NO. 21

PERSONAL AND SOCIAL

Immigration Inspector A. Steinborn was joined here by his family Monday from El Paso, where Mr. Steinborn was stationed prior to being transferred to Patagonia.

Mrs. Tom Fraier and daughter, Elsie were Patagonia visitors Sunday from Ray, Ariz.

James M. Little and family of Duquesne were Patagonia visitors Thursday.

George Elliott was in town Saturday from the Dixie mine. He reports a good strike of lead-silver ore in the mine.

Pete Etchells, who is driving a tunnel on the A. F. Gross property in the Santa Rita, announced that he unexpectedly encountered a large body of milling ore. He did not expect to get into an ore body until much more work had been done.

Charles E. May was a county seat visitor Wednesday.

J. J. Farley has taken a contract to do the assessment work on the Humboldt group of claims, which are owned by the Washington Trading Company of Patagonia.

Mr. and Mrs. Walter Woodman were Nogales visitors Monday, when Mr. Woodman consulted a doctor regarding his stomach, which has been causing him much suffering.

One car of ore was shipped this week from the Salero camp to El Paso.

Mrs. Herman Bender, was operated on in a Nogales hospital last week, is getting on nicely.

Jose Corvel and Candido are out on bail following their arrest last week by Customs Inspector G. L. Stevens and Immigration Inspector A. Steinborn with a quantity of smuggled liquor.

M. A. Hogan and Carl Scheler, who are operating a lease on the World's Fair mine, are preparing to make a shipment of ore to El Paso.

Black Jack Garden of Salero was in town Tuesday. He has taken a lease on the Eureka mine.

Lou Quinn, immigration inspector stationed at Ubat, was a Patagonia visitor over the week-end.

Grover Marsteller and Joe McIntyre of the First National Bank of Nogales were Monday business visitors in Patagonia.

Dorothy May Parker, eldest daughter of Mr. and Mrs. Jim Parker, has recovered from a severe attack of chickenpox, which kept her from school for several days.

Born, Monday, April 26, at St. Joseph's hospital, Nogales, to Sheriff and Mrs. H. J. Brown, a 7-pound son. Mother and child are doing nicely.

The Flux mine shipped a 50-ton car of lead ore this week to El Paso. This makes the third car of ore from the Flux to be shipped during the month of April, all of which were 50-ton shipments.

Will Farrell of Alhambra was a Patagonia visitor Wednesday.

J. J. Peterson of the Big Jim mine was in town Thursday evening. He says the work at the mine is progressing satisfactorily, and that after cleaning out the old workings he met with a pleasant surprise on finding more and better ore in sight than he had anticipated. The general manager of the company, Mr. George Keating, is expected to arrive soon from Los Angeles, when definite arrangements will be made for the mine's future operation.

Mrs. Charles Blabon was a Nogales visitor Tuesday.

Mrs. E. D. Farley and son, Richard McCormick, were county seat visitors Tuesday.

Mike Long and Dave Dowd of Harshaw were Nogales visitors Monday on business.

Mr. and Mrs. R. C. Beam, and Mr. and Mrs. W. H. Watkins of Nogales were Sunday dinner guests at the Commercial hotel.

Mr. and Mrs. Tom Fraizer and Mr. and Mrs. N. A. McMillen of Ray, Ariz., were guests at the Commercial hotel Sunday.

Mr. and Mrs. P. M. Etchells of Mansfield spent the week-end in Patagonia.

Norman Wright of Salero was a business visitor Monday to Bisbee.

Mrs. Alice Mitchell, daughter of Mr. and Mrs. William Wilson left Monday for Warren, Ariz., accompanied by her sister, Hazel Wilson.

Mr. and Mrs. R. C. Blabon were Tucson visitors Sunday, where Mrs. Blabon went to consult a physician regarding a suspected attack of appendicitis.

Mrs. E. H. Evans, who has been on the sick list for some time, is slowly recovering.

Many inquiries have been received concerning the condition of Miss Grace Van Osadale, who is in Tucson under the care of Dr. Yates, who is treating her for a severe attack of gastritis. Miss Van Osadale is getting on nicely and her many friends may be able to welcome her home in the near future.

Mark Boosinger of Elgin was a Patagonia visitor Sunday.

Art Peck and John Farrell of Nogales were Patagonia visitors Tuesday.

State Game Warden G. M. Willard and his chief deputy were Patagonia visitors Tuesday, accompanied by Robin Montgomery, formerly of Patagonia.

Mr. and Mrs. George Armer and children of Tucson motored to Patagonia last Friday evening and returned to the Old Pueblo Sunday afternoon.

Joseph Sloan of Los Angeles was a business visitor in Patagonia Wednesday.

Mrs. Fred McKee of Washington, D. C., chaperoned a party of young folk from Tucson over the week-end in Patagonia. They were the Misses Amo and Louise McKee, Margaret Duffield, Messrs. Rudy Sheldon, Richard Summers, George Smith and Edward J. Kubat. They report having had an enjoyable time here.

Mr. and Mrs. Frank Powers of the World's Fair mine returned Sunday from a week's vacation in Tucson.

Mr. and Mrs. C. A. Pierce were Nogales visitors Sunday.

Mr. and Mrs. E. E. Bethell motored to Nogales on business Monday.

ELKS, NOTICE

Don't forget the May 1st dance and entertainment at Elks' Club Rooms for Elks and their families. Your card is your invitation.

ENTERTAINMENT COMMITTEE.

CARD OF THANKS

We wish to express our gratitude to the kind friends and neighbors who rendered their services during the long illness and ultimate death of our mother, Mrs. Mary Keaton.

MR. AND MRS. R. N. KEATON.

Miss Bailey Visits Santa Cruz County

Miss Lura Lee Bailey, assistant supervisor of trades and industry of the state department of education, paid a visit during her three-day stay in the county this week to nearly every rural school in the county, as well as the city schools of Nogales. Miss Bailey was well pleased with the work of the scholars and praised the teachers for the results obtained in their respective schools.

She was accompanied on her tour of the county by County Superintendent of Schools, Mrs. Grace A. Farrell.

Radio the Greatest Educator In Music—says Famous Singer

By MARY ELLIS

New York.—As an artist I do not fear the enervating effects of radio, for I see in radio the greatest educator of musical taste that the world has ever known. This is a recent conviction.

In every operatic or theatrical performance there is a moment of suspense, of crisis, and when it is past, everyone breathes more easily. The group upon the stage, by voice and action, sends out to the audience a plea for approval, for enthusiasm. There is a moment of suspense. Then the responsive roar of approval fires the artist to heights of achievement, forgetting all self in his performance.

I had always considered this splendid response necessary to inspired singing. I have wondered how an artist, singing over the radio, could achieve it. And I have learned a curious thing. It is that there is a very real and thrilling telepathic communication between the audience and the singer and this is independent of sound or movement on the part of the audience. If the audience sits still, without applause or gesture, but brimming with approval, the artist, I am convinced, would still feel the vast and sympathetic response. It is this telepathic response that the artist gets in singing over the radio. What I had at first thought of as a cold, mechanical performance, I realize now is accompanied strangely by a real and close sympathy between the singer and his unseen audience.

Never has this spiritual reaction to radio music impressed me so as on last New Year's night when John McCormack and Lucezia Bori broadcast their beautiful singing to the entire country. I was about to go on in "Rose Marie" and was sitting in my dressing room in front of my loud speaker which truly justifies its name: the Music Master. The singing began. I sensed the joy of the

Miss Mary Ellis, formerly soprano of the Metropolitan Opera Company, and now star of "Rose Marie," who calls radio the greatest educator of musical taste.

listening millions, and in the artists' voices heard their splendid, sweet response.

The conviction, overwhelmed me that radio is the surest means to stimulate and improve the musical taste of America. The vast audience reached, the perfection of the apparatus itself, especially of the loud speaker which flooded my room with melody, soft, unimpeded, as if I had been in the room with the singers, thrilled me with the certainty that in radio lies the greatest boon to the music lovers and artists of the nation. Educate the national taste in music by means of radio. You will then have at the opera, and light operas, larger audiences of those who really love music and really appreciate the whole, connected and colorful performance which radio cannot give.

CANILLE NEWS

The bi-gbarn dance held last Saturday night at the M. W. Eason ranch under the management of Miss Ola Elliott was one of the best ever given in the county. Nearly 200 dancers "did their stuff" to the music of Lafayette's excellent orchestra from Fort Huachuca. An appetizing luncheon of sandwiches, cake and coffee was served at midnight. As usual, the behavior of the crowd was excellent, car owners being protected by a police patrol under systematic parking arrangements. Watch for the next advertised notice of another big time at the Eason ranch.

William Muir, formerly of Canille, will be the guest of honor at a banquet and dance at Fort Huachuca on May 9. Mr. Muir, a very popular man of this section, retires after 30 years' service in the pack train division, and a big time is expected. He public is invited. No charge.

Bisbee, Douglas, Nogales, Tombstone, Phoenix, Patagonia and Fort Huachuca were well represented at the big barn dance Saturday night.

William Bower and son, Charles, left last week for California, where they have secured positions.

M. W. Eason leaves for New York this week, having accepted a position in the big city.

Mrs. George Januel of Nogales is visiting at the home of Mr. and Mrs. James L. Finley. Mrs. Januel will leave today for New York City, where she will spend the summer.

Mrs. V. Musgrave of Buenos Ayres, Argentine, is visiting Mrs. W. A. Parker. Mr. and Mrs. Ray of Phoenix are also guests of this popular hostess.

Mrs. William Bower and Miss Maloney spent Sunday in Nogales.

Pay no attention to the propaganda broadcast by certain interests that the M. W. Eason barn is not safe to dance in. Here isn't a stronger barn in the state, a steel foundation holding the building is of concrete set 3 1/2 feet into the ground; the timbers in its construction are 8x8. It is guaranteed to support 35 tons and will pass inspection for strength in any city. It has held crowds of 250 persons several times.

Justice Stone says the unfaithful prohibition officer ought to be smitten hip and thigh, and we guess in a great many cases the hip is a particularly vital spot.—Ohio State Journal.

An economist announces that the number of women bread-winners is growing constantly. No doubt there are more winning it than taking it.—Detroit Free Press.

Most backsliders don't have far to slide.

VAUGHN NEWS

The Little Adobe Church on the Hill. The dedication services and community dinner at the Little Adobe Church on the Hill, at Vaughn, was attended by a large crowd, several auto loads of people coming from Tucson for the occasion. The noon dinner was a credit to the ladies of the community and was thoroughly enjoyed. Geo. C. Sleeth preached the dedication sermon, which was listened to with profit by his audience. On May 3 Mr. Sleeth will preach his last sermon before going east for the summer months. A Sunday school will be organized on that day and all parents interested in Sunday school work are invited to be present. Mr. Snyder, superintendent of one of the largest Sunday schools in Tucson, will be present to assist in the work of organization.

Stanley Stoddard is working on the state highway between Patagonia and Nogales.

Chandler Harrison of Bisbee is visiting friends at Vaughn.

Mrs. Stone Collie of Tucson is visiting her sister, Mrs. W. H. Collie.

Miss Cora Gardner expects to go to Bisbee soon, where she will undergo an operation for appendicitis. We all wish her a speedy recovery.

S. T. Harrison is going to Phoenix early next week to work his trade.

Jim Fraizer, who is doing repair work at the San Rafael ranch of the Greene Cattle Co., spent the week-end with his family at Sleepy Hollow ranch.

Leo Hunter of Canille was a visitor this week at the ranch of Henry Wood.

Mrs. W. H. Anderson is entertaining some Tucson friends this week.

Mr. and Mrs. Frank Jolly have returned from their visit to Ventura, Calif., where they were they had been in bad health for some time. Mr. Jolly is enthusiastic over the oil industry in the neighborhood of Ventura, where some large producers are being brought in. The Jollys are glad to be home again.

Preaching Wednesday Night

There will be preaching Wednesday night, May 6, at 8 o'clock, at the Patagonia schoolhouse. Every one is cordially invited to be present.

Nowadays a young lady must pretend not to know anything. Some of 'em don't have to pretend.

No man's land: Most any barber shop these days.

Bowie—Local oil well to be drilled to 4000-foot depth.

BORDER WOLVES CROSS FROM MEXICO TO UNITED STATES

Wolves crossing the international boundary from Canada and Mexico into the United States present an international problem that will be difficult to solve, according to the U. S. biological survey. Big wolves have been reduced to a relatively small number over much of the west. Since 1915, more than 5400 of them are known to have been killed, in addition to many which have been poisoned and not found. There are still considerable numbers of these destructive animals in northern Mexico and some in Canada, and they will undoubtedly continue to invade the United States for a long time to come. For example, of the 22 wolves killed in Arizona during the past year, 17 had recently crossed the border from Mexico. Of 39 wolves killed in New Mexico, 19 were taken by one hunter close to the Mexican border. This hunter, after returning to the locality that had been previously cleared of wolves, in two days found 14 calves killed and 21 mutilated by wolves which had crossed the border.

Some cooperation has already been obtained from American ranchmen in Mexico. They have worked with the leaders of predatory animal work in border states, and report having taken 70 wolves during the last two years. But, as is the case with all animal pests, from wolves down to rats and insects, a clean house of one's own avails little unless the neighbors clean house too. The success that has attended both predatory and rodent control work is largely due to close community and county cooperation, and further cooperation of this kind will be necessary in order to combat these border marauders in a satisfactory way.

LOCAL FIREMEN'S BALL JUNE 6

The local volunteer fire department held a meeting Monday night, when arrangements were made to hold a big dance on June 6. This dance will be the social event of the season in Patagonia, and arrangements will be made to entertain a large crowd. Pettier's five-piece orchestra will furnish the music, which means good time, with plenty of jazz.

A good lunch will also be served during the evening. The proceeds of the dance will go into the firemen's fund, which needs swelling in order to keep the chemical apparatus well supplied with acids to be used in extinguishing fires.

Don't make a date for the evening of June 6 unless it is a date to take your family, sweetheart or somebody else's sweetheart to the big dance at Patagonia on that date.

STUDY OF SCREW-WORM YIELDS PROMISING DISCOVERIES

Investigations bearing on the control of the screw worm, an important pest of livestock in the southwest, have been carried on for some time past by the U. S. department of agriculture and the Texas experiment station. The discovery that benzol is admirably adapted for the destruction of the larvae in wounds has been a distinct forward step. The use of this larvicide is now being adopted by many stock raisers with better effects on the animal tissue, and uniformly high killing power against the maggots, and at a cost far below chloroform or other good larvicides.

Satisfactory progress has been made in the study of repellents for application to animals. The pine-tar oil-furfural mixture is meeting the needs of stockmen in this direction, but it is hoped to develop something which will be more healing to wounds and even more lasting as a fly repellent. Chloroform in low dilution in mineral oil, which was first tested this year, is a very promising repellent dressing.

MISTAKES—DIFFERENT VALUES

When the plumber makes a mistake he charges for it.

When a lawyer makes a mistake it is just what he wanted, because he has a chance to try the case all over again.

When a carpenter makes a mistake it's just what he expected.

When a doctor makes a mistake he buries it.

When a judge makes a mistake it becomes the law of the land.

When a preacher makes a mistake nobody knows the difference.

But when a printer makes a mistake—Good night!—Inland Printer.

SMOKERS AND CAMPERS CHIEF CAUSE OF FIRES

Albuquerque, N. M., April 30.—In 1924, smokers and campers caused more fires in Arizona and New Mexico than from all other human agencies. "Of these two causes," states District Forester F. C. W. Pooler, "the smoker is the chief offender." He carelessly drops a burning match or unextinguished cigarette stub along the roadside without a thought of the damage he may cause.

Recently at one of the forest service fire training camps, an experiment with a burning match was conducted. Although the fire season was still a month away and none of the forests had put on their fire guards, seven matches out of 10 continued to burn after they were dropped by the roadside in the pine needles and litter. Were it not for the presence of the forest officers, these matches would have started fires, even though the forest floor was still damp. If a burning match will start a fire under such conditions, what would it do after the summer winds and hot sun has dried the forest litter until they are like tinder? "There is only one safe method," declares Mr. Pooler, "that is to be always on the safe side—put your match out."

Few people, unfamiliar with forest fires, realize how easily a forest fire can start or how rapidly it spreads. In 1924, although only 12 per cent of the fires occurring in Arizona and New Mexico burned over 10 acres in extent, this 12 per cent did 90 per cent of the damage to the forests. To keep the "red enemy" out of the forest, public cooperation must be enlisted. Because of the size of the average ranger district—about 150,000 acres—it is impossible for the ranger and his fire guards to keep down the damage done by forest fires, if there are dozens of matches, cigarette or camp fires occurring daily. It is a rare case, thinks Mr. Pooler, where a camper or smoker is purposely or inadvertently careless. Most of these fires occur either through ignorance of how easily a fire will start or through the failure to extinguish a campfire. The only safe rule is to pinch out your cigarette, break your match, and build your campfire in the open, clear away all litter around it and bury it when you leave. Only those who do this are safe forest citizens.

GOVERNOR'S SECRETARY AND HIGHWAY MAN IN TROUBLE

Nogales, April 28.—M. P. Cosby, federal prohibition agent, tonight took possession of the automobile belonging to George Eberle, purchasing agent of the Arizona highway department, who was detained here Sunday after he had been stopped while speeding and who, Cosby said, had a quantity of liquor in his car. Cosby said he would ask for warrants in the morning charging Eberle and H. S. McCluskey, private secretary to Governor Geo. W. P. Hunt, with possession and transportation of liquor. McCluskey was a passenger in Eberle's car at the time it was stopped.

"I was sent here by Frank Pool, federal prohibition agent for Arizona, to investigate the case," Cosby said. "My instructions were to show no favoritism and if there was liquor in the car to ask for warrants. W. A. O'Connor, U. S. commissioner, was not in the city and I will ask the warrants of Justice of the Peace Charles E. Ardy of Santa Cruz county, instead."

Cosby said he had orders to send the seized car to Tucson.

SCHOOL EXHIBIT NEXT WEEK

The rural schools of Santa Cruz county will exhibit products of their scholars next week, May 4 to 9, in the old Piggy Wiggly store room on Grand avenue, Nogales. The exhibit will be open to the public and all persons interested in the welfare of the public school system of the county are invited and requested to come in and view the display.

A teachers' institute and demonstration classes by teachers will be held on Friday, May 8.

There will be an examination for state university scholarships at the High school building, Nogales, May 16. Those wishing to compete and are eligible are requested to be present.

Mineral Park—Rapid progress being made on development of White Horse mine.

BUSINESS CONDITIONS IN 12TH FEDERAL RESERVE DISTRICT

(By John Perrin, chairman of the board and federal reserve agent, Federal reserve bank of San Francisco, April 20, 1925.)

The high level of general business activity reached in this district during February was not maintained during March, a smaller than seasonal increase in trade being observed in the latter month. Growth in volume of trade from March, 1924, to March, 1925, is estimated to have been slightly less than the normal annual increase incident to growth in population and trading importance of the district. Industrial activity increased seasonally during March, but continued at lower levels than one year ago. The total volume of credit extended by reporting member banks of the district increased moderately during the month, as did borrowings from the Federal Reserve bank. Interest rates were unchanged.

The volume of payments by check (bank debits) in 21 principal cities of the district, an index of general business activity, increased by 10.7 per cent during March as compared with February, a smaller than seasonal increase. This bank's index of bank debits, adjusted for seasonal variations, stood at 138 in March, 1925, 149 in February, 1925, and 135 in March, 1924 (1919 monthly average equals 100).

Employment statistics for California and Oregon and non-statistical data for other states of the district reflect seasonal increases in demand for workers during March. In most trades and industries the volume of employment continued smaller than a year ago. In most trades and industries the volume of employment continued smaller than a year ago. Value of building permits issued in 20 cities of the district during March, 1925, was 2.2 per cent greater than in March, 1924, and 23.2 per cent greater than in February, 1925. The latter increase was smaller than that which usually occurs at this season of the year. Building costs, including labor and materials, are estimated to be about 2.4 per cent less than a year ago. Lumber mills of the district cut, sold, and shipped more lumber during March than during February, 1925, the increases being largely seasonal. Production an shipments were smaller by 2 and 4.1 per cent, respectively, than a year ago. Sales were 7.8 per cent larger than in March, 1924, and exceeded current production by 5 per cent. Further moderate declines in production of important mineral products of the district were reported, but output continued larger than in the corresponding month of 1924.

Daily average production of petroleum in California, at 60,839 barrels during March, was less by 1655 barrels than in February, continuing the decline in output which has been in progress since September, 1923, when the record production figure of 855,750 barrels per day were reported. Consumption of petroleum declined during the month, continuing less than production, and stored stocks in California increased 1.6 per cent to a new high point of 102,985,323 barrels on March 31, 1925.

Flour production of reporting mills in this district declined 14.8 per cent from February to March, 1925, and in the latter month was 21 per cent smaller in volume than in March, 1924, and 24.3 per cent less than the five-year average for March. Stocks of wheat held by millers on March 31 of this year were 22.3 per cent smaller, and stocks of flour were 6.7 per cent larger than the five-year average for that date.

Trade at retail, as indicated by sales of 23 department stores in six cities, increased by 26.1 per cent during March as compared with February. The increase was slightly less than normal according to this bank's index of department store sales, adjusted for seasonal variations, which declined from 150 in February to 149 in March (1919 monthly average equals 100). In March, 1924, the index stood at 138. It is probable that sales during March, 1925, included a greater proportion of Easter business than did sales in March, 1924, inasmuch as Easter Sunday came on April 12 in 1925, and April 28 in 1924. Improvement in the wholesale trade situation in this district was revealed by March reports of sales of 191 wholesale firms engaged in 11 lines of business. Total value of sales of these firms was 1.8 per cent greater than in March, 1924, whereas corresponding figures for February, 1925, were 8.4

CHAPTER XIV

The Best Laid Plans

Father McGrath had insisted that Lee should remain as a guest at the mission during the two following days, and he insisted on supplying him with an outfit of clothing. He asked their plans and Lee told him.

"The best thing in the world," he said, "ye'll be safe at the house, and dinnah ha' any fear of those de'il's agents at Siston lake, for they'll ken all about the pair of ye long syne, and they darena interfere wi' ye the noo. But dinnah prolong your honeymoon too long, for ye must be out o' the range before the heavy snows begin."

Lee and Father McGrath had a long talk together that night. Lee told him the whole story of his encounter with Joyce in the range, the dynamiting, and his pursuit of the band at Siston lake and rescue of the girl, culminating with their flight into the forest and Joyce's loss of memory.

At first the father listened and interrupted, and kept giving vent to exclamations of amazement and indignation; but as Lee went on with his story he fell into silence, puffing at his pipe beside the stove and looking at Lee intently.

"Tis amazing!" he said, when Lee had ended. "I canna understand it. For, look you, Anderson, it isna as if this was a country o' savages, whaur a base man could do what he pleased. Tis true they seek their feithful hooch, but that's deifferent fra' kidnapping women and attempting murder. There's something at the back o' this that we havena hit upon."

Next morning Lee slept late—so late that it was the recitations of the school children across the open space that aroused him. From his bed he could hear Joyce's voice directing them, and he smiled happily at the thought of her. The morning was his marriage day. The evening of the morning they would be together in their log house, shut off from all the world.

It was a renaissance of youth, this tender joy that filled him. He dressed and strolled across the interval to the schoolhouse.

That was the happiest day of his life. Joyce, at his mandate, agreed to a half holiday, and all that afternoon they strolled through the snow-bound woods, their arms about each other, planning their life together. Lee came more and more to see that to Joyce happiness consisted of the wilderness. She would wilt in a city. She had endured the period of her medical training only as a preliminary to returning into the wilds.

They decided that they would make their homes there, Lee resigning from the police the following spring. They would take up work under Father McGrath, enlarge the log house, create a garden; in time to come settlers would flock in, the whisky traffic would go—they dreamed for hours until the advent of night sent them homeward.

Next afternoon an old Indian and his wife were requisitioned for witnesses; and in the little schoolroom, in the presence of the entire population of the settlement, which consisted of the children, two half-grown girls, and a young boy, with an aged squaw or two—all legacies of the great small-pox epidemic of four years before which had decimated the region—Father McGrath performed the simple ceremony that united them, taking the gold ring from his own finger, and handing it to Lee who put it on his bride's.

And Lee, looking at Joyce with a new wonder that was almost fear, discovered the purpose that had sent him into the range.

It was for this, and this alone, that he might find not only his love, but that comrade of his heart's desire whom he had sought all the days of his life.

And in Joyce's confused and blushing face, in her eyes as she raised them shyly toward his own, he read their mutual happiness.

With Joyce's arm drawn shyly through his own, and his shoulders aching from Father McGrath's hand-clasp, he left the schoolhouse. Outside, the horse stood harnessed to the sleigh, which was loaded with the supplies. Lee handed Joyce inside and followed her. Father McGrath took the box seat of the big sleigh, which had originally functioned in the streets of some provincial city. Father McGrath had driven it to his destination by a detour round the range, with all his worldly goods packed inside it.

The journey was a slow one, the horse slipping on the frozen snow and plunging through the crusts that had formed over the surface. It was even colder than before, and there seemed no doubt that winter had set in at

last. All were glad when the log house came into view.

Father McGrath got down, flapping his arms. Lee helped Joyce out. They set down the supplies.

"I'll help you in w' these goods," said the priest, "but I wilna come inside. And dinnah ye be coming back to me, Mrs. Anderson."—Joyce looked adorably confused at the address—"and tell me tales about your husband, because all the men here alike, as ye ha' yet to learn, and ye're in the trap o' matrimony noo, the pair o' ye—tied fast, and there's naething this side o' deith can unfasten the knot for ye."

"Guld-bye and guld luck to ye," he added, extending a hand to each.

But in the middle of that hand-clasp he stood still, listening. His face grew grim. Lee listened too. And at first he heard only the night wind stirring among the trees; then something more ominous, yet very faint, coming out of the distance.

It died away. The two men watched each other's faces with a surmise that did not find vent in utterance. Perhaps it had been—the wind, the waves lapping the shore—but now it came again, louder and unmistakable. Lee dared not raise his eyes to meet Joyce's questioning gaze, lest she should discern the sudden fear.

For it was the put-putting of Rathway's motorboat.

The three might have been figures of stone as they stood there, listening to the sound of the engine, which grew rapidly louder. None of the three uttered a word.

Then the boat came into view, nearing the bank. It contained four men. One of them was Rathway. And even though Joyce was his inseparably, Lee waited for the sensation of an icy hand clutching his heart.

Father McGrath spoke. "Tis Rathway, and I doot not but he's some de'il's wurk afoot. But haud steady, Anderson. He wilna dare—he wilna dare—"

His voice trailed off into silence. The engine of the motorboat had been shut off. Rathway and his men had stepped out. They were ashore, they were coming up from the river toward the house, Rathway a little in the lead of the others. With his hunched shoulders and his great muscular strength, his look of malignant, mocking ferocity, he seemed the nearest thing that Lee had known to incarnate evil.

His face, as he drew near the group, was twisted in a wry, triumphant smile. He looked mockingly at Lee. He looked ironically at Father McGrath. But there was possession anticipated in the look he cast at Joyce, and Lee drew the girl to his side, his arms about her, standing a little in front of her to protect her from the sight of Rathway.

Father McGrath stepped forward. "Ye ha' na business here w' my friends, James Rathway!" he cried. "Ye ken verra weel the agreement we've entered into. So ye can take yersel' and your de'il's crew awa'!"

"Aye!" sneered Rathway, regarding the priest with ironic banter. "But I have followed you and this party here because you were not at the mission. It's not my plan to stay."

"What do you want?" McGrath demanded.

"My wife," Rathway returned, stretching out his hand to place it on Joyce's shoulder.

With a loud cry Joyce leaped back, staring about her as if she did not know where she was. Lee let his clenched fist fall. The situation was too big for physical retort.

"Ay, my wife, Father McGrath," Rathway said again. "Married to me two years ago in Montreal. And there's the certificate."

He held out a document.

Father McGrath's first words before looking at it were characteristic: "Tis the first time I've heard o' the mon and na the wumman keepin' the marriage lines, James Rathway."

Lee was holding Joyce, who swayed in his arms. "What does he mean?" he kept repeating. "It's some trick. Tell them it's a trick, Joyce!"

But Joyce seemed neither to hear nor to understand anything. Meanwhile Father McGrath, who had been examining the paper, handed it back with an ironical bow.

"Mees Pelly that was, wifed in the bonds of holy matrimony w' Meestair Anderson here these three hours syne," he said. "I'd tak her wurd against your own and ca' that a forgery."

But the priest's face shone deathly white in the moonlight. "Aye?" sneered Rathway, pointing a long finger at Joyce. "Let her deny it if she dare!"

Joyce said not a word. She lay in Lee's arms as if she had been mortally stricken. A deadly fear began to creep over Lee, over McGrath. Behind

Rathway Shorty and Pierre and a third man grinned and shifted uneasily.

"And that's a lee, anyhow," said Father McGrath scornfully.

Rathway bowed, sneeringly, in turn. "Permit me to go on, Father; believe or disbelieve, it makes no difference. He sent his girl away to school to Montreal. Soon after, it was discovered that Pelly was wanted for an old murder—"

"Lee Number Two," said the priest. "Twas you betrayed him—I ha' nae doots o' that."

"He fled the country," pursued Rathway, unflinching. "As his only friend, fearing that his daughter might come to harm in Montreal, I went down there, saw her, and offered to make her my wife. She consented with alacrity—"

"Oo, aye, and we'll just cut out the alacrity," said Father McGrath in abysmal disgust, "because she didna, and if she did, it'll become you to say so."

"She married me at the Church of the Virgin, as this certificate proves. And it was agreed that she should continue her mission studies for a certain period before coming to live with me as my wife. I proposed to build a comfortable home for her at Siston lake and go into the fur business—"

"Fur?" shouted McGrath. "The only fur you've ever traded in is what ye've put on the tongues and stomachs of your victims, ye cheap poison-peddlin' hooch-hound!"

Rathway went on as if he had not heard the insult: "Last month, when she had completed her course, she started north to meet me. As I was away on a business trip, I detailed two of my men to escort her from Little Falls. They met her. This man was with her, and he ordered them away under threat of shooting."

He turned to Lee with a scowl. "At Mrs. Rathway's urgent request they went away to avoid bloodshed, but waited in the vicinity to make sure that no violence was offered her. As she did not reach their camping place, they became alarmed and went back. They found her lying under her horse, apparently abandoned by him after some accident—if it was only an accident."

"They brought her to Siston lake, where I had just returned. This man

"What Do You Want?" McGrath Demanded.

followed them, attacked and stunned me from behind, stole a boat and two packs, and took her away, and appears to have been living a tramp's life in the woods with my wife ever since."

Lee, who was still holding Joyce, started, but Father McGrath held up his hand. "Na, na, let him finish his lying story," he said.

"That's all," said Rathway. "In spite of all, I am willing to forgive the past and take her back. She was unconscious when this man got her into his power. He shall pay for what he has done, if there's law in this land—but this poor girl has been more sinned against than sinning. I'm willing to acknowledge her as my wife still. And I defy you, Father McGrath, to intervene."

Father McGrath walked a step or two toward Joyce, who was standing, encircled by Lee's arm, her eyes cast down. She raised them to his face in mute appeal.

"My child, there's only one thing to ask of ye. Did you marry this man? Can ye remember?"

Joyce shuddered, and she looked at the priest hopelessly. "Yes, it is true," she answered. "I married him."

A cry broke from Lee's lips. He released Joyce, and stood looking at her with the expression of a man who has received his death blow.

"Yes, it's true, it's true," said Joyce. She was speaking now with the calmness of one for whom nothing matters. "He came to me with the threat that he had my father in his power and would betray him unless I married him. It had been the terror of my father's life for years, that some day he would be arrested for that old murder."

"And therefore—yes, I married him, but I insisted that I was to finish my course before I lived with him as his wife. Then, last month, he wrote to me that he would wait no longer. He said my father, whom he had helped to escape across the frontier, had returned to the district, and that he would notify the authorities unless I came up to him immediately."

"And so I started, and—and God knows I could bear it no longer, and that is why He mercifully gave me forgetfulness!"

And, shuddering, she remained standing where she was like a cat-lept.

"So ye leed there, too!" cried Father McGrath to Rathway in white-hot wrath. "Ye've proved yersel' a triple leaser the noo, for Pelly's deid—"

"Dead?" shouted Rathway.

"Aye, deid these many months, and ye claimed he was alive, and in your power, so that ye could get possession of this poor girl ye've deceived—"

But he broke off, and Rathway made no reply, but watched him as he strode to the spot where Joyce was standing. Gently he took her hand in his and began to whisper in her ear. And all the while there was silence, and yet it seemed as if through that silence innumerable powers were in conflict—man against man, man against law, and man against God.

Then Lee cried out in a tone so wild that even Rathway and McGrath's men appeared awed by it:

"She's mine in the sight of God! Joyce, tell me that you care nothing for this trick that has been played on you! Tell me that you will defy this man and come away with me!"

Rathway stepped forward, covering Lee with a pistol.

"By heaven," he swore, "I'll blow your brains out if you meddle with me or mine, and there's no court in this land will hold me guilty."

Lee scarcely seemed to be aware of him. He was holding out his arms to Joyce, and she was trembling, and looking at him, irresolute. Father McGrath was holding her hands and still whispering in her ear. And suddenly a dreadful change came over Lee's face. Confidence was replaced by a look of mortal anguish.

"Joyce!" he cried wildly. "Joyce looked at the priest, who stepped between them; but it was Joyce whom he addressed, not Lee."

"My child, you married James Rathway of your ain free will," he said. "The motive has na bearing on the situation. He didna constrain you by fear of violence. T'was to save your father you did it, you say—aye, but 'twas to save him from the just processes of the law. There's nae way out, my dear. This man's your husband."

He looked at Lee. "Tis the saddest thing I've known," he said, "but ye see this makes the ceremony ye've been through valueless. There's nae way out o' it—name at all, lad. So you twa must e'en just say guldbye."

Lee turned to Joyce. He cried her name. She tottered toward him, hands outstretched, groping before her, as if she were blind.

She found him, their hands clasped each other thus during a period of silence that seemed all eternity compressed into a few moments.

The words came monotonously from Lee's lips: "Joyce, are you—going—to—that man who—calls—himself your—husband?"

She bowed her head. Their eyes met, his in a dumb prolongation of that question, hers in mute, helpless agony.

Then suddenly Lee released her. He straightened himself, stood up stiffly, and squared his shoulders, as if he were on parade. And quietly he turned away.

Then the silence was broken by a wild laugh from Rathway. There was something in that laugh more devilish even than in the situation. For it was amused, shameless, merciless, devoid of any human element; it was like the laugh that the hyena gives over the kiss of some nobler beast that it has supplanted.

"Put his pack out of my house, Pierre! Fling it out into the snow!" he shouted, chuckling. "What, your pack, is it? Never mind, we'll let him keep it. Can't turn the poor devil out into the snow to freeze. He'll go to jail later on for stealing it."

He strode up to Joyce and clapped his hand upon her shoulder. "Joyce, my dearie, have you said goodbye to your sweetheart?" he asked. "We'll make this place our headquarters for a little honeymoon before going back to Siston lake—what d'you say to that?"

The girl shrank under his touch. Rathway saw it and scowled. But he turned toward Lee, his face alight with triumph.

"You—take yourself away with your stolen goods, and don't let me catch you hanging round my wife again!" he shouted. "Or I'll shoot you like the dog that you are. And, harkon, Mr. Anderson! Don't you ever dare to show your face among decent men again, or I'll have you jailed!"

Father McGrath strode forward, his face working with emotion.

"Aye, James Rathway, ye're feeling your triumph the noo," he cried, "and the yellow cur's come to the top in ye. But ye'll remember that there's a higher power sometimes makes hash of e'en the best laid plans, James Rathway!"

Then he strode to where Lee was standing, and clapped his hand on his shoulder. "Will ye nae come back to the mission w' me this night, Meestair Anderson?" he pleaded.

But Lee stood like a stone, appearing not to be conscious of the priest's question, while Rathway, with an evil smile, put his arm round Joyce's waist and led her, unresistant, toward the log house, followed by his three aides.

And to McGrath that was the most awful moment in his whole career, and all the manhood in him urged him to fight, fight to the death against this human sacrifice. It was only his lifetime of discipline that held him at Lee's side. And, looking into Lee's stony face, an immense pity swelled up in his heart.

The door of the hut closed. Lee

quivered and started as the priest's hand fell on his shoulder again.

"Lee, lad, ye'll come back w' me," Father McGrath pleaded.

An inarticulate sound like that of some animal broke from Lee's lips. And, shaking himself free from the priest's friendly grasp, he picked up the rifle and the snowshoes, and went slouching off in the direction of the forest. Father McGrath took a step or two toward him, then, shaking his head, watched him as he made his way over the frozen ground into the darkness.

Sighing, the priest turned back to the sleigh. He gathered up the reins; then, with an impulse of sudden fury, shook his fist toward the log house, looking peacefully enough in the bosom of the frozen valley, bathed in moonlight.

"If I were a priest of God, and believe that He brings all things right in His good time accordin' to His weel, I'd throttle ye like the hound ye are!" he cried.

CHAPTER XV

Joyce Fights a Good Fight

Joyce let Rathway lead her inside the log house, without offering any resistance. She moved like an automaton under the pressure of his arm. Inside the large room he released her.

"Put down my pack!" he ordered Shorty, who was attending him. "Light some candles and pin something over the window, and then get out!"

In a minute Rathway and Joyce were alone. The girl shuddered as the candle light revealed the man's face to her. She had seen it so many times in fearful dreams, and all the way up through the range. When she had married Rathway she had hoped against hope that something would intervene to save her; but now the blow had fallen. And she stood quite still, her hands crossed on her breast, waiting for what was to come.

Then Rathway seized her in his arms. He kissed her ice-cold lips, cheeks, eyes, and throat. His hands went pawing over her. And as she still stood unresistant and unresponsive, his passion grew the fiercer, and mingled with fury at the realization that this girl, so submissive in his arms, was his in body alone.

He released her and, in his rage, began to growl out jeers and curses.

"A different honeymoon from what you were expecting, Joyce girl!" he cried. "No, no, the same honeymoon, but a different husband. A better one, eh, my girl? Well, can't you speak? Which of your two men do you prefer?"

But Joyce made no reply.

"You've answered me, you drab!" Rathway shouted. "So you've been living with him on the trail these two weeks past! By heaven, I was a fool to take you back from him without killing him! You thought I'd swallow that lie about your having forgotten you were a married woman, did you? Did you ever hear of a woman forgetting that she was married?"

Joyce only watched him with a fixed gaze that made him uneasy. "You won't pretend to me that your relations with him were innocent, I suppose?"

Still Joyce said nothing, and Rathway grasped her by the wrists.

"Answer me! Were they?" "Yes, they were innocent." The words issued mechanically from her lips. He glared at her, incredulous, wanting to be convinced, unable to be. Of course the girl was lying. He would rather have known the worst than remain in that state of uncertainty. He didn't understand her. It was barely possible, no more. He was choking at the sight of her—his, yet in spirit a world away. And suddenly he fell upon his knees, seized her hands, and began impressing kisses upon them.

"Forgive me," he stammered. "I'm mad with jealousy. I know you were unconscious and at his mercy when he took you away. You weren't to blame. I love you, Joyce. I've always been mad about you, you know that. Once, when I lost my head, your father shot me. Won't you forget this other man, this Anderson? He means no good to you. He's after that mine, no doubt, and that's why he forced his company upon you in the range."

"Forget him, Joyce. I love you. I'll make you a good husband, and you shall be a rich woman. We'll give up this life here and go south, where people know how to live. Can you love me, Joyce?"

"No," she answered. "I don't love you. I have always hated you."

"By heaven, I'll show you!"

(TO BE CONTINUED.)

What One's Eyes Tell

We are told that the eyes of the intellectual man are gray, and it is a fact that most men of genius have gray eyes. Brown eyes are said to express temperament rather than intellect.

Although brown eyes flash with anger, light up with joy, and change swiftly with jealousy, blue and gray eyes can express greater sadness, says London Tit-Bits.

Green and black eyes are supposed to be the most wicked. Becky Sharp's green eyes played an important part in her various conquests.

The "ramp" in modern fiction usually possessed flashing eyes of either green or black. Actually there are no black eyes; dark brown or dark gray eyes have the appearance of being black in certain lights.

More Advice

The American Legion

(Copy for This Department supplied by the American Legion News Service.)

CONGRESS ACTS TO AID WAR VETERANS

Strenuous efforts by American Legion rehabilitation and legislative committee representatives obtained the passage in the closing days of the congress session of a \$10,000,000 appropriation for new hospital construction and of the Johnson bill amending the World War veterans' act of 1924 in the interest of the disabled.

The hospital appropriation makes provision for 3,000 additional beds. The Johnson bill includes a number of features improving rehabilitation administration. It also carries provisions benefiting some 5,000 disabled men who have heretofore been denied compensation because of the so-called willful misconduct provisions of the Reed-Johnson bill.

These bills were caught with many others in a legislative jam as the session approached its close. Only quick action by the Legion succeeded in saving them. Legion insistence resulted in the passage of the Johnson bill by the house, which was in no mood to accept senate amendments emasculating the provisions of the bill as sent to that body and was disposed to abandon the measure.

Among the beneficial features of the Johnson bill which were stricken out were provisions for a Veterans' Bureau medical corps, added benefits for tuberculosis beneficiaries, reinstatement benefits on insurance for the disabled and extension beyond June 30, 1926, of the time limit for training non-feeble veterans. This action of the senate shows, Legion officials declare, that it is essential that a special veterans' committee be created in the upper body to handle all World War veterans' legislation, as was done in the house in 1924.

Provision for hospital construction is also declared by Legion rehabilitation officials to be inadequate. The former high water mark of 33,000 veterans of the World War hospitalized by the Veterans' Bureau is expected to be surpassed in the very near future. The number has been growing recently at the rate of approximately 300 admissions a week.

In view of these conditions, rehabilitation officials of the Legion recommended a hospital construction appropriation of \$15,000,000, calling for 6,000 additional beds. There is already a serious shortage of proper beds for tuberculosis and neuro-psychiatric cases, according to reports from almost every district.

DAVIS PROUD TO HELP

When the American Legion asked John W. Davis, former ambassador to England, to serve on the Legion's honorary committee to raise the \$5,000,000 endowment fund for orphans of the World War and disabled veterans, he responded:

"May I express at this time my profound sense of gratitude for the privilege of joining with the Legion in its worthy endeavor to raise an endowment fund for the care and cure of the disabled men of the United States forces during the World War, and the care of the orphaned children of those who so bravely died in the conflict? Compared to the sacrifices which they made for us, the largest contributions to your project must seem small, indeed."

Is Hailed as "The Most Typical American Boy"

Robert Moller's father was born in Germany, his mother in Hungary. That's why they were doubly elated when their fifteen-year-old son was presented with a bronze medal by the American Legion post No. 241, of Philadelphia, Pa., for being "the most typical American boy" to graduate from grammar school. The medal was awarded on qualifications of "honor, courage, scholarship, leadership and service."

"The folks are particularly glad over the honor that has come to me," said Robert. "They both believe in American ideals and they are happy that an American Legion post should have selected me. It means a lot to them; really, I suppose, more than it does to me."

Legionnaires Come to Aid of Ball Players

When the Giants-White Sox baseball clubs played in London during their tour abroad, their lack of foresight in one vital detail threatened the success of the tour until they called upon London post of the American Legion to help them out. The programs for the games contained no description of baseball for the education of the uninitiated Englishman. This Legionnaires of London post pointed out. The managers of the tour obtained a lot of old American Legion programs, annexed the descriptive pages and passed them out with the result that the attendance picked up immediately.

AILMENTS OF YOUNG GIRLS

Relieved by Lydia E. Pinkham's Vegetable Compound School Teacher's Experience

Evanston, Wyoming.—"A few years ago I had troubles every month such as girls often have, and would suffer awfully every time. I was teaching school and it made it hard for me as I had to go to bed for two or three days. One day my mother suggested that I take Lydia E. Pinkham's Vegetable Compound, which I did, and it did wonders for me. After my first baby was born I got up too soon and it caused a displacement. This troubled me so that I could hardly walk or do my housework. I knew what the Vegetable Compound did for me before so I took it again. It strengthened me and now I have five little kiddies. The eldest is six, the baby is five months old and I have twin boys three years old and a boy of five years. I do all my own housework, washing and ironing, and I never felt better in my life. I owe my health to your wonderful medicine and I recommend it to all my friends."—Mrs. VERBENA CARPENTER, 127 2nd Avenue, Evanston, Wyoming.

If people only knew the facts about their skin

THE real cause of skin trouble—rashes, blackheads, excessive oiliness, etc.—is way down in the lower layers of the skin. It cannot be expected therefore that mere surface remedies can reach the disorder.

Thousands of physicians are daily prescribing Resinol Ointment and Resinol Soap. They know this gentle, yet effective treatment does sink deep, and will often soothe away in a few days the most stubborn rash as well as a trifling blemish. No home should be without these products—the soap for general toilet use—the ointment to check the first bit of skin eruption. At all druggists.

RESINOL

The Greatest Trouble

The Doctor—"Ever have any trouble with dyspepsia?" His Patient—"Only when I try to spell it."

MRS. URQUHART GETS REWARD

Victim of Tornado Getting First Relief

Seventeen days after the tornado that swept across southern Illinois and Indiana the first relief award was paid. Henry Gates, farmer, is shown receiving from Henry Baker, national disaster relief director of the Red Cross, a check from the relief committee of the Illinois Agriculture association.

Paris Police Fighting Rioting Law Students

Royalist law students in Paris rioted against the government's choice of M. George Scelle as lecturer on international law because M. Scelle is a Freemason and a Republican. Free-for-all fighting took place between the students and the police in the streets. Seventy police were injured, several seriously, and some of the students also suffered severe injuries.

REVIVE OLD CREED

Above are pictured the Gude twins of Washington, Edwin and Edgar, twenty-six-year-old sons of the late Adolph Gude, who are the exponents of a new religion, or as they call it, a revival of the old-fashioned Biblical creed of the prophets. They have allowed their hair and beards to grow. A month ago they were converted to the conviction that man would be better off spiritually if he adhered to the teachings and ways of nature and the philosophy of life as preached in the Bible.

BRIDGES ON FIRE

View of the spectacular fire in St. Paul, Minn., which damaged the approach to the Chicago Great Western railway bridge and the new Robert street bridge, under construction, over the Mississippi river.

Women Would Fight Duel for Man

Mrs. Dorothy Kendrick (left), James E. Jackson, an automobile salesman of New Orleans, and Mrs. Mary Gill of Cincinnati are the principals in a triangle which the police of the Ohio city are endeavoring to untangle. Both women are married but they are willing to fight a duel for the possession of Jackson. Mrs. Kendrick is twenty-eight and lives in Chicago. She is the wife of Leslie Kendrick, a Pullman car conductor, and the mother of three children. Mrs. Gill is twenty years old. Both women have issued a challenge. It is said, to fight combat or a "choose-your-own-weapon" duel to decide who is to have the automobile salesman.

Unhurt in Midst of Burned Church

Thousands of people who viewed the charred ruins of the \$500,000 Holy Trinity Episcopal church at One Hundred and Twenty-second street and Lenox avenue, New York, wondered if there were something miraculous in the fact that this bus relief of Jesus remained undamaged in the wrecked edifice.

DAIRY

DAIRY FEEDS MUST BE DIGESTIBLE

It is not what a cow eats, but what she digests that counts. You might feed a cow wool, as chemical analysis shows that wool has a high percentage of carbohydrates, but this does not do the cow any good because she cannot digest it. Protein is found abundantly in tankage, feathers and other substances, but these substances are not fitted to the cow's digestive system and are, therefore, useless as a dairy ration, points out R. E. Goodale, associate professor of dairying, at Clemson College.

Take corn for example, a cow will digest 75 pounds out of every 100 pounds of corn, but only 23 pounds out of 100 pounds of cottonseed hulls. That means that 67 per cent of the cottonseed hulls fed to a cow is wasted. These figures also vary according to the different nutrients. Of the protein in oat hulls, only 50 per cent is digestible, while in linseed meal, cottonseed meal, and gluten feed, 85 to 89 per cent of the protein will be digested by the cow.

This all goes to show, says Mr. Goodale, that the crude analysis that you will find printed on the bags attached to feed bags may be misleading. A cow can't read a tag and she is the one that has to digest the feed. It is, therefore, up to you to supply her with the right kind of materials to keep her machine working at maximum efficiency.

It stands to reason that the more a cow digests, the more she can produce in the way of milk, so it is up to us to find out how we can help the cow digest her feed and what kind of feed provide the materials needed for milk.

Nearly everyone knows that a ration should be bulky so that it is sure to go into the first stomach and be chewed as cud.

Then a feed must be palatable. You wouldn't eat a very big meal if you sat down to a pot of cold, boiled potatoes without salt or butter, but if you sat down to a nice juicy steak with appetizing gravy, sauces, vegetables, and desserts, you would eat a hearty meal.

It is just the same with a cow. She digests a palatable feed much better than one she doesn't relish. This is an important point, because the milk flow depends largely upon the quantity of feed eaten. The average cow needs about sixteen pounds of digestible nutrients a day, to maintain her body and produce three and one-half gallons of milk. Half of this sixteen pounds goes for body maintenance and half for milk.

If a cow doesn't like her feed, she will consume less and the digestive juices are held back. Palatability is a big aid to digestion.

Heifer on Thin Pasture Needs Supply of Grain

Herd of cattle, some handled in the right way and some handled in the wrong way, have been noticed by L. V. Wilson of the division of dairy husbandry at University farm, St. Paul, Minn., in visiting farms in the vicinity of the twin cities recently.

The young cattle in some of these herds, says Mr. Wilson, are turned out on the theory that they will pick up on pasture and look pretty good in a few weeks. Their owners fail to realize that while they are "picking up" their growth is really being retarded.

The young cattle in other herds, however, show that the breeders have realized that young heifers must be given the best possible chance during the winter and that they must continue their gains in weight every day when first turned out to pasture. Such gains are assured by adding a little additional grain in the early pasturing days. In this way the inevitable shrinkage which comes to animals when only access to grass is given is avoided.

Dairy Notes

As each cow's milking is watched, a glance up the columns will tell how she compares with the rest.

It is impossible to fatten calves for butchers on silage without some kind of supplementary feed such as cottonseed cake or corn.

Ground oats are considered especially valuable for bulls. Cottonseed meal is not usually regarded with favor, especially when fed in large amounts. Some breeders think it causes impotency.

Cows are better milked and better producers when furnished a variety of feed.

The government reports state that there are only about 84 per cent as many cattle on feed in the eleven cornbelt states as there were last year at this time.

Potato growers who have dairy cows and who make a practice of feeding small and otherwise unmarketable tubers, have found cut potatoes a valuable addition to the dairy ration.

POULTRY

GETTING START IN POULTRY RAISING

The beginner in poultry raising should start in a small way. Mistakes are bound to be made by the beginner and difficult problems will be presented which must be solved before one can expect to make a success in the poultry business. There are two ways of starting in the business. One is to buy fowls in the fall of the year and the other is to lay eggs for hatching or baby chicks in the spring. Perhaps the buying of fowls in the fall is the safer method, but for the money invested the starting with eggs or baby chicks in the spring offers a larger opportunity.

In starting with poultry the beginner should first of all consider the purpose for which he wants to use the fowls. There are four general classes of fowls, the egg breeds, the meat breeds, general-purpose breeds and fancy or ornamental breeds.

The egg breeds include the smaller or medium-sized fowls, which are very active, quick to mature and which produce white-shelled eggs. They are mostly nonsitters or poor sitters and other fowls are usually kept if natural methods of incubation are used. The Leghorns, Anconas and Minorcas are typical breeds of this class.

The meat breeds represent the other extreme and are especially suitable for the production of roasters. Fowls of this class are slow and somewhat sluggish. They are easily confined with low fences, slow maturing, persistent sitters and rather indifferent layers. The Brahmas, Cochins and Langshans belong to this class.

The general-purpose breeds are medium in size and produce a good quantity of eggs, thereby making them appeal to those who want a bird which will supply both eggs and meat. The general-purpose fowls are usually good sitters and good mothers. They occupy a medium position between the egg and meat breeds in size, egg production and docility. However, it should be noted that in the recent work in breeding for high egg production some of the general-purpose fowls have made very creditable egg records. Plymouth Rocks, Wyandottes, Rhode Island Reds and Orpingtons are typical representatives of the general-purpose fowls.

Ornamental breeds are not generally adapted to farm flocks unless some one has time to develop some special type. The Polish, Silkies, Sultan and Bantams are representative of these breeds.

Treatment Outlined to Cure Egg-Eating Habit

Hens sometimes acquire a vice of eating their eggs, learning to do this from eating an accidentally broken egg. If one hen learns how to eat eggs the whole flock soon learns from her. Egg shells should never be fed to hens unless they are very finely broken or are mixed with soft food of some kind.

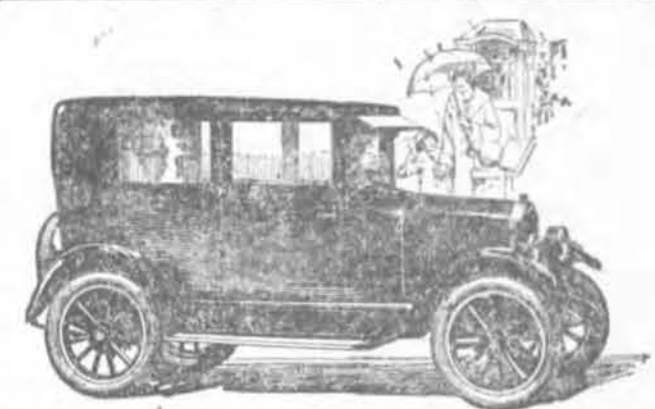

To cure this costly habit cut off the points of the mandibles of the hen, using a very sharp knife. Cut back a little at a time until enough is cut off to leave the under flesh slightly exposed. As soon as a tiny drop of blood exudes from the cut enough has been removed. Then boil some eggs very hard, selecting those with the thickest shells, and put them on the floor of the poultry house, where the hens can easily get them. They try to break the shells by pecking at them and this hurts the nerves in the shortened beak so they will give it up after a few trials, and thereafter not try to break an egg. In a short time the beak will grow into its normal shape and the hens will have forgotten the vice.

Supplying First Feeds to the Young Goslings

Goslings should not be fed until they are more than 24 hours old when they should be given stale bread soaked in milk or water, to which finely chopped boiled eggs may be added. This should be fed three or four times daily for the first two or three weeks, with chopped grass or some other green feed added. Plenty of fresh, clean water should be supplied, and 5 per cent lime grit or sharp sand may be added to the feed or kept in a hopper before the goslings. After two or three weeks they will need a light feed daily of a mash made up of two parts shorts and one part of cornmeal. When the grass range is good other feed need not be given until fattening time. While the goslings are young great care should be practiced to prevent them from getting wet. They should be left in the coop until after the dew falls in the morning and should not be allowed to get caught in a rain. It is better to keep them separated from the old stock after they are about two weeks old.

Hen Lots Adjoining

Where it is necessary to have lots adjacent to one another it is advisable to use fireproofed wire for the bottom two feet in order to keep the eosin from lighting. For the remainder of the fence the regular two-inch mesh is satisfactory. The heavy breeds may be kept in a lot with a four-foot fence, but the light breeds often require a fence seven feet high. One wire of the birds can be clipped to keep the birds from flying over the fence.

A 5-Passenger Closed Star for \$750

A BIG, wide, roomy 2-door Sedan with generous seats and ample leg room, front and rear. Compare its roominess with any other 2-door Sedan in its price class.

Broad doors and a right hand seat that folds toward the driver, give ample space for easy entrance and egress. Wide windows and a one-piece windshield give clear vision. A ventilator in the cowl and two above the windshield provide fresh air without exposure to the weather.

The body is finished in dark blue lacquer, with two white stripes. Top is artificial leather embellished with carriage guards. The radiator shell is nickel-plated.

Powered with the Star Million Dollar motor, this car offers exceptional value at a price which puts it within the reach of all.

To bear troubles is a light thing; to endure them to the end is a heavy thing.

Beidler, every day the things seen, read or heard, which make any addition to your understanding.

Children Cry for

MOTHER: Fletcher's Castoria is especially prepared to relieve infants in arms and children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of Dr. J. C. Fletcher. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

If an automobile makes me happier, doesn't that justify it?

Genuine religion is not so much a matter of feeling as of principle.

All of the people can find themselves all of the time, more or less.

If kissing cured indigestion every body would have dyspepsia.

Get back that lost weight!

WHEN you start to waste away to a shadow, when the color leaves your cheeks and your poor, tired legs will hardly hold up your weakened body it's high time you started taking a fine tonic and builder like Tanlac.

Tanlac will build you up and make you feel that life's worth living. Made from roots, herbs and bark gathered from the four corners of the Earth and compounded under the exclusive Tanlac formula, Tanlac is just what the poor, starved body needs.

First of all it cleanses the blood stream and puts the digestive organs in order. You find, after a few days' treatment, that you want to eat. Pretty soon the welcome color seeps back into your cheeks and the scales tell you that you're gaining weight. From then on it's only a short time until you're feeling fit as a fiddle.

Millions of men and women have taken Tanlac with great benefit. More than one hundred thousand people have written us glowing tributes to this wonderful tonic.

IS OUR DRIVE AGAINST DOPE A FAILURE?

(From May Sunset)

The opium conference of the League of Nations adjourned without accomplishing anything. Great Britain, anxious not to disturb its opium revenue, blocked all action designed to stop the drug traffic by cutting off supplies at the source. There is no hope for remedial measures based on British co-operation. Therefore let us see what can be done without it.

It is universally admitted that despite the raised barriers of the Harrison narcotic act the use of dope has been constantly increasing in the United States. The reason is plain. The more stringent the provisions against the sale of opium, cocaine and heroin, the more profitable the business becomes. That is indisputable. Also the traffic can't be stopped. Narcotics occupy so small a space, their value is so high that the best efforts of the officials fail to intercept more than a minor percentage of the contraband drugs. And the dope habit, being incurable, forces the addict to get the drug at any price.

Here is the picture: We have several hundred thousand—definite number unknown—of drug addicts in this country.

No method of curing them has been found. To get the drug they crave they will do anything, from petty larceny and prostitution to murder. We have tried to keep the drugs from them by fine and imprisonment; the effect has merely been to raise the price of drugs and make the trade more profitable. Cutting off the supply at the source is impossible. What shall be done, what can be done now?

Perhaps the Japanese system of tackling the drug evil in Formosa will show the way out.

LABOR BANKS AS EDUCATORS

It is probable that no single agency has done more to make unpopular the radical labor agitator than has the establishment of labor banks. Labor banks today show aggregate statements running up towards the \$200,000,000 mark.

What happens when a labor leader becomes a bank director? He finds that he has assumed a serious responsibility on behalf of his depositors. As a matter of necessity he begins to take an interest in many movements, political, labor, agricultural or industrial, which has an effect either good or bad on general business conditions.

He soon learns that agitation which tends to discourage investment and employment is immediately reflected in the assets and securities of depositors and borrowers. A labor bank is as subject to these conditions as any other bank.

He finds that economic laws are more powerful than the rulings of any group of bankers. He finds that the "money trust" is an intangible myth. Above all else, he finds that any movement or agitation which hurts the bank and business generally immediately hurts the working man.

Therefore, in spite of his past prejudices he is unconsciously forced to the conclusion that the interests of labor and capital are identical and that one cannot prosper at the expense of the other.

NO MORAL TO THIS

Members of a men's Bible class in Hutchinson, Kas., were given slips of paper numbered consecutively from one to the number required. Those having even numbers were told to write the names of as many Biblical characters as they could think of in five minutes. Those having odd numbers were to write the names of comic cartoon characters in present-day

TO KEEP AWAY FROM ELECTRIC REPAIR MAN

(By Edwin Greer, Pres. Greer College of Automotive Engineering)

There are a number of factors to be considered to insure good ignition. Breaker points must be kept clean and make good contact; make sure that the points separate the proper distance; coil connections must be tight; test for a broken down condenser; there is considerable wear on the distributor segments, same can be cleaned with 00 sandpaper.

Do not run spark plug wires through fibre or metal tubing; cut grooves in two blocks of fiber and run wires through grooves and bolt the blocks together. This will overcome considerable ignition trouble.

A short in the light wiring will cause battery discharge, and may also cause a fire. The presence of a short is indicated by a heavy discharge through the ammeter; a short is caused by a wire pinching between the frame of the car, breaking the insulation; for emergency repairs use friction tape to insulate the wire from frame.

A good man yarrasts are being made for not having a tail light burning. The tail light should be connected in series with the dash light; then in the event that the tail light goes out the dash light will also go out. When a six-volt battery is used, dash and tail light globes must be three to four volts each, six to eight volts on head lights; with a 12-volt battery, dash and tail lights must be six to eight volts, head lights 12 to 16 volts.

The horn must respond the minute the button is pressed. With a little attention it will respond; lubricate the bearings by removing the horn cover, clean commutator with 00 sandpaper. To adjust horn, loosen adjusting screw, turn with screwdriver and adjust to get the best possible sound. If the motor commutator is badly worn, horn should be taken off and armature must be put in a lathe to true up the commutator, new brushes and brush springs should be installed.

There are times when the ignition switch is misplaced or lost and it is absolutely impossible for the average driver to start the car without the aid of a skilled electrician.

Here are a few instructions on how to get the car started. In cases where magneto ignition is used, remove magneto ground wire and the car will start without any trouble.

A car equipped with battery ignition can be started by connecting a wire to the live side of the starting switch to one side of the ignition coil so that the current will go through the coil before it goes through the breaker points.

To make sure that the wire is connected to the right side of the starting switch, touch the wire to the frame of the car, and if a spark or short is produced the connection is O. K.

WHICH SYSTEM IS BEST?

We have heard a lot about the roads that the Romans built, but wages and life counted for little in their construction.

In ten years' time the United States has built more hard surfaced roads with well-paid labor than the Romans ever thought of constructing. Today a man can travel for thousands of miles in this country on wonderful hard-surfaced highways. They furnish a pleasant and safe means of transportation for millions of people.

Road commissioners realize more and more that it is essential to utilize old graveled and macadamized roads as the base for permanent hard-surfaced pavements.

While \$100,000 might build a mile of Roman road which would last for a thousand years, the same \$100,000 will put an asphaltic concrete surface 20 feet wide, two inches thick at the center and five inches thick at the edges over nearly six miles of worn out macadam under the plan of the California highway commission for utilizing old gravel and macadam roads as a base for a hard-surface covering. Six times as many people can be served and six times as many miles of highway that will last for many years can be built.

American women spend 70 million dollars a year on cosmetics. What a few cents here and there will pile up to.

The more dishwasher a wedding ring sees the longer it seems to last.—Columbia Record.

newspapers. With duplications eliminated, there were 86 comic characters named and 82 Biblical. But that result isn't strange. One can spell Andy Gump or Barney Google without hesitation; the entire five minutes might be taken up, however, in deciding the proper arrangement of the letters in such names as Jehoshaphat, Zerubbabel and Jehohachin.

LEGAL NOTICES
SUMMONS

NOTICE OF SALE OF REAL PROPERTY

In the Superior Court of Santa Cruz County, State of Arizona.

E. D. Farley, Plaintiff, vs. Hardshell Mining Company, a corporation, and Fortuna Consolidated Mining Company, a corporation, defendants.

Under and by virtue of an execution and order of sale issued out of the Superior Court of Santa Cruz County, State of Arizona, in an action wherein E. D. Farley was Plaintiff and Hardshell Mining Company, a corporation, and the Fortuna Consolidated Mining Company, a corporation, Defendants, upon a judgment rendered on the 23rd day of March, 1925, in favor of said Plaintiff and against said Defendants, for the sum [Eight Hundred Sixty-one and 00/100 (\$861.00) against the Hardshell Mining Co., and Four Hundred Thirty-four and 00/100 (\$434.00) against the Fortuna Consolidated Mining Co.] of Twelve Hundred Ninety-five and 00/100 (\$1295.00) Dollars, current lawful money of the United States of America, with interest and costs, I have this day levied upon all the right, title, claim and interest of said Defendant in and to the following described real property, to-wit:

Lots One (1), Two (2), and Three (3), Block "W" Patagonia Townsite, Santa Cruz County, Arizona.

Notice is hereby given that I will on the 28th day of April, 1925, at 11 o'clock a. m. of said day, at the Court House door in Nogales, Santa Cruz County, State of Arizona, sell at public auction, for current lawful money of the United States of America, all the right, title, claim and interest of said Defendants in and to the above described property, or as much thereof as may be necessary to satisfy said judgment, with interest and costs, with accruing costs, to the highest bidder, for cash.

Dated this 28th day of March, A. D. 1925.

H. J. BROWN, Sheriff.
By H. J. PATTERSON,
Deputy Sheriff.

First publication April 3, 1925.

Last publication April 24, 1925.

The above sale is hereby postponed until the 12th day of May, 1925, at 11:00 o'clock a. m.

Dated this 28th day of April, 1925.
H. J. BROWN, Sheriff.
By H. J. PATTERSON,
Deputy Sheriff.

First publication May 1, 1925.

Second publication May 8, 1925.

POPULARIZE "SEE ARIZONA FIRST"

Practically every civic and commercial organization in Arizona will join in the "See Arizona First" movement this summer. It is shown by a compilation of announcements from all sections of the state. "See Arizona First" has become a statewide popular slogan comparable to "Use Arizona Products," and has been taken up everywhere to advertise the state's scenic and climatic vacation attractions, not only to Arizonians but to residents of other states.

Reports received at the end of the 1924 vacation season by the Arizona Industrial Congress showed that more Arizonians spent their vacations in the state last year than ever before, commercial resorts reporting the best business in their history. Indications thus far point to even better results from the campaign this year.

In urging that Arizona citizens spend their vacations in the state, and that families usually spending their summers in California or the east spend it instead in Arizona summer resort cities and towns, the organizations sponsoring the movement point out that the practice of going away for the summer takes \$2,000,000 out of Arizona every year. Spending summers in the state not only will keep that huge amount at home, but will result in the steady development of new resorts and better accommodations throughout the resort sections of Arizona, and will in time create a national summer playground to attract visitors from other parts of the country.

In connection with this year's "See Arizona First" movement, the Industrial Congress is preparing to issue within the next few weeks another "Arizona Vacation Directory," to be placed with all organizations, firms and other agencies receiving requests for information about vacationing in the state. This directory also will be supplied to any individuals requesting it.

All commercial summer resorts of the state have been urged to send complete information regarding their attractions to the Industrial Congress in Phoenix, so that they may be included in the directory.

The Patagonian, \$2: Worth the Price

SEVENTH LEGISLATURE FAILS TO PROVIDE FINANCES FOR STATE HIGHWAY DEPT.

The following letter, addressed to the board of supervisors by the state budget secretary, H. S. McClusky, is a revelation, in view of the fact that nearly every state in the Union is planning to finance, or already has raised large amounts, for highway building:

Phoenix, Arizona, April 24, 1925.
Gentlemen: As you are aware, the Seventh legislature failed to pass a bill providing finances for the state highway department.

The senate had a bill under consideration to place the finances of the department on a basis where the work of the department could go on, but the house notified the senate that it would refuse to consider and pass a highway appropriation bill.

The question as to the adequacy of the bill passed in 1923 to carry the department for the next two years—even though it is held to be still in effect—is therefore important to the taxpayers of the state.

The 1923 law is wholly inadequate for the needs of the department. As amended the last night of the session in 1923 it failed to provide the necessary revenues to carry on the work of the department and to pay its debts inherited from the previous administration.

It is true that if all the revenues raised by the bill were credited to the state highway department, the amount so raised would be nearly adequate, but by setting up the 75 per cent funds for the use in the various counties and taking 50 per cent of the gasoline tax for the use of the counties on county roads, it leaves the highway department in a position where it is unable to match Federal aid moneys available for use in this state. This means that approximately \$1,700,000 of Federal aid money will revert to the federal government for lack of finances to match it.

Under the provisions of the 1923 law, if an effort is made to operate under it for the fiscal year beginning July 1, 1925, and ending June 30, 1926, the highway department, if it receives the full cooperation of all of the boards of supervisors in the use of the 75 per cent funds, will be able

to maintain the highways of the state and complete the projects enumerated on the attached sheet.

You will note, therefore, that there is \$7800 available for construction in Santa Cruz county. This is inadequate to undertake any Federal aid project. There will also be available \$9200 for the construction of the Amado bridge, which was passed by the last legislature.

It seems to be the consensus of opinion that to call the legislature back into extra session to consider highway legislation would be barren of results. We are, therefore, calling the matter to your attention so that the whole situation may receive the careful consideration of the members of your board and the taxpayers of your county, and it may be that by consulting with your representatives in the Seventh legislature that in due time a solution may be found to save for the state the \$1,700,000 of Federal aid which present conditions indicate will be lost to the state, due to the failure of the legislature to provide finances.

Yours very truly,

H. S. McCLUSKY,
Budget Secretary.

Board of Supervisors, Nogales, Arizona.

HIGHWAY DEPARTMENT ISSUES MONTHLY MAGAZINE

We are in receipt of Vol. 1, No. 1, of "Arizona Highways," a magazine published by the State Highway Department. The publication is intended as a medium for giving information to the public concerning the department's activities, and is nicely gotten up and filled with interesting reading matter.

The department, in explanation of its action in publishing the magazine, says many other states are getting out publications of like nature and that in following their footsteps the Arizona highway department is only following a popular custom.

We believe the publication will tend to correct many of the misunderstandings of the public relative to the work being done by the state, and heartily endorse the action of the officials in charge.

Hot and Cold Baths

Patagonia recently witnessed the destruction of an adobe building by fire. The husband and father was away from home and the wife and mother was sick in bed. There was no insurance on that building.

What a blessing it would have been for the family had the building been insured in a good company, such as I represent.

Fire may come at any time, even though you have used every precaution and have what you think are fireproof buildings—and when it does come, sweeping all before it, are you fully protected against financial loss? We will be glad to talk the matter over with you at your convenience.

What the World Is Doing

As Seen by Popular Mechanics Magazine

Mechanical Cashier Makes Change and Admits Persons to Trains

Patrons of an elevated railway in an eastern city have been testing a fare-collecting apparatus at the station gates installed to do the work of a human cashier. It automatically retains ten cents from a deposit of a quarter or a fifty-cent piece, returning the correct change and, at the same time, releasing the catch on the turnstile to permit entrance to the trains. Dimes—the regular fare—also are accepted, but the machine will not handle paper money, pennies or nickels. It is believed that the device will be of aid in rush hours as passengers with the exact fare, or coins which the contrivance will change, can pass through quickly.

Wheelbarrow Bench for the Lawn Is Easily Moved by One Person

Benches for the lawn or garden are useful and ornamental but cannot be moved easily from place to place as needed. This limitation has been overcome in a seat which an Englishwoman has invented. It

With Handles at One End and Wheel at the Other, This Decorative Bench for Lawn or Garden Is Easily Moved About

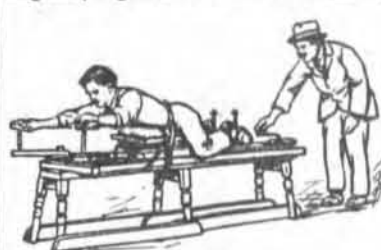

combines the features of a bench and a wheelbarrow and may be trundled about as easily as the latter article by means of two long extension handles and a wheel at the other end which forms part of the support.

(Approximately 15,000,000 bananas are consumed every day in the United States.)

Land Swimming Rack Teaches Right Strokes in Two Lessons

With the aid of a machine invented in England, beginners are said to be able to

learn the right swimming strokes in two lessons. The pupil lies prone on a cushion and his hands and feet are strapped to special pads. When the instructor turns a crank, the student's extremities are automatically made to perform the correct swimming motions as the rests to which they are attached are moved in the proper order by a chain-gear arrangement.

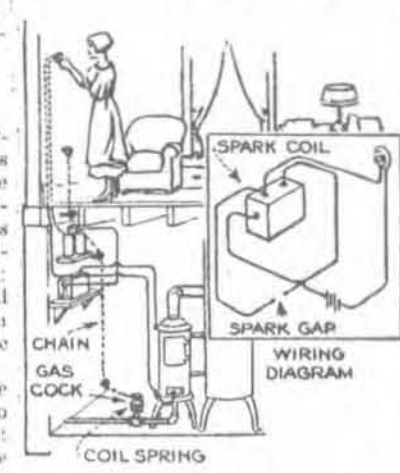

Acid-Proof Table Top

For chemical laboratories, battery-service stations, and other places where acids are handled, an acid-proof coating on the table tops is almost a necessity. The following two solutions are used for this purpose: The first consists of iron sulphate, 4 parts; copper sulphate, 4 parts; potassium permanganate, 8 parts; and water, 100 parts. The second solution consists of anilin, 12 parts; hydrochloric acid, 18 parts; water, 100 parts.

Two coats of the first solution are applied hot with a brush and allowed to dry; any dried coating that has not soaked in is then rubbed off. The surface is then given two coats of the second solution and later a thin coat of raw linseed oil is rubbed on with a cloth. If the table top is painted or varnished, it should be scraped down so that the solutions will penetrate the wood. In cases where this method was used on some old laboratory tables the result was highly satisfactory. The surface turns ebony-black a few hours after the coating has been applied.

Electric Lighter for Water Heater

Many houses have a gas water heater in the basement for summer use. To light it is rather unhandy. With the apparatus shown in the illustration, it is possible to turn on the gas and ignite it with an electric spark. The valve in the gas line is provided with a coil spring, which shuts off the gas automatically. It is opened by means of a length of furnace chain, wound on a spool that is attached to the valve as indicated. The chain is run over pulleys, through the wall into the room above, the end being fitted with a ring; a plate on the wall holds the chain up in the same manner as a furnace-damper control. These fixtures can be purchased at any hardware store. Two dry cells are connected in series to a Ford ignition coil, which can be obtained at a garage. One side of the coil is grounded on the stove and the other wire terminates about 1/4

in. from the burner, directly above the gas holes so that after the gas has been turned on, a spark jumping this gap will immediately ignite it.

(Quicklime added to benzine, in the proportion of about 3 oz. to the gallon, will deodorize it. Shake well, then strain through cheesecloth.)

Ajo—Golden Range Mining Co. to start development of local claims.

BOYS RUN AWAY WITH TRUCK

Two sons of R. N. Keaton of the San Rafael Valley, Robert Jr., and Orton, and Owen Dierking, who was living at the McPherson ranch in the same valley, loaded the Keaton truck with their dogs, guns, some grub and a bicycle, together with their best clothes, and started on a trip of adventure, heading toward Texas. The boys are aged 11, 14 and 15 respectively. They had reached Lordsburg, N. M., when they were taken into custody and held awaiting the arrival of an officer from the sheriff's office of Santa Cruz county.

Under Sheriff H. J. Patterson and Keaton Sr. left Wednesday morning for Lordsburg to bring the lads back home. The under sheriff with the two older boys arrived in Patagonia on the return trip Thursday noon, while Keaton and the younger son were left to return in the truck, which had been damaged through an accident just before the boys reached Lordsburg. Had the truck not been damaged it is not likely the runaways would have been apprehended so quickly, although the sheriff's office had sent out telegrams in all directions to be on the lookout for the truck and its occupants.

The lads will spend a few days in the county jail to reflect on the error of their ways, awaiting the dispo-

ELKS TO GIVE DANCE TONIGHT

Friday night, May 1, the Nogales Lodge of Elks will give a May Day dance, musicale and card party at the clubrooms on Morley avenue. The affair is more or less a "family" gathering, as only Elks and their families are invited. A membership card is the only requisite for admittance.

A Missouri man was shot as he reached to his hip pocket. If it was some of the modern article, the shooter probably will plead self-defense.—Detroit News.

WALTER P. CHRYSLER'S TRAFFIC TALKS

WOULD MARK CARS OF GREEN DRIVERS

THE suggestion has been made that motor cars owned by new or green drivers should be so indicated by an extra tail light visible at night and some kind of a mark visible during the day. The idea is that a green driver may do anything under any circumstance, and that when a car is in the hands of a green driver that fact should be made known in some way. There is merit in the idea. It may be a bit embarrassing to the driver; but who would weigh embarrassment against the necessity of protecting human lives?

The traffic congestion in the boulevards and other busy thoroughfares near the center of Paris has recently become so aggravated that only those with plenty of time to spare can afford to traverse this area in a motor-car. New records for slow moving have been set up by motor vehicles in certain parts of the city recently. Perhaps the worst case was that of a motor bus which took 33 minutes to travel from the Madeleine to the Place de l'Opera, a journey which the average pedestrian does in five to ten minutes.

A study of motor accidents shows that four o'clock is the dangerous hour. It pays to be careful every

minute of the day or night when driving or walking, but especial care should be exercised around 4, the hour of fatigue.

Some cities declare that when a pedestrian is on the sidewalk and is about to cross the street he should first see whether any vehicles are approaching and if none are he should proceed to cross. This applies, of course, to small cities and towns where at these particular crossings traffic is not heavy enough to require the presence of a traffic officer. If a car appears after the pedestrian has started across the street the responsibility for that pedestrian is entirely upon the motorist.

Here are some newspaper headlines worthy of study: "MAN KNOCKED DOWN AND KILLED WATCHING SCORE BOARD." "BOY RUNS FROM BEHIND CAR INTO TRUCK." "HOLDS UMBRELLA. CAN'T SEE, WALKS INTO MOTOR CAR." "READS NEWSPAPER WHILE CROSSING STREET: IS INJURED."

All of which teaches the lesson for the motorist to look out for the pedestrian.

FASCINATING TUB FABRICS; MODISH TAILORED TOPCOATS

GAY deceivers indeed are the new tub-fabrics. One has to be let into the secret that wash materials "as is" this season are really and truly so. They do not betray the fact as far as appearance goes. Indeed, they possess all the elegance and fascination of higher priced genuine silks and woolsens, and it takes an expert to classify them.

The ambitious home dressmaker who feels the annual spring urge to roam through aisles of wash-goods splendor, has many happy surprises in store. Where once the simple gingham and percale held sway, are bolts of ravishing materials, chief among which are wash silks which are not silk at all,

this season, through means of hand stitching. For instance, a rose-lined linen, made in one-piece fashion has a bouquet of daisies and violets embroidered on the left shoulder, positioned similar to the bouquet of artificial flowers.

The ideal of what a smart spring wrap should be, is realized in the season's collection of handsomely, yet practically, styled topcoats. Fashionists are making it a point to introduce unique and fastidious tailoring touches which lend infinite charm without detracting from genuine service and usefulness.

The mode offers supreme contrast in these tailored coat silhouettes with

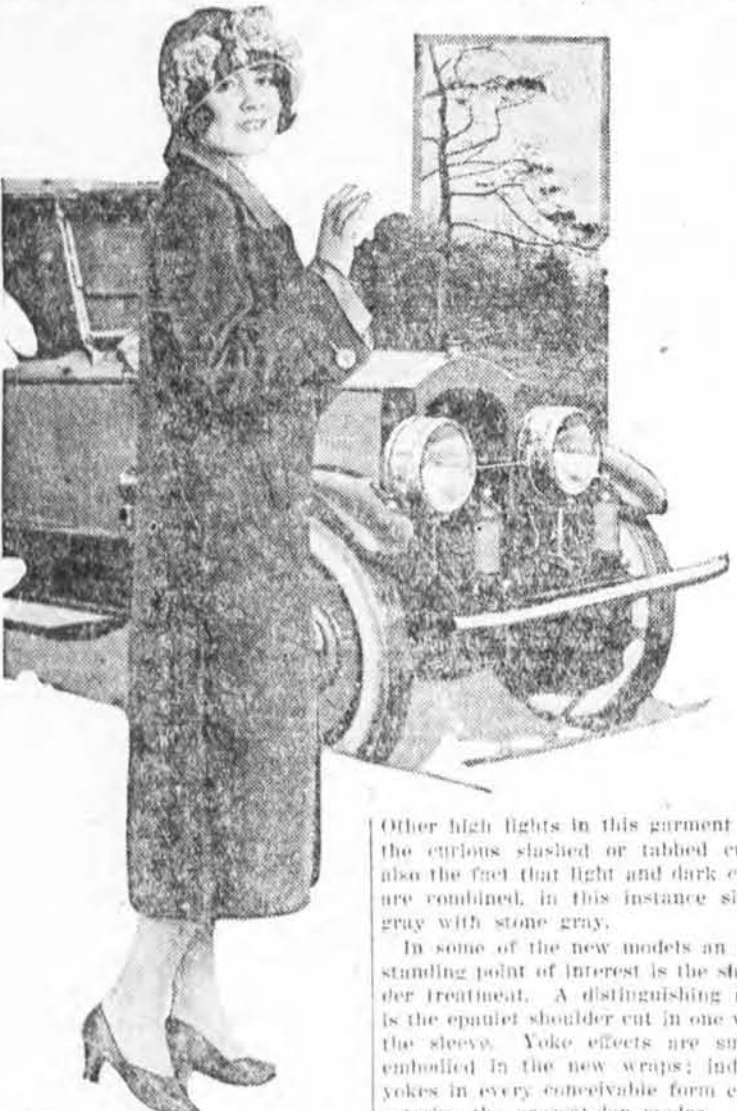

Shows Fastidious Tailored Touch.

but wonderfully mercerized cotton, likewise plaided and striped cotton and silk-mixed chevrons which look like they cost dollars per yard instead of cents. These silk-look-appearance are wrought in all-over figured patterns as charming and intriguing in design as the most exclusive foulard or gay print. Awning and candy stripes are particularly stressed.

Surely it is a gala year for the seamstress who must "try her luck" in making at least her informal dresses herself. Not only are the materials inspirational, but Madame Mode holds forth the extra inducement of recom-

ment suggesting the eccentric. The smartly costumed woman has her choice of the straightline coat, the flared coat or the mannish double-breasted coat.

An interesting version of the straightline contour is presented in this picture. A novel feature introduced in the newer models is elaboration of cut concentrated at the back of the coat. It is the treatment of a back-panel which gives chic to the model illustrated. That the slim silhouette is in no way detracted from through this lovely panel testifies to the consummate art of the designer

Charming Frock Easy to Copy.

mending piteous hand embroidery, by way of embellishment.

One would make no mistake in copying the charming frock as it appears in this picture. A few yards of wash chevron, in such obtainable combinations as royal blue plaided with yellow ochre and rose, or helena with beige will serve admirably as a medium for deft fingers to fashion along lines suggested by this model. As to embroidery, it expresses itself, this season, in realistic bouquets, strewn in artistic manner, as defined in the picture.

The "shoulder bouquet" idea finds naive interpretation on many a frock

Other high lights in this garment are the curious slashed or tubbed cuffs, also the fact that light and dark cloth are combined, in this instance silver gray with stone gray.

In some of the new models an outstanding point of interest is the shoulder treatment. A distinguishing note is the epaulet shoulder cut in one with the sleeve. Yoke effects are subtly embodied in the new wraps; indeed yokes in every conceivable form characterize the present-day modes.

The man-tailored coat is a subject of vast import fashioned in smart woolen mixtures, tweeds, charmeuse and handsome panids. Velvet collars and double-breasted are the two prominent points of interest in these models.

Double-breasted topcoats developed from plaid shawls with fringe finish at the lower edge are among the novelties of the season. These preserve the conventional notched collar, and the long close-fitting sleeve.

There is quite a ripple of excitement caused by the sudden turn of the tide in favor of navy blue.

WESTERN

The Pacific Box Factory, occupying virtually an entire block on the northern edge of the North Beach section, of San Francisco, was destroyed by fire with an estimated loss of \$500,000.

The nationally famous Salt Air resort on the shore of the Great Salt Lake, twenty miles west of Salt Lake City, was gutted by fire recently and damage is estimated at upward of \$800,000. The flames were fanned by a twenty-five-mile wind and spread rapidly.

Raavo Nurmi, the flying Finn, will race in Albuquerque on May 7 against six picked runners of the Hopi and Zuni Indian tribes, noted for their speed and endurance, and never defeated by a white man in a race. The race will be held under the auspices of the University of New Mexico.

James E. Ferguson, former governor of Texas, plainly told the United States Good Roads delegates in Houston, Tex., that "the time has come to change the plan of road building" and "not build them to meet the demand of the automobile, but to build them from the farm to the mill."

Appointment of a committee to treat with representatives of the states of Nevada and Arizona over claims and rights of waters of the Colorado river was authorized by the California Legislature at Sacramento when the Assembly passed a Senate resolution after amending it and the Senate concurred in the amendments.

William Carter and Lillian Carter were arrested by Los Angeles and San Francisco police officials in a hotel at San Francisco in connection with the theft of jewelry valued at \$20,000 from George Dougherty, former police commissioner of New York City, while he was a guest in a Los Angeles hotel. The police said they would not disclose just what connection they believed the Carters had with the crime.

Credited with the fourth world record to be broken by a cow from a Washington herd at the Western State hospital at Stellancom, Clinchum Gerben, a 4-year-old Holstein, surpassed all former records for her class by 1,400 pounds of milk of 4.4 per cent butter fat content in a 305-day test, the department of business control announced at Olympia, Wash. During the test, Clinchum Gerben produced 23,375.8 pounds of milk and 990.8 pounds of butter fat. On the average the milk produced by the state cow tested at 4.1 per cent, it was announced.

A sharp earth shock lasting about two seconds was experienced in Kingston, Jamaica, recently. It occasioned much excitement in the commercial area. A few buildings were cracked. Thirty-eight Japanese seamen, the entire crew of the Japanese steel freighter Rikufuku Maru, were drowned in the raging north Atlantic seas when their ship sank as the Commander Tsuchida and the Honorable of the White Star line stood by unable to help because of the heavy seas.

An address by President Coolidge in which he sounded a message of peace and prosperity was broadcast from New York from a specially prepared phonofilm made at the White House, marking what was said to be the first attempt ever made to broadcast a voice from the motion picture screen.

Five Cincinnati policemen, all patrolmen in the first district, who were named in an indictment returned by the federal grand jury that investigated "graft conditions," were freed of the charges by Federal District Judge Smith Hickenlooper. Upon the recommendation of District Attorney Harry E. Mau, Judge Hickenlooper nolleed the charges against them.

Speaking as one of the women who have achieved recognition in the world of business and politics, Mrs. Nellie Taylor Ross, governor of Wyoming, declared at the Woman's World Fair in Chicago that "presiding over the home still remains the noblest and most satisfactory career for women."

D. D. (Dare Devil) Kople plunged 1,000 feet to instant death at Tulsa, Okla., when a parachute he had invented and was testing for the first time, failed to open. Kople had been a professional parachute jumper for twenty-five years and had made approximately 1,000 leaps from balloons and airplanes.

All copies in the mails of a recent issue of the Harvard Lampoon, humorous monthly magazine of Harvard College, were seized by the postal authorities of Boston on the ground that the publication contained indecent and obscene literature. Other copies of the magazine were placed in the hands of United States District Attorney Harry E. Williams with a recommendation that those responsible be prosecuted for circulating indecent and obscene literature through the mails.

Properties of the Norfolk and Western and the Virginian Railway companies, representing combined assets of about \$250,000,000, will be united for future operation and development under a lease agreement which was approved in New York by directors of the two roads.

More than 2,000,000 bushels of corn and oats belonging to the Grain Marketing Corporation of Chicago were destroyed in a fire which burned two wooden elevators and threatened an industrial section on the South Side before it was subdued.

FOREIGN

Former Premier Edouard Herriot was elected president of the French Chamber of Deputies.

The security of France and solution of the financial problems confronting the French treasury were the two most important points to be dealt with in the Poincare ministerial declaration.

The sale of "North Pole stamps," the proceeds of which will help finance the Amundsen expedition, has begun in Norway. The Norwegian postoffice has issued 420,000 of the stamps, valued at 43,800 crowns.

The foreign diplomatic corps of Peking has recognized the right of L. O. Karakhan, the Russian ambassador, to assume the position of dean of the corps by reason of his ambassadorial rank. All other members of the diplomatic body are rated as ministers to China.

A report from Paris states that the Bulgarian government has asked the allied council of ambassadors for permission to add 10,000 men to its militia. The request follows the disorders attributed to communists, including the attack on King Boris and the bombing of the Sofia cathedral with the loss of 160 lives.

The official attitude of Mexico toward the League of Nations was set forth by Foreign Minister Aaron Saenz in Mexico City, commenting upon the league's invitation that Mexico participate in the arms limitation conference to be held at Geneva in May. Mexico's refusal of the invitation was announced from Geneva recently.

Captain Yankoff, who is alleged to have been the head of the conspiracy for the bombing of the Sveti Kral cathedral at Sofia, was killed by the police. When the officers discovered his hiding place and called upon him to surrender he replied by opening fire upon them and throwing several bombs. He was dropped by their return fusillade.

Soviet Russia has refused to participate in the forthcoming conference on control of the traffic in arms. The refusal was contained in a stiffly worded telegram received in Geneva from Foreign Minister Tchitcherin, pointing out that the soviet government had repeatedly proclaimed its negative attitude toward the League of Nations as at present organized.

All subordinate military bodies of the Lisbon garrison which were involved in the recent revolt in Portugal have been dissolved. It was announced in a decree published in the official gazette a few days ago. War Minister General Velez da Rocha has resigned and Captain Cunhaled will be removed from his post as head of Colmbra University, it was announced in Lisbon.

GENERAL

A sharp earth shock lasting about two seconds was experienced in Kingston, Jamaica, recently. It occasioned much excitement in the commercial area. A few buildings were cracked.

Thirty-eight Japanese seamen, the entire crew of the Japanese steel freighter Rikufuku Maru, were drowned in the raging north Atlantic seas when their ship sank as the Commander Tsuchida and the Honorable of the White Star line stood by unable to help because of the heavy seas.

An address by President Coolidge in which he sounded a message of peace and prosperity was broadcast from New York from a specially prepared phonofilm made at the White House, marking what was said to be the first attempt ever made to broadcast a voice from the motion picture screen.

Five Cincinnati policemen, all patrolmen in the first district, who were named in an indictment returned by the federal grand jury that investigated "graft conditions," were freed of the charges by Federal District Judge Smith Hickenlooper. Upon the recommendation of District Attorney Harry E. Mau, Judge Hickenlooper nolleed the charges against them.

Speaking as one of the women who have achieved recognition in the world of business and politics, Mrs. Nellie Taylor Ross, governor of Wyoming, declared at the Woman's World Fair in Chicago that "presiding over the home still remains the noblest and most satisfactory career for women."

D. D. (Dare Devil) Kople plunged 1,000 feet to instant death at Tulsa, Okla., when a parachute he had invented and was testing for the first time, failed to open. Kople had been a professional parachute jumper for twenty-five years and had made approximately 1,000 leaps from balloons and airplanes.

All copies in the mails of a recent issue of the Harvard Lampoon, humorous monthly magazine of Harvard College, were seized by the postal authorities of Boston on the ground that the publication contained indecent and obscene literature. Other copies of the magazine were placed in the hands of United States District Attorney Harry E. Williams with a recommendation that those responsible be prosecuted for circulating indecent and obscene literature through the mails.

More than 2,000,000 bushels of corn and oats belonging to the Grain Marketing Corporation of Chicago were destroyed in a fire which burned two wooden elevators and threatened an industrial section on the South Side before it was subdued.

BRIEF ARIZONA ITEMS

The thirty-third annual Episcopal convention of Arizona was held in Phoenix last week.

An occurrence of vast importance to the mining industry is the starting of the big 100-ton mill at the Ben Loman mine in the Quiljotas mountains, near Tucson.

Preparations have begun for the entertainment at Nogales during the middle of May of the state convention of the Knights of Columbus. Hundreds are expected to attend.

Rafael Sanchez was found guilty of second degree murder, with a recommendation for leniency, by a jury in the Superior Court at Tucson at the conclusion of his second trial on charges of beating to death with an axe Gabriel Dominguez, aged cook and laundryman.

Dr. F. Jordan of Chandler, a member of the San Marcos Club, is the new Southwestern amateur golf champion. Dr. Jordan won the final match of the Southwestern tournament at Phoenix by default when Dr. James Vance of El Paso was unable to compete because of illness.

The Phoenix Motor Coach Company, Inc., which was granted a certificate of convenience and necessity by the State Corporation Commission recently to operate a bus line in Phoenix, has filed an amendment to its articles of incorporation increasing the capital stock from \$50,000 to \$500,000.

C. L. Brooks, merchant and acting postmaster at Red Rock in southern Pinal county, was placed under arrest and is held in the county jail at Florence without bail pending the hearing of charges that he shot and killed his business rival, F. D. Halstin, at Red Rock on the night of Jan. 21.

The regular semi-annual examinations for admission to practice before the bar of the state will be held in the state capital building at Phoenix on Thursday and Friday, May 7 and 8. It was announced last week by John L. Gust, secretary of the State Board of Examiners, for admission to the bar.

Donald Deeds, 13 years old, son of Mr. and Mrs. H. K. Deeds of Central Bridge, in the Double Adobe district at Douglas, is at the hospital with a bullet hole through his right breast, following a shooting affray. Cipriano Rodriguez, 19 years old, of Double Adobe, is in the Douglas jail, held for the shooting.

Bill Lawrence, who is sentenced to die on the gallows at the state prison at Florence on June 12, for the murder of Policeman Haze Burch of Phoenix, has not yet given up hope of cheating the noose. Recently several pieces of hacksaw blades were found in his possession by prison guards and it was found that he had already started to cut the bars that hold him in the death cell.

One of the fuel tanks dropped by the giant dirigible Shenandoah near Bisbee some months ago was picked up a few days ago by the superintendent of the Warren ranch and brought to Bisbee, where it is on display. The tank is of aluminum with aluminum linings, and when dropped was burst by the impact. It carries the words, "Weight 49.9 pounds with hangings, 552 pounds when loaded with fuel."

Two persons lost their lives, and from \$50,000 to \$100,000 worth of property was destroyed in a fire which swept Cottonwood, near Jerome last week. C. L. Brooks of Los Angeles was burned to death when the small hotel in which he was sleeping was consumed by the flames. The body of another person was burned in the flames. Thirteen stores, one hotel and ten residences were destroyed by the flames.

The recall of Stephen H. Abbey as superior judge of Pinal county and the election of E. L. Green as his successor was upheld by the Arizona Supreme Court in a decision handed down last week. The case is believed to be the first in the United States where a judge of the Superior Court has been recalled from office.

That the attendance of students of the University of Arizona was desired by foreign colleges is evidenced by the fact that announcements of summer session courses from the University of Nancy, France, and from the National University of Mexico, in Mexico City, were recently sent to authorities of the Arizona institution at Tucson.

Arizona postmasters voted unanimously at their third annual convention at Douglas, to hold the 1923 convention at Prescott on the second Friday in June. The date selected will bring the delegates to that city about the time the famous dance of the Snake People is being staged by the business men of Prescott. James A. Jones, postmaster at Phoenix, although unable to be present at the convention, was elected president of the state organization for the next year.

Aviators scattered the ashes of J. R. Broughton over Camelback mountain near Phoenix. Broughton died at Miami Springs, Fla. In conversation with his wishes, his body was brought to Phoenix and cremated and the ashes were scattered as he desired before his death.

A company operating 500 slotmachines throughout the metropolitan area has commenced in just few weeks large hand-painted signs boosting the Social ceremonies to be held in Prescott this summer.

GERMANY ELECTS VON HINDENBURG

FIELD MARSHAL VON HINDENBURG ELECTED TO PRESIDENCY BY POPULAR VOTE

WAR LORD NAMED PRESIDENT

DR. WILHELM MARX SNOWED UNDER AS WAR LORD WINS BY 845,000 PLURALITY

Berlin, April 27.—The official figures of the presidential election follow:

Von Hindenburg, 14,680,336;
Marx, 13,752,540;
Thulmann, 1,331,591.
Votes declared invalid, 21,910.
Total, 30,345,540.

Berlin.—The people of Germany have rallied to the banner of Field Marshal von Hindenburg and elected him president of the republic. He is the first president of Germany to be elected by popular ballot. He was nominated by the National Conservative bloc to replace Dr. Karl Jarres, who failed of election in the first balloting on March 29. His opponent was Dr. Wilhelm Marx, candidate of the Republican bloc, adherents of the Weimar coalition, composed of Centrists, Socialists and Democrats. The third candidate was Ernst Thulmann, Communist.

Von Hindenburg triumphed in his race for the presidency with a plurality close to 845,000 votes. Von Hindenburg comes to the chair once occupied by Friedrich Ebert, who was chosen president by the national assembly in Weimar in February, 1919, and who died in Berlin in February, 1925.

The women's votes and a heavy turnout of former stay-at-home voters elected the field marshal. An advance analysis of the vote indicates that Von Hindenburg scored heavily in east Prussia and other agrarian areas, polling 2,000,000 more votes in those sections than did Dr. Jarres in the March election, while Dr. Marx gained only half a million more votes than polled by the three Republican parties on that occasion.

It was the flat country and new voters that aided the field marshal to office.

The streets of Berlin were almost deserted when the final results were made known, an all-day delirious rain having kept the customary election crowds indoors. The voting throughout Greater Berlin proceeded in an orderly fashion despite the heat of the recent campaign and the size of the vote recorded throughout Germany is taken as evidence that the mass of the voters had pretty well made up their minds in advance.

No matter how the figures are interpreted the outstanding accomplishment of this election demonstrates the drawing power of Von Hindenburg's name, which added so materially to his huge following. He polled nearly four million more voters to the polls than a month ago, and which primarily appealed to the sentiment of German patriots.

Greece Protests Bulgarian Mobilization
Athens.—Premier Michalakopoulos registered objection even to the temporary increase of the Bulgarian army when he was handed the text of the decision of the council of ambassadors, permitting additional militia to be enlisted by the Sofia authorities. The premier outlined the Greek view of the Balkan situation to the British, French and Italian diplomatic representatives here when they officially conveyed to him the decision of the allied envoys in Paris. He was assured that the increase was only a temporary measure.

Typos Celebrate Diamond Jubilee
New York.—Typographical Union No. 6, known as "Big Six," recently celebrated its diamond jubilee here. It was founded on Jan. 4, 1850. Speakers extolling the memory of Horace Greeley, the union's first president, Leon Rouse, president, extolling the history, said that while it originally threw 1,000 printers out of work when introduced in the early '80s, it subsequently proved the greatest boon to the history of the printing trades. It had brought the eight-hour day and had increased "handwork."

German Vote Alarms Washington
Washington.—News of the election of Field Marshal von Hindenburg as president of Germany was received in official circles in Washington as something of a shock. While it had been realized by those who have been watching the progress of the election closely that the German war hero was certain to poll a very heavy vote, few had been inclined to think he actually would be elected, as his triumph is certain to mean a difficult period for Germany until it is clear just what the change in government portends.

Quakes Rock Central States
Chicago.—Earthquake shocks were felt through parts of Ohio, Kentucky, Indiana and Illinois a few days ago. There were three distinct tremors, but no damage was done, except for slight interruption in wire service in a few places. According to seismograph records, the first shock lasted six seconds. The second was of like duration but the third lasted half a minute. Small animals were upset at Springfield, Ill., while only slight tremors were felt in and near Cincinnati.

WRIGLEY'S "after every meal"

Parents—encourage the children to care for their teeth!

Give them Wrigley's. It removes food particles from the teeth. Strengthens the gums. Combats acid mouth. Refreshing and beneficial!

Why not oil insurance?

Your life, your property, your crops are all wisely insured. But service from your car remains a gamble.

And yet, by using only MenaMotor oil you can get the cheapest, most reliable service insurance. MenaMotor Oils have the body and backbone to do the job of lubricating properly.

MenaMotor Oil is service insurance. You can buy both at the sign.

How to build up your Weight

To be under weight often proves too fighting power in the body. It often means you are minus nerve-power, minus red-cells in your blood, minus health, minus vitality. It is serious to be minus, but the moment you increase the number of your red-blood-cells, you begin to become plus. That's why S. S. S., since 1825,

has meant to thousands of underweight men and women, a plus in their strength. Your body hits to the point of power, your flesh becomes firmer, the age lines that come from thinness disappear. You look younger, firmer, happier, and you feel it, too, all over your body. More red-blood-cells! S. S. S. will build them.

Free Booklet
Send name and address to S. S. S. Co., 111 E. 8th St., Chicago, Ill., for special booklet on the Blood.

S. S. S. is sold at all good drug stores in two sizes. The larger size is more economical.

Copyright by WESTERN PUBLISHING CO.

BABY GIRAFFE

"There is always great excitement in the zoo," said Billie Brownie when he got home to Brownland, "when a new little animal is born, or perhaps, particularly, I should say when a new big animal is born."

"I had been to call on a number of my friends and had seen some lovely new children when I received word that Mother Giraffe had asked me to stop by and see her darling when next I visited the zoo."

"So today I went to see the little giraffe."

"Of all the cunning sights I really think that was the most cunning."

"Now, Billie Brownie," laughed his brother, Bennie Brownie, "you said that about the baby camel and about the baby buffalo and about the baby wallaby and the baby zebra."

"Well," said Billie Brownie, "maybe I did, but I must say this was just about the most cunning of all."

"It's wise of you to put in that 'just about' for you'll be all excited about some other new baby animal tomorrow or the next day," laughed the Queen of the Fairies.

"But do go ahead and tell us about the baby giraffe. We won't interrupt any more," she added.

Billie Brownie grinned.

"I can't help becoming so enthusiastic about these adorable copies of their parents," he chuckled.

"Now, the baby giraffe was really, you may laugh all you like, the cutest animal I have almost ever seen."

"Almost ever," murmured Old Witty Witch; "he doesn't know what new animal he may see next."

"Go on, Billie Brownie," said Old Mr. Giant, "we want to hear about Baby Giraffe."

"There the baby was, close beside his mother," Billie continued. "He

They Are a Lovely Pair.

only stood as high as the top of his mother's forelegs.

"He was striped and marked in great spots just the way she was and he held his head 'up and over' in regular giraffe style."

"Of course it was natural that he should do this, but it was a most adorable sight!"

"His father, you know, always has lived in the zoo, but his mother came from a circus where she had been for several years."

"She used to tell lovely stories of the circus to her mate during the long zoo afternoons and evenings when the people had left the park."

"She was happy to settle down to the park life where there were leafy trees and shade and out of doors and a nice indoor house, too."

"He had grown tired of traveling and moving from place to place."

"They are a lovely pair—just as sweet and pleasant as they can be. But the baby is quite nervous as yet."

"He isn't so used to the world."

"He is very healthy and well, though, and the mother is so happy."

"She had another little giraffe once who didn't live. But this one will live. Every one says this one is so healthy."

"And oh, to see him beside his mother, with such a funny giraffe expression on his face while his mother looks at him with a mother giraffe's love, and his father says:

"I'm a proud giraffe parent, that's what I am."

"Truly, I had a beautiful time visiting them. I must go again soon, for as Mother Giraffe said:

"You must come while the baby is young so you can see his cute ways."

"That I must certainly do," Billie Brownie ended, and they all smiled.

For they knew he certainly would!

Wanted the Band Piece

Gertrude and a man friend of the family happened to have birthdays on the same date. The man invited Gertrude to his home for a chicken dinner and to celebrate the event.

When serving dinner the host inquired of his young guest as to what piece of chicken he might serve her.

She, having a preference, sat perplexed for a moment, then replied, "Just give me the band piece, please."

On His Dignity

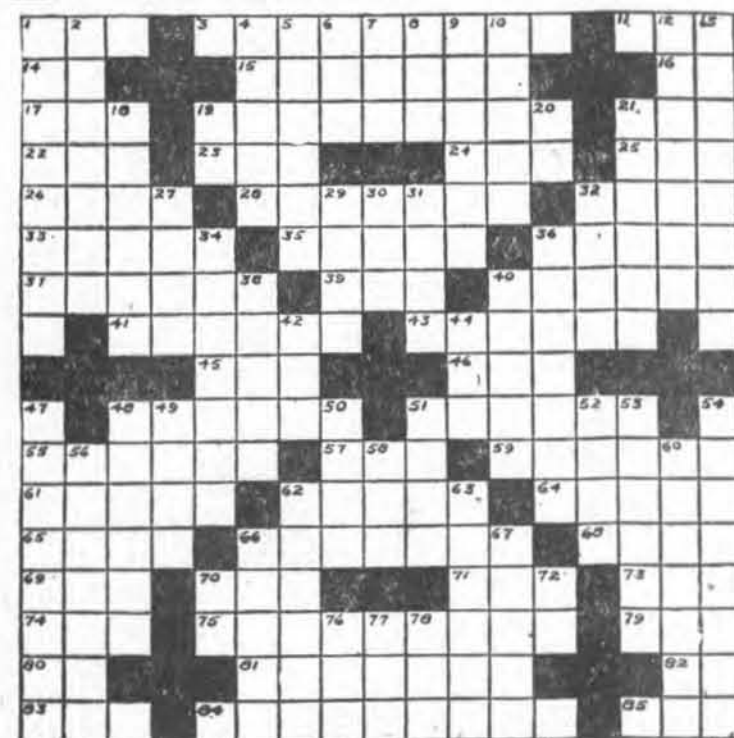

A small boy, who was sitting next to a very naughty woman in a crowded car, kept sniffing in a most annoying way, until the woman could stand it no longer.

"Boy, have you got a handkerchief?" she demanded.

The small boy looked at her for a few seconds and then, in a dignified way, came the answer:

"Yes, I've, but I don't lend it to strangers."

Solution of Last Week's Puzzle.

Fort That Has Figured in American History

Fort Michilimackinac, invariably clipped to "Mackinac," resulted from Father Marquette's mission established in 1673 on Point St. Ignace, and La Salle's visit there two years later. The first defense, as found by La Salle, was a palisade, and the garrison consisted of Indians. La Salle did much to strengthen this post. La Motte Cadillac also was there and further added to the strength of the fort. Then Detroit swung into the lead as a fur and trading center, and in 1712 the settlement was moved to the south side of the strait, where Mackinaw City stands. There the second Fort Mackinac was built. It was this Fort Charlevoix describes in Vol. II of "A Journal of a Voyage to North America." This fort was surrendered to the English when France lost it. It was captured by Pontiac's Chippewas and Ottawas on King George's birthday (June 4), 1763. It was without a garrison for four years. At the beginning of the Revolution it was strengthened and heavily garrisoned. The English commander, fearing capture, moved his forces to the island of Mackinac in November, 1779, where the third fort of that name was built. It was occupied by the British until July, 1780, but did not figure in the war. It was turned over to the United States in 1796. A description of the last Fort Mackinac, as it was in 1880, is found in Uriah Tracy's report on it to Samuel Dexter, secretary of war. It had a garrison of 57 men at the outbreak of the War of 1812. It was captured by an overwhelming British force of soldiers and Indians, and its capture brought many tribes to the British standard. The blockhouse on the hill back of the old fort was built by the British during the war. It was surrendered to the United States in July, 1818.

Got Out of It Neatly

Sir Henry Robertson was an official of the local government board for Ireland, and he had been entertained by an old priest who, finding his larder low, had prepared a large pancake on a thick, swarming in grease, for his guest's supper. Sir Henry, with respect for his digestion, slipped it into a pocket containing two leather bags, and then mailed one of them at the village post office. Upon finding a convenient ditch in which to deposit his pancake, he looked in the bag and found it full of papers. He had mailed the pancake to the office of the government board. Presently he received an angry letter from headquarters, inquiring for what purpose the contents of the pouch were forwarded. "I did not wish to give away my carelessness," says Sir Henry, "so I headed my reply, 'Failure of the potato crop—sample of food consumed by small farmers in the west.'"

Intelligent Deer

Mrs. Della Austin, postmaster at Fort Kent Mills, Maine, has a pet deer which she has had since it was a fawn and it has become thoroughly domesticated. Not only that, but it shows marked housekeeping abilities. A little outhouse has been provided for the deer, and it has an electric light which may be turned on with a string. The door is kept hinged to keep out intruders, but when the Austin deer feels the need of food or shelter it will nose up the flap, enter, pull on the electric light and proceed contentedly to munch the supply of Arrostook potatoes which are kept in a box, says the Boston Globe.

Remarkable, If True

"Academical," said Robert W. Chambers at a dinner in New York, "always bar out the very people they should welcome in. Thus the French academy barred out Zola, and thus our American academy bars out Dreiser."

"The great American painter Whistler, once visited an exhibition of the Royal academy at the Grosvenor galleries in London. After reviewing a mile or two of execrable canvases, Whistler yawned and said:

"Great men's origins are always interesting, but it isn't generally known that several Royal academicians actually began life as artists."

Sad, but True

Most listeners have remarked the fact that the broadcaster speaks slowly and distinctly at the outset and frequently pauses—ahem!—between words.

Then suddenly he changes his pace and we know that the official in charge of the station has nodded to him that his time is almost up and he will have to scold himself for not getting off his scheduled address within the prescribed limit.—Judge.

Airman Kills Antelope

George Pomeroy, an airplane mail pilot, who runs between Omaha and Cheyenne, having made good time on the early part of his trip, spotted an antelope from his high point of vantage while flying over Nebraska and descending, shot it. He examined the antelope into his plane and continued his journey, only later to be apprehended and fined \$155 for his sport by the game warden at Lincoln.

New Uses for Castor Oil

Railway chemical engineers have produced a special lubricant from castor oil, which is now being used with great success on the Chinese Eastern railway. It is said to be efficient and economical as a car lubricant. Castor oil is coming into extensive use for technical and medicinal purposes. In China it is also used as a food.—Popular Science Monthly.

MY FAVORITE STORIES

By IRVIN S. COBB

A Mistake in Identity

In the town where I was reared there was a combination barroom and luncheon for colored only, known as the Bleeding Heart saloon. It stood at the foot of a street near the head of the wharf and was a favorite resort for river dandies. Among its regular patrons was a brawny individual, six feet four inches long and correspondingly broad, who answered to the pet name of Red Hoss. Red Hoss posed as a bad man. He let on, as the phrase runs, that he was the undertaker's best friend. To be sure there was no record that he actually had ever destroyed anyone, but he frequently promised to do so, and was rated as dangerous by the resident colored populace.

One night the Cincinnati and New Orleans packet on her way south landed at our town. Among her deck passengers was a small yellow man, a professional prize fighter from up North. On the journey down the river he had introduced his own private set of educated ivory into the crap game among the rousters, with the result that he now had all their money in his possession.

Dapper, trim and slim, he climbed the wharf and entered the Bleeding Heart and called for a jolt of snot gin. He was in the act of paying for the drink with the top of a delectably fat roll of green bills when the swinging doors were thrust violently asunder and in stalked Red Hoss, slightly intoxicated and therefore doubly belligerent. His lowering, bloodshot eye swept the interior, then focused with a greedy stare upon what the slender stranger held in his hand.

Lurching slightly, he swaggered up to the bar and gripped a huge soiled paw on the lapel of the little yellow man's coat.

"Say, boss, pussen," he stated, "You better turn dat bundle of snot money over to me, an' 'en I'll give you back what part of it I thinks you should have fur yo'self."

"Who is you, may I ask?" inquired the visiting nobleman in gentle accents.

"You better ask!" growled Red Hoss. "Findin' out who I is meks yo' chances for livin' longer all de brighter of you aims to stay round dese parts. You asks me who I is, huh? Well, I've goin' tell you. I've de new town bully, that's who! Yaa, suh; I've de official bully of de town an' w'en a strange nigger hits yere he mos' giveliy hands me over what spare change he's got an' that's his insolvency. So—"

He did not finish the sentence. Stupefaction and rage tied his tongue temporarily as the audacious stripping with a jaunty gesture brushed free of the detaining clutch and turned to the barkeeper, saying pleasantly:

"Mist' Barkeeper, 'at shorely wuz very tasty gin. I thinks I'll tek me one mo' slug outen de same bottle, ef you please."

Red Hoss recovered his faculties. With a berserker bellow he swung with a huge fist for the little man's jaw. The jaw was not there when the fist whizzed past. The puglist ducked, and came up expertly with a short arm jab which landed exactly on the point of Red Hoss' chin. There was a jar as a large inert body struck the floor.

Three minutes later Red Hoss slowly and dizzily roused himself. Some Good Samaritan had restored him to consciousness by sluicing a bucket of water over him. Dripping and dazed, he sat up, holding his aching head on both hands. The little man stood at the bar blowing softly upon the knuckles of his right hand and conversing with the barkeeper upon the topics of the day.

"Mister," quavered Red Hoss, "who is you?"

"Me?" said the stranger. "Oh, I am merely the person you thought you wuz w'en you come in yere."

A Service to the Whole Land

In the early summer of 1918 three of us made a long trip by automobile to pay a visit to a colored regiment at the front in France. The results more than repaid us for the time and trouble. One of the main compensations was First Class Private Cooksey, who, because he had been an elevator attendant in a Harlem apartment house, gave his occupation in his enlistment blank as "indoor chauffeur."

It was to First Class Private Cooksey that the colonel of the regiment, seeing the expression on the others' faces when a minenwerfer from a German mortar fell near by on the day the command moved up to the front, and made a hole in the earth deep enough and wide enough and long enough to hide the average smoke house in—it was, I repeat, to First Class Private Cooksey that the colonel put this question:

"Cooksey, if one of those things drops right here alongside of us and goes off, are you going to stay by me?"

"Kumel," stated Cooksey with sincerity, "I ain't aimin' to tell you no lie. Ef one of them things busts close to me, I'll jest natchelly be obliged to go away from here. But please, suh, don't you set me down as no deserter. Jest put it in de book as 'Absent without leave,' 'cause I'll be back jest ez soon ez I kin git my brakes to work."

"But what if the enemy suddenly appears in force without any preliminary bombardment?" pressed the colonel. "What do you think you and the rest of the boys will do then?"

"Kumel," said Cooksey, earnestly, "we may not stiek by you, but we'll shore render one service, anyway; we'll spread the news all over France 'at th' Germans is comin'!"

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says: "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments, corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcel Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.

Most men are more willing to indulge in easy vices than to practice laborious virtues.

Alabastine

Genuine Alabastine comes only in package with Cross and Circle printed in Red. Demand the best.

costs a little more than Kalsomine—

but it's worth more. And it won't rub off when properly applied. Full instructions on every package. Ask your dealer for the Alabastine colorcard or write Miss Ruby Brandon, the Alabastine Company, Grand Rapids, Michigan.

Alabastine—a powder in white and tints. Packed in 5-pound packages, ready for use by mixing with cold or warm water. Full directions on every package. Apply with an ordinary wall brush. Suitable for all interior surfaces—plaster, wall board, brick, cement, or canvas.

BUSINESS CONDITIONS

(Continued from page 1)

per cent smaller than for February, 1924. All of the 11 lines showed increases, partly seasonal, in sales during March, 1925, compared with February, 1925.

The general level of wholesale prices in the United States was the same in March as in February, the bureau of labor's index of prices of 404 commodities standing at 161 (1913 prices equal 100) in both months. One year ago it stood at 150. More sensitive weekly indexes of wholesale prices indicate that the trend has recently been downward. The purchasing power of farm products increased 3.4 per cent during March, according to the index of the United States department of agriculture, and at 91 (1913 purchasing power equals 100) was at the highest point reached since 1920. In a list of 27 principal commodities produced in this district, for which comparable price quotations are available, there were 14 price declines and three price advances during March, 10 quotations remaining unchanged. A comparison of prices of the same list of commodities as between March, 1925, and March, 1924, shows 17 advances and 9 declines, with one commodity quoted at the same price in both years.

Total loans and investments of 70 reporting member banks in nine cities of the Twelfth Federal Reserve district increased by \$34,000,000 or 2.2 per cent during the four weeks ending April 8, 1925, chiefly as a result of increases in collateral loans and in investment holdings. Commercial loans declined slightly during this period. Demand deposits decreased by \$32,000,000 (4 per cent) during the four weeks, but time deposits decreased by a greater amount, and total deposits were larger by \$28,000,000 (1.8 per cent) on April 8 than on March 11. Borrowings of reporting member banks from the Reserve Bank increased \$1,000,000 (7.5 per cent) during the four weeks. Total discounts at the Federal Reserve Bank of San Francisco increased by \$5,000,000 (21.4 per cent) during the four weeks ending April 15, 1925, and on the latter date were \$21,000,000 or 262.5 per cent higher than on January 14, 1925, when the present upward movement in member bank borrowing began.

English Pound Sterling Goes Up. London, April 29.—That the exchange market is satisfied with the return by England to the gold standard was indicated today, when the pound sterling touched \$4.84 1/4, which is near the "gold" point.

France must follow England in return to gold standard, financial authorities say, and the minister of finance, Caillaux, is studying the question.

Whipping posts are suggested for careless motorists. Why not make them take the pedestrian's place for a while.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that white Catarrh is a local disease, it is greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE consists of an Ointment which Quickly Relieves by local application, and the Internal Medicine, a Tonic, which assists in improving the General Health. Sold by druggists for over 40 Years. F. J. Cheney & Co., Toledo, Ohio.

FOREIGN POLICY OF GERMANY NOT TO CHANGE, SAYS LUTHER

Berlin, April 29.—The German foreign policy will not change, Dr. Luther, chancellor, said in an address. While he did not refer to the election, he has conferred with Von Hindenburg and is understood to be in a position to speak for the president-elect. He said Germany desires protection by treaty and does not want another war. He declared German industry and commerce will cooperate

for a peaceful understanding among the nations. All talk of inflation is criminal, he said, speaking of internal problems.

FLY FROM PARIS TO NEW YORK

Paris, April 29.—A Paris-to-New York flight will be attempted about July 20 by Tarascon and Colo, French aces. The flight will be via England, Ireland, New Foundland and Nova Scotia, for a \$25,000 prize offered.

COAST LINE TRAIN WRECKED

San Diego, April 29.—A southbound train, Los Angeles to San Diego, left the rails 20 miles north of San Diego last night. John Warboys, engineer, was dead, and 13 passengers were injured.

Washington, D. C.—Contract was executed for the sale by the United States shipping board of five President type ships to the Dollar interests for service on a California-Orient line.

TEXAS, INDIANA REPORT SNOW

San Angelo, Texas, April 29.—Snow fell today with the sixth day of rain. The temperature a week ago was 102, the hottest April day on record. Snow fell over large portions of Indiana during the night, with a low temperature of 35, in contrast with record hot weather for April during last week.

It's no sign, just because a girl is engaged to a man, that she has to marry him—he may back out.

The Customer Be—Pleased!

A certain business man once stated the above caption quite differently. Instead of pleased, he said damned. Perhaps he had never heard of the Golden Rule.

A merchant once said, "The customer is always right." Quite a difference. It is obvious that either customer or merchant can be wrong, but we prefer always to give the customer the benefit of the doubt.

Our policy is that the customer, right or wrong must be pleased and we will go even to extremes to please him. This is a part of our Service.
