# SANTA CRUZ PATAGONIAN

Patagonia Has Some Very Promising Silver, Lead and Copper Mines That Need Capital to Develop Them

VOL. XIII

(\$2.00 a Year in Advance)

PATAGONIA, ARIZONA, FRIDAY, MAY 22, 1925

(Single Copy 5 Cents)

NO. 24

## PERSONAL AND SOCIAL

Federal Agents L. F. Carl of Marfa, Texas and G. Claude Bond of Liberty, Texas, are in Patagonia for a stay of two weeks on government business.

Herbert Miller of Tempe and C. S. Brown of Mesa, Ariz., were in town Thursday demonstrating what has been accomplished for the desert by the United States department of agriculture.

Mrs. George Parker and son, George Jr., were San Rafael valley visitors Wednesday.

Mr. and Mrs. Fred Kolberg stopped in Patagonia Wednesday en route to Blaboe.

W. J. Loring and Dr. Miller prominent mining engineers, who have been inspecting properties in this district for several days, left Tuesday for Tucson, accompanied by Richard McCormick. They will go to Los Angeles from the Old Pueblo, with the intention of returning to Patagonia next week.

E. F. Bohlinger was a Nogales business visitor Tuesday.

Mr. and Mrs. James M. Little of Duquesne were shopping in Patagonia Monday.

Mrs. O. J. Rothrock of Elgin spent the week-end in Patagonia, the guest of her daughter, Mrs. C. J. Trask.

Mr. and Mrs. R. C. Blabon returned Tuesday from Fort Thomas, where they had been for several days' vacation.

Mr. and Mrs. E. E. East of Glendale, Calif., stopped in Patagonia for a day's visit with Mrs. E. H. Evans, while en route to New Mexico. The ladies have been friends since girlhood.

C. A. Wheeler of Tucson was a business visitor in Patagonia Wednesday.

R. W. R. Rudolph of Tucson was in town Wednesday on business.

Under Sheriff Pat Patterson was called to Bloxton Wednesday on official business.

M. A. Hogan of Harshaw was a Patagonia visitor Sunday.

Mr. and Mrs. Garry Lindley of Douglas spent the week-end in Patagonia, the guest of Mr. and Mrs. J. M. Little. Mr. Lindley is a brother of Mrs. Little.

William Leek has started development work on the Sunlight group of claims.

Postmaster H. B. Riggs and son, Ralph, were business visitors Thursday in the county seat.

There will be a baseball game Sunday afternoon in Patagonia, between the Patagonia nine and Gasoline Row of Nogales.

Two carloads of ore were shipped this week to El Paso.

nextday-visitedth cmf cmfwp pup C. B. Wilson received a carload of hay this week.

The Amado brothers, Gus, Ricardo and Rafael, located some lead-silver claims recently in Walker Basin, in the Santa Rita mountains, and are bringing in some fine ore specimens.

John Costello came in Tuesday from his Last Chance property and says he has a large body of good ore in sight.

Two forest fires were reported this week near Patagonia, one in White House Canyon, in the Santa Ritas and the other in the Huachuca mountains near the Mexican line.

Deputy Sheriff Jim Kana has been out in the mountains for several days fighting forest fires.

Francis Francione is in town this week from Josephine Canyon, where he has been mining.

Andrew Bettwy of Nogales passed through town Monday and stopped to see old friends.

Forrest Bradford, who is in charge of mining operations in Sonora for Dr. Gustetter of Nogales, was in town Sunday making preparations to move his family to Nogales.

Mr. and Mrs. H. A. DeFord of Tucson and daughter, Betty, were Sunday visitors at the editors' ranch in the San Rafael Valley. They were accompanied from the Old Pueblo by Miss Grace Van Osedale, who had been under treatment for a serious stomach disorder for several weeks, but who is much improved in health.

Miss May Hazlewood, teacher of the San Rafael Valley school for the year just closed, left Friday for Globe for a short visit with relatives, before entering summer school in Tucson in June.

Customs Officer G. Lou Stevens and Immigration Inspectors C. J. Trask and William Adams, who had been camping in the hills, on government duty, returned Monday to the local immigration station.

When Brena entered the room she saw the great glass shattered in pieces—riddled with revolver bullets where her husband had shot at his own reflection. Read "The Vanishing Men," the amazing mystery love story starting soon in The Patagonian.

### GLENNA MADSEN, 20, COMMITS SUICIDE IN SAN RAFAEL

Miss Glenna Madsen, age 20 years, shot and killed herself Wednesday, at 11 o'clock in the home of her parents, Mr. and Mrs. John Madsen, in the San Rafael Valley, following a fit of despondency over her failing health. The shot that ended her life was fired from a .22 caliber rifle, the bullet entering her left temple. Death was instantaneous.

The justice of the peace, acting as ex officio coroner, was called at 1 o'clock to hold an inquest over the remains. The jury members were Bud Baldwin, Elbert Kinsley, A. L. Kinsley, George N. Bagley, R. N. Keaton, W. C. Hooks, and Harry Steen. Whose verdict was that the young lady came to her death from a gunshot wound made by a bullet from a .22 caliber rifle by the deceased with suicidal intent, the bullet entering her left temple, causing instantaneous death.

Miss Madsen was of a cheerful and lovable disposition and her suicide was a surprise and shock to her family and friends. While living in California a doctor told her one of her lungs was touched with tuberculosis. The family moved to the San Rafael Valley about a year ago in hopes of restoring the young lady's health. She was in apparent good health, but recently had been in the habit of ascertaining her weight daily. The fact that her weight was steadily declining probably caused her to worry, with the final determination to end her life before she became a helpless invalid. She left a note addressed to the Madsen family, telling them the reason for her rash act.

Deceased was born in Safford, Arizona, and had lived in this state practically all her life. She is survived by her parents, two brothers and two sisters.

The body was removed Wednesday night to Safford for interment, where the funeral services will be held at 10 o'clock Saturday morning.

The family have the heart-felt sympathy of their neighbors and friends in their bereavement.

### COMMERCIAL HOTEL GUESTS

Charles A. Wheeler, Tucson; R. W. Rudolph, Tucson; Mr. and Mrs. E. E. East, Glendale, Calif.; Barbara East, Glendale, Calif.; W. H. Wickham, Tucson; L. F. Carl, Marfa, Texas; G. Claude Bond, Liberty, Texas; A. Parr, Los Angeles; George Hereford, Los Angeles; H. Wolfslaw, Los Angeles; Bartolo Barcelo, Los Angeles; L. E. Campbell, Los Angeles; Halbert W. Miller, Tempe; C. S. Brown, Mesa.

Once Brena had crept down stairs at midnight and heard no sound. Her husband was crouching down below the window sill, only his eyes above, like one who expects a sudden attack. Read "The Vanishing Men," starting soon in The Patagonian.

## Rich Men Woo, But Rarely Wed Us, Plaint of Chorus

In the chatter of the dressing room the newcomer is disillusioned.

As a short cut to love and riches the chorus rates a 99 per cent loss. Marriage for love alone fares slightly better. Statistics show that of one hundred girls who have been in the chorus during the last two years:

One is happily married to a rich man.

Eleven are happily married to poor men.

Twenty-six are playing either on Broadway or on tour.

Twenty-nine have drifted from the stage to the cabarets and summer resorts.

Thirty-three are divorced from men whom they married supposing them rich.

In June "Smart Set," a chorus girl calls millionaire "catches" mythical.

In the chatter of the dressing room, the newcomer learns:

"Rich men'll woo. But they don't generally wed. Dig while the diggin' is good."

"Let the college boys alone. They get tight and then they get fresh. And they're always long on talk and short on cash."

"It's the old birds that fall easy."

After two or three equally important lessons, one of which involved her own divorce from a professional dance partner, the writer found happiness by returning to the simple, but dependable, sweetheart in the little Pennsylvania town.

### VAUGHN NEWS

George C. Sleeth preached his farewell sermon in The Little Adobe Church on the Hill to one of the largest audiences that has ever been assembled in the Vaughn district, and has gone east for the summer. He expects to return to Tucson about October 1. During his absence there will be preaching at the church every second and fourth Sunday of each month. On May 24 Miss Marie Snyder will speak. She is well known to residents of this neighborhood, having addressed audiences several times in the past at the Vaughn schoolhouse. She is an entertaining speaker and usually has a story for the young folk, those failing to hear her talk will miss a treat.

Clarence Beatty has taken a position at the Manistee ranch, north of Elgin.

Bernice Harrison has gone to Tucson, where he will be employed by the S. P. railroad as a brakeman. Good luck and success.

Stanley Stoddard is working on the state highway, awaiting rain to put his ranch in shape for planting a bean crop.

Choline Harrison was a week-end visitor in the Vaughn district.

Ed Ellis was a county seat visitor early in the week, where he purchased supplies for his ranch.

Miss Ruby Kerr, Vaughn school teacher, has closed school and returned to her home in the south. She is much pleased with climatic conditions here.

Mrs. Clarence Beatty visited her brother at Amado last week. She was accompanied by Miss Ruby Kerr.

Mr. and Mrs. Frank Jolly made a trip recently to Elgin and returned with a fine Holstein cow.

Jim Fraizer is at home again after having spent several weeks in the San Rafael Valley with the Greene Cattle Company.

Gus Yeary spent the weekend at Vaughn, the guest of his parents.

### A NEAR-ACCIDENT

"We weren't doing anything like 30, your honor. We may have been hitting it up a little when we struck the hill, but we were down to 20 miles within two car lengths."

Next witness: "We never went faster than 15 miles, your honor, and when we came to the cross-road we slowed down to ten."

Defendant: "We were practically at a standstill when the officer came up."

The Court: "I'll have to stop this thing now or you'll be backing into some one. Twenty-five dollars."—American Motorist.

### BETTER POULTRY HASTENS IMPROVEMENT OF ALL STOCK

A total of 1,164,657 fowls—all breeding stock—are listed in a report just issued by the U. S. department of agriculture as undergoing improvement by the use of purebred male birds. The fowls consist principally of chickens, but include also turkeys, geese, ducks, guinea fowls, and pigeons. The report deals with the progress of the "Better Sires—Better Stock" campaign conducted by various states and the department for the improvement of domestic animals.

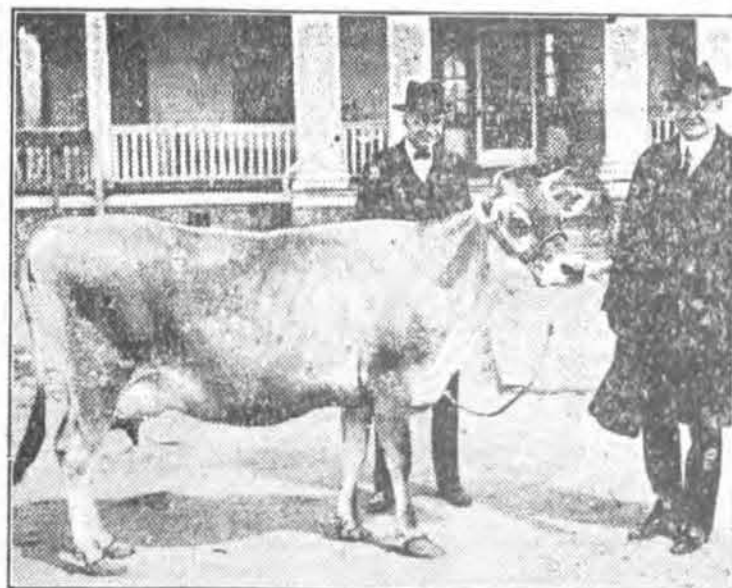

It is noticeable, however, that fowls outnumber other stock by more than 2 to 1. The number of cattle, horses, asses, swine, sheep, and goats totals slightly more than half a million as compared with considerably over a million fowls.

Department livestock specialists point out the educational effect which improved poultry has on the breeding of larger animals and cite examples in which a well-bred poultry flock was the means of causing the betterment of other animals on the same farms. Being prolific, poultry respond very quickly to good breeding practices, including the use of high-quality purebred males. The report shows also that the use of purebred sires in poultry breeding stock results in the ownership of more than ten times as many purebred female birds.

The small investment necessary to establish breeding pens of well-bred fowls makes poultry a popular class of livestock on which to begin a program for improvement.

### SENSATION'S MIKADO'S MILLIE 568901

World's champion senior 2-year-old Jersey cow Dixie's first world's champion and the southern 2-year-old champion dairy cow over all breeds. In 365 days she produced 850.81 pounds of butterfat and 13,303 pounds of milk. Her owner, Fred H. Young, of Timmonsville, S. C., stands behind the new champion with Herbert Hoover, secretary of commerce, on the right.

### TEN YEARS IN THE 'HOME TOWN' NEWSPAPERS

United States Rubber Company Celebrates Tenth Anniversary of a Pioneering Advertising Program

In 1915 there were 2,445,666 automobiles in this country.

It seemed a tremendous number. Some people were already talking about "the saturation point" being not far ahead.

But if there were some men who couldn't see the woods for the trees, there were others whose faith never faltered.

It took a lot of vision for them to see that the true market for the automobile had hardly been touched.

It took a lot of courage for them to bank on the ultimate success of the automobile in that market.

They had both.

Back in 1915, the United States Rubber Company said "The real future of the automobile is not in the big cities but away from them."

It is not in short runs on city streets, but in mile after mile on country roads. So, back in 1915, the United States Rubber Company began to prepare for this movement—and to help it.

In 1915—ten years ago—the first U. S. Tire advertising began to appear in the "home town" papers.

Few people saw these papers in their true dimension. Few realized the influence they had on what the people thought and did and wore and bought. Because few people realized the place they filled in the minds and lives of their readers.

The United States Rubber Company saw.

As clearly as it saw that the development of the automobile would be in the smaller communities, it saw that the people in these communities would have to have tires to measure up to the service and tire merchants to sell them.

And it saw that in the "home town" newspapers it had, ready to hand, the medium to help it put the merchandise where it would have to be in the new era of the automobile.

So ten years ago people began to read the first U. S. Tire advertising in their "home town" paper—over the name of their "home town" dealer.

They have been reading it ever since.

They have seen these home dealers develop their little "side line of tires" into real business—always with the support of "U. S." advertising in these local papers.

Coincident with the tenth anniversary of "home town" advertising by the United States Rubber Company, this company announces another long step forward in the perfection of automobile tires—the greatest since the introduction of the cord itself—in its perfected Latex treated—Web Cord Royal Balloon tire with the flat low-pressure tread.

Today there are 16,000,000 automobiles in this country.

Eighty per cent of them are owned by men and women on the farms and in the smaller communities.

Where there was one U. S. Tire dealer in the small towns then there are hundreds today—real merchants.

What was only a vision in 1915 has come true in 1925.

The glue maker who holds that a man should have a new wife every five years is not living up to his trade.

### CALIFORNIA MAY CO-OPERATE WITH ARIZONA

Los Angeles, May 22.—Business interests of southern California through their civic and commercial organizations, are laying plans for a permanent program of cooperation with Arizona agencies in the development of the latter state.

The program represents a new idea in sectional rebuilding, based on a growing realization that southern California will benefit commercially from the growth of the entire southwest, and especially Arizona, and that there is an economic relationship between the two territories which gives them a number of common interests.

Southern California accordingly is planning means of aiding Arizona organizations in their Arizona development work, and as the first step in a permanent program has appointed an Arizona Relations committee as a co-ordinating and connecting link to work with the Arizona Industrial Congress as a co-ordinating and connecting link for Arizona agencies.

One of the first steps of the new committee probably will be to arrange for California bodies to help Arizona bodies in the colonization of the various new land development projects under way in the latter state. It is felt this co-operation offers exceptional possibilities, as California receives large numbers of farmers who fail to settle here because of high land prices, and who in many cases would take up land in Arizona if told of the state's opportunities.

Establishment of manufacturing to use raw materials produced in Arizona and at present shipped east also will be considered by the committee, as will a number of kindred subjects in which co-operation is possible without any conflict of interests, and from which mutual benefits would result.

Along with the same line, the Los Angeles Chamber of Commerce is to hold a Southwest Economic Conference here June 15, at which all the southwestern states will be represented, the purpose being to create better mutual understanding of individual and common problems and encourage co-operation in southwestern development.

### BATTLE WITH SMUGGLERS NEAR TUCSON FATAL TO TWO

Tucson, May 16.—Prohibition officials believe they have cut off one source of illegal liquor supply as the result of a fight between customs officers and rum runners on the desert 30 miles southwest of here Friday night, which cost the life of one man and brought wounds to two others, one of the wounded not being expected to survive.

One customs official, Carl Peterson, lies in a local hospital wounded, Ventura Reyna is dead and his brother Jose is still at large, believed to be hiding in the hills nursing a serious, if not fatal, wound inflicted in the gun battle of Friday afternoon.

Headed by Customs Officer E. M. Webb, the party of county officials and deputies who left to investigate the affair, returned to the city shortly after 11 o'clock this morning with one prisoner and 12 cases of liquor in their possession.

First information of the hardy battle was received here at 7 o'clock Friday night, after Officer Webb had captured the one man and had ridden 30 miles into the city on horseback for assistance for his wounded comrade. A party of officials was organized here immediately and left for the scene.

Peterson's wound was not serious. The bullet struck a rib and did not enter the stomach as was at first reported.

### STATE GAS TAX NETS \$75,000 FOR ROAD FUND

Phoenix.—A total gasoline tax of more than \$70,000 was collected during April and will be turned into Arizona good roads. Figures for the April collections were made public by James H. Kerby, secretary of state.

The total number of gallons for April was 2,812,499, of which 358,499 gallons were exempt and 113,748 gallons represented resales and exports, leaving 2,340,251 gallons on which the 3 cents per gallon tax applied.

The total collected was \$70,209.70, half of which was remitted to the state treasurer and the other half distributed to the county treasurers on the basis of the tax collected in each county.

Santa Cruz county received \$745.09 from the April collections.

### SPANISH ONION GROWING IN SANTA CRUZ COUNTY

(By Lee H. Gould, County Agent)

Is it possible to produce onions in Santa Cruz county that will compare favorably with the imported Spanish onions? If so, what will be the possible yield per acre? What will it cost to grow these onions? After they are grown will it be possible to market them? Will there be any money to be made in growing a crop of onions in Santa Cruz county?

These are a few of the questions that confront the farmer of the county who is contemplating the planting of a crop of onions.

There is little doubt but that it is possible to grow an onion in Santa Cruz county that compares favorably with the imported onion in size, color, shape, flavor and keeping qualities.

A few acres of the sweet Spanish onions were grown in the county in 1924. Several different varieties, or strains, were tried. The most satisfactory ones were the Valencia and the Denia. One crate each of the Valencia and Denia were sent to New York to E. L. Goodsell of the Fruit Auction Company. Mr. Goodsell put these onions in cold storage and has reported that the onions were kept in storage from December 5 to March 5, with a loss of about 10 per cent. He has assured the county agent that farmers of the county have nothing to fear regarding the keeping quality.

Not enough work has been done in an experimental way to determine the possible yield per acre under Santa Cruz county conditions. In the onion growing sections of Spain the average yield of the Valencia and the Denia is about 20,000 pounds to the acre. It is reported that in Cochise county, in 1923, one farmer grew 60,000 pounds of the Valencias to the acre. The yield in Santa Cruz county last year was from 12,000 to 36,000 pounds to the acre.

A yield of 15,000 to 20,000 pounds to the acre would net a nice profit to the grower at the prices paid for these onions last year. The total crop was sold ideally at from 4 to 6 cents a pound, averaging around 4 cents. A crop of 15,000 pounds to the acre would give a gross return of \$600 per acre at 4 cents a pound.

The cost of production will vary according to conditions on the individual farm. On the E. S. Magruder farm at Amado, where several acres were grown last year, the cost of production was a little under \$100 an acre. On the Victor Wager ranch, the county agent kept an accurate record on the cost of a single acre and the cost for the acre was \$174.27. However, if it is possible to grow 10,000 pounds of onions on an acre and sell them for 4 cents a pound, even though the cost is \$200 an acre, the net profit is also \$200 an acre.

The question of a market for the onions is one of the first questions raised by the average farmer contemplating the growing of a crop of onions. If the onions are properly graded and crated, there should be no trouble in selling them. The United States imports approximately 3,000,000 crates a year of this particular variety of onion each year. There is a duty of 1 cent a pound on the imported onions. Consequently the local farmer should have no difficulty in competing with the imported onion.

### SCHOOL ENTERTAINMENT IN SAN RAFAEL VALLEY WAS GOOD

Miss May Hazlewood, teacher of the San Rafael Valley school, entertained visitors last Saturday night at the school house with a school program, which was unusually good. The children were well instructed and had learned their recitations and songs so well that those in attendance were loud in their praise of the work of the teacher. The songs were rendered in better time and more harmony than is usual at such affairs.

Miss Hazlewood deserves much credit for her work in San Rafael Valley, this being her first year as a teacher. She was graduated from Tempe Normal last year.

She will be one of the new teachers in the Patagonia school next school year.

Willie.—The hard-boiled age.—Yankee Age.

## SUMMER FROCKS OF VOILE; MODERN GLOVE IS ELABORATE

IF GENTLE spring were to come walking in, with a frown on her face and no daffodils, apple blossoms or lilacs in her arms, she would hear some grumbling on every hand. But if she were to arrive without a train of sheer, dainty, colorful cotton fabrics, a riot of protest would storm about her. But she doesn't take any such chance—always lovely volles, or gaudies, mulls and the like drift in and are usually well launched before even the peach trees have put on their spring pink. Sometimes one of these fabrics and sometimes another dom-

draw all of passing feminine kind unto itself, at least not if a glove store happen to be next door. Silk gloves, which to catch a glimpse of is to covet, carry the cunningest of cuffs, some cut in petals, lapped one over another, lined with contrasting color and spreading about the wrist like a full-blown flower. Then there are cuffs perforated as effectively as the paper frill about millady's colonial bouquet. Plaided ruffles, flare cuffs with colorful silk pipings, cuffs so heavily embroidered as to almost conceal the background, cuffs narrow,

Stylists Take Pride in This.

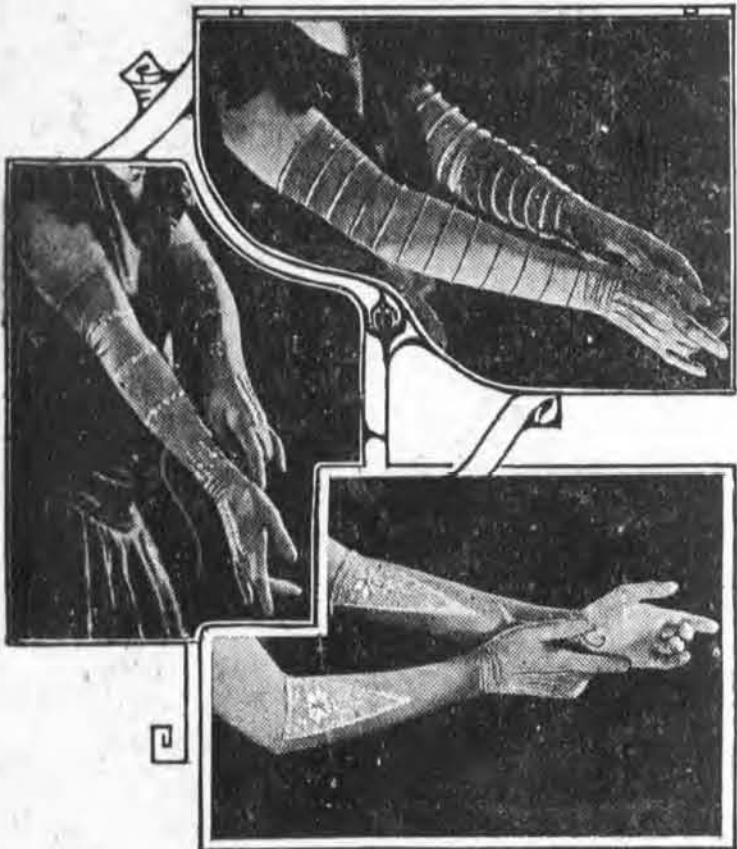

inates the styles created for mid-summer's gaudies—and worn almost anywhere.

The colors in volles, which are scheduled to be popular this season, are entrancing, in shades that prove wonderfully becoming. Many of the pinks have a mellow, yellow cast. Greens are delicate, in light or pale tones; blues are stronger but soft with powder blue, periwinkle and blue well represented. Yellow is either of the canary kind or has the greenish, citron tone and there are a number of beautiful orchid shades. These are usually livelier under artificial light, but the joyous career of the voile frock is usually sunlit, like the butterflies. In charming adornments for cotton dresses, good taste gravitates toward

cuffs wide, cuffs in two-tone effects—these and many more feature the short gloves of today.

If you are looking for something which eclipses every other short glove in point of the unusual, consider the same in black, beige or brown with gold kidskin inset into bright red suede to form the cuff, the embroidery on the backs repeating the gay colorings. Silk gloves in the neutral shades are the practical selection now that warm weather is upon us. The cuffs of these indulge in delightful color contrasts, which impart chic to the entire costume.

Even the longer gloves are reflecting fashion's whimsical mood. In some instances the new colored and white silk gloves are boasting tucks through-

Elaborate Modern Gloves.

simple stitchery, tucks, hemstitching, and drawn work, in keeping with the character of the material, whose charm lies in its daintiness and color. Narrow lingerie laces fit in many schemes of adornment also. Both needlework and lace appear on the frock pictured—narrow vyl lace in double frills about neck and sleeves and as an outline for the yoke and front panel in the bodice, with outline embroidery in flower design. The girdle is of narrow ribbon slipped through slashes, at a low waistline. Picot edging finishes the slashes and is useful in making many kinds of trimming.

Whether fashion is more interested in our hands or our feet, is a question this season. It is indeed a close competition between our shoes and our gloves as to which shall attain to greater extremes of fantastic interpretation. No longer does a window display of footwear prove a magnet to

out their length, as the picture shows. Others show introduction of wee plaits, oftentimes alternated with tucks. However, it is the short glove which has the monopoly, just now, on originality of design.

Among the wrist-length gloves of striking design are white kid ones, with narrow hand-painted cuffs. Other glove types accorded an important place in the accessories for spring and summer, stress exquisite petit-point embroidery. These are found among the more expensive types. Indeed, so handsome are some of the new cuffs, and so worth while, when the glove wears out, these are renewed and stitched onto a new pair. There is a pronounced tendency to match the gloves and hosiery.

CONDENSED FOR BUSY  
PEOPLE

### EVENTS DURING THE PAST WEEK

CAUGHT FROM THE NETWORK OF  
WIRES ROUND ABOUT  
THE WORLD

#### WESTERN

The high cost of distribution can be reduced by shifting the initiative from selling to buying, John Benson of a Chicago advertising agency, told the American Association of Advertising Agencies at the world advertising convention at Houston, Texas. "We have got to build up more consumer pull and have less selling push all along the line," Mr. Benson added. "There are too many dealers and too many jobbers."

Prof. Marcel C. Moreau, inventor of the "sun furnace," a device for intensifying the heat from the rays of the sun, was found dead in a tent he occupied near Redwood City, Calif. There was a wound in his head, and beside him was a small brass casing with a plunger, both of which held the odor of burnt powder. The "sun furnace" was found in an adjoining tent. Moreau had perfected it to the point where it radiated a fierce heat.

Using an alcohol-base fuel made from cull apples and potatoes, a bi-plane was flown from Spokane, Wash., to Wallace, Idaho, a distance of ninety miles, in an hour, a telegram from Lieut. N. B. Mamer, United States reserve corps, announced. The fuel is the invention of a Spokane man and is being manufactured in Spokane. Lieutenant Mamer carried a passenger and reported that while the fuel consumption was lowered, an increase in speed was noted.

Clothed with power to "speak with authority for agriculture," a commission of twenty-five farm leaders appointed by representatives of the twenty-four major farm organizations of the middle West, issued a statement in Des Moines, Ia., outlining a "united program calculated to co-ordinate the future efforts of the farmer." The commission was created at the conference in Des Moines of representatives of agricultural organizations from ten middle western states.

To gather rare exhibits of South American plants and animals for the \$75,000 James memorial wing of the Colorado Museum of Natural History to be built in Denver next year, a scientific expedition sponsored by the museum and financed by a wealthy Denver man, have left Denver for the region of Roosevelt's famed "River of Doubt," according to an announcement by J. D. Flagg, director of the museum. The party includes F. Walter Miller, expert in mammalogy at the museum; Frederick E. D'Amon, photographer and botanist; and Frederick Brandenburg, bird and taxidermy specialist.

#### WASHINGTON

Informal conversations relative to a French debt settlement are again in progress, it was disclosed recently at the State Department. Confirming the state of negotiations for the first time, the department reiterated that the Washington government had sent no formal communication on the question to France.

Modification of the Volstead act in to a "decent law" that would be enforceable, or flagrant violation of it with the consent of the whole Congress, were held out by Representative John Philip Hill of Maryland, in an address in Washington, as the alternatives confronting the eighteenth amendment.

Henry Ford will purchase the 400 vessels of the United States shipping board if the government will fix what he considers a fair price, according to a story in the Detroit Free Press. The announcement was made in Detroit by Ford, following a conference with T. V. O'Connor, chairman of the shipping board, the story said.

Because he treated federal prisoners sent to the Fallon county jail as his guests, Sheriff J. B. Crane was haled into the United States District Court at Carson City, Nevada, and fined \$500 on contempt charges. The sheriff permitted his prisoners to accompany him on arrests, to attend the movies alone at night and to enjoy the freedom of the grounds outside the jail.

Federal pure food law officials are giving special attention to interstate shipments of butter to determine whether they are short weight or contain less than the 80 per cent butter fat required by the local standard. The Trinidad Creamery Company of Trinidad, Colo., recently was fined \$2,800 at Pueblo, Colo., for the shipment from Colorado to New Mexico of butter short in weight, the bureau announced.

President Coolidge has definitely decided to leave Washington for his summer vacation in New England on June 25, going direct to Swampscott, Mass. A large staff of White House clerks and secretaries will accompany him to the main executive offices near Swampscott.

Proceeds from life insurance policies totalling \$474,000, left by Henry C. Frick for the benefit of his widow and daughter, were not subject to the federal estate tax under the revenue act of 1918, the Supreme Court held a few days ago.

#### FOREIGN

Leon Trotsky, deposed head of the Soviet army, who recently returned to Moscow from seclusion in the Caucasus, was elected a member of the presidium by the federal congress of Soviet states. He was given an ovation by the congress.

The National Federation of German Officers, in convention in Berlin, condemned the Daves reparations plan as incapable of fulfillment and "of serious damage to German industrial life, besides the political gagging and enslaving of the German people."

Dispatches from Sofia received in Vienna say that all the principals charged with responsibility for the recent bombing of the Sveti Kral cathedral, in which 100 persons were killed, have pleaded guilty with the exception of one defendant named Koefl.

White bread of American wheat flour is gaining in popularity in Sweden, according to trade and crop statistics for 1924 now available. But at the same time Sweden's own grain producing capacity is raising, so that in a pinch the country could supply its entire need in breadstuffs.

The French, British, Italian and Belgian governments decided to omit the usual formal congratulations to a newly elected chief of state in the case of Field Marshal von Hindenburg, Germany's president, in view of the fact that his name is still on the list of those charged with war crimes.

The Netherlands Olympic committee has issued a manifesto to the nation declaring it to be the committee's irrevocable decision to hold the 1928 Olympic games in Holland, notwithstanding the vote in the lower house of Parliament last week declining to grant funds to cover part of the expenses.

Field Marshal von Hindenburg was inaugurated president of Germany last week. Except for a brief shout of protest from the Communists, the inauguration was carried out according to schedule, the field marshal being sworn into office by the reichstag president, Paul Loebe, before a crowd of thousands.

That it will be a long and intensive campaign before the French forces in Morocco subdue the Rifis—if they are to be subdued—is admitted by military experts in Paris acquainted with the situation and with Abd-el-Krim. The war is much more important than it may appear across the Atlantic, because the continued success of the Rifis would imperil the hold of European nations on northern Africa.

Notwithstanding the legend that St. Patrick banished all the snakes from Ireland, one has been discovered in Dublin and is now on exhibition in the National museum. It is a very small specimen, less than two feet long, and of the harmless variety. News of the find caused much comment in the press. Snakes have occasionally been brought into Ireland from overseas, but they have never been known to breed in Ireland.

#### GENERAL

The Public Ledger formally announced purchase by the Public Ledger Company of the Philadelphia North American and its merging with the Public Ledger. The Public Ledger has started the publication of The Sun, a tabloid illustrated newspaper.

Saying that F. W. Rubien, national secretary of the Amateur Athletic Union, had "assumed the role of defender rather than investigator," in considering charges that Hugo Quist, manager for Paavo Nurmi and Willie Ritola, had asked an exorbitant expense account for the appearance of the Finnish runners at the Drake relay carnival at Des Moines last month, Kenneth L. Wilson, athletic director at Drake University, in a statement made public in Des Moines, declared that he "was not surprised that the A. A. U. whitewashed Nurmi, Ritola and Quist from all charges."

Manager Tris Speaker of the Cleveland Indians is out of game indefinitely with an injured knee, the same knee which kept him out of the lineup the last month of the 1923 campaign and threatened his permanent retirement. He was not troubled again until last week, when he twisted it.

The Associated Advertising Clubs of the World finished its convention in Houston after a four-day session and adjourned to meet in Philadelphia in 1926. The convention heard more than 300 speakers, including some of the most prominent figures in the advertising field, discuss most phases of modern advertising, from that on billboards and direct by mail, to newspapers, house organs and trade journals.

A group of fearless river men have resumed their task of lifting to the surface of the Mississippi river the remains of the steamer Norman in hope of recovering from the wreckage the bodies of twenty-one persons who have been missing since the vessel sank last week near Memphis. R. O. Schaefer, publisher of the Southern Contractor, is responsible for the statement that faulty construction of the steamer Norman caused the sinking of the boat.

The right of a newspaper editor to refuse to disclose the true name of the writer of a letter published in his paper was sustained by Judges Parker and Forsythe in Carroll county Circuit Court at Westminster, Md. Hamilton Owens, editor of the Baltimore Evening Sun, was summoned to appear before the Carroll county grand jury and give the name of the writer of a letter signed anonymously and published in that paper. When Mr. Owens refused to divulge the writer's name he was taken into court in an effort to obtain the information.

## BRIEF ARIZONA ITEMS

Phoenix won the state baseball title, defeating Tempe High school 10 to 1 at Tucson.

R. E. Bledsoe, declared to be a son of Chief Counsel Bledsoe of the Santa Fe Railway Company, with headquarters in Chicago, ended his own life by shooting himself through the heart in Phoenix.

Eight forest fires were started in the Catalina mountains during a recent electrical storm. Most of the fires were confined to quarter-acre, or less, then the prompt work of the forest rangers.

Andy Tullish, federal prohibition officer, was arrested by a party of deputies working under the direction of Sheriff Walter Bailey, as he was busily engaged in operating a still in a small house, eight miles northeast of Tucson.

Federal buy inspection service will be established in the Salt river valley this season as the result of the formation of a Maricopa County Hay Association, which is making arrangements for the training and licensing of inspectors.

C. L. Brooks of Red Rock was bound over to the Superior Court after a preliminary hearing in Florence on a charge of murder in connection with the slaying of F. D. Halstin, Red Rock postmaster and storekeeper, last January. Brooks' bond was fixed at \$5,000, and it was furnished by Roscoe C. and Elmer Crabb of Casa Grande.

Marion C. "Bud" Jones, who was convicted by a jury in the Superior Court of Pinal county recently on a charge of assault with a deadly weapon with intent to commit murder, as the result of an affair with N. J. Myster near the summit of the Miami-Superior highway last June, was freed by Judge Windes of Maricopa county, who acted favorably upon a motion to set aside the verdict and arrest judgment.

All previous travel records for the month of April were broken when a total of 6,700 persons visited the Grand Canyon National park during the month just past. There was a slight loss in travel by rail, but ideal weather and road conditions resulted in an increase of auto travel of 226 per cent. Cars were registered from thirty-nine states and Canada. The total of 6,700 is 1,932, or 41 per cent in excess of the total last year.

After he had successfully passed the deputy sheriffs' waiting on the Nogales highway to arrest him on information phoned from Nogales, Jack E. Liggett was arrested by County Motorcycle Officer Frank Bingham, and jewels said to be valued at \$2,000 were recovered. The man, having stolen a large amount of jewels from Mrs. L. A. Parham, wife of the proprietor of the elgar store at the Montezuma hotel, had left Nogales for the north.

The Northern Arizona Baseball League was re-organized at a meeting held in Williams. The Prescott W. O. W. team was substituted for the Seligman team that was forced to disband. Games already played will be counted in the league standing and a new schedule has been put into effect to continue until September 13. Richard Condit of Jerome was elected president of the league, to take the place of R. K. Burritt of Seligman, who resigned when the Seligman team disbanded. The teams that will make up the circuit are the two Prescott teams, Jerome, Clarkdale, Kingman, Williams, Flagstaff and Winslow.

A nation-wide search for Jeff Duree, declared to be a noted Oklahoma and Kansas bank and train robber, was ended in Phoenix when deputy sheriffs placed him under arrest. Duree was leading a secluded life on a small farm several miles from Phoenix and, according to the officers, he has been there since last December.

The University of Arizona, foremost among the state's extensive land owners, for the first time in its history has a complete record of its various holdings, centralized at the institution. These complete records were compiled at the instigation of President C. H. Marvin and show the location of the various tracts and the purposes for which their respective rental fees are used. There are 200,000 acres whose rental fees are used for university purposes, 150,000 acres that annually enrich the agricultural and mechanical colleges, 150,000 acres devoted to the use of the school of mines, and 100,000 acres designated to military institutions. There is also a special university grant of 50,000 acres. This entire 550,000 acres, with the exception of approximately 4,000 acres, has been patented.

Only three of thirteen candidates who took the examination for admission to the bar of the state received passing grades. It was announced in Phoenix at the close of the two-day examination. Those who passed were Chester W. LaPrade of Winslow, L. G. Moore of Tucson and Ray H. Pearson of Phoenix.

The \$35,000 [elg] plant of the Pacific Fruit and Express Company, work on which was started April 6, was put into use on May 15. Facilities have been provided for the simultaneous icing of 140 cars.

## EXCITING RACE WON BY "FLYING EBONY"

SANDE PILOTS "FLYING EBONY"  
TO VICTORY AT LOUISVILLE,  
KENTUCKY

### SANDE RIDES DERBY WINNER

FAMOUS JOCKEY RIDES 100 TO 1  
SHOT TO DRAMATIC  
TRIUMPH

Louisville, Ky.—Between a brisk shower which sprang up a few minutes before the start of the race and a terrific downpour which soaked thousands of spectators to the skin, Flying Ebony, a little horse, black as night, raced to an immortal victory in the \$50,000 Kentucky Derby. He defeated a field of nineteen of the nation's finest 3-year-olds.

The black colt, owned by Gifford A. Cochran of New York, and superbly ridden by Earl Sande, America's premier jockey, finished one and a half lengths ahead of Captain Hal, a Louisville owned colt, stepping the mile and a quarter distance in 2:07 3/5. Son of John came thundering back of Captain Hal, losing second place by a scant nose. Singlefoot, three lengths farther back finished fourth, a half length ahead of Stop Along.

Swope, owned by Bud Fisher, was sixth and the Prince of Bourbon trailed in seventh. Then came Needle-gun and Kentucky Cardinal.

Boon Companion, finishing tenth, followed Kentucky Cardinal to the wire with Broadway Jones in desperate pursuit. The overwhelmingly played favorite Quatrain, winner of the Louisville Derby and New Orleans Handicap, carrying a ton of money struggled across the finish badly beaten for twelfth place. After Quatrain came Almadel, Backbone, Sweeping Away, Elector, The Bat, Lee O. Corner, Voltaire and Chief Uncles, floundering across the wire in the order named.

Flying Ebony coupled in the company of eight others, comprising the mutual field, paid his backers \$3.30 for each \$2 invested on his chances. The place price was \$3.80 and the show money \$2.80. If Flying Ebony had not been included in the mutual field, his odds undoubtedly would have reached 100 to 1.

Captain Hal rewarded his backers with \$5.50 to place and \$4.40 to show. A show ticket in the mutuels paid \$5.50 on Son of John.

Flying Ebony, however, did pay 100 to 1 in the makeup of winter books.

Flying Ebony's race was a tribute second consecutive year that the greatest honor that can come to horse flesh, the winning of the Kentucky Derby, was captured by a black colt, Black Gold, last year's winner, being every bit as black in color as this year's immortal.

The race, witnessed by from 70,000 to 80,000 spectators, the greatest throng that ever witnessed a horse race in America, was decided under highly dramatic conditions. After a day of glorious sunshine, black clouds suddenly gathered in the southwest, threatening a deluge every second. When the officials saw the approach of the impending storm, it was hurriedly decided to advance the post time twenty minutes in an attempt to beat the oncoming downpour.

Flying Ebony's race was a tribute to William Duke as a conditioner of horses. Duke only recently returned to America after spending several years in France as a trainer. Flying Ebony was perfectly trained.

#### U. S. Controls Arms Conference

Geneva.—The third week of the international conference called to construct a system for supervision of the traffic in arms will begin with interest centered on whether the machinery can be arranged, which, without weakening the league of nations' influence, will meet the approval of the United States Senate. One of the outstanding features of the Geneva deliberation is the dominant role played in the background by the American Senate. All the delegates realize that if the Geneva convention is to have any force it must be framed so as to be practically certain of senate indorsement.

#### Senator Spencer Dead

Washington.—Senator Selden P. Spencer, Republican, of St. Louis, Mo., died suddenly here at Walter Reed Hospital. The death of the senator, who was 63 years old, came as a shock, as he had been in good spirits and his early recovery had been expected. He was operated on about ten days ago for hernia.

#### Defense Day May Be Abandoned

Washington.—President Coolidge's expressed preference for July 4 as the day on which the proposed national defense test could be most appropriately held has aroused doubt in war department quarters as to whether plans can be reconstructed in time to hold the test on Independence day or whether they must be scrapped for this year. The President's opposition to Armistice day, the date recommended by the War Department, has upset plans prepared by the general staff.

## EXPERIENCE OF NERVOUS WOMAN

Weak, Blue, Discouraged—  
Relieved by Taking Lydia  
E. Pinkham's Medicine

Cincinnati, Ohio.—"I was nervous and could not sleep, had crying spells and the blues, and didn't care if I lived or died. My right side was very bad and I had backache and a weakness. I read about your medicine in the papers and wrote for further information. I took Lydia E. Pinkham's Vegetable Compound, Blood Medicine and Liver Sanative Wash. I have had good results in every way and am able to do my work again and can eat anything that comes along. My friends tell me how well I am looking."—Mrs. F.K. CORRIELL, 129 Peete Street, Cincinnati, Ohio.

Will you answer letters?  
Philadelphia, Pa.—"I have used your medicines for nervousness and a run-down system with a severe weakness. After taking Lydia E. Pinkham's Vegetable Compound and using Lydia E. Pinkham's Sanative Wash, I feel like a different woman and have gained in every way. I am willing to answer letters asking about the medicines."—DORA HOLT, 2649 S. 11th St., Philadelphia, Pa. Sold by druggists everywhere.

Cuticura Soap  
Is Pure and Sweet  
Ideal for Children  
Remile Soap, Cincinnati, Ohio. Address: Cuticura Laboratories, Dept. M, Malden, Mass.

Wet Coal Is Costly  
Recent tests by the United States bureau of mines shows that the wetting of coal is expensive to the consumer. Fine sizes of both bituminous and anthracite will hold up to 20 per cent in moisture. Coal can have a perfectly dry appearance, yet still contain as much as 10 per cent moisture, for which the consumer pays, says Popular Science Monthly. A moisture content of 12 per cent is not at all uncommon.

## Why That Bad Back?

Is backache keeping you upset? Feel all tired out—so nervous and dispirited you can hardly keep going? Then look to your kidneys! Your kidneys rid the body of poisonous waste. But if they lag, impurities accumulate and poison the whole system. Then one is apt to suffer backache, stabbing pains, headaches, dizziness, and other annoying kidney irregularities. If your kidneys are sluggish, help them with a diuretic. Use Doan's Pills. They are praised the world over. Ask your neighbor!

A Colorado Case  
Mrs. Ellen Owens, 222 E. Ninth St., Durango, Colorado, says: "My kidneys became weak, due to hard work. My back was so painful I could hardly do my housework. When I bent over and a dizziness came up quickly. After using Doan's Pills I was cured. I have never had kidney trouble since."

DOAN'S PILLS  
60c  
STIMULANT DIURETIC TO THE KIDNEYS  
Foster-McBure Co., Mfg. Chem., Buffalo, N. Y.

## Pious Dry—Sinners Soaked

Saint Edward was at one time archbishop of Canterbury. He is said to have been a man of great piety and wonderful faith. Tradition has it that the saint was once preaching in an Oxford churchyard when the devil sent a terrific storm to quench his eloquence. Edward was equal to the occasion. He prayed, and the storm moved to the other side of the churchyard, so that those who remained to hear the sermon kept dry, and those who left were drenched.

## Money Does Do That

Flickers—I heard you had money left you.

Vickers—Yes. It left me long ago.

## GET FEELING WELL AGAIN

From Mother Nature's storehouse we have gathered the roots, bark and herbs which are compounded, under the famous Tanlac formula, to make Tanlac. This great tonic and builder has brought health and strength to millions.

If your body is weak and undernourished, if you can't sleep or eat, have stomach trouble or burning rheumatism, just you see how quickly Tanlac can help you back to health and strength.

Most people notice a big change for the better after the very first bottle. They have better appetites and more pep. The sparkle comes back to their dull eyes and color to their faded cheeks.

Don't delay taking Tanlac another precious day. Stop at your druggist's now and get a bottle of this, the greatest of all tonics.

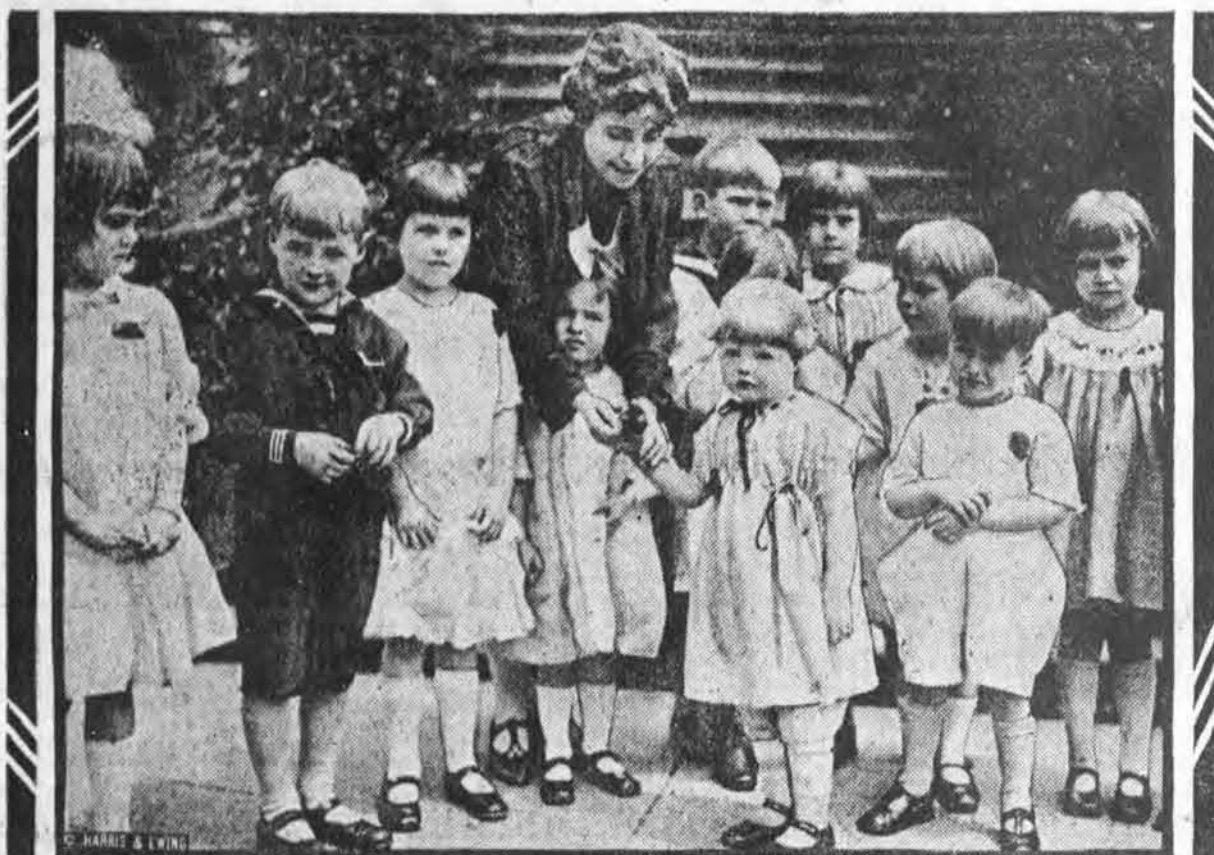

Take Tanlac Vegetable Pills for Constipation

TANLAC  
FOR YOUR HEALTH

KEEP EYES WELL!  
Dr. Thompson's Eye Water will strengthen them. Admiration of the 107 River "For N.Y. Booklet."

## Poppy Drive Being Opened by Mrs. Coolidge

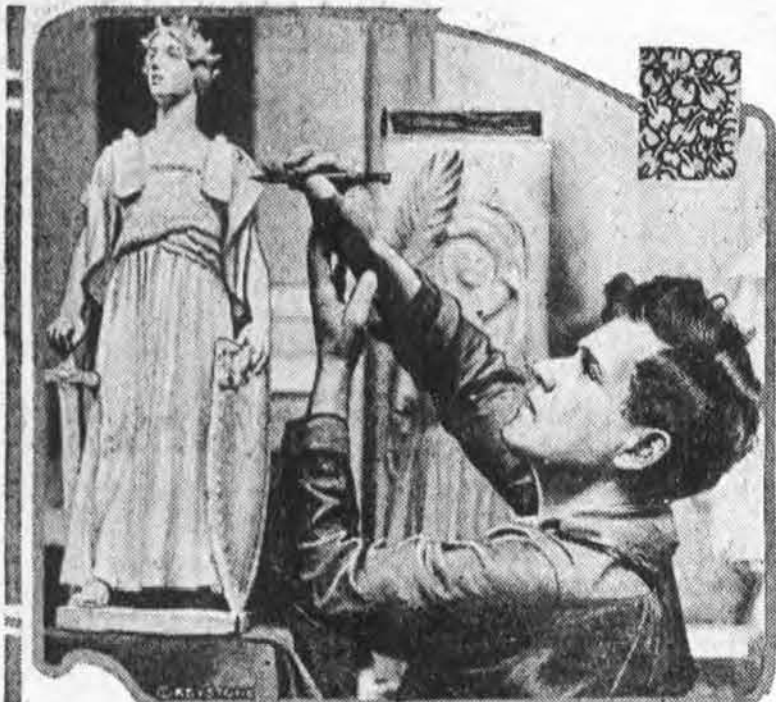

Mrs. Calvin Coolidge shown receiving a group of young callers from Equality Walter Reed post, Washington, May 4, when she officially opened the "Poppy" drive of the Veterans of Foreign Wars. Little Margaret Drewery is shown in the picture presenting a poppy to Mrs. Coolidge.

## Inter-America Board of Pan-American Women

Women from all American countries gathered in Washington in the second Pan-American Congress of Women named the following Inter-America board: Left to right—Senora Luz Oliveira, Chile; Senora Casa de Quiros, Costa Rica; Senora Esther Neiro de Calvo, Panama, vice president for South America; Mrs. Carrie Chapman Catt, honorary president; Miss Berthe Lutz, Brazil, president; Miss Belle Sherwin, Washington, vice president; Senora Benet de Newton, Porto Rico; Senora Beatriz Letelier de Reyes, Chile.

## War Memorial for Long Island

James Novelli, New York sculptor, and his model of the statue "Victorious America" which is to be unveiled on Long Island on or about Armistice day, in honor of Americans killed in the World war.

## Twain's Home in Hartford Is Sold

Mark Twain's home in Hartford, Conn., again changed ownership when Grant U. Kierstead and Daniel W. Murphy, both of West Hartford, purchased the property, the sale price being \$82,500. Entering into the latest sale is the possibility of revival of plans for a Mark Twain Memorial home.

## SOLD BY HER HUSBAND?

Mrs. Louisa Job charged in the Chicago court of domestic relations that on May 28, 1924, her husband, Anton Job, sold her to John Parker, contractor, for \$75. She is the mother of two children.

## NAVY'S PAYMASTER

Rear Admiral Charles Morris, who was named paymaster general of the United States navy to succeed Rear Admiral Potter.

## The American Legion

(Copy for This Department Supplied by the American Legion News Service.)

### DEVELOPMENTS IN FUND ACTIVITIES

Recent major developments of the American Legion campaign to raise a \$5,000,000 endowment fund for disabled veterans and orphans of the World war have been: Organization of the American Legion Endowment Fund corporation to administer the fund, selection of the Fletcher-American National bank at Indianapolis as a depository for the fund, extension of the campaign to include every state in the country and the final clean-up campaign in the South.

National Commander James A. Drain, announcing the formation of the endowment fund corporation, said that it was established solely to administer the fund. It is not authorized by its articles of incorporation to do anything else, he said.

"The corporation was created," the commander declared, "in order to provide absolutely for the safekeeping and proper administration of the fund in perpetuity. The fund is a sacred trust. The Legion has left no stone unturned to insure that the income derived from it shall be used for the relief of the disabled veterans and the orphans of the war and for that purpose only."

Commander Drain is president of the corporation. Gen. John R. McQuigg of Cleveland, banker and member of the Legion's national finance committee, is vice president. National Judge Advocate Robert A. Adams is secretary and John H. Hilke, director of administration at national headquarters, treasurer of the corporation.

Directors are, besides the president and the vice president: Gov. James G. Scruggs of Nevada, Judge Royal A. Stone of the Minnesota Supreme court, Alexander Fitz-Hugh, Mississippi business man; Gen. Charles H. Cole, Massachusetts; Wilder S. Metcalf, Kansas, member of the Legion's national finance committee; Edgar B. Dunlap, Georgia, also a member of the finance committee; and National Adjt. Russell Creviston, Indiana.

At the same time, the campaign for the fund was extended from the states in the South and Middle West, where it was first launched to include every state. In the East it was extended into Maine, New Hampshire, Vermont, Rhode Island, Massachusetts, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, District of Columbia and Ohio.

The Western group was composed of Wisconsin, Minnesota, North Dakota, South Dakota, Montana, Wyoming, Idaho, Washington, Oregon, California, Nevada, Utah, Arizona, New Mexico, Texas, Oklahoma, Iowa, Missouri, Colorado and Nebraska.

### Urges Continuation of American Legion Sports

Charles W. Paddock, of Los Angeles, sprint champion, who has been called "the world's fastest human" is interested in "world athletics." With Loren Murchison he started recently to tour the world under the auspices of many athletic associations and governments to create a more definite interest in track and field competition. Speaking of the value of athletics in promoting world peace, Mr. Paddock said:

"In ancient times, the several Greek states were brought into a bond of fellowship surpassed by no similar international treaty that exists today. And if those people could accomplish this through the spirit of sport, more than two thousand years ago, it would seem that in this enlightened age, the whole world might come to share a similar feeling."

"The American Legion, for example, has fostered sport unceasingly since its creation and a continuation of this same policy will greatly increase our percentage of athletes, remove the spirit that creates war and will hasten the day when men the world over can say, 'We are brothers.'"

### Legion Aids in Finding Places for Unemployed

During the past year no fewer than 2,000,000 men found employment through the federal government working in co-operation with state agencies and the American Legion, according to a report by the United States employment service of the Department of Labor at Washington.

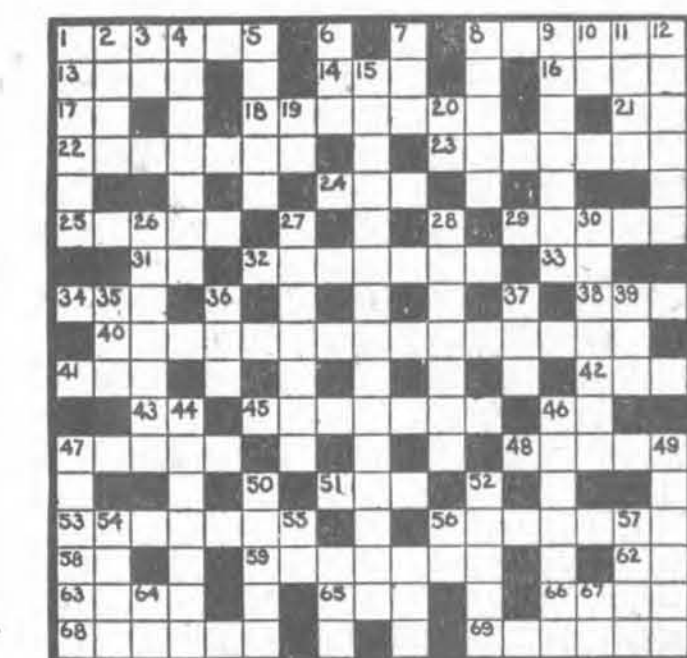

In states not having public employment service to co-operate with the federal government, liaison is maintained between the "jobless man and the manless job" through the agency of the Legion.

Unskilled day laborers and trained executives alike secured jobs through the government and its allied agencies.

A Legion service official, commenting on the work of finding men jobs, said:

"The finding of employment for men out of work is a necessary public function. Nothing on earth is so important to a man as a job. As it is, too little attention is paid to the assembling and distribution of human labor."

## CROSS-WORD PUZZLE

(Copyright, 1925.)

- Horizontal.
- 1—The Saxon king killed in battle with William the Conqueror
  - 2—The king who started the British navy
  - 3—A single one
  - 4—A girl's name
  - 5—Traveled by conveyance
  - 6—To act
  - 7—A pronoun
  - 8—Expressed contempt
  - 9—A metal
  - 10—Metal pieces used to fix boards
  - 11—The boundary
  - 12—Negative
  - 13—Abbreviation for South Africa
  - 14—Angry
  - 15—A famous caliph of Bagdad
  - 16—An animal
  - 17—That remaining after deductions
  - 18—A verb
  - 19—A north-central state
  - 20—Direction from which the sun shines about 9 a. m.
  - 21—Composer of church music
  - 22—Quickness
  - 23—Possessive pronoun
  - 24—Stopping place
  - 25—One who endorses
  - 26—Slang for examination
  - 27—An estuary in southwestern France
  - 28—Abbreviation for gill
  - 29—To face about
  - 30—A South African tribe
  - 31—An early church father
  - 32—Forms
- Vertical.
- 1—An explorer of North America
  - 2—After a time
  - 3—A New England state
  - 4—A play of Shakespeare's
  - 5—Mentioned in the parable in Luke XVI
  - 6—A title
  - 7—Possesses the power
  - 8—Separated
  - 9—The French king who met Henry VIII on the field of the Cloth of Gold
  - 10—A proposed international language
  - 11—To prepare for printing
  - 12—To discover
  - 13—The act of assuming bodily form
  - 14—A man's name shortened
  - 15—Prefix meaning "down"
  - 16—A class of feeble bases derived from indanilins
  - 17—Those who lean
  - 18—Injuries by overexertion
  - 19—Afternoon performance
  - 20—An exclamation
  - 21—Used to convey bricks
  - 22—To perform
  - 23—An American humorist
  - 24—Moving over ice
  - 25—A Dutch-Jewish philosopher
  - 26—A Spanish explorer
  - 27—A king of Persia
  - 28—An eloquent North American Indian
  - 29—Uncloses
  - 30—Symbol for nickel
  - 31—A north-central state
  - 32—To make eyes
  - 33—Quarrel
  - 34—Abbreviation for royal institute
  - 35—Preposition
  - 36—A trip

### Solution of Last Week's Puzzle.

\*\*\*\*\*  
 HOW TO SOLVE A CROSS-WORD PUZZLE  
 \*\*\*\*\*  
 When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.  
 \*\*\*\*\*

## NURSERY RHYME PUZZLE

WAS ever heard such noise and clatter?  
 Billy's got a drum.  
 Guess we'll have to leave this flat or  
 Bribe him to keep "mum."

Find two other drummers. Left side down, along leg; upper right corner down, along leg and drum.

After Every Meal

Pass it around after every meal. Give the family the benefit of its aid to digestion. Cleans teeth too. Keep it always in the house.

Costs little—helps much.

### Egg Industry Changed

The most striking change in the world egg import trade is noted in the case of Germany. In 1912 Germany imported 275,714,000 dozen eggs. These imports dropped to 194,000 dozen in 1923, while the exports rose from 891,757 dozen in 1913 to 1,070,000 dozen in 1923. Poland furnishes most of the eggs imported into Germany, and the adjacent European countries supply the remainder.

## THE ROAD FAN'S LAY

By Ira L. Wood, in Arizona Highways

Some see the pleasure of jazz and wine,  
I care not for either of these.  
Let me drive on a road through a sunny clime,  
A road that is lined with trees.

Some like the pavements, where the buildings meet,  
And form a wall for a guide;  
But I'll take the road away from the streets,  
Whenever I go for a ride.

I'll pick a road that winds by the hills,  
Or the banks of a meandering stream,  
Where one forgets worries, troubles and ill,  
While weaving some beautiful dream.

Now, after I die, if I might be so bold,  
As to want other than heavenly things,  
If God grants my wish, and he may, I am told,  
I'll take this in preference to wings:

A road that is wide and eternally long,  
An auto that is true and tried,  
With motor that hums a mechanical song,  
A companion that's fair by my side.

## FIRE INSURANCE A CONTRACT, NOT A COMMODITY

"Fire insurance is not a commodity to be bought and placed on the shelf," said a recent report of the committee on fire insurance of the National Wholesale Druggists' Association. "It is a contract which includes continuing service on the part of the agent and a possible future contingent payment in case of disaster. The buyer of this contract should exercise the same care in selecting his insurance representative that he would in choosing his attorney."

"Do not underestimate the value of the services of an experienced insurance man in preparing forms of contract, selecting the best arrangement for protection, as well as pointing out possible reductions in insurance costs through removal of hazards and increased fire protection, and the permanent improvement of your premises by better construction."

## GOOD ADVICE

President-Elect Hindenburg says to Germany: "Get to work!"  
Finance Minister Caillaux says to France: "Cut expenses to the bone!"  
Both see that their nations need to forget the luxury of hate and waste and think only of the vital necessity of industrial regeneration.

The advice of these two Europeans is as valuable here in the United States; it is exactly what President Coolidge has emphasized from the first day of his presidency.

## THE FARMER'S PROBLEM

That the farmer is entitled to cost of production, plus a reasonable profit for his products is an undisputed fact. The average farmer, in the past, has paid too little attention to his overhead or cost of running his business. He is coming to realize more and more that rather than try to fix selling prices high enough to cover present cost of production and profit, he must cut down cost of production, because farming is a business of world competition.

"The Vanishing Man," a thrilling mystery love story, by Richard Washburn Child, will be published serially, beginning soon, in The Patagonian.

# The Literary Spotlight

By MARION ELLET

**W**aters Under the Bridge is the dramatic story of a genius who could do everything that is difficult and therefore chose to do "the most difficult thing of all—to live and die like other men." This story which is written by Mildred Cram and which appears in the May issue of Harper's Bazar, is part of sophisticated New York, a setting against which the splendid simplicity of Ugo Gregory, a primitive-tempered Sardinian, stands out in bold relief.

There were two women in Ugo's life. One of them had a passion for fame. She played "Hedda Gabler" at special matinees and wore gowns of surprising extravagance and looked like a wet catfish. The other was a girl of Ugo's own people, a girl who had "made a friend of sorrow and postponement and was on intimate terms with reality." The drama of these three lives, or rather the last act of it, takes place at one of those New York dinner parties of hand-picked celebrities, and is quite the most brilliant and fascinating piece of fiction that Mildred Cram has done.

Gouverneur Morris has written a realistic novel of the South, and it isn't a novel clothed in the obvious romance of moonlight, jasmine, and poverty-ridden gentility either. The House of Orme, which begins in the June issue of Hearst's International and Cosmopolitan is more than that. It is a romance

of the struggle of the new South. Two brothers are the protagonists in this story; two men who, in themselves, represent the two opposing elements in the South. Brant is charming, indolent and untrustworthy. David is fine and courageous, determined, in spite of difficulties, to save the house of Orme from annihilation, and restore its ancient dignity. Of course there is a woman. Love in the lives of the two brothers follows the pattern of their childhood. Nora is all that David has dreamed of and been denied, but is won by Brant easily, and held lightly.

The poor immigrant may be a social and an economic problem, but he is also a gold mine to the fiction writer who understands him and sees the great pathos of his situation. Maria's Story, the beginning of which appears in the June issue of Smart Set, is the life of an Italian boy and girl who came to America after their wedding at Easter time. Silvio was a violinist of great promise and though he and Maria were young and poor their hearts were high. In the new country Silvio was to become famous in his art and make his fortune. Then came disillusion. There was Silvio's illness and the consequent poverty and loneliness, ending in death. With three children to support and scarcely more than a child herself, Maria bravely fronts the future in a strange land, faced with the hideous necessity of giving her youngest child in adoption.

## AMERICAN FOREST WEEK WENT OVER BIG

"American Forest Week has been observed this year as never before," states District Forester F. C. W. Pooler.

More than 200 private organizations have joined forces with state and federal agencies in presenting the needs for the perpetuation and protection of the timber supply of the country.

Nearly all of the luncheon and women's clubs of the southwest have had speakers for the occasion, or held forestry programs. Many of the leading newspapers of Arizona and New Mexico have had stirring editorials calling to the attention of the public the urgent need of beginning now to save the future timber supply. In many of the public schools programs have been held dealing with fire. All of the 14 national forests have conducted an intensive educational campaign on the forests and particularly directed attention to a reduction of fire caused by human carelessness.

More than 800 postmasters in Arizona and New Mexico cooperated by placing copies of the president's proclamation on the public bulletin boards. The biological survey instructed all their field men to render every possible service and have prepared articles in their field bulletin on American Forest Week. "The splendid cooperation by the press, clubs, organizations, public schools and individuals," Mr. Pooler says, "should bear much fruit during the present fire season in reducing the number of fires caused by human agencies, and in securing additional cooperation from the public."

It is only by the pressure of public sentiment, states Mr. Pooler, combined with cooperation that it will be possible to hold down the number of fires through carelessness to a minimum.

More to read in The Patagonian than found in most weeklies

## SEVEN RULES FOR CAMPERS

1. Put all tin cans and garbage in your camp fire. After burning, bury what remains.
2. Allow no rubbish to get in any stream.
3. Wash no clothes in any stream.
4. If no toilet is provided, make one away from the water. Dig a trench 8 inches deep, heap earth to one side and fill trench as used.
5. Observe the game laws.
6. Make your camp fire small. Never leave it burning unattended. you leave camp see that it is out.

take a look. See that you have observed these rules.

What was the mysterious force which led two men to their doom—effaced from the earth by an unknown fate? Read Richard Washburn Child's "Vanishing Men," beginning soon in The Patagonian.

## LEGAL NOTICES

### SUMMONS

IN THE SUPERIOR COURT OF SANTA CRUZ COUNTY, STATE OF ARIZONA.

No. 1727

Lucille Decker, Plaintiff, vs. Willis Samuel Decker, Defendant.

Action brought in the Superior Court of Santa Cruz County, State of Arizona, and the Complaint filed in the said County of Santa Cruz in the office of the Clerk of the said Superior Court.

IN THE NAME OF THE STATE OF ARIZONA TO WILLIS SAMUEL DECKER, Defendant, Greeting:

YOU ARE HEREBY SUMMONED and required to appear in an action brought against you by the above-named plaintiff in the Superior Court of Santa Cruz County, State of Arizona, and answer the Complaint therein filed with the Clerk of this

## LEGAL NOTICES

said Court, at Nogales, in said County, within twenty days after the service upon you of this Summons, if served in this said County, or in all other cases within thirty days thereafter, the times above mentioned being exclusive of the day of service; or judgment by default will be taken against you.

Given under my hand and seal of the Superior Court of Santa Cruz County, State of Arizona, this 15th day of May, 1925.

(SEAL) ROBT. E. LEE,  
Clerk of the said Superior Court.  
By E. RUTH FRENCH,  
Deputy Clerk.

## TASTE IN TABLE SERVICE

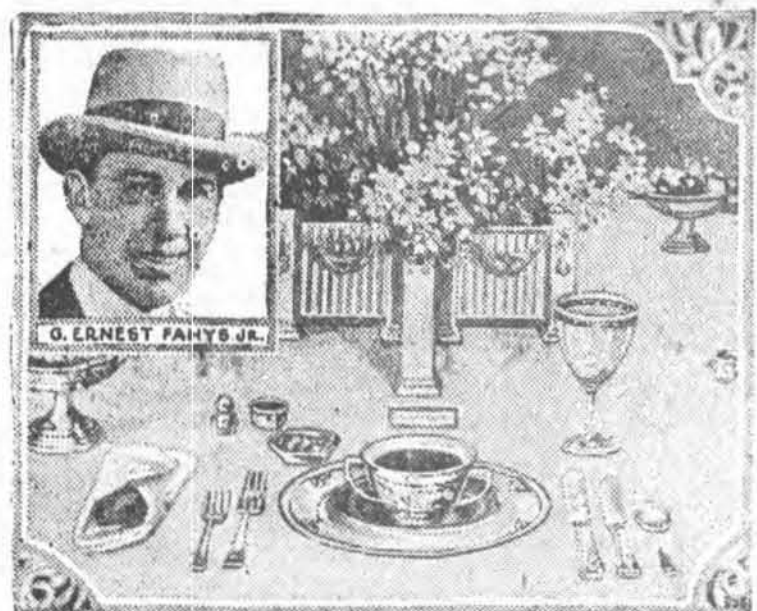

Photo Courtesy Alvin Silver Company

— Proper Way in Which To Set Table

"SPRING is all the poets say it is, but it is also a time of many social obligations.

Winter courtesies must be repaid and most women find it expedient to entertain early in the season," says G. Ernest Fahys, Jr., of New York, society arbiter in what is good taste in these affairs. "Breakfast is sometimes too inconvenient, tea too informal and dinner too formal. Luncheon has proved popular with the large majority of hostesses."

"Every woman enjoys noticing the favorable impression that her table creates on her guests. The anxious hostess may be assured of the success of her party if she succeeds in winning the admiration of her guests through good taste portrayed in the setting of her table."

"In no other point is the taste and culture of the hostess so observed as in the table service which she sponsors. Ornate silver, of course, is never in good taste. And hand in hand with the silver itself is the

way it is placed on the table. The table knife goes to the right of the plate and from the right outwards follow the fish knife, bouillon spoon, and oyster fork, if needed, crossed over the spoon. To the left of the plate belongs the table fork, then the fish fork.

"Additional silver, such as salad fork, desert and coffee spoons should be brought in with the proper courses. This simplifies the service and avoids confusion."

"The centerpiece may be quite elaborate. Flowers are always good and especially so for the spring table."

"Further festive touches may be supplied by silver bonbon dishes, relish baskets and almond dishes. The meal served depends upon the inclination and purse of the hostess. Dainty foods are seasonable and take preference over heavy, highly seasoned ones. The simplest foods achieve prestige when they appear on a beautiful and well appointed table."

## MUST PLAN FOR CITY OF TOMORROW

When the pioneers of the West left the East to lay out new cities they evidently profited by the mistakes made in the East. Western cities as a whole are much better planned than those of the East. And they should be because the builders had an opportunity to profit from the experience of the older municipalities.

There are today hundreds of small towns which think they have no traffic problem and consequently are making no plans for the future. It is a mistake. Most communities have ambitions to grow and every live community, no matter how small, should have a city planning commission.

City and county buildings should be congregated in what is usually described as a civic center. Streets should be wide.

Sidewalks should be wide. Plenty of space should be allowed for trees, lawns, shrubbery and flower gardens.

These same towns in laying out new streets should see that they are plenty wide enough. They can't be too wide. Look at the number of communities which are planning highways 120, 200 and even 240 feet wide.

Houses should be set back from the sidewalks with plenty of lawn area if the ground is available.

Every community some day will have its traffic problem. Some small ones have it today because they have allowed state highways to connect with main streets. State highways should go around cities rather than through them. To be sure, there should be good roads leading to the center of the city but traffic should not be concentrated there.

# What the World Is Doing

As Seen by Popular Mechanics Magazine

### A Barrel Canoe for Bathers

Riding the surf behind a speedy motorboat belongs to the thrills of many seashore enthusiasts, but the more timid pleasure seekers usually find enough "kick" in the conventional forms of water

sport such as rowboating and canoeing. However, rowboats and canoes are not always available, especially at some small inland lakes, and in such cases a barrel canoe of the kind shown in the drawing is a good substitute.

It consists of half a barrel, cut lengthwise, and an automobile inner tube stretched around it, as shown; these items can be obtained almost anywhere at practically no cost. Each hoop is securely nailed or screwed to the staves before sawing so that the barrel will not collapse when cut through. The ends are then cleated and all screws or nails projecting on the inside cut off and filed smooth. The inner tube is pulled down a few inches below the gunwale and inflated, which will make the craft almost noncapsizable and unsinkable. By sitting in the bottom and paddling, the boat can be propelled along at a fairly good speed, but if the user stands up the boat will have a tendency to rock, and this adds enjoyment as he must then balance it, which is a more or less ticklish feat.

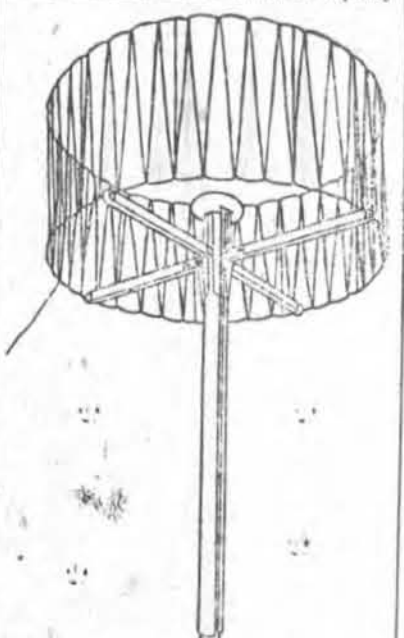

### Joining Roofing Sheets

When copper and zinc-roofing sheets come in contact with each other in the open atmosphere, there is a certain amount of electrolytic action and this starts corrosion. This can readily be prevented by coating the copper and zinc

with roofing cement or acid-proof paint, before the metals are joined. Of course, the connection between the two metals cannot be avoided entirely. Zinc should never be used on a roof to be covered with red cedar or redwood shingles, as acid is formed when the shingles absorb moisture and this will soon ruin the metal.

### Circular Aerial Is Non-Directional and Works Inside or Outdoors

A new type of antenna, which, owing to its circular shape, is claimed to be non-directional and to result in equally

good reception from all points of the compass, has appeared in England. It is designed for either indoor or outdoor use. It consists of two rings supported on an upright by means of two crossarms. Special braided copper-wire tape is wound from one ring to the other in such a manner that practically the entire surface is exposed to the incoming radio waves. It is claimed this type of aerial will increase the range of many receivers.

As the bridge was ajar, He plunged with his car— Too quick on the draw, as it were. —Exchange.

The extraordinary transition in Parmelee began with his marriage. Apparently an inexplicable fear had seized him within a few minutes. Read "The Vanishing Men," which will follow "The Free Traders," which will end soon.

### IS THE DRIVER OR PEDESTRIAN TO BLAME?

By ERWIN GREEN

(President Greer College of Automotive Engineering)

Who is to blame for the numerous accidents reported every day in the papers, the automobile driver or the pedestrian? The correct reply is "both." There are many careless drivers who violate every common-sense rule and there are thoughtless pedestrians who blindly walk directly in front of a machine, trusting in Providence to save them. If the majority of pedestrians were not so naturally careful when crossing a street and the majority of drivers didn't unconsciously observe safety first rules there would be hundreds of more accidents every day.

I have drawn up a few simple "Don'ts" for pedestrians and drivers which I think would go a long way toward eliminating scores of accidents. They are as follows:

FOR PEDESTRIANS—

1. Don't step off the curb to cross the street without glancing both ways.

2. Don't try to read your newspaper crossing the street or stop to argue with a friend half-way over.

3. Don't walk behind a street car.

4. Don't try to run if caught between two machines. Stand still until the automobiles have passed.

5. Don't try to cross a crowded street if the police signal is set for the opposite direction.

6. Don't cross in the middle of the block.

7. On crowded downtown streets use safety lanes marked on the pavement.

FOR AUTO DRIVERS—

1. Don't turn a corner without sounding your horn.

2. Don't try to talk to someone in the back seat when making a turn.

3. Don't cut corners.

4. Don't get interested in something going on half a block behind you when making a crossing.

5. Don't try to break speed records going around a corner.

6. Don't try to dodge around the left side of a street car to get out of a block.

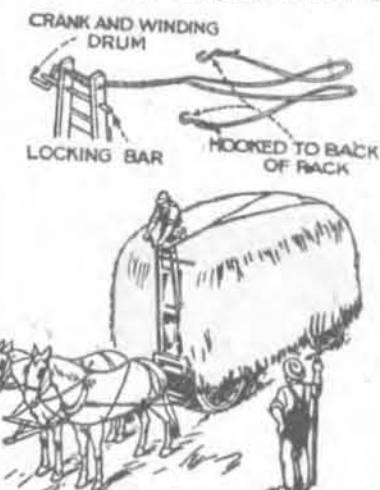

7. Don't try to cut too close to women and children, who are liable to get rattled.

### Half of Nation's Electric Power Now Used in Homes

Although the first incandescent lamp was not marketed until about 1880, the annual sale of electric appliances for the home is now estimated to total more than \$1,000,000,000, according to a report of the National Bank of Commerce in New York. The total sales of electricity for residential, industrial and public-utility uses for 1924 amounted to approximately \$1,235,100,000, a sum \$65,100,000 greater than that of the preceding year.

### Substitute for Binding Pole

Instead of carrying a cumbersome binding pole when hauling hay or fodder, a Wisconsin farmer uses a cable and windlass as a substitute. The rope is provided with a hook at each end and is securely attached, at its center, to the winch. This is made from a length of 2 1/2 inch pipe and is slipped through holes drilled in the front ladder of the wagon, a locking bar being also provided, as indicated, to keep the crank from turning after the rope has been drawn up tight. In use, the rope is brought over the load

in the usual way, the hooks being fastened to the wagon frame at the rear, and the winch then used to tighten the rope over the load.

## STRIKING FEATURES OF NEW STAR COUPSTER

Flexible door windows that may be lowered or raised like pullman car curtains and that disappear within the top of the body when raised are a striking feature of the new Star Coupster.

In reality the coupster is a convertible car, affording all the comforts of closed car transportation, yet convertible into an open car by the simple expedient of raising two disappearing windows—a five-second operation. For all practical purposes it is two cars in one.

## EFFICIENCY AND SAFETY OF CARS

## Numerous Devices Add to Comfort and Satisfaction of Owner.

It is difficult to believe that the oil pressure gauges and the amperemeters which now appear on the instrument boards of virtually all makes of cars were once regarded by many as unnecessary frills. Today there are a number of accessories being offered which are similarly regarded, which is the same as saying that they would be appreciated if only their advantages were better known.

By equipping a car with some of these fittings, greater satisfaction, efficiency and safety will result. Add front and rear bumpers to the car, attach one of the many rear signaling devices, keep a set of anti-skid chains handy and the car will be enormously benefited in proportion to the cost of the protection. Frequently such safety devices add to the car's appearance and thus not only help protect the owner's original investment, but add to it. A spotlight attached to the windshield and played upon the road may prevent wrecking the car in a ditch.

Take efficiency as another instance. A car that is operated without proper regulation of the cooling system is at all times running inefficiently. This is especially true in winter when the engine is constantly operated at the wrong temperature, either boiling over because the radiator is covered, with the lap-robe or running cold because there is no covering at all. The market now offers several radiator covers with openings which can be operated from the dash.

Along the efficiency line are other devices which are destined to filter the gasoline before it is admitted to the carburetor, thus preventing the entrance of dirty or watered gasoline to the carburetor or engine. A device of this character may pay for itself within a month after it is installed. Then there are shock absorbers, which in addition to giving greater riding comfort, save the springs from breakage on the rebound and thus increase the usefulness of the car by preventing breakdowns. Even cut-outs which were at one time regarded as toys for the speed maniacs are now shown to have a very important use.

Regardless of the selling points of each accessory or all of them as a group, it is a fact that any one of them adds to the second-hand value of a car. So the motorist not only has the use of the accessories with which he equips his car and the savings on insurance, inconvenience, repair bills, etc., but he gets a return premium when he goes to sell the car.

## Good Advice Is to Give Machine the Once-Over

There's economy, also satisfaction in giving your car the once-over in the spring, then if it needs replacements or anything else to bring it back to perfect form, have it done as quickly as possible.

Naturally the toll of a year's driving is most severe, and generally there is a reminder or two. Right here the old stitch in time principle works out. When the car is restored to its best shape, almost as good as the day it was bought, riding in it is far more enjoyable, also it will bring a much better price if you care to sell or expect to trade it in on a new car.

Letting your motor car run down is false economy. Eventually it costs you more and in the interim you are not happiest when riding along the highways. Even little things which you may think are of no special consequence develop into big items in repair bills if allowed to run on without interruption.

## Windshield Rattle

When the windshield glass becomes loose in its frame, it causes an annoying rattle. It is very difficult to close the frame so that it will grip the glass more securely without the possibility of breaking the latter. If the glass is not too loose the rattle can be eliminated by filling the space in the frame with shellac. This can be applied with a sharp pointed stick or a brush and should be applied slowly so that it will pack tightly in the opening.

## WATER INJURY TO TIRES IS SMALL

## Running Through Stream Is Not Injurious.

Now and then in the course of an automobile trip a car has to pass through a stream, and the question is sometimes discussed whether the action of the water is harmful to the tires. The same question arises when the car is out in a heavy rain.

Such a wetting is practically nothing at all, either for damage or improvement. At any rate, the effect on the tire is not harmful. Two chief constituents of a tire are rubber and cotton, both vegetable substances, and as a rule water does not injure vegetable matter. As illustrative of this point, there is the old but true story of the farmer who, when one of his rubber boots fell into a well, placed the other on a shelf in a closet. Twelve years later when the well was cleaned the lost boot was found to be in excellent condition, but the boot on the shelf had fallen into ruin.

If running through a brook resulted in cooling a tire the effect would be decidedly beneficial, but a quick dash through the water has little effect on the heated air within the tire and consequently the temperature change in the tire after its bath is negligible.

Water itself apparently does no harm to tires, but the combination of air and moisture commonly known as humidity is very destructive, especially on the cotton in ordinary fabric tires. The moist air works in between the layers of the fabric and rots them out, sometimes even before the tires leave the dealer's storeroom. Corroded tires stand humidity better.

The harmful effect of moist air is the chief reason why, when tires are stored, they should be kept in a dry atmosphere. As sunlight is also harmful, the storage place should be darkened.

## Shabby Tires Are Not Favored for Any Car

Shabby tires on a good-looking car! Yet stand on any street corner today and count the number of patched-up, dilapidated tires which are being used to the last mile. The cost of keeping these tires running for a few thousand miles would nearly pay for new ones. Mileage such as this comes high.

Tire conservation does not mean picking up a decrepit tire and putting it back into service at a big repair cost just to save a little rubber left in the tread. It means taking care of the tire from the first so that it will be able to deliver all the mileage built into it by the maker. When tires are so far worn that they are soon to blow, it is poor economy to repair them. Such a course means sacrifice of the inner tube as well.

Cheap, makeshift patches, boots and temporary repairs of all kinds are now being called into use as never before, but patching up an old casing in which separation of fabric plies has already begun, cannot give the freedom from tire trouble on which the pleasure in motoring so largely depends.

## Tying in Spring Leaves Will Prevent Spreading

Since the leaves in a spring have a tendency to spread apart, it is often hard to replace the spring tie-bolt in autos or trucks.

The easy way is to grip the head of the tie-bolt in a vise, and put all but the last four leaves one on top of the other. The last four leaves are put on crosswise, or spread around like the ribs of an umbrella, which allows the nut to be easily started on the bolt.

With the nut on the bolt, swing the bottom cross leaf into place. Then each succeeding leaf will slide easily into position. Then tighten the tie-bolt nut. Of course, the clamps on each end will have to be removed until the spring is assembled.

## Anything These Days

Running downhill recently a driver found to his utter surprise that a motor truck, supposedly at rest in the downhill position on the right side of the road, was actually going uphill backwards. The driver could not get it through his head for a moment and nearly lost control of his machine trying to do it out, which showed that he was not prepared to expect most anything nowadays. The truck driver was utilizing the lower gear ratio of reverse in order to enable the engine to pull up an extra heavy load.

## With No Means of Preventing War There Must Be Preparation Against It

By MRS. ANTHONY WAYNE COOK, President General D. A. R.

HOWEVER well intentioned this country may be, either upon its own accord or as a member of an international body organized for the prevention of conflict, it cannot prevent war. So long as there is no means of preventing war there must be preparation against war.

Unfortunately there is at present too great a tendency among many of our people to have America lead the world in readiness to promote peace by disarmament, without due consideration of the necessary provisions for our security and defense. As a nation we must realize that reliance upon right and logic in lieu of proper defense is an invitation for us to be preyed upon.

Nothing could be farther from the aims of our society than to commit our nation to a militaristic program, but it is the duty of every citizen to safeguard the United States against aggression by helping to support and maintain land, sea, and air forces for our reasonable protection.

We further believe that it is our duty and that of every other American citizen to be fully informed as to the measure of national protection which is necessary, and to be unceasing in our efforts to see that it is provided by the congress of the United States.

The spread of pacifism and the undermining of our ideals of national service by foreign agencies and by our native born emotional theorists, who have been swept loose from stable moorings by skillful propagandists, has reached a dangerous stage.

History will show that as a nation, in order to be just, we have actually leaned backward in our endeavor to be fair in international matters. Surely the time has come for our government to be given full power to expel from its shores those who, in spite of every opportunity, are proving themselves hostile to the best interests of our citizenship and are, by thought and deed, trying to undermine our ideals of government.

## Tabloid Novels and Peptonized Plays, Adapted for Radio Consumption

By COSMO HAMILTON, Playwright and Producer.

Tabloid novels and peptonized plays, adapted for radio consumption, will be demanded by the public in the near future. A new field awaits authors, since already the public mind is drifting away from the written page, accustomed as it is to looking at pictures that move across a screen and to listening to sounds that thrub through the air.

We have come to a curious moment in civilization. The public is robbed of the leisure in which it has the opportunity to read. It is an age of looking and listening, but not of stopping. But I am convinced that the hour is coming when people will have to stop and listen. The average film today is nothing but a series of pictures joined together like a string of sausages, making no appeal to the brain.

There is a dropping off of theater-going also, attributable to the high cost of production and high price of admission.

The radio is in an infantile state now, without a hair on its head or a tooth in its mouth—just a pink baby sprawling and making animal sounds. It can't even say "mamma" or "papa" yet. But it is a lusty child and it promises to mature in a wonderful fashion.

## We Have Made American Family Life a Matter of Individual Convenience

By DR. C. A. ELLWOOD, in Central Christian Advocate.

The chief thing wrong with American family life is the unsocialized individualism of our standards with reference to marriage and the family. We have made these things matters of individual convenience, instead of matters concerning the welfare of humanity, and of our highest ideals and values. We have tried to build the family life upon selfishness, and we have failed. The family life must be centered in the child, for the child stands for humanity. We need more Christianity in the American home, not simply to make marriage and the home life more stable for adults, but, above all, to make a proper environment for the child. We will have a Christian world just as soon as all children have the opportunity to grow up in a Christian atmosphere. It is superstition to think that it is human nature which makes us so often behave like pagans. If we behave like pagans, it is only because we grow up in an atmosphere in which pagan traditions, such as self-interest, power and pleasure as the ends of life, are tolerated.

## At Heart Youth of Today Is Not More Irreligious Than Its Forebears

By DR. H. H. TWEEDY, in Yale Divinity News.

There is no blinking the fact that multitudes of our young people are growing up with no conscious intelligent religious training whatever. Many are frankly indifferent toward the church and claim to be uninterested in religion. A few openly attack both the church and religion.

But no one can sojourn long with college students today and not be convinced that when the religion of Jesus is fairly and effectively presented, this younger generation is intensely interested in it and attracted by it; and when that generation has a chance to discuss religious problems fearlessly and frankly, it will sit up with any competent and inspiring leader far into the night.

At heart the youth of today is not more irreligious than its forebears. It does not state its life in the language of the ancient creeds nor always find adequate expression for it in the ancient forms, and it ought not to; but it is no foe to real religion and is hungry for the life which is life indeed.

## Many Men in the Twentieth Century Would Like to Turn Back the Clock

By W. L. GEORGE, in "The Story of Woman."

One may say that sixty or seventy years ago a husband expected from his wife almost absolute obedience, and that he usually obtained it. . . . The man of 1860 was a better man than the man of 1760, but he retained his old rights. Women, on the whole, looked upon her rights as those of a subordinate; she recognized her sphere as being to cook, to look after children, and to please men. She found it difficult to earn an independent living, and thus she wanted protection. She did not greatly aspire to playing games or consorting with men. To read her Bible, tend her children, sing to her man, this seemed to make up her simple philosophy. Soon after her wedding she put on a cap and pretended no more to attentions. It sounds ideal; and it was—for men. Many men in the Twentieth century would like to turn back the clock to those simpler times, when women made few claims.

## DAIRY

## SATISFACTORY WAY OF MARKING CANS

In checking milk and cream shipments at depots, dairies, and creameries, we find that quite a number of the milk and cream cans are not properly marked so that they can positively be identified. Most any farmer or dairymen can tell his own can by some peculiar mark or particular dent or scratch on the can, but he must remember these marks mean nothing to a stranger.

Milk cans that are shipped in by truck sometimes have no marks on them or are partly worn off.

Usually the truck driver or the man at the milk plant can tell whose can it is, but if a strange truck driver or new man at the milk plant be on the job, he will be unable to recognize these cans.

Farmers who ship cream by truck or rail should not depend too much on the common tag that is usually used. It may get wet and the writing on it be obliterated or it may become torn off and lost.

There are several ways of marking your cans that are satisfactory. A brass name plate may be soldered on the can or a brass tag attached to the hook which holds the cover to the can, bearing the owner's name and address.

Another way is to have your name and address embossed in the body of the can. This can be done when you buy a new can. The cost of embossing the name and address in the body of the can is about 50 cents for a single can and less where more are done at the same time.

If for some reason you prefer to paint your name and address on the can, be sure to put it on plainly and look it over occasionally to assure yourself it can be understood by others.

If a can of cream should arrive without any tag or identification as to who sent the can, the only thing the express company can do is to sell the cream and await developments which come only after long delay and annoyance to all concerned. Remember the express company and the creameries and milk plants handle thousands of cans every day and they all look alike to them, if not properly marked.—W. H. Skitt, Dairy Inspector, Colorado State Dairy Commission.

## Cow at Calving Time Is Entitled to Right Care

A Wisconsin dairy expert recommends the following care of the milk cow at calving time:

Have cows in good condition to insure reserve energy and body tissues for milk production.

Provide a comfortable box stall or suitable place for calving.

Be prepared to treat an attack of milk fever by having a milk-fever outfit to inflate udder with air.

Blanket cow immediately after calving if weather endangers her becoming chilled.

Do not milk cows completely dry for 48 hours after calving.

Feed cows sparingly the first few days after calving.

Warm water and a few quarts of scalded bran or oats and good hay is sufficient for the first day or two after calving. Gradually work cows on to full feed, which ordinarily requires two to three weeks.

Be careful not to overfeed.

Remove the afterbirth if necessary inside of 48 hours after calving, and do not allow the cow to eat it.

Remove the calf from its mother after the first two to four days, and teach it to drink from a pail.

## Produce High Producers to Make Cow Profitable

No one can tell with certainty just what the daughters of a pure bred dairy sire will produce until after they have been milked, but it can be stated with certainty that the daughters of common or scrub cows sired by a good pure bred dairy sire will be better than their dams. As nearly as can be estimated the average production of the western dairy cow is under 2,000 pounds of milk per year. If this milk tested 4 per cent the average butterfat yield per year would be 104 pounds. With feed at present prices, approximately one-half the dairy cows are below the production that will yield a satisfactory profit. Economy and logic indicate that the most satisfactory method of obtaining higher-yielding dairy cattle is to breed them. The poorer cows can be replaced by better ones and then pure-bred sires from high-producing cows can be used to build up the production of the present herds of the state.

## Keeping Up Milk Flow

Cows at the beginning of their lactation period are more sensitive to change in feed, water and weather than when they are nearer to the end of lactation. If a cow is so affected that her milk production drops down shortly after calving, it is almost impossible by the most careful management to bring her production back. This means that a successful dairymen must plan in advance so that his cows will be amply fed on a balanced ration.

## POULTRY

## MOTHER HEN DOES BEST WHEN COOPED

It is not good poultry management to allow the mother hen to range unrestricted with her chicks. With such freedom the hen frequently takes her brood through wet grass and, as a result, some are chilled and die, especially the weaker ones which are likely to be left behind. The loss of young chicks which follows such a practice is large and mainly preventable. Furthermore, the food which a brood allowed to range with the hen obtains goes very largely to keep up the heat of the body and the chicks do not make as good growth as they otherwise would.

Chick losses of this nature can be largely prevented by shutting the hen in a coop. Any style of coop which is dry, ventilated, and can be closed at night to protect the brood against cats, rats and other animals, and which, while confining the hen, will allow the chicks to pass in and out freely after they are a few days old, will be satisfactory. The hen should be confined until the chicks are weaned, though a small yard may be attached to the coop, if desired, to allow the hen to exercise. The fence can be raised from the ground far enough to allow the chicks to go in or out, but not high enough for the hen to escape. By using the coop the chicks can find shelter and warmth under the hen at any time and the windings, after a few days, may develop into strong, healthy chicks.

When chicks are raised with hens, they are likely to become infested with lice. If the lice get very numerous, they greatly retard the chicks' growth and may even cause their death. The hen should be powdered thoroughly with some good insect powder before she is put in the coop with the chicks, and at intervals of several days or a week thereafter. The baby chicks should be examined for lice, particularly on the head, under the wings and about the vent. If any are found, a little grease, such as lard, should be rubbed in those places. Apply grease moderately, as too much will injure the chicks. The chicks should be examined frequently and the treatment repeated if lice are found on them.

## Young Chicks Need More of Mineral Constituents

Young chicks need more of the mineral constituents found in wheat bran than do mature fowls, and the mashers fed them are accordingly, usually made to contain more of it. With this change and due regard to the size of the particles of food that baby chicks can eat, there need be little or no difference between a growing chick mash and one fed to laying hens. The chick mash recommended by the New Jersey experiment station consists of three parts of wheat bran to one each of sifted ground oats, cornmeal, flour wheat middlings and finely ground meat scrap. With one part of bran. Instead of three, and no necessity for sifting the ground oats or finely grinding the meat scrap, this would make as good a laying mash as could be compounded. The above would make a very good mash to be fed with equal parts of cracked corn and wheat. After four to six weeks chicks will eat coarser cracked corn and whole wheat and do not need to have the hulls sifted from ground oats. An excess of meat scrap or of green food might cause some looseness of the bowels. Whatever the cause, it should be corrected; added amount of wheat middlings would not avail.

## Green Feeds for Fowls During the Entire Year

Fowls need green feed of some kind all the year round. It should be supplied to hens confined in small yards and to all hens during the winter when no natural green feed is available in the yards. Free range or large yards will furnish ideal conditions for green feed, and this factor is one of the most important in raising poultry profitably on farms where the birds are supplied from cheap, natural sources.

Where smaller yards have to be used, they should be divided into two parts and used alternately, planting the vacant section two or three times yearly with quick-growing green crops of rape, oats, wheat, rye, or barley. This furnishes green feed and also helps to keep the yards sweet, clean and sanitary, which is perhaps the most important consideration in making poultry pay.

Good kinds of green feeds are sprouted oats, alfalfa, meal, chopped alfalfa and clover hay, cabbages, and mangels. In ordinary cellars cabbages do not keep so well as mangels, but they should be used up first.

## Why Little Chicks Die

Chicks die in the shell because of lack of vigor in the breeding stock, lack of moisture, overheating or chilling of the eggs and other causes which are hard to explain. It is a fact that most poultrymen find the eggs running close to 90 per cent in fertility, and even then have to be satisfied with 50 per cent hatchings on the average for the season. A lot of chicks seem to die in the shell during artificial incubation in spite of the best of management.

## DENVER BUSINESS DIRECTORY

SPECIAL RUSH SERVICE secured if you mention this paper when writing firms below.

BOHM-ALLEN JEWELRY CO. Established 1878. MANUFACTURING AND REPAIRING. All orders promptly attended to. Denver, Colorado.

## Grund Dry Cleaning

## COLORADO'S CROPS SHOW \$27,051,756 INCREASE IN YEAR

Denver.—C. R. Stedman, chairman of the committee on statistics of the Real Estate Exchange, at the luncheon of the exchange, discussed developments of agriculture in Colorado in his blackboard statistics. He used the figures for 1923, as they are complete, while those for 1924 have not yet been assembled. The value of all Colorado crops in 1923 was \$190,022,070, a gain of \$27,051,756 over 1922, and the gain was \$17,483 in acres, he said.

"In analyzing these official returns," said Mr. Stedman, "we find that there were grown 12,720,000 bushels of winter wheat on 1,800,000 acres, which was an average yield of 12.9 bushels per acre over the whole state and which sold for an average of \$10.80 per acre.

"Weld county showed 52,370, which was the largest acreage of irrigated lands; Boulder county, 10,507; Provers, 17,814; Adams, 16,751; Larimer, 14,602; and Montrose, 11,340 acres each.

"Washington county leads with 217,831 acres of nonirrigated wheat; Logan, 165,173; Kit Carson, 142,833; Yuma, 125,325; and Phillips, 101,556 acres.

"For many years Colorado was not considered a good crop state, but the crop of 37,250,000 bushels in 1923, a gain of 18,800,000 bushels over the previous year, and an increased acreage of \$345,000 acres, shows that our farmers are finding it to be a good crop for them to raise. Indeed, the year 1924 they increased that acreage about 60,000 acres, which returned a value of over \$10,000,000 over 1923.

"In the corn crop Kit Carson county showed the greatest increase in acreage from 67,030 in 1920 to 106,106 last year; Washington county from 85,933 to 123,948; and Yuma, 127,997 to 154,123. The eastern part of Colorado showed the greatest planting area and the extreme northeastern section in particular.

"One of the great crops of Colorado is the sugar beet, which has given the state the title, 'the Sugar Bowl of America,' because of the output of our sixteen sugar factories, which produced nearly 5,000,000 hundred-pound sacks of sugar in 1923 from the 165,000 acres planted, and which brought to the farmers over \$15,000,000. In this crop Weld county took the lead with 45,305 acres, Morgan, Logan and Larimer following. This crop was increased in 1924 by about \$5,000,000 to \$7,000,000 to the farmers.

"The excellent flavor of our fruit makes it the favorite in the East and this crop showed an increase of \$1,945,000 in value for the 1924 crop over 1923, Delta county taking the lead, with Montrose, Fremont and Garfield following.

"Potatoes are another very valuable crop because of their superior quality, and this brought the farmers \$8,463,496. Weld county led with a crop valued at \$2,163,200, followed by Rio Grande with \$1,461,000.

"In the hay crop Weld county led, the crop selling for \$2,847,000, and Provers, Larimer, Logan, Mesa and Jackson following with over \$1,000,000 each. In 1924 the acreage was increased about 12,000 acres, which brought the farmers about \$720,000 more than in 1923.

"Our hay crop is another very important and valuable crop because of our great live stock interests. This sold for \$23,615,000. There were 1,203,000 acres devoted to raising this crop, 780,000 of which was alfalfa.

## Comparisons Are Odious!

Did you ever stop and make a comparison between Army Store's prices and those of your local merchant? Do this next time you want something in our line and you'll be surprised at the saving you can make by coming here.

We buy only standard goods and well-known brands, and, buying in large quantities and selling in large quantities, we are able to sell at a very narrow margin of profit—and you get the benefit.

Just now we have some very fine Dress Trousers for summer wear—high-grade gaberdines and other weaves—and you'll wonder how we can sell them so reasonably. We have everything you'll need for your outing this summer—Canteens, Riding Breeches and Shirts for men and women, Bedding, Cots, Belts, Shoes—all at astounding low prices.

We have some good strong government double harness and some stock saddles at a big saving over the prices you'll have to pay at exclusive leather goods establishments.

Our habit of selling at a narrow margin of profit and handling only the best grades of goods obtainable has kept old customers and is rapidly adding new ones.

### U. S. TO ASSIST ARIZONA PROBE COLORADO RIVER AFFAIRS

Phoenix.—E. C. Larue and T. G. Gerdine of the U. S. geological survey will be in Phoenix May 25 to confer with Frank P. Trott, newly appointed state water commissioner, regarding

cooperation between the state and government in the expenditure of a joint \$100,000 appropriation for an engineering investigation of the irrigation and power possibilities of the Colorado river in Arizona.

An announcement to this effect was made from the governor's office, and

### That Parisian Charm

This dainty frock was made for little Carol Chase, the little actress who plays "Lila" in the current revival of "Peter Pan" in the revival of "Peter Pan."

Little maids of five or six may not yet know that our smartest styles come from Paris, but they will love wearing dainty little frocks of this model, while their more critical mothers will recognize at a glance the true Parisian charm and chic.

This model of Gibrac cotton crepe in a French blue, with dark dots, has a demure, yoke, and tiny turned-back cuffs on its diminutive sleeves. The bottom, too, is scalloped.

Fine cottons, whether of this Gibrac crepe, or gingham or drawn-cloth, lead for juvenile wear, even their party clothes are made of exquisite cottons.

### A Nice Chambray Frock

Little Carol Chase, the little actress who plays "Lila" in the current revival of "Peter Pan" in the revival of "Peter Pan."

Fine cotton fabrics are the little girl's wear not only for school and play, but for travel, visiting and even festive occasions, like dancing school and parties.

And if mother only could see this recent French frock imported to New York for a lucky little miss, she would realize that the new Gibrac chambray, which comes in a variety of lovely pastel tones as well as the standard colors, and never, never fades, has very dressy possibilities.

The narrow vest, and trimmings of contrasting color, with tiny frill all lend distinction to this smart little import, which any clever mother can easily copy in her daughter's favorite shade of Gibrac.

### For Miss Twelve-Year-Old

Written Batters, the star of "Humorous" fame, in a plaid Gibrac frock.

One does not hear so much about "the awkward age," any more, because modes for the adolescent girl are so attractive, and fabrics so delightful. No girl could feel awkward in a graceful frock like this one, for instance.

The model is a French one, developed in a Gibrac plaid gingham, with Gibrac plain chambray for trimming. The long waist makes

### Model of Fine Gingham

This frock was made for little Miriam Batters, the star of "Humorous" fame, in a plaid Gibrac frock.

Whatever you know is that there is no fabric so desirable for the Junior dress as a reliable quality of gingham or a fine chambray. Because a gingham pattern is woven, not printed, it is far more satisfactory to wear and to wash.

When fashioned of Gibrac plaid, with chambray collar, cuffs and pocket trimmings, and narrow crush sash, mother need have no worry either about fading, or the absolute correctness of her daughter's attire.

with it certain official correspondence between the state and the geological survey was made public.

One of the most interesting points revealed is the indication that the government plans to cooperate with the state to the fullest extent and that the work done in the next two years will be limited to topographic surveys that will disclose the possibilities of irrigation in Arizona from the Colorado river and to studies of power possibilities incident thereto.

This latter point is declared to be of special interest to all students of Colorado river development, in that it will supply definite scientific knowledge of a character which is expected to settle a number of popular disputes.

### FOR OVER 40 YEARS

HALL'S CATARRH MEDICINE has been used successfully in the treatment of Catarrh. HALL'S CATARRH MEDICINE consists of an Ointment which Quickly Relieves in local application, and the Internal Medicine, a Tonic, which acts through the Blood on the Mucous Surfaces, thus reducing the inflammation. ### COLORADO GOVERNOR ENDORSES C. M. T. C. MOVEMENT

Fort Sam Houston, Texas, May 22.—(Special to The Patagonian).—With the steady stream of applications for the 1925 Citizens' Military Training Camps gaining momentum each day, the action of Governor Morley of Colorado in so enthusiastically endorsing these great national schools in citizenship is most timely.

In a letter to the commanding general of the Eighth Corps Area, Governor Morley writes, in part: "I wish to assure you of my heartfelt support in the campaign to enroll candidates in the Citizens' Military Training Camps. \* \* \* I know of no better way to inculcate the high ideals of Americanism that is offered by accepting training in the Citizens' Military Training Camps. \* \* \* Our nation, the greatest democracy ever conceived, has taken a great step forward in the establishment of the Citizens' Military Training Camps, which will do more to inculcate true democracy than any other factor, least of all the public schools. \* \* \* Support of the C. M. T. C. is the performance of a distinct civic duty."

The corps area commander, in thanking Governor Morley for his kind letter of endorsement, writes: "I am convinced that the day is not far distant when the training of our young men in the C. M. T. Camps will become, in the opinion of parents, an essential part of their lives; and I sincerely hope that congress will find the way to appropriate sufficient money to insure the training of an increasingly larger number of men each year."

### NORMAL MINING CONDITIONS

Conditions in the mining industry are much improved over a year ago. In the spring of 1924 the country was facing a period of uncertainty, due to the political situation, which brought about a depression in trade during the summer months. Today business conditions are sound, and there is every reason to believe that the country will have a prosperous year.

Copper companies are curtailing production slightly because a surplus of some 15,000,000 pounds a month was being produced, causing such low

prices that they could not operate profitably.

Purchases by Europe of quantities of silver for coinage have helped the silver situation some, but these purchases bear no relation in quantity to the supplies held by them before the war and which must be replaced. Any conditions which help mining creates employment and distribution of money in the west.

Homes are said to be cleaner now than they were a generation ago. Surely! they are used less.
