PATAGONIA'S RAILROAD SERVICE

For some time the railroad service through Patagonia has been anything but good. Now it is rumored that the Southern Pacific company is contemplating running a freight train once a week each way—or discontinuing the service entirely.

July 1st, this year, the mail contract held by the railroad company was taken from it and given to a star route operator, through the efforts of the Arizona Corporation Commission, following protests by the Patagonia chamber of commerce and private citizens.

Again we are called upon to make formal protest to the corporation commission to prevent the elimination of railroad service. If the railroad company discontinues its everyday service our merchants will suffer through loss of adequate express and freight service to conduct their establishments profitably.

The freight business originating in Patagonia has been profitable to the railroad company and we see no legitimate reason why we should allow a change for the worse without doing our utmost to prevent it.

Customer—I see you have a sign in your store, "We aim to please."
Clerk—Certainly; that is our motto.
Customer—Well, you ought to take a little time off for target practice.

MINE DEVELOPERS A NATIONAL ASSET

Mining can never be entirely divested of the speculative element. Metal values fluctuate. Ore bodies are exhausted and overestimated. Metal recoveries are dependent on human ingenuity and watchfulness, that may sometimes sleep on the job. Enthusiasm may lead to extravagance or the ore may not justify big investments.

But there is just about as much of a gamble in farming or in business as there is in honest and scientific mining. Mine developers are generally men of broad vision, energy and initiative. They have left their mark on this country from each to west.

The metal mining industry is an asset to any state. Development of this natural resource should be carried on along intelligent and progressive lines, with full encouragement by both state and national governments. Modern mining and milling methods are adding to the opportunities for old and new development in many western states, and particularly in Arizona, with resultant benefits to the country.

COMMUNITY SERVICE BADGE

The town without a newspaper represents a community without a considerable quantity of that thing called SERVICE. Without a service back of each transaction, sales begin languishing, customers begin going to neighboring towns where the "Service Badge" makes its weekly appearance with advertising telling of the community service being rendered by each business house. Mail order catalogs load up the mails.

The young fellows drift over to the "live towns" where they can find jobs and room to grow. Here and

there a empty building appears on the street that once presented a solid front of retailing before the local newspaper was forgotten and goods began turning green on the counters. A place of retail business must be something more than a mere order-filler for calico, sugar, nails, shaves, pills, gas, etc. It must give something, as well as take something, and it must be surrounded by neighboring and cooperating businesses that look upon their community in the same light. "Community pride" and "community spirit" must be built into a town. Nothing but a spirit of service developed by the newspaper has some of it. Every community without its newspaper has practically none of it. Ordinarily, the live town that goes ahead is born with a newspaper as its mouthpiece and service badge.

FACTS, BASIS OF INTELLIGENT OPINION

It is the goal of each of us, no matter what our politics, to arrive at intelligent opinions on all affairs that concern us, and many more besides. We try to consider all the facts in each case, weigh them, and finally come to some sort of conclusion. We do attempt to judge wisely, and, in our own minds, arrive as nearly as possible at the truth, that greatest of all human ideals.

Our circle of concern has materially widened in the last few years largely due to the great war and subsequent activities in international affairs. Our newspapers devote much more space to world problems and foreign events, and Americans, collectively as well as individually, are coming to know more about other countries and other peoples. We are forming opinions on these matters.

When we try to form conclusions on problems in the international field,

MICKIE SAYS—

IT HAPPENS EVERY DAY IN THE YEAR! I MEAN FOLKS GOIN' OUT O' TOWN FOR THINGS THEY DON'T KNOW THEIR HOME MERCHANTS HAVE—NOW IF I WAZE RUNNIN' A STORE, EVERY TIME I GOT IN ANYTHING OUT OF THE ORDINARY, I'D USE THE COLUMNS OF THE HOME PAPER TO TELL FOLKS ABOUT IT

we are frequently at a loss for basic facts to guide us.

This condition occasions much of the interest in the plans for the Walter Hines Page School of International Relations that is to be founded at Johns Hopkins University. This pioneer agency for studying world affairs will have one object—find the facts, the accurate, impartial facts, and make them available so that sound opinions may be formed.

If you can't boost this mining camp, don't knock it. It's going to boom!

America Leads Nations In Use Of Ice Cream

If any one food may be considered as America's national dish, it is ice cream. Ice cream is a food particularly adapted to the needs of individuals of all ages, giving as it does the best type of nutrients for the repair of bone, teeth, blood and muscles and for energy.

Today thousands of housewives make their own ice cream. As a consequence, the making of this highly nutritious food at a reduced cost, yet without in any way impairing the product, is of importance. Home economists have found a remedy to this end in the use of evaporated milk. There are three important reasons why evaporated milk makes the best ice cream, they point out. Because 99 per cent of the natural water in evaporated milk has been removed by evaporation, there is over twice the percentage of solids present in this type of milk than there is in ordinary market milk—and, since it is the solids that give ice cream its pleasing flavor, this fact is of moment.

AIMEE GETTING TANGLED IN WEB

Los Angeles, July 5.—Aimee Semple McPherson, Angeles Temple evangelist, has been identified as the woman who accompanied Kenneth G. Orniston, former radio operator at the temple, when he drove his automobile into a Salinas garage early on the morning of May 29, eleven days after the evangelist had disappeared at Santa Monica, Joe Ryan, deputy district attorney, declared when he appeared as a witness at the close of the county grand jury session late today.

Do Something On The Colorado River!

Elect A Man To Congress Who HAS DONE SOMETHING! Senator H. A. Davis introduced the Arizona Declaration against Mexican priorities to Colorado River waters. He also secured authorization for the valuable survey of Arizona's irrigable lands in the basin.

NOTICE FOR BIDS FOR THE ALTERATION OF THE BUILDING FOR THE USE OF THE PATAGONIA UNION HIGH SCHOOL.

Notice is hereby given that sealed bids for the alteration of the building for the use of the Patagonia Union High School and for the building of outbuildings and other necessary repairs will be received at Patagonia, Arizona, by the Clerk of the Board of Education of the Patagonia Union High School on or before Wednesday, July 28th, 1925, and up to 6 o'clock P. M. sharp on the said day.

Such bids shall be for the purpose of removing partitions, placing swinging doors between rooms, swing all doors to open outside, place ventilators between rooms to insure proper circulation, screen doors and windows where screens are missing, place one outside door in each room with all other openings to be windows, build steps from the front of the building into the street.

Further information as to the specifications for the above work may be obtained from Mr. R. A. Campbell, President of the Board of Education Patagonia, Arizona, where the said building may be inspected at any time for the Patagonia Union High School, by those interested in the bidding.

All bids must be accompanied by a cashiers check for Fifty (\$50.00) Dollars as a guarantee that the successful bidder will enter into a contract with the Board of Education of the Patagonia Union High School.

The Board of Education reserves the right to let the contract to the best responsible bidder, and further reserves the right to reject any or all bids whatsoever, and each bid must be accompanied by a copy of this notice.

J. R. GOLLIE, Clerk of the Board of Education, Patagonia Union High School, Patagonia, Arizona, Published July 16, 23, 1925.

NOTICE FOR BIDS FOR TRANSPORTATION OF HIGH SCHOOL PUPILS TO PATAGONIA UNION HIGH SCHOOL.

Notice is hereby given that sealed bids for the transportation of the High School pupils to the PATAGONIA UNION HIGH SCHOOL over the route hereto specified, for the school term commencing SEPTEMBER 8th, 1925, and lasting for a one and one-half (1 1/2) school months of twenty (20) days each, will be received at Patagonia, Arizona, by the Clerk of the Board of Education for the Patagonia Union High School, on or before Wednesday, July 28th, 1925, and up to 6 o'clock sharp on said day.

Such bids must be for the purpose of transporting pupils to the Patagonia Union High School from the various school houses along the main highway through Elgin and Sonoita to Patagonia, a distance of approximately 19 miles, and return along the same route. Said transportation bus to pick up any and all eligible pupils who present themselves along the route at the schedule time. Bus to run on a set schedule which will load the pupils at the Patagonia Union High School not later than 8:00 A. M. and to leave on the return trip not later than 4:30 P. M. unless specially arranged for, and to run every school day.

Bids for this transportation to be by Martin-Parry "Safeliner" body on an extended chassis of any standard geared type. Body to be style No. 600, length 11 inches, width 58 inches, height inside 57 inches, wheel base with extension 135 inches, longitudinal seats with seating capacity for 25 children or 18 adults.

The successful bidder must contract to keep bus in good running condition at all times and to furnish all necessary oil, gasoline, tires and repairs for the same, free of all charge to the PATAGONIA UNION HIGH SCHOOL district.

Successful bidder must abide by all rules of the Corporation Commissioner of this State as to vehicle insurance, etc., and must keep the expense of the same.

Bids must be made on a monthly payment basis, based on a school month of twenty (20) school days. Bidder to make such report to the Clerk of the Board of Education as may be requested.

All bids must be accompanied by a cashiers check for Fifty (\$50.00) Dollars as a guarantee that the successful bidder will enter into a contract with the Board of Education of the Patagonia Union High School, and a bond of One Thousand (\$1,000.00) Dollars will be required from the successful bidder to insure the faithful performance of the contract.

The Board of Education reserves the right to let contract to the best responsible bidder, and further reserves the right to reject any and all bids whatsoever and each bid must be accompanied by a copy of this notice.

R. GOLLIE, Clerk of Board of Education, Patagonia Union High School, Patagonia, Arizona, Published July 16, 23, 1925.

Official Proceedings of Bd. of Supervisors

Upon motion duly made and carried, the Board of Supervisors heretofore known and designated as Morley Precinct No. 16 is hereby discontinued and all persons formerly registered in said precinct shall be re-registered and vote in Harshaw Precinct No. 5. The County School Superintendent advised the Board of Supervisors that the following school districts: Washington Camp No. 12 and Morley No. 16 were subject to be listed on account of insufficient attendance. Upon motion duly made and carried, the Board ordered the above school districts, No. 12 and No. 16, listed in accordance with Paragraph No. 2527 of the Revised Statutes of Arizona. The County School Superintendent also notified the Board that she had ordered the County Treasurer to transfer the balance in the No. 12 District fund of \$252.97 and the balance in the No. 16 District fund of \$99.84 to the general school fund of the county, as provided by Paragraph 2823 of the Statutes. This action was approved by the Board of Supervisors. There being no further business to come before the Board, they adjourned to meet July 30th, 1925. Attest: A. DUMBAULD, Clerk.

Weeds and Insects Work Together Garden from neighboring weed borders. Cabbage pests live on wild mustard, shepherd's purse, and related weeds. Destroy the weeds. Just as soon as any crop is gathered spade up the ground, bury the old remains deeply and plant something else.

The Newspaper— America's Market Place

AN OLD form of calamity befell New York city in the autumn of 1923. It was neither fire, flood nor famine. There was neither rumor of war nor suggestion of riot. Yet into this peaceful picture there suddenly descended a kind of community paralysis that filled multitudes with dismay.

What had happened? Merely that for the first time in two centuries New York found itself without its usual newspapers. A pressroom strike had halted their publication.

On that day there was no paper on the doorstep. The news stands were unnaturally bare.

Why was this experience so disconcerting? Because, says a booklet issued by the Bank of the Manhattan company entitled, "News and Progress," it cut off the city from the outside world—not physically, but mentally; it even cut off the residents of the city from knowledge of each other, because people have come to rely almost entirely on the papers for their local news. One may be in a room with a number of others, but if the lights go out one feels strangely alone. When the newspapers suspended, co-operation became difficult—in some cases impossible.

The newspaper is in itself a remarkable example of voluntary co-operation. Not only is it a complex fabric woven of the labors and abilities of hundreds within its plant and of thousands on the outside, but it usually is a part of one of those great associations of newspapers through which the news of the world is daily gathered, exchanged and made available to all.

Not less significant and quite as important is the triangular co-operation between publisher, advertiser and public. Once it ceases, publishing, merchandising and buying all languish and the wheels of progress stop.

When it is considered that there are 45,000,000 copies of each issue of 13,400 newspapers entering every home, office and workshop of the land, we begin to realize the vastness of this co-operation. We begin also to sense the extent of the constantly renewed influence which brings our millions of people into continuous conscious touch with each other.

If it be true that modern conditions of life have created the modern newspaper, it is no less true that the newspaper has played a leading role in creating modern conditions of life. This has been the case as to habits of thought, political developments and matters of religion, science and culture, but it has been true in even greater degree in the field of material progress.

When a carrier leaves a paper on a doorstep it may not occur to him that he is playing a part in the economic life of his town, but so it is, for to each individual subscriber he is really delivering the market place of the community.

Follow a newspaper into any home. Here are gathered the members of the family circle—father, mother and children. Within a few hours each will read it and for each there must be that which he is most interested in reading.

To this wealth of information each member of the family will respond and each in his peculiar way. Only to one part of the newspaper will there be any degree of common response because that part has a universal appeal. That part is the advertising columns. In these, could the editor view the reception of the paper, he would find that others—the advertisers—were supplementing his labors

by providing for tastes and needs outside his province.

There is another important aspect of the newspaper as the market place of the community which is often overlooked; that is, the saving of time. Instead of trudging from store to store in search of clothing, shoes or any of the numerous other articles of modern commerce, the consumer turns instinctively to the advertising columns of the newspaper for information to guide him by the most direct route to the desired product. Thus wasted time is eliminated.

As the market place of the community the advertising columns of the newspaper yield even greater values, which, while ultimately social in their outcome, are founded upon a firm economic basis.

For example, if America has become a nation of home-owners, it is due in large measure to the persistence with which the desire for home ownership has been stimulated through newspaper advertising. A man with property to sell might rub elbows with several possible customers in the course of ten minutes' walk, but he could not buttonhole them one after another, for busy modern life does not permit it. But finally the real estate merchant awakened to the fact that all these unlabeled passers-by were alike in one important respect—they were newspaper readers.

Similarly, in the field of banking and in the promotion of individual thrift the advertising and news columns of the American newspaper have worked a magic transformation. Compare the atmosphere of the average bank today with that of a quarter of a century ago, before the banker had come to realize that the newspaper was a market place.

The public utility field offers still another striking example of how the newspaper as the market place of the community has been utilized not only to sell goods and service but to promote popular understanding and good will. It has been estimated that newspaper advertising has shortened by one-half the process of selling the services of such utilities.

As in the case of banks there has come a complete transformation in the attitude of the public utilities toward the public and in that of the public toward them. The old-time suspicious and antagonisms, now rapidly disappearing, have been replaced by a

spirit of co-operation. This new spirit has found expression in many ways, not least among them being the widespread and rapid growth of the customer ownership movement.

The American newspaper is, by its very nature, a local institution. Its own community's mirror, voice, market place and leader. But, just as America is a national community, composed of thousands of local centers, so the American press as a whole is a unit formed by nearly 14,000 local papers which reflect the national life.

In this capacity newspapers together perform a nation-wide economic service comparable to that performed by each for its own community. Connected up for the transmission and exchange of news they form a national market place in which knowledge of the goods of any locality may be found.

How prodigious is the volume of newspaper advertising in facilitating this process is disclosed by the fact that of the \$750,000,000 used in such advertising in 1925 nearly one-third was paid by producers of goods which are distributed throughout the nation.

Visit where he will, the traveler will find in the show windows of almost any town the same makes of safety razors, toilet powders, cold remedies, hand creamers, men's hats and clothing, women's wear, shoes and other commodities with which he was familiar in his home town. Indeed, it may be hard for him to realize, in the face of such display, that he actually has traveled at all.

Just as our newspapers have unified our thoughts, aims and ambitions, so have they made possible the distribution and the sale of our national merchandise.

In much the same manner that an important piece of news of interest to all is, in a single day, broadcast to every corner of the land, so can the message of a product be distributed by the advertiser. And it is now an accepted fact that this message also is "news."

Katodiscopes as it appears to be, our civilization is a stable civilization, nevertheless. How can stability exist amid such diversity? It could be destroyed if any large part of the American people become deliberately perverse.

In this larger sense the American newspaper constitutes the nerves of our entire social system.

Soft Pork Caused by Improper Feed

Fats of Peanuts, Soy Beans, Rice and Corn Strikingly Softening.

(Prepared by the United States Department of Agriculture.)

From the results obtained to date in the experimental work relating to the "soft-pork problem" it may be concluded, says the United States Department of Agriculture, that the wider the ratio of softening fats in the ration to the carbohydrates and protein from which synthetic fat is formed the firmer the carcass. It is evident that the fat formed from carbohydrates and protein is always materially harder than that derived from the fats of peanuts, soy beans, rice and corn, all of which are strikingly softening.

Mixture Favored.

A mixture of corn meal 5 parts and peanut meal 1 part fed with or without supplementary minerals to pigs starting at 80 pounds and making gains of about 100 pounds in 9 or 10 weeks produces, in the usual case, hard or medium-hard hogs. When the corn meal is reduced to 2 parts to 1 of peanut meal either soft or hard hogs may result. The feeder is cautioned not to use this combination unless he is willing to accept any consequences that may come from offering soft hogs to the market.

The progress made in the solution of the soft-pork problem is discussed in Department Bulletin 1407, just published by the United States Department of Agriculture in co-operation with the agricultural experiment stations of Alabama, Arkansas, Georgia, Indiana, Kentucky, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas. Some conclusions regarding the feeding of various feeds in different combinations are listed in the bulletin. They do not, however, represent all of the results actually obtained during the progress of this work. Many other questions involved in the problem are being studied and a great mass of valuable data pertaining to them has already been obtained.

Progress Made in Solution.

The progress made in the solution of the problem in its more practical aspects has come through the definition and establishment of certain basic facts associated with the normal process of growth and fat formation in the hog. These facts pertain to the relative softening or hardening properties of the feeds concerned in the desired combinations and the reasons for such properties; the influence of the stage of development or size at which a given ration is fed, and the influence of gains on the rations.

A copy of this bulletin may be secured as long as the supply lasts by writing to the United States Department of Agriculture, Washington, D. C.

Alfalfa Cut Early Will Give the Largest Yield

Prof. C. J. Willard of the Ohio experiment station is opposed to the full-bloom stage of cutting alfalfa on the ground that a considerable number of the lower leaves begin to drop off soon after the tenth-bloom stage has been reached, and since the leaves are much richer in protein than the stems he holds that late cutting brings about too great a loss of the most valuable part of the plant to justify the practice. "The safe way," says Professor Willard, "to get the largest yield of alfalfa with the greatest feeding value per pound is to cut in early bloom. Eight years of experimenting have shown that alfalfa cut just before bloom will average 45 per cent leaves while that cut when it has reached the seed stage will average 28 per cent leaves. The remaining 72 per cent of the plant at the seed stage is stems, low in protein."

Farm Hints

In transplanting any of the onion tribe, snip off half the leaves.

Make succession sowings of beets, lettuce, late peas, beans, and radishes.

Any kind of millet hay fed in large quantities for a very long period of time is liable to be injurious to horses.

Young pigs will start to eat at an early age if they are allowed access to a self-feeder with corn, shorts and tankage.

Farming population in the United States, according to reports, constitutes one-third of the total population of this country. This one-third owns one-fifth of the nation's wealth.

Alfalfa wilt is a new disease which is killing out fields. If the stand becomes so poor that the crop is not profitable, fields should be plowed. It is not advisable to return such land to alfalfa or sweet clover for several years.

The feeding of only alfalfa and skimmed milk to dairy calves is not entirely satisfactory. A mixture of equal parts of alfalfa hay and prairie hay will probably give better results since leafy alfalfa fed in connection with skim milk sometimes causes scours.

Apple Blotch Easy to Cure by Sprays

Bordeaux Mixture or Lime Sulphur Favored.

(Prepared by the United States Department of Agriculture.)

Apple blotch, a destructive fungous disease attacking many of the leading varieties of apples, may be controlled by spraying with bordeaux mixture or lime-sulphur solution, according to the United States Department of Agriculture. Trees of susceptible varieties, unless systematically sprayed, are frequently killed by repeated attacks by the blotch on twigs and leaves, and nursery stock is often seriously damaged, says the department.

The disease, which is most severe in southern and middle-western orchards, was given the name "blotch" because it describes the characteristic spots appearing upon the fruit. As the disease progresses there is a running together of several spots and a change in color to a deep brown or black. A cracking of the fruit, usually in three directions from a central point, is very common. Small, newly white spots and dark, sunken, oval areas appear on the leaves, but only under extremely favorable conditions does blotch become a serious foliage disease.

Thorough sprinkling of thick, bushy trees is difficult or impossible, and these should be pruned before treatment. The spray is most beneficial when applied as a fine mist rather than a coarse stream. The latter is likely to injure both fruit and foliage, especially in the spring. Where blotch is only a minor disease the department recommends the use of lime-sulphur solution diluted at the rate of 1 1/2 gallons to 50 gallons of water. However, if a fruit loss of more than 10 per cent has been caused by blotch during the previous year, the application of bordeaux mixture is advisable.

Farmers' Bulletin 1479-E, "Apple Blotch," just issued, contains much valuable information relative to the nature, economic importance and treatment of this disease. A copy of the publication may be had free, while the supply lasts, upon application to the United States Department of Agriculture, Washington, D. C.

Good Whitewash Recipe for General Farm Work

Numerous inquiries are received by the extension division of the North Carolina State college about the best whitewash to use for the henhouse or other outbuildings. The requests are particularly numerous during the summer. The following directions may give an effective whitewash.

"Shak a half bushel of quicklime or lump lime with boiling water, keeping it covered during the process. Strain this and add a peck of salt dissolved in warm water, three pounds of ground rice boiled in water until it is a thin paste, a half pound of Spanish whiting and a pound of clear blue dissolved in warm water. Mix these together well and let the mixture stand for several days. Heat it and apply as quickly as possible with a whitewash brush.

"Alum added to whitewash will make it stick better. Use an ounce to a gallon. Molasses makes the lime more soluble and makes it penetrate the wood or plaster more deeply. Use a pint of molasses to a gallon of whitewash. A pound of cheap bar soap dissolved in a gallon of boiling water and added to five gallons of thick whitewash will impart a gloss like that of oil paint."

Don't Neglect to Paint

Various Farm Buildings

There is probably no one other thing that the average farmer neglects more than the judicious use of paint. The idea seems to be prevalent that paint is used primarily to beautify. Its use is regarded as a luxury rather than as a necessity. Paint does, of course, improve the looks of farm buildings, but it is far more useful as a means of protection, says the Indiana Farmer's Guide. Paint and varnish, while beautifying the home will at the same time lengthen the life of a valuable piece of property.

Paint is an economic necessity. It has been said that the life of a frame building will be lengthened from two to four times by constant painting. An inherited property, whose worth is beyond valuation, or a house that cost much to build may be preserved indefinitely, if it is properly painted. It may easily get beyond the painter's ability to save. Plasterers, carpenters and laborers, will cost nine times the price of the first "stitch," and in the end the painter will have to follow them.

Eradicate Burdock With Waste Crank Case Oil

The proper use of the waste crank case oil will soon rid a farm of burdock. The oil is cheap and may be secured in abundance from neighborhood garages. It is a real pleasure to watch this persistent pest give way to treatment with the waste oil. Any time before the hard stalk forms, the dock leaves should be shaved off even with the ground with a sharp hoe. On the stub, pour a little of the waste oil from a teapot or other suitable container. One application seems to kill and rot the roots of the plant. Those who have had a lot of trouble keeping the burdock down ought to enjoy using the waste oil.

FIRST to have a proving ground

Three years ago General Motors purchased an 1125-acre tract, 40 miles from Detroit and accessible to all its car and truck divisions.

This was transformed into a great Proving Ground, with every kind of road and grade over which an automobile is called upon to travel.

Here the collective experience and brains of the whole General Motors family are brought to bear upon the problems of each member; and here each make of General Motors car must prove itself against the best that American or European genius has developed.

The Proving Ground marks a forward step in the guarantee of motor car satisfaction. It is your final assurance that you are investing when you buy a General Motors car.

The Best Critics

"Saint Beuve was a good critic, but the best critics of all are our wives," said Dr. William Lyon Phelps of Yale, in the course of a literary esmerle. "A man," he went on, "looked up from his book the other night and said to his wife excitedly: 'Do you know what I'd have done if I'd been Abe Lincoln?' 'Yes, George, I do,' said she. You'd have settled down in New Salem in some small business or other, and spent the rest of your life growling about hard times and lack of opportunity."

Statesmen All Over

"I notice in some of these august deliberations one statesman, after an exchange of billingsgate, will invite another statesman to step outside." "Ever hear of one stepping outside?" "No." "Nor I. What do you think of our penman prospects this year?"—Louisville Courier-Journal. Many a woman's hair is not as golden as it is plaited. Perhaps time is money, because it manages to slip away so fast.

3 o'clock in the morning - no sleep yet!

INSURE your sleep against the pest of mosquitoes and early morning flies. Spray Flit.

Flit spray clears your home in a few minutes of disease-bearing flies and mosquitoes. It is clean, safe and easy to use.

Kills All Household Insects

Flit spray also destroys bed bugs, roaches and ants. It searches out the cracks and crevices where they hide and breed, and destroys insects and their eggs. Spray Flit on your garments. Flit kills moths and their larvae which eat holes. Extensive tests showed that Flit spray did not stain the most delicate fabrics.

Flit is the result of exhaustive research by expert entomologists and chemists. It is harmless to mankind. Flit has replaced the old methods because it kills all the insects—and does it quickly.

Get a Flit can and sprayer today. For sale everywhere.

Marked Era in West

The first United States land office was opened in Detroit, under an act of congress passed March 26, 1834, says the Chicago Journal. Detroit was then a frontier village with only a few hundred people, and all around the town and westward to the Pacific the land was still in possession of Spain. Here were millions and millions of acres of fertile land awaiting settlers.

The opening of the Detroit office was a momentous event in the history of the republic, for it marked the beginning of the regulated settlement of the mighty West. Uncle Sam's first land office, housed in a hut, was destroyed by the fire which wiped out Detroit in 1815.

Riding Log Carriage

"If you can picture a small truck traveling back and forth in a space about 40 feet long, and reaching a

maximum speed of 45 miles an hour at every trip, then you have some idea of the terrific strain men riding the 'carriage' in a saw mill work under," said a man just arrived in Detroit from an upstate lumber town. He said the carriage was used to carry the logs to the saw and was operated by a system of levers. Two men "ride the carriage," one to catch the logs with "dogs" as they are rolled onto the carriage and the other to gauge the thickness of the boards cut.—Detroit News.

GOV. GEO. W. P. HUNT

Who has announced his candidacy for the Democratic nomination for the governorship of Arizona for the sixth term.

EDWARD SHEEHY AND MISS RITA MALONEY WED

Miss Rita Maloney, daughter of John Maloney, Arizona pioneer mining man, of Ruby, Ariz., and Edward Sheehy, customs inspector at Ajo, were married in Tucson July 7th by Rev. Fr. Timmerman at St. Augustine Cathedral. The wedding was informal, but was attended by a large group of friends and relatives.

Attending the young couple were Miss Catherine O'Donald, niece of the bridegroom and J. W. Taylor, brother-in-law of the bride.

Soon after the marriage service Mr. and Mrs. Sheehy left Tucson by motor for San Francisco and other coast points. They will be at home in Ajo late this summer.

Happy Wedlock Sure Thing If Bride Is Cook

By KATHRYN ST. JOHN

Haphazard meals yearly ruin thousands of marriages. Most marital ships would maintain an even keel if brides knew cooking.

Many of the first year's troubles between newlyweds would be avoided if the wife were capable of preparing foods with an experienced hand. Wives are to blame for the failure of many business men in the final analysis. The business man's health depends a great deal on what he eats. And it's up to his wife to see that he gets the right kind of food. A healthfully balanced diet goes a long way toward making the tired business man less fatigued.

The expert home manager sees to it that her husband never comes home to a delicatessen lunch. There is a carefully planned meal waiting for him. The good housewife knows that an unbalanced diet means trouble and avoids it. Likewise, she appreciates the fact that variation in her menus is important. In this connection the following recipes have been selected as an aid to the home manager:

- Frozen Salad.**
1/2 cup mayonnaise 1/2 cup candied dressing cherries
1/2 cup diced pine-apple 1/2 cup diced apples
1/2 cup pineapple 1/2 cup banana
1/2 cup lemon juice 1/2 cup evaporated milk
- Mix the fruit and juices. Combine milk and cream, chill and whip; then fold in the fruit and mayonnaise. Pour into a mold and pack in equal parts of salt and ice. Serve on lettuce leaves. This serves eight.
- Orange Bavarian.**
1 tsp. gelatin 2-3 cup evaporated milk
1/2 cup cold water 1/2 cup whipping cream
1/2 cup orange juice 1/2 cup lemon juice
1/2 tsp. salt 1/2 cup sugar
- Soak gelatin in cold water, add fruit juices, sugar and salt. Heat in the top of a double boiler until gelatin dissolves. Strain and set in pan of cold water. When mixture begins to set, fold in the evaporated milk and cream which have been beaten stiff.
- Banana Ice Cream.**
6 very ripe bananas 2 cups evaporated milk
1/2 cup lemon juice 2 cups cream
2/3 cups sugar 1/2 tsp. salt
- Scrape off adhering fibrous portion on surface of peeled bananas. Mash and rub through a sieve. Add the rest of the ingredients in the order given and stir until all are well blended. Let stand for 20 minutes so that all sugar may dissolve. Freeze in a 1 to 2 salt-ice mixture. This recipe makes 1/2 gallon cream.

PHILADELPHIAN ELECTED GRAND EXALTED RULER OF ELKS

Chicago, July 13.—Charles H. Grakelov, director of public welfare of Philadelphia, today was elected grand exalted ruler of the B. P. O. Elks in convention here.

Grakelov, who succeeds Judge William Hawley Atwell of Dallas, Texas, was unopposed for the post.

Judge Atwell, who presided over the session of the grand lodge conference which nominated and elected his successor, was presented with a gavel by the Near East Relief Commission.

Father (reading a letter from his son at sea, to mother)—Myopia says he's got a beautiful lamp from boxing.

Mother—I just knew he'd win something in his athletics.

Political Announcements

DEMOCRATIC

County Supervisor
To the voters of Supervisorial District No. 2, Santa Cruz County, Ariz.: I hereby announce my candidacy for the office of Supervisor on the Democratic ticket. If you can vote for me I will greatly appreciate it, and, if elected, promise to return a just and faithful service. Respectfully,
ELBERT L. KINSLEY.

I hereby announce my candidacy for the office of Supervisor of Santa Cruz County, to represent District No. 1. I respectfully solicit your support at the forthcoming Democratic primary, September 7, 1926. I stand for a business administration of the affairs of the county.
A. E. SANDERS, Nogales.

I hereby announce my candidacy for the office of County Supervisor in District No. 1, subject to the will of the Democratic voters at the September 7 primaries. If nominated and elected, I will endeavor to give the people of Santa Cruz County a business administration of their affairs.
C. C. CRENSHAW, Nogales.

I take this method of informing the public that I will be a candidate for the Democratic nomination September 7th for the office of Supervisor, which office I now hold. I solicit your vote, believing I have given an economic and faithful administration of the county's business affairs.
ROBERT A. CAMPBELL.

I hereby announce my candidacy for the office of County Supervisor in the Third District, subject to the will of the Democratic voters at the primary election, September 7, 1926.
W. T. ROATH.

County Treasurer
I hereby announce my candidacy for the office of County Treasurer, subject to the will of the voters at the Democratic primary, Sept. 7th.
MRG. ANNA B. ACKLEY.

State Senator
I hereby announce by candidacy to succeed myself as State Senator from Santa Cruz County, subject to the will of the Democratic voters at the primary election to be held on September 7, 1926.
LESLIE C. HARRY.

I hereby announce my candidacy for the office of State Senator, subject to the will of the Democratic voters at the September, 1926, primaries.
ANDY BETTWAY, Nogales.

Representative in Congress
In making my formal announcement to be a candidate for Representative in Congress from Arizona, I do so with a full realization of the responsibilities attached to the position. I will seek the nomination on the Democratic ticket at the primaries, to be held September 7, and will appreciate your support for the office.
Sincerely yours,
FRANK J. DUFFY, Nogales, Ariz.

Sheriff
I hereby announce my candidacy for re-nomination for the office of Sheriff of Santa Cruz County, subject to the will of the voters at the Democratic primary, September 7, 1926. I solicit your votes on the strength of having given, during the past two terms, an economic and efficient administration of the Sheriff's department.
HAROLD J. BROWN.

I hereby announce my candidacy for the office of Sheriff of Santa Cruz County subject to the will of the Democratic voters at the September 7 primaries. I solicit your support for the nomination.
ARTHUR D. PAGE, Nogales.

County Attorney
I announce to the Democratic voters of Santa Cruz County my candidacy for the Democratic nomination for the office of County Attorney at the primaries on September 7th. If nominated and re-elected, I will give Santa Cruz County the same efficient and attentive service I have given during my first term of office.
JAMES V. ROBINS.

County Recorder
I hereby announce my candidacy for the office of County Recorder, subject to the will of the Democratic voters at the primary election, September 7.
FRANK B. CARROON.

REPUBLICAN
Supervisor
I hereby make formal announcement of my candidacy for the Republican nomination at the forthcoming primary, September 7, for County Supervisor in the Third District. I respectfully solicit your support for the office.
A. S. HENDERSON.

County Attorney
I hereby announce my candidacy for the office of County Attorney, subject to the will of the Republican voters at the primary, to be held September 7.
RONYALL NOON.

Supt. of Public Instruction
I wish to announce my candidacy for the position of Superintendent of Public Instruction, the position I now occupy, at the forthcoming Democratic primary. I solicit your support on my record as an educator in Arizona for the last 24 years.
E. G. CASE, Phoenix.

School Superintendent
To the Public: I have decided to again become a candidate for the office of County School Superintendent subject to the will of the Democratic voters at the primaries to be held September 7th. I have endeavored to fulfill the duties of the office in a faithful and conscientious manner and with as little expense as necessary to maintain the educational standards of the county.
GRACE A. FARRELL.

County Assessor
I hereby announce my candidacy for the office of County Assessor, subject to the will of the Democratic voters at the primary election, to be held September 7, 1926.
WOOBIE HATJIN, Patagonia.

Superior Judge
I hereby announce my candidacy for the office of Judge of the Superior Court of Santa Cruz County, subject to the will of the Democratic voters at the primary election to be held September 7, 1926.
W. A. O'CONNOR.

Clerk of Superior Court
I hereby announce my candidacy to succeed myself as Clerk of the Superior Court of Santa Cruz County, subject to the will of the Democratic voters at the primary election, to be held September 7th.
ROBERT E. LEE.

Justice of the Peace
I hereby announce my candidacy to succeed myself, for the office of Justice of the Peace of Precinct No. 2, subject to the will of the Democratic voters at the primary election to be held September 7.
HOWARD KEENER.

I hereby announce by candidacy for the office of Justice of the Peace, Precinct No. 2, subject to the will of the Democratic voters at the primary election to be held September 7, 1926.
A. H. GLIDSWELL.

Constable
I hereby announce my candidacy for the office of Constable in Precinct No. 2, subject to the will of the Democratic voters at the primary election, to be held September 7th.
ED HAINLINE.

State Representative
I hereby announce my candidacy for the office of State Representative subject to the will of the Democratic voters at the primary election, to be held September 7, 1926.
GLADYS WALKER.

WRIGHTSON DISTRICT IS MORE ACTIVE

(The following article appeared in the Los Angeles Examiner of July 10, 1926.)

A most encouraging revival of mining activities in the Wrightson Mining District, Santa Cruz county, Ariz., is reported by Albert P. Morrison of Los Angeles, the founder of the Morrison Development Company, which recently took over the McDonald (Honey) mine in that section.

The McDonald, Mr. Morrison writes, is a property of most promising possibilities, having been a producer of much high-grade silver-lead ores in days gone by, but which has been idle for years, due to almost interminable litigation. The new owners, however, expect soon to begin development work upon quite an extensive scale, and have already given two leases on portions of the property which are now working in shipping ore.

During May and June, Mr. Morrison states, 19 carloads of ore was shipped out of Patagonia, the nearest railroad point, representing 12 ore producers of the district, and four carloads more have been consigned to smelters since July 1.

A number of Los Angeles interests are successfully operating in that section, Mr. Morrison says, including Big Jim mines, the "big mine" in mining circles there. This company, of which A. C. Keating is president, is now concentrating its crew and developing new ore bodies.

John W. Kelly, one of the mining celebrities of California, is developing a new property and is working in a full force of ore, intending, in the near future, to incorporate a company for its extensive operation. The district, Mr. Morrison believes, is on the verge of a mining boom of large proportions.

745 Store Buying Power in 1926

One Store Buying Power in 1902

Who has seen the great, 16-wheel moguls of the steel rails pulling long, heavy trains up grade with seeming ease and not marveled at their gigantic strength! The little, old-time engine becomes a boy's play-thing in comparison.

The buying power of this Nation-wide Institution of Department Stores compared with that of one store or score of stores is much the same as the comparative power of these two engines—one still in infancy, the other with the strength of a modern Goliath.

The 745-Store Buying Power behind this Store assures you peerless savings every day for goods of unquestionably high quality.

J.C. Penney Co.
