NO. 41

## PERSONAL AND SOCIAL

The Patagonia Fire Department will give a masquerade ball Halloween for the purpose of adding to the funds of the organization. The 31st comes on Saturday this year, which assures a large attendance. Boost the dance and swell the treasury.

One week from tomorrow night, September 26, there will be a dance at the Calabasas schoolhouse. Good music has been engaged. Everybody is cordially invited to attend.

Gov. G. W. P. Hunt passed through Patagonia Tuesday on his way to Phoenix.

Pat McCarty of Canille was a Patagonia visitor Tuesday.

Bill and Charley DuMont of Tucson were Patagonia visitors Saturday.

William Adams, immigration inspector, has been assigned to duty at Ajo, where he has moved his family.

Mr. and Mrs. Elbert Kinsley of the San Rafael Valley were Nogales visitors Tuesday.

G. L. Stevens and Felix Hughes are in Tucson this week attending Federal Court.

Immigration Inspector C. J. Trask and wife motored to Nogales Thursday.

Mary Ellen Trask, daughter of Mr. and Mrs. C. J. Trask, has been absent from school this week on account of illness.

Ira Rothrock and Mark Boosinger were Patagonia visitors Monday from Elgin.

Mrs. Honnas of Sonoma was shopping Thursday in Patagonia.

Herman Bader of Harsha was a Patagonia visitor Wednesday.

Sunday a number of Patagonians went to Calabasas on an "onion" picnic. The party included Mr. and Mrs. E. H. Evans and family, Mr. and Mrs. C. A. Pierce and son Jack, Mr. and Mrs. E. E. Bethell, Mr. and Mrs. C. L. Northcraft, Miss Sophia Sjoberg, Mrs. Margaret Carter, and Mrs. Dixie Yost.

E. D. Farley was in town over the week-end from his mining claims in Soldier Basin.

George H. Elliott, manager of the Dixie Queen mine, was a Nogales business visitor Monday.

G. N. Wright of Salero was in town Monday.

John Mitchell, formerly with the local ice plant, is assisting P. M. Eachell on the road to the Mansfield.

W. P. Mahoney, sheriff of Mohave county, and James Curtin, cattleman, were Patagonia visitors Thursday.

Mr. and Mrs. Dan McKinney of Elgin were visiting San Rafael Valley friends Monday.

Bud McCormick returned Wednesday from Nogales, where he had been spending a few days.

The dance last Saturday night at the Patagonia Opera House was well attended. Many Nogales people were present.

H. J. Bishop, ore buyer for the Copper Queen, was in town Wednesday on business.

James M. Little and Joe Collie were Nogales visitors Tuesday on business.

Immigration Inspector August Steinborn has taken up his residence in the Cady house.

J. J. Farley, J. W. Stack, James M. Little, and Joe Collie visited the mining property of E. D. Farley in Soldier Basin this week.

County School Superintendent Mrs. Grace A. Farrell visited the rural schools this week, in the eastern part of the county.

Mrs. Fortune and daughter Margie were Nogales visitors Thursday.

One carload of ore was shipped this week to the El Paso smelter.

Carl Scheler of Harshaw was a Patagonia visitor Saturday.

Mrs. Fred Kollberg of Nogales and Mrs. Wilkey of El Paso were Patagonia visitors Friday.

Mr. and Mrs. Robert Thompson of Canille were Nogales visitors Saturday.

Supervisor James L. Finley of Canille was a county seat visitor Saturday.

Mrs. Nick Bersich of Parker Canyon returned last week from Ontario, Calif., where she attended the wedding of her sister, Miss Bessie McCormick, to George Bersich of Parker Canyon.

Miss Ruth McCormick and Miss Helen Elliott of Nogales attended the dance Saturday night at the San Rafael Valley schoolhouse.

E. F. Bohlinger, Miss Lucy Valenzuela, Doris Seibold and Laura Valenzuela were Nogales visitors Saturday.

Mike Hogan of Harsha was a county seat visitor Saturday.

Mr. and Mrs. Dan McKinney of Elgin and Miss McKinney, the former's sister, of Los Angeles were Nogales visitors Saturday.

Bob Bergier of Alto was a county seat visitor Saturday.

Wilford Kinsley of Hereford spent the week-end in the San Rafael Valley, the guest of his parents, Mr. and Mrs. A. L. Kinsley.

T. E. Heady, manager of the Greene Cattle Company's ranch, and Mr. and Mrs. Ed McFarland of Soreno Canyon were visitors last Thursday at the ranch of Mr. and Mrs. Bud Baldwin in the San Rafael Valley.

Bee Lewis and family of Parker Canyon have leased the Keaton ranch in the San Rafael Valley and have taken possession.

Forest Ranger Robert Thompson, wife and son of Canille were visitors in the San Rafael Valley Saturday.

Blane Lewis of Parker Canyon met with a painful accident last week when one of his arms was caught in a jumpjack at the Babacomari ranch. He was taken to a Nogales hospital for treatment. It is reported that he is in no danger of losing the arm, although the member was badly lacerated.

Miss Geraldine McCormick, who underwent a slight operation at a Nogales hospital this week, has returned to Patagonia much improved.

Heavy rainproof canvas, 48 and 72 inches wide. Washington Trading Co.—Advertisement.

B. Maier, Benson merchant, was in town Wednesday on business.

Dave Jones, who had been seriously ill at an army hospital in the east is home for a visit with his parents, Mr. and Mrs. J. Ike Jones, of Parker Canyon. He is much improved in health.

John Campbell and A. S. Henderson spent the week-end in Bisbee on business.

Ben Powell and J. H. Reagan are cutting hay on the Ashburn ranch.

W. M. Claydon, local shoemaker, expects to leave Patagonia for Fort Grant, where he has been employed by the state to teach music at the reform school.

The Mexican population of Patagonia celebrated Mexico's Independence day with a big dance at the Opera House.

Following a three-week drought, this vicinity was visited Wednesday afternoon by a heavy rain, which was badly needed and much appreciated.

A. D. Page, cattle inspector, went to Sonoma this week to check out a shipment of calves.

A serious accident was narrowly averted Tuesday on the Alto road when a wheel came off of the car driven by the men. A broken bolt caused the accident.

J. J. Peterson, superintendent of the Big Jim mine, was a Nogales business visitor Thursday.

## ELGIN NEWS NOTES

S. M. Beebe made a hurried trip last Sunday to Phoenix, twenty-four being the time between leaving and his arrival in Elgin.

Mount Adams has gone to Los Angeles, where he will remain indefinitely.

D. D. Miller and Gus Yearly have moved their road camp to the vicinity of Pyeat's ranch, Canille, where they are reconstructing the county road.

It has been reported that Lyle B. Smith, has resigned his position as district forest ranger at Rosemont and has been succeeded by Olaf Olson formerly of the Rincon district.

Bob Bergier and Sy Swyers were Elgin visitors Friday.

Pat McCarty reports a fairly good crop of apples at his Canille ranch this year.

Miss Shirley Dalton went to Tucson Saturday, where she will attend high school.

Mrs. Ira Brooks, teacher of the Mowry school, was home Sunday. She reports good progress at her school.

Mrs. E. W. Knight has purchased the Benjamin ranch.

C. L. Beatty has moved back to his ranch, and has taken charge of Mr. Hasselgrin's cattle.

## WINTERING CALVES ON GRAIN IS TOO COSTLY FOR GAINS MADE

In wintering calves the use of grain in the ration increases the cost of wintering very materially and does not sufficiently increase the total gains at the time or subsequently to justify the additional expense, says the United States department of agriculture. This conclusion was reached from the results of a series of experiments carried on by the department in cooperation with the West Virginia experiment station in which grade Shorthorn, Hereford, and summer.

One lot of calves receiving a ration of mixed hay and a grain mixture of Aberdeen Angus calves were used to determine the effect of different winter rations on gains the following 3 parts corn, 1 part bran, and 1 part linseed meal made a winter gain of 88 pounds each, which was more than twice as much as another lot which was fed corn silage and clover hay. The latter drove, however, made a greater gain the following summer on pasture and lacked only 42 pounds of reaching the same total as the grain-fed calves. The cost of the grain ration through the winter did not justify the extra gains, says the department.

In fact, the experiment was carried until the calves were 3 years old, in which time the advantage in weight due to grain feeding the first winter was practically null lost by the time they were 3 years old.

## C. O. CASE RECOMMENDS BOOK ON U. S. CONSTITUTION

Superintendent of Public Instruction C. O. Case recommends reference book on United States Constitution in the following letter addressed by him to all the teachers in the state:

"After having given 'The Constitution of the United States, Its Sources and Its Application,' by Thomas James Norton, a careful study, I am recommending it to the teachers as a reference book. Every teacher in the state should obtain a copy of this book for her desk, and it should be in every school library.

"The book is published by Little, Brown & Company, Boston, Mass., and is catalogued, I believe, at \$2.00. It can be obtained directly from the publishers or through the local dealers."

## L. C. BOGGS TO GIVE POULTRY DEMONSTRATIONS

L. C. Boggs, extension poultryman, University of Arizona, is in the county for conducting poultry culling demonstrations.

Yesterday he was at the A. C. Lowell ranch, north of Nogales.

Today at 2 o'clock he will be at the C. E. Wheeler home in Nogales.

Tomorrow, Saturday, September 19, he will be at the Dick Rows place in Patagonia.

"Huh!" snapped her hardboiled dad. "He is the kind of a boob who glows in hot weather but never sweats."

## NO LIBERTY WITHOUT LAW

On this, the 138th anniversary of the framing and signing of the Constitution of the United States, we are called on to take note of the document that gave this nation a new birth and placed in the records those ideals and aspirations which have made us great.

The Constitution crystallized into basic law a government by the people and established a republic with a guarantee of equality before the law. We deem it important, therefore, to read in its pages not only the privileges but the obligations of citizenship as well.

To many thinking people a period has arisen that is putting our Constitution through a severe test. They contend that human forces are at work undermining American ideals. They hold before us such "agencies of despair" as lawlessness, radicalism, political favoritism, class hatred, illegal trafficking, jury fixing, loose application of pardoning power, all of which have become a menace to constitutional foundations.

We have fallen on days where there is a laxity in respect for law and order, a defiance of the sanctity of person and property. Since all forms of human behavior are more or less contagious it is important that we consider the conditions and the remedy.

In the penal institutions of the United States there are today 200,000 persons convicted of crime. This does not tell the whole story when we consider those who go unpunished or undetected. Recent figures show the cost of this crime to be about 8 1/4 per cent of the nation's income, a startling sum to expend on a destructive force. Unfortunately this does not represent the total outlay. It is but necessary by way of illustration to note the cost of burglary insurance and contrast the rate with some other hazard such as fire. On the other hand, education, our greatest constructive force, costs an amount approximately 1 1/4 per cent of our income. This comparative cost is the more significant when we consider that we have in our grade and secondary schools alone 12 times as many American youths as there are inmates of our penal institutions.

There is reason to feel that when this conflict clears the vision of the Constitution's founders will be vindicated—that this will be proved a fraternal nation. We have "agencies of hope" that lead us to this conclusion. They are such institutions as the social welfare and service organizations, the press and radio, the church, the home, and the schools.

Educators are already at the task. They sensed the situation and for some time in conference groups the subject of character development and citizenship training has received their attention. It is a program not of talk but of action. Already many have translated their thinking into courses of study for definite instruction. Others are following.

Education is the greatest single foe of crime. The mass of the vicious, destructive and criminal are from less educated levels. The exceptions are so few as to be conspicuous. Education in the inspiration of reason and reason inspires respect for order.

There can be no liberty without law. If we are to become more of a law-abiding nation we will first recognize the necessity of having our educational institutions organized as training camps for citizenship and, second, make provision that our young people come under their influence.

It is a defense program of no mean proportions and worthy the aggressive support of our better citizenry.

## GASOLINE TAX ADDS LARGE SUM TO STATE TREASURY

Receipts in the office of the secretary of state for the month of August totaled \$83,212.59. It is shown by a statement issued by James H. Kerby, secretary of state.

The gasoline taxes collected under the 3 cents a gallon tax law, formed the larger part of the collections. The gas tax collected on August 15 by the secretary for the month of July totaled \$73,755.59, according to the report.

The remainder of the receipts were made up of motor vehicle license fees amounting to \$8,841, and miscellaneous collections totaling \$216.20.

"Gap," said the good wife, "I washed Bearcat's clothes today, and his suit has shrunk so that he can't get it on." "Aw, well," replied Gap Johnson, of Rumpus Ridge, Ariz., "wash Bearcat and probably the clothes will fit him all right."

## SCHOOL NOTES

(Fidel Valenzuela, Editor)

The Third grade is doing some nice work in writing this week.

There were not many absentees this week following the celebration of Mexico's Independence day, September 16.

There are 23 scholars attending the Second grade.

The Fifth grade is doing some very good work in reading.

The Fourth grade feels quite grown up as they have geography books for the first time, and intend to do good work.

Two new scholars started to school this week in Mrs. Yost's room.

Mrs. E. H. Evans visited Mrs. Yost's room this week.

Mrs. Grace A. Farrell, county school superintendent, brought some new school books to Patagonia this week and talked to the teachers about the production of a pageant for the county fair, to be held next month.

Marshall Evans went to Nogales Thursday to visit a dentist.

Current events are studied twice a week in Mrs. Yost's room.

Tommie and Mickey Costello and Ernest Reagan entered the Ninth grade Monday morning.

The Ninth and Tenth grades find Spanish interesting but harder to learn than they anticipated.

High school students have commenced the study of typewriting. A new machine will be installed.

## VAUGHN NEWS

Stanley Stoddard moved the household effects of Florence Brodson from Sonoma to Miami this week.

Mr. Schnyder preached to a very attentive audience last Sunday at the Little Adobe church, Vaughn. On the fourth Sunday of the month Jim Wheatley, one of Tucson's best singers, will fill the pulpit. Everybody is invited to attend and help Jim sing.

Haying is in progress at Vaughn, and every one is busy making hay. A good crop is in prospect.

Mrs. S. T. Harrison of Tucson is visiting her daughter, Mrs. W. H. Anderson and other relatives and friends.

Harry Warren has moved his family from exas to Vaughn and has taken up his duties as teacher of the district school, which is progressing nicely.

M. W. Jones of Tucson was in the Vaughn district this week inspecting his property.

Mrs. Charles Everhart has moved to Nogales. He is teaching the Tumaacori school.

"Women dress better than men," says a headline. Would they if they paid for men's clothes?

## MICKIE SAYS—

WE DON'T EXPECT EVERYTHING IN THIS PAPER TO APPEAL TO EVERYBODY, BUT WE TRY TO COME AS CLOSE TO PLEASING ALL TASTES AS IS POSSIBLE. WE TRY TO PRINT NEWS THAT WILL INTEREST THE MAJORITY, NOT THE FEW. THAT'S WHY WE CAN'T PRINT LONG ARTICLES WHICH FOLKS SOMETIMES BRING IN, ARTICLES THAT NOBODY WILL READ

## CAN YOU USE FIFTY DOLLARS?

"Do you want to render a service to your state? Can you use \$50? You can combine the two by entering the statewide 'See Arizona' photo contest—but you must do it now!"

This is practically the last warning to Arizonans who have neglected to enter their vacation photographs in the contest, and it is joined in by every chamber of commerce in the state, by the Arizona Industrial Congress, and by civic leaders everywhere. For, be it known, the contest will close October 1, only a few days away.

The contest has two purposes. The first is to add interest to the "See Arizona First" movement, which has proven so remarkably successful. The second, and in some respects even more important, is to collect a large number of new Arizona views, which can be sent to newspapers and magazines throughout the country, used in booklets and advertising, to show the rest of the world more of Arizona's scenic attractions. Indeed, if enough good photographs are entered they will be the means of obtaining the state invaluable publicity.

The contest is open to any resident of Arizona not a professional photographer. It is not limited to amateurs in the strict sense, however, as it makes no difference where, how or by whom the pictures were developed, so long as they were not taken by a professional. In other words, almost any resident of the state may enter. Similarly, any photograph taken in Arizona between January 1 and October 1, 1925, may be entered, though all should be of a scenic nature. Additional information may be obtained, and photos entered, at any chamber of commerce.

Though scores of pictures have been entered in the contest, many people have delayed entering until the last minute, and these should lose no time. There are literally hundreds of pictures taken by Arizonans in Arizona this year that have not been entered at all, and they should be. Any part of the state will do for a subject—cliff dwellings, trout streams, timbered dells, mountain views, a dozen other types. These pictures are judged—and the persons submitting the four best will receive for their trouble cash prizes of \$50, \$25, \$15 and \$10, respectively. That alone is worth trying for, not to mention the publicity the winners will receive.

"The contest needs your Arizona photographs, Mr. and Mrs. and Miss Reader. Enter them today!"

## ARMY HELPS AGRICULTURAL FILMS

The versatility of the soldier is demonstrated in some of the recent educational films made by the United States department of agriculture. In them the warrior is revealed as an important aid to the farmer.

The department of agriculture nation picture "Fighting Insects with Airplanes" shows army air service flyers cooperating with officials of the bureau of entomology in combating the cotton boll weevil by spreading calcium arsenate dust on cotton plants from airplanes. When the agricultural movie folk undertook a scientific study of the habits of horses, cavalry officers at Fort Myer, Va., opened their stables and assigned their best riders to assist in the making of "The Horse in Motion." Army aviators and balloonists played a big part in the making of two films which visualize the work of the weather bureau in investigating upper air strata and forecasting flying weather. These films are "Watching the Weather Above" and "Exploring the Upper Air." Lieutenant James Neely sacrificed his life in the interest of science when the balloon in which he and Dr. C. Leroy Melsinger of the weather bureau were flying was struck by lightning during a storm and both were killed.

The department of agriculture movie folk frequently call upon the cavalry for expert riders. An amusing instance occurred when a Fort Myer soldier was selected to wear the riding habit of an actress and double for the heroine in a scene when she was to be thrown from her horse. The result was a success, but the "lady" cavalryman was forced to endure many jibes from his comrades.

Eph—"What am I do difference between an ol' man, a young man, an' a worm?"  
Mose—"Nuffin'. Chicken gets 'em all."

As the Anti-Saloon League figures the Virginia primaries, Virginia's Byrd is a swallow.

## ARIZONA CROP AND LIVESTOCK REPORT, SEPTEMBER 1, 1925

According to a report released September 9, the condition of Arizona's oat crop on the first of the month was 91 per cent of normal. A condition of 91 per cent on September 1 forecasts a total production of 655,200 bushels for the crop of the season. Last year the condition was reported at 85 per cent of normal on September 1; on December 1 it was estimated that the total production of oats would amount to 700,000 bushels for the entire season. The abundance of summer rain in northern Arizona this year has brought up the condition figure for the oat crop of this season.

CORN—During the past month the condition of corn for the state has not changed, the condition of 85 per cent been reported for both August 1 and September 1. With a reported condition of 85 for September 1, a total production of 1,033,050 bushels is indicated. Last year the preliminary estimate of production amounted to a total of 930,000 bushels from 31,000 acres. It is estimated that 39,000 acres of land in Arizona are devoted to the production of corn this season; 8000 acres more than last year.

COTTON—According to a report released at 11 a. m. September 8, the crop reporting board of the United States department of agriculture estimates, from the reports and data furnished by crop correspondents, field statisticians, and cooperating state boards (or departments) of agriculture and extension departments, that the condition of the cotton crop on September 1 was 56.2 per cent of normal for the country as a whole. The condition of the cotton crop in Arizona was estimated at 92 per cent of normal.

This is the first report of condition and forecast production published by the United States department of agriculture for the date of September 1, and is issued in compliance with an act passed by the session of congress.

The condition of 52.2 per cent of normal forecasts a total production of 12,740,000 bales of 500 pounds gross for the season's crop in the United States. From the September 1 condition a total production of 39,000 bales is indicated as Arizona's production of cotton this year.

FARM PASTURE AND HAY—Due to the amount of rain that has fallen over Arizona this summer the condition of farm pastures on September 1 was 80 per cent. On the same date last year, following a dry summer, a condition of only 60 per cent of normal was reported.

The condition of all tame hay in Arizona on September 1 was reported at 88 per cent of normal, or the same as the figure reported thirty days earlier, on August 1. A condition of 88 per cent at this time would indicate a total production of approximately 548,416 tons. From a slightly lower acreage, the production last year was estimated at about 593,553 tons. Many fields have been watered and the growing crop should show a very satisfactory condition as a result.

LIVESTOCK—Ranges show a marked improvement following good rains during July and August, and prospects for fall and winter feed in Arizona are good. The condition of ranges is reported at 90 per cent for September 1, 77 last month, and 63 one year ago.

Cattle are in very good condition and many of the grass cattle moving to market will be in very good flesh. Due to good feed, the cattle movement from some sections will be a little early, while in other places, with good feed, there will be a tendency to hold as long as possible with the idea of getting better prices. The condition of cattle is reported at 92 per cent of normal compared with 77 last month, and 83 a year ago.

Sheep have summered well and will move from the summer ranges in fine shape. Lambs are generally in good condition. The condition of sheep and lambs is 92 per cent of normal, the same as last month compared with 80 per cent last year.

## BERSICH-McCORKENDALE

George Bersich of Parker Canyon and Miss Bessie McCormick of Ontario, Calif., were married at the bride's home September 2. The bride's sister, Mrs. Nick Bersich of Parker Canyon was matron of honor. The young couple has the best wishes of their many friends. They will make Santa Cruz county their home.

The national budget has its work cut out for it if it has to carry the load of a third term candidacy.

### CHAPTER XIX—Continued

"Now he goes running out along the walls searching for something. Look! Here! He ran out along the base of the wall searching."

"For what?"

"For bits of wood—for anything that would burn—for fuel. He must have a funeral pyre. He has been crazed by fear again. But he finds nothing, Brena. There is no wood here, no paper, no grass. There's nothing but sand and stone. Let him run about till he drops. There is no mercy for him. Nothing that will burn. Nothing within a half a hundred miles. Like Hennesep, he too now screams and the scream comes back from the cliff with a terrible mockery."

"But he did find fuel, Peter," she said. "He must have found something."

"Yes, he found something that would do—no very well, as we can see. He had hoped for better results than he got. Come."

On the way toward the gate of the fortification walls Peter stopped and kicked at a blackened spot on the sand. He said ironically, "Their fire. Where they ate their last supper together—the vanished men."

The sun had dropped below the mountains above the mesa; its needed fire had settled down into a hot layer of dull, golden heat. But beyond the wall where their car stood the open desert, bare, cruel, with the heat waves running like endless herds of sheep along the quivering horizon, was a relief from that strange spell of the dried well, the ruins, the line yellow-gray dust, and the silence.

Brena filled her lungs as one does who has come from the interior of a mortuary.

"Peter," she said.

"Yes, dear."

"I want to tell you, Peter, that you need not worry about me. I am all right. It is necessary for me to know. And I'm going to know, Peter, without any weakening. We've come too far for that."

He took her hand.

"I'm not willing to let this make a scar on me, Peter," she said. "I've paid in full before this. So show me. And then let's turn toward the earning of our ways."

"Our way," he insisted, correcting her. "Not ways. The earning of our way, together."

She shook her head a little as if some doubt had stirred within, but they were outside the wall now and Peter's eyes were upon that which he had seen before.

He dropped behind her and turned her body so that she faced toward the bend in the southern end of the fortification wall.

"There," said he. "You did not see it as we drove in."

Standing on the desert, like a ragged unkempt impiety, was the ruin of a touring car. All that was left of its top was hanging in wispy strips on the metal frame, its paint and varnish had almost gone, the tires had hardened and crumbled on the wheels, shreds of dry rotted leather dangled from the cushions. Motionless, dead, silent as all else, the car, as if it were a shabby outcast thrown out to die, appeared disconsolate, ready to send forth a wall of loneliness into the emptiness. It had turned its back upon Pueblo Mescale, as if it had wanted to go away but could not.

"He came in that, Peter?" Brena asked.

"Yes."

"But never took it away. Did he kill himself?"

"No," Peter answered. "A great abstract justice—a great equity from which there was no appeal—sat in trial of him here. I tell you, Brena, the thing is of magnificent, awe-inspiring dignity. It's a tremendous thing—an unforgettable majesty of inexorable dealing out of sentences. The place of his crime was the scene of his trial, his conviction and sentence. He died as Hennesep had died—of thirst."

Brena started to speak.

"No, not yet," Peter said. "As Hennesep had suffered, so he suffered. More, perhaps, because in his car—just as we have—he had a two-days' supply of water. Do you see that black thing out there on the desert? It is a metal container for water. He was so crazed that he had tried to drag it along with him on a hopeless journey through the sand. When he lost hope after many miles he dragged it back, tapping its contents to wet his cracking lips until the last drop was gone."

"But the car?" she asked. "What happened to the car?"

"The car was all right," replied Peter. "Come this way. Don't go in front of it. Look behind it—the tracks it had made from the enclosure entrance. But here it stopped. Oh,

I tell you, it is a thing of stateliness—as if some great hand had come down."

Brena stared at him in open-eyed wonderment.

"He was the instrument of justice—he himself," Peter went on. "A man who would save his life, lost it. The madness of fear brought all that he had to fear—and more."

He paused.

"Brena, I will tell you," he said in a husky, awed voice. "The man was mad, irresponsible, without power to reason. He was in a panic of fear. He wanted to hide his crime at any cost. He had filled his gasoline tank for the return journey. Look!"

Peter pointed to the hole in the back of the car into which the gasoline had poured. The screw cap had gone. A bent copper pipe still dangled out of that hole.

"He wanted a hat-full of gasoline. That was the fuel, Brena—the fuel to burn the remains of Jim Hennesep."

He wet his lips.

"He used a siphon. This bent copper pipe taken from his tool chest—a spare length of oil feed pipe! And with that he filled his hat and ran back."

Peter looked up into the sky. His went on quietly. "And the siphon ran on. He had forgotten it. It ran on with its little stream saturating the sand until the tank was empty and the heat of the day was evaporating the last drops at the bottom. Paranoia had condemned himself to death! He had lost the fuel he had put in for the return journey!"

Brena pressed her lips tightly together and for many moments looked into the great fanlike spread of the sunset. Then suddenly she turned toward the car and took several steps.

"No," said Peter firmly. "You mustn't."

"I must know, Peter, beyond a shadow of a doubt."

"He is there—nothing for you to see, dear. He must have had the delusion at last that he could drive the car. He's there—at the wheel—fallen forward. And so—"

She looked up.

"And so—to be sure—I took the watch—a gold one—this one. Is it his?"

He held it out on the palm of his hand.

"Yes, it is—his, Peter."

He looked down at it a moment; then tossed it into the sand as one tosses aside a poisonous fungus.

"Peter."

"Yes."

"We mustn't let this go with us when we go—following us away. We must leave them both—here."

She took his hand.

"I am sure. For myself I can answer. I know the desert has served some great Will. The book is closed."

They slept upon one great square blanket spread on the open desert beneath the stars while the pale moon moved on its great silver arc across the heavens. The Pueblo Mescale was far behind; from it they had ridden for miles in awed silence. And when they had reached a stopping place upon a rise of ground, neither had dared an expression. Aching with weariness they had looked at each other mutely and flung themselves down.

Now the second morning, like the first, came over the desert's edge with a host of golden lanes; again the air of the desert became a haze of luminous violet hanging above the red and yellow sands and waiting for that clang when the yellow glare was flung forward again over the plain.

Brena awoke, sat up, unbraided her hair and tossed it loose with her fingers. Something within her, that had been growing with the slow growth of stalwart long life, that had suffered no blight, that subconsciously she had protected and nurtured for an unseen end, that had been made ready to withstand assaults by tragic winds, that had lived apart and immune from taint, was now free. As she threw cut her arms toward the sun, so now this thing within her for the first time came forth from its depths to greet a dawn of its own.

It was not a thing asking for dramatic crises or for summits of joy; it only asked for the ultimate romance—that of the continuity of a full, strong, human life—the adventure of adventures into which the soul throws mind and body, thought and flesh, nerve and will. And because she had found her mate in this ultimate romance, Brena bent over and kissed Peter's lips.

He smiled in his sleep, and slowly his body moved and his eyes opened. "Where are we going, Peter?" she asked.

"Somewhere with you," he said, sitting up. "Somewhere with you. I suppose we'll have to be married, dear one. But I feel that we were something more than that a long, long time ago."

He turned toward the east and the first flood of golden light illumined his face.

"Do you know, Brena, that there is something not weighed by science and the philosophies, not reckoned by governments nor laws nor customs. It is something that is ours—some new-born thing without material existence, some immortal spirit that we have created—I and you—I—long ago."

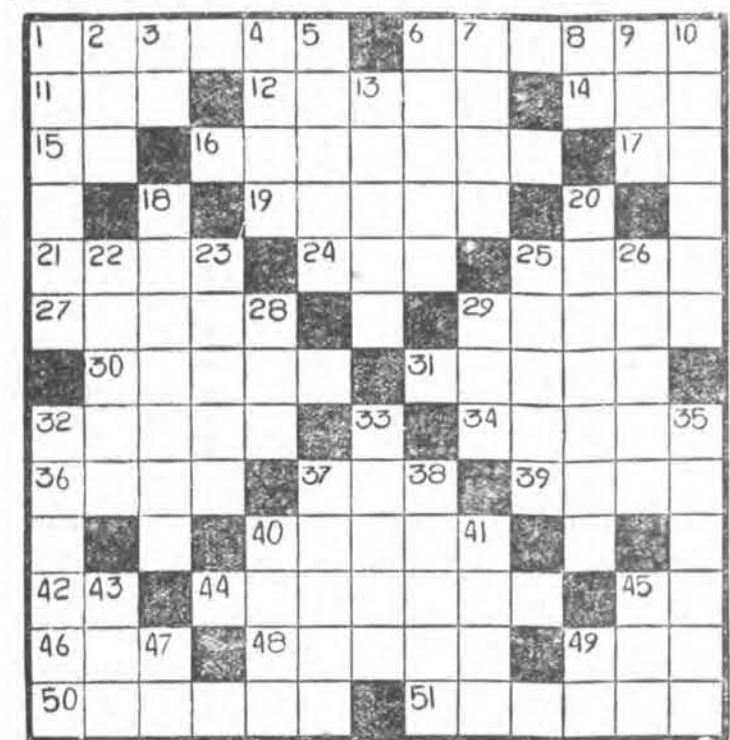

Brena moved her head up and down in silent assent. She sat with her hands clasped in her lap, her dark eyes moist, and a calm smile upon her sensitive, flexible lips.

For now she knew that he too understood the way to the greatest of all the mysteries.

[THE END]

African elephants have been known to scent men at 1,000 yards.

## CROSS-WORD PUZZLE

(Copyright, 1925.)

- Horizontal.
- 1—A country in Europe  
6—Shifts  
11—Name given to a lion  
12—A passageway  
13—A measure of area  
14—Not in  
15—Smiles in a silly affected fashion  
16—An exclamation used to startle or frighten  
17—Ireland  
18—A box or carton of anything  
19—Unpleasant  
20—Learning (plural)  
21—A girl's name  
22—A spice  
23—A city in Italy  
24—That girl  
25—A kind of rock  
26—Abbreviation of a man's title  
27—A rustic  
28—To cut short, as hair  
29—To correct  
30—Amalgamated Society of Engineers (abbr.)  
31—Drenched
- Vertical.
- 2—Over (poetic)  
3—Behold!  
4—A sharp-pointed implement  
5—A kind of coin (plural)  
6—Rested  
7—Belonging to her  
8—A negative  
9—A large container for water  
10—Scarfs worn by church functionaries  
11—A country in Europe  
12—Hot, dry winds that blow in Arabia  
13—Splendid  
14—A man's name  
23—Pluck

Solution of Last Week's Puzzle.

### HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

## NURSERY RHYME PUZZLE

I SING, I sing,  
From morn till night,  
I'm happy as a lark;  
Today's my birthday,  
I'm to have  
A party in the park.  
I'm going to light  
These lanterns up  
As soon as it grows dark.

Find three guests. Lower left corner down, along dress. Upper side down, along arm. Upper side down, on dress.

## DAIRY THE DAIRY

### AVERAGE COW IS NOT GOOD ENOUGH

The average American dairy cow is not good enough, according to Dr. C. W. Larson, chief, United States bureau of dairying. In an address before the National Dairy club at Chicago recently he characterized the greatest need of the dairy industry at this time as not an increase in the number of cows, but a greater production per cow. The average yearly yield of cows in this country is about 4,000 pounds of milk and 150 pounds of butterfat. Through intensive studies made by the bureau it was found that a cow producing this amount of milk and butterfat in one year furnishes an income of \$20 over cost of feed. It was further shown that cows capable of producing 8,000 pounds of milk and 300 pounds of butterfat in a like period returned an income over feed cost of \$74.

The most practical and least expensive way for the average dairyman to increase the profits from his milking herd is through the cow-testing association and the use of a good pure-bred sire. An example of the greater profits possible by careful selection of cows, systematic weighing and testing of milk, proper feeding and the use of a good bull, is shown in the Allenton-Kohlsville Cow-Testing association of Wisconsin at the 1924 National Dairy exposition. Ten immature cows in this association, all daughters of the same pure-bred bull, produced an average of 1,483 pounds more milk and 70 pounds more butterfat in one year than did their dams at mature age.

The outstanding exhibits of interest to the largest number of dairy farmers at the National Dairy exposition held this year at Indianapolis, October 10 to 17, again are devoted to these lessons. The comprehensive exhibit of the United States bureau of dairying and those of the national breed and state dairy associations and the leading state agricultural colleges will have special application to the good results obtained through cow-testing association work and the pure-bred sire.

### Eradicate Tuberculosis in Utah Dairy Section

A noteworthy advance in the nationwide campaign against bovine tuberculosis occurred during June in a new sector. Cache (pronounced Cash) county, Utah, completed a systematic tuberculosis test of its 23,000 cattle, which showed less than one-half of 1 per cent infection. This very small extent of the disease, together with the fact that all reactors were removed, won for Cache county a place on the United States Department of Agriculture's list of "modified accredited areas."

It is the first county in Utah to have that distinction, and department officials consider that the leadership of Cache county will stimulate similar activity in other counties of the region. This will greatly advance the progress of systematic tuberculosis testing in the West. Such a view is supported by the fact that another county has in the state already applied for a similar intensive test of its cattle. The county commissioners of Summit county voted \$500 toward the work which is now in progress.

A survey of the state indicates that the percentage of tuberculosis infection in cattle is less than 1 per cent. This low figure and the growing sentiment in favor of the work give promise of an active state-wide campaign.

### Prevent Mold in Butter by Sanitary Measures

Moldy butter, which takes a toll of many thousands of dollars from creameries every year, can be absolutely controlled and prevented, says Harold Macy, bacteriologist for the division of dairy husbandry of the University of Minnesota. He points out that molds are living plants and must be present and alive to do any damage. If they are excluded or destroyed, there will be no moldiness of the butter.

Chief of steps to be taken in excluding molds, says Mr. Macy, are pasteurization of all cream, the emptying, cleaning, and sterilizing of the butter milk tank every few days, and the use of two sets of cans by farmer patrons of the creamery, one set for transporting cream to the creamery and the other for taking buttermilk back to the farms. Sanitary piping and pumps must, of course, be provided and be kept clean and sterilized. Only pure, low acid starters, made from thoroughly pasteurized milk and pure cultures and kept in sterilized containers, should be used. Paraffin tubs and treated parchment are indispensable. And, finally, the butter should be stored in a cool, clean, dry, and well ventilated room.

### Dairy Notes

Cow-testing associations rid herds of jackpockets.

Roughage is not a sufficient feed for good dairy cows, especially if it is somewhat poor in quality.

Groom the cows vigorously twice per day. It will help to prevent fly annoyance and will increase production.

## FARM POULTRY

### ERADICATE MITES TO SAVE POULTRY

There are few poultry producers who do not know of the ravages caused by the common chicken mite. It is very common in all parts of the country and while it is more prevalent in mid-summer it is well to eradicate it from the chicken houses before the young chickens arrive in the spring.

The removal of all interior fixtures and a thorough disinfection with a strong dip applied with a force pump is recommended by the Kansas experiment station. They state:

All rubbish should be removed and burned. Care must be taken to get the spray into all crevices. Kerosene emulsion, crude petroleum, and wood preservatives may be used for spraying, followed by whitewash. Whitewash aids mechanically by helping to fill up many crevices. Spraying should be repeated after a week in order to get any mites that may escape. Roosts should be painted frequently with wood preservative or crude petroleum. A treatment of the roosts, nests, boxes, etc., each spring with undiluted crude carbolic acid or sheep dip is usually sufficient to reduce the action of the mites to a minimum. The fact should be kept in mind that mites are blood-sucking parasites and do not remain on the birds as do lice. Mites are more harmful to poultry than lice and in treatment it is necessary to treat the house and not the bird, as is the case of lice.

The construction of roosts and nesting places so as to reduce hiding places to a minimum is an excellent control measure.

If new birds are brought to the farm, or birds to new quarters, they should be isolated for a few days in a pen separate from the permanent quarters so that all of the mites will leave them, thus preventing the infestation of new quarters. If birds are moved in the daytime after will not be carried on them.

### Poultrymen Use Greens in Greater Quantities

New Jersey poultrymen are finding that for greatest success plans should be made to supply poultry with an abundance of greens. They find that vegetation usually becomes tough and coarse in the summer and free range conditions do not provide the proper type of green food for poultry.

To offset this the principal crops sown in yards or on range are oats, rape and alfalfa. An alfalfa sod makes an ideal range because of the new growth constantly coming out. Rape also makes a new growth as the old is eaten off. It produces dark yellow yolks, however, and must be avoided if light yolks are desired. Oats make a very good crop for a few weeks. They should be planted in small quantities, because if not consumed while young they soon become too large and coarse.

In addition to range crops, cabbage, kale and Swiss chard are often grown in a side field and fed to the birds. Kale has proved particularly well suited for summer feeding as it continually sends out new shoots after being cut. Cabbage makes a fine feed for late summer and fall.

Regardless of the kind of succulent feed used, successful poultrymen aim to provide six to eight pounds daily per 100 birds. When fed the first thing in the morning or the last thing at night, the green feed does not interfere with consumption of other feeds, and egg production is improved by its use.

### Poultry Facts

A Leghorn cockerel may become a rooster, but never a rooster.

Painting the roosts and nests with a good preservative or creosote is insurance against mites.

It is a good rule never to let a sick chicken die on the premises. It should be killed before it reaches that stage.

If you are expecting to get the best results from your poultry flock, feed a balanced ration and do not overfeed.

The ancient buncombe about hens getting too fat to lay is still widely credited when, as a matter of fact, no hen except a fat hen can lay.

A full feed early in the day tends to make the hens listless, while a small feed encourages them to take the exercise which they need in order to keep in the best of health.

A hen with 15 or 18-inch blade is very satisfactory for scraping the drying boards, and if used regularly once a week or oftener, will assist materially in maintaining the health of the flock.

A good scratch grain ration consists of equal parts of cracked corn and whole wheat. Feed a little of the grain in the morning to make the flock exercise and give all they will clean up at night in fifteen or twenty minutes.

## AFTER EVERY MEAL WRIGLEY'S

makes your food do you more good.

Note how it relieves that stuffy feeling after hearty eating. Sweetens the breath, removes food particles from the teeth, gives new vigor to tired nerves. Comes to you fresh, clean and full-flavored.

## In the JUNGLE

With Cheerups and the Quixies  
by Grace Bliss Stewart

### MR. LION'S WHISKERS

"GOODNESS gracious!" cried Cheerups, with a chuckle. "Just think of little me being able to do something for the King of the Beasts. I have always wanted to be helpful, but I never dreamed of that. What did you say was troubling you, Your Highness?"

"Oh, please don't be formal, Mr. Cheerups," said the Lion, with a gracious wave of his tail. "Plain Mr. Lion is nicer between friends. But to get back to important things, I have been most dreadfully worried lately. You may think that because I am strong and fierce, there is nothing in the whole jungle of which I am afraid; but, dear me, what a mistaken notion that is! Gray Ears the Elephant is

"You Don't Think Whiskers Were Given You Just for Looks?"

often more than a match for me; sometimes Gumbo the Anteater is able to thrust his long, strong horns through my body; but worse still is the hunter called Man, who, for such a puny creature, seems hardest of all to escape."

"But you have your wonderful eyes which see so well in the dark, and the soft fleshy cushions under your paws which make you able to walk very quietly. Why, I don't believe my Quixie Quakear could hear you in those padded slippers. And your coat is just the color of the desert sand, so you are very hard to see in the daylight. Really, Mr. Lion," said Cheerups, with a hint of reproach in his voice, "it seems to me that you have a great deal to protect you."

"That's a fact, now that you remind me of it; I have lots to be thankful for," said Mr. Lion, with such a hearty roar of delight that Cheerups almost fell out of his house in surprise. "But there's Mrs. Lion and Tawny and

Fuzzy to be thought of. Who would bring them their dinner and their tea if anything should happen to me? I always get the food for them myself; in fact, I don't think much of fathers who don't provide for their families. Selfish, I say! So, you see, I need just one thing more to protect me. Sometimes when I walk through a path in the jungle, it grows so narrow that I brush against leaves and twigs on each side, and that makes a rattling sound or a crackling noise which tells my enemies that I am coming. Neither my keen eyes nor my soft cushioned feet do any good then. Could you suggest some way out of a tight place like that?"

"To be sure, my friend, to be sure!" cried Cheerups good-naturedly. "It's a pleasure to help such a polite husband and kind father. Now let me see—eyes, paws, coat; why, you have forgotten your whiskers!"

"They are good-looking, aren't they?" said Mr. Lion proudly, trying to see himself in a dewdrop and falling.

"Now, now, sir," laughed Cheerups, "you don't think your whiskers were given you just for looks, do you? Why, everything is useful in some way, if you only know it. The next time you are going through a trail in the jungle, extend your whiskers straight out on both sides, and when the path grows narrower you will know it as quick as a wink. Your whiskers stretched out are exactly as wide as your body, and in each one is a tiny nerve, which when touched, telegraphs the message to your brain. So when you find out in this manner that the path is too

## THE WHY of SUPERSTITIONS

By H. IRVING KING

### WISHING ON A RING

A SUPERSTITIOUS custom prevailing widely at the present day is that of "wishing on" a ring.

Probably you all have, when you were children, performed this magic rite. You take a ring from your own hand and place it on the finger of a companion, preferably one of the opposite sex, and wish at the same time. The ring must not be removed until the "wisher" gives permission. If these conditions are fulfilled your wish will "come true."

We have here an echo of the old legends and superstitions of the East which ascribed to certain rings power

### Harriet Hammond

This popular big brown-eyed beauty is prominent as a leading woman in the "movies." Miss Hammond devotes much time to the beautification of her eyelashes, a feature of her general attractiveness. She has been seen to splendid advantage in a number of popular pictures, and has hosts of admirers.

narrow, you can turn back and take a different way."

"Oh, Mr. Cheerups, that's the most astonishing thing I ever heard. I hope I can repay your kindness some time. Now I'll go right home and tell Mrs. Lion, so she won't worry any more. I just can't wait to use my whiskers. Good night," and Mr. Lion was gone through the jungle.

### OLD HOME OF LEES TO BE RESTORED

#### Rehabilitation of Historic Arlington Assured.

Arlington is to be restored—not the cemetery, but the house, the old home of the Lees. No announcement could be more agreeable. The cost of restoring the house to the condition in which it was before the Civil war is estimated at \$225,000.

The house is worthy of such care merely for its own sake, as one of the most admirable examples still existing of that colonial architecture which gave to this country two hundred years ago a charm and a distinction scarcely surpassed by any other in the world.

Arlington is prized for its personal associations, as the home of the Lees. Members of that illustrious family had, indeed, other homes; but no other is so inseparably associated with the name of Lee. In that capacity it embodies much of the history of America, and some of the most stirring passages in the history of the world for more than eight centuries. At sight of Arlington, and at thought of the name which it recalls, one thinks of Lancelot Lee, foremost among the knights who followed William the Conqueror; and of Lionel Lee, the right-hand man of Richard the Lion Hearted in the Third crusade, who won an earldom by his valor at the siege of Acre.

One thinks still more of Richard Lee, who planted the family in America, and who constrained Charles II to grant Virginia the unique privilege of quartering its colonial arms with those of England, Scotland, Ireland and France with the proud motto, "En dat Virginia quintam," thus recognizing that colony as the fifth equal member of the kingdom, and giving it for all time the name of "Old Dominion." One thinks of Richard Henry Lee, co-organizer with Samuel Adams of those formidable "committees of correspondence" which were the germ of the American revolution; and of his brother, Francis Lightfoot Lee, signer of the Declaration of Independence. One thinks of "Light Horse Harry" Lee, the incomparable leader of Lee's legion, who not only again and again "encountered Tarleton's charge of fire" but smote and vanquished that warrior and his hitherto unconquered dragoons; and who, as the chosen orator of congress at the funeral of Washington, gave to his memory the immortal epigram, "First in war, first in peace, first in the hearts of his countrymen."

And finally one thinks of Robert Edward Lee, the last of his line to possess Arlington, the peer of all who had gone before in intellectual genius, in moral exaltation, in what Lincoln called "firmness for the right as God gives us to see the right," and in the noblest qualities of American manhood.—Washington Post.

#### Typical Fiction Tourist

A day or two ago there walked into a restaurant in a favorite tourist resort at Stockholm a typical tourist of fiction, a correspondent of the Chicago Daily News reports. Hanging from his neck was a monster pair of prism glasses. From his shoulders hung a box camera and in his hand he carried a new guidebook—the brown cover not yet removed from it—and a history of Sweden. Behind him meekly came his bride in white muslin. What nationality was he? He was not German or his wife would have been carrying the camera. No American or British bride would have walked so humbly behind her lord. Her great mass of golden hair, coiled splendidly around her head, told that they were Danish. And as she raised her shapely hand to adjust her hair I saw in her eye a look that did not promise long duration for her husband's bumptious self-confidence.

#### Artist Not Appreciated

Arlington Robinson, the poet who has received the \$1,000 Pulitzer poetry prize, said on a visit to New York:

"It is hard for an artist to get a hearing from the public. Congress stopped writing in his prime because the public would have none of his misapprehensions. 'The Way of the World.'"

"The artist comes timidly before the public and is apt to be received like the beggar in the rich banker's office."

"Excuse me, boss," the beggar said, "but I ain't had nothing to eat for three days. Can't ye help me out?"

"I'd like to," said the banker, "but I sprained my foot on a book agent yesterday."

#### Chose Poor Hiding Place

For picking out a stove as a hiding place for his \$500, a miner in the Ashby de la Zouch coal fields in Leicestershire, England, is now minus that amount.

He didn't wish his wife to know he had taken the money out of the bank, and he couldn't think of a better hiding place in summer time than a kitchen range. But his wife decided to heat some water for washing clothes—and the moral to this little tale is, "let the wife be on your secrets."

The first number of the women's paper published in Turkey has just appeared in Constantinople. Its editor is Mme. Nezile Moudillidne, and gathered about her are some of the most accomplished women in Turkey.

## The American Legion

(Copy for This Department supplied by the American Legion News Service.)

### PLAN BIG WEEK AT OMAHA CONVENTION

Horse races, a rodeo, a street fair, a play, "What Price Glory," banquets, a football game, airplane races, the Ak-Sar-Ben \$75,000 electrical display, a parade of 10,000 regulars, military demonstrations, fireworks—these are some of the entertainment features planned for the great American Legion convention to be held in Omaha October 5 to 9.

The tentative program as announced by the Omaha convention committee, with possibly a few changes, follows: Monday—Street fair; horse racing at Ak-Sar-Ben field; rodeo at baseball park; reception for all visiting women; Ak-Sar-Ben initiation for men; states dinner (Auxiliary); dancing; "What Price Glory" every day.

Tuesday—Addresses; street fair; addresses by distinguished visitors; American Legion parade, 100,000 in line; rodeo; Ak-Sar-Ben den for men; banquets; Eighty-ninth division dinner; Wisconsin night, Creighton gymnasium.

Wednesday—Street fair; business meeting and memorial; Eighty-ninth division services; football, Creighton vs. Colorado; horse races; Auxiliary drill teams contest, Ak-Sar-Ben field; airplane races, municipal field; reception to women Legionnaires; Ak-Sar-Ben parade; Forty and Eight initiation; dancing.

Thursday, Military Day—Street fair; military parade, 10,000 regular soldiers of Seventh army corps; military demonstrations, Fontenelle park, Old Happy Hollow club, Ak-Sar-Ben field; rodeo; horse racing; Forty and Eight promenade; fireworks at Ak-Sar-Ben field, originally planned for Coolidge inauguration; finals in band contest in which 250 bands participate; finals in drum and bugle contest in which 750 drum and bugle corps participate.

Friday—Tour of city; dedication of war mothers' memorial; horse racing; tea for Auxiliaries; street dancing, Jackson, Douglas, Lake streets, every night; display of captured German cannon, Capitol avenue and Sixteenth to Twentieth streets; United States exhibits, naval, marine, air, coast guard, signal, ordinance, medical, chemical warfare, engineers, air mail, Red Cross; golf and swimming; contests, rifle, pistol, trap shooting, male quartette, Auxiliary drill teams, drum and bugle corps, bands.

### Discover Communism Is Taught in Schools

Investigation is being made of a report that schools for training communistic workers and missionaries are being conducted in this country, according to announcement made recently by Frank Clay Cross, national director of the American Legion. Such schools have been conducted at several localities over the country during the present summer, reports laid before the Legion commission indicate.

A special subcommittee was appointed to carry on the investigation for the commission. Its members are: Frank Sleh, Aberdeen, S. D., chairman; John B. Jessup, Wilmington, Del., and John Bullington, Belleville, Ill.

One school is the center of a special investigation by the committee. Fifty students are said to have been in training at this school, to be sent back to their communities and schools to spread communistic propaganda. The students are reported to have come from three states. That the doctrines of communism are being taught, Hayes, the instructor, admitted. Raising of the red flag in the United States is being openly advocated, according to reports. "The Constitution of the United States is the product of fraud," is a part of the curriculum of the Red schools.

Reports to the commission indicated that Soviet Russia has recently sent into the United States \$300,000 for communistic propaganda. The commission reaffirmed its opposition to the Bolshevik regime in Russia by the government of the United States.

### Four Cities Seeking National Conventions

Florida wants the 1928 national convention of the American Legion. This was learned at the recent semi-annual conference of Legion officials at Orlando where the decision was made to bid for the 1928 meeting.

Miami was the unanimous selection by the real estate men as their candidate for the convention. It is understood that the Miami Chamber of Commerce is ready to pledge \$50,000 immediately for entertaining the convention and will put up as much more as may be necessary to provide royalty for it.

Philadelphia seems to be the popular choice for the 1926 convention city. The Quakers are seeking the 1926 meeting as a feature of the sesquicentennial celebration of the signing of the Declaration of Independence.

Paris, France, is widely favored for the 1927 convention. The project of meeting there is being investigated as to its feasibility. The French government will welcome the conciliate with pleasure.

## MRS. BORGELIN'S REMARKABLE RECOVERY

Gives Credit for Restored Health to Lydia E. Pinkham's Vegetable Compound. All Women Interested

MRS. OSCAR F. BORGELIN  
FOREST CITY, IOWA

Forest City, Iowa.—"My first child lived only a short time and I was sick for a year after. When I bent over and raised myself up again I could almost scream with pain in my back. One day I was so bad that I had to leave my washing and get ready to go to the doctor. He gave me medicine, but it did no more good than if I drank just water. Once when we had been in town a little while talking about Lydia E. Pinkham's Vegetable Compound was left in our car. I have taken five bottles of the Vege-

table Compound now and I do all my housework and help with the milking, and taking care of chickens and garden. Besides I have a fine baby girl eight months old, just the picture of health, and I am feeling fine myself. You may use this letter as a testimonial and I will answer any letters asking about the Vegetable Compound."—Mrs. OSCAR F. BORGELIN, Route No. 5, Forest City, Iowa.

### A Bad Case of Nerves Relieved

Denver, Colorado.—"I was very despondent, blue and sad all the time, which is worse than real pain, and extremely nervous, with no appetite. I was this way for about two years and thought no one cared for me. My mother had had the same trouble and had taken Lydia E. Pinkham's Vegetable Compound for it. I tried everything else, then I began to take it. I soon had a better appetite and restored mental condition. I moved to a bright, sunny house, began calling on different people, and changed many other things. I also used Lydia E. Pinkham's Sanative Wash for my female weakness. With the aid of your medicines I am now a fairly healthy, happy and contented woman. I've used the Vegetable Compound at different times and will say it always helps me over the bad spells that come to every woman past 40 years."—Mrs. HELEN FINE, 35 South Washington Street, Denver, Colorado.

### Indian Fabrics Decline

So small has been the demand for piece goods in India that mill owners there are soliciting not only whole sales, but are going direct to retailers for orders.

## In bed four months ... now a well man

Gives Tanlac full credit.

Over twelve years of stomach misery had made a physical wreck of Jacob Ferdinand. He spent hundreds of dollars seeking relief but every attempt failed until he tried Tanlac. This great tonic brought him immediate relief. "After seven bottles," he says, "I am a well and happy man. I will gladly talk to anyone personally and will answer all letters regarding my experience with Tanlac. For it proved a god-send to me."

\*Authentic statement. Address on request.

Tanlac is Nature's great Tonic and builder. Compounded after the famous Tanlac formula, from roots, barks and curative herbs alone, it is absolutely harmless. Millions owe their health and happiness to this great remedy.

Don't let stomach trouble make your life miserable a day longer. Get a bottle of Tanlac at your druggist's at once. The first dose will make you feel better. You'll be a new person with the sparkling eyes and rosy cheeks that come from perfect health.

Note: For Constipation, take Tanlac Vegetable Pills, Nature's own harmless laxative.

## TANLAC FOR YOUR HEALTH

## Fits

Stop the attacks at once. FREE sample and treatment mailed to any one giving age, just to prove what it will do. In use 41 years. Why suffer longer when relief is offered FREE? Address: Towne Remedy Co., Milwaukee, Wis.

## BATHE YOUR EYES

Use Dr. Thompson's Eyewash. Buy at your druggist or 1105 River, Troy, N. Y. Booklet.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

## "WHAT'S IN A NAME?"

By MILDRED MARSHALL

Facts about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel

### MARIETTA

FAR as it seems to have strayed from the simple Mary, which is the basis of the name, Marietta is still one of the sacred and holy names of feminine nomenclature. Marion is its direct predecessor and through the latter it preserves its significance of "bitter."

When the French Marion was found, her fame traveled abroad through the popularity of "Robin Hood" and in 1332 the play of "Robin et Marion" was performed by the students of Angers, one of them appearing disguised as the girl. Thus the origin of Mariettes, puppets disguised to play the part of Maid Marion, is accounted for.

It was also customary at that time to call small images of the Blessed Virgin Mariettes or Marionettes. These images were placed in the streets for public worship and the streets came to be called the Streets of the Mariettes; in old Paris the fame of the Rue des Mariettes is still remembered. Mari-

ette, or Marietta, as the English preferred it when they took the name over, became popular as a feminine cognomen. In this country it was borne by the clever New England novelist, Marietta Holley.

The pearl is Marietta's talismanic gem. It will bring her beauty, magnetism and extreme popularity. Monday is her lucky day and 2 her lucky number.

### WHO SAID

"A jealous man always finds more than he looks for."

MADELAINE DE SCUDERI, the French romanticist, was the author of these words which sound almost ominous in their propheticness.

Madelaine de Scuderi (1607-1701) was a writer of romances that were internationally long and boring. Her best known works are "Artamene ou le grand Cyrus," "Ibrahim ou l'illustre Bassa," "Clelie," and "Almahide." All achieved great popularity in their day.

The writings of this woman, who was considered one of the leading literary figures of her day, owed their popularity to the fact that they were remarkably true descriptions of the time and of the people living when she did.

For this reason the books of Mlle. Scuderi had a remarkable circulation among those living at the time they were written, but to this same reason can be attributed their failure to be popular at the present time. They do not portray so much types of human nature as they describe individuals who lived at that time, and thus have little application to the present day.

In her day Mlle. Scuderi was a conspicuous figure in the literary circle that congregated at the Hotel Rambouillet in Paris. These gatherings were later broken up when the trouble with the Fronde occurred and Mlle. Scuderi and her literary circle moved to her own house. The Fronde was a party in French politics which caused considerable disturbance during the minority of the reign of Louis IV. They opposed the dominance of the courtiers and the wealthy.

A brother of Mlle. Scuderi, Georges,

### Not Comet, but Planet

The Tempel-Swift comet is still far away from the earth, and the object sighted on June 28 by M. Delporte, a European astronomer, and supposed to be the comet, is in reality a tiny planet, Amphitrite, which has been known to astronomers for many years. This statement is made by Dr. Edwin B. Frost, director of the Yerkes observatory, as a result of photographs made of the object by Dr. George Van Biesbroeck of the observatory staff.

"Delporte probably photographed the moving object while searching for the Tempel-Swift comet," said Doctor Frost. "Later computations which we have received from England, however, indicate that perturbations by Jupiter will delay the return of that comet until next year."

### Egyptian Tombs in Museum

From the shadow of the great pyramid of King Zoser in the Necropolis of Memphis, two of the most ancient tombs of Egypt have been shipped across seas and re-erected in Field museum, of Chicago. These tombs were erected 50 centuries ago to Neter-User and Unis-Ankh, both of whom carried the title "First Under the King."

was a writer of tragedies and was a lifelong enemy of the famous French poet, Corneille. He was born in 1601 and died in 1667.—Wayne D. Mc Murray.

### A LINE O' CHEER

By John Kendrick Bangs

#### A VISITOR

I AM A THOUGHT. A pleasant little thought, Of Love and Human Kindness wholly wrought. And here I stand, a-knocking at your door, Not like a Dun, or other weary bore, But as a Friend, or possibly your kin. Who hopes that you will haste to let him in To spend a day with you, a day all blent. With friendly cheer and wholesome merriment, And maybe if you have it help you bear More easily perhaps your load of care. For with a pleasant little thought like me Your cares will fade like mist upon the sea. And when night falls I'll send you on your way Unto another fair and joyous day.

## Does Your Face Reveal Your Character?

"That the intelligence of a person can be judged by his appearance, the shape of his head or the features of his face has been disproved by experiments conducted by Professors Donald A. Laird and Herman Remmers, of Colgate University, Glen U. Cleaton, of the Carnegie Institute of Technology, and F. B. Knight of the University of Iowa," says Dr. A. J. Snow, professor of psychology, Northwestern University, Chicago, in a special article.

"In one test, pictures were submitted to 376 persons and their estimates of the intelligence and abilities of the ten subjects were compiled. The results showed that in attempting to arrange the pictures according to relative intelligence they could have done as well with their eyes closed.

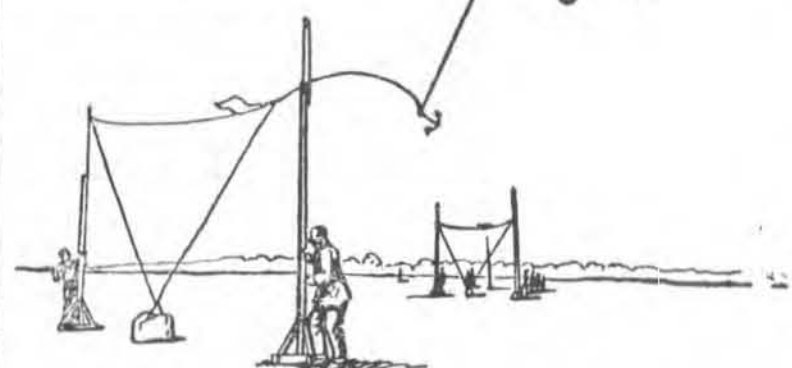

"In another experiment, two groups of society girls, ten in each group, and one group of ten fraternity boys were selected as subjects. Friends of the thirty then gave their opinions as to the intelligence, frankness, will power, ability to

judging them from their appearance were given a look at the thirty, one at a time, and their impressions compared. Their opinions agreed very well with each other, but did not agree with the estimates of the friends who really knew the subjects.

"The only possible conclusion is that a peculiarly shaped head, an odd ear, close-set eyes, a hooked nose, wide mouth, receding chin, or any other unusual feature about your head has nothing to do with whether you are intelligent or dumb, honest or criminal, or whether you would be a success in one line of work but not in another."

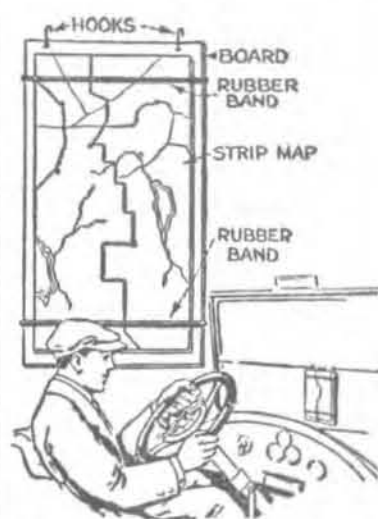

## Planes Gather Mail in Flight from Rope between Poles

Mail bags are pulled aboard with a grapple without halting the planes at non-stop points on a German airline. The

make friends, leadership, originality and impulsiveness of the subjects under observation. These opinions were found to agree very closely except in the cases of frankness and ability to make friends. "Next a large number of business men, school teachers, employment managers and others used to meeting strangers and

pouch is attached to a rope suspended between two poles in an open field. The pilot flies between the uprights and as the plane roars past, the anchor, which already has been dropped, catches the cross rope and the pouch, jerked from the ground, is pulled up to the cockpit as the plane soars to higher levels.

## Windshield Map Holder

The popularity of the strip map for auto tourists makes the holder shown in the illustration a great help. Take a piece of composition wallboard or heavy cardboard a little larger than one strip of your map. Near each corner, at one end, punch a small hole and push a length of stiff wire through it, bending each end to form a hook. Now get two rubber bands for the ends of the board to hold the map in place. Hang the hooks over the windshield so that the map is always in view of the driver and out of his way.

## Kill Disease by Disease

That paralysis may be cured by infecting the sufferer with malaria fever was the belief expressed at a recent medical convention. The treatment, in which one disease is made to cure another, is said to have been tried with success. Blood taken from a malaria patient is injected into the veins of the paralytic who then has attacks of high fever. After eight or ten of these attacks, the patient is given quinine to kill the malaria germs which killed the paralysis bacilli.

[More than 119,000,000 animals were slaughtered for food in this country last year, according to government figures.

## LEGAL ADVERTISEMENTS

IN THE SUPERIOR COURT OF THE STATE OF ARIZONA, IN AND FOR THE COUNTY OF SANTA CRUZ

## NOTICE OF SALE OF REAL PROPERTY—No. 1699

THE STATE OF ARIZONA, Plaintiff, vs. LUZ FLORES, et al., Defendants.

Under and by virtue of an Execution and Order of Sale for delinquent taxes issued out of the Superior Court of Santa Cruz County, Arizona, in an action wherein the STATE OF ARIZONA was Plaintiff and the respective persons hereinafter mentioned were Defendants, upon a judgment rendered on the 1st day of September, 1925, in favor of said Plaintiff and against said respective Defendants for the foreclosure of Plaintiff's tax liens on, and sale of, the respective parcels and land and real estate in Santa Cruz County, Arizona, described on the list appearing hereafter, in satisfaction of the respective amounts of said taxes thereon for the years specified, with interest thereon from date of said judgment at the rate of ten per cent per annum, and the interest, fees, penalties, assessments, and costs, and costs of suit shown on said attached list, with accrued costs;—the years for which the respective amounts of said taxes are unpaid, the persons, defendants in said action, against whom said respective liens were ordered foreclosed, the respective pieces and parcels of land and real estate in Santa Cruz County, Arizona, against which said respective amounts of said taxes were assessed for said years, together with the respective amounts of said taxes, interest thereon to date of said judgment, four per cent penalties, fifteen-cent fees for making back tax books, and costs, being as shown on the attached list thereof appearing immediately after this notice.

NOTICE IS HEREBY GIVEN THAT I will, on the 13th day of October, 1925, at 2:00 o'clock p. m. of said day, at the front door of the Court House in the City of Nogales, Santa Cruz County, State of Arizona, separately sell at public auction, for current lawful money of the United States of America, said respective pieces and parcels of land and real estate belonging to or assessed in the name of said respective defendants, or so much thereof as may be necessary to satisfy the said judgment against the same, with interest and costs, with accruing costs, to the highest bidder, for cash.

Dated this 11th day of September, A. D. 1925.

H. J. BROWN, Sheriff.  
By H. J. PATERSON, Deputy Sheriff.

## FIRE PREVENTION WEEK OCT. 7-10

Since it is his home that every man instinctively goes in quest of absolute safety, there is grim irony, more than a little, in the revelation that somebody's dwelling suffers attack by fire every three minutes, approximately—that the average yearly destruction of homes approaches \$60,000,000. Plainly, the safety that he seeks is not to be found around the average American hearth.

It appears from the published record that four of the six leading causes of fire in the home—defective chimneys and flues, sparks on roofs; stoves, furnaces, boilers and their pipes; and matches an smoking—in-dubitably are preventable by the exercise of proper care and common sense.

The August issue of Safeguarding Against Fire presents complete plans for community observance of National Fire Prevention Week. The National Board of Fire Underwriters,

New York, stands ready to do everything within its power to facilitate the campaign and will welcome communications from fire chiefs, local agents, municipal officials, school authorities, the membership of business organizations and all others who will participate in the event.

Surely a people virile and far-sighted enough to found a nation can muster sufficient intelligence and strength of will to preserve it from the wasting of fire—starting with their homes.

The question now is, "Is beauty skin deep or knee high?"

## NEWS REVIEW OF CURRENT EVENTS

### Honolulu Flight Aviators Are Found Alive Near Island of Kauai.

By EDWARD W. PICKARD

WHEN hope for their survival had been almost abandoned, the five men who comprised the crew of the Honolulu flight plane PN-9 No. 1 were found on Thursday afternoon, afloat on their plane and all well. Capt. John Rodgers and his four companions had been at the mercy of the sea for ten days when they were picked up by the submarine R-4 fifteen miles east of the island of Kauai. This was considerably outside of the zone previously searched; the plane had drifted about 200 miles, passing to the north of Oahu island on which Honolulu is situated. Lieutenant Osborne, commanding the submarine that found the aviators, at once notified the naval authorities at Honolulu, and a later message said the crew and plane were being taken to Nawiliwili on Kauai island.

The members of the plane's crew, besides Captain Rodgers, are: Lieut. Byron J. Connell, assistant pilot, Pittsburgh, Pa.; Skiles N. Pope, aviation pilot, Jackson, Pa.; William H. Rowlin, aviation chief machinist's mate, Richmond, Ind.; Otis G. Stantz, chief radio man, Terre Haute, Ind.

SOMEbody is due to get a sound thrashing in Morocco within a short time, according to current dispatches. It may be the Rifians, against whom the French and Spanish forces are starting a great offensive squeeze movement whose objective is Adjar, the capital of Abd-el-Krim. Or it may be the Spaniards in the west sector, for it is reported that the Rifians have them almost surrounded at Tetuan and that the capital of the Spanish protectorate is in danger of capture.

At the beginning of the week the Spanish, under the personal direction of Dictator Primo de Rivera, undertook to land a large force of troops at Alhucemas bay near Adjar after thoroughly bombarding the Rifian positions on the hillsides. But they apparently overlooked a lot of machine gun nests, for as soon as the legionnaires started wading ashore from the barges a storm of bullets struck them. They fled back to their boats, leaving some 500 dead and wounded. Next day, however, Rivera successfully landed his forces at another point with the assistance of French naval and air units. Sixteen thousand men were debarked and the heights dominating Adjar were occupied. Meanwhile the French were moving up from the south and the prospect was that the Rifians would be squeezed from their mountain strongholds.

From Alhucemas bay Rivera hurried to Tetuan, calling for all available troops from the Mellilla front on the extreme east. He also urged the French to start an offensive in the Ouezzan sector to relieve the pressure in the Tetuan region, where the Rifians had broken through the Spanish line near Arzila and had cut the Ceuta-Tetuan road and railway. The situation there was considered extremely serious by the Spanish commanders.

Colonel Sweeney and other American aviators who make up what is now known as the Sheridan escadrille are fully embarked on their rather inglorious adventure. Already they have made many flights, dropping thousands of tons of explosives on Rifian villages. Their exploits will not arouse general enthusiasm in this country.

THE revolt of the Senussi against Italian rule in Tripoli is gaining in intensity and Mussolini has sent reinforcements of 20,000 troops and 300 airplanes. Rome admits that the Italian forces are being forced back to the coast with rather heavy losses. As has been said before, President Kemal of Turkey is supporting the Senussi, partly because he figures the revolt will embarrass the French in

Morocco and partly to keep the Italians from aiding Great Britain in the Mosul dispute. Sheikh Ahmed, the Senussi chief, is likely to be made caliph of Islam and tender of a general uprising of Mohammedans against Christian domination.

IN OPENING the annual assembly of the League of Nations, Paul Painleve, its honorary chairman and premier and war minister of France, made an eloquent plea for world disarmament, urging the delegates of the fifty-four nations represented to prepare a call for a conference as soon as the European security pact and other regional agreements are concluded. By some this was looked on as another attempt of the league to forestall President Coolidge's plan to call another disarmament conference in Washington, but Mr. Coolidge at once let it be known that his chief concern was that such a conference should be held, that its place did not matter so much, and that he would wait to see if there was any chance for the league conference to materialize.

Paul Loebe, president of the German reichstag, warmly approved of M. Painleve's suggestion but said it did not take the initiative from President Coolidge and he believed the crucial time had come for the latter to carry through his plan.

Senator Dandurand of Canada was elected president of the league for the ensuing year.

Delegate Zahle of Denmark made a proposition that if adopted might increase the opposition in America to adhering to the international court of justice. Briefly, he proposed the creation of a special committee of conciliation, officially attached to the world court, to which all states adhering would be obliged to submit "all disputes without any exception."

THAT quarrel over the Mosul vilayet with its rich oil wells is a hard one for the League of Nations to settle. While Foreign Minister Tewfik Ruzhdi Bey of Turkey, now in Geneva, is pacific in his talk, the Turks generally are freely predicting war if Mosul is taken from them and given to the British under a mandate. Turkish authorities say: "Even British statistics show that the Arabs are in minority in the district England is trying to declare as Arab. England states there are 785,000 inhabitants in Mosul, with only 185,000 Arabs, but 570,000 Turks. Right is on our side, and also the power to fight a separation of part of the country which is wholly Turkish. We are now trusting to the fairness of the League of Nations."

TWO pieces of interesting aviation news come from Europe. One is that Capt. Roald Amundsen plans to fly over the north polar regions from Spitzbergen to Alaska in a dirigible next year and has obtained an airship from the Italian government. The other tells of the consolidation of sixteen of the European airplane lines under German leadership.

CONTINUED drought and extreme heat during August have reduced the indicated yield of corn by 65,000,000 bushels, according to the government's latest estimates. The official guess now is that the crop will be 2,885,000,000 bushels. As an offset to this there is a gain of 21,000,000 bushels in the indicated spring wheat crop, of 75,000,000 in oats, and of 8,000,000 in barley. Winter wheat and rye remain unchanged. South Dakota showed the greatest reduction in corn crop estimate—42,000,000 bushels. Minnesota and Illinois each lost 9,000,000, Ohio, Kansas and Nebraska each showed big gains over the August estimate.

WHILE Lieutenant Commander Lansdowne and three other victims of the Shenandoah disaster were being laid to rest in the national cemetery at Arlington, Colonel Mitchell continued his attacks on the army and navy air services, inviting court-martial or other discipline and General Hines, chief of staff, started proceedings that presumably would give Mitchell his desire. Maj. Gen. Eli Heintz, inspector general, was instructed to make an investigation and began by sending Colonel Nugent to Texas to ask Colonel Mitchell if he

had been correctly quoted, a necessary step preliminary to possible trial by an army court. Secretary of the Navy Wilbur has made no representations to the War department on behalf of the navy. He did, however, reply to one charge made by Mitchell. The secretary said the Shenandoah had not been sent on her western trip in an effort to make up for failure of the polar flight and the Hawaiian flight. A western voyage had been planned months ago, he said, before the Hawaiian flight was arranged and about the same time that the Arctic expedition was agreed upon. Other of the Mitchell charges were denied by army officials, but the rampant colonel reiterated them, and added, "If the War department doesn't like the statements I make, let officials take any disciplinary action they want."

IN THE best of health and thoroughly rested, President Coolidge brought his vacation to a close last week and returned to the White House in Washington, which in his absence had been entirely renovated. Within a few hours of his arrival he plunged again into the business of running the country, holding a cabinet meeting and taking up, among other matters, the distribution of anthracite coal during the strike, the final preparation of the budget estimates and the selection of an ambassador to Japan. It was rumored that Undersecretary of State Joseph C. Grew would be offered the Tokyo post. The day he left Swampscott the President received a visit from Nicholas Longworth, speaker of the next house, who told Mr. Coolidge it would be easily possible to pass the tax reduction bill in the house before Christmas. He said it might be possible to cut taxes more than \$400,000,000.

NEW YORK'S mud-slinging majority primary campaign is about over, which should be a relief to the metropolis, whatever the outcome. The fight between Tammany and the Hylan-Henst combination degenerated into a contest between Governor Smith and Publisher Hearst as to which could say the meanest things about the other and the other's candidate. Last week odds of four to one were offered that Walker would beat Hylan for the Democratic nomination, and there were few if any takers. It is taken for granted that Hylan, if defeated, will run as an independent candidate, and on this largely the Republicans base their expectations of electing their nominee, probably Mr. Waterman.

CHAIRMAN AITCHISON of the interstate commerce committee has been holding hearings in Chicago on the question of increasing freight rates on the western railroads. Fred W. Sargent, president of the Chicago and Northwestern, said the unfortunate conditions under which the western railroads are laboring have a direct and depressing relation to the prosperity of the communities served. A reasonable increase in rates will correct this situation, producing greater general prosperity.

Mark W. Potter, one of the receivers of the Chicago, Milwaukee and St. Paul, proposed there be a 5 per cent increase and that its benefits be pooled among the western roads. Charles Donnelly, president of the Northern Pacific, opposed this as "socialistic, impossible, unworkable and in effect a long step toward government ownership. However, it was said Charles Evans Hughes would support the Potter plan in final arguments before the full commission in Washington.

FRANCE lost one of her most eminent statesmen in the death of Rene Viviani, former premier. He was at the head of the government when the war broke out in 1914, and a year later became minister of justice. In 1917 he accompanied General Joffre to the United States, and in 1921 he came with M. Briand to the Washington conference, in which gathering he was an important figure. He was a moderate Socialist and an anti-clerical, and had much to do with the separation of the church and the state a quarter of a century ago. M. Viviani was premier three times and a minister five times. His ability and his patriotism were of the highest order.

## ARIZONA

For All, All For ARIZONA

State farm loans have been reduced \$36,056.26 during the past year, it is shown by figures supplied by Vernon Wright, state treasurer.

So far has spread the fame of the Yuma Indian band that it is arranging to travel to San Diego, to play concerts for Californians.

Government advisers say there will be ample water for all irrigation projects served by the Colorado river. There has been plenty of rain at the source.

Houston Letcher, one of the country's few "smokologists," is in Jerome to analyze the smokes of local smelters, to determine its effect on vegetation, and to remedy any detrimental effects it may have on plant life.

Dr. B. G. Fox, co-operative United States weather observer at Globe for more than twenty years, recently tendered his resignation to Meteorologist Robert Q. Grant at Phoenix and requested that he be relieved immediately.

Mexican authorities at Mexicali, Baja California, have turned over to Sheriff James Chappell of Yuma county, the \$342 of Gadsden State Bank (lost recovered with the arrest of Jose Maria Martinez on Aug. 10, when he was captured near San Luis, Sonora, after being twice wounded in a pistol battle with rurales under Comisario Jose L. Flores.

C. E. Hann, now serving a term in the state pen at Florence on conviction of having attempted to murder, by shooting, Patrick H. McCullough, is defendant in a \$15,000 personal damage suit, filed by McCullough, who asks the sum for the loss of an eye and the use of one hand, as the result of the load of buckshot fired into his body by Hann.

Building of a railroad track across the Vail road, eleven miles from Tucson, was halted with the issuing by Judge Gerald Jones of the Superior Court of a temporary restraining order after an injunction suit was filed against the Southern Pacific by the state of Arizona. In addition to a permanent injunction, damages of \$5,000 alleged to have resulted from the cutting of the road was asked.

General—A generally improved condition is apparent in industry and employment, especially in agriculture, railway shops, metal mining and building. The surplus of workers is gradually diminishing, largely due to cotton picking now commencing. Industrial plants operating to capacity, sawmills running overtime. Building activities throughout the state are more extensive than usual with practically all resident building tradesmen employed. Considerable construction work affording employment to several hundred workers is under way in the vicinity of Flagstaff. Highway work throughout the state is affording employment to many, chiefly unskilled laborers. Lumbering is above normal at this season; activities somewhat increased in woods as well as at sawmills, which are operating overtime. Increases have recently been made to some of the metal mine forces, and although common metal miners are sufficient, the supply of hard rock underground metal miners is not equal to the growing demands. The \$1,250,000 construction program under way at the Douglas smelters is creating a demand for carpenters, steel workers, boiler-makers, mechanics and brickmasons. Railway shops are operating on normal schedules. Construction of the new \$15,000,000 main line railway east and west through the Salt River Valley is progressing rapidly and affording employment to many, chiefly unskilled workers.

When police heard that a "commotion" was on at a negro revival meeting, investigation was made by a night captain, who found that some of the more enthusiastic had become engrossed with the spirits and were "rolling." No interference was made. Hundreds of whites watched the meeting.

Negotiations by the Tucson Chamber of Mines with the El Paso Smelting Works of El Paso, Tex., bids fair to result in the erection of a milling plant by the smelting company for the purpose of separating lead and zinc ore it was announced by Miles Carpenter, president of the Tucson Chamber of Mines.

Whether the Southern Pacific railroad can require a passenger to wear his coat while being served in the dining car will be passed upon by the Arizona Corporation Commission as a result of a complaint made by Nealy A. Pennington, Tucson. In a long letter to the commission, Pennington charges that while en route to Phoenix from Tucson, Steward T. L. Wooding forced him to put on his coat after first waving him to a seat and saying nothing about his coat.

To have a national monument created including the heads of Canon de Chelly, Canon del Muerto and Monument Canon, in the Navajo country of Arizona, is the project for which Herbert J. Hagerman, commissioner to the Navajos, has secured the consent of the Navajo tribal council, with the understanding that no privileges of the Indians will be thereby impaired. This would include some of the wildest and grandest scenery in the country, taking in ruins which would thus come under the protection of the government.

## MY FAVORITE STORIES

By IRVIN S. COBB

### Guilt on the Very Face of It

A great many persons who know—and admire—the dark stories of E. K. Means are not aware that this author is, at his home in Jackson, Miss., the Rev. E. K. Means, pastor of Galloway Memorial M. E. church, South. He is a zealous clergyman, a gifted speaker, and a fluent writer, but being, as he tells a clergyman, a truthful man also, Mr. Means would be the last person to lay claim to great personal beauty.

As his friend, I feel that I may repeat this story at his expense, especially as he himself told it to me. He had been gazing at my printed likeness and he was reminded of an experience of his own. I quote his words:

"Once upon a time my picture was published in a small weekly newspaper in a village in Louisiana. I was standing in the post office when a farmer entered to get his mail. He opened the little paper and gazed with fascination at my countenance. He held the sheet close to his nose, then extended it to his arm's length, trying to focus his dim eyes on the vision. He fumbled in all his pockets and brought forth his hands empty of the thing he sought.

Then he remarked to the world at large:

"I left my specs home and I can't see who this here feller is. I don't know what he done, neither, but by d—n, he's guilty!"

### Total Loss!

For the first time in the history of the state—it was a southern state—an electrocution took place within the walls of the state prison. The legislature, keeping step with the march of progress and civilization, had ordered the installation of an electric chair to take the honored place of the old-fashioned slip-noose under the left ear.

A negro "trusty" was an unwilling witness to the first performance under the new arrangement. The warden had detailed him as helper to the paid executioner. He issued forth from the lethal chamber with popped eyes and ashen face.

A group of his fellow convicts knotted about him anxious to hear the grisly details. He proceeded to elucidate:

"Well, suzz," he said, with a shiver, "they tucks an' strops you down, hand an' foot, in a big cheer. An' den they clamps some 'll' things onto your waist an' yo' laiks. An' den one of de wite men he step over to whar dey's a little jigger in de wall an' he give it a 'll' yank—zzz—lak dat!"

Here he paused and fetched a deep breath.

"Whut den? whut den?" came the chorus.

"Nothin' but ruin—jes' absolute ruin!"

### Making It Four of a Kind

Judge Isaac Russell, chief justice of the court of special sessions of New York city, went on a private and unannounced tour of inspection among the various corrective and charitable institutions of his jurisdiction. Late in the afternoon he entered the outer office of one of the insane asylums.

"I should like to make a trip through this place," he said to an underkeeper who chanced to be in sole charge of the office temporarily.

Visitors' days are Wednesdays and Saturdays," said the keeper shortly; "and, besides, it's after hours."

"But I insist on being shown through," said His Honor.

"Well, you've got a nerve!" growled the keeper. "Who are you to be givin' me orders?"

"I am Chief Justice Russell of the Court of Special Sessions," was the answer.

"That'll be about all," said the keeper wearily. "We've got three of you in here now. Why don't you call yourself George Washington—there's only one of him?"

"That'll be about all," said the keeper wearily. "We've got three of you in here now. Why don't you call yourself George Washington—there's only one of him?"

### Absolutely No Reason for It

Harry Beresford, the actor, was born in England but has lived long enough in America practically to have recovered from it. One fall a friend sent him two tickets for one of the world series ball games at the Polo grounds, and he took with him to the game a newly arrived Englishman, a distant kinsman and also an actor.

The stranger sat patiently enough through seven innings. The whole riotous proceeding was a puzzle to him but he was too polite to mention it. Then, when the mighty crowd, following the baseball custom, stood up to stretch, he rose, too, and started for the aisle.

"Hold on," said Beresford. "It isn't over yet."

"I was only going to get a cup of tea, old chap," explained his guest.

"You can't get tea now," said Beresford. "The game goes right on."

"You mean to say there is no tea being served?" demanded the Englishman in amazement.

"Certainly not!" said Beresford.

"Well," demanded the other, "what, then, is the purpose of the ball game?"

## SIMPLE FROCKS FOR SCHOOL; FLARE IN COATS PARIS EDICT

HERE'S guessing, Miss Schoolgirl, as to a very important subject which will be receiving your due attention this semester, together with your perusal of Latin, Greek, higher mathematics and kindred kind. Clothes! Aye! there's a study which never loses in interest to the feminine mind. Indications are that the subject is going to prove more fascinating than ever this season.

Of course if you are to prove an apt student in the art of good dressing, it is necessary to first of all aim to wear clothes appropriate to the time and

enough to supply a dash of color. Be it said that these velveteen frocks prove very serviceable.

Bolero effects in misses' fall frocks are being featured, and these insure a youthful aspect. Necklines in daytime dresses are youthful, one might almost say boyish, especially the little turn-down shirt collars with narrow ties or ribbon bows. Sleeves, bared from elbow to wrist, peasant sleeves puffed and cuffed characterize some of the newer gowns.

Let there be a decided flare, so comes the edict from Paris, and the

Pretty Models for Schoolgirl.

the occasion—whether for the schoolgirl may be expressed in one word—simplicity. There is no costume quite so apropos for schoolgirl needs as the one-piece frock, or two-piece if you will, fashioned of fine cloth, navy blue the preferable color. By the way, how good it is to know that navy blue is "the style" this season. In fact all shades of blue are coming in for a successful run, be they chosen as royal, copen, navy or pencil blue.

The frocks here pictured are well chosen models for "first day of school" wear as well as for the time to follow. Smart style places particular stress on the long sleeve. This matter of wrist-length sleeves foretells an incoming era of dainty lace and lingerie, with collar or frilly accessories to match.

thought is visualized in the newer coats and frocks which abound in fullness below the knee, attained through clever insets, shirred portions or circular portions. There is also in the smartest Paris costumes a suggestion of the semi-lifted effect. With all this infusion of refreshingly novel ideas into its styling, it is not to be wondered at that the tailored coat for fall and winter has become a subject of zealous interest in the realm of fashion.

If there is one thing more than another that the new modes teach us it is that even our tailored tops and dresses have departed from the straight and narrow silhouette. As to fullness about the hemline fashionists do not hesitate, but as to whether the flare shall be back or front or all around, is

Example of Coat Flare.

Graceful streaming ties, too, are given much consideration when it comes to designing schoolgirl modes.

Wool rep is a favored medium for the practical frock with bright colored flannels competing in no small degree. Balbriggan, and jersey dresses are at the height of their popularity. The smart new note is sounded in the simply tailored velveteen frock. These may or may not display a quantity of tiny buttons dot so much in a trimming way but as if fastening the frock at the front. Sometimes there are plaid silk facings or pocket flaps, just game?"

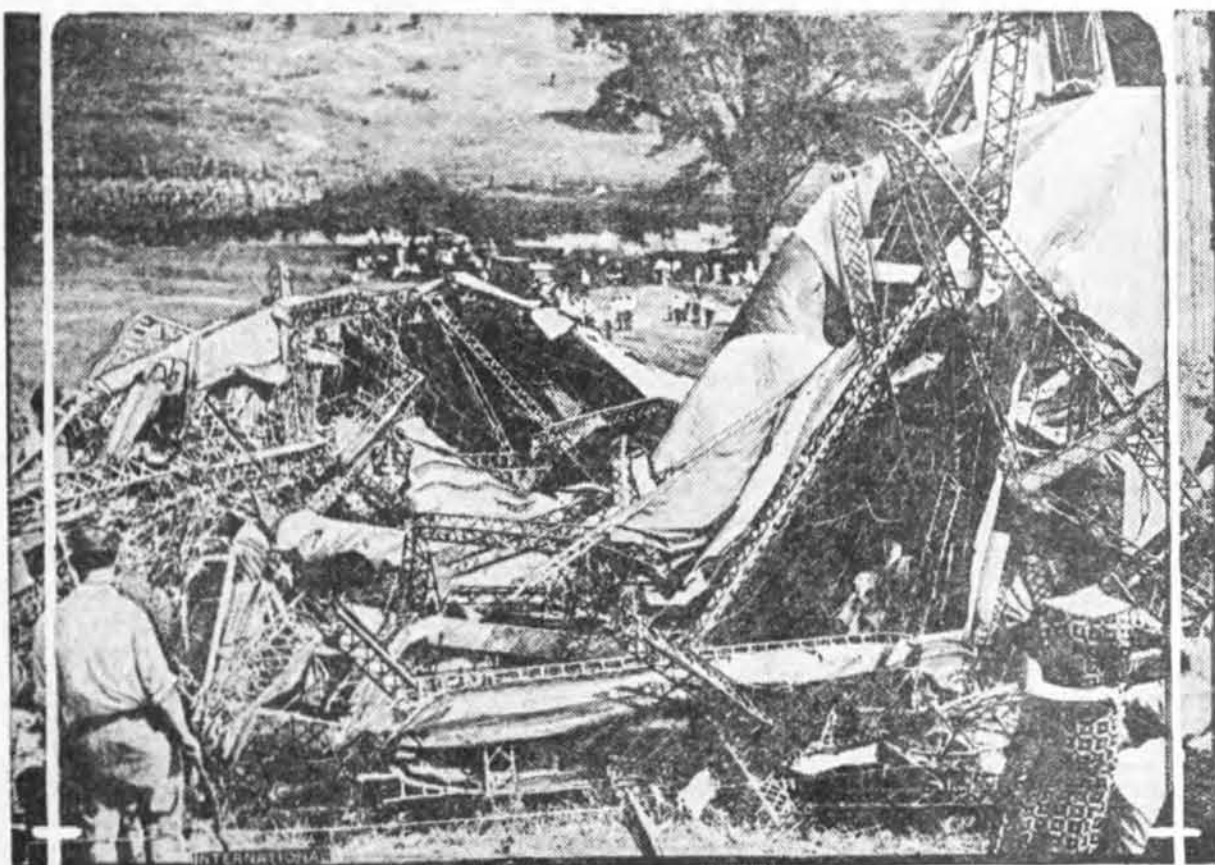

As to fabric, woolen rep is a favored medium. There are many trotteur dresses and coats of navy rep trimmed with details of red, rust, or violet.

JULIA BOTTOMLEY.

## Shenandoah Lying Shattered in Ohio Field

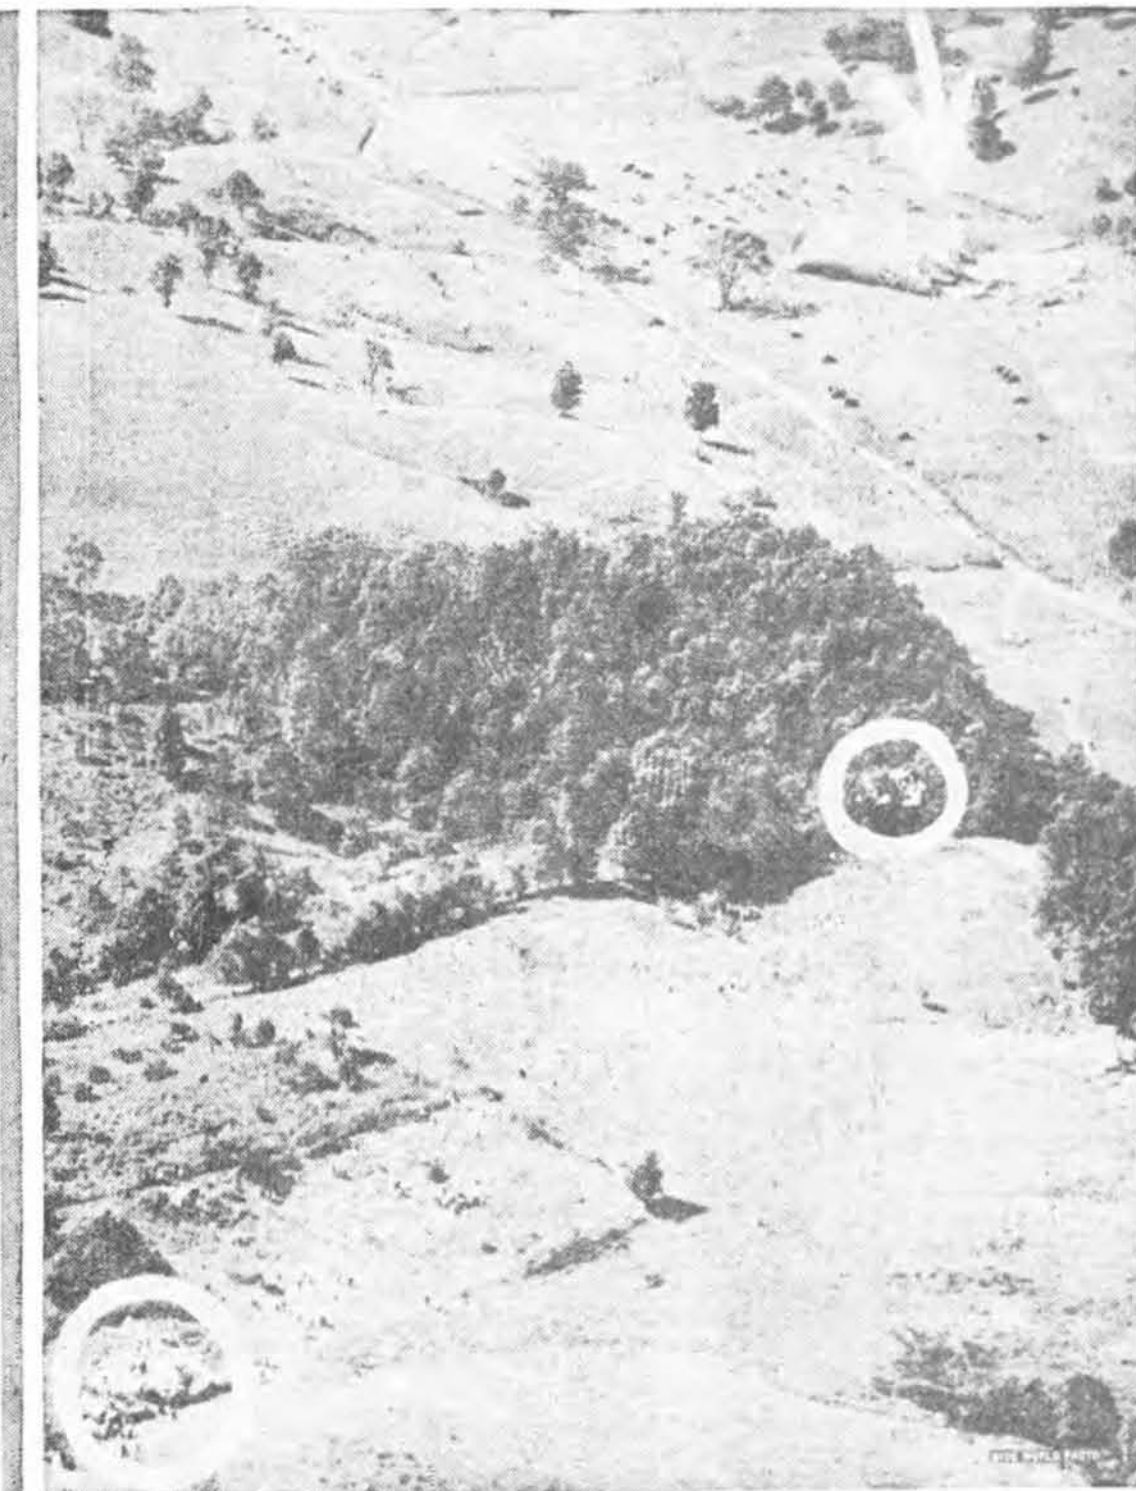

Closeup view of part of the wreckage of the navy dirigible Shenandoah, which was destroyed by a storm in Ohio and fell in three sections. Fourteen lives were lost in the disaster.

## Ruins of the Shenandoah's Rear Section

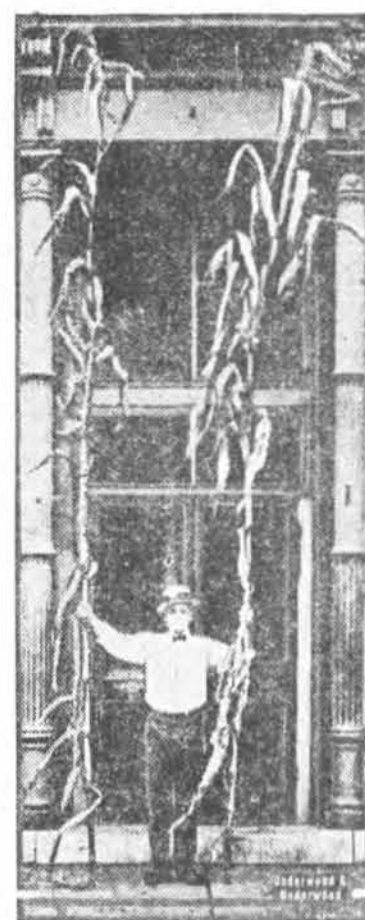

Here is a view of the ruins of the huge rear section of the navy dirigible Shenandoah after her destruction in a storm in Ohio.

## Air Photograph of the Shenandoah Disaster

This remarkable aerial photograph was taken soon after the tragic destruction of the Shenandoah in a storm near Ava, Ohio. The larger portions of the wrecked airship are indicated by the arrow and circles.

## PRIZE CORNSTALKS

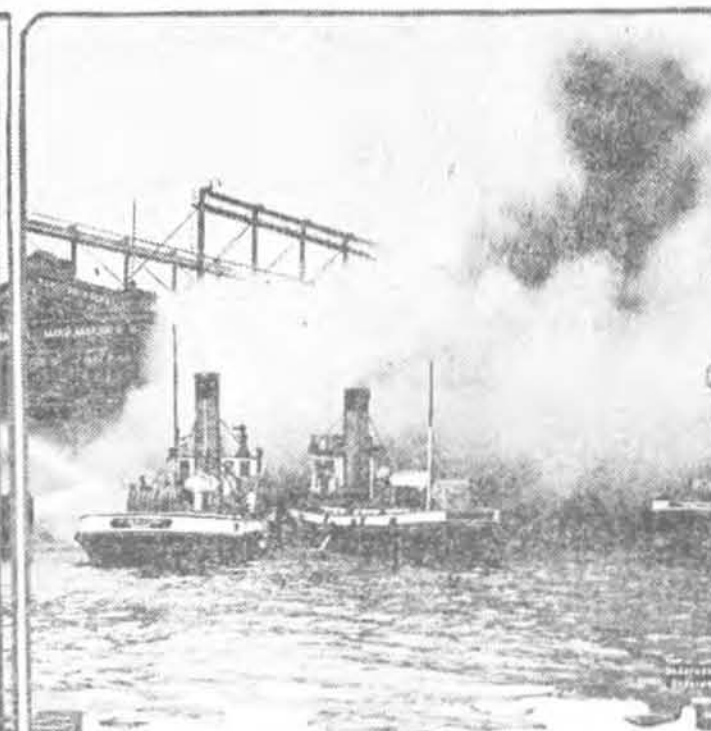

B. H. Hodges, a Carrollton (Ill.) banker, offered a prize for the tallest cornstalks of the new 1925 crop, and D. A. Bushnell of Green county, Illinois, won. He is shown above with the prize-winning stalks, which measured 16 feet 9 inches.

## Prize Winner Greeted by Governor

Governor Silzer greeting the grand prize winner of the Asbury Park baby parade, Norma Dwyer of Elizabeth, N. J. Her treasure ship and pirate costume captured the silver cup.

## Flames Destroy a New York Pier

Scene during the big fire that wrecked the Furness Bermuda pier at Fifty-fifth street and the Hudson river, New York.

## Two Dozen Children, One Each Year

Mr. and Mrs. Jose Sanchez of Yuma, Ariz., who in 24 years of their married life have been the parents of 24 children. Mrs. Sanchez is thirty-eight and her husband fifty-one. Only seven of the children are living. All 24 were born in consecutive years, there being no twins.

## INDIAN SCHOOL HEAD

Miss Georgie A. Collins is assistant chief of Indian schools in the Indian Bureau, Department of the Interior. The work her division does may be visualized when it is realized there are over 100 Indian schools in the United States with more than 35,000 pupils.

## Chiefs at Big Indian Reunion

More than five thousand Indians, members of 16 tribes, gathered in Omaha, Neb., for the recent reunion and festival. Above are shown some of the chiefs of tribes present.

## SUMMONS BY PLANE

Mrs. Henry Glazier of New York hired an airplane and dropped down on her husband who was returning from Europe on the steamship Grasse and served him with a summons for contempt for alleged failure to pay back alimony.

## INDIAN LEAD KING

Chief Tom McCauley, whose Indian name is Run Deer, of the Omaha tribe, is reputed to be worth more than a million dollars. Lead was found on the land the government gave him and he is now called the "lead king."

## Help That Bad Back!

Is a bad back wearing you out? Are you lame, shy, nervous and depressed? Suffer headaches, dizziness and disturbing bladder irregularities? These are often signs of kidney disorder and too dangerous to neglect. Your kidneys keep the blood stream pure. Once they slow up, poisons accumulate and upset the whole system. Why risk neglect? If you suspect your kidneys, give Doan's Pills a trial. Doan's have been used successfully over thirty-five years. Are recommended by thousands. Ask your neighbor!

## A Colorado Case

Mrs. W. H. Reid, 111 W. 3rd St., Leadville, Colo., says: "My kidneys were sore and weak and my back was painful. I used a box of Doan's Pills and in a few days the pains and soreness in my back let up, and after I had used a full box of Doan's, I was cured."

## No Leisure

Thinks—How's business?  
Jinks—Good! I'm as busy as a can opener in a kitchenette.

## COLOR IT NEW WITH "DIAMOND DYES"

Just Dip to Tint or Boil to Dye.

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything!

Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

When looking for lodgings a man must either inquire within or go without.

## Cuticura for Pimples Faces.

To remove pimples and blackheads smear them with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. Once clear keep your skin clear by using them for daily toilet purposes. Don't fail to include Cuticura Talcum. Advertisement.

It's all right to lay up treasures in heaven, but it is just as well to carry a little burglar insurance.

## THE ART OF DRIVING

By Ralph De Palma

© 1925 BY KELLY SPRINGFIELD TIRE CO.

ONE OF A  
SERIES  
OF TEN  
LESSONS

Four—The Cause of Many Accidents

FROM daily observation it appears that many drivers do not know the primary rules of the road, have never learned the use of their imaginations, or acquired any road-sense which is essential to good driving.

One of the least observed rules, but one of the most important, is that which gives drivers on main thoroughfares the right of way over side roads. Non-observance of this rule is the cause of a great number of accidents. The main road has the right of way in every case and when a driver wishes to enter it from a side road he should ascertain that his way is perfectly clear before going ahead.

The motorist travelling along the main road should give proper warnings and, if he is a good driver, his imagination will automatically keep him on the alert against any one attempting to cross his path.

Trolley cars and their passengers are always a possible source of danger. The motorist should always give warning of his coming and govern his speed so that his car can be brought to a standstill almost immediately.

Indication of any change of direction of a car should always be given for the benefit of the driver behind by signalling with the hand. Failure to signal when about to turn across the road may cause nasty accidents, particularly if there are a number of cars closely following.

Another rule which is not so well defined and which depends upon judgment of speed in relation to distance, and also upon etiquette, is that of cutting-in. The motorist who deliberately takes another man's road is beyond the appeal of etiquette and must be left to the police. There are, however, a number of drivers who cut-in from sheer ignorance. Cutting-in ahead of another car should not be done unless it can be accomplished without forcing the car passed to reduce its speed.

#### HIGH LIGHTS IN THE NEWS

Those who contend that women are talkative must admit that there are often striking exceptions. For instance, Mrs. Mae E. Nolan, congresswoman of California, whose term expired some time ago, served more than two years in the House without making a speech.

The City College of New York has installed a miniature soap factory for the technical training of a certain group of students. The output will not be a highbrow perfumed product, as might be expected, but a piebald article for laundry use. Graduates will probably receive the degree of B.S.M. (bachelor of soap making.)

Virginia Sassis, 14-year-old girl of Sistersville, W. Va., won a prize for an essay on "Evil Effects of Tobacco." Her father is a prominent tobacco dealer.

#### FOR OVER 40 YEARS

### Things That Pleased Me Most On a Cruise Around the World

By PROFESSOR RISSEY PATTY  
Member of Faculty, Coe College, Cedar Rapids, Iowa(C) 1925 Red Star Line—S. S. Belgeland World Cruise Photos  
A HOLY MAN WHO SITS ON SPIKES

THE calm devotion with which the holy men of India apply themselves to their self-imposed punishments, such as sitting all day on a bed of sharp spikes, is a source of wonder to travelers. To the western mind their method of expressing their piety seems a futile one, but among their fellow-Hindus they are regarded with veneration.

Martinsburg, W. Va., has a "blue law" which prohibits the sale of soft drinks on Sunday by drug stores, although permitting the filling of medical prescriptions. A resourceful citizen outwitted the lawmakers by presenting a duly signed doctor's prescription calling for an ounce of cocoa and five ounces of carbonated water, "to be taken immediately." He got it.

Billy Lawrence, 3-year-old child of Port Huron, Mich., is attracting much attention on account of his mental attainments, which include the ability to read, recite much poetry, recognize any tune he has heard once and spell many difficult words.

W. G. Bignell of Swinton, England, when sentenced to death for murder, said it was "a very good verdict," which apparently makes it unanimous.

#### FAIR DANCE SATURDAY NIGHT

Don't forget, good people, that there will be a dance tomorrow (Saturday) night at Sonoma Fair Hall. There will be good music and a large crowd is expected to help swell the funds for the fair association. Everybody is invited.

Just when the world was hoping to abolish war by abolishing the cause of war, along comes Admiral Fluke and says that women are the cause of war.

Isn't it queer that an alienist's honest convictions always happen to agree with the side that employs him?
