PERSONAL AND SOCIAL

The Flux mine shipped some high-grade lead ore to El Paso this week.

George Elliott, lessee of the Dixie, took out a load of supplies to the mine this week.

Mr. and Mrs. Bert Hanson of Elgin were Nogales visitors Monday.

Mrs. Grace A. Farrell and daughter Dorothy were Patagonia and Elgin visitors Tuesday.

Marie Valenzuela, formerly of Patagonia, now a professional nurse in Phoenix, is visiting relatives here for a few days.

Mrs. V. L. Walker and daughter were visiting relatives in Patagonia this week.

Mr. and Mrs. R. C. Blabon were Nogales visitors Wednesday.

Grandma Trask of Benson is visiting relatives in Patagonia.

H. H. McCutchan is hauling machinery to the Eureka mine for F. B. Kollberg.

Martin Wilson of the Morning Star mine in the Santa Rita is in town for a few days, visiting relatives.

Tommie Costello is in town for a few days from the Last Chance mine, which is owned by his father, J. Costello.

E. E. Bethell has started work on the Chief mine, near the Wagon Fair.

W. F. Neil and wife of Elgin were in Patagonia Wednesday.

Mr. and Mrs. Charles Blabon, who have been visiting in California for several weeks, returned Saturday to Patagonia.

Sy Swyers and wife are possessors of a brand new coupe.

F. B. Kollberg, lessee of the Eureka mine, has purchased a new truck for use between Patagonia and the mine.

Henry Kane of Greaterville was in town Monday visiting friends and relatives.

Mrs. Clyde McPherson of the San Rafael Valley was in town Tuesday for a load of cotton seed cake.

Mrs. Bud Baldwin of the San Rafael Valley was shopping in Patagonia Tuesday.

Mr. and Mrs. A. L. Kinsley were Patagonia visitors Thursday from the San Rafael Valley.

Elbert Kinsley and son, Vernon, motored to Nogales Monday from the San Rafael Valley.

Mr. and Mrs. P. M. Etchells of Mansfield spent several days this week in the county seat.

T. G. Dunham and George N. Bagley of the San Rafael Valley were in town Wednesday for supplies.

E. F. Bohlinger was a county seat business visitor Wednesday.

J. J. Peterson, superintendent of the Big Jim mine, was in town Wednesday evening. He says work is progressing very satisfactorily at the mine.

E. E. Bethell has moved his supplies from the Mollie Gibson mine, following completion of the yearly assessment work.

J. J. Farley was painfully bruised about the legs while helping to move some mining machinery for E. E. Bethell.

Sarah Pierce and Leta Mead were guests last week of Mrs. P. M. Etchells at Mansfield.

Mrs. Virgil Walker of Nogales is paying an indefinite visit to her mother, Mrs. J. J. Farley, in Patagonia.

Mrs. Lou Stevens, Mrs. E. D. Farley, Mrs. Albert Gatlin and daughter, Ruth, and Bob Kane were among the Patagonians who attended the dance Saturday night at Sonita.

Mrs. E. D. Farley, Miss Margaret Tillery, Clarence Truax, and F. A. Sprague, the latter three of Tucson, spent Monday at the Big Jim and other mines near here.

Richard McCormick was a county seat visitor Wednesday.

Mrs. S. M. Bloodgood of Tucson, who has been visiting Mr. and Mrs. J. M. Little for several weeks, left Saturday for her home.

J. W. Hildred, superintendent of the Blue Lead mine, in the Santa Rita, was in Patagonia this week directing the hauling of supplies, preparatory to starting operations at the mine.

George D. Elliott, lessee of the Dixie mine, who has been in El Paso for several weeks, has returned to Patagonia and is a guest of the Commercial hotel.

Mrs. Lou Stevens, who has been spending the week in Nogales visiting her sister, Mrs. A. D. Page, is expected home tomorrow.

Mr. and Mrs. Ed Le Gendre of Sonita were dinner guests Sunday at Commercial hotel.

Mr. and Mrs. W. J. Fox of Dallas, Tex., spent Wednesday and Thursday at the Commercial hotel.

Mr. Woodman, who has been in the hospital for two weeks, following an operation, returned home Monday.

Mr. and Mrs. John and wife of the San Rafael Valley were shopping in Patagonia Wednesday.

Fred B. Kollberg of Nogales moved to Salero Thursday, where he is erecting a mill at the Eureka mine.

R. J. Morrison of Douglas, mechanic for F. B. Kollberg, has moved to Salero camp, where he will assist in erecting a mill at the Eureka mine.

Mr. and Mrs. J. M. Little have moved to Patagonia from Duquesne, where Mr. Little had been operating the Kansas mine. They will remain indefinitely here.

Mr. and Mrs. C. L. Northcraft were Nogales visitors Wednesday.

C. A. Pierce and family were Nogales visitors Wednesday.

R. C. Stewart of Tucson went to the Blue Lead mine this week, where he will have charge of assessment work during the absence of J. W. Hildred, the superintendent.

C. A. Wheeler of Tucson was a guest at the Commercial hotel Wednesday.

Woodie Gatlin and wife were Nogales visitors Wednesday.

"Bill" Adams, immigration inspector, and Bert Blabon were county seat visitors Wednesday.

Al Peck Sr. and Messrs McPherson and Cowan of Nogales were in Patagonia Wednesday inspecting mining properties.

D. J. Bruton, bridge inspector for the Southern Pacific, was in Patagonia several days this week in the interests of the company.

ELKS' BIRTHDAY CELEBRATION TOMORROW AND SUNDAY

A large number of visiting Elks are expected to attend the "Birthday" celebration of the order, which will be held in Nogales tomorrow and Sunday. Tucson and Douglas lodges of the order will join Nogales lodge in the initiation work and will assist in the program of entertainment for Elks and their families.

A chariot race has been arranged for 5 o'clock p. m. on Morley avenue, Nogales, and a large class of candidates will be initiated in the evening. Sunday will be the date of a big picnic and barbecue at the Mascareñas ranch, Sonora, and a day of joy is anticipated.

Several local members of the Nogales lodge are planning to attend the ceremonies in the border city for the two days' program.

The Patagonian, \$2; Worth the Price

This Rajah A Real Radio Fan

H. H. The Rajah of Kallikote and Atagada

WHEN His Highness, the Rajah of Kallikote and Atagada, in far off India, wants entertainment at his palace which is 350 miles from Calcutta, all he has to do is to turn on his Crosley Radio just as if he were in the United States.

The Rajah is an enthusiastic radio fan and has on several occasions listened to broadcasting from Europe on his four-valve—as tubes are called abroad—set.

In Europe and in Asia it is quite an experience to shift from station to station, which usually means going from country to country. From each country, of course, one listens to a different language. If there is ever going to be a universal language the radio will stimulate its coming.

A Crosley owner in London writes that night after night he listens first to the English and Scotch stations, then to Paris, Berlin, Brussels and Madrid.

VAUGHN NEWS

Ed Ellis was a county seat visitor Monday. He took up the matter of a teacher for the fall term for the Vaughn district with Mrs. Grace A. Farrell, county school superintendent.

Mrs. Anna B. Ackley, county treasurer, of Nogales was a Sunday visitor at the Black Cat ranch.

Mrs. M. A. Daws, missionary for southern Arizona, spoke Sunday evening at the Little Adobe church.

M. Snyder of Tucson spoke Sunday afternoon at the Little Adobe church to a large audience. On June 28 Mrs. McClen of the same city will fill the pulpit.

Henry Wood was a county seat visitor Monday. He was accompanied by Mrs. M. A. Daws.

Jim Rountree visited friends in the Vaughn district early this week.

Mrs. W. H. Anderson is suffering with a sprained wrist, which she sustained in trying to crank her "tin Lizzie."

STATE INDUSTRIAL REVIEW

Yuma—Movement started toward erection of \$75,000 hospital.

San Carlos—Steps taken toward construction of Coolidge dam across the Gila river near here.

Yuma—New ditches, dikes and reservoirs under construction at Picacho Wash, to take care of flood waters.

Mesa—Cantaloupe growers in this district expect big crop this year.

Somerton—Oil well in place at Maxey ranch.

Holbrook—Work at Holbrook oil well progressing satisfactorily.

Winslow—Contract let for construction of new gas plant at a cost of \$600,000.

Williams—Airfield dedicated here.

Ploomfield—New well discovered here, estimated at 100 barrels.

Yuma—Twenty thousand dollars in paving project asked for this city.

Survey to begin soon for new paved road from Grand Canyon to main National Old Trails road, at a cost of \$100,000.

BARBECUE AND RODEO JULY 4TH AT PATAGONIA

Funds are being raised in Patagonia to defray the expenses of a Fourth of July barbecue and rodeo, to be followed at night by a big dance at the Patagonia opera house.

The rodeo will include the usual calf roping, steer tying, broncho riding, etc. Purses will be made up by the entrants, who will compete for the purses in all contests.

The day's program will take place at Northcraft's Grove at the edge of town, which has an abundance of good water and shade.

TRAINED NURSE GIVES INSTRUCTION TO BENSON PARENTS

Miss Carolina Valenzuela, R. N., arrived in Benson Monday, June 8, and has been busily engaged during the week in the prosecution of her duties. Miss Valenzuela is one of the five nurses employed by the state in fulfilling the requirements of the Sheppard-Towner Act. She also represents the state board of health in the child hygiene division and while in Benson will endeavor to meet with the different ladies' organizations and give talks on child hygiene, and distribute literature on the subject of baby welfare and other matters relating to the health of children, and will also visit outlying towns.

The Sheppard-Towner Act is a congressional act and that body appropriates a sum of money yearly for the fulfillment of the provisions of the act, and this money is matched by the different states. It relates strictly to the health and welfare of children.

Since arriving in Benson, Miss Valenzuela has spent a great portion of her time with the sick babies, instructing the parents and others in the art of nursing and otherwise taking care of the sick. With her pleasant personality she has made quite a number of friends and her skillful work is appreciated by the parents of the sick children and the physicians in attendance. Speaking Spanish fluently, she is able to reach the Mexican sick in their own language and thereby give the ones in attendance upon the sick instructions made so plain that they are sure to benefit by them.—Benson News.

CALLES' NOTE IS IGNORED

Washington, D. C.—The administration's purpose of stirring smoldering coals of the American-Mexican situation into a flame was revealed in a authoritative quarters to have been to compel the southern republic to accord more respect for American representatives.

What precipitated the situation was the return of United States Ambassador Sheffield, with complaints of discourteous treatment by Mexican officials. It was his conviction that a sharp jolt was needed to remedy the situation.

That done, the incident is now considered as closed.

"Every new firebug is a new crook. And now crooks are being made all the time by the laxity of insurance agents in over-insuring property and by gross and glaring failures of juries and judges to sense the viciousness and criminality of burning property to get the insurance."—Portland Oregon Journal.

Grandmother—Johnny, I wouldn't slide down those stairs.

Wouldn't? You mean you couldn't.

TREATMENT OF STOCKMEN BY FOREST SERVICE UN-AMERICAN

Flagstaff—The way the forest service has treated the stockmen has been un-American in principle because we have never been given our day in court; we have not had as much rights as a bootlegger, so testified Lou Charlebois, member of the advisory board of the Arizona Wool Growers' Association, at the hearing before the senate committee on public lands, held June 15 in Flagstaff. The forest service is all powerful. There has been no appeal from its decisions and no redress for stockmen when the forest service does not live up to agreements.

"Boards of appeal with representation given stockmen are absolutely essential if we are to have any protection," he continued. "The forest service has been prejudiced against sheepmen and they have suffered more than any other class at the hands of that department. Sheepmen were accused of over-grazing forest areas, but a recent joint investigation by a committee composed of forest service officials and members of the Wool Growers' Association blew that theory up."

The only damage done was where the forest service had provided inadequate driveways of insufficient width where sheep had to be unduly centralized.

That was mismanagement of the forestry officials and not the fault of the sheepmen.

Danger of forest fires has been reduced by grazing off underbrush and by the fact that stockmen had men patrolling the forests. Charlebois said. Forests have been run on the theory of easterners. What we need is administration by western men familiar with range conditions.

Drouth has nearly put sheepmen out of business, and proposed cuts in the size of flocks of 40 per cent by the forest service will finish the job if carried out, he testified. Forest rangers who are westerners and understand the problems have been afraid to tell the truth about the real condition, in many instances, for fear of losing their jobs. The forest service has made many mistakes, which is a natural human trait, but it should not have persisted in maintaining the mistakes for so many years. If a committee of senators had not come to Arizona the proposed cut in the number of sheep grazing on forests would have been made and the size of flocks reduced to a point where the owner could not make a living. If we were given individual allot of area with a long-term lease and the right to fence our pastures we would demonstrate to the forest service that stockmen would then improve instead of ruin the range. Charlebois said.

Charlebois expressed the fear of further extension of federal control of public domain and advocated that all unreserved public lands in Arizona be turned over to the state.

Waiving of grazing fees this year was needed and is appreciated by sheepmen in an equal degree with the cattlemen. He stated as his opinion that the forest service should not charge fees for grazing equal to owners of private lands who have to buy holdings, fence them and pay taxes.

"We have learned that majority rules everywhere except in the forest service; that is the reason we prefer the public domain turned over to the state. If congress will not agree to that, we prefer leases on the public domain on long terms with local representation on the board of control."

Charlebois stated he could never understand why areas like the New River Forest reservation where the rangers had to pack posts for miles on burros to put up forestry signs or else take them on canvas had been included in reservations.

COPPER SHOWS SLIGHT ADVANCE

The price of copper this week was slightly higher by an eighth of a cent than it was last week. Domestic producers who attempted to buy a little at 13 1/2 cents found only a moderate tonnage for fairly prompt shipment available at that price. The red metal was noted this week at 13 1/2 cents per pound.

Arizona rates third in the United States in value of plow lands.

Yuma—Three hundred thirty cars of cantaloupes passed through here in one day.

Flagstaff—Retaining pond for trout constructed in Oak Creek canyon, near here.

The Holstein-Friesian Association of America gives cow championship to Arizona.

CROP REPORT FOR ARIZONA ON JUNE 1, 1925

On June 1 the condition of Arizona's main hay crop was 87 per cent of normal, according to a report just issued by the United States crop reporting board. This is six points lower than the condition reported on the corresponding date last year. This condition, which is slightly lower than usual at this season of the year, is due largely to unfavorable growth of grain hays. Alfalfa has been somewhat retarded in its growth by prevailing cool nights. This has been offset somewhat by favorable harvest conditions to date. No contracts have been reported on alfalfa seed although some fields were "turned to seed" several weeks ago. Earlier rains in the higher reaches of the state have brought grains up to a good stand and conditions seem favorable for good yields in crops to be cut for hay.

CANTALOUPE.—A condition represented by 98 per cent of normal was reported on Arizona cantaloupes on June 1. This is 4 per cent higher than the figure reported on the same date one year ago. With an increase of 150 per cent over last year's acreage, this season promises the largest production of cantaloupes ever known in Arizona. While "crown melons" were not as noticeable as on June 1 last year, growing conditions have caused a very luxuriant growth of foliage to date; this is desired as added protection to the growing fruit. No aphids have been reported to date.

SMALL GRAINS.—Although somewhat backward, small grain harvest continues under favorable conditions. Wheat will probably show the usual acre yield, while oats and barley are said to be slightly lower in acre returns than usual. Probably all of the grains in the southern valleys will have been harvested by the last of June. As usual, in the higher altitudes harvest will run to early fall.

FRUIT.—Reports do not indicate a good fruit crop for the state as a whole. Late freezes in the higher altitudes seriously damaged both apples and peaches; some sections report that the crop is a complete failure this year. In the southern valleys citrus crops caused marked loss in blackberry crop. A very light crop of apricots is reported in the Salt River Valley.

FRUIT CROPS WILL BE SMALLER THAN LAST YEAR

Only fair crops of apples, peaches and pears are now expected in the United States this year, department of agriculture crop officials declared this week. Frosts in late May reduced prospects in many scattered sections, particularly in some of the central states, Virginia, Michigan, and portions of New York.

The condition of apples on June 1 was nearly 10 per cent below the usual average on that date. The northwestern states expect more apples than were picked last year, but for the country as a whole the crop seems likely to be lighter, although much depends on the rainfall during the next few months.

Peach production shows a large increase in California, where most of the crop is canned or dried, but in practically all other important states the crop is expected to be substantially smaller than last year. Even in Georgia, where many young trees are coming into bearing, the crop is expected to be less than 1,000,000 bushels compared with 8,333,000 bushels last year.

The pear crop also is reported only fair this year, California alone among the important producing states expecting materially larger crop than in the preceding season.

"DAD" SHORT TO HELP ARIZONA FARMERS WITH PROBLEMS

Arizona farm families are to have the benefit of advice and counsel in their problems from Prof. A. K. Short, for 25 years a leader in agricultural extension work in this part of the country, according to word reaching here. As director of the southwest headquarters of an agricultural foundation at Dallas, Texas, he will act as farm adviser to families in Texas, Arizona, Oklahoma, New Mexico, Arkansas and Louisiana.

The first effort of "Dad" Short, as he is affectionately known, will be in the development of a farm service division. It is announced. He will answer the questions of the perplexed farmer and his wife, and assist them to an understanding of new methods of growing crops and raising animals profitably. Special attention will be devoted to the boys and girls.

C. M. T. C. RIFLE TEAM TO GO TO CAMP PERRY, O., IN FALL

Fort Sam Houston, Texas, June 18.—(Special)—Authority has just been received at headquarters, Eighth Corps Area, for the organization of an Eighth Corps Area C. M. T. C. rifle team to travel to Camp Perry, Ohio, this fall and participate in the national matches there, firing side by side with the best shots in the United States, assembled there for annual competitive firing.

The team will be composed of 15 men, selected from the 3400 young men who will be in training in this corps from July 28 to August 26 in the Citizens' Military Training Camps. The matches for the C. M. T. C. at Camp Perry will extend from August 23 to September 10. All expenses to and from the Ohio rifle range, the largest in the world, will be paid by the government and while at camp the team will be the guests of the government.

Competition for places on this rifle team will be of the keenest and hardest contested. For the last two years the C. M. T. C. rifle team of the Eighth Corps Area has won the C. M. T. C. matches at Camp Perry, and those charged with the selection of the team this year have avowed that the team will this year make the title "three in a row." Harry Renshaw, sensational rifle shot of Nogales, Arizona, who has featured the Eighth Corps Area participation in the matches for the last two years, will undoubtedly be a member of the team again this year. But his place is about the only one assured. The other 14 places will be open to the successful graduates of the six camps in the corps area.

JULIUS KRUTTSCHNITT, FORMER S. P. PRESIDENT, DIES

NEW YORK, June 18.—Funeral services for Julius Kruttschnitt, former president of the Southern Pacific railroad, who died June 15, in this city, were held today in New Orleans, where the railroad builder was born 71 years ago, the son of a Prussian consul.

Private services were held here on Tuesday, following which a private car bearing the funeral party left over the Pennsylvania railroad for the south.

Apparently on his way to recovery after a minor operation in the Presbyterian hospital, Kruttschnitt succumbed to an unexpected heart attack. His death removed an outstanding figure in American railroad history who had devoted his life to upbuilding western transportation lines.

Only two weeks ago Kruttschnitt relinquished the chairmanship of the Southern Pacific after 12 years as its directing head and 48 years of service with the Harriman lines.

The youngster seeking a formula for success may find it in the official appreciation of Julius Kruttschnitt, placed on the Southern Pacific records by the directors with their acceptance recently of the former chairmans' resignation.

After reciting the fact of his 47 years' service, the resolution enumerates the qualities that made Kruttschnitt one of the leading railroad men of the world. Here they are: "Indefatigable industry, constant courage, unfaltering fidelity and zeal, added to practical skill, technical training and scientific knowledge."

BOY ASSAULTED FOR REFUSING TO AID IN THEFT OF AUTO

Carmel Joy, 17, of Elgin, Ill., is in a Cambes hospital with a fractured skull sustained in a severe beating administered to him, he says, when he refused to become a party to hijacking an auto tourist. While his condition is regarded as serious, attending physicians said he had an even chance for recovery.

The assault took place near Fairbank, five miles northwest of Tombstone. Joy told officers that he and a companion had left a freight train, there and sought passage with an auto tourist. After riding some distance in the machine, his companion suggested that they hijack the driver. When he refused, his companion turned on him and beat him over the head with a blackjack.

Charles Ward of Philadelphia is being held in the Cochise county jail in connection with the attack on Joy. No charge has been filed against him pending the outcome of Joy's injuries. Joy and his companion passed through Patagonia last Saturday and were questioned by Immigration Officer C. J. Trask.

FILMY FROCKS FOR SCHOOL; PRINTED FABRICS POPULAR

MANY pretty processions of frocks for girls from six to fifteen or sixteen are daily passing in review before inquiring mothers. While they are looking for graduation dresses or frocks for the little festivities of closing school days they will get full information as to present styles for the dress-up frocks of juveniles and are sure to note that colors, in beautiful shades, have usurped the place of white to a great extent. The shops are showing pastel tints along with white for graduation frocks of crepe de chine, georgette, chiffon or fine voile.

Pink, blue, lavender and white have proved themselves the most popular

"Money talks," and when its subject is dress styles for the midsummer season it talks "straight from the shoulder." Now that merchants have staged many special sales of dresses for matron and maid they are well convinced as to just what Mrs. American Lady and Miss Summer Girl have set their minds upon—they know what they have spent their money for. First and above all they have demanded printed fabrics in colorful patterns, in silk, silk and cotton mixtures and in cotton materials.

These printed materials, made up in the simplest manner, dominate the styles for midsummer in dresses that

For Last Days of School.

colors and are chosen for both the younger girls and those in their teens. For the younger girls the majority of these filmy frocks are sleeveless or have very short sleeves, as shown in the model pictured. This is a voile frock with small rills of val lace in two rows above the hem, terminating at the sides under loops of satin ribbon. It is one of many models in which the armholes are finished with lace ruffles. The small turnover collar is finished with hemstitching and a bow of ribbon with long ends is posed on the left shoulder where the frock fastens. It would be pretty in

hang almost straight from the shoulder. Very little trimming is required on them and they are shown in both short and long-sleeved models, nearly all of them provided with a narrow girle that fits loosely at one side below the waistline. They are informal in style—even in the silk fabrics—and they are very becoming to their wearers. A pretty example of the printed silk frock is pictured here with front and back panels edged with narrow lace and an application of flat folds of crepe de chine in a plain color at each side. The narrow girle made of the silk and lined with the crepe de chine

A Popular Slip-On Model.

any light color or in white over a colored slip. Nothing is prettier than georgette for graduation frocks and it proves to be a durable fabric as well and fine voile merits any fine needlework that may be lavished upon it, as it is practically indestructible. With pretty flaring skirts, tucks, lace and ribbons all features of the summer mode and flowerlike shades of lovely colors distinctly fashionable, a class of girl graduates ought to be as enchanting to look at as a blooming garden of flowers. Among the showings there are dresses of cream-colored net covered with fine tucks and combined with lace.

slips under the panels and ties at the side. The lace makes a pretty finish for the sleeves. This is one of the popular slip-on models which are only rivaled by the jumper dress and two-piece dresses in sport styles. In the two-piece frocks the lines are straight; also. The skirt portion is set onto an underbodice and is occasionally plaited and the blouse, which is usually on the middy order, gives the effect of a one-piece dress. All the styles, the slip-on, jumper and two-piece frocks are cool, smart and attractive.

WORLD PARAGRAPHS IN BRIEF

SAYINGS, DOINGS, ACHIEVEMENTS, SUFFERINGS, HOPES
AND FEARS OF MANKIND

WESTERN

Chief Eagle Horse, titular head of the Tbilget tribe of Indians of southeastern Alaska, arrived in San Francisco a few days ago, accompanied by his bride whom he went to Paris to wed.

A. H. Woods, New York theatrical producer, announced that he has signed a five-year stage contract with Mabel Normand, former motion picture actress. On the stage the erstwhile film comedienne will continue in comedy roles.

When arrested in San Francisco, Mears Hansen, confessed to the police that he had tied up hand and foot, between fifty and 100 girls and women in this city seeking employment from him in answer to advertisements for stenographers, typists and apartment house managers.

Orders were received at Carson City, Nev., to transform the old United States mint there into a federal prison. In the meantime the Department of Justice directed that Carson City penitentiary be designated as a place of confinement of federal prisoners from several western districts.

Exploration of the great Salt Lake Desert in Utah, one of the largest areas of public land in the United States remaining unsurveyed, will be undertaken in the near future by two bureaus of the Interior Department. It was announced at Washington, D. C. last week. Two official surveys are planned, covering many square miles. The geological survey plans to make extensive explorations and to investigate the saline deposits of the entire desert.

Bringing reports of the discovery of new fruit and new fish and a thrilling rescue party, the mine sweeper Ortolan, bearing a party of American and Mexican scientists, arrived in San Diego from islands and waters off the Lower California and west Mexican coasts. The party is headed by Dr. G. Dallas Hanna, curator of invertebrate paleontology of the California Academy of Sciences. The rescue was that of a young man, B. Musser of the United States navy.

WASHINGTON

President Coolidge Saturday appointed former Senator Porter J. McCumber, Republican of North Dakota, a member of the international joint commission which has jurisdiction in Canadian boundary questions.

Secretary Wilbur has no intention of sending either of the dirigibles to Los Angeles or Shenandoah in search of the missing Amundsen polar expedition. In announcing refusal of a request by the Norwegian Aero Club that one of the airships be sent to the rescue, the secretary declared "we are not going to send any wild goose chase to the polar regions."

The Canton-American hospital was struck by shell fire during the fighting on the outskirts of the city, according to a delayed cablegram received in Washington by the State Department from Consul General Douglas Jenkins at Canton. After the shooting had ceased, two American launches, returning to the Christian College, were frequently hit by rifle shots, but the occupants escaped injury.

Arson rings, headed by "unscrupulous politicians and business men," are operating in practically every city in the country and are causing an indirect loss to business generally of \$160,000,000. T. Alfred Flemming, supervisor of conservation of the National Board of Fire Underwriters, told the convention of the National Association of Creditmen in Washington.

The decision of the Canadian government to send mounted police into the Arctic to establish patrols over islands north of the main land, was received with interest in Washington, although officials declined to comment upon press dispatches telling of the plan. Indications have come from Ottawa for some time that Canada might take active steps to support claims she has made to islands in the Arctic, and it is thought likely that the intention of the MacMillan expedition this summer to raise the American flag over any islands discovered in previously unexplored regions of the polar seas, may have been a factor in Ottawa government's decision to move by physical possession toward consolidating her claims in that region.

President Coolidge is willing to call a conference of nations in an effort to outlaw gas as a weapon of war if the Geneva arms traffic conference fails to agree on the subject, but over night dispatches indicated that the Washington gathering would be unnecessary. After hearing eloquent addresses by Representative Theodore E. Burton, head of the American delegation, and Paul Boncour of France, the Geneva conference voted to frame a special protocol banning asphyxiating gas in war. The protocol would be submitted to all nations.

FOREIGN

The Belgian pilot Veenstra of the balloon Prince Leopold won the Gordon Bennett cup balloon race which started from Brussels. Veenstra landed at Cape Tourin, Spain. Veenstra traveled about 822 miles.

The American gunboat Pampanga of the South China patrol was fired on near Whompoa while conveying a supply launch to the Canton Christian College. The Pampanga returned the fire. No casualties were reported.

Yunnanese troops, engaged in civil war with the Cantonese troops, fired on four Americans, Mr. and Mrs. Frank Prampton and Mr. and Mrs. Montgomery Ogden, while the party was endeavoring to cross by launch from Honan Island to Canton. The launch flew the American flag.

As soon as the government troops landed on the island of Samos the insurgents evacuated the capital, Vathy, and withdrew to the neighboring heights, where they hoisted British, French and Italian flags. Later they scattered towards the interior. The population is calm and there have been no casualties.

The council of the League of Nations adjourned last week after having settled a large number of questions connected with the economic and financial restoration of Europe and some political matters, which, left unadjusted, threatened to grow into serious difficulties. The council will reassemble in Geneva on Sept. 4.

In a statement in Dublin to American newspaper correspondents, the Irish Free State minister of commerce, Patrick MacGillican declared that outrageous accounts of alleged famine conditions in Ireland had reached America. He said a renewal of the story of famine in Ireland was affecting tourist traffic from the United States and that there was no truth in the famine reports.

The British government has given official acknowledgment to the Franco-British agreement on the reply to Germany's security pact proposal. The British government issued a statement emphasizing that the proposed pact is one of mutual assistance between Belgium, France, Britain and Germany. The statement said that Great Britain has guaranteed to protect both sides of the Rhine and therefore to assist either Germany or France against aggression of the other.

Controversies between four newspaper publishers have been settled. Santiago Claret of El Sol de Havana, and Florencio Veliz of El Correspondencia of Cienfuegos were both injured while examining sabres. Gustavo Gonzales Beauville of El Heraldo de Cuba, was slightly injured when he and Jose M. Muzureta of El Imparcial inspected sabres. Duelling is against the law in Cuba. After particularly bitter editorial fights or personal controversies the laconic announcement appears in newspapers that "the differences" between the principals have been settled. It is usually accompanied by a statement that one or both have been injured "examining" weapons.

GENERAL

Fruit and vegetable growers in southern Illinois have suffered nearly a 50 per cent loss in their vegetable crops from the heat wave, the Illinois Agricultural Association was informed.

One of the most bitter legal battles in Nebraska's history is being fought in Lincoln over the conviction of Walter R. Simmons, former Montana cowboy deputy sheriff, who is under a death sentence for his alleged murder of Frank Pahl, Spencer, Neb., garage man, in May, 1922. After having lost an appeal from his conviction to the Nebraska Supreme Court, Simmons, through his attorneys, has received twenty reprieves from his sentence. The last one came a few days ago when Governor Adam McMullen granted an extension of the date of the execution until July 9.

Harry K. Thaw, whose second return in two weeks to the bright lights of Broadway since his release from an institution has brought him renewed publicity, issued a statement through his counsel saying he would not submit to any further "hounding or pounding."

As a result of various conferences in New York, Clarence Darrow, Chicago criminal lawyer, and Bainbridge Colby, former secretary of state, have been chosen to assist in the defense of John T. Scopes, Dayton, Tenn., high school teacher, charged with violating the Tennessee law prohibiting teaching of evolution in the schools.

Eighty per cent of all thieves are drug addicts, according to H. B. Westover, federal narcotic agent. "The ravages of drugs leave the addict in such a mental and physical condition as to render them totally unable to support themselves," Westover said. "In this condition, the addict is forced to steal for his living, that he may have enough money to buy dope. It takes from \$10 to \$20 a day to support the habit."

Figures given out at the eighteenth annual convention of the National Association of Building Owners and Managers, held in Cleveland, O. show more than one-tenth of America rides in elevators of office buildings each day. It was estimated that 14,000,000 elevator passengers are carried each day in the principal cities of America.

Zev, famous race horse, two years ago winner of the Kentucky derby and international race against Paygrass, is to return to the turf according to an announcement by Sam Hildreth of the Rancocas stable.

BRIEF ARIZONA ITEMS

Word has gone to army and air mail headquarters that the Yuma aviation field is now in standard condition, ready for use at any time.

The Southern Pacific has extended until July 31 the emergency rate on cattle loading, for shipping cattle from drought-stricken sections of Arizona and New Mexico.

On June 10 Williams dedicated Webber field, the new aviation landing ground. Army airplanes from El Paso and San Diego, and a number of commercial planes were at the celebration.

George Dunkhoff, truckman, and a Mexican helper, Joe Periz, both of Phoenix, were killed when an express truck driven by Dunkhoff collided with an Arizona Eastern passenger train at Tempe.

A carelessly thrown cigarette stub is believed to have started a forest fire, which burned over three acres of private property, on the border of the national forest, on the Copper Basin road.

President Miles M. Carpenter of the Tucson Chamber of Mines appeared before the public lands sub-committee in Tucson and appealed for a change of present antiquated mining laws, and to explain the conflicts occasioned between surface and sub-surface rights, which proves a severe handicap in securing capital for development of mines located on stock raising homesteads.

Mortgages given on crops before they are planted are worthless, Judge E. Elmo Bollinger held in Superior Court at Yuma in sustaining a demurrer of the Yuma National Bank in an action filed by the First National Bank of Yuma. The complaint instituted brought suit to recover from the Yuma National Bank on a mortgage taken on prospective crops of W. A. Gray of Yuma county.

Appeal from a judgment obtained by Andrew T. Hammons as state superintendent of banks and ex-officio receiver of the defunct Farmers and Merchants' Bank of Tempe against the U. S. Fidelity and Guaranty Company has been filed in the State Supreme Court at Phoenix. The appeal is brought by Mr. Hammons to certain portions of the judgment which directs that claims of the guaranty company against the bank be offset against the judgment.

The vacation season of the White Mountain country, already well under way, was given an official send-off at Springerville June 20 and 21 with the annual barbecue and celebration to which visitors from all parts of the state were invited. Coming between Prescott's Smoki ceremonies, and Frontier Days and preceding a number of rodeos and other events to be given during the summer in this and other resort sections, the Springerville event formed part of a schedule of entertainment that will lend considerable impetus to the "See Arizona First" movement.

A judgment for \$80,000 in favor of the First National Bank of Yuma against Arnett Pavley and others was handed down in Superior Court at Yuma by Judge Bollinger of Mohave county, before whom the case was argued. The judgment was one of the largest ever to be handed down in the Yuma county Superior Court. The suit involved the collection of \$187,000 on notes and mortgages on cotton, credits on the notes reducing the amount due the bank to approximately \$8,000. Arguments in the case were presented several weeks ago, attorneys going to Kingman to appear before Judge Bollinger.

Fully 1,000 members of the American Legion in Arizona are expected to attend the annual state convention to be held in Nogales July 2, 3, 4 and 5, according to an announcement made by members of the local committee on arrangements. Several special trains will bring the delegates to Nogales, it is expected.

While the United States forestry service plans to effect a reduction of some 35,000 head of cattle and approximately 40,000 head of sheep to reduce the overstocked condition of national forestry land in Arizona, there will be no reduction on the grazing areas of the Coronado forest, it was stated in Tucson by District Forester F. C. W. Pooler.

Arizona's first "one delegate convention" adjourned in Nogales last week when Joe Healy, representing the Casa Grande Junior Chamber of Commerce returned to his home after a three-day session. Healy came to Nogales expecting to represent Casa Grande in a first state conference of junior chambers of commerce. Arriving he learned that the other chambers had indefinitely postponed their visit to the border city.

The Colorado river is to remain at a very low stage for several months, unless rain falls in the upper watershed country, is a prediction made by government experts at Yuma, who previously had predicted that melting ice and snows in the upper country would cause the river to reach a high stage.

Scott White, former receiver of the United States land office at Phoenix, has been appointed by Governor Hunt to the position of the state prison, to succeed Ed Devine, resigned. Mr. Devine was appointed last January.

MEXICO IS GIVEN BLUNT WARNING

SECRETARY OF STATE KELLOGG
SAYS MEXICO MUST LIVE UP
TO OBLIGATIONS

MUST PROTECT U.S. CITIZENS

STRONG LANGUAGE USED BY
SECRETARY CAUSES SURPRISE
IN DIPLOMATIC CIRCLES

Washington.—Blunt warning to the Mexican government that the United States cannot countenance violation by Mexico of her international obligations or failure to protect American citizens was served by Secretary Kellogg here in a formal statement.

The strong language employed by the secretary came as a surprise, although it had been indicated he would make a public declaration as a result of recent conversations with Ambassador Sheffield, who appears to have returned from his post on leave chiefly to discuss the grave situation in Mexico with the President and Mr. Kellogg.

The secretary's statement declared that, while relations with the Mexican government were friendly, "conditions are not entirely satisfactory and we are looking to and expect the Mexican government to restore properties illegally taken and to indemnify American citizens."

"It should be made clear that this government will continue to support the government in Mexico only so long as it protects American lives and American rights and complies with its international engagements and obligations," Mr. Kellogg said. "The government of Mexico is now on trial before the world."

Additional significance attached to Mr. Kellogg's statement because was issued after White House conferences. Ambassador Sheffield had been the President's guest since arriving in Washington, and Secretary Borah, chairman of the foreign relations committee, also was a guest there last night.

Ambassador Tellez at the Mexican embassy expressed "surprise" at the nature of the Kellogg statement, said he had no previous knowledge of it, and that it was to be made known to the two governments in the condition in Mexico which had prompted the statement.

"I fully concur in the belief expressed by Secretary Kellogg, in the case of Mexico, however, that is more than a desire; it is a fixed determination and policy."

The ambassador insisted there had been no new outrages against American citizens in Mexico, and that all pending cases involving indemnification of Americans had arisen out of the Mexican revolution.

Calves Bring Large Profits

Fort Collins, Colo.—More than 450 cattlemen from all over Colorado at the most successful feeders' day ever held at the Colorado Agricultural College were told by Prof. E. J. Maynard, who with Prof. Geo. E. Morton conducted feeding experiments with sixty calves, that if the small margin between cost and selling price continues it will be necessary to modify feeding practices to realize a profit. The tests have coincided with other tests throughout the country, he said, in proving that calves will show the same gains at two-thirds the cost of fattening 2 and 3-year-old steers. Calves, he said, will make as heavy daily gains, will produce uniform gains over a longer period and generally will land on a more favorable market than heavier stuff.

Lightning Bolt Kills Three

Breckenridge, Texas.—Three persons were killed and a number of others injured when lightning struck a school house near here. The building was said to have been crowded with persons attending a mass meeting to discuss an irrigation project. Darkness and the storm from which the fatal bolt issued delayed relief workers from aiding the victims. Every physician and nurse in Breckenridge was called into service as the wounded were brought to local hospitals.

Girls Healthier Than Boys

London.—In view of the low cut neck, short skirts and spider-web stockings which are now the mode, girls have a better chance for health than boys, who usually wear too much clothing. In the opinion of Dr. Leonard Hill of the National Institute of Medical Research, because of these fads women and girls permit more of the ultra-violet rays to enter their bodies, and if the fashion continues, he avers, it is probable that statistics eventually will show that they are the healthier of the two sexes.

W. S. Stone, Labor Leader, is Dead.—Cleveland, Ohio.—Warren Stanford Stone, labor leader and labor financier, president of the Brotherhood of Locomotive Engineers, and all its allied activities, died in a hospital here from an acute attack of Bright's disease. Funeral services and burial were held here Monday afternoon. Mr. Stone's wife was at home here when his death occurred. They had no children. William S. Prenter, first vice president of the brotherhood, succeeds Mr. Stone until the advisory board elects his successor.

NATIONAL DEFENSE DAY

Selection of the Fourth of July as the date for holding the second National Defense Test is peculiarly appropriate. For it is the nation's birthday, and birthdays are eminently fitting times for self-examination and for taking stock of ourselves.

Incidentally it provides for revival on the Fourth of July, 1925, years after the battles of Lexington and Concord, of the traditional muster system created by congress in 1792, for, after all, the National Defense Test as applied under the Defense Act of 1920 is but a modern version of the annual muster of the early days. It is based on the same principle, that every American citizen of military age is a member of the defensive forces of the nation.

The first National Defense Test, held last September, was, it is said, only 60 per cent successful. Hundreds of boys and men of military age who should have signed for defense and marched with their units in the Defense Test parades stood on the curbstones and looked on. Their flimsy excuse that they didn't understand what it was all about despite the self-sacrificing efforts of patriotic women and girls to explain to them the meaning of the defense test and to sign them up will hardly be valid this year. And the objections of those who thought they saw in the defense test a militaristic gesture on the part of the United States, a mobilization that might be interpreted as a threat by other powers, where are they? The Defense Test as held last fall was a convincing answer to all such questions as were raised by objectors, conscientious or otherwise. For it was just what it was designed to be—a Defense Test, to acquaint the people of each community with what would be expected of them in case was should come—a great nation-wide fire drill in order that we might not be round again in a panic of unpreparedness in a national emergency.

Every man of military age in Arizona belongs, potentially, to one of the eighty units assigned to this state. In the event of war these units would assemble at 29 rendezvous points. It is more than the plain duty of every man in Arizona between the ages of 18 and 45 to sign for defense and to take his place with one of these units in the national muster on the Fourth of July. It is his privilege as the recipient of the heritage handed down from the Revolutionary days. For if Americans had held back and stood on the curbstones then, where would we be now?

It is the announced hope of the government that the second National Defense Test will be 100 per cent successful. In so far as Arizona is concerned, let's make it a full 100 per cent with no slackers. For, in the words of the Secretary of War, the public's knowledge of the responsibilities gained in this manner "will enhance national security and be a guarantee for peace."

LEAD PRICES ARE UP TO STAY

At Patagonia there are many old mines which were developed when lead was selling at less than 50 per cent of today's price and when zinc brought penalties to the producer. These properties today can be made to pay handsomely when properly opened up. This means a new era of mining prosperity for Santa Cruz county and the whole state, with the result that every line of business will feel the effect of the revival in this great basic industry. Mining companies will pay greater dividends and many new dividend payers will be added to the list. The world-wide demand for metals spells added opportunity for the investor in mines and mining securities.

SAFETY EDUCATION MUST START IN SCHOOLS

HERE are additional facts taken from the report of the National Conference on Street and Highway Safety which should be brought to the attention of the American public:

"Safety Education in the Schools: Education in safety and accident prevention should be incorporated in the curricula of elementary schools, both public and private, parochial schools, night schools, vocational schools, citizenship schools and schools for non-English-speaking adults."

"Provision of Playgrounds: Adequate playgrounds throughout the community should be provided and particularly there should be available a playground for every school, both as a safety measure to keep the children off the streets, and as a means for safety instruction and citizenship building."

"Provision of Traffic Facilities: The systematic provision of funds is essential to permit carrying on a well-ordered program for the improvement and maintenance of traffic facilities, including adequate roadways and rights-of-way, elimination of excessive grades and curves, guard rails or walls at

danger points, clear view at curves and intersections, the public's share of the expense of grade crossing elimination and protection, roadway lighting, street and highway signs, signals and surface markings."

The conference pointed out that uniformity of traffic regulations is essential. It also stressed the fact that statistics regarding street and highway accidents are "so vital to any comprehensive understanding and treatment of the safety problem that their collection, analysis and publication in every State and community are essential. Their value depends largely upon prompt and frequent publication."

Accident spot maps should be maintained, the conference said, to be used primarily to detect those points at which accidents occur most frequently and as a basis for plans to eliminate the conditions which cause accidents.

The Secretary of Commerce, Mr. Hoover, is to be commended for his initiative and enterprise in calling the National Conference on Street and Highway Safety. The Conference has made a splendid start and gives promise of large

PUBLIC SUPPORTS FIREBUGS

The following editorial from the Portland (Oregon) Journal comments on a situation which is too common in practically every American city and some small communities:

"Juries can free guilty firebugs when they want to. But the public pays."

"Eight separate fires were started in a house in Portland. The fire bureau was quick on the scene and put out the blaze in time to have a full view of the tracks of the firebug."

"The furniture was soaked with coal oil. Furniture that the owner paid \$137 for was insured for \$1200."

"In a Portland lodging house there were two fires within 35 days. Papers and shavings piled on the floor and stuffed in chimneys, and oil-soaked rags near the remains of a burned candle were found in the rooms. Insurance of \$1500 was carried on the contents, which had been offered for sale for \$450 without a buyer."

"A store building was burned on March 21. Insurance of \$450 was carried on the contents. A few arson squads there was no contents in the building."

"Arson has become an industry in Portland. Juries don't convict. A teteria was burned for the insurance. One of the owners said he burned it to get the insurance. He saturated a mop with coal oil, attached a short handle, lighted the candle and left the place. The first jury hung. The confessions of both owners were before it, but it disagreed."

"The jury at the second trial convicted, but recommended parole and the judge granted it. If juries and courts don't punish firebugs of course the business of burning and collecting the insurance will go on."

"And a lot of people think it all right, in the belief that the insurance companies pay. But where do the companies get the money? They do not pay a cent of their own money for these incendiary or other fires. They pay with the money that the in-

sured pay in premiums."

"The home owner pays. The merchant pays. The industrial plant pays. The owner of every kind of property insured against fire pays. It goes out of their pockets in higher rates, and they may not realize it, but they do all the paying for every fire."

"And that isn't the worst. As if there were not enough crime, the system of incendiary fires is making more and more criminals. Every firebug is a crook. Every new firebug is a new crook. And new crooks are being made all the time by the laxity of insurance agents in over-insuring property and by the gross and glaring failures of juries and judges to sense the viciousness and criminality of burning property to get the insurance."

THE MODERN LABOR MOVEMENT

"The labor movement in this country is so far in advance of that in any other country as to make comparison impossible," says The North Shore Bulletin. "In European countries, including Great Britain, labor organizations and labor leaders are still pursuing antiquated methods that are comparable to the attempt of a man to lift himself by his bootstraps."

"Here they are using the fulcrum of capital ownership and are actually lifting themselves into positions of well-being that amount to affluence in comparison with conditions of European laborers."

Instead of fighting capital, they are beginning to recognize its power and to use it as an implement for their own improvement.

"There are at least three kinds of evidence that indicate roughly the extent to which laborers are becoming their own capitalists in this country: First, the rapid growth of savings deposits; second, the investment by laborers in shares of corporations; third, the growth of labor banks."

If you can't boost this mining camp, don't knock it. It's going to boom!

Missionary Bishops Prepare
For Episcopal Convention

In the heart of the African Jungle and amid the icefields of Alaska, in China and Japan, the Pacific Islands and the West Indies, missionary bishops of the Episcopal Church are preparing for the journey to New Orleans where, on October 7, the Forty-eighth Triennial General Convention of the Church will assemble. These missionary bishops will meet in conference with the National Council of the Church in New Orleans, prior to the opening of the Convention to discuss plans for the ensuing three years. For the first time in the history of the Church two native Japanese Bishops, Dr. Motoda of Tokyo and Dr. Naide of Osaka, will be present; as will also Suffragan Bishop Mcmolu Gardner of Liberia, son of a native African chief.

Some of these bishops will travel 10,000 miles to reach the Convention city; but there is none more remote to the average man and woman than Rt. Rev. Harry Roberts Carson, Bishop of Haiti, 1100 miles sailing from New York. Haiti is so little known that Bishop Carson frequently receives letters addressed to him at Tahiti in the far distant South Seas.

Haiti being without railroads or practically roads of any kind, Bishop Carson travels thousands of miles yearly on horseback to visit his jungle mission stations. He frequently sleeps in a hammock, and carries his own food and drinking water. Occasionally an aeroplane drops him into places ordinarily absolutely inaccessible. Yet wherever Bishop Carson goes he is greeted by crowds of natives in "churches" which are typical of the country. There in Haiti they build their "cathedrals" overnight. Half a dozen bamboo poles are driven into the ground. Over these a few cross-

A native "cathedral" at Mirebalais, in the interior of Haiti, during a service conducted by Bishop Harry Roberts Carson, who will be a prominent figure at the forthcoming General Convention of the Episcopal Church at New Orleans.

pieces are stretched, and then layer after layer of palm leaves strewn over them to ward off the burning rays of the sun. A white table cover from a nearby native hut serves the purpose of an altar cloth, and the native candidates for confirmation, most of them barefooted, kneel on a pillow from another hut. The worshippers bring their own chairs. Chickens scratch about the interior during the service, and hogs and goats root outside. But the service is none the less devout for all this. Scores of natives become members of the Church annually at services of this character. They illustrate the conditions under which Christian missionaries labor, not only in the remote places but just outside the borders of the United States. Plans for the betterment of conditions among these people will be discussed at the New Orleans Convention.

NOTICE OF INCREASED ASSESSMENTS

At the June meeting of the Board of Supervisors, sitting as a Board of Equalization, the board, with the information then possessed by it, believed that the following assessments on the following described properties are each too low, namely:

The Texas Company, merchandise, raised from \$2,000.00 to \$10,000.00.
Kress Company, merchandise, raised from \$3,750.00 to \$15,000.00.

M. Karam & Sons, merchandise, raised from \$47,000.00 to \$53,500.00.
Sam Friedman, merchandise, raised from \$1,800.00 to \$2,500.00.

Southern Arizona Power Company, gas, electric light, ice and power plants, machinery and equipment, raised from \$522,321.00 to \$607,724.00.

Magma Copper Company, mines, raised from \$10,155.51 to \$125,000.00.
Magma Copper Company, machinery and buildings, raised from \$5,976.20 to \$23,450.00.

Vail and Ashburn, range cattle, raised from 3,300 head to 5,200 head.
Vail and Ashburn, bulls, raised from 132 head to 200 head.

Vail and Ashburn, range horses, raised from 15 head to 45 head.

Vail and Ashburn, saddle horses, raised from 45 head to 75 head.

Vail and Ashburn, machinery and equipment, raised from \$300.00 to \$800.00.

Clyde McPherson, range cattle, raised from 270 head to 440 head.
Clyde McPherson, bulls, raised from 10 head to 22 head.

The owners of the above property and all who are interested therein are hereby notified that the Board of Equalization will meet at the office of the Board of Supervisors in the Court house of Santa Cruz County, State of Arizona, at 9 o'clock a. m. of the first Monday of July, 1925, at which time and place they will take up, consider and determine whether the assessments above specified, or any thereof, shall be increased, when and where you can be present, with such witnesses as you may bring, and be given a hearing. These assessments will be taken up by the board and considered in the order as they appear above, unless, for some good reason or cause first shown, the time is extended in any case.

A. DUMBAULD,
Clerk of the Board of Supervisors, Santa Cruz County, Arizona.

NOGALES, ARIZONA

Finest All-Year-Round Climate

Patagonia has the finest all-year-round climate in the world. Its altitude is 4053 feet, and one can always get a refreshing night's rest in the cool, rare atmosphere, no matter what temperature prevails during the daylight hours. Summer residents are becoming more numerous as the delightful climate here becomes known. We have a good hotel, mercantile establishments that handle everything needed for the mine, the household, the ranch. Situate along the Sonoita creek, on a branch of the Southern Pacific railroad, it has scenic beauty and is easily accessible. Good roads are everywhere in the county and one of the best state highways passes through the camp, which has a population of approximately 600 souls. You'll like it here.

THESE FIRMS BELIEVE IN THE FUTURE OF PATAGONIA

The Corner Store

The Corner Store (formerly the Patagonia Commercial Company) is owned by Val Valenzuela Jr., J. R. Coille and Miss Lucy Valenzuela, all of whom have been in this district for many years. They carry a general merchandise stock, dry goods, etc., and cater to the wants of the mines.

Washington Trading Company

The Washington Trading Company is one of the oldest mercantile institutions in the district, having at one time operated a store at Washington Camp, later in Patagonia and Nogales. The Patagonia store is the home of dry goods here, and is still optimistic over Patagonia's future. The company owns several promising mines in the district.

C. B. Wilson

C. B. Wilson, proprietor of the Patagonia Ice and Light Plant, is one of the old-timers in the district, having operated mines, freighted ore with mules and horses and later adding trucks to his equipment. He is superintendent of the Morning Glory Mining Company, whose property is located at Harshaw, near the Big Jim.

Patagonia Cafe

Sam Thomas, an optimistic Chinaman, is proprietor of this establishment, and caters to those desiring meals at all hours. He always says: "Oh, business is pretty good."

A. S. Henderson

A. S. Henderson is another of the old-timers in the district, having been here over 40 years. He owns several mines, besides his general mercantile establishment, and has engaged in cattle raising and ranching. He has been a steady shipper of ore for several years.

Evans Mercantile Company

The Evans Mercantile Company is an offshoot of the Washington Trading Company, which sold its grocery and hardware departments some years ago to E. H. Evans and associates, who handle a large stock of goods and cater to the needs of mining companies as well as residents of the surrounding farming and cattle raising territory. It is an up-to-date store in every particular.

The Brodine Mining Company

The Brodine Mining Company is represented locally by Richard Rowe, who is associated with C. B. Wilson in the auto accessory, wood, and feed business. The mining company has a large body of ore that should be developed by people of unlimited financial resources, hence the offer for sale on this page.

Patagonia Lumber Company

The Patagonia Lumber Company is owned by H. Corbett of Tucson and handles everything a lumber yard usually deals in. Mine timbers are carried in stock and furnished by the railroad when wanted. A. D. Sydenham is manager of the yard.

City Market

The City Market is operated by Sy Swyers, an experienced butcher, who handles good meat and knows how to cut it. Prices are as reasonable as good meat can be handled for when the supply is greater than the demand. This is a cattle country.

Patagonia Barber Shop

William Fessler, the local barber, bobs 'em just right. He is an enthusiastic booster for the district and owns several mining claims, into which he puts his surplus cash trying to develop the pay streak.

HOLLANDERS IN CANADA

MONTREAL, Can., June 14.—Shortage of farm land in Holland will result in a heavy influx of Dutch settlers to Canada this year, according to immigration officials here. "Agents of the Dominion government in the Hague and Rotterdam are preparing for the movement of thousands of farmers from the Netherlands this summer and go in extensively for diversified agriculture and dairy."

THE RICH PATAGONIA MINING DISTRICT

The Patagonia mining district embraces upward of 400 mines and prospects, which contain nearly every known mineral. Many of them have produced vast wealth, some having been worked by Indians more than 200 years ago. The principal metals now being mined are lead and silver—principally lead, because of the high price of that metal at the present time and the belief that lead will be in greater demand in the near future. Much activity is expected in this district soon, which will attract big capital and place Patagonia among the big producers of the United States. Many good copper mines and prospects are located near by, but the copper market is too low to warrant their operation. The Magma Copper Company, of Superior, Arizona, owns a copper mine here which may start operating at any time.

ADVERTISERS ON THIS PAGE SEE OPPORTUNITY HERE—AND STAY

C. A. Pierce, E. M.

C. A. Pierce has been in the Patagonia district many years and, being a mining engineer, knows the district has a bright future. He conducts an assay and engineering office, buys ore and reports on properties here and elsewhere.

The Commercial Hotel

The Commercial Hotel is conducted by Mrs. E. D. Farley, who is well-known to most mining men in Arizona, as well as the traveling public that make Patagonia one of their stops. The hostelry is located in a beautiful spot in the Sonoita Valley. It is gaining quite a reputation as a resort for those who seek escape from the heat of other Arizona cities. Summer boarders are becoming more numerous each year.

Howard Keener

We won't say much about him, except to say that he owns and edits this newspaper. The other fellow will tell you about him—without asking, probably. But we believe in the district; that's why we stay.

Postmaster H. B. Riggs

H. B. Riggs is another of our old-timers. He has property and other interests in the district, and if you ask him, he will tell you that Patagonia is sure to be a big mining camp some day.

The Pool Hall

County Supervisor Robert A. Campbell is proprietor of the Pool Hall, where the radio brings the miner after a hard day's work. Mr. Campbell is an old-time miner, but has not been doing much mining except on his own property, near here, for many years because of injuries received in a mine accident. He is a booster for the district.

Richardson Real Estate, Mining and Commercial Corporation

The Richardson Real Estate, Mining and Commercial Corporation was formed by the founder of Patagonia, Sonoma, Col. R. R. Richardson, a short time before his death. E. F. Bohlinger is vice president of the corporation and looks after its mining and real estate interests here. Many of the larger mining properties are included in the assets of the firm. The Flux, Hardshell, Hermosa, Josephine, Andes, and other mines are among the properties included.

East Side Garage

R. C. Blabon, proprietor of the East Side Garage, has an up-to-date place, which attends to auto repair work for Patagonia and the surrounding territory. It is the "fix it" shop, where your mine machinery and engine troubles are taken care of. Brazing, too, is one of the specialties of the East Side Garage. "Buck" Blabon was at one time master mechanic at the Three-R mine, near Patagonia, one of the best copper properties in the district, which is owned by the Magma Copper Company of Superior.

The Kino Copper Company

This company was organized by a group of business men of Santa Cruz county for the purpose of making a deep test for mineral in the Patagonia mountains. Much work has been done on their holdings in the past. Several mining groups that were independently operated were consolidated under one head and location work is in progress on 127 claims taken over by the company. Great hopes are entertained for the company's success, which will mean much for the district.

ANTELOPE REFUGE ON T. R.'S OLD RANCH

WILLISTON, N. D., June 14.—Four sections of the Trail ranch along the Little Missouri, comprising much of Theodore Roosevelt's ranch when he "roughed it" as a young man in the Dakota Bad Lands, have been offered to the state by "Badlands Bill" McCarthy, owner. McCarthy further offers to fence the gift from his nine-section ranch if the state game and fish commission will set it aside as a game preserve, primarily for the protection of a herd of 75 antelopes. Bill thinks that it is fitting that "Teddy's" old ranch should be a refuge for game.

What the World Is Doing

As Seen by Popular Mechanics Magazine

Automatic Cranker on Motor to Prevent Stalling

Attachable to any automobile that has a Bendix drive, an automatic cranker starts the engine the moment it stalls and also saves the ignition. It is actuated by magnetic force, throwing the starter into action as soon as the engine stops. In emergencies, such as being stalled on a railroad track, the cranker starts the motor immediately. It may be placed on the instrument board, behind the dash, under the hood with its two small buttons showing on the instrument board, or under the floor. In the latter case, the starter pedal is removed. All that is necessary to start the engine is to turn on the ignition, and as it must be turned off to stop the car, this scarcely will be forgotten.

Handle for Small Cameras Serves as Tripod

Holding small cameras steady without the use of a tripod has been simplified by a wooden handle which is screwed to the

underside of the instrument and is held with the left hand while the shutter is pressed with the right. Further stability is gained if the top of the camera is lightly pressed against the operator's forehead. When not in use, the handle may be detached and carried in the pocket or case.

ROAD INSPECTION STATIONS ON WESTERN BORDER

During the latter part of the month J. H. O'Dell, chief quarantine inspector, made a thorough investigation of the traffic conditions prevailing along the western border of Arizona. All of the roads and highways entering Arizona from the west, either by ferry or by bridge across the Colorado river, were carefully checked as to the amount of automobile and other traffic.

The object of this survey was to determine the most logical points for locating the road inspection stations in order that the greatest amount of protection to the agricultural and horticultural industries of the state might be maintained. All traffic will be subjected to an inspection in order to stop the importation of material infested with insect pests or plant diseases.

In addition to the road inspection station which will be established at Yuma in the near future, Mr. O'Dell recommends a station at Salome and another at Kingman. A twenty-four-hour inspection service will be maintained at each of the stations, which will insure the inspection of all traffic coming from the west.

"ARIZONA AND THE ARTS"

Tucson.—In the forthcoming issue of The Outlook, which will be on the news stands at an early date, Arizona and the University of Arizona will be brought to the attention of thousands of readers throughout the country.

The narrative is entitled "Arizona and the Arts" and was written by George Marvin, staff writer for The Outlook, who recently spent a week or more in Tucson gathering material for the article.

"Arizona possesses two rare things, its climate and its university," observes the writer in his introduction. There follow impressions of a gratifying nature in which the high standard of the university's school of mines is particularly emphasized.

Howard Keener, at the Patagonian office, will acknowledge your legal papers, put the Notary's Seal thereon—and has for sale all kinds of legal blanks.

We have won the esteem in which this undertaking establishment is held by the public by fair and courteous methods. Our thorough equipment enables us to furnish a dignified burial service and to render a bill consistent with the actual worth of the ceremony. Local services or shipping funerals.

Drink of Ultra-Violet Light Aids Throat Treatment

Treatment of certain throat diseases is given at a London hospital with a special ultra-violet light apparatus. It has long

funnel-shaped tube, the small end of which the patient puts in his mouth. The rays are directed through it so that they fall upon the affected parts and little of their beneficial powers is lost.

Oldest Child in the Family Most Likely to Succeed

Studies made by Prof. William Ogburn, of Columbia university, indicate that the oldest child in the family most frequently succeeds in life, the youngest ranks next and intermediate children third. Three thousand names were selected at random for a survey: 1,000 artists, including doctors, musicians, authors and painters; 1,000 scientists of all grades, and 1,000 of a more general classification, including business men, journalists and men of "good mixing qualities." Questionnaires were sent to these individuals with the request that they indicate their position in the family. Replies were received from 1,700. Turning to "Who's Who" as a criterion of success it was found that of the 577 who were the oldest sons in the family and had brothers less than five years younger, 342 appeared in the lists of noted men; 155 out of the 398 who were the youngest children with brothers five years older were in the book, but of the 729 who were intermediate children, only 237

could be found in it. These data were regarded important in measuring early influences.

Patching Auto Tops

The application of a patch to a torn auto top without removing the covering from the frame is often a failure, as it is difficult to apply pressure evenly over the surface of the patch while the cement is drying. A novel method of overcoming this is practiced by a Wisconsin motorist. After the patch has been cemented and applied, a small muslin bag, filled with sand, is placed over it, and the car is left standing in the sun until the cement is dry. The bag of sand accommodates itself to the curved surface of the top with the result that the patch will adhere along all the edges.

Loud Speaker Made from Paper Cone

A simple loud speaker, which gives a good tone and volume can be made by anyone from a disk of thin cardboard or stiff paper. The disk is cut radially and the edges of the cut drawn up to form a wide cone. A pin is fastened in the center and soldered to an ordinary head-phone diaphragm, as shown. The cone

may be pleated as shown in the illustration, but this need not be done unless desired.

USE CARE IN ADDRESSING MAIL

A letter, postcard, parcel, or newspaper entering the mails is simply a piece of mail.

If, because of inadequate or incorrect address, and, in the case of the package—improper wrapping—a piece of mail must be taken out of the regular postal machinery for "directory service" or "hospital service," it becomes a "nixie."

If the postal sleuths are able to correct the address or return to sender for a better one, it again becomes a piece of mail—though "delayed mail" is the better sobriquet.

If, after an exhaustive effort, the postal detective must give up the puzzle and there is no return address, the piece of mail is consigned to the dead letter office, where it again changes its name to dead letter or dead parcel, as the case may be.

Its period of existence as a "nixie" is the most expensive one. It demands special attention from the best clerks. Valuable time is spent in its behalf, time which also may prove more costly to the mailer or intended recipient through the attendant delay.

But in the long run the postal service loses most. In Chicago 400 workers do nothing but handle "nixies." In New York the service costs \$500 daily. In all the "nixie" costs the government about \$1,740,000 a year.

Abolish fear and you can accomplish whatever you wish.—Hubbard.

BUSINESS PRINCIPLES APPLIED TO FARMING

A group of farmers at Owatonna, Minnesota, operating under a cost keeping system put out five years ago by the University of Minnesota experts, have disproved the traditions that farming never pays.

They have found where the farm leans are, in labor, in buying, in selling. And, they have tried to plug every leak. They have paid themselves \$60 a month wages and 5 per cent on their investment. They have increased butter production 20 per cent per cow, and reduced production costs. They have found shorter cuts to profits in almost every branch of farming. Their farm income last year averaged \$2471, or better than \$200 a month, which is far above the average tradesman's or mechanic's income.

Last year brought exceptional prices for wheat, corn and a few other products; but much of this Minnesota income was from miscellaneous farming—alfalfa, poultry, dairy products. They had no magic sesame to success. They merely cut out the waste and stuck to the things that paid.

Boy—Papa, what's a politician?
Pa—A politician is a man who gets of it.

The Vanishing Men

By Richard Washburn Child

(Copyright by E. P. Dutton & Co.)
(W. N. U. Service)

SYNOPSIS

Out of uniform, at the end of the World war, with the rank of major, Peter DeWolfe, young American of wealth and family, is urged by an English comrade in arms, Eversby Benham, to visit the Benham home and meet the Englishman's mother and sister, and, incidentally, Brena Selcoss, young woman about whom there is an air of mystery. Muriel Benham, Eversby's sister, becomes infatuated with Peter.

CHAPTER II—Continued

She had often insisted that she never had headaches, as if not having headaches was a part of a proper program for a woman who intends to marry correctly, have children correctly and be correctly buried with a correct husband's tears. Perhaps this came into her mind, for at the vine-covered portico she turned, put her arm against one of the ancient stone pillars and, making a pretty picture with her high color and her lean young body, she called out: "Do you want a walk this afternoon—to Besman wood?"

Peter nodded his assent vigorously, and when she ran into the house he threw himself back into the grass and through half-closed eyelids watched the ever-changing patterns in cottony clouds and the flight of wheeling martins.

Muriel began that afternoon walk with great gaiety of spirits, as if, perhaps, she had found a triumph over some difficulty, a victory at the end of twenty-one years of preparation for victory. As soon as they had struck off across the downs she threw her arms toward the sky and sang into the wind an old hunting song of quaint and engaging melody.

"Let's learn the song together," she said to Peter. "Look over there on the edge of the horizon. That square tower. That's Saint Dunstan's—the very tower in which the fox sought sanctuary in the song—the old song, written six hundred years ago, they say."

Peter, with his usual adaptability, acquired both words and music. He sang. He danced upon the rolling green plain. And at last, seizing Muriel's waist around the belt of her sporting coat, he swung her almost off her feet and together they whirled merrily—two tiny tops spinning upon the vast expanse. When they stopped, the girl, almost dizzy, and breathless, clung for a moment to his coat and looked up into Peter's eyes. He could feel her warm breath upon his chin.

Peter was not lacking in perception; he knew at once that his visit at the Benhams' must come to an end. All the cold assurance in Muriel's face, all the steady, stable English look had gone. No refusal of hers to vote or smoke a cigarette or adopt an article of clothing which in any way might have unsexed her could have proclaimed her as a woman rather than as a companionable playmate as completely as did this searching, half-troubled, hungry look in her swimming, brimming eyes.

"Come on, now," he said as if to a private soldier who had disobeyed orders. "Let's walk. Let's walk hard and fast and long."

He was wondering now whether he had made his journey to Beaconshire in vain; whether, indeed, his willingness to solve the puzzle that Benham had told him was waiting for him had not been a piece of folly leading to nothing. When he and the girl had dipped down the slope into the single track path that led across the moor he nearly walked blindly into the silver stream through the rushes that grew at the water's edge.

"You are not vexed?" asked Miss Benham invitingly.

"Vexed!" exclaimed DeWolfe. "With you? God bless you, dear, no!"

She looked at him gratefully, watching him as she walked by his side a good deal as a setter might look up to catch a glance of approval from a man. Peter expected no storm from her. He knew he must pack up his things and go back to London. This was only fair to Benham, and certainly fair to Benham's sister, who had let herself imagine so much from an acquaintance with a stray American who inwardly believed that to live a lifetime of Muriel's program of days and years would be a close second to a term in jail or to having a berth in a Wall Street broker's office. He supposed, however, that if not actually, at least metaphorically, Muriel had read a book on "How to Keep One's Balance." He did not figure upon the explosive forces which can be generated in a conservative family, as if occasionally the fundamentals of mankind liked to show their half-concealed existence of which all are aware, each for himself, but never as to our armored neighbor. Muriel, in fact, was just the person the fundamental human forces would pick out to give a glorious exhibition of blowing up the crusts of restraint. Peter, like most of us, had heard a slight crack in her cover, but like most of us he had endless faith in the strength of habit and conventions.

The depression which fell upon the girl, as if a shadow cast by the dusk, gathering about them as they came back from Saint Dunstan's tower after ten miles in the wind, gave no warning of crisis to him. And certainly he was under no obligation to foresee that which the night would bring forth.

At dinner he discovered that he could talk to Mrs. Benham; to his astonishment he found that behind her beam there were a great many years of orderly thinking whose product, not consumed by her family, had been put up onto the shelf in many careful layers like bolts of cloth with an unfashionable pattern. It was almost worth while to have Muriel so silent; it was almost a relief to turn away from her long Byrne-Jones face with its sensitive lips contrasting with her stern eyes and be beamed upon sunnily by the broad strong face of her mother. Peter took a delight in making this beam expand into a laugh. He was never so whimsical. Each time he leaned forward toward the white-haired widow who, with her middle-Victorian

"Do You Want to Take a Walk This Afternoon—to Besman Wood?"

figure, weighed at least two hundred pounds, Muriel stared at her mother with a look which might have been the expression of jealousy.

Peter, as he chatted with Mrs. Benham, faced the long French windows in a curved bay at the end of the dining room. The floor was covered with ferns and flowery plants in pots, giving forth to the room at all meals that smell of warm dark earth which fills greenhouses; but just outside the reflection of his own dinner coat on the long panes of the doors, there was the blue stone driveway of the house and the path to the side door. Upon this path Peter thought he had seen a flash of white. It might have been a reflection of his own white linen; he had only seen this flick of movement out of the corner of his eye as he put down his gilt coffee cup.

"What did you see?" asked Muriel suddenly.

"I? Why, I thought I saw a white spot in the dark out there—like a person's face."

Muriel stiffened. "I don't know who it could be," she said. "Lucy, turn on the light outside the North door."

Peter smiled, but only because he had thought of how red English maids could be—just as red as valets were white.

The smile disappeared the moment the electric lamp above the outer door just behind the French windows threw down its light like an overturned bucket of yellow liquid. A woman was standing there, and Peter believed that as she had stood in the dark, unseen, she had been looking straight into his face.

She wore no hat and her hair piled up in immense snake-like coils was the color of certain frost-turned leaves of autumn which are neither red nor gold, but both colors at once.

"Her Irish mother!" he almost said aloud. He knew by her hair and her great dark eyes in which, even from a distance, there appeared the expectancy or fear described by young Benham. The British officer had not overdrawn her beauty. There was a still grandeur about it, a permanence, a thing making it awful as well as alluring; it was like the beauty of Grecian sculpture dug from the dust and transformed by miracle into living warmth glowing through a skin which, compared to Muriel's fine cold white, was as heavy cream is to skimmed milk. She stood in the posture which Peter learned later to know was characteristic—a posture of one who waits with resignation. For what? Heaven knows. Perhaps for a reincarnation into a life less troubled, less besmirched with small affairs.

That she wore a white draped gown over which a wrap of flame color hung from her half-bare shoulders DeWolfe did not notice. She was one who cannot be described in detail, and her clothes made no impress, though their illuminated colors and contrast in any other case might have left a vivid picture. One never saw her except as a whole—a woman too short of stature, if one measured, but the height of a goddess if one only looked; a girl whose face, though capable of a great range of expression, nevertheless changed its moods as slowly as the clouds in the sky change their contours; a human being whose personal-

ity belonged, it appeared, to the kind of personalities which are found usually only in a deep forest, or belong to a pinnacled mountain range. Any detail was nothing.

"She has come to see my mother," said Muriel.

"So she has!" admitted Mrs. Benham, beaming out through the window. "I might have known who it was. I heard a high-powered car. But she doesn't like to be driven almost into our dining room, so she stopped on the South wing. Let's go into father's den, Peter. Bring the cigars in there, Lucy."

No protest appeared possible. Mrs. Benham had beamed and nodded, and the American could not very graciously say, "Oh, no. I want to stay."

He turned once as he left the dining room. The woman outside was still waiting at the door for Mrs. Benham to waddle to the latch, the waterfall of light still covering her, still looking in, apparently at Peter, and with a smile and warmth thrown toward him like a message from her great dark eyes.

He could not wipe away the impression of that look. In it there had been a call, an understanding, a password, a magic formula. To shake it off he walked nervously about Sir Austin's old study, stopping before the photographs of members of the house of commons who had been Benham's friends, but were like the ends of so many empty spoons to Peter's eyes at this moment. He read an inscription on a portrait of General Wolseley, he touched an ivory idol from Benares.

"Let's light the fire," suggested Muriel in a weak and trembling voice.

"All right," said Peter, and struck a match.

He did not smoke.

"Why not?" asked the girl.

"I have a headache," he said with a laugh.

"Come here, then. Lie down on father's sofa. I don't mind. Be comfortable, Peter."

He stretched out upon the springs bent and sagged by years of pressure of the fox-hunting banker's solid weight, and closed his eyes.

Muriel, who had drawn up a stool, sat down upon it, staring into the firelight. There in the study behind the heavy door, which she had closed, the two seemed suddenly very remote.

"I had a wonderful time—this afternoon," she said in a tense and trembling voice which made a struggle to appear normal.

"Good!" said DeWolfe.

Her hand moved timidly forth and her soft fingers touched his forehead, brushing back the hair.

Peter closed his eyes.

She leaned over quietly and with a little cry hardly audible pressed her lips to his.

He knew what had happened—the real Muriel had come up through layer on layer of tradition, training, pride, habit, restraint. He only was confused by his own stupidity in allowing this to happen.

He sprang up.

"I never did that before. I never—by any one," she said, clenching her hands.

"Oh, I say, I'm sorry—" he began.

"Sorry!" she said.

"Of course," he replied with unnecessary coldness. "Of course I'm sorry. I've allowed you to think—"

Muriel's eyes were wide and blazing. She threw her clenched hands apart until her arms were outstretched to their utmost. The firelight was upon her face and Peter could see elementary passions enough upon it.

"You needn't say more," she almost screamed, so that suddenly Peter had a great distaste for the exposure of things he did not know had lived in her. "You needn't say more, because I know."

"Know?" said Peter in a low tone, as if inviting her to speak more quietly.

"Yes—know. It's her!" she said, pointing toward the wall where the deer's heads were hung. "I know it's my brother Eversby. He told you about her. That's why you came. That's what you've been thinking about. My brother was a fool!"

Peter raised his hand.

"I kissed you and I'm glad," she went on furiously. "Yes, I am. I'm glad. It has brought out the truth. I never did it before. I'm glad. The truth."

"Yes," said Peter sternly. "It has brought out the truth."

"You came here to see her. I know. I guessed. I know Eversby told you about her, but you never said. And I knew why. I didn't want to know. I wanted—"

"I'm sorry," Peter said again.

The girl came on several paces and leaned forward toward him.

"For God's sake, Peter, keep away from her. She might like you. Of course she'd like you. And if she liked you—"

"What do you mean?" he said.

"I know. I can't tell. It's a matter of honor, a matter of confidence—her confidence—something I learned. I wish I didn't know. But I want you."

She moved toward the door.

"Wait a moment," he said.

"No. I want to go. I hate you now, Peter. Yes, I do. It has been awful, though. I never want to see you again. If you will only go while I hate you!"

"Of course," he said.

"But she is—"

Muriel stopped aghast.

"Well?" he asked.

"I can't tell you. But I warn you. It is too awful to believe. If she takes you in, you will—This is all I can tell."

"What?"

"Vanish," she whispered, "—like the others."

The door closed after her.

"Too late to go to London tonight," he said, looking at his watch. He listened for a moment. There was rain upon the window panes. "Vanish? Vanish—like the others? Oh, it's absurd. A piece of jealous outburst. Vanish? Nonsense!"

CHAPTER III

The name of Peter DeWolfe, U. S. A., was upon the register of the Carlton hotel, written in a hand purposely scrawled and blotched to prevent any one in the flux of diplomats, army officers, correspondents and gentlemen adventurers, the classes from which this rich New York bachelor drew a large and almost affectionate acquaintance, from following through his door to come down to the bar.

He was waiting for a steamer that had made up her mind frequently not to leave Liverpool for another five days. Two nights he had spent already in London where, if he had wished, he might have dined at at least one of half a dozen recognized homes, had luncheons with a Russian ex-ambassador or Tommy Camlinthorn of the war office, or Boleby Broke, the critic who writes the reviews for the International Gazette, or taken breakfast with Mrs. Holdere Rabb, the widow of a certain maharajah's son who had gone wrong at Oxford. He had an inclination, however, to write verses and wander by himself through the naughty jam of soldiers and yellow-haired girls in Leicester square and the Circus. He ate his meals in lonely state.

Unfortunately the unpleasant flavor which had attached itself to the memory of his visit to Beaconshire Heath still clung. He could see Lady Benham—that good old soul who had insisted that she never be addressed by her title—beaming at him as she told him how sorry she was that business had called him away so suddenly. He felt guilty of the polite lie he had told to make his exit from the lives of the Benhams. He could see Muriel's cold, hard expression when, having pressed her lips to his, she found no response and told him at once that she hated him. He would never see her again, and though it had been none of his fault, or at least not in large measure, there would be a certain impression in her mind that he had willfully dislodged her from her correct and virtuous pedestal, and Colonel Eversby Benham—a good friend, provided with a sense of humor—could not fail to see the affair through his beloved sister's unimaginative eyes. Peter had tried to reach him and found that on forty-eight hours' notice he had gone to Mesopotamia.

Above all, Peter had gone to England to do a certain thing—to meet the strange Brena Selcoss and at Benham's challenge dissolve the mystery which surrounded her. All that he had accomplished so far had been to look once into her wonderful eyes from a distance and hear from Muriel that

"I must see you."

Brena Selcoss had come to find him. She had taken the initiative; she had come to London. He did not have to say, "Who is this?" She had come.

Something, however, in that phrase, "I must see you," said with intensity by that extraordinary woman, about whom the Benhams knew so little and perhaps Muriel so much, filled Peter for the moment with an inexplicable dread. This sudden chill of self-preservation was not founded upon the repulsion of that telephonic, "I must see you," uttered by a female and always forerunner of the unpleasant, nor was it based upon the suspicion which he had always had when, to use one of his own phrases, "a man ought to know that no woman who comes toward one is safe," nor indeed did it rise from the fact that he gave new credit to Muriel's absurd warning that men who knew Brena Selcoss disappeared like broken soap bubbles. The dread that Peter felt was like a dread communicated by some subtle message in a human voice which expressed some eternal fear. It came, perched upon his soul for a second, and then was gone.

He became at once the usual Peter, thinking quickly, alive to the dangers of a woman who would follow a stranger to London, suspicious of her and above all thoroughly delighted to risk himself in any tangle she cared to weave for him.

"Where are you?" he said genially.

"At Mulberry's," she said.

"The tea room?"

"Yes."

"Will you wait for me there?" asked Peter. "Please." His voice sounded very young—compounded of the breathless expectancy and spontaneous pleading of little boys.

(TO BE CONTINUED.)

What Your Eyes Tell

We are told that the eyes of the intellectual man are gray, and it is a fact that most men of genius have gray eyes. Brown eyes are said to express temperament rather than intellect.

Although brown eyes flash with anger, light up with joy, and change swiftly with jealousy, blue and gray eyes can express greater sadness.

Green and black eyes are supposed to be the most wicked. Becky Sharp's green eyes played an important part in her various conquests.

The "vamp" in modern fiction usually possesses flashing eyes of either green or black. Actually, there are no black eyes; dark brown or dark gray eyes have the appearance of being black in certain lights.

Ancient Juniper Tree

What is believed to be the oldest juniper tree in the world is now being protected by the forest service, United States Department of Agriculture, according to word received from the Cache National forest in northern Utah. A careful examination of the tree by scientists from the Utah Agricultural college and by Forest Supervisor Carl B. Aronson shows the age of the tree to be not less than 3,000 years, thus placing this tree on a par with some of the big redwood trees in California which have so often been spoken of as the "oldest living things on earth."

Peter had always said that many men were really two persons—one, the actor in life, clothed with a body of flesh and bone; the other, a second personality without tangible reality, but who, as a counselor possessed of a voice almost audible, often advised caution, sometimes played the role of conscience, was always a friend, but sometimes took on a damnable, patronizing manner. It was this invisible friend who had advised Peter to shut himself up with his attempts at verse writing and had led him to procure a passage home; it was Peter himself who

"I Kissed You and I'm Glad," She Went On Furiously.

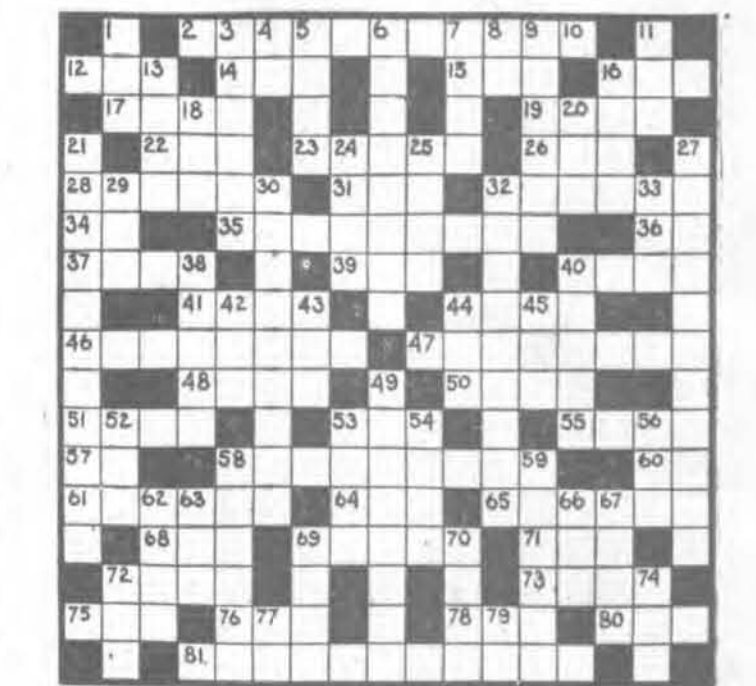

"I Kissed You and I'm Glad," She Went On Furiously.

terrible and unspeakable and undisclosed horrors awaited the man upon whom this extraordinary young woman, with her mixture of Grecian and Irish blood, her gorgeous hair and jersey-cream skin, her American origin and her inexplicable English isolation, bestowed her favor.

Peter had always said that many men were really two persons—one, the actor in life, clothed with a body of flesh and bone; the other, a second personality without tangible reality, but who, as a counselor possessed of a voice almost audible, often advised caution, sometimes played the role of conscience, was always a friend, but sometimes took on a damnable, patronizing manner. It was this invisible friend who had advised Peter to shut himself up with his attempts at verse writing and had led him to procure a passage home; it was Peter himself who

Solution of Last Week's Puzzle.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "Horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "Vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

NURSERY RHYME PUZZLE

LITTLE Miss Donnet wears a huge bonnet.

With dozens and dozens of pink roses on it;

Her dress is spread wide by the hoop-skirt inside,

And she looks in her mirror with evident pride.

Find three other persons who are dressed up—Right side down, on parasol frill; lower right corner down, on frill of petticoat; upper side down, along left arm.

"Old Rough and Ready"

Neglected Grave of Gen. Zachary Taylor Is to be Restored

By JOHN DICKINSON SHERMAN

THE United States is about to take over the care of the burial ground of Gen. Zachary Taylor, twelfth President. He died in the White House July 9, 1850, after giving his country more than forty years of service. If it be admitted that it is the duty of the nation to see that the burial places of its Presidents are cared for, congress has long neglected this duty in the case of "Old Rough and Ready."

Upon the death of President Taylor his remains were interred in the congressional burial ground (Christ Church cemetery), Washington. In accordance with his wish, they were transferred to the old Taylor homestead near Louisville, Ky. The State of Kentucky erected, years ago, a handsome memorial near the burial vault. But no provision has ever been made for the adequate and permanent care of the grounds. Long ago the homestead passed from the hands of the Taylor family. The State of Kentucky now holds title, with some private interest, in five acres about the burial vault.

The grounds lie near the Brownboro road, an important thoroughfare of Jefferson county. A half-mile road leads to them; it has been recently improved by the county. The Louisville Outdoor league purposes to plant this roadway and make it a "Zachary Taylor Memorial lane."

The last congress passed a resolution appropriating \$10,000 for the care, maintenance and improvement of the burial grounds and directing the secretary of war to establish thereon a national cemetery. The precedent for the latter is the Andrew Johnson National cemetery of fifteen acres, established by congress in 1900. So we shall have the Zachary Taylor National cemetery, maintained by the United States government.

Zachary Taylor deserved well of his country. He was born in Orange county, Va. His father was Col. Richard Taylor, an officer in the Revolution. He was a descendant of Elder William Brewster of Mayflower and Plymouth fame. The Taylors moved to Kentucky in 1785. In 1808 at the age of twenty-four Zachary was commissioned a first lieutenant in the Seventh infantry, he defended Fort Harrison (near Terre Haute, Ind.) against Indians and was breveted major. In 1815, when the army was reduced to 10,000 men, he resigned.

Major Taylor was, however, induced to return to the army as lieutenant colonel in command of Fort Snelling. The Black Hawk Indian war of 1832 found him in command of Fort Crawford at Prairie du Chien, Wis. Incidentally, it was to Colonel Taylor that Black Hawk surrendered after the second campaign.

The Black Hawk war was only a so-called war, but it has an interest all its own in that it brought together historic personages. Gen. Winfield Scott took command. At Fort Crawford with Colonel Taylor was Lieut. Jefferson Davis. And in Col. Samuel

PLAZA, CITY OF MEXICO

Thompson's regiment of Illinois volunteers was Capt. Abraham Lincoln. Jefferson Davis (1808-89) was a West Point graduate of 1828. After the close of the Black Hawk hostilities he eloped from Fort Crawford with Sarah, the oldest daughter of Colonel Taylor. A little later he, as an engineer, made a survey of the Chicago and Calumet rivers, the federal government having decided to establish a harbor on the west shore for the fast-growing schooner traffic of Lake Michigan. Davis recommended Calumet, his chief reason being that Lake Calumet could be made a land-locked harbor for the maintenance of a fleet to be used against Canada. No, you will not find this in the histories. And the trick by which Chicago finally won over Calumet is still another story.

Davis left the army in 1835 to become a cotton planter in Mississippi. In 1845 he was elected to congress, but resigned to get into the Mexican war as colonel of a Mississippi regiment. He fought under General Taylor at Monterey at Buena Vista; in the latter battle he displayed great gallantry and was wounded. From 1847 to 1851 Davis was in the senate. Then he served as secretary of war under President Pierce. The year 1857 found him back in the senate and in 1861 he resigned to go with the South and to become president of the Confederacy.

Abraham Lincoln was twenty-three when the Black Hawk war broke out. He responded to the call for volunteers by the governor of Illinois. The "boys" insisted upon electing him captain and away he marched. You have, of course, read of his amusing experiences. But did you know that once he was under arrest for firing off his pistol, contrary to regulations? And did you know that he had to wear a wooden sword for two days, while under arrest because some of his men stole whisky and got drunk. And did you know that he saved the life of an old Indian, who surrendered, from a crowd of bloodthirsty soldiers? And did you know that he demanded the same food for his men that the regulars got and bluffed the army officers into giving it?

And here's another thing that you will not find in all the histories. After Captain Lincoln's company had been disbanded at Ottawa, Ill., Lincoln enlisted as a private in the "Independent Spy company." Just what services he rendered as a spy is unknown to this writer. He was, however, discharged at White Water, Wis. A thief stole his horse. He had to make an inglorious return to New Salem by foot, by canoe and by timber raft.

Colonel Taylor, after the Black Hawk war, took command of our

forces in Florida, where the Seminole war was on. He wound up that war by defeating the Indians at the Battle of Okechochee. In 1840 he was put in command of the southern division of the army and moved his home to Baton Rouge, La.

In 1846, upon the breaking out of the Mexican war, Brigadier General Taylor was ordered to the Rio Grande. On two successive days, he fought and won the battles of Palo Alto and Resaca de la Palma and cleared the lower valley of the Rio Grande. Next he marched to Nueve Leon and fought a series of battles, ending, in the same year, with the capture of Monterey. Notwithstanding the fact that, under orders from his government, he had sent his best troops to reinforce General Scott, who was invading Mexico by the way of Vera Cruz, he pursued Santa Anna and, with a much inferior force, defeated that Mexican commander at the Battle of Buena Vista May 23, 1847. This important victory was followed by the Mexican campaign of General Scott which ended with the capture of the City of Mexico September 14, 1847, which virtually ended the war. Peace between the two countries was declared February 2, 1848. This war confirmed the annexation of Texas and also brought into the United States California and Nevada, most of Arizona, New Mexico and Utah and a part of Colorado.

General Taylor's way of "trentin' 'em rough" and his readiness to fight the Mexicans under any and all conditions earned him the title of "Old Rough and Ready." His brilliant victories made him a popular hero. There was an insistent demand for him for the Presidency. Taylor himself was not enthusiastic. He said: "If the people want me to be President, I shall serve, but I shall do nothing to get the office." He was elected by the Whites over the Democrat, Lewis Cass of Michigan.

Taylor married Margaret Smith in 1810, when he was a young captain. She was ever his companion and helper wherever he was stationed. When he was elected President she said it was "in plot to deprive her of her husband's society and to shorten his life by unnecessary care." She had no social aspirations. She refused to take any part in the social life of the White House and turned the duties of hostess over to her youngest daughter, the wife of Maj. W. W. S. Bliss. "Miss Betty" was the youngest hostess the White House ever saw. As for Mrs. Taylor, she put gas in the White House and kept everything spick and span. She reserved for herself a few rooms out of the way, where she could knit and smoke her corn-cob pipe in peace and think up things for the comfort of her husband.

AFTER THE PARTY

Mrs. Cucumber Green, whose real name was Margaret, but whose pretend name was M. F. S. Cucumber Green, as probably you all know, had had a party.

In the Little Express Cart.

Allie Ban, her favorite rag doll, had helped with the party. It had been a huge success.

The other children had come and had brought their dolls. Every one had had such a good time.

The dolls had behaved so well. Every mother had been so proud of her children as they had every right to be.

After the party was over and Mrs. Cucumber Green's children had been covered up with the blanket in the little express cart, Allie cuddled up in her mother's arms in the bed by Number Four Green Lane.

Back of the bed, or rather at the side of the bed toward the wall, was a quite wide space.

This was called, by Mrs. Cucumber Green, Number Four Green Lane.

This was the make-believe street in which she lived. When she walked along this space, up to the end where the back wall was, she pretended she was at the market.

Then she would talk to make-believe shopkeepers and buy all sorts of make-believe things for housekeeping.

The wall paper was a very gay one and there were figures on the wall paper she pretended were people who were her neighbors.

The street was called after the Green family who had always lived there. All the make-believe Greens Mrs. Cucumber Green said had always lived in the same place.

Here Mrs. Cucumber Green kept her toys. Number Four Green Lane was a very busy section, I can tell you.

Now that the party was all over which had been such a success and which would be something they could talk about with pride and joy and happy remembrances for some time.

Of course Mrs. Cucumber Green would give other parties, as she had always given a good many parties and was fond of entertaining.

Allie was fond of entertaining, too. She enjoyed speaking to all the guests. Mrs. Cucumber Green changed her voice to speak for Allie. That made it easy.

In a squeaky little voice Mrs. Cucumber Green would say: "Yes, I'm Allie. Of course I remember you. And you remember me, too?"

"Yes, they all say I've grown, though I can't see it myself."

"Do take your hat and coat off, won't you? You won't feel the good of them when you go out if you don't."

"Ah, yes, that's better. Now you'll be more comfortable and you won't catch cold when you go out."

Allie was a good talker as you can see.

But now they were in bed, and soon they would be asleep.

How Allie did cuddle up in her mother's arms. Her mother held her very close.

"Oh, my darling, darling, darling Allie Ban," she said. "You looked so sweet today with all your clean clothes. How nice it was to have all clean clothes, even your stockings and worsted slippers were clean for the occasion."

You looked so wonderfully, wonderfully, my darling Allie Ban."

Allie Ban snuggled even a little closer. It was so nice to hear her mother's sweet words of praise.

"Oh, my little dear," Allie said. "In her dear little squeaky voice, 'what a lovely day we had.'"

And Mrs. Cucumber Green answered: "I'm so glad, my darling, and we shall have more lovely days."

Then Mrs. Cucumber Green's eyes slowly closed and for a little while Allie was all awake.

She turned ever so slightly in her mother's arms—not enough so as to disturb her—just a very little bit.

Then she looked at her mother whose eyes were closed, sleeping so beautifully.

"What a lucky rag doll I am," she said to herself, "to have such a good, good mother."

Wasn't That Much "Swelled"

Marion was at the dinner table. Her mother had just told her not to use her fingers.

"I know, mamma, the swell people don't eat that way, but I didn't think I was old enough to be that much swelled yet."

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says: "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments, corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcel Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and inclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.

The Order of the Bath

William M. Jardine, secretary of agriculture, said at a Washington reception:

"A secretary of agriculture isn't much good if he doesn't understand his job. Some secretaries remind me of the boy in the history class."

"Describe the Order of the Bath," the history teacher said.

"And the boy gulped and answered:

"It's very ancient, and goes back to the times when they didn't take no baths except by order."

Cuticura for Pimply Faces.

To remove pimples and blackheads smear them with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. Once clear keep your skin clear by using them for daily toilet purposes. Don't fail to include Cuticura Talcum. Advertisement.

English Second Sections

When passenger travel is heavy on English railways and it becomes necessary to run trains in two sections, the first train carries at its rear a sign bearing the letters "A. P. E." meaning "Another portion follows."

Just for That

Visitor—"My poor fellow, what are you in here for?" Innate—"Me good lady, I'm in here for life."

Artificial "Sun" Makes Hay

In England, where damp and foggy weather, common during certain seasons, makes a good hay crop rare, a new device has been patented which dries hay by means of artificial heat. The hay is stacked while it is green and then is dried in 25-ton stacks. This invention is expected to save many acres of crops that are lost every year because of rainy weather at the critical period.—Popular Science Monthly.

Films in Education

Use of a picture-story method of teaching reading has been tried with 10,000 children in Detroit schools. It is hoped that by this purposeful self-teaching children will make as much progress in five months as is ordinarily made in a year.

Correspondence Given Personal Attention

Her Neighbor's Advice Helped Mrs. Frick

"YOU can be just as healthy, strong and happy as I am," said one woman to her neighbor after listening to the description of her ailments,—"if you will take Lydia E. Pinkham's Vegetable Compound. My condition was very similar to yours, I suffered from those awful bearing down pains, weakness, backache, nervousness and headaches until I could hardly drag around. Today I am strong, well and happy because I followed the advice of a friend who had been greatly benefited by this old-fashioned root and herb medicine."

Nearly fifty years ago Lydia E. Pinkham of Lynn, Mass. prepared from medicinal roots and herbs Lydia E. Pinkham's Vegetable Compound. Its fame has spread from shore to shore. You will now find in every community or neighborhood some woman who has been restored to health by its use, or has some friend who has. Therefore ask your neighbor.

Thousands of unsolicited testimonials such as the following are on file at the Pinkham Laboratory at Lynn, Mass., and prove the merit of this medicine. Therefore no woman should continue to suffer from such ailments.

Mrs. Frick Tells of Her Experience

PERRYBURG, OHIO—"I took Lydia E. Pinkham's Vegetable Compound because I suffered with pains in my sides all the time. I can't remember just how long I suffered but it was for some time. One day I was talking with a neighbor and I told her how I was feeling and she said she had been just like I was with pains and nervous troubles and she took the Vegetable Compound and it helped her. So then I went and got some and I certainly recommend it for it is good. Whenever I see a woman who is sick I try to get her to take Lydia E. Pinkham's Vegetable Compound."—Mrs. ADA FRICK, R. No. 3, Perryburg, Ohio.

Such letters Should induce others to try

Epigram Explained

During a discussion of Oscar Wilde's interesting posthumous work, "De Profundis," an editor said: "I had the honor of meeting Wilde in London on the opening night of his amusing comedy, 'The Importance of Being Earnest.' A little group of us got supper at the Carlton, and during the supper the subject of epigrams came up. To Wilde, as the foremost living epigrammatist, the duty of defining an epigram

was assigned. He thought a moment, smiled slightly, and then, in his low and pleasant voice, he said: 'An epigram is a commonplace couched so adroitly that only clever people can tell what it means.'

Hearing With the Hands?

To teach the totally deaf to hear through the palms of their hands is the purpose of an instrument invented by Dr. Robert Gault.

The instrument resembles a tele-

phone receiver and operates on a similar principle to the telephone, except that, instead of carrying sound vibrations to the ear, it causes them to reach the hand or some other sensitive part of the body.

It is necessary for the person using the apparatus to recognize what speech sounds caused the particular vibration he detects through his sense of touch. With the aid of the instrument Doctor Gault has succeeded in teaching five deaf persons to identify 15 sentences containing 91-syllable words.

ELIGIBLES URGED TO SIGN UP FOR DEFENSE TEST DAY

Phoenix, June 18.—That the signing up of men of military age for Defense Test Day be undertaken immediately in every community in Arizona is the recommendation of the Arizona State Defense Test committee sent to all local chairmen this week. The women of each community are urged to assist in securing the enrollment of all men between the ages of 18 and 45 for the second National Defense Test to be held July 4th.

As on the occasion of the first Defense Test, held September 12, 1924, enrollment for defense incurs no special obligation for military service. Under the National Defense Act of 1920 all men of military age made a part of the force for national defense are designing the muster roll for the National Defense Test is merely an indication of the patriotism of the signer.

The greatest patriotic demonstration that has marked the nation's birthday in years will take place on the Fourth of July as a result of the president's designation of that date for holding the second National Defense test. It is expected. Already state and local committees are at work to make observance of the day in Arizona even more successful than the first test.

The mayor of each city and town in Arizona has been appointed chairman of the local committee in charge of the Defense Test plans for his community by Governor Hunt, who has issued a proclamation urging every citizen of the state to cooperate with the military authorities in carrying out the Defense Test program.

"The militia of the United States formerly mustered on Independence Day under our old system and it is fitting that a test should be made of this new muster day under a national system for national defense in which every citizen shall bear his part," says the governor's proclamation.

The Defense Test program will be similar to that carried out last September. It will seek to acquaint the people of each community with their responsibilities in the event of a national emergency, the number of men each community would be expected to furnish, and the plans for a mobilization. In addition, observance of the Defense Test on the Fourth of July will serve to emphasize the historical significance of the occasion when congress first pledged the manpower and resources of the country for national defense.

Capt. J. L. B. Alexander of Phoenix has been appointed chairman of the citizens' state committee, to cooperate with the military authorities in carrying out the test. Other members of the committee are E. S. Stallcup, state commander of the American Legion, and Charles H. Rutherford.

Catarrhal Deafness

Is often caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing. Unless the inflammation can be reduced, your hearing may be destroyed forever.

HALL'S CATARRH MEDICINE will do what we claim for it—rid your system of Catarrh or Deafness caused by Catarrh.

Sold by all druggists for over 40 Years.

OFFICIAL PROCEEDINGS

OF THE

SANTA CRUZ COUNTY BOARD OF SUPERVISORS

OFFICE OF THE BOARD OF SUPERVISORS,
 Nogales, Arizona, May 4, 1925.

The board met pursuant to adjournment of April 6th. Present: James L. Finley, chairman; Robert A. Campbell, Hugo W. Miller, members, and A. Dumbauld, clerk.

Minutes of the last meeting were read and approved as read. Monthly reports of county and precinct officials, as follows, were read and ordered filed: Sheriff, County Recorder, County Assessor, Superintendent of Outdoor Indigent Relief, County Superintendent of Health, Clerk of Court, County Treasurer, and Justice of the Peace of Precinct No. 1. The report of the Superintendent of Outdoor Indigent Relief asked for relief for the following persons and the amounts for each.

Mrs. Ramon Mendivil, Patagonia	\$15.00
Mrs. Carmen Sinohul, Patagonia	10.00
Vicente Lopez, Harshaw	12.00
Mrs. Ramon Montijo, Alto	12.00
Francisco de la Reyes, Tubac	10.00
Stephen Alexander, Canille	40.00
John Ates, Ruby	40.00
Mrs. Clara Baker, Nogales	10.00
Isaac King, Nogales	30.00
Dan Johnson, Nogales	50.00
Antonio Castaneda, Nogales	35.00
Henri Mojon, Nogales	30.00
Mrs. Ellen Brown, Nogales	10.00
Total	\$289.00

Motion of Miller, seconded by Campbell and carried, that the motor police of the county be insured in the sum of \$5,000.00 and that the premium on this insurance be paid quarterly.

Mr. Wingo appeared before the board stating that the forest department was ready to put men to work on the Ruby road. This met with the approval of the board.

A. S. Henderson appeared before the board with reference to taxes and number of cattle that had been assessed to him. After quite a little discussion, no action was taken.

The road petition of Antonio Grijalva was presented as was also a counter petition protesting against the road as petitioned by Grijalva.

Attorney S. F. Noon appeared before the board, representing the protestants. After discussion of the case the clerk was instructed to notify Antonio Grijalva that it would be necessary for him to furnish a bond to the county as provided by paragraph 5057, section F, for the cost of viewers and engineer in viewing out the road in case the petition was dissolved.

The time for appointing viewers on this road was extended until June 1st, giving time for the filing of above mentioned bond.

An affidavit of indigency was filed by Mrs. Ramon Mendivil of Patagonia.

A communication was received from M. H. S. McCluskey, budget secretary of the state, with reference to the counties 75 per cent fund for road maintenance, asking for cooperation of the board. It was the opinion that this cooperation does now exist and that there had been no lack of cooperation either on the part of the highway department nor the board of supervisors. And, further, it was the desire of the board to continue along the lines and plan as now in effect. The clerk was instructed to inform the secretary accordingly.

James V. Robins, county attorney, asked for a leave of absence from the state for approximately two weeks, due to illness in his family. The same was granted.

A communication from the Sisters of Mercy with reference to the care of Mrs. Madden was read and filed, no action being taken.

A notice of the re-appointment of Miss E. Ruth French was filed by Robert E. Lee, stating that her appointment as a deputy clerk of the court would date from May 1, 1925.

The Beebe and Farrenkopf road matter was to have been taken up but as no report from the railroad company nor the corporation commission was on file the time was extended until June 1, 1925.

The following claims and demands were presented, audited and allowed by the board and ordered paid out of the various county funds:

Harry Sten	Road Work	\$ 46.00
B. W. Curtis	Road Work	50.00
Francisco Pons	Road Work	54.00

Mrs. George W. Parker	Matron	5.00
Howard Keener	J. P. Precinct No. 2	25.00
James G. Kane	Constable Precinct No. 2	5.00

Upon motion duly made and carried the county treasurer was authorized and instructed to transfer the sum of \$3,787.46 from the county general fund to the county salary fund and a further sum of \$1,600.00 from the county general fund to the county expense fund.

There being no further business to come before the board they adjourned to meet June 1, 1925.

Attest: A. DUMBAULD, Clerk.

JAS. L. FINLEY,
 Chairman.

Never Wears 'Em

A seedy-looking tramp called at the back door of an isolated house belonging to an elderly spinster. After he had been given some food he said: "Will you be so kind, lady, as to ask your husband if he's got such a thing as an old pair of trousers he could give me?"

The spinster not wishing to let him know that she was alone in the house said: "I am sorry, my good man, but he—er—never wears such things."

Phoenix—New waterless soap being produced by company here.

Yuma—New Southern Pacific bridge over Colorado river now in use. St. Johns—Arizona Lumber Company makes over \$100,000 improvements; capacity of plant doubled.

A Timely Question

The teacher was describing the dolphin and its habits.

"And, children," she said impressively, "a single dolphin will have two thousand offspring."

"Goodness!" gasped a little girl in the back row. "And how about the married ones?"

Accommodating the Bear

An old Chinaman delivering laundry in a mining camp, heard a noise and espied a huge brown bear sniffing his tracks in the newly fallen snow.

"Huh!" he gasped. "You have my tracks, I make some more."

Teacher—Yes, I started life as a barefoot boy.

Johnnie—Well, I wasn't born with shoes on, either.
