NO. 23

## PERSONAL AND SOCIAL

### BIG BARN DANCE

At M. W. Eason ranch, Canille, Saturday night, May 16th. Fort music. Good eats. \$1.50 a couple. Cars protected; grounds policed. Miss Ola Elliott, manager.—Advertisement.

W. J. Loring and Dr. J. H. Miller, associates of John Hays Hammond, internationally known mining engineer, are in Patagonia looking over the mining properties, in search of a lead or silver prospect. They are well pleased with the possibilities here. We hope they find something to induce them to operate here.

Mrs. E. D. Farley and son, Richard McCormick, were business visitors in Nogales Tuesday.

J. J. Peterson, superintendent of the Big Jim mine and Mr. Dunn, one of the company officials, were in town Wednesday, when the latter left for a short business trip to Los Angeles.

Miss Anita Temple, local teacher, will leave tomorrow for her home in Phoenix.

Fred Kollberg of Nogales and Black Jack Garden of Salero were in Patagonia Saturday on business. They have taken a lease on the Eureka mine on the Baca float.

Jim Parker, state highway road foreman, who has been laid up with chickenpox for several days, is again attending to business, having recovered from his illness.

Mrs. Lee Parker was a Nogales visitor Wednesday.

Judge Warren Smith of Phoenix, father of Mrs. W. C. Hooks, was a Patagonia visitor Saturday.

Mrs. Harold Yost, Sonolita school teacher, was a Patagonia visitor Monday.

Mr. and Mrs. James M. Little and daughter, Eugenia, of Duquesne were in town Wednesday.

Mr. and Mrs. E. E. Bethell were Nogales visitors Wednesday.

Lee Reagan and wife of Tucson were Patagonia visitors Tuesday.

Mr. and Mrs. Lee Reagan and Mrs. J. H. Reagan left Thursday for Sonora, Mexico, where they have mining interests.

The Girls' Club of Patagonia is laying out a basketball court on Duquesne avenue. Their first game on the new court will be played today.

Mrs. Fred McKee and daughters, Mrs. H. B. Riggs, daughter and son, Mrs. Lou Stevens, Richard McCormick, and Mrs. E. D. Farley attended the Elgin Community Club program last Friday night.

Miss Una Efern of Tucson is a guest at the Commercial hotel for the summer.

George Keating of Los Angeles, general manager of the Big Jim Mining Co., visited the Big Jim mine at Harshaw Sunday and Monday. He was accompanied by Mr. Dunn, one of the company's engineers, who is making plans for further development work. Mr. Keating left Monday afternoon for the coast, but will return about the 30th of this month with a party of California capitalists, who are interested in the mining game.

Mr. and Mrs. Ed Le Gendre of Sonolita were dinner guests Monday at the Commercial hotel.

Robert Thompson and Mr. Bentley, forest rangers at Canille, were in town Monday, when they attended the meeting of the Patagonia Volunteer Fire Department. Lyle B. Smith, forest ranger at Rosemont, also was in attendance at the meeting. Arrangements were made during the meeting for the local firemen to assist in the handling of forest fires when occasion arises. They will cooperate with the forest officials in every manner possible.

Frank B. Caroon, Nogales undertaker, and Matt Hamlin, dairyman of the same city, were Patagonia visitors Monday.

Mr. and Mrs. Pete Etchells of Mansfield were Patagonia and Nogales visitors Monday and Tuesday.

Mrs. C. L. Northcraft returned Sunday from Los Angeles, where she had been visiting relatives for a few days.

Mignon and Louise Stevens, daughters of Customs Inspector and Mrs. G. Lou Stevens, spent the week-end in Nogales with relatives.

C. R. Piquero of Nogales and Karel A. Smith of Mazatlan, Mexico, were in Patagonia Wednesday on business.

Mrs. Amo Sanford McKee of Washington, D. C., and daughters, Amo and Louise, of uscon, spent the week-end in Patagonia.

Miss Margaret Davidson of Tucson is a guest at the Commercial hotel for the summer months.

J. J. Farley and Mr. Prior, who are doing the assessment work on the Humboldt mine in the Patagonia mountains, were in town Tuesday for supplies.

Mr. and Mrs. John Vanderwalker left Wednesday for Phoenix.

Si Swyers has rented the Vanderwalker house.

Dr. W. F. Chenoweth of Nogales was called to Harshaw Wednesday to visit a patient. He is county health officer.

A carload of ice was received this week by C. B. Wilson.

Frank Powers of the World's Fair mine was a Patagonia visitor Tuesday.

Fred Bezotte, formerly a resident of Patagonia, but who has been away for the last two or three years in various mining camps of Arizona, Nevada and California, returned Monday to Patagonia.

The Trench mine shipped a carload of ore this week to El Paso.

Walter Woodman, who has been on the sick list for some time, was taken to Nogales Saturday to undergo an operation. The doctor decided, however, that he needed more rest in order to gain strength before the ordeal could be attempted.

Supervisor R. A. Campbell and Deputy Sheriff Jim Kane motored to Tucson on business Monday.

John Hoy of Nogales was in town this week on mining business.

A forest fire was reported near Harshaw Tuesday afternoon. Forest Rangers Thompson and Bentley went to the scene and found the blaze had been extinguished before their arrival.

W. S. Bartlett, Mrs. Bartlett and Mrs. Allie Dickerman of Tucson paid a visit Wednesday, the 14th, to Ben Powell, which was his 70th birthday.

Mrs. Pearl Burke and Mrs. Isabel Coleman of Nevada are visiting their grandfather, Ben Powell, for an indefinite period.

Fred Kollberg, of Nogales, a mill man for Roy & Titcomb, Inc., and Ed McFarland, who owns a ranch on the San Rafael valley road, had an automobile collision last Saturday near the McFarland ranch. Both cars were considerably damaged.

Cattle Inspector A. D. Page and family of Nogales were visiting relatives Sunday in Patagonia.

Men vanish as if swallowed by the earth in a new mystery love story soon to appear in The Patagonian.

### COMMERCIAL HOTEL GUESTS

The following guests are registered at the Commercial hotel: B. L. Sines, El Paso; Fred Bezotte, Oatman; Robert Thompson, San Francisco; J. A. Yesbie, San Francisco; R. P. Connely, Chicago; B. Maier, Benson; C. C. Wafford and wife, San Francisco.

If you pride yourself on being able to solve mystery stories long before the conclusion, test your wits on a corking good one soon to be published in The Patagonian.

## Radio Will Revolutionize The World—Says Dr. Cadman

That Radio bids fair to revolutionize the world is the belief of Dr. S. Parkes Cadman, famous minister and deeply famous as the world's greatest radio preacher whose "listeners-in," each Sunday, run into millions. Also the revolution wrought by Radio, will be a spiritual revolution, according to the renowned minister. The value of radio as a means of spreading religion particularly impresses him; while the vastness of the audience reached; the diversity of needs and hopes and fears seem to him awe-inspiring.

In "The Gospel on the Air," appearing in the June number of McCall's Magazine, Dr. Cadman dwells with all the rich music of his famous style, the haunting beauty of his imagery, upon the wonder and mystery of Radio. To him it seems a gift direct from the divine, meeting the need of the age for religious teaching and inspiration. As a means of spreading the Gospel he says it:

"The Gospel on the Air" is a vital combination of some hitherto unsuspected forces which bid fair to revolutionize social intercourse throughout the world. Its coming demonstrates the nearness of the invisible to the visible; the intimacy of what is called the temporal with the eternal, their real oneness, and their final unity. It gives the teachings of prophets, psalmists, apostles, poets and philosophers an unparalleled scope."

Radio preaching seems to Dr. Cadman the answer to the religious controversies of the day. But to be of service it must overlook narrow boundaries. It must stress the unity of Christian principles and hopes, and include all people. These articles by Dr. Cadman, of which "The Gospel on the Air" is the first, a complete picture of the man himself. Through his words shines the beauty of his faith and the rich sympathy and understanding of a life-time spent in helping others. But something wholly new and more important even than these appears. That is the astonishing results of the broadcasting of religion. What these are and may be has never before been told or prophesied.

The author seems to be writing in direct response to the thousands of pleas for advice and help which he receives from every part of the country.

Dr. S. PARKES CADMAN Broadcasting One of His Famous Radio Talks.

## Geological Map of Arizona Is Published

The Arizona Bureau of Mines announces that it now has in stock 3000 copies of the Geological Map of Arizona upon which it has been working for many years in cooperation with the United States Geological Survey. The gathering of field data for the preparation of this map was completed nearly two years ago, and it has taken most of the time that has since elapsed to prepare the fourteen plates from which the map was printed and to complete the printing therefrom.

The complete map is in one sheet while hmeasures about three feet eight inches by four feet ten inches. It is on the same scale as the topographic and has emaps of Arizona already issued by this bureau, or about miles to the inch, and is printed in 12 colors and black. By the use of conventional symbols it has been possible to differentiate between 33 different geological formations or types of rocks. The map also shows the location of many of the more important topographic features and towns, together with all railroads and land surveys.

Because of the relatively small scale used in drafting the map, it has not been possible to show the smaller geological features, but it is believed that the map is more accurate and detailed than any that has yet been issued of a state of the size and geological complexity of Arizona.

That a great demand exists for the map is shown by the testimony of the many engineers and mining men who have visited the bureau for the purpose of studying the proof, and by the number of advance orders already received.

It is a comparatively easy matter for any geologist, after studying the map, to decide which parts of Arizona are most favorable for the accumulation of petroleum, and where it is least likely to be found. It also points the way to a search for coal and man ymetallie and non-metallie minerals. In the future no one will wish to undertake a mining or a geological examination in Arizona without first equipping themselves with a copy of the map. The bureau now has in press a voluminous and beautifully illustrated book by Dr. N. H. Darton entitled "A Resume of the Geology of Arizona," which is intended to accompany the map, and which contains detailed descriptions of the various geological formations with many sections and other valuable geological data.

A small key map at the bottom of the sheet shows the sources of the principal data used in compiling the map. A study of this key map will show that when the Arizona Bureau of Mines undertook the preparation of a geological map of the state, reliable data concerning less than one-eighth of it was available. For very large areas, including large parts of entire counties no geological data had been published, and practically nothing was generally known concerning the geological conditions existing there. Men employed by the Arizona Bureau of Mines have been responsible for collecting the information used in mapping geologically 44 per cent of the state. He services of Dr. N. H. Darton of the U. S. Geological Survey, were loaned to the Arizona Bureau of Mines for about a year and a half, and that bureau paid his field expenses during that time. He mapped or remapped 37 per cent of the area included on the map. Fourteen other men, including many employees of the U. S. Geological Survey, contributed the remaining data used in compiling the map.

For several months the bureau has been distributing a topographic map of Arizona which has been highly praised by engineers who have studied it. By its use the approximate elevation of any point in the state may be readily determined, and preliminary locations of highways, railroads, irrigation canals, etc., may be made. It is printed in blue and black with brown contour lines. The contour interval is 100 meters, but a conversion scale at the bottom makes it possible quickly to convert meters into feet. Not only is this map useful to engineers, geologists, and mining men, but everyone interested in the physiography of Arizona should own a copy.

The price of either map, unmounted, is 50 cents; or \$2.50 if mounted on cloth with rollers at top and bottom. Postage is prepaid on all maps. The actual cost merely of printing and engraving each map was considerably more than the price at which it sells, but the bureau does not desire to profit from the sale of the maps. It has priced them nominally to prevent their distribution among people who will not value them, thus early exhausting the stock. Applications for the maps, accompanied by the requisite remittance, should be made to the director of the bureau at Tucson.

### SCHOOL NOTES

(Editor, Joan Evans)

Last Friday the Patagonia basketball team played the Sonolita team. There were two games. One was played by the girls and the other by the boys. The score for the boys was 14 to 8 in Patagonia's favor. The girls' score was 26 to 2, also in Patagonia's favor.

"Bud" McCormick refereed a basketball game at the school grounds Wednesday.

Graduation exercises were held Thursday evening at Nogales, when eta Mead and Alfonso Valenzuela received eighth grade diplomas.

Both teachers and pupils have been busy with examinations. The Fourth and Fifth grades have been working hard on examinations this week. There have been no failures so far.

### ELGIN NEWS NOTES

W. H. Collie was a county seat visitor Monday, when he made final proof on his Vaughn homestead.

Mr. and Mrs. A. L. Hanson and family were Patagonia visitors Saturday. Bert's car became disabled and was repaired at the East Side garage.

Miss Lola Reeves spent a few days last week in Tucson.

Oliver Rothrock, fire lookout on Old Baldy, spent a few days this week at his Elgin ranch on business.

Mrs. E. D. Farley of Patagonia and a party of friends attended the program given last week by the Community Club.

We notice the youngsters here are going around wearing happy expressions. The reason: School closes Friday. They have plans laid for a joyous vacation and we hope their expectations are fully realized.

Stone Collie, who has been working in Tucson, made a short business trip to the valley this week.

Howard Dalton was a Nogales visitor Monday.

The Junior Musical Club did not hold its regular practice meeting Monday night.

It has been learned by the writer that Isabel McGregor has purchased some sort of a musical instrument. That's the stuff; we'll have harmony yet.

Cecil Honnas, a member of the Junior Orchestra, has had bad luck with his slide trombone, the instrument becoming totally destroyed. He has decided that he didn't want a trombone anyway and has purchased a cornet. Sonolita residents should not be frightened by any unusual or loud noise—it will be only Cecil's new horn being broken in.

Mark Boosinger, local musician, played in a Nogales orchestra Monday night for a dance.

The picnic on Mother's Day was an event of an enjoyable nature.

Ira Rothrock is enjoying a vacation with his brother in the Old Baldy lookout station. During his stay there it was arranged to have him remain as lookout for a few days during his brother's absence. We know that high altitudes have a 'growing' effect on young men, and we advise Ira to shave off his beard before returning to the realms of civilization.

A large forest fire was reported in the Rincon mountains Wednesday.

S. M. Beebe was a county seat visitor over the week-end.

Money can't buy happiness—but it will buy an automobile, in which a fellow can go searching for it.

### STATE MINING NEWS IN BRIEF

Silverbell—Over 1,000,000 pounds of copper produced by El Tiro mines since the first of the year.

Globe—Fine body of commercial ore reported cut by Arizona-Globe Copper Co., which is developing old Cole-Goodwin property in Pinal foothills.

Kingman—New Katherine mine to start operation June 1.

Jerome—Rich gold-bearing vein carrying values of 3 1/2 ounces at depth of 20 feet struck in shaft on Red Top properties.

Cochise—Two concentrators which have been under construction in Tombstone district, completed.

Inspiration—Excavation work for new leaching plant at Inspiration Consolidated Copper Co. being rushed with all possible speed.

Swansea—East Side Mining Co. reports strike of lead ore of importance.

Wenden—Wenden Copper Co. to sink permanent working shaft to a depth of 1000 feet; several new buildings constructed at camp.

Nadaburg—New syndicate to erect smelter; \$25,000 to be expended for new installations, machinery and lumber.

Tucson—High grade ore being taken from Big Bonanza claims, formerly known as the Calville claims, located in Coyote range of mountains, near here.

Yucca—Osetgo claims, adjoining Signal Mines Co., purchased by eastern interests; arrangements made for immediate opening of the property.

Chalkville ore found on the 1299-foot level of the Ka ymine in southern part of Yavapai county.

Patagonia—Big Jim mine to sink a 200-foot shaft in a slope showing good ore to determine depth and value of the ore body. Will also erect mill immediately at the mine.

### INSTITUTE DAY IS BIG SUCCESS

Teachers' Institute day, attended by schoolma'ams of the rural schools of Santa Cruz County, on Friday, May 8, in Nogales, was a huge success from every standpoint, says Mrs. Grace A. Farrell, county superintendent of schools. The program, which, for the most part, given by local teachers, was interesting and instructive. Several demonstration classes were used to illustrate the work being done in the rural schools, in which the children too kpart. Especially worthy of note was the demonstration given by Mrs. Hazel Sorrells of Calabasas No. 3 school district, in which 14 Mexican children took part. She showed 11 devices by which she teaches English to the Spanish-speaking child. The class attracted much attention from educators who were visitors and was pronounced by one of them as being the best of its kind she had ever witnessed.

The program was witnessed by every rural teacher in the county as well as many of the Nogales teachers and prominent educators from other parts of the state.

Included in the out-of-town visiting list were: A. M. Davis, director of vocational education, state department of education, Phoenix; Miss Lura Lee Bailey, assistant supervisor of trades and industries, state educational department, Phoenix; Miss Helen C. Roberts, supervisor of Mexican work, Tempe teachers' college; Miss C. Louise Boehringer, editor of "Arizona teacher," Phoenix, and the following county school superintendents—Mrs. Annie E. Daniels, Pima county; Miss Helen Browne, Cochise; Miss Lola Le Baron, Pinal; Mrs. Anna D. Hansberger, Yuma; Mrs. Lucy Brockman, Gila; Mrs. Amelia Garcia, Apache; Mrs. Charlotte Ackler, Coconino, and Mrs. Alice Worden, Graham.

### A. I. C. ISSUES REPORT ON APRIL BUSINESS CONDITIONS

Slight recessions in business were reported from some lines and some localities in April, but the general level showed little change from the preceding month, and some improvement over the corresponding period of last year. Consistent gains have been apparent during the past several years, and while there are no indications of a "boom" the present stability and large amount of development under way assure sound future growth.

Growing crops in the southern irrigated sections have made excellent progress, particularly cotton and alfalfa. In northern dry-farming areas operations have been delayed by lack of rain. Lettuce movement has come to an end, with shipments of 2311 cars from the Salt River Valley, and prospective movement of cantaloupes from that district this summer is estimated from 2400 to 2800 cars. Figures given in the March supplement of "Crops and Markets," issued by the United States department of agriculture, give Arizona third rank among all the states in average value of all plow lands, its average of \$115 an acre comparing with a national average of \$63.

Heavy rains in the north central regions of the state greatly improved range conditions over a large area. Though the precipitation was fairly general, more moisture is needed in the southern sections. Fat cattle prices have been strong, but range sales continue slow. Movement of sheep to northern summer ranges is well along, and lamb shipments have brought good prices.

Some curtailment in production was announced by several of the large copper mines the end of the month, similar steps being taken by producers in other states. Activity of the mines will not be appreciably affected, and it is stated men taken off production will be transferred to development work.

Much activity of a development nature is under way. Construction of the \$4,400,000 Horse Mesa powerdam of the Salt River Valley Water Users' Association has been started, and construction of the San Carlos dam, which will irrigate 100,000 acres in the Florence-Casa Grande valley, will be begun in the near future. Canal system of the latter project will be finished in another year, and the Sacaton diversion dam will be completed in July. Good progress has been made in the construction of the new \$15,000,000 main line of the Southern Pacific. This road is now starting a new station at Yuma, where yards and icing facilities have been completed.

(Continued on page 3)

### GOOD AND POOR NUTRITION CAN BE NOTED IN CHILDREN

Relatively recent is the realization on the part of those who are concerned with the physical condition of the family—whether rural or urban—that it is important to understand the relation between food and health, and to be able to recognize the signs of good and poor nutrition, especially in growing children.

The United States department of agriculture says that a child that is well nourished has an erect, sturdy, well-developed body with straight legs, flat shoulder blades, full rounded chest, strong white teeth, and firm rosy flesh. The expression of his eyes and face denotes a keen happy mind, and all his movements show vigor and energy without undue nervousness.

The body of the undernourished child exhibits just the opposite characteristics, and his listless attitude toward life or his extreme nervousness and irritability show that he is carrying a heavy handicap. His body is likely to be stooped, not well padded with flesh, and the flesh itself pale and flabby. The chest is flat and narrow, while the shoulder blades protrude in "wings," and bow legs and knock knees show that his food has not furnished the right materials for proper bone formation. The teeth are often uneven and show evidences of decay, and the breath is unpleasant, instead of sweet like that of the normal child. There are dark circles around the eyes, and the expression is often dull or listless. Because of the low resistance of such a child he offers fertile ground for bacteria and oftentimes "catches" one disease after another. He is finicky about his food, and temper tantrums are not infrequent. His school work is likely to be erratic and below standard. Some or all of these signs of malnutrition are found in a large percentage of the preschool and school children of the United States today.

### TIMELY FACTS ON U. S. MEAT PRODUCTION, CONSUMPTION

A compilation of figures on meat production and consumption, by the U. S. department of agriculture, contains the following information:

During 1924 the estimated number of food animals slaughtered in the United States reached the highest peak in history, totaling 119,880,500, or about 1.1 animals for every man, woman, and child of the population.

About two-thirds of all food animals slaughtered are federally inspected; the remainder game-third, which do not enter interstate or foreign commerce, are not subject to federal inspection. More swine than any other kind of animals were slaughtered last year, the total exceeding 80,000,000.

The smallest slaughter of food animals was for goats, of which 92,300 were converted into meat; but goats showed a larger per cent of increase in slaughter over the previous year than the other classes of food animals.

The United States stands first among the stock-raising countries of the world, but Argentina and Australia, which are sparsely populated, have large surpluses of beef and mutton and are the principal factors in supplying the European deficit in these classes of meat.

The United States habitually exports from 1 1/2 to 15 per cent of its total production of pork.

The United States has approximately one-sixteenth of the world's population, but has within its borders about one-seventh of the food animals.

The total quantity of meat consumed in the United States has increased steadily each year for the last six years, but the ever-increasing population reduced the per capita consumption about 1 pound in 1924 compared with the previous year. Per capita consumption was 164.9 pounds, exclusive of 15.3 pounds of lard.

Indications point to a somewhat shorter supply of meat for the next year or two at least.

A mysterious symbol combining an arrow and a lizard played a gigantic role in the lives of four persons. Watch for the announcement of a great mystery story to be published in The Patagonian.

Sir: How Dare You? Telephone operators should work eight hours and sleep eight hours—but not the same eight hours—Lilo.

The book of life is always open, but some folks turn the leaves so fast they miss reading it.

## CHAPTER XVI—Continued

The cave grew narrower; then, just when Lee thought that they had reached the end, it suddenly vaulted out and up into a large chamber. The roaring of the waterfall immediately became accentuated as the sounds echoed from wall to wall. By the light of the candle they could now see what looked like a sheer drop into darkness immediately in front of them.

They drew back from the edge hastily. But the next moment they perceived that what they had taken for a precipice was a river, inky black, a swift and perfectly soundless stream rushing through the cavern from side to side of the mountain.

It emerged through a low tunnel in the rock and disappeared through another, barely two feet in height, upon the other side. And the roaring that they heard was not caused by this stream within the cave, but by some distant cataract, either beyond the mountain or deep within the bowels of the earth.

There were evidences, in the shape of rusty pots and kettles, and disintegrating staves strewn about the place, that this had been Pelly's headquarters, while on the opposite side of the cavern there was a deep sand tunnel extending into a smaller cavern under the wall, showing that Pelly had worked this part for gold. And the whole interior was piled high with wood ashes and remains of charred logs.

This seemed, in fact, to be the heart of Pelly's gold mine.

Suddenly Rathway, who had been wandering apparently aimlessly about the interior, uttered a shout and leaped toward the obscurity of the opposite wall. In another moment he had returned, dragging with him a large sack, from whose mouth tiny yellow particles exuded.

As if unconscious of the presence of Lee and Joyce, he knelt down, and, muttering feverishly, began untying the cord about the sack's mouth. The gaping sides disclosed a pit of gold.

Gold in fine dust, gold in nuggets. Rathway plunged his arms within the sack up to the elbows, chucking and mumbling. There was a fortune in that bag, the accumulation of old Pelly's years of nocturnal labors. It was impossible to estimate it, but it would make its possessor a very rich man for life.

"Well, I'm glad you've got it," said Lee.

But he was thinking bitterly of Joyce's loss.

He turned away. Suddenly some instinct caused him to duck and spin around. The flash of flame spurted almost into his face. He heard Joyce's cry ring through the cavern.

Rathway had pulled a second pistol from his clothes and fired at Lee at five or six feet distance.

The bullet chipped a sliver of granite from the wall behind his head. At the same instant Lee saw Joyce aim her automatic and fire deliberately at Rathway.

But of course no discharge followed the pulling of the trigger. Lee had known the automatic was empty, though it had not seemed necessary to warn Joyce.

As he sprang forward, Rathway brought the butt of the weapon smashing down upon Lee's forehead.

Lee dropped foolishly upon his knees; he saw Rathway's face, convulsed with fury, over him; Rathway's arm, yellow with gold dust, raised to strike again. Lee leaned backward, overbalanced, fell into the stream.

He saw Joyce run forward and grasp at him as he was swept past, saw Rathway grappling with her—then he was in the whirling current, and Joyce and Rathway and the cavern vanished as swiftly as a picture on the screen.

Lee was only dimly conscious of what was happening to him, for his senses reeled under Rathway's blow, and it was only an intense effort of the will that enabled him to keep his face above the water. He had a vague consciousness that he was being whirled through the depths of the mountain in complete darkness. The rock roof swept his hair, and the rock walls on his two sides formed a sort of hydraulic tube against which, hurling him from side to side in its fury.

And ever the stream grew swifter, and ever that ominous roaring sounded louder in his ears.

The river was carrying him toward some subterranean waterfall. Half conscious, Lee visualized death among the grinding rocks—death in that viscous blackness that no ray of sunlight had ever illuminated.

He knew in a dim way that this was the end, and resistance being impossible, resigned himself to the rush of the waters, gasping in a few mouthfuls of air whenever it was possible.

The tunnel was growing still narrower, and now the roaring sounded in his ears like thunder. The rock roof dipped to the water. Lee drew in one last breath. He went under. He hung up his arms, and his fingers

scraped the roof—then touched only emptiness. The current hurled him to the surface again. He opened his eyes.

Starlight overhead, appearing between high, precipitous walls, that seemed to scrape the sky. A narrow gorge, through which the current whirled him still more furiously. In the distance a line of white, the boiling of the torrent about the rocks of the falls.

Involuntarily a great cry of anguish broke from Lee's throat. Again and again it broke forth, the spontaneous protest of the body against inevitable destruction.

Upon the brink of the gorge, which had a tiny ledge of rock or undercliff beside the water, a beacon fire leaped into view, far away. Silhouetted against it was the black figure of a man. Lee fancied that he shouted in answer. His head was growing clearer now.

The gorge had become as narrow as a ball bedroom, and the rush of the black torrent toward the falls terrific. It whirled Lee around and around like a ball. The line of white was coming nearer with awful rapidity. Lee saw the figure on the edge of it, tossing its arms as it raced along the brink, but if it was shouting now, its voice was indistinguishable in the roar of the torrent.

Great fallen rocks lined the banks. Lee grasped at them as he was swept by, but they always eluded him, always the current carried him away. Now he seemed poised upon the brink of the tumbling cataract. He grasped at a rock projecting out of mid-stream, missed it. . . .

Something descended over his head, checking him. He seemed to float still in the current, which boiled about and past him. He reached out to the rock, found it, clung there. He reached up one arm and found that he was enveloped in the folds of a long fishing net. He saw Leboeuf upon the brink, not ten feet distant. The man was shouting, but Lee could not distinguish a word. He was pointing toward the shore, to the rock. Lee let himself go.

The great shoulders and arms strained themselves upon the net against the torrent. Completely enmeshed, Lee felt himself being slowly drawn, like a gigantic fish, toward the bank. There was one instant when the force of the current seemed to be pulling old Leboeuf into the stream. The huge body bent like a bow, there was an instant of suspense, then

He Saw Joyce Run Forward and Grasp at Him as He Swept Past.

slowly the great shoulders swung back, and Lee grasped the rocky ledge through the folds of the net. He felt himself raised to the rock rim, felt Leboeuf's arms about him, and collapsed into unconsciousness.

## CHAPTER XVII

### Rathway Takes Thought of His Spoils

Rathway laughed like a hyena as he saw Lee disappear in the swift waters of the torrent. He spun about and struck the pistol from Joyce's hands, pulled the girl to him, and crushed her brutally against his breast.

And Joyce, overcome by this climax of the night's work, suddenly relaxed in his arms and fainted.

Rathway laid her down on the sand and looked at her in perplexity.

He discovered that he was somewhat in the same situation as the fox with the sack of corn and the goose.

If he carried the girl through the tunnel and left her while he went back for the gold she might escape him.

On the other hand, if he left her in the cave while he carried the gold away, she might fling herself into the stream in her despair. And some one might take the gold.

The only thing for Rathway to do was to remove the gold and the girl simultaneously. He carried the bag of gold to the cave's mouth, but in spite of his great strength, the weight was terrific. He reconciled himself to his labors, however, by the reflection that the bag contained a fortune.

Then, returning to Joyce, he carried her to the bag and set her down beside it.

It was fortunate for him that Joyce remained unconscious, or he would have been impossibly handicapped in his maneuvers. Cursing and struggling, first with the bag and then with the girl, Rathway at last got them to the rock at the foot of the tunnel which Lee had so indiscreetly pointed out to him.

Then arose the most difficult problem of all. Either the girl or the gold would have to be left on the upper side of the tunnel while he went back for the other. And during his absence—Rathway shuddered at the thought of any prowler coming along and making off with the treasure.

He was not convinced in his mind that his allies had not followed him.

Rathway chose to leave the girl in safety. It was the greater of his two passions. Gathering Joyce in his arms, he essayed the ascent of the cliff.

How he got to the tunnel's entrance he hardly knew afterward. It was a feat which only the spur of triumph enabled him to accomplish. He had to hold on with both hands while gripping the girl with the insides of his arms.

At length, however, he did succeed in reaching the tunnel's mouth, dragging himself through, and pulling Joyce through after him. The ascent of the rock ladder was trifling in comparison.

He looked at Joyce. She was still in a condition of profound unconsciousness. Breathing an unvoiced prayer to whatever gods controlled his soul, that she would not awake, Rathway laid her down between the monolith and the rocking stone, and went back for the gold.

This job of hoisting the heavy bag up the side of the cliff, required less dexterity, but every ounce of strength that he possessed. Inch by inch, straining and scrambling up the rocky wall, Rathway pushed it before him until, bruised by the impact of the treasure, he got it safely within the tunnel, and thence to the rocking stone above.

He stopped to breathe. He wiped the sweat from his face. It was not very far from dawn. He must have spent hours on that hideous task.

Then, carrying the bag and the girl alternately, he pushed on toward the house. He awakened his slaves with a bellow. They came staggering out, drunk and half asleep.

"Start up the engine, Kramer," he shouted. "We'll have to be on our way by daylight. Gimme a drink!"

He gulped down half a bottle of his own liquor. The reaction after his incredible labors, the possession of the gold, the supreme triumph of that night exalted him. But he was anxious to get away as soon as possible.

At Siston lake, which was only a few hours' journey by motor boat, he would be in his own retreat. He could wait till then to enjoy success. He gloated as he looked down at the unconscious girl.

Something had gone wrong with the engine, and Rathway fussed and fumed while Kramer, the mechanic, was repairing it. The packs were got together, the engine overhauled. Rathway placed the bag of gold dust in the middle of the boat, and carried Joyce to it. He laid her down, and they pushed off.

Joyce had fallen into a profound sleep of exhaustion. She began to stir, stretched out her arms.

"Lee, dear," she murmured. She opened her eyes and looked into Rathway's vulpine face. She screamed. She struggled. She remembered.

She fought like a mad woman, and Rathway was forced to call for a rope. He tied her ankles together and fastened her arms to her sides. He passed the rope around one of the cleats. In spite of her bonds she struggled so that it was all Rathway could do to keep her from tilting the boat over. She screamed continually and tried to throw herself over the side.

At last she stopped, however, and lay still from exhaustion. She never renewed her struggles. She lay in the bottom of the boat with her eyes closed, drawing in convulsive breaths. Despite his triumph and his anticipations, Rathway was afraid of her. He wondered what was going on inside her mind.

It was about noon when they reached the promontory.

Rathway, preceded by Pierre and Shorty with the gold—would not leave it in the motor boat—carried the girl across the neck of land to an isolated hut about three hundred yards away, following a secret passage among the reeds. He laid her down upon the camp bed. Joyce lay rigid, looking at him with dilated pupils, and still drawing in that shuddering breaths. Rathway went out with a

sign of relief; he was still more afraid of her in that condition.

Another person he feared was Estelle, and it was with relief he learned that she was not at the promontory. Estelle had odd ways of wandering alone about the country. Rathway was glad of this temporary respite. Going to the stables, a shanty with two stalls close by, where he kept two horses and fodder for use in unexpected emergency, he saw that one of the animals was missing. No doubt Estelle had gone out riding.

Estelle's personality was a stronger one than Rathway's. He could never cow her by violence, as he cowed his men; on the contrary, he feared her lashing tongue when she was aroused.

He had seen Pierre, Shorty, and Kramer gloating over the gold, and he knew that he would have short shrift if once his men suspected that he was unable to keep it against them, or if they trusted each other sufficiently to combine against him. That was why he had removed it to the hut in the swamp, approachable only by a single narrow track.

There were six other men at the promontory, one of them, the man whom Lee had shot through the hand, being still disabled. Rathway set the whole lot on various jobs, to keep them busy during the remainder of the day. He knew that they would be talking about the gold at night, but he was making his own plans. And, left alone, he paced the track, now gloating over the gold, now over Joyce who still lay silent on the bed, her lips compressed, and that awful look in her eyes.

He went to her side and cut the bonds that bound her. There was no need to guard her; she could not escape him. Joyce sat up slowly, still looking at him in that terrible way. He could not face her eyes. He felt helpless before her. He needed two allies—night and whisky.

"Come, dearie," he began, in a voice that was meant to be pleasurable, "you know everything I've done has been out of love for you."

"Murderer!" Rathway trembled before her outstretched finger. He had thought to have her at his mercy; she seemed to have him at hers.

"Come, now, my dear, if I had to treat you rough—"

"Murderer!"

"You—murderer!" Her eyes were blazing like a panther's. He couldn't understand his fear of her. He crossed the neck, went into his hut, and began drinking. His mind was muddled, and worse, his will was wavering. That girl was bad enough—then there would be Estelle to face. Curse those women! The mental picture of Joyce rose up before his eyes. She had never seemed so desirable. He saw her unconscious in the mine again, with her short, fair hair hanging about her neck, her eyes closed, helpless. Curse her! Why had he only been thinking of the gold? He had had her at his mercy then.

He looked cautiously into the hut again. Joyce was still sitting on the bed, still as a carved statue. Rathway was beginning to be afraid that she was going mad. If she would only give him the chance, he wanted to tell her that he would share the gold with her. Why couldn't she be reasonable? It was that d-d Anderson! How long would she be thinking of him? Weeks, perhaps.

His suspicions of Joyce and Anderson faded him, and he raged all the afternoon, abusing his men, and giving them unheard of tasks. He had the boats cleaned, the engine overhauled, a drum of gasoline placed in the motor boat. He sent some food to Joyce. The men grumbled and went about their work sullenly. Rathway fancied he saw looks passing between them, as if they had some secret understanding. He believed they were conspiring against him. And where the devil was Estelle?

In spite of the hate that he now felt for her, he turned to her in his thoughts in time of difficulty. Curse the woman! She was getting too strong a hold on him! He must send her packing.

His desire for Joyce was a constant goad to him. But he was still afraid of her. He must give her time to weaken. It was not dark enough. And he had not drunk enough. At nightfall the men began a carousal, gathering in a hollow between the huts, protected by a skin roof and sides, but open in front, where a huge fire was kindled. Usually Rathway kept liquor from them, except when on long journeys and for the weekly debauch which he permitted, but now they were openly defying his rigid rule. The possession of the gold had disintegrated everything.

For Rathway, too. He cared no longer. The drunker his followers became, the better for the plans that were condensing in his mind.

As he passed, one of the men defiantly held up a bottle, an act that would have brought swift physical retribution under other circumstances. A man at his side dashed it out of his hand, whispering in his ear. The bottle smashed, and the spirit ran out on the ground. Rathway affected not to notice the incident.

Another man, staggering out of a hut, lurched past him with a numbing gibe. Rathway affected not to notice that either. Let the fools weave their halter!

He went into his own hut and swallowed a cupful of whisky. It helped to steady his nerves. He crossed the neck and made his way to the hut where Joyce was. It was nearly dark now, and through the darkness he could see her sitting where he had

left her, her hands folded in her lap. Fear of her sprang up in him again, and with the fear unreasonable fury. Hate and love left him neutral for the moment, so strongly they contested within him.

The girl did not turn her head, and he steered a wide course of the bed, edging sideways toward the sack of gold dust. Picking it up, he made his way quickly outside. With a great effort he managed to hoist it upon his back, and, staggering along, almost bent double by his burden, he made his way among the reeds until he reached the shore of the lake, a few yards from where the motor boat lay beached at the end of the broken parapet.

He laid the bag down in the swamp growth. He felt more at ease now. No one would think of looking for it

Rathway Laid the Bag Down in the Swamp Growth.

there, and to hoist it into the motor boat would be a matter of only a minute or two.

Looking into the boat, he saw that Kramer had placed the drum of gasoline in it, as he had ordered.

Rathway chuckled. Joyce, the boat and the gold—and Estelle away! What more was needed?

A few hours' delay, until the men were stupefied with whisky, then—

One minute's start was all he needed. Then he was safe. He could make Lake Misquash in three days. There, in the far north, at the last outpost of the Free Traders, run by the half-breed whom he supplied periodically with hooch for sale, he would remain with Joyce, safe against pursuit through the long winter. In any event it was not likely that the gang would have the enterprise to follow him.

In spring Joyce and he would move south by other trails. By spring the girl would have forgotten Anderson. It was beginning to snow again. Clouds would cover the moon that night. Things could not have turned out more favorably. Best of all was Estelle's absence.

But then, through the fading twilight, Rathway saw Estelle coming toward him along the path through the reeds.

And a fury of resentment rose in his breast at the sight of her. He had never hated her more. Why had he tolerated this woman so long after she had ceased to mean anything to him? There was murder in his heart as he advanced to meet her.

## CHAPTER XVIII

### Lee Is Given a Powerful Tool

It was dawn in the gorge when Lee opened his eyes. At first his memories were confused so that he could carry them no further forward than the moment when he turned away from the log house, leaving Joyce with Rathway.

He had meant to kill him then—and here he must have fallen asleep in the forest, for it was daylight. And Joyce had been all night in Rathway's power!

Murder filled his heart; and again everything else was blotted out of his mind but the insensate desire to slay, a primal instinct that swamped every other part of the man's being.

He started up. But—this was not the forest! He was amazed to see the walls of the gorge on either side of him, dwindling away in the distance into open country, with a vista of trees beyond, and splashes of sunshine, interspersed with long waves of shadow, showing that the sun had already risen.

Almost immediately beneath the ledge on which he lay was a cataract, but not deep—a roaring stream of water rushing among the rocks.

And not far away was old Leboeuf, placidly frying bacon in a skillet over a wood fire.

Then all the events of the night flashed into Lee's mind. He uttered a cry, got on his legs.

"Leboeuf!"

At Lee's cry the old Indian turned and came toward him, the skillet in his hand.

"Monsieur?"

"We must go back, Joyce—" And he began to tell the old man of the events of the night, that Joyce and he were married—but it was all incoherent, and he was not sure that he succeeded in making Leboeuf under-

## DAIRY FACTS

INCREASE PROFITS BY GROWING FEED

The dairy farmer who can raise all or a big proportion of the feed for his dairy cows has a distinct advantage over the dairyman who has to purchase his feed, according to Prof. J. B. Fitch, head of the dairy department at the Kansas State Agricultural college. His feed will be cheaper, giving him greater profits on his milk products, and he has the chance of getting market prices for his surplus feed.

Alfalfa is the best hay for dairy cattle, Professor Fitch stated. In sections where alfalfa cannot be grown, sweet clover is being used to great advantage. Soy beans and cowpeas are being used in some sections, both as a hay crop and protein substitute.

Corn or "cane" silage is the best and cheapest feed with which to supplement legume hay. As to the use of corn, "cane," or kafir as a silage crop, Professor Fitch recommends the one which will give the largest yield with the greatest degree of certainty.

For higher production it is necessary to use grain in addition to the bulky feeds. Kansas produces corn, oats, barley, kafir, "cane," and wheat, all of which may be used in a dairy ration. Bran is another popular concentrated feed because of the large amount of wheat milled. Linseed oil meal and cotton-seed meal are both used as concentrated protein for high producers.

Besides the natural pasture crops, the use of wheat and rye for pasture is very extensive. Sweet clover and sudan grass, both of which are relatively new, have also become very popular as pasture for dairy cattle.

## Future of Dairy Herds

### Depends on Heifer Care

Declaring that the future of the dairy herd depends a great deal upon the care given the heifer calves which will be the cows of tomorrow, H. M. Jones, dairy extension specialist at South Dakota State college points out that the usefulness of many a good cow is impaired by neglect or mistreatment as a calf.

"Feeding is of prime importance," he says. "On well-managed dairy farms, regularity in feeding is the rule, and the pails used for feeding calves are as clean as those into which milk is drawn for human use. The best insurance for the health of the calf is cleanliness in quarters and feeding pails."

Raising the calf on whole milk is not economical, according to Jones, but it is necessary that the whole milk be fed for at least the first two or three weeks of the calf's life. After that, he suggests a gradual shifting of skim milk plus a grain ration of ground oats and corn. The cause for an "undersized" cow, he says, can usually be traced to too scanty feeding during the early period of her life.

## Butterfat and Feed Are

### Most Important Items

If a cow receives sufficient nutrients to maintain her body weight, the percentage of fat cannot materially change for any considerable period of feeding or by supplying any particular kind of feed. Cows that are greatly underfed may produce milk somewhat lower in fat percentage than normal. All experiments conducted up to the present time show that there is no positive evidence of any continued direct effect of a feed in stimulating milk production or increasing the percentage of fat. No kind of feed or care will cause a Holstein to give milk rich in fat like the Jersey. However, a cow may be fattened before freshening and caused to milk off this body fat in the first month of lactation, thereby raising the percent of butterfat in her milk.—From Colorado Experiment Station Bulletin 255, "Make the Dairy Pay."

## Dairy Notes

Sometimes cow-testing shows that the cow you think is a "poor sick" is being mislabeled.

See that the pasture fence is in good condition for the summer, making necessary repairs.

Freshen up the premises with whitewash—all buildings and fences which have not been painted.

The cost of producing milk may be reduced by using pastures. The feed cost is generally the biggest expense item in producing milk.

See that the salt boxes in the pastures are kept well filled. Milk cows need more salt when on green pastures.

Continue to feed liberal grain rations to the cows in milk especially fresh green grass is very watery and contains little food value.

The feed and care given the dairy cow will bear a rich harvest all through her coming lactation period. It will help her to start well and that means she will continue well, if you do your part.

(TO BE CONTINUED.)

## A Sweet Breath at all times!

THE FLAVOR LASTS

WRIGLEY'S

After eating or smoking, Wrigley's freshens the mouth and sweetens the breath. Nerves are soothed, throat is refreshed and digestion aided. So easy to carry the little pack!

## MY FAVORITE STORIES

By IRVIN S. COBB

### An Education in Peril

The original of my fiction character of "Judge Priest" was a certain Judge William Bishop, now deceased. He was a wonderful old man—shrewd, simple, kindly, witty, gentle, merciful, and one of the most perfect interpreters of human character that the Border South ever produced.

One time, a good many years ago, the old judge was acting as chairman of a committee of three lawyers who sat to examine a gangling young man from the country who sought a license to practice at the local bar. The candidate had started out to be a blacksmith, but he had decided that wearing a frock coat and making speeches to juries would be easier than bending mule shoes and shrinking wagon tires, and so he made application for admission to the less arduous profession.

Judge Bishop opened the inquiry with a series of questions designed to test the ambitious youngster's general and specific qualifications.

"Henry, my son," he began in his usual benignant fashion, "I suppose you have done a course of reading with a view to acquiring the rudiments of this calling of ours and thereby fitting yourself for your new career?"

"Well, Jedge, I done some readin' but not so very much," confessed Henry. "I aims to do the most of my readin' after I opens an office."

"Well, let's see just what reading you have done," pursued Judge Bishop. "I assume naturally that you have read Blackstone?"

"Black which, Jedge?"

"Blackstone, author of great textbooks on the practice and principle of the law."

The candidate shook his head. "I ain't never heard of him," he confessed.

"Well, how about Coke?"

"I don't know ez I ever heard tell of him, neither."

"Well, surely then you have studied the Constitution of the United States of America and the constitution and the Bill of Rights of the state of Kentucky?"

"To tell you the truth, Jedge, I ain't got round to them yet," admitted the aspiring blacksmith.

"Henry," pressed Judge Bishop, "suppose you tell us just what books—what authorities—you have studied since you became seized with the desire to become a member of our bar?"

Henry pondered a moment. Then his face brightened.

"I tell you, Jedge," he said, "I read one big book called 'Revised Statutes of the State of Kentucky' mighty nigh through, an' I kin remember what it says."

"My son," stated Judge Bishop, "the trouble with you is that the next legislature is liable to meet and repeal every d—n thing you know."

### With All Good Wishes

The colonel of one of our negro regiments serving in France during the World war impressed it upon the rank and file of his command that in the field a soldier addressing his superior officer invariably should have regard for correct military procedure and, as nearly as might be, for correct military language. The lesson must have gone home, because now among the treasured possessions of that colonel is a certain document sent by runner from a forward trench to company headquarters back of the second line of defense.

On a scrap of paper, with a stub of pencil, the author of the communication, a much-harried black corporal then undergoing his baptism of shell, wrote as follows:

"To Lieutenant Seth B. McClintock, Commanding Company F,—Blank Regiment."

"Blank Division, A. E. F., U. S. A."

"Dear Sir—I am being fired on heavily from the left. I await your instructions."

"Trusting these few lines will find you the same, I remain,

"Yours truly,

"James Jordan."

### In the Time of Trial

In our town years ago we had for a city judge a fine old gentleman, typically southern in manner and air and voice and habit. He liked a toddy before his dinner; sometimes he liked one after his dinner. He was a first-rate judge of the merits of distilled liquors.

Perhaps that was why he looked with private disfavor upon the products of a little one-horse distillery which presently started up in the vicinity. Those products were more famous for fire and potency than for purity or mellowness. I heard a seasoned innkeeper say once that when you took a slug of the stuff you immediately had all the sensations of having swallowed a lighted kerosene lamp. Be that as it may, it was lighting whisky. Guinea pigs were prone to insult foxhounds after a swig of it.

On a certain day our judge was decanted against the edge of his favorite bar. Court had adjourned and he was refreshing himself with a toddy. In came a friend.

"Judge," said the newcomer, "have you ever tried any of the stuff they're making at that new still house out on Mayfield road?"

"No, son," said the judge, "but I reckon I've tried nearly everybody that did try it."

## THE AMERICAN LEGION

(Copy for This Department Supplied by the American Legion News Service.)

### CONNER WILL HELP PLAN PARIS MEET

Benjamin H. Conner, commander of the department of France of the American Legion, delivered to the national convention of the Legion at St. Paul, last September, an official invitation to the Legion to hold a national convention in Paris. At that time it was suggested that the convention for 1928 be held "in Paris," in celebration of the tenth anniversary of the armistice.

Plans are now being considered for holding the 1927 convention in the gay city, which it is the ambition of every veteran to see once more. National Commander James A. Drain has appointed a committee, headed by Past Department Commander John J. Wicker, of Virginia, to investigate and work out plans for the migration of this great body of American veterans to the scene of their battles.

Upon Mr. Conner and his associates in the department of France will fall a great deal of responsibility, if the national convention, which has the final power to make a decision, votes to go to Paris.

Mr. Conner, a Kentuckian by birth, is a lawyer by profession. Born at Cornersville, Ky., on November 28

Benjamin H. Conner.

1878, he has practiced his profession for 22 years or more in his native state, in New York and in Paris.

He has been vice president of the American chamber of commerce in France, honorary secretary of the American Navy league in France, member of the board of trustees of the American hospital and vice president of the Association of International Jurists in Paris. Mr. Conner is a member of many professional bodies, including the American Bar association, the American Society of International Law and the American Economic association. He is a writer on legal and economic subjects.

Entering the service as a captain of infantry at Paris on August 14, 1917, Mr. Conner served on the staff of the First division and the Second army corps. He was later counter-espionage officer in the First army of the A. E. F. until the armistice. From December, 1918, to March, 1919, he was chief of the legal department in the bureau of war damages at the peace conference. He was promoted to major on February 22, 1919, and was discharged at St. Aignan on March 13 following.

### Privilege and Duty to Be Member of Legion

Congressman Hamilton Fish, Jr., of New York, in a recent statement commenting on membership in the American Legion, said:

"Every veteran of the World war should belong to the American Legion. It is a badge of honor and a privilege limited to those who served in the armed forces of the United States during the war and received an honorable discharge. The Legion should count its membership by millions, not by hundreds of thousands. It is not only the privilege, but the duty of every qualified veteran to apply for membership and the same applies to those women eligible to membership in the auxiliary. There are tens of thousands of young men who are not qualified who would give their eye teeth to belong to the American Legion."

### "All-American" Post at White Eagle, Okla.

An "All-American" post of the American Legion in the strictest sense of that term is located at White Eagle, Okla. All the members of Buffalo post of the Legion there are full-blooded American Indians. Each member of the post owns an allotment of land from the government and all reside on the reservation near White Eagle.

The Buffalo Braves, only recently organized, are making plans for a membership drive through which they expect to sign up all eligible members of their tribe in the vicinity of White Eagle.

## Doubly Delightful—these rooms that are truly clean

The walls of a room may look good to the eye, but you can't enjoy them to the utmost unless you know they're really clean and sanitary beneath the surface.

That's the reason so many women are turning to KING WALL FINISH for practically all interior finishing. This unusual wall finish is easy to apply, even by one without experience. The cost is less than \$1.00 a room for room of average size. And best of all KING WALL FINISH is the last word in cleanliness and sanitation. Applied directly to the plaster, there's no chance for hidden dirt—no chance for lurking germs in cracks or crevices.

Low cost—easy to apply—the most attractive color combinations—and the last word in sanitation. These are the things you get when you decorate with KING WALL FINISH. Isn't it worth investigating? Write today for name of nearest dealer and FREE Color Chart, showing 19 beautiful colors to choose from.

## CHARACTERISTICS OF FIRE INSURANCE

The basic character of fire insurance should not be confused with that of life insurance with which it has little real similarity. Life insurance deals with certainties involving carefully selected risks, each policy, in the usual course of events, maturing as a claim. Consequently it is practicable to forecast the claims that will fall due, calculate the expense of administration and to arrange rates and investments accordingly.

The same conditions do not apply to fire insurance, which deals with uncertain events only. The great majority of fire contracts never result in claims, and if they did, rates would have to be in the neighborhood of 100 per cent instead of the small charge that actually exists.

Conflagrations and sweeping fires do occur from time to time, however, and must be provided against by the maintenance of special reserve funds. It has happened, as in the case of the San Francisco conflagration, that the accumulated reserves of years have been practically wiped out in a single day. No city is immune from conflagration, and a disaster of this kind brings untold individual suffering and enormous financial loss far in excess of insurance coverage.

In surveying cities and otherwise instituting safeguards against such sweeping, devastating fires, stock fire insurance companies are performing a definite public service.

## A COSTLY JOKE

Not compulsory automobile liability insurance but jail is the best cure for reckless automobile driving which disregards all rights of others.

"Compulsory automobile insurance is a joke," said H. D. Wagner, Chicago claim adjuster for the Employers' Liability Assurance Corporation, "but under certain conditions it might prove to be a very serious joke. So far the legislators have had more sense than to begin such a dangerous experiment. No one knows the dangers of compulsory automobile insurance better than the claim adjuster. Such a law, if enacted, would

## GOOD PAY FOR SOUND IDEAS

There has been a great deal of talk about how to get electricity to the farmer, how to bring about the development of superpower systems, giant power, the greatest utilization of our hydro-electric resources, and the building of steam electric plants at the mouths of our coal mines. Much of the talk regarding these subjects has been for political effect. As a matter of fact, the electric power industry has gone ahead on its own initiative to accomplish all of the things mentioned.

In order to encourage the widest discussion of these subjects, however, and bring out every possible idea regarding past accomplishments of the electric industry and future possibilities, Bonbright & Co., Inc., of New York and the American Superpower Corporation of the same city have jointly offered an aggregate of \$20,000 in prizes for the best articles summarizing progress of the electric industry from 1920 to 1930. The articles will thus be five-year reviews and five-year forecasts. The prizes vary in amounts from \$10,000 in one lump to as low as \$100, and in the aggregate, total 24 separate awards. There are no strings attached, but all papers must be received by Bonbright & Co. on or before May 18, 1935.

Here is a real incentive offered to bring out the best thought of the nation relative to the electric power industry.

## UNLOADING THE RAFT

The press is a unit in demanding lower taxes and a curtailment of federal payroll stuffing. The abolition of 38 out of the 84 federal land offices was a jolt to useless officialism.

The president's action was in the interest of sound and economical government. The offices cost too much to maintain. Thousands of political refugees have been crawling aboard the federal craft, not mere hoboos on a rattling freight but guests in palace cars to be fed and clothed and paid. The president has determined that the only way to economize is to spend less money foolishly already he has set overboard 2300 supernumeraries, and they are still going. The sacred land offices have been the fattest political plums of the west for half a century.

There is no record of decreased efficiency in the departments due to the reduction of workers; indeed, report has it that the jolted survivors do more than the former whole gangs. The presidential road to lower taxes may offend political operators and pensioners but it pleases the people.

make accidents more numerous, would make them more difficult to handle, would produce ten claims where there is one now, and would make trouble all along the line. If compulsory automobile insurance is ever put into effect it should provide that the protection to be furnished must be insurance and not merely indemnification. The insolvency of the insured should not affect the liability of the company for loss, but there are many concerns issuing contracts of indemnification which would attempt to qualify under the compulsory liability act, and the results unquestionably would be very unsatisfactory.

## A Natural Question

Married Man—When a man's married, his troubles are over?  
Unmarried Man—Over what?—Judge.

## PROTECTS MINING INDUSTRY

Both houses at the last session of the California state legislature passed without a dissenting vote a law to provide for the regulation, control and licensing of any person, firm or corporation engaging in the business of mining, sampling, concentrating, reducing, purchasing or receiving for sale, ores, concentrates or amalgams bearing gold or silver, gold dust, silver or gold bullion, nuggets or specimens; to provide rules and regulations therefore; and to provide penalties for the violation of the provisions of this act.

In brief, the bill was to curtail the practice of "high-grading" which prevails to a greater or less extent in all sections where precious metals are mined. It was estimated that California miners lost as high as \$500,000 a year from this practice.

In signing the bill, Governor Richardson said: "It is a constructive piece of legislation of benefit to the mining industry."

All states which do not afford this protection to their miners should adopt a measure similar to the California law at the earliest possible date.

## THE DAY'S WORK

(By Edgar A. Guest)  
Is anybody happier because you passed his way?  
Does anyone remember that you spoke to him today?  
This day is almost over and its tolling time is through;  
Is there anyone to utter now a kindly word of you?

Can you say tonight, in parting with the day that's slipping fast,  
That you helped a single brother of the many that you passed?  
Is a single heart rejoicing over what you did or said?  
Does a man whose hopes were fading now with courage look ahead?

Did you waste the day or lose it, was it well or poorly spent?  
Did you leave a trail of kindness or a scar of discontent?

As you close your eyes in slumber, do you think that God would say:  
You have earned one more tomorrow by the work you did today?

## FAIR JOURNALISM

Some worthwhile thoughts were incorporated in the platform of the News-Herald of Ravenna, New York, over the signature, "The Editor." If newspaper men generally accepted most of its planks, certainly the profession would be none the worse for the experience.

"I believe in my job. I shall at all times be fair to everyone in my community, expecting frequently to be charged with being unfair. I shall not be afraid to champion the poor man's cause for fear of wrath of the rich man. Nor shall I be afraid to stand by the rich man for fear of being charged with having sold out to him. I shall respect and honor my profession, believing that it is a high calling."

A newspaper editor who adheres to such a platform is learning something of the real responsibilities and joys of journalism.

The Patagonian. \$2: Worth the Price

## R. R. RATES DECLINE WHILE WAGES INCREASE

Railway rates are steadily declining while railway wages are steadily advancing, according to statistics received from the Railway Age.

In the four months ended January, 1935, the latest period for which figures are available, lower average rates than those in effect in the corresponding months the year before cost the railways \$50,000,000 in earnings, while advances in straight time daily and hourly rates of pay of employees made their payrolls \$16,000,000 larger in the same months than they otherwise would have been.

Two series of changes which tend to reduce net earnings are occurring in the railroad industry. Rates are slowly but steadily declining and wages are slowly but steadily advancing. That the net return earned by the railroads is being maintained and even increased is due to the volume of traffic, lower prices of fuel and materials and a steady increase in efficiency of operation.

There are two periods in every woman's life when no man understands her. One is before she is married and the other is afterwards.

## THE WONDERFUL HORSE

O horse, you are a wonderful thing. No buttons to push, no horns to honk. You start yourself; no clutch to slip; no spark to miss, no gears to strip; no license buying every year, with plates to screw on front and rear; no gas bill climbing up each day, stealing the joy of life away; no speed cops chugging in your rear, yelling summons in your ear. Your inner tubes are all O. K., and, thank the Lord, they stay that way; your spark plugs never miss and fuss; your motor never makes us cuss. Your frame is good for many a mile; your body never changes style. Your wants are few and easy met; you've something on the auto yet.—American Forester.

## NOTARIES PUBLIC

Legal papers requiring a Notary's Seal and acknowledgment will receive proper attention if brought to Miss Grace Va n Osdale, San Rafael Valley.

Howard Keener, at the Patagonian office, will acknowledge your legal papers, put the Notary's Seal thereon—and has for sale all kinds of legal blanks.

## WALTER P. CHRYSLER'S TRAFFIC TALKS

DISREGARD OF TRAFFIC SIGNALS UNIVERSAL

Paris has introduced the use of red and green lights to control—at least, such is the purpose—traffic from the Rue de la Paix onto the boulevards.

To date it has not been reported that the use of colored lights has been any too successful. Taxicab drivers and pedestrians, even the French traffic officers, have not yet gotten around to the point where they take the lights seriously.

This cannot be explained by exclaiming: "French temperament." Not at all. Go to 42nd Street and Broadway or 42nd Street and Fifth Avenue, in New York, or Michigan Boulevard in Chicago—each city in the United States of any size seems to have one such street—and you will find pedestrians determined to walk or run against traffic signals. When they do that they risk the lives of themselves and of others as well.

Just how to get the pedestrian to realize that traffic signals are for his safety and protection is a problem.

The pedestrian has rights on the streets as well as on the sidewalk. The burden of responsibility rests upon the motorist to see that the pedestrian is unharmed. The man or woman who walks must be permitted to cross streets—when the signal permits—before cars making turns are permitted to move.

A pedestrian will wait on the corner to cross the street. When he gets the signal to go he is menaced by a car coming around the corner. That is wrong. The pedestrian must be allowed to pass first.

Thoughtfulness on the part of motorist and pedestrian, each respectful of the rights of the other, will work out this problem. But it seems evident that it is going to take time.

## Choose one of these tires according to your needs

HERE are two tires that give the car owner a chance to choose intelligently, according to his requirements.

U.S. Royal Cord—the extra service tire. Built of Latex-Treated Web Cord—and the standard of tire value today.

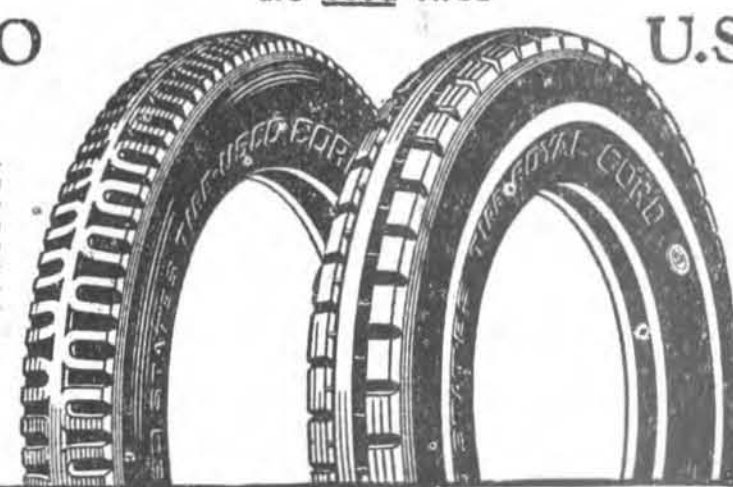

USCO Cord—the high-value medium price tire. A full money's worth of dependable service and cash value.

Both made by the U. S. Rubber Company and carrying the trademark of their makers as a warranty of quality.

# What the World Is Doing

(As Seen by Popular Mechanics Magazine)

Novel Method of Cooling and Ventilating Farm Cellar with Air Cooled by Contact with Water and Drawn through an Underground Duct

## Cooling and Ventilating Farm Cellar

Nearly every farm has a well or creamery near the house that can be used to advantage for cooling the cellar. A simple method of doing this, using water to cool the air, which is drawn through an underground pipe into the cellar, is shown in the illustration. In the upper figure fresh air enters the well and is cooled by the water before entering the pipe, and an electric blower sucks the air through the pipe and into the cellar. The humidity of the air is also increased by passing over the water. If this method is not possible, a similar cooling system shown in the lower detail can be made to work in connection with the water tank in the creamery, if this is not too far away from the house. The duct, through which the cold air is drawn, is run through the water tank as indicated.

## Inspect Aerial and Ground

An occasional inspection of the aerial and ground should be a religious duty of the owner of the receiving set, but especially after the last snow has disappeared from the ground. Winter storms impose a heavy strain on the aerial and masts, and these should be gone over thoroughly to see that they have not been damaged, or the aerial accidentally grounded. There is also the danger that soldered connections have become corroded during the season of alternate snow, sun and rain, and these should be looked to also.

Cherokee Indians gave their children a concoction made from burs to strengthen their memory, under the impression that as a bur will stick to anything, a man lined with burs will be able to hold all useful information.

## CAN AN AUTOMOBILE BE MADE THIEF-PROOF?

(By Edwin Greer, President of Greer College of Automotive Engineering)

The automobile thief is doing a big business of late, and the police records show a large increase over that of last year. How then can the car manufacturer bring out a more or less standardized anti-thief contrivance that will really prevent a car from being stolen, and what will be the characteristics of this perfect lock?

The motorist of today needs badly a contrivance that can be locked or unlocked from the car seat by the driver, or else something that will automatically remind the driver of its existence before he starts the engine again.

Something which merely prevents the engine from being started in the ordinary way is of absolutely no use. For example, if the self-starter is disconnected by the car owner, there would be nothing to stop two or three men from starting the engine by pushing the car with the gears in mesh. Why not give the thief constructive rather than destructive work? Let him build up instead of tearing down. Destruction is much more simple than construction, and it can be done with most any tool. Any prisoner, given time and a saw, can eventually break jail. Therefore, if the device will break a connection of some sort, perhaps something that would temporarily prevent the engine transmitting power to the differential it would be more likely to confuse the thief than a mere locking device, which could easily be destroyed, and allow the car to be driven away.

It isn't the fact of getting the better of a thief with only a few minutes' time in which to work out his getaway. It's got to be something that will puzzle the skilled mechanical thief, who has a longer time in which to accomplish his work.

The majority of old-time motorists' suggestions seem to turn towards some device which will lock the gear in neutral, and, by the way, there are already numerous devices of this kind in existence, many of them operated with a Yale key. The keyhole is within reach of the driver, but in such a position as to make it awkward for the thief who tries to file off the device. But here again is a destructive rather than a constructive job, which brings us back to where we started.

You, as a car owner, should take extra precautions, if you go to unusual risks in the way of leaving your car unattended. A few simple mechanical changes would help complicate the thief's job and, in many instances, save your car.

Come on, you tinkering mechanics, set your ingenious brains to work on this most needed of automobile problems. Here is big money for the man who succeeds in this venture.

Some fellows who get in on the ground floor finish in the basement.

More to read in The Patagonian than found in most weeklies

## Two Hundred Inventions Daily

Reports of the patent office for 1924 show that applications were received at the rate of about 300 a day and that some 200 were granted daily, including designs and trademarks. Those issued totaled 63,062, an increase of nearly 6,000 over 1923, and the number of applications was 101,134. The office reduced the number of applications awaiting official action by nearly 12,000 and lowered the average time to four and one-half months for new work and to between three and four months for old work. All fifty-four divisions of the office were less than eight months behind at the close of the year, while on January 1, 1924, twenty divisions were more than eight months in arrears.

## A Stain for Glass Windows

Window staining for privacy or other purposes, can be quickly and cheaply done at home without calling in a professional workman. The only materials required are white shellac, dye of the desired color, and waterproof varnish.

For a white window, which admits light, but which is not transparent, coat the glass carefully with white shellac, dissolved in alcohol. After the shellac is dry, apply another coat, if necessary; then, after drying again, cover with the waterproof varnish. Such a window can be washed indefinitely without removing the stain.

Colored windows are made by mixing ordinary cloth dyes into the shellac until the desired shade is attained. For instance, for photographic darkroom use, mix orange and crimson dyes into the shellac until it is very dark.

## Broadcasting Power Is Inexpensive

At a recent forty-five-minute program broadcast by WHA, the University of Wisconsin, it was calculated that the cost was only three cents. This figure represented only the actual cost of the electricity consumed, no other items such as the depreciation of the apparatus being taken into consideration.

## TOGS FOR THE FLOWER GIRL; BRIDE'S SUMMER TROUSSEAU

FROM the pictorial viewpoint, almost as important as the bride herself is the little flower girl who attends her. Since the mission of this adorable miss is to "add to the picture" not only must she be befitting in charming fashion, but she must contribute to the color symphony expressed in the wedding scene.

In the fashioning of a winsome frock for the little flower maiden, as with

which float out like butterfly wings, adds charm to the flower-girl frock. Carrying a large leghorn hat filled with roses adds a picturesque feature to the tiny tot's costume.

The season of the bride and her trousseau is upon us. Therefore are the atteliers of the most famous couturiers, likewise the workrooms of the humblest seamstress and home dressmaker buzzing with pleasurable excitement. Under the magic spell

Helps the Wedding Picture.

the artist who produces a lovely picture, it is not the medium used to produce the masterpiece, but is genius that counts. Which applied to the styling of picturesque costume for the tiny flower attendant means that the modest home dressmaker who has the fire of imagination within her and the cunning to do will create a frock of as enchanting grace for the wee flower girl from inexpensive yet colorful cotton voile or organdie as will Madame-of-reknown who insists on using only fabrics most costly.

This is especially true in regard to the exquisitely colorful voiles shown this season. They come in loveliest flower colorings, sheer unto the point of transparency. Best of all they are washable, they cost but a few cents a yard. As to effectiveness, not even the most expensive silks can surpass them. While the beautiful little dress in the picture was fashioned of peach-colored silk crepe, it would be just as attractive developed of sheer voile or organdie. It is the clever placement

of radiant brides-to-be, who flutter in and out giving their joyous orders, genius becomes inspired to create raiment of transcendent loveliness.

Assuming that the hope chest is filled to overflowing with dainty lingerie and lovely bits of finery, and that the bridal gown and veil are safely reposing ready for the supreme moment amidst orange blossoms and tissue paper wrappings the next logical number on the trousseau program is the "going away" costume. What shall it be? An ensemble of course, consisting of frock and coat to match. Since it solves, not only a dress problem, but that of a wrap as well, it behooves the bride-to-be to give most careful forethought to this all-important ensemble costume.

Material? That depends—of course if one is going to motor across country or indulge in outdoor sports then flannel, kasha cloth, fine wool twill or things knitted are the proper thing and the two-piece jumper suit superbly tailored is recommended, with a

Ensemble of Crepe Faille.

of the narrow Valenciennes lace rufflings which gives it charm, together with an inset of wider lace.

A unique collar effect forming streamers at the back of the neck,

lung coat to match. If, however, one wishes to begin the journey in a costume of simple elegance, yet of more formal aspect, why not choose one of the new stylish silk weaves? The mode enthusiastically endorses crepe faille, crepe satin and bengaline.

The model in the picture suggests a delightful honeymoon costume. The fact that it is crepe faille silk makes it ideal for summer time wear. In either wood-brown or navy blue, one might tastefully develop this ensemble. The simplicity of the coat insures a practical wrap with other frocks as well as with the one it complements. The manner in which the embroidered pocket-panel holds the fullness of the skirt in place, is unique.

JULIA BOTTOMLEY.

A BRIEF RECORD OF PASSING EVENTS IN THIS AND FOREIGN COUNTRIES

### CURRENT EVENTS OF INTEREST

DOINGS AND HAPPENINGS THAT MARK THE PROGRESS OF THE AGE

#### WESTERN

Secretary Work awarded an oil shale lease to David J. Brown and James P. Rosenberg of Kemmerer, Wyo., on approximately 2,680 acres of public land in Lincoln county, Wyoming. A royalty of 2½ per cent must be paid the government on all oil produced.

Bernice L. Day was convicted by a jury in Superior Court at Los Angeles of throwing acid into the face of her estranged husband, Darby L. Day, Jr., the son of a Chicago capitalist. Mrs. Day's sister, Carolyn Lundstrom, who was a codefendant in the case, was acquitted.

Four girl students at the Visalia Union High school at Visalia, Calif., were expelled by the school board for appearing in classes with their stockings rolled below the knee. The statement of the board said that stockings rolled above the knee would be allowed.

The Chicago, Burlington & Quincy railroad announced in Chicago that it will cut six hours from the running time of trains between San Francisco and Chicago in order to improve transcontinental mail service. The new schedule will bring the Pacific coast mail into Chicago at 1:10 a. m. instead of 7:05 a. m.

Reports of liquor violations and other irregularities aboard the barkentine City of Sydney, now in San Francisco harbor are being investigated by Capt. Charles Goff, head of the federal prohibition department in San Francisco, and by United States customs officials and the district attorney's office of Marin county, across the bay.

Two men believed to be Joe Tanko and Floyd Hall, escaped murderers from San Quentin prison, held up the United States mail stage between North Bloomfield and Grantville, Calif. They drove the machine at high speed through the mountains, passed through Nevada City and Grass Valley and abandoned the car on the road.

If every possession of E. G. Lewis, St. Louis, Mo., and Atascadero, Calif., promoter of corporations for mining, printing, education, subdivisions and almost every phase of commerce, were sold today it would pay less than 5 cents on the dollar to Lewis' creditors, M. M. Lyter, attorney for the trustees, in Lewis' \$10,000,000 bankruptcy, at the second meeting of Lewis' creditors, said in a sworn statement at Santa Barbara.

The Mammoth Oil Company's brief in the government's suit for annulment of the corporation's lease on the Teapot dome naval oil reserve was filed in the Federal Court in Cheyenne a few days ago. It is a printed pamphlet of 205 pages. The government's brief was filed two weeks ago. The filing of the defendant's brief was the last step of the trial of the suit except Judge T. B. Kennedy's decision.

#### WASHINGTON

After a long depression the beef cattle industry is moving toward prosperity, the Department of Agriculture declared a few days ago in a formal statement. Prices of beef cattle this year, it was pointed out, have been above those of last year, and the potential supply of beef is much reduced.

Following the policy of President Coolidge, Secretary Work not only was vaccinated as a precaution against smallpox, but he went his superior one better. He vaccinated himself. The secretary was a noted physician before he became a cabinet member, and served at one time as president of the American Medical Association.

An indication of improved business conditions throughout the country is shown in the postal receipts of fifty leading cities, totaling \$20,083,231, in April, as compared with \$20,318,448 in April, 1924, an increase of \$2,164,782, or 8.4 per cent, the Postoffice Department announced last week. Dayton, Ohio, led all other cities in the volume of increase in receipts in April, amounting to 29.57 per cent.

Secretary Work recently denied reports that he will retire from the cabinet on July 1. "I am too busy to resign or even think of it," he said. Secretary Work said the Interior Department was never more active in its entire history than at this time. He called attention to the recent complete reappraisal of irrigation projects under way and said that a new policy is being developed for the national park service.

The Knickerbocker Theater Company cannot be held responsible for the collapse of its theater in Washington on Jan. 28, 1922, when 100 lives were lost. The District Court of Appeals so ruled in dismissing an appeal from the verdict of a jury in the District Supreme Court denying Josephine T. Lyman damages for the death of her husband. The jury held that the company had taken all reasonable care in building and operating the theater.

#### FOREIGN

With much less difficulty than had been expected, Winston Churchill, British Chancellor of the Exchequer, has returned the passage of his gold standard bill unamended. The commons passed the third reading of the bill.

The United States navy dirigible Los Angeles, which arrived in Porto Rico on a flight from Lakehurst, attracted thousands of persons to the tender Patoka, to which she was moored. Other thousands lined the shore near where the Patoka is anchored.

Leon Trotsky, former soviet war minister, passed through Rostov, Russia, on his way to Moscow from Sukhum, the transcaucasian resort where he is staying for his health. The famous Bolshevik leader is now definitely reinstated to "good standing in the Communist party."

Jose Gabino Villanueva was chosen president of the republic of Bolivia in the elections held last week. The count of the ballots show that Senator Villanueva polled 45,000 votes as the Republican candidate as against 11,000 cast for the defeated Coalition candidate, Daniel Salanueva.

Control of international traffic in arms and private manufacture of war materials are being discussed by representatives of forty nations, including the United States, at a conference under the auspices of the League of Nations, in Geneva. Former Senator Theodore Burton of Ohio heads the American delegation.

Stinging criticism was directed against the Mussolini government at a recent sitting of the Senate in Rome, to which the premier himself listened with surprising calm. The invectives were pronounced principally by Senator Luigi Albertini, owner of the Milan Corriere Della Sera, the most influential of the opposition newspapers.

A consignment of 117 crates of wild animals arrived in Berlin recently from Abyssinia for the Berlin zoo, the most valuable part of the shipment being thirty rare Abyssinian monkeys, which are so difficult to capture and transport that no European zoo thus far has been able to import them alive. The shipment contained an Abyssinian lion and a leopard, ostriches, antelopes and birds of prey.

The new American ambassador, Alanson B. Houghton, speaking before a distinguished audience in London, which included the prime minister of Great Britain, declared in friendly, but firm tones, that unless peace based on good will were re-established in Europe, he feared American assistance for the reconstruction of Europe must cease. The ambassador made it clear in the course of his address that he referred not only to moral, but monetary aid.

#### GENERAL

Advices to the Chicago weather bureau said frost has practically wiped out the strawberry crop and also unprotected truck crops in Iowa.

Tying the modern major league record, the veteran Ty Cobb, playing manager of the Detroit Tigers, poked out three home runs in a recent game with the St. Louis Browns. Cobb, who led the American league in batting for nine consecutive years, is playing his twenty-first season in big league baseball. He has a record of holding American batting honors from 1907 to 1910, when Tris Speaker took the lead. In the contest Cobb hit six times in six times at bat.

Fraudulent freight billings, whereby railroads between New York and various other cities may have been mulcted of millions of dollars are charged in sealed indictments returned in New York city by a federal grand jury against the Universal Car Loading and Distributing Company, an Illinois corporation with general offices here, and two of its employees. Ten separate charges allege false billings to the Lehigh Valley and Michigan Central railroads.

Atlanta, Ga., was awarded the 1926 meeting of the National Congress of Parents and Teachers by the board of managers of the congress at Austin, Texas. The board of managers also voted to hold its fall meeting at Omaha, Neb., during the last week of September, 1925.

Publication of crime news was defended as a means of preventing crimes in an address in Columbia, Mo., by Marcellus E. Foster, editor and publisher of the Houston, Texas, Chronicle, in observance of Journalism week at the University of Missouri. "I contend that more harm is done by suppressing crime news than by printing it," Mr. Foster said.

Making a new world's record for nonstop flights for seaplanes, the all-metal hull P.N.O., built to fly from California to Honolulu, dipped into the Delaware river near Philadelphia after being in the air twenty-eight hours and thirty-six minutes. She came down only because she ran out of gasoline. The flight, to test her capacity for the cross-Pacific hop, was pronounced a success in every way by naval officers.

The suit of the state of Mississippi against the Ford Motor Company, charging criminal conspiracy to violate the anti-trust laws of the state and seeking to collect penalties of \$12,000,000, filed in Jackson, Miss., by W. J. Miller, state revenue agent, threw a surprise bomb into legal and financial circles throughout the state.

Re-establishment of a free gold market in London with the protection of a \$300,000,000 American credit, overshadowed all other developments in the business and financial world last week.

## BRIEF ARIZONA ITEMS

Ten was served to an appreciative gathering which attended the formal opening of the Jerome public library, in which hundreds of books await readers.

In reply to a query from the Nogales commerce chamber, Mayo Brothers of Rochester, Minn., denied rumors that they intend to buy old Fort Huachuca and establish therein a western branch of their famous clinic.

The Journalism class of the Phoenix Union high school had complete charge of the editorial department of the Arizona Gazette for one issue recently. Students were assigned to editorial positions and others were busy scouting the city for news.

Gov. G. W. P. Hunt declared that there would not be a special session of the Arizona Legislature in an interview given in Phoenix to members of the Journalism class of the Phoenix Union High school who recently edited the Arizona Gazette.

An application for a permit to erect an outdoor arena for the staging of boxing and other contests was filed with the board of supervisors by Jack Sullivan at Phoenix. He declared that if the permit was granted that a stadium seating 5,000 persons would be erected on a five-acre tract outside the city limits.

The State Highway Department has decided to resurface the road between Prescott and Ashfork. It was announced in Phoenix by W. C. Lefebvre, state highway engineer. He said the work would start within two weeks and would cost approximately \$25,000. He estimated that it would take about five months to complete the work.

A decision favorable to the trustees and minority stockholders of the seventy-nine Mining Company was handed down in Tucson by Judge Albert M. Sames, sitting in the Pima Superior Court, when application for a receiver for the stock of the mining company, represented by Lee Reagan and Alice McAdin, was denied by the court.

The Arizona Wool Growers' Association has moved to its summer office in Flagstaff and will remain there until the southward movement of sheep starts this fall. Harry B. Embach, secretary of the association, says the move north is in accordance with the established custom of the association, which provides that the central office must be in close touch with the sheepmen at all times.

Actual construction work on the Horse Mesa dam has been started, it was announced in Phoenix by the officials of the Salt River Valley Water Users' Association. The dam will be half way between Roosevelt dam and the Mormon Flat dam of the Water Users' Association on the Salt river. Officials of the company state that the dam will be higher and more impressive in design than the Roosevelt dam.

Three forest fires, starting at almost the same time, were visible in Tucson recently. None of them was serious, according to reports to the office of the Coronado forest supervisor at Tucson. Three or four acres of brush and a few trees burned just west of Cathedral Rock and a similar loss was reported on Sannanago ridge. Both are in the Santa Catalina mountains at high elevation. Forest rangers from Mt. Lemmon were sent to both fires. The third fire was at the head of Brown canon in the Huachuca mountains, just west of Ramsey canon. All of the fires were thirty-five miles or more from Tucson.

Considerably more than half of the number of criminals sent to the state prison at Florence are between the ages of 18 and 25. It was shown by figures made public in Phoenix by Wm. Delbridge, state parole clerk. The figures cover prisoners received for the fourteen-month period ending Dec. 31, 1924. Maricopa county led with seventy-four prisoners, and none were sent from Greenlee county. A total of 284 prisoners were received at the prison during the fourteen-month period.

Seven spills, resulting in two women being seriously hurt, four others with minor injuries and one man suffering from shock and bruises composed the casualty list of the semi-annual gymnkhana, or horse show of the University of Arizona at Santa Catalina field. The injured were Miss Gladys Walker, who is suffering from a broken collarbone and injuries about the head and face; Miss Sidney Dawson, with a broken arm; Miss Lois Speers, shock and bruises; Miss Jean Clambrford, slight bruises, and Carl Bradford, bruises on head and face. Three other falls in the Roman race and rescue events were marked by minor injuries.

A. E. Wiley, proprietor of a taxicab company operating in Bisbee and three others for hire car drivers from various parts of the state were cited to appear before the State Corporation Commission governing public service cars, the citations having been made by Captain Charles C. Head, inspector for the commission. Wiley and the others are charged with operating over a scheduled line for which a stage company has a certificate of convenience, without charging the 40 per cent excess over the stage fare.

## FRENCH TROOPS ON MOROCCO FRONT

ARMY OF 100,000 PLANNED TO CRUSH MOROCCAN REBELS

### ASSEMBLE ARMY OF 100,000

CAMPAIGN OF SEVERAL MONTHS NECESSARY TO SUBDUCE TRIBESMEN

Tetuan, Spanish Morocco.—Advices regarding the operations between the French and the tribesmen in the French zone indicate that they have culminated in severe combats.

The concentration of French troops along the front lines has been carried out under most trying conditions, inasmuch as the troops were forced to cross a dangerous open zone in which they were targets for sniping.

Occasionally the French had to open the road with their bayonets to protect a regiment of pontoon builders trying to bridge the Targa river. The battalion suffered such a severe attack that it had to call for reinforcements after it was surrounded.

Paris.—Opinions expressed unofficially in war office circles is that Marshal Lyautey, governor-general of French Morocco, will need 100,000 men to suppress the rebellious move of Abd-El-Krim and complete the pacification of Morocco. It may require a campaign of several months to defeat the tribesmen.

Ten days have elapsed since Abd-El-Krim, as head of the tribesmen, invaded French territory in Morocco and, judging from the reinforcements which have been poured into the zone of action daily from France and Algeria, the effectiveness of Marshal Lyautey now must be close to 70,000 men.

During these ten days the French troops have been unable to expel the Rifians from French territory and some of the French posts still are besieged. They are being reprovvisioned by airplane.

It is expected another ten days will pass before the French counter-offensive develops. Military circles here aver that the officers leading the tribesmen in the field are maneuvering like veterans and that they evidently acquired their experience on the European battle fronts in the World War.

#### A. A. U. Clears Nurmi

New York.—Panvo Nurmi, remarkable athlete from Finland, stands exonerated of all charges that he had stepped off the path of amateurism during his running in this country. Hugo Quist, manager of Nurmi's American tour, and Willie Titola, Finnish distance man, also have been cleared. A committee of the amateur athletic union cleared the men in a statement which went as far as to endorse Kenneth L. Wilson, athletic director of Drake University, who had brought charges that excessive expense money was demanded for their appearance in Drake relays at Des Moines.

#### Drops Suit Against Ford

Jackson, Miss.—Dismissing all responsibility for the anti-trust suit filed by State Revenue Agent W. J. Miller in which the state seeks to impose \$12,000,000 penalties against the Ford Motor Company, Governor H. L. Whitfield called upon Mr. Miller to bring about dismissal of the suit out of regard to Mississippi's position in the eyes of the world. The governor's statement, after declaring that the revenue agent had not consulted with him before filing the suit, contends that "the filing of the suit is fraught with most unfortunate consequences for Mississippi."

#### Former Air Chief Falls to Death

Salt Lake City, Utah.—A. Chiron Nelson, former superintendent of the western division of the air mail service, piloting a commercial plane, and two passengers, Grant Christensen and Russell Delage, both 35 years old, were instantly killed at Woodward flying field here when the plane went in a tail spin and fell from an altitude of 100 feet. The plane burst into flames and the bodies were badly charred, delaying identification of the two youths for several hours. The plane had just taken off in the face of a strong west wind when it sideslipped and fell into a tail spin.

#### Astronomer Refutes Einstein Theory

San Francisco, Calif.—Capt. T. J. J. See, professor of mathematics in the United States navy and government astronomer at Mare Island, Calif., announced before the California Academy of Sciences here a few days ago the final results of a series of discoveries, which, in his opinion, refutes the geometry of Euclid and puts the Einstein theory of relativity.

#### To Print More Paper Money

Washington.—The treasury has made plans for printing more paper money in the next fiscal year than ever has been turned out by the American government in any other twelve months in history. Orders have been prepared for the purchase of 200,000,000 sheets of distinctive silk fiber paper, from each sheet of which eight pieces of currency are made, and, beginning July 1, the great bureau of engraving and printing will be run at maximum capacity to meet the nation's paper money requirements.

## NEARLY INSANE AT TIMES

Mrs. Saunders Tells how Lydia E. Pinkham's Vegetable Compound Relieved Troubles of Change of Life

Knoxville, Tenn.—"I took Lydia E. Pinkham's Vegetable Compound while going through the Change of Life. I was very nervous, could not sleep and had melancholy spells. In fact, I was nearly insane at times and my memory was almost a blank. I was so weak I could not do my housework half of the time and suffered dreadfully with to worry it out and I went through this for three years before I began taking the Vegetable Compound which I saw advertised. I think it was eight bottles that I took. It has been two years since I took any and I haven't had a doctor since for that trouble. I do all my washing and ironing and I have gained from 116 to 138 pounds. I feel so well I think I do not need any medicine now, but I advise all women who suffer physically and mentally as I did to give the Vegetable Compound a fair trial. I hope it will do as much for them as it did for me."—Mrs. T. A. SAUNDERS, 711 E. Depot Street, Knoxville, Tenn.

## FOR OVER 200 YEARS

haarlem oil has been a world-wide remedy for kidney, liver and bladder disorders, rheumatism, lumbago and uric acid conditions.

correct internal troubles, stimulate vital organs. Three sizes. All druggists. Insist on the original genuine GOLD MEDAL.

## Pimples

BLOOD impurities are pumped by the heart into the face. That is what causes that grainy appearance, that muddiness, sallowness, pimples, blackheads, acne, red spots, and that impossible "something" which no face cream, massage, or face powder can cover up or beautify. The foundation for a beautiful skin simply is not there, and no face treatment can give it to you. But increase your red-

blood-cells, — and quickly the ruddy tint of purity begins to glow in the cheeks, the complexion becomes Venus-like and immaculate! Try it. It will do it every time. S. S. S. builds the red-blood-cells you need for a beautiful complexion. Begin using S. S. S. at once, and give yourself what you have been working for, for years.

S. S. S. is sold at all good drug stores in two sizes. The larger size is more economical.

#### Everybody Knows That

Excerpt from the diary of Mr. Robert Leroy Ripley, the cartoonist of sport:

"This morning I am in great trouble. Mrs. Whiffler has just called me up to say that I owe her a hat. 'You know,' she chirped, 'you lost that hat to me.' 'We had her on upon the nationality of a dark young man. She said that he was an Italian, and I said he was not. 'But I asked him,' she said over the phone, 'and he said he is a Hun, and every one knows that Hunnians come from Rome.' 'What?' I do?"

Cuticura for Sore Hands. Soak hands on retting in the hot soda of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with tissue paper. This is only one of the things Cuticura will do. Soap, Ointment and Talcum are used for all toilet purposes.—Advertisement.

#### Investigating Mind

He—Why did you kiss that mirror?  
She—I want to see myself as others see me.

The bonds of friendship are stronger than the ties of kindred.

25¢ AND 75¢ PACKAGES EVERYWHERE

# CORNS

Lift Off—No Pain!

Doesn't hurt one bit! Drop a little "Freezone" on an aching corn, instantly it lifts off right off with fingers. Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the foot calluses, without soreness or irritation.

## Serious operation avoided

Resinol healed stubborn sore

Elyria, Ohio, March 1:—"I feel it my duty and pleasure to thank you for the wonderful cure your Resinol ointment has wrought for my husband, who suffered from an open sore on the back of his neck for four years. Several doctors said that it was a cancer and advised its removal, but it was so near the base of the brain that we feared an operation. I had found Resinol Ointment so effective for cuts, burns and similar things that I induced my husband to try that. After using only two jars of Resinol, the sore entirely healed—every trace of it has disappeared. Resinol certainly was a God-send to us!" (Signed) Mrs. E. E. Kennedy, 243 E. 8th St.

## Girls Count "Confetti"

Out of the many intricate jobs done by women in the new ticket office just opened by the London General Omnibus Company, Ltd., at Oldwick, "confetti counting" is surely the strangest, says the Scientific American. When a check is desired on the number of tickets sold during an omnibus journey the conductor's bell punch is opened and the tiny clippings of paper are all poured on the table. The girl, helped by a "metal finger," sorts and counts the clippings, which are built up into little heaps of confetti all the same colors, from which it is easy to calculate how many penny "rides" have been sold.—New York World.

## Important to All Women Readers of This Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it. Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease. If the kidneys are not in a healthy condition, they may cause the other organs to become diseased. You may suffer pain in the back, headache and loss of ambition. Poor health makes you nervous, irritable and may be dependent; it makes any one so. But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions. Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.

A volcanic type of man resents public silence as much as he resents public persecution. Older you get, less often people will refer to it. That's how you know it's so obvious.

Older you get, less often people will refer to it. That's how you know it's so obvious.

INSIST! Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 24 years.

Safe Accept only a Bayer package

which contains proven directions Handy "Bayer" boxes of 12 tablets Also bottles of 24 and 100—Druggists

## DADDY'S EVENING FAIRY TALE

by Mary Graham Bonner

COPYRIGHT BY WESTERN NEWS-REVIEW CO.

### BUNNIE'S BIRTHDAY

Bunnie Bonnie, you know, was a little black-and-white rabbit. He was as dear a little rabbit as could be and his mother loved him with all her little rabbit heart.

Her pink eyes looked at him lovingly. Her little nose trembled with affection for her darling.

It was time for him to celebrate his birthday. Just what birthday it was Mother Rabbit didn't know. But it was a birthday of some sort, as his little mistress had said so.

"We're going to celebrate little Bunnie Bonnie's birthday," she had said. Bunnie Rabbit was quite excited. His ears stood up, waiting eagerly to see what would happen. His heart beat with excitement and his nose trembled too. He was just as devoted to his mother as she was to him, and they were both devoted to their mistress.

They were both feeling very much excited. It was early in the afternoon that their little mistress came out into the garden.

"Many, many happy returns of the day, darling little Bunnie Bonnie," said Bunnie Bonnie's little mistress. "Oh, I hope you have so many happy returns, you darling little rabbit, and you, too, dear little Mother Rabbit."

She took Bunnie Bonnie up in her

Now for the Presents.

arms and kissed him and stroked his soft fur. Then she stroked his mother, too.

They were unhappy if anyone else touched them, but they loved to be petted by their little mistress.

She understood them and they understood her.

"Now for the presents, dear little Bunnie Bonnies," she said.

Here was more excitement. Not only would there be a wonderful thing called a birthday and special kisses and special petting, but there would be presents.

First of all she gave him a lovely bunch of clover.

Then she gave him a beautiful big carrot.

Next she gave him a kind of grass to be had in a field nearby, of which he was very fond.

And then she gave him a leaf of cabbage and two of lettuce.

"Of course you don't have to eat them all at once," she said, "and you'll probably want to share your birthday party with your mother—in fact, I know you will."

"But people always get a lot at a time on their birthdays and so I'm giving you a lot, too."

"Don't eat too much, little Bunnie Bonnie, but have a fine birthday meal."

So Bunnie Bonnie and his mother had a fine birthday meal. They had lettuce for a first course, clover for a second and carrot for dessert.

Then Bunnie Bonnie felt a little sleepy, so Mother Rabbit sang him to sleep with the Bedtime Bunny song. This is it:

Go to sleep,  
Go to sleep,  
Go to sleep,  
Rest, my dear,  
Have no fear,  
Mother's near.  
Carrots are fine,  
Upon them we dine,  
Without them we pine.

Go to sleep,  
Go to sleep,  
Go to sleep,  
Clover is good,  
Very good food,  
We're always in mood  
For things that are green,  
For things that are green,  
It's clear to be seen  
That we say what we mean.

Go to sleep,  
Go to sleep,  
Go to sleep,  
Go to sleep.

### Riddles

When is a chair like a lady's dress? When it is sat-in.

When is a cherry like a book? When both are red (read).

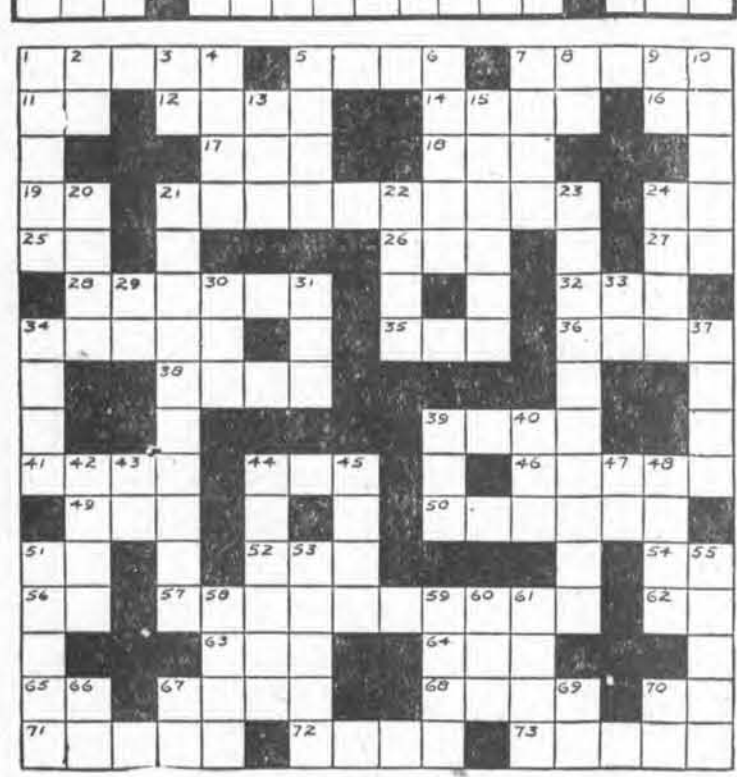

Why is the world like a piano? It is full of flats and sharps.

Why is a good dog like a minute hand? Both are on the watch.

Why is the root of the tongue like a detected rogue? It is down in the mouth.

Why is old ocean so apt to lash himself into fury? Because he is so often crossed.

  - Deputy of sultan
  - Resembling a sand flea
  - Hindu title
  - Can be drawn together
  - A small part
  - Conceal
  - French coin

The solution will appear in next issue.

Solution of Last Week's Puzzle.

1—A musical note

2—Species of bird

3—To harden

4—Birthplace of Abraham

5—Resides

6—Unrighteousness

7—Vowless page

8—A limb

9—Smooth consonant

10—Enclosed

11—The highest point

12—Used in fishing

13—Personal pronoun

14—Unwounded person

15—Dwell

16—Post for ship's cables

17—Under strain

18—River in Germany

19—Beast of burden

20—Goddess of mischief

21—Two or more together

22—Else

23—Denial

24—Part of verb "to be"

25—Sanctioned

26—Allow

27—Act

28—Meager

## NURSERY RHYME PUZZLE

### HAPPY LITTLE JAPPY

YOU happy little Jappy,  
Who came from far Japan,  
Where the cherry blooms are pink  
upon the trees;  
Neath the lanterns hanging nigh,  
With your parasol close by,  
Come take a 'rickshaw ride upon my knees.  
Find another Jap. Upper side down, behind doll.

## POULTRY

### FACTS OF POULTRY WORTH REMEMBERING

The poultry producers who do not give their flocks the run of the farm have a problem of yard management to consider in the handling of their flocks. Where the poultry have the run of the farm this problem is not so important, but, instead, the producer has the problem of keeping the ground immediately adjacent to the houses in a sanitary condition.

It has been demonstrated in all classes of live stock that rotation of pastures is an important means of lessening disease. This has been recognized for many years in the management of sheep and is becoming more recognized in the handling of hogs under the system which is known as the McClean county system.

In the handling of poultry it is well to have double yards so that one might rotate green crops. The yards may be sown to rye, oats, wheat or any quick-growing crop and while the fowls are using one yard the green feed in the other is getting a fresh start.

If the yards are on one side of the house it is preferable that they be on the south side in order that the birds get the benefit of the dry ground and the warm sun in the early spring.

If the yards are in permanent sod it usually requires from 70 to 80 square feet for each bird. If part of the green feed is supplied in other forms half of this amount will be sufficient.

Shade of some type is needed in the poultry yards. Fruit trees are often used for this purpose. If trees are not available then some type of artificial shade should be supplied.

Select the best eggs for hatching. Use the mother hen when possible or hatch early chicks with incubators. Care for early hatched baby chicks well.

Feed early baby chicks properly to give them a good start. It is always well to clean and disinfect the houses and pens thoroughly where the pullets are to live. This is especially true if the birds formerly occupying the building have been diseased or have had worms.

Artificial lights should not be used on pullets until they have had a chance to respond to normal conditions. If they do not respond quickly enough, or if neck molt starts, then lights can be used with good effect.

Lack of ventilation causes dampness in the houses and this in turn results in colds and roup.

### Sunlight a Panacea for All Kansas Hen Flocks

"Why use the ultra-violet ray machine or cod-liver oil to stimulate egg production when Kansas sunlight is so available?" asks Prof. L. F. Payne, head of the department of poultry husbandry at the Kansas State Agricultural college.

Experiments at the college have indicated that a vital element for egg production and for general vigor of poultry is provided by sunlight, by the ultra-violet ray, or by the vitamin contained in cod liver oil, and that if this element is lacking improper development results.

Professor Payne has conducted experiments which indicate that direct sunlight is more beneficial than that which comes through ordinary window glass. In an experiment contrasting egg production of pullets grown in an open house with those grown in a glass-front house the ones grown in the open house were heavier producers and had no trouble with colds or molting, while those in the glass-front house suffered from colds and from molting.

### Palatability of Feeds Appreciated by Fowls

A hen does not have a keen sense of taste, but she does dislike certain feeds, and if they make up an appreciable part of the mash she will reduce two quantities eaten. Linseed meal, bean meal and ground hulls must be used only to a limited extent. Blood meal, rye and cottonseed meal should be left out of the ration. Wheat bran and millet are probably the best-like fibrous feeds. Light colored mashes are usually eaten more readily than dark ones.

Undoubtedly hens or flocks develop individual likes and dislikes. Birds raised on kaffir, for instance, may like it, while another flock to which it is newly introduced may practically refuse to eat it. Hens do not enjoy feed or eat as heartily when it must be dug out of a filthy litter.—O. C. Krum, Colorado Agricultural College, in Extension Bulletin 234-A, "Feeding for Commercial Egg Production."

### Feed for Young Chicks

The young chicks should not be fed until they are 48 hours old, whether they are with hen or in a brooder. The first feed should consist of baked Johnny-cake broken up into small pieces, or hard-boiled eggs mixed with stale bread crumbs or rolled oats, using a sufficient quantity of the latter to make a dry, crumbly mixture or a mash of two parts of rolled oats, one part bran and one part middlings by weight, mixed with milk or with boiled eggs.

### DEVIOUS ARE THE WAYS OF CROOKS

Modern Thief Is Thoroughly Up to Date.

Great criminals of fiction who find it necessary to secure the impressions of keys for some nefarious purpose invariably carry small pellets of wax, which they keep pliable by the warmth of the hand. I suppose years ago burglars did use this sticky and clumsy method, writes Wilfrid Singleton.

The modern criminal, however, moves with the times. A few days ago I saw the impressions of a key taken by an expert gang of burglars who intended to commit a crime. They had their plans all perfected for a huge warehouse robbery. For weeks they had cultivated the acquaintance of the woman cleaner of the establishment, and one of them in the early morning helped in heating carpets and sweeping the stairs. To gather the impressions of all the keys in the warehouse had been a simple matter.

All these impressions were taken in the bone of a cuttlefish, that curious white flaky substance which children and artists use as well as modern burglars. For the bone of the cuttlefish gives a clear, sharp impression of the key edges, far better than can ever be obtained by wax, and moreover it possesses such properties that a mold is already at hand, and the keys can be made at once.

Queer devices of a similar nature are produced by criminal brains. The policeman, young and enthusiastic, who first tied a cotton thread to the handle of a jeweler's shop and a nail in the side of the doorway has long since been found out, as also has his comrade who stuck a pencilled piece of stamp paper on the joint of a door.

The regularity of the beats of these officers enables the crooks to make little of these safeguards. They simply appoint one of their number, known as the "minder," who wanders along behind the officer, armed with a similar piece of sticking plaster and a similar portion of cotton.

Once his friends are inside the premises which are to be robbed, he replaces the policeman's device with his own, and the officer, when he arrives an hour or so later at the shop, discovers his cotton or plaster apparently intact. He walks serenely by, assured of his own alertness, while the burglars inside the shop are probably working with acetylene lamps at the safe that he will not know has been robbed until detectives arouse him in the late morning from his sleep with the news and with requests for explanations.

### Wants to See Action

"My greatest desire," said a Prairie avenue salesman, "is to see someone, some day, use a fire extinguisher. I've been going through the buildings of Detroit for many years and I've seen all sizes and shapes of extinguishers hanging in all possible positions. But never in all this time have I been fortunate enough to witness one in operation. I suppose they are used many times. Perhaps if I continue with my wish I may run into a slight blaze sometime that will give me my thrill. Even better, I may be able to satisfy a greater longing—that of yanking the extinguisher from its moorings and playing it on the blaze myself."—Detroit News.

### Sea Deposits Coal

On the beach of Buckhaven in Fifeshire, Scotland, the sea piles up coal some two or three feet thick. From the town come men, women and children with buckets, boxes, bags and wheelbarrows to get the family supply. From the country come farmers on their horses with bags to get their share, according to the Kansas City Times.

The coal is actually mined by the sea. Ground swells break away the seams outcropping in the Firth of Forth and slowly carry the treasure to the shore.

In stormy weather the product greatly increases.

### In Advertising Jargon

"Hello! Wilbur F. Schwinffel, what's your reaction to this little old day?"

"Jefferson B. Hatch, I'm sold on it—completely, absolutely, totally."

"Same here. As I analyze the position the present weather certainly has a big general appeal."

"It sure does get its story across."

"Count me in on that, W. F.; that's my slant on it precisely."

"No need to canvass the situation on a day like today, J. B."

"Sounds like good psychology to me."

"My name's on the dotted line to that, old man. Well good-by."

### Water Power in Africa

If the world has final recourse in water power to the exclusion of other energy Africa will be the seat of empire. According to the best judgment of engineers, more than half of the potential energy of this old earth's water resources are lodged in the dark continent. There may yet be a cry of Africa for the Africans.—Los Angeles Times.

### Old Town Advances

The oldest town on the North American mainland is Truxillo in Central America. It was discovered by Columbus in 1502 and now its historic streets are illuminated at night by modern electric street lighting units. Electricity is brought to Truxillo by a special 13,200-volt transmission line 12 miles long.

### Mystic Drug Sought

Herbs used by the ancient Maya physicians in South America and supposed to possess almost miraculous powers of curing and healing will be sought by a scientific expedition sponsored by Tulane university, according to an announcement from New Orleans. Dr. William A. Gates is in charge of the expedition, organized as a result of statements made in the Maya manuscripts which have in recent years come to light and which have been taken somewhat seriously by modern scientists.

### COLTER FILES ON DAM SITE FOR STATE OF ARIZONA

Phoenix, May 11.—President Fred T. Colter of the Arizona Highline Reclamation Association today filed for the state of Arizona on the site of the Bridge Canyon irrigation diversion dam, which is just below the Grand Canyon. This site has recently been given much publicity, especially in southern California newspapers, because of its approval by E. C. LaRue, chief of the U. S. geological survey, as part of his plan to bring water by gravity from the Colorado river into Los Angeles. This site is only six miles from the Spencer Canyon dam site, filed on for the state of Arizona by Senator Colter in 1923. The two sites are the same for all practical purposes. If the LaRue gravity plan is adopted by Los Angeles, it will be identical with the Arizona Highline Reclamation Association plan as far down the Colorado river as Topoc. Los Angeles has voted \$400,000,000 of bonds to build an aqueduct from the Colorado river.

The Arizona engineering commission has estimated that it would cost \$480,000,000 to complete their canal and irrigation system (which is based on an old survey and expensive estimate because of its low level, making much more tunnelage and only irrigating two million acres), including the Glen Canyon storage reservoir, the site of which is located just above the Grand Canyon, which would have a storage capacity of 50,000,000 acre feet. The Arizona Highline Reclamation Association plans and surveys are on a higher level, making less tunnelage, and only costing \$320,000,000, and will irrigate 3,500,000 acres, mostly in southern Arizona. It is estimated that three-fourths of the expense of constructing the proposed Highline canal would have to be incurred above Topoc.

If Los Angeles completes that portion of the Colorado river development above Topoc, taking the largest estimate with much less acreage served, the Arizona Highline Reclamation Association could complete its canal to southern Arizona for no more than \$120,000,000, which would irrigate 3,500,000 acres. The joint development, when completed, would release six million electric horsepower, or 75 times as much as the completed Salt River Valley irrigation project will produce, all of which would be subject to taxation in Arizona. The association estimates the financing will be easy, as there will be much more than enough power to pay off the bonds and will quickly solve the Yuma and Imperial Valley flood situation.

Peter DeWolfe refused to heed the sinister message warning him of the fate or the vanishing men. Read the absorbing mystery novel soon to be published in The Patagonian.

Love may make the world go 'round, but go does a wallop on the jaw.

### MUST CHECK FOES OF MIDDLE YEARS

Diseases of middle life are the only ones which medicine and public health have not checked during the last few decades.

Dr. Louis I. Dublin in the May Hygeia states that 18 years have been added to the life span of the average American since 1855. At that time the average duration of life was only about 40 years; now it is 58 years.

But although the infant death rate has been forced down, tuberculosis is being checked, typhoid fever is now of minor importance and the communicable diseases of childhood are being controlled, little has been done to check the diseases of middle life—heart disease, the diseases of the kidney and of the blood vessels.

These diseases of middle life are more often the result of the year and tear of tissue than of infection. They reflect the type of personal hygiene practiced by individuals.

Men and women at 50 should be at the height of their productive careers, declares Dr. Dublin, rather than the subjects of incessant medical tinkering—worn out machines looking to death for the relief of their invalidism.

The first step, he believes, is to develop an extensive plan for detecting diseases which prey on persons in middle life before they can do the damage which results in premature old age and death. The periodic medical examination is thought to be the most promising step to this end. Already thousands of persons are regarding such examinations in much the same way as the periodic examination of the teeth.

Periodic health examinations should begin early in adult life. The older the group examined, the larger the number that are found previously impaired and in need of urgent medical care. Young persons, advised in hygiene and treated accordingly, have a good opportunity to eradicate an adverse condition and to add years to their lives.

### A FEW FACTS ABOUT ARIZONA'S FORESTS

There are 100 distinct species of native trees in Arizona. Most of them grow in the mountains; a few only in the desert.

Ninety-five per cent of Arizona's forests belong to the federal government and the state. They are administered and protected for the benefit of the public.

Eight national forests in Arizona contain 3,500,000 acres of saw timber, of which only 350,000 acres have been cut over.

Arizona's national forests contain 13,000,000,000 feet, board measure, of saw timber and 13,000,000 cords of fuel wood.

The great yellow pine belt, extending from the New Mexico line to the Grand Canyon, a distance of over 200 miles, is the largest known forest of one species in the world.

Besides furnishing a continuous supply of timber for the state, the forests provide rest and recreation for thousands of campers and tourists and a refuge for birds and animals.

Perhaps most important of all, they prevent floods and silt, help perpetuate the springs and streams, and conserve the water supply for irrigation reservoirs, without which the agricultural prosperity of the state would be seriously reduced, or even destroyed.

### I. A. C. ISSUES REPORT

(Continued from page 1)

larged following construction of a new bridge over the Colorado. The Santa Fe will build a new station at Flagstaff this summer, and is ballasting 50 miles more of the Ash Fork-Phoenix line. A \$500,000 improvement program has been announced by the Phoenix gas and light company, and Mesa and other cities have public utility improvement projects planned.

April checking transactions in principal cities of the state as reported to the Arizona Industrial Congress compare favorably with those for March, and with but one exception exceeded figures for April last year. Gains in general business were reflected in the consolidated report of the state banking department summarizing the condition of all Arizona banks on April 6 as compared with March 31, 1924, deposits increasing over \$3,000,000, and loans increasing nearly \$4,000,000.

### TO CONTROL PRODUCTION OF DRUGS IS SLOW PROCESS

Now cases of drug addiction are now confined almost exclusively to nervously abnormal persons who buy smuggled narcotics from peddlers, and to other persons to whom it has been necessary to give morphine to relieve prolonged physical pain or distress of one kind or another.

In order to eliminate the illicit use of narcotics, the United States is now negotiating with other countries in an effort to bring about some arrangement whereby the production and sale of these drugs will be so limited that none will be available for smuggling. If this end is successfully accomplished the last remaining vestige of unnecessary drug addiction will disappear.

Inhabitants of countries producing the opium and cocaine used by addicts living in the United States and Europe are not easily persuaded that they should limit their means of making a livelihood in order to protect dissipated peoples of other countries.

As a means of surmounting this difficulty, suggestions have been made for the substitution of other crops for opium, but a change in the habits and mode of gaining a livelihood of thousands of people is not easily brought about, even when it is possible to do so at all, without seriously embarrassing the economic condition of those most concerned.—Dr. Lawrence Kail, in Hygeia.

Brena Selcoss radiated beauty like firelight on the walls of an ancient temple, but men were warned of her sinister influence. Read of the startling happenings in the new serial story soon to begin in The Patagonian.

### ARIZONA ITINERARY OF PUBLIC LANDS COMMITTEE

Investigation of all questions involved in the administration of the public domain, forest reserves, Indian reservations and national parks, which is to be made by the senate subcommittee on public lands, of which Senator Ralph H. Cameron is acting chairman, will begin in Arizona at hearings to be held in Douglas on the morning of June 5. The committee will arrive on the preceding day. The itinerary from Douglas follows: Tucson, June 6 and 7; Globe, June 9 and 10; Phoenix, June 11 and 12; Prescott, June 13 and 14; Flagstaff, June 15 and 16.

Arrangements are being made by the chambers of commerce of the cities to be visited by the committee for the entertainment of the distinguished visitors.

In a communication to John R. Towles, register of the U. S. land office at Phoenix, Senator Cameron suggests that leading stockmen, business men and others interested, directly or indirectly, in matters pertaining to the investigations, be invited to present their views to the committee.

The committee is desirous, Cameron wires, to obtain the livestock men's criticism of the department's recommendations, especially as regards fees to be charged, methods of settling disputes, and the advisability of administering all grazing lands under one department.

This committee operates under the resolution offered by Senator Cameron during the closing days of the last congress.

The wages of sin is a check from a confessions magazine.—Life.

### PATAGONIA WINS TWO GAMES OF BASKETBALL FROM SONOITA

Both the girls' and boys' basketball teams of Patagonia were returned victors over their Sonoita opponents Saturday in the most exciting games yet.

The Sonoita girls were clearly outclassed by the peppy girls from home, going down to defeat by a score of 23 to 2.

Genevieve Amado scored the most points for Patagonia, ringing up 19 goals.

The boys' game was more thrilling, the issue being in doubt until the final whistle was blown. The superior playing of our boys brought them a well-earned victory by a score of 14 to 8.

S. Sinohul of Patagonia was high point man with 12 goals to his credit. The excellent playing of A. Braden and L. Braden of Sonoita and A. Valenzuela of Patagonia is deserving of mention.

A return game for both boys and girls will be played on the Patagonia court today.

### JAP COLONIZATION PERMITTED IN MEXICO

Mexico City.—Japanese families will be permitted to enter Mexico the same as any other nationalities and may acquire all classes of property within the law, according to the new Japanese-Mexican treaty of commerce and amity, the terms of which were made public by the foreign office last week.

Under the law they will thus be permitted to acquire lands within 150 miles of the border of the United States and within 50 miles of the coast. They may buy, sell or bequeath any property the same as Mexican citizens.

The genuine Bon-Ton Ivy cushion band means real comfort.

Fancy silk band, extra quality satin lining. Low priced at—

**\$1.98**

### Contrasting the Old With the New!

When the caravans went into Egypt, carrying the products of the Red Sea district, "buying from one another" had its origin.

When Mr. J. C. Penney arrived at Kemmerer, Wyoming, in the Spring of 1902, economical, modern-day, national distribution of goods through the channel of chain department stores, had its inception.

The history of the growth and success of the Stores that bear the name of Mr. Penney reads like a book of romance and fiction, but in all details it is a corroborative narrative of Right Dealing, Value and Service.

It marks an era of progressive storekeeping.

J.C. Penney Co.
