, my lad?"

"They'd klick the stuffin' out of me if they knew this," said Sandy. "I've bin warned to hold my tongue. Deming said he'd cut it out if I chattered. An' he would. But—"

"But what? Sit down, Sandy; I won't give you away."

"You went overboard after me, sir. None of them would. I've heard what Mr. Carlsen said, that I didn't amount to nothin'. Mebbe I don't, but I've got my own reasons for hangin' on. Me, of course I don't amount to much. Why would I? If I ever had mother an' father, I never laid eyes on 'em. I've made my own livin' since I was eight. I've never 'ad enough grub in my belly till I worked for Tamada. The Jap stills me prime tillin'. He's only a Jap, but he's got more heart than the rest o' that bloody bunch put together."

Rainey nodded.

"Tell me what you know, quickly. You may be wanted any minute."

The words seemed to stick in the lad's dry throat, and then they came with a gush.

"It's the doc! It's Carlsen who's setled, but there's somethin' else—and the doctor can't help it any. I can't quite understand—"

She trailed off in her speech, looking uncertainly at Rainey. The latter came to a decision.

"Miss Simms," he said, "are you going to marry Doctor Carlsen?"

Suddenly Rainey was aware that some one had come into the cabin. It was Carlsen, now swiftly advancing toward him, his face livid, his mouth snarling, and his black eyes devilish with mischief.

"I'll attend to this end of it," he said. "Pezzy, you had better go in to your father. I'll be sick in a minute. He's a pretty slick man," he added.

His snarl had changed to a smile, and he seemed to have swiftly controlled himself. The girl looked at both of them and slowly went into the captain's room. Carlsen wheeled on Rainey, his face once more a mask of hate.

"I'll put you where you belong, you d-d interloper," he said. "What in h-d do you mean by asking her that question?"

"That's my business."

"I'll make it mine. And I'll settle you very shortly, once and for all. I suppose you're soft on the girl yourself," he sneered. "Think yourself a hero! Do you think she'd look at you, a beggarly newsmonger? Why, she—"

"You can leave her out of it," said Rainey, quietly. "As for you, I think you're a dirty blackguard."

Carlsen's hand shot back to his hip pocket as Rainey's fist flashed through the opening and caught him high on the jaw, sending him staggering back, crashing against the partition and down into the cushioned seat that ran around the place.

But his gun was out. As he raised it Rainey grappled with him. Carlsen pulled trigger, and the bullet smashed through the skylight above them, while Rainey forced up his arm, twisting it fiercely with both hands until the gun fell on the seat.

Simultaneously the girl and Lund appeared.

"Gun-play?" rumbled the giant.

"Carlsen sez he'll answer for him, sir. He boasts how he's goin' to marry the gal. That'll giv' him three shares—countin' the skipper's. The men don't see that, but I did. He's a bloody fox, is Carlsen."

"When's this coming off?" asked Rainey.

"Quick! They're goin' to sight land tomorrow, they say. I heard that this mornin'. I hid in my bunk."

"All right, Sandy. You're smarter than I thought you were. Sure of all this?"

"I ain't much to look at, sir, but I ain't had to buck my own way without gettin' on ter myself. You won't give me away, though? They'd keelhaul me."

"I won't. You cut along. And if we happen to come out on top, Sandy, I'll see that you get a share out of it."

"Thank you, sir."

"I'll come out with you," said Rainey. "If any one comes in before you get clear, I'll give you an order. I sent for you, understand."

But Sandy got back into the galley without any trouble. Rainey began to pace the cabin again, and then went back into his own room to line the thing up. Lund was asleep, but he would waken him, he decided, filled with admiration at the blind man's sagacity and the way he had foreseen the general situation.

There was not much time to lose. Rainey did not see what they could do against the proposition. He was sure that Lund would not consent to it. And he might have some plan. He had hinted that he had cards up his sleeve.

What Carlsen's ultimate plans were Rainey did not bother himself with. That it meant the fooling of the whole crew he did not doubt. He intended eventually to gather all the gold. And the girl—she would be in his power. But perhaps she wanted to be? Rainey got out of his blind alley of thought and started into the main cabin to give Lund the news.

The girl was coming out of her father's room.

"Any better?" asked Rainey.

"No. I can't understand it. He seems hardly to know me. Doctor Carlsen came along because of father's."

She was coming out of her father's room.

"Any better?" asked Rainey.

"No. I can't understand it. He seems hardly to know me. Doctor Carlsen came along because of father's."

But His Gun Was Out. As He Raised It Rainey Gripped With Him.

setled, but there's somethin' else—and the doctor can't help it any. I can't quite understand—"

She trailed off in her speech, looking uncertainly at Rainey. The latter came to a decision.

"Miss Simms," he said, "are you going to marry Doctor Carlsen?"

THE AMERICAN LEGION

(Copy for This Department Supplied by The American Legion News Service.)

WAR ROBS THREE OF MEMORY

Trio Among Most Unusual Cases on Record at Veterans' Bureau in Washington.

Three men who have lost themselves and whose memory does not extend back to the war where they received injury, are among the most unusual cases on record at the Veterans' bureau in Washington, D. C., among the long list of war victims. The American Legion is endeavoring to assist the unfortunate ex-service men in finding their relatives.

Hayward Thompson—at least that is what he is now called—is one of the most peculiar cases. He has forgotten who he is. In his head is an ugly shrapnel wound. His memory goes back to January 22, 1922, when he arrived at a hotel in Denver, with a bill in his pocket from one of the most expensive hotels in Colorado Springs. His memory, he now believes, lapsed somewhere, either far back in France or on the trip between Colorado Springs and Denver. Thompson remembers having had \$1,200 in his pocket and access to many thousands more.

In searching Washington records for some trace of the lost man, it was found that a certain Hayward Thompson enlisted in the Marine corps June 5, 1918, and was discharged January 6, 1919. He had a wife and three children at Flemington, Mo., and a mother, Mrs. Louise Thompson, at Chicago. The man with a shrapnel wound in his head and no memory of any relatives at all, telegraphed in great eagerness to Flemington, Mo., and to Chicago. He received no answer.

Not so long ago a clean-cut young man appeared at a Los Angeles hospital. He wore an American Legion button. When questioned as to who he was he stated he did not know. "I think I am thirty-two years old," he said. "I am five feet, nine inches and weigh 130 pounds. My eyes are gray and I have blond hair. I believe I was a soldier. If any one can tell me who I am, or anything about my past, please let me know." The Los Angeles post of the Legion is making every effort to help the man find himself.

A third "unidentified living" lives at 735 North Thirty-first street, Louisville. He is known as Leonard Wells, to the neighborhood. His memory is hazy. He believes that he enlisted in the old First Kentucky infantry, and with the command was transferred to a replacement detachment and sent to France. His photograph was forwarded to his company commander, who recognized the face but did not recall a name. A machine gun bullet had pierced his abdomen and injured his spine. Another had injured the left shoulder cap. No compensation or insurance can be awarded to this man, the Veterans' bureau regrets, until his identity can be established.

France, it is said, has six of these "unidentified" living ex-service men. Great Britain has a few. These lost souls who cannot find their memories, and who know they cannot, present a spectacle unique and pathetic. They are lost and know it.

ON "GREATEST HEROES" LIST

Sergt. Samuel Gluckman of the American "Devil Dogs," Rival for York-Woodfill Honors.

Another rival for the crown worn alternately by Sergeants York and Woodfill as the greatest hero of the World War has been uncovered by the United States veterans' bureau in the person of Sergt. S. A. U. I. Gluckman, member of the American "Devil Dogs" during the war and decorated by both the American and allied governments.

Although born in Austria, Sergeant Gluckman enlisted with the marines at the outbreak of the war and although too modest to tell the story of his achievements while fighting against the Germans, the American Legion at Washington discovered that Gluckman fought in seven major engagements, Verdun, Belleau Woods, Chateau Thierry, Marbach, St. Mihiel, Soissons and Mont Blanc.

On the morning of October 3, 1918, Sergeant Gluckman started out to get water for his comrades. He returned without the water but with 20 Germans and a painful wound. The "Devil Dog" sergeant captured a lone German and instead of bayoneting his captive forced him to lead him to the rest of the advance party. Coming onto the whole batch of 20, Sergeant Gluckman waved a hand grenade and ordered them all out of the shell hole they were occupying and into the arms of his American comrades. By executive appointment Gluckman is now employed at the navy yard at Portsmouth, N. H.

WHAT VOLCANOES THROW UP

Water, Dust, Mud, Pumice, Glass and Granite Among Products of the Rumbiers.

A volcano—let us say Stromboli, which very frequently makes a lot of trouble—ejects materials of various kinds.

One of these is water. It is the last thing we should expect a burning mountain to produce, but, as a matter of fact, volcanoes vomit enormous quantities of water, formed by the cooling and consequent condensation of gases rising through the vent pipe.

Volcanic dust, thrown high into the air during an eruption, is so finely divided that much of it will float in the upper levels of the atmosphere for years. Its particles seem mostly to be minute bubbles, hollow inside.

Together with water, volcanoes emit vast quantities of mud, which, hardening into rock, form what is called "tuff"—a friable material which in parts of our own West covers great areas to a depth of thousands of feet, which is so porous, and therefore so light in weight, that it will float on water. Another is obsidian, or "volcanic glass," a substance of the same chemical composition as pumice, but extremely hard, being of high density.

Typical of the "eruptive" rocks, representing material thrown up from the depths is granite. Such rocks are practically impervious to water, whereas the sedimentary rocks—sandstones, limestones and shales—are sufficiently porous to allow water to percolate through them. It is these sedimentary rocks that contain the so-called "pools" of petroleum, usually with water underlying the oil.

Robin Hood's Proper Name.

The proper name of Robin Hood was Robert Fitzooth. The first he impersonated to Robin, and the second into Hood, omitting the Fitz, which is Norman for son (modern French being "dits"), since having been declared an outlaw, he was not unwilling to renounce his claims to Norman descent. That he was really the earl of Huntington, as some historians assert, cannot be proved.

For the Invalid.

Straws may be used in giving liquids to sick children when they cannot be moved. Glass tubes are easily broken, but a bundle of straws, such as used at soda fountains, may be purchased at small cost.

Not Influenced by the Moon.

The bureau of animal industry says there is no foundation in fact for the superstition that the various phases of the moon has anything to do with the proper time to set hen's eggs.

LEGION MAN, AID TO CUPID

Henry Sullivan, Phoenix (Ariz.) Organization Enthusiast, as J. P. Ties Many Knots.

Having secured plenty of experience in braving the perils of the deep while a member of the navy during the war, Henry J. Sullivan of Phoenix, Ariz., is now helping to launch the several ships of matrimony that set sail from his home city.

When the service men of Phoenix start their wedding barks they seek out Justice of the Peace Sullivan to unship the lines of their single blessedness.

Mr. Sullivan is also the man who started the "Under one head, the American Legion" slogan which has been adopted by all the war organizations of his home county to advance the interests of the service men, carry on hospitalization work, eliminate drives and working generally for the benefit of the men who served their country.

As Mr. Sullivan himself expresses it: "All war organizations in the county have united under one head for the purpose of centralizing our work. We expect to lend our efforts largely to hospitalization work and in other ways serving the disabled service men by placing the responsibilities on the various departments of government where they belong rather than by advancing their rights in a slipshod fashion."

LEGION MAN, AID TO CUPID

Adjusted Compensation Wins.

Adjusted compensation won a defeated victory in the nation-wide referendum by the United States Chamber of Commerce—4,116 chambers voted favorably, 2,657 against the measure. The United States chamber has opposed the bill from the start. The Commerce body in Toledo, O., protested the questionnaires which was sent out as being unfair in the way it presented the subject.

Carrying On With the American Legion

A community playground will be made by the Legion at Nashville, Tenn., the ex-soldiers bearing the expense of apparatus and upkeep.

In Korea, American ex-soldiers, most of them missionaries under the leadership of a Southern Presbyterian mission, have formed a part of the Legion.

During the war it cost Uncle Sam \$200 to clothe each of his soldiers. The present doughty is garbed in clothing costing but \$180, the War department states.

The only woman field clerk in the army is Miss Jean Hodson of San Francisco, Cal., secretary to Major General Murton. She holds the rank of sergeant major.

The Legion in both North and South will henceforth observe the birthdays of Generals Lee and Grant, rival leaders of the Civil war. The birthday of General Grant was observed on April 27 this year and that of Lee will be observed January 19, 1923.

Former navy radio operators and members of the army signal corps have organized under Legion auspices in Nebraska, and are broadcasting market reports, weather reports, weather forecasts and weekly musical concerts.

When two desperate criminals escaped from jail in Springfield, Tenn., and police authorities lost them in the woods, they appealed to the Legion for assistance. The Legionnaires formed a posse, secured the woods and made the capture. The post has acted in this capacity twice before.

Smokers Cause Many Forest Fires.
Denver, Colo.—Twenty per cent of all the forest fires started by man in the national forests of the West during 1921 were caused by careless tobacco smokers, according to figures compiled by the forest service, United States Department of Agriculture. In California, Arizona and New Mexico, one out of every four forest fires due to human agencies was started by burning cigarettes, cigars, matches, or pipe-bowls carelessly thrown aside by smokers while in the woods. In other parts of the West the percentage of smokers' fires ranged from 12 to 18 per cent. The total number of forest fires on the western national forests during the past season was 5,131, of which number 1,444 were caused by lighting, 732 by smokers, and 2,955 by other human agencies.

To Improve Quality of Wheat.

Kansas City, Mo.—Formation of the Southwestern Wheat Improvement Association was effected here at a meeting of representatives of milling companies, railroads and other business interests in Missouri, Kansas, Nebraska, Colorado, Oklahoma and Texas, with the object of carrying out a comprehensive campaign to improve the quality of wheat raised in the Southwest.

Wu Declares Revolution Suppressed.

Tientsin, China.—General Wang Chang Pin, commander of the 23rd division, has arrived here to take over command of the 23rd forces. Gen. Wan Pei Fu has returned to Paoing-Fu. General Wu announces that the trouble in the province of Honan, caused by the revolution of Tschung Chaoth, has been suppressed.

Fiancé Saves Thief from Prison.

New York.—On the solemn promulga of his fiancé to stand as a "silent sentinel over him the rest of her life," Oscar Hirschmann escaped with a suspended sentence after he had pleaded guilty to stealing \$500 from a brokerage firm by which he was employed, to provide medical attention for his aged father, who has since died.

Danish Explorer Crosses Greenland.

Copenhagen.—Lauge Koch, the Danish explorer, leader of the so-called Jubilee expedition, has traversed the northernmost point of Greenland, says the National Tidende, thus achieving the object of the expedition.

Carpenter Knocks Out Lewis.

London.—Georges Carpentier knocked out Ted "Kid" Lewis in the first round of what was to have been a twenty-round bout for the lightweight championship of the world, held by Carpentier. The end came when Carpentier, in breaking from a clinch, drove a sharp right to the point of Lewis' jaw. The Englishman toppled over backward and lay motionless on the floor until the referee counted ten. Then Carpentier picked up his fallen foe and aided in carrying him to his corner.

Claim Cossack's Presence is Insult.

New York.—The American Legion and the Veterans of Foreign Wars have been asked to work for the deportation of Gen. Gregorie Semenovoff, Cossack ataman, on the ground that his presence in the country was an insult to the 15,000 American soldiers who served in Siberia during the war. The request, made by the Siberian Veterans' organization, contains a bitter denunciation of Semenovoff's action toward the American forces in Siberia.

Campus Turned into Museum.

Colorado Springs.—Colorado College students turned the campus grounds into an outdoor museum recently as a protest against President Duntaway. Palmer hall, a college building, was broken into and stuffed animals from the museum were taken and distributed over the campus. A live one was locked up in the hall throughout the night. Large signs bearing the words, "Eventually—Why Not Now?" and "Sooner or Later," were strung up, apparently referring to demands Duntaway leave.

War Minerals Bureau Established

Washington.—The bureau of mines has established a division of war minerals supply, charged with responsibility for "matters relating to the supply of strategic minerals involved in war plans of the government," the Interior Department announced today. The division will endeavor to maintain a proper balance of trade among the mineral industries of the nation and such related duties which may be assigned to it, the announcement added.

"ON EASY STREET" HAD TO STAY IN BED FOR WEEKS

Women "Farmerettes" Make Money in Western Canada.

Many Are Taking Advantage of the Opportunity Offered by the Fertile Land and Fine Climate.

In many parts of Western Canada are to be found women owning and running farms for themselves, and what is more, making them pay. May Hazlett, an English girl, who lived on a farm in the Touchwood hills, in Saskatchewan, for the past four years, looking after her stock and cultivating her land, is one of these. The farm was originally her brother's homestead, at which time Miss Hazlett was a stenographer. Her brother was killed while fighting with the Canadian forces at Vimy Ridge. Neighbors advised Miss Hazlett to sell the farm, but she decided that she was tired of the "eternal pounding" and became a farmerette.

Mrs. Mary J. Blackburn, a pioneer woman farmer of Alberta, has just added 100 acres to her farm near Hardisty. Coming from Eastern Canada, Mrs. Blackburn homesteaded a quarter section in 1902. She had two Holstein heifers, a bull, and \$17 in cash. She lived in a tent the first summer and in a sod shack in the winter. Her first crop put her, as she tells the story, "on Easy Street." In ten years she had a herd of 60 pure-bred Holstein cattle and was operating a prosperous dairy. A fine residence has supplanted the sod hut. "I milked my cows, raised my cattle, cut hay and stacked it all by myself," said Mrs. Blackburn. "I started on bare prairie with no money, and made good. I worked hard, but the experience was wonderful."

It has generally been conceded that farming is a man's job. It has long been considered that a woman's place on the farm was in the house, with a few attendant duties, looking after the chickens and the garden. But times are changing.

Demonstrative of the present feminine initiative, there are two young ladies farming extensively and with good profit too, in Western Canada. Some years ago a family located a 160-acre farm in the Oak Lake district, Manitoba. Later the father died, leaving his two daughters and aged wife a mortgaged quarter section. Instead of selling the effects and moving to town to take employment, the girls decided to work the place.

While the mother looked after the household duties the daughters did the farm work. They did the plowing, harrowing, seeding, haying, harvesting, stocking, feeding and other farm operations. Except at threshing time, the getting out of wood, the help of man was never sought. Instead of a 100-acre place, with seven horses and ten cattle, which they started with, they have a 1,120-acre farm, twenty-five head of heavy horses and nearly a hundred head of cattle, mostly pure-breds. Their farm buildings, equipment and well-kept fields would be objects of pride to the owners in any country.

Their accomplishment has not only been profitable but pleasant, and they have enjoyed every home advantage. They are two entertaining and bright girls, and have all the feminine charm of womanhood. Their manlike occupation has not given them a masculine character or appearance, as some of the older generations might imagine. Their gallant struggle for success signifies the truth in the oft-repeated maxim of Western Canada, "A little assistance and the soil, with its natural richness and God's sunshine will soon pay for the land itself."

If you wish to learn more of what Western Canada can do, write for a copy of "Canada West" which will be mailed to you free by your nearest Canadian government agent.—Advertisement.

Rookie—No.
Sergeant—Ah! Here's just the animal for you! He's never been ridden before. You can start out together.

Omaha Citizen Says He Is Now Rid of Troubles That Had Kept Him Miserable for Years.

"I was almost out of commission when I began taking Tanlac, but it has made me feel like a new man in a short time," said W. S. Meadville, 7004 North Twenty-ninth St., Omaha, Neb.

"My liver and kidneys were out of order and I had terrible pains in my back and sides and was so bad off I often had to stay in bed for two weeks at a time.

"The results I got from Tanlac were a very glad surprise to me. It benefited me in every way and I believe the improvement I received will prove lasting and I feel stronger and better than in many a day."

Tanlac is sold by all good druggists.

No Press Facilities.
"According to this authority, Meadville lived only a trifle more than eight years."

"If that's the case, how did he get the reputation of being so old?"

"I'm blest if I know. There were no newspaper reporters in those days to interview him every time he celebrated a birthday and add ten or twenty years to his age so the 'story' would be worth a front-page position."—Birmingham Age-Herald.

A Feeling of Security

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no harmful or habit-producing drugs.

Such a medicine is Dr. Kilmer's Swamp-Root, kidney, liver and bladder remedy. The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root.

It is scientifically compounded from vegetable herbs.

It is not a stimulant and is taken in teaspoonful doses.

It is not recommended for everything. It is nature's great helper in relieving and overcoming kidney, liver and bladder troubles.

A sworn statement of purity is with every bottle of Dr. Kilmer's Swamp-Root.

If you need a medicine, you should have the best. On sale at all drug stores in bottles of two sizes, medium and large. However, if you wish first to try this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Advertisement.

"Ain't it the Truth?"
"Halloo, old top!" said Bertie, genially, "did you catch that train all right last night?"

"Oh, I caught it all right," replied Jack dejectedly. "Saw the rear lights disappearing as I arrived on the platform."

"But, hang it all, you just said you caught it," corrected Bertie.

Jack sighed. "The married man who misses the last train always catches it," he said.

Cuticura for Sore Hands.
Soak hands on retiring in the hot sud of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with tissue paper. This is only one of the things Cuticura will do if Soap, Ointment and Talcum are used for all toilet purposes.—Advertisement.

The universe is wider than our views of it.

Newborn Danger in Yellow Fever

May Cross Ocean in Event of Quick Transit Between American and African Tropics.

GORGAS' WARNING RECALLED

In Former Days Time of Transit Across Atlantic Was Long Enough to Allow all Cases of Fever on Board to Kill or Cure.

Panama.—The two Portuguese aviators flying across the Atlantic from Africa to South America brings to mind a prophetic warning of the late General Gorgas. This was to the effect that when quick transportation between tropical Africa and tropical America should develop, as it eventually would, it would greatly increase the danger of the spread of yellow fever to the Eastern Hemisphere as long as the disease remained in South America, especially in Brazil.

Days of the Slave Trade.
The reason why yellow fever did not spread from America to Africa in the days of the slave trade, as malaria did spread from Africa to America then, illustrates beautifully an important difference between the two great tropical plagues, as well as gives point and pertinence to General Gorgas' warning. Yellow fever kills or cures in a very short time; malaria may linger in the system for a very long time. In former days the time of transit across the Atlantic was long enough to allow all cases of yellow fever on board a ship to die or to recover before the voyage ended. Recovery conferred immunity on the fortunate, and if a mosquito should bite them after they reached Africa they found no germs in them to transmit to others. So it required a very quick transit to get the infection across. It is not yet positively certain that yellow fever ever did cross the ocean. General Gorgas was on his way to the west coast of Africa to settle this question definitely when he died in London.

But malaria, which seems to have originated in Africa, does not confer

immunity upon those who recover from an attack. The germs may survive in the system of the sufferer for months, or even for years, in a more or less dormant state, even if acute attacks do not again develop, and these germs may infect the anopheles or malaria-carrying mosquitoes, and so enable them to infect others. In this way the African slaves brought malaria to America with them, but the slave traders did not carry back yellow fever with them to Africa—at least it is not definitely known that they did—and the long time of transit was unfavorable to any considerable transportation of the infection. It is certain that Africa has not suffered from the imported American plague of

Would Harness Heat of Kilauea

Borings in Volcano Suggested to See if It Can Be Converted Into Power.

EXPERTS SEE POSSIBILITIES

Tentative Plans for the Experiment Embrace at Least 50 Borings to Provide Thermal Map of Hot Belt of Volcano.

Honolulu.—An immediate start on experimental borings in the bed of the active volcano of Kilauea, on the island of Hawaii, to determine whether the heat of the volcano can be harnessed and converted into electrical power, was urged by Dr. T. A. Jaggar, director of the Volcano observatory, at the annual meeting of the Volcano Research association here.

Dr. Jaggar said that tentative plans for the experiment embraced at least 50 borings so located as to provide a thermal map of the hot belt

yellow fever as much as America has from the malaria imported from Africa.

Airplane May Change This.
But the airplane may easily change all this. If the Atlantic is crossed in two or three days any member of the crew of an airplane having an infection of yellow fever may easily carry the disease to where the mosquitoes are waiting to do their part on both sides of the Atlantic. Yellow fever does not reveal itself immediately after a man is bitten by an infected mosquito.

The only safety would lie in a strict quarantine at the port of arrival in Africa or Europe, the crew and passengers all being detained under watch until the period of incubation has passed. The other remedy is to clean up South America of yellow fever, as General Gorgas so strongly urged.

Gunpowder Engines.
Before 1880, when gasoline was discovered to have power possibilities, gun engines were operated by gunpowder and turpentine.

More Quality for Less Money

There never was a time when Goodyear Tires were so good as now.

They are bigger, heavier and stronger today than any earlier Goodyears ever were.

Yet Goodyear prices are lower now than ever.

Not even in those remembered days before the war did Goodyear Tires sell at such low prices as today. Look at the figures listed below.

They represent an average decrease of more than 60% from Goodyear prices of 1910.

When you can get these better Goodyears at such prices, there is no question of the tire value at your command.

Your Goodyear Service Station Dealer will tell you that never in his experience as a tire dealer has he known the equal of this value. See him today.

"ANGEL" WILL BUY A VILLAGE

Swedish Red Cross Nurse Seeks to Rehabilitate War Wrecks.

Aristocratic Girl Gathers German Refugees From Wastes of Siberia—Has Already Repatriated Thousands of War Prisoners.

Stockholm.—A refuge of rest and physical rehabilitation where the human wrecks of German war prisoners from Russia and Siberia may be treated and salvaged is being purchased by Miss Elsa Brandstrom, known throughout central Europe and Russia as "the angel of Siberia."

Miss Brandstrom is negotiating for a village in southern Germany which she proposes to turn into a human rehabilitation camp for the derelicts that once marched proudly under Hindenburg and other Teutonic military leaders against the Russians and were

captured and sent to Siberian concentration camps.

They remained in Siberia till long after the world war was over, and there are still thousands of them left, free to return home if they could. But they have neither the means nor the physical strength to do so.

Miss Brandstrom is a young Swedish Red Cross nurse, the daughter of the late Gen. Edward Brandstrom, for many years Swedish minister to Russia under the czar's regime. Leaving her comfortable home in Stockholm and the aristocratic social set in which she had been brought up, she led a small Red Cross expedition into western Siberia and has succeeded in repatriating thousands of German and Austrian war prisoners.

But she found that when the former soldiers reached their homes they were unable to assume their former places in society. They were wrecked. So she has collected a considerable fund and hopes to purchase a village

Successful Helicopter Is Built

FAULTLESS STARCH

HORSE "CEMETERY" IN EGYPT

American Expedition Has Unearthed Graves of Steeds That Once Bore Proud Royalty.

Objects unearthed at El-Kur'aw, on the Upper Nile, by the Harvard university, Museum of Fine Arts expedition shed new light on the early history of Ethiopia, the tombs of all the kings from 750 B. C. to 250 B. C. having been recovered.

It is known that King Piankhy was a great connoisseur of horses. In his account of his homelands in the Egyptian city of Eschanu he tells of his anger at finding the horses of King Namut started him as a result of the siege. Hence it is reasonably conjectured that Piankhy started a cemetery of horse graves which was found at El-Kur'aw—the only burying ground of its kind that has been discovered in the Nile valley. Here, in four rows, are the graves of the steeds of several monarchs. They have been plundered, but not so thoroughly as to prevent finding some of the trappings: a bronze carrier, a silver head band, four strings of very large bronze balls, beads, amulets and other objects.

These horses were manifestly sacrificed at the funeral of the king in order that their spirits might accompany his into the other world. The sacrifice of men and animals at funerals is now well established as an ancient Ethiopian custom by excavations in Kerma. But the sacrifice of horses was a thousand years before the beginning of the Ethiopian monarchy, and in all the royal tombs of Napata no other survival of the custom was detected.

WON FAME AS SEA FIGHTER

Scandinavian Hero Also the Center of Many Legends That Have Endured Him to Posterity.

One of the great Scandinavian heroes of modern times was Torstenfeld, who rose from the rank of naval cadet to admiral in eight years, and died at the age of thirty, and is accounted today as a naval strategist of the first order. It was Torstenfeld who, by his operations against Charles XII of Sweden, preserved the freedom of his native Norway and saved the integrity of Denmark.

All his experiences were exceedingly colorful and picturesque, so much so, indeed, that legend has been busy in providing him with an array of adventures which undoubtedly never happened. One of these is the story that, when a boy, he sat down on a grindstone to wear out the leather patches which had been put on the seat of his trousers as a punishment for tearing his clothes. Once he pursued a frigate much larger than his own until his ammunition gave out. He sent word to the enemy, inviting the commander to come aboard for a glass of wine and asking whether he would lend some powder to continue the fight. It was this sort of bravado which his age delighted in. He was killed in a duel in 1720.

Disillusionment.

Into the restaurant she came, with the air of a princess, a truly regal figure clad in brown from top to toe, and looking as if she had just visited a Parisian modiste and a beauty parlor—a perfectly groomed, handsome woman.

There was an air of refinement about her, she looked expensively turned out in the simple, deceptive way.

She seated herself at a table and there were little exclamations of admiration and envy from other diners near.

A waitress approached. Every one hushed to listen to the beautiful creature speak.

In a high-pitched voice she ordered: "Bring me an onion omelet."

It was brought and she ate it with her spoon!

Oldest Known Paint.

While lead is the very oldest light-colored paint of which anything is known. It was mentioned by the Greek general, Xenophon, who wrote some 400 years B. C. It was made by putting vinegar in a jar then some twigs to support the layers of lead above the vinegar. After the lead was placed on the twigs the jar was covered to keep out the dirt and buried in stable manure. The manure fermented, produced a gentle heat and also carbonic acid gas.

When the jar was opened after a considerable period the lead would be encased under the influence of the heat and gas. Thus a large portion of the lead would be changed into a fine white powder which would be purified and used as a pigment for paint.

"Charge of the Light Brigade."

The charge of the light cavalry at the battle of Balaklava in 1854 during the Crimean war, and celebrated in Tennyson's great poem, "The Charge of the Light Brigade," was one of the most noted military actions of modern times. It was the result of a serious blunder on the part of the British commander.

A large force of Russians, more or less disorganized by the British heavy cavalry, was attacked by the "Light Brigade" under Lord Cardigan. The Russians had reformed on their own ground, and of the 675 of the British, only 108 returned to their own lines after the failure of the charge. It was in this same action that the British infantry was first termed a "thin red line."

Preserving Homes of Famous Men.

The other day the chamber decided that the herms or cottage at Sorlingham in Provence where the great entomologist, Henri Fabre, lived and died should become national property. But the Provencans are not yet content. They now demand a like honor for M. Alström. Alström's widow still resides there as does the poet's pet sparrow, which wears a collar with the proud inscription "I am Jönsson, the dog of the poet Alström."—London Times.

REGRETTED HIS SUDDEN FAME

Bret Harte Said Not to Have Welcomed Acclaim Which Met "The Heathen Chinese."

Bret Harte once told Mark Twain, it is told in the "Autobiography of Mark Twain," in Harper's Magazine, that his (Harte's) fame was an accident—a chance. Harte said that he had written "The Heathen Chinese" for amusement, then had thrown it in the waste basket; that presently there was a call for copy to finish out the overland Monthly and let it go to press. He had nothing else, so he fished the "Chinese" out of the basket and sent that. "As we all remember," Twain says in that part of his autobiography written in 1906, "it created an explosion of delight whose reverberations reached the last confines of Christendom, and Harte's name, from being obscure to invisibility in the one week, was as notorious and as visible in the next as if it had been painted on the sky in letters of astronomical magnitude." Harte regarded this fame as a disaster, because he was actually working on such things as "The Luck of Roaring Camp" and "Tennessee's Partner."

CATTLEMEN WANT RELIEF

(By W. G. McGinnies)

We hear on all sides cries about hard times, high cost of production and low profits. In fact these howls make so much noise that the man who has a real kick coming cannot be heard. No doubt we all feel the hard times, but it is the man on the farm or the ranch who is hit the hardest.

The merchant may cry about losing money every day, and the laborer strike because he thinks he isn't getting enough money, but I will wager that none of these will change places with the farmer or cattleman.

Farm produce has shown the greatest drop of all commodities. That means that the farmer's product is worth much less in trade than it was two years ago. About two years ago sixty-five pounds of wool would pay for a good suit. Today it would take one hundred and forty pounds of wool to buy the same suit. In other words it took thirteen sheep then, and twenty-eight today to produce in a year enough wool to buy one suit. No wonder that clothing sales have fallen off. As soon as the manufacturer learns that they cannot buy wool at thirty-five cents a pound and sell it in a suit at fifteen dollars a pound so much sooner will he be headed for prosperity.

A local cattleman unburdened his mind to me recently of the following:

"The cowman has no chance today but is going more deeply into debt each year. We sit here eating steak at \$1.80 a pound, while local feeders are lucky to get 7 cents for it on the hoof. Why this big difference. Are the prices of beef too high or the prices of cattle too low? Figure it out for yourself. A cowman has 400 head of cows. He gets a fifty per cent calf crop and saves all his calves to build up his herd and to replace old cows which he cannot sell for more than the cost of marketing. Supposing this man has one hundred yearling steers to sell, then his expense sheet might look something like this: Interest on borrowed money (10%) 20 steers, grazing fees on National Forest, 16 steers; interest on his own investment (5%) 10 steers; wages for one man, 24 steers; taxes on stock and equipment, 4 steers; groceries and clothes for himself and wife, 18 steers; repairs, 5 steers, a total of 79 steers.

"The list includes only the necessities. Out of the money allowed for interest on his own investment and the balance he must buy pure bred bulls, saddle stock, vaccine, and pay for the improvements such as new fences and wells, and a thousand other incidentals of the cattle business. How can the banks expect the cattleman to pay up their notes at this rate.

"I don't know whether the price of meat is too high, but I can assure that the price of steers is too damn low.

"It takes the cows a year to produce the price of a pair of boots. It takes eight cows a year to produce the price of a saddle. And yet it does not pay to skin a cutter. You cannot expect a steer to live on a blade of grass a day, nor can you expect a rancher to buy large quantities of high priced goods with low priced beef. If the periodicals would give less space to improvement of stock and more to improvement of markets the former could take care of itself. Improvement cannot take place as long as a man gets deeper into debt every day."

If we expect relief from the present conditions we must first relieve the producers of raw materials for he is the ultimate consumer of a large part of our manufactured goods. We cannot expect to buy an article from him for five dollars, increase its value one dollar and expect him to pay ten dollars to get it back.

NATURE DENIED SNAIL BRAIN

Only Thinking Apparatus Creature Can Boast of Consists of a Few Nerve Cells.

Just 20,000 small shells will buy a wife in Africa if a man is in a hurry and not too particular, but to get a really good one requires about 90,000 shells, according to Harold L. Madison, curator of the Cleveland Museum of Natural History. The African uses the eggs of the snail for food, but saves the shells with which to buy his wife. Money cowries, a name given to certain kinds of shells, were used as a medium of exchange in India and other Far East countries as early as 700 A. D.

White coral and other shell animals, after being subjected to enormous pressure and tense heat, when buried in the earth, ultimately are turned into marble which is used to build the finest palaces of man.

Snails appear to walk on their stomachs, but they have a soft foot by which they move. In some types it is shaped like a hatchet. One group of shell animals walks on its head. The chambered nautilus is the most beautiful of this type. Its eyes are under its arms, and its mouth is on top of its head.

A snail has a heart, all right, and eyes, but he will never die from concussion of the brain, for his only thinking apparatus is a few nerve cells. He lives to be about eight years old, but he has the ability to live four years without eating anything. This has been proved several times. In 1846 a professor in a British museum was examining some snails which had been stuck on cardboard for four years. He noticed that one looked to be alive, and after he placed it in warm water the animal was soon feeding on cabbage leaves and in a short time became active as a normal snail.

Why a "Jumper?"

The word was originally a "jump," and is first met in 1615, as a "jacket or loose coat reaching to the thighs."

The dainty feminine garment of today owes its parentage to the shapely garment of coarse sackcloth sometimes worn by coal heavers or dock laborers! For this was the original "jumper," essentially a male garment of the most primitive type. Indeed, one Polar expedition revealed that it found the Eskimos wearing these "jumps" or loose jackets.

In the seventeen hundreds "jumps" became feminine, in the form of a kind of loose stays, chiefly worn as a sort of undress.

Then, in the eighteen hundreds, the admirably took notice of the word and a "jumper." It is chiefly mentioned as one of the new "rigs" of the lower deck.

From this curious ancestry has evolved the jumper of the girls of today!

FORTUNES IN OIL! The Big, Quick Fortunes in Oil are always made from the discovery of new oil fields! Time and time again, people who have invested small sums in Texas, drilling new territory, HAVE MADE FORTUNES WHEN OIL CAME IN. When the Discovery well came in at Barkburnett \$100 jumped to \$20,000! \$1,000 invested with Pattillo Higgins at Beaumont brought \$43,000! HIGGINS DISCOVERS A NEW FIELD Pattillo Higgins, who discovered the Beaumont, Humble and Goose Creek Oil Fields—that brought Millions to poor people over night—has discovered a new Oil Field—Barbers Hill! He got on the ground early and secured acreage of enormous value in a field that promises to be one of the greatest in the world! He NOW OFFERS A LIMITED NUMBER CHANCE TO COME IN WITH HIM—TO JOIN AT THE START ON A STARTER'S BASIS. HIGGINS' GREAT RECORD! Made \$250,000 on Pattillo Higgins "Where Poor Men Got Rich Overnight" PATILLO HIGGINS, OIL WIZARD Vice-President of S. P. R. R. Endorses Pattillo Higgins SOUTHERN PACIFIC RAILROAD CO. Office of Vice President Houston, Texas, August 1919, 1921. THIS IS TO CERTIFY, that we, the undersigned citizens of Beaumont, Texas, are personally acquainted with Pattillo Higgins of this city; we have known him for many years, and believe him to be perfectly reliable and trustworthy. He is a native of Beaumont, Texas. We know within our personal knowledge that Mr. Higgins discovered the Beaumont Oil Field in the year 1892, and he said when the field was developed that it would be worth millions of dollars. He said that single wells would flow thousands of barrels of oil per day. He located the exact spot where all the big gushers are now found. Mr. Higgins deserves the whole honor of discovering and developing the Beaumont Oil Field. Real Estate and Insurance Capitalist Sec. of C. Printer Jeweler Mgr. Beaumont Life Co. Sec. Beaumont Life Co. First Texas Field Discovered by Pattillo Higgins, 1891. A Higgins Well that Paid 33 for 1. YOUR BIG CHANCE! A Deep Well has already been brought in at Barbers Hill. The big companies are operating there. You have an Opportunity now of a lifetime—a Chance to get in on the ground floor and get in on what looks like the NEXT BIGGEST OIL FIELD EVER DISCOVERED IN TEXAS! BACK A WINNER! Higgins is a Winner—IS WINNING NOW! If you do go into Oil, BACK A WINNER! A FIVE TIMES WINNER IN A PROVEN GUSHER FIELD IS A GOOD COMBINATION TO PLAY! GET IN AS A STARTER! The Higgins-Mexia Oil Co. has just been organized with Pattillo Higgins in charge of Field Operations. He has selected acreage of great value near the Discovery Well at Barbers Hill. TO MAKE THE BIG MONEY IN OIL, INVEST BEFORE A STRIKE IS MADE—NOT AFTER. YOU'VE GOT A CHANCE HERE TO GET IN WITH PATILLO HIGGINS, WHO HAS DISCOVERED FIVE GREAT OIL FIELDS, AS A STARTER, ON A STARTER'S BASIS! INFORMATION COUPON Pattillo Higgins, 705 Turnbow Bldg., Houston, Texas Without obligation on my part, send details of your Bonus offer to Starters. NAME P. O. R. F. D. (or St.) STATE
