PERSONAL MENTION

Mr. and Mrs. Elbert L. Kinsley of the San Rafael Valley are enjoying a visit from the latter's parents, Mr. and Mrs. J. J. Sullivan; brothers John and Emmett, sister Marjorie and niece and nephew Violet and Alfred Raymond, all of Colusa, Calif. The party came by automobile and will spend an indefinite time here.

Ladies' silk hose, all colors, special sale, \$1.00. Washington Trading Co.—Adv.

Munday Johnson and Miss Marguerite Davidson of the San Rafael Valley were county seat visitors Wednesday.

Howard Davis spent several days this week in the county seat.

C. L. Northcraft was a business visitor Monday in Nogales.

Sanitos table cloths, beautiful patterns. Washington Trading Co.—Adv.

Mike Hogan of Harshaw was a Nogales visitor Monday.

Mr. and Mrs. Bob Bergier and daughter, Edith, and Mrs. John Vanderwalker were shopping in Nogales Monday.

Mrs. Charles May and Mr. David of Crittenden were Nogales visitors Monday.

G. L. Stevens, customs inspector, was a business visitor Monday in the county seat.

Imported pongee, natural color, 50c yard. Washington Trading Co.—Adv.

Tuesday will be election day. See that you vote for the men best fitted for the positions they seek.

Lee G. Zinsmeister of the Circle Z ranch was a visitor Monday in the county seat.

Mr. and Mrs. J. J. Peterson of the Big Jim mine were in Nogales shopping this week.

Mr. and Mrs. Jim Fraizer of Vaughn were county seat visitors this week.

OH, EMERY!
Chalfant's peanut brittle is a real home-made confection. Fancy boxed candies for the "particular" trade. Try em out. 235 Grand, Nogales.—Adv.

SCHOOL NOTES

(Genevieve Amado, School Editor)
All the art classes are working on Halloween designs.

The A class has started their English book.

The Chart class is improving both in reading and writing.

The Second and Third grades enjoyed their work for the Fair. The Second grade made free-hand cuttings of a Patagonia miner, farmer and cowboy. The Third grade modeled the Circle-Z ranch.

The Fourth grade pupils have been doing drill work on their table the last few days, by playing number games. All but one or two know their tables well now.

The Fifth grade girls have finished their holders and are ready to make aprons.

The Seventh and Eighth grades had a Halloween party Friday afternoon. There were committees appointed for games, refreshments and decorations.

The committee for games was Vivian Reagan, Thelma Wilson, Charis Wickland, and Raymond Kin. The committee for refreshments was Helen Siebold, Mary Costello, Clara Valenzuela and Genevieve Amado.

The committee for decorations was Ralph Riggs, Vincent Farley, Dan Dawson, Jack Pierce, and Leo Baker. The room was decorated with lighted Jack-o'-lanterns and black and orange crepe paper. The refreshments were punch, sandwiches and cookies.

The games were very funny and interesting. The pupils had a very enjoyable time.

Bud Buckenbeger of the Circle Z ranch has entered the Eighth grade.

Williams Field Scene of Plane Crash

Williams, Ariz., Oct. 28.—A broken bolt in the landing gear of the Ryan M-1, a San Diego built airplane destined for the Denver-Cheyenne air mail route, caused the plane to crash tonight as it attempted to land on Webber field. Capt. E. L. Curtis of Denver, its pilot, and two passengers were uninjured. Only the landing gear of the machine was seriously damaged.

VOCATIONAL AGRICULTURAL EDUCATION

As Related to Arizona Boys and Girls

(By Halbert W. Miller, State Supervisor of Agricultural Education.)

Agricultural instruction as administered under the direct supervision of the State Department of Vocational Education is not "book agriculture." All courses are set up and outlined by each individual vocational instructor in each community. The subject matter is based upon the immediate agricultural needs of that particular community. It is based upon the participating experiences of the boys and men in that community.

This method of instruction is of the most practical nature, being based upon the most approved, successful methods practiced by the best farmers in the community.

The instruction by the "home project method" with direct supervision of the agricultural teacher precludes any opportunity of having the instruction being of a purely theoretical nature.

The farms are used as laboratories which brings the instruction and the instructor out in the open and on a practical plane with the everyday dirt farmer. These men are quick to recognize a profitable, practical type of agricultural instruction. They are just as quick to recognize a poor or inferior type and condemn it.

This means that not only must the agricultural instructor be right, but he must keep right by constant study and by mixing with the local farmers to the extent that his knowledge is recognized and his ability respected.

We cannot deny that the present rural youth will provide our future farm men and women. When these farm boys and girls enroll in a vocational agricultural class, they are doing so to receive definite, practical instruction to meet a definite need for a definite purpose. This is life itself—purpose. This is the first step towards the development of character.

The sooner these boys and girls have a definite objective in mind just that soon do they begin to live and reap what was meant for them.

Not only is knowledge acquired, character built, a purpose in life accepted, but manipulative skill is acquired in co-ordinating of the senses in actually doing the jobs required to become proficient and successful as an agriculturist.

The knowledge that is acquired through vocational agricultural education is everlasting, as it becomes part of the individual through having done them in the process of learning.

Arizona's agriculture, then, should begin to expand and improve in direct proportion as these boys and girls are trained and take up the occupation of farming as their life's vocation.

DEMOCRATIC RALLY OCT. 25TH

Monday afternoon at 2 o'clock, a Democratic rally was held in the local opera house. Gov. G. W. P. Hunt, U. S. Senator Henry Ashurst, Mine Inspector Tom Foster, Corporation Commissioner Loren Vaughn, Ana Frohmiller, candidate for state auditor; E. A. Hughes, candidate for tax commissioner; C. O. Case, candidate for superintendent of public instruction, and J. C. Callaghan, candidate for state treasurer, spoke on the issues of the campaign.

The meeting was attended by a large crowd, which showed its appreciation by frequent applause during the presentation of democracy's cause.

Following the meeting in Patagonia the party went to Nogales, where an enthusiastic meeting was held in the evening.

\$461.56 Spent by Anti-Saloon League

Washington, D. C., Oct. 28.—The Anti-Saloon League of Arizona today reported to the clerk of the house it had spent \$461.56 and received \$500 from the National Anti-Saloon League organization in the prohibition senatorial and congressional campaigns.

Voluntary committee No. 1 of the Association Against the Prohibition Amendment reported it had received and spent \$2244.

The knowledge that is acquired through vocational agricultural education is everlasting, as it becomes part of the individual through having done them in the process of learning.

Arizona's agriculture, then, should begin to expand and improve in direct proportion as these boys and girls are trained and take up the occupation of farming as their life's vocation.

BIG JIM STRIKE GETS RICHER AS SHAFT GOES DOWN

Superintendent J. J. Peterson of the Big Jim mine was in town this week displaying specimens of the ore that fills the bottom of the shaft. It is high-grade shipping ore and Mr. Peterson states that it is getting richer with each round of shots.

The remarkable part of the find is that it is now into 31 feet or more of ore with the best ore in the bottom of the shaft and no fetterwall or hanging wall yet in sight. This seems to indicate that the Big Jim has struck an immense body of ore that shows better values with depth and the extent of which in any other direction than downward is mere surmise. Experienced miners, however, state that the ore body must be very large as formations in that district are more of the nature of "blanket" deposits and spread out in every direction, while ore deposits in some sections are called "chimney" veins and are narrow, running in peculiar structures.

The employees of the Big Jim have had great faith in the property from the time A. G. Keating and associates acquired it, as is shown by the fact that they are all owners of stock which they purchased in the knowledge that they had a good gamble. Their faith in the mine has been demonstrated by the new strike.

No assays have been made of the new strike, because it is of shipping quality as it comes from the mine and its value increases with every round of shots. If it gets much richer it will be pure metal and the mill will have nothing to do until a leaner streak is discovered.

Next week we will have more detailed information to give out concerning the Big Jim. President A. G. Keating of Los Angeles is due to arrive in Patagonia this evening, which will be too late to get the desired information for this week's paper.

Election of school trustees and the board of education for the Patagonia Union High School tomorrow. Everybody should vote.

GOVERNOR HUNT SHOOTS BOLT INTO TUCSON AUDIENCE

Tucson, Oct. 26.—Before the largest audience that has assembled in this campaign in the city of Tucson, Governor Hunt brought up his heavy artillery and shot the Republican opposition full of holes.

He created a sensation when as a preface to his remarks he stated that an incident had occurred in this campaign and that a letter had been written which he regretted very much, but that he felt the occasion required that he read this communication to his audience so that instead of the selected few for whom it was destined in order to influence their votes for Mr. Clark, the voters of the state would be advised of the matter so that they might be fully aware of the lengths to which those who now control the Republican organization of this state will go in order to secure the control of the government of the state.

The governor declared that he had never vetoed an appropriation for the University of Arizona and that in making appointments to the board of regents he had never exacted any pledge or promise from any man or woman whom he had appointed; that they were free to use their own judgment and discretion as members of the board in directing the affairs of the university. The governor said that no action of his as an ex-officio member of the board had ever been dictated by the exigencies of politics, but that every vote that he had cast as a member of the board, and every action that he had taken with reference to the university, had been directed with only one aim in view and that for the strengthening, building up and developing of that institution. The governor then read the following letter:

"Rev. E. C. Tuttle, Tucson, Ariz.
"At Billy's request, I am writing you my views on the Dr. Marvin question. If Mr. Clark is elected governor and he asks my advice in regard to Dr. Marvin, and I am sure that he will ask for my views, I will tell him that for the good of the university and Tucson he should ask for Dr. Marvin's resignation at once. Furthermore, I will advise him that before he appoints any new members of the board of regents, and I believe there are three appointments to be made January 1, 1927, that he should exact this promise from these intended appointees before he makes the appointment.

"I can state further that I know Mr. Clark will accept Mr. Billy's and my recommendations in this matter.
"Very sincerely yours,
"H. S. CORBETT, Chairman,
"Republican State Committee."

At the conclusion of the reading the vast audience was silent and a wave of sentiment went over it that was loudly felt by everyone present. The silence lasted for a full minute and then excited whispers began which caused a furor. Holding the letter aloft, the governor dramatically denounced the Republican party for drawing the university into the mire of partisan politics after he had rescued it from that fate.

The governor declared that he was not there to discuss President Marvin. He merely denounced the effort to make the administration of the university the football of partisan politics.

Passing from that subject, the governor declared that his opposition was talking about a machine, and the Hunt dynasty.

"I have been five times elected governor of this state," he declared, "and I expect to be elected for a sixth term, not by any machine composed of appointees, but by the people of the state of Arizona. They are my machine. They elected me because they had confidence that I would protect and fight for Arizona, and when they get tired of me they will lop off my political head and that will be the end of the Hunt dynasty, and my machine will return to the source from which it comes—the electorate of the state of Arizona which elected me to the greatest office within their gift, the governorship of this state—the only officer of the state from whom no bond is required."

The governor continued: "But the great issue in this campaign, when all camouflage and smoke screens have been brushed aside, looms up, and that is—what is to be done with reference to the Colorado river? My opponent fought day after day and year after year, right up into this campaign, for the ratification of the Colorado River Compact as written at Santa Fe, without reservation, interpretation or amendment, and he declared that Arizona had no heritage

OFFICIAL PROCEEDINGS OF THE SANTA CRUZ COUNTY BOARD OF SUPERVISORS

OFFICE OF THE BOARD OF SUPERVISORS, Nogales, Arizona, September 8th, 1926.

The Board of Supervisors met pursuant to adjournment of August 16th, 1926.

Present Chairman Jas. L. Finley, Members Robert A. Campbell and W. Miller, and Clerk A. Dumbauld.

The following viewers' report was filed on the Taft road, described as follows:

Beginning at the end of the present county road at the Taft mining camp being about 13 miles in a northeasterly direction from...

We desire to report favorably upon this road, and recommend that it be declared and made a county road, and we further report that we have no damages to be assessed to any parties on account of this road...

"Respectfully submitted, JIM PARKER, W. H. HATHAWAY, J. W. LARIMORE, County Engineer."

The Board accepted the above report from the viewers of the Taft road ordered that the same be posted for hearing of damage claims and objections.

Mrs. Grace Farrell, County Superintendent of Schools; W. H. Hathaway, auditor and Mr. Nuttal appeared with reference to transportation of children living at the Taft mine and being in School District No. 28...

Motion of Miller seconded by Campbell, that:

"WHEREAS an emergency has arisen in School District No. 28, in that a number of children who have entered the said district since the budget for the present year was made and who have demanded a school or transportation, and

"WHEREAS, no budget provision was made by the trustees of said District No. 28 for said transportation, the County School Superintendent is authorized by the Board of Supervisors to provide transportation as per memorandum of Section 2824, School Laws of Arizona, until the trustees may act next as per the Board of Supervisors of May 3rd, 1926."

B. H. Worthington appeared before the Board with reference to work county roads in the Ruby district.

The minutes of the previous meeting were read and approved as read. Spro S. Proto appeared before the Board with reference to a 10 per cent reduction in valuation on the Southern Arizona Power Company's assessment.

A letter was presented to the Board from the State Tax Commission in reference to the same, the Board ordered that the matter be referred to the County Attorney for a written opinion to be presented to the Board September 13th, 1926, for further consideration.

A petition and notice of posting was presented to the Board for the following described road:

"Beginning at the end of the county road on the east side of the Baca road and thence following as nearly as possible the old road through the area to Tubac, Arizona, said last mentioned point being the terminus of said road."

The petition and notice were accepted and the following viewers appointed to view out and locate the above said and described road: Viewers W. Larimore, County Engineer; Robert Bergier and Fred Barnett.

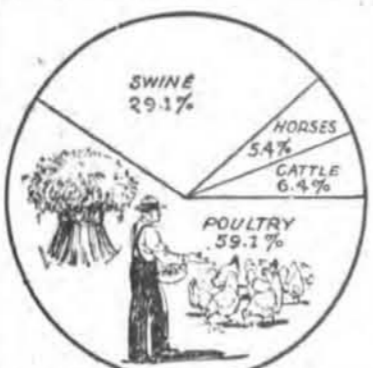

Duane Bird appeared before the Board with reference to the Noberto Belen Barnett property, stating that he represented the original owners, and that they wished to buy in the property for the amount for which it was sold to the state, \$254.89, plus all back taxes, interest and costs, amounting to the sum of \$402.16.

The Board ordered the property mentioned sold to Belen and Noberto Barnett for said sum and a deed drawn making transfer of the same.

The following claims and demands were presented to the Board, the same being audited, allowed and ordered paid out of the various county funds:

Table listing various county funds and amounts, including road work, supplies, and other expenses.

Chickens Top Wheat Eaters

(Sears-Roebuck Agricultural Foundation)

Wheat and flour are synonymous in the minds of many. As a matter of fact, however, forty per cent of our mammoth wheat crop never leaves the farm at all, but is used for seed purposes and feeding farm animals...

Chickens are the heaviest consumers of wheat fed on the farm using 59.1% of all wheat so distributed. Swine are next, with 29.1%.

GOITRE RETURNS AFTER OPERATION

Wisconsin Lady Tells How She Was Saved From Second Operation by Colorless Liniment

Mrs. Albert Thies, Split Rock, Wis., says: "I am willing to tell or write how I removed my goitre with less than one bottle of Sorbol-Quadruple. Had an operation 4 years ago and it started to grow again. My neck was reduced 2 1/2 inches. My goitre caused headaches, weak heart, sleeplessness, choking and dryness in the throat. I could feel no better now." Write Sorbol Company, Mechanicsburg, Ohio. Sold by drug stores everywhere. Locally at Evans Mercantile Co.—Adv.

LEGAL ADVERTISEMENTS

AFFIDAVIT OF R. N. KEATON

STATE OF ARIZONA County of Santa Cruz ss.

R. N. Keaton, being first duly sworn, deposes and says: That he is now and for the last nineteen years has been a resident of San Rafael Valley, Santa Cruz County, Arizona; that affiant in wounded pride hereby makes affidavit concerning his exhibits which drew first prizes also sweepstakes at the Santa Cruz County Fair, Sonora, Arizona, October 23, 1926; that owing to the slanderous reports circulated and talked of by Mr. and Mrs. John Madsen, causing the public in general to believe that his exhibit was a fake and that said Mr. Madsen would swear that he did not grow the same, affiant wishes to state that he has always taken a keen interest in Santa Cruz County exhibits. This interest caused the Supervisors to appoint affiant as their County Fair Commissioner to the State Fair at Phoenix in 1916, which they have said had the best exhibit ever entered there from Santa Cruz County.

That owing to the unusual drought in Santa Cruz County last year, affiant took his family and part of his farming equipment to the Yaqui Valley in Sonora, Mexico, and harvested a crop there this year; that affiant also had Mr. B. Lewis, whom he left in charge of his ranch in Santa Cruz County, list in without plowing, about one hundred fifty acres which was covered with a large growth of weeds because it had not been cultivated the year before; that when affiant returned from Mexico on the 30th day of June, 1926, he could find only a portion of the milo maize and corn among the new growth of weeds that had stand enough to be worth cultivating; that affiant cultivated this the best he could and did not cultivate the balance; that he replanted the watermelons, muskmelons, potatoes and pumpkins with seed from crops grown this year; that in selecting the exhibits for the Santa Cruz County Fair this year affiant was not particular in getting the majority of the prizes as he did two years ago; that most of the exhibit was selected from produce that had not been cultivated but was just planted in unplowed land and had grown up in weeds higher than a man's head.

Affiant further states that he can put up another exhibit that will far exceed the one he has just shown, to be selected from the same kind of growing products; that he has his exhibits on display and will be pleased to have anyone come to his ranch and see the same.

Official Proceedings of the Board of Supervisors

The following names appearing upon the payroll of the county for the month of August, the same were audited, allowed and ordered paid out of the county salary fund:

Table of payroll entries for August, listing names and amounts, such as 'Wt. Nos. 394-420-W. A. O'Connor, Superior Judge' and 'Wt. Nos. 395-421-Robert E. Lee, Clerk of Court'.

Upon motion duly made and carried, the County Treasurer was authorized and ordered to transfer the sum of \$3,199.28 from the county general fund to the county expense fund, and a further sum of \$3,984.12 from the county general fund to the county salary fund.

The following monthly reports of county and precinct officials were presented, read and ordered filed: Superintendent of Outdoor Indigent Relief, Superintendent of Health, Clerk of Court, Sheriff, County Assessor, County Treasurer, and Justice of the Peace of Precinct No. 1.

A communication was received from the state highway department assuring the Board of cooperation in stopping and removal of junk piles along the Nogales-Patagonia highway.

There being no further business to come before the Board, they adjourned to meet September 13th, 1926.

JAMES L. FINLEY, Chairman.

Attest: A. DUMBAULD, Clerk.

BOARD OF SUPERVISORS' OFFICE, Nogales, Arizona, September 13th, 1926.

The Board met pursuant to adjournment of September 8th, 1926. Present: Chairman James L. Finley, Members Robert A. Campbell and Hugo W. Miller, and Clerk A. Dumbauld.

Mr. John Maloney appeared before the Board with reference to county

(Continued on page ten)

WHICH WAY, MR. CAMERON?

In addition to his other great attributes, so charmingly and so modestly admitted by Ralph H. Cameron, is the remarkable agility which enables the senator to go forward and back up at the same time.

He has the amazing facility which enables him to be a progressive and a reactionary at the identical moment.

He comes near to destroying the axiomatic aphorism that a body cannot occupy two places at the same time.

Mr. Cameron "admits" that he has a great and commanding influence with President Coolidge—a standpoint of the standpatners.

Through his touching friendship with Mr. Coolidge, Cameron alleges that he can "bring home the bacon for Arizona." It is this enduring bond between him and the strong, silent man in the White House that enables Cameron to be "Arizona's Go-Getter."

But, in spite of this great and marvelous friendship with Mr. Coolidge, he is also the champion of all progressive congressmen and senators and of forward-looking legislation.

He voted to seat Smith W. Brookhart of Iowa in the Senate of the United States. His "dear friend" Mr. Coolidge bitterly opposed Brookhart.

He voted to seat Nye of North Dakota, whose victory made Mr. Coolidge just as happy as if he had stepped on a nail.

He voted to re the McNary-Haugen bill, which was bitterly opposed by Mr. Coolidge.

Now one thing or the other is true about Cameron:

Either he has no influence at all in the White House, and is not telling the truth about his "friendship" with the President, or else he is NOT a progressive, but a member of the standpat, reactionary faction of the Republican party.

Which is the fact—I feither?

May it not reasonably be expected that all other fulminations of Arizona's "Go-Getter" are of a piece with his latest outburst!

A CORRECTION

In a recent issue of The Patagonian we stated that Mr. Ramsey had purchased the store building and hotel belonging to the Hansons of Elgin. Our information was gotten from a third party, and is not correct, according to Mr. Hanson. The fact of the matter is that Mr. Ramsey has leased the property to Mr. Ramsey for a term of three years. He states, however, that he would rather it had been a sale.

32 Killed in Hurricane in Cuba

Washington, Oct. 28.—Thirty-two persons were killed and half a million dollars' damage was done at Batabano on the south coast of Cuba by the Caribbean hurricane, said a report received at the navy department today from the commander of coast guard patrol boat 293.

Howard Keener, at the Patagonian office, will acknowledge your legal papers, put the Notary's Seal thereon—and has for sale all kinds of legal

Advertisement for 'The GIRL in the MIRROR' by Elizabeth Jordan, featuring the title and author's name.

Here is a mystery story of the happy sort, nothing morbid about it, even in its treatment of dark deeds and sinister individuals. The lives and love of two charmingly agreeable young people are entangled with a deep mystery, a mystery so keen that, read in a book, one could hardly avoid the temptation to consult the last pages long before the middle ones were passed; hence, just the sort of tale to be read serially, so that one cannot spoil the big surprise by trying to learn the outcome before it is due.

THIS CLEVER STORY WILL START SOON IN THE PATAGONIAN

Official Proceedings of the Board of Supervisors

DEMOCRATIC STANDARD BEARERS

CARL HAYDEN GEORGE W. P. HUNT LEWIS W. DOUGLAS

The Democratic Ticket VOTED STRAIGHT Is a Safe Ballot

The Standard Bearers of the Democratic Party have a record of achievement behind them. The Democratic platform upon which they are asking the support of the voters is progressive and forward-looking and promises assistance to Agriculture, Labor, Industry and the development of our State and Nation.

THE DEMOCRATIC PARTY FULFILLS ITS PROMISES

CARL HAYDEN'S 14 YEARS' RECORD IN CONGRESS ENTITLES HIM TO PROMOTION

Carl Hayden and His Record
Sixth-ninth Congress, first session. Bills introduced by Congressman Carl Hayden, which became laws:
H. R. 5210—Further relief for settlers on Baca Float land grant.
H. R. 6374—Employment of consulting engineers on Coolidge dam.
H. R. 8652—Withdrawing 320 acres for the Phoenix Indian school.
H. R. 10052—Authorizing sale of the Mesa target range.
H. R. 12596—Leasing unallotted ir- rible lands.
Senate bills reported by Mr. Hayden which became laws:
S. 2817—Relief of Edgar K. Miller, superintendent of the Hopi Indian Agency.
S. 3122—Authorizing appropriation of \$125,000 for Tucson-Ajo rd.
S. 3661—Purchase of 440 acres as addition to Papago Indian agency at Indian Oasis.
S. 3978—Crediting \$1,600,000 to Yuma and Yuma Mesa reclamation projects.
Mr. Hayden was instrumental in securing the following appropriations for the benefit of Arizona:
Additional improvements at Fort Mohave Indian school, \$6000.
Increase in funds for Glendale Poultry Station, \$8000.
Ice plant, etc., at Truxton Canyon Indian School, \$7000.
Increase in maintenance for Phoenix Indian School, \$11,225.
Construction of roads on Fort Apache reservation, \$35,000.
Thurberia cotton boll weevil quarantine and eradication, \$50,000.
One-half of the cost of the Lee Ferry Bridge, \$100,000.
Federal building at Globe, \$165,000.
Reimbursement reclamation fund for cost of Yuma levees, \$637,000.
New Veterans' Bureau hospital at Tucson, \$1,000,000.
Construction of Coolidge dam, \$1,125,000.
Mr. Hayden prevented action on the Swing-Johnson Boulder Canyon dam bill in the House committee on irrigation and reclamation.

LEWIS W. DOUGLAS

"The Democratic Party's candidate for Congress is a young man and a native son of Arizona, the third generation of a family who have been pioneers and developers of this State—a family of whom Arizona is proud. Lewis W. Douglas is identified with the mining and agricultural industries of Arizona and is doing much in both lines to develop the State. His essay into public life as a member of the Legislature in 1923 is one of which he and the Democratic Party may well feel proud. He showed intelligence and courage, and none of his associates questioned his integrity and honesty of purpose in his support of or opposition to measures which were before the Legislature. His actions were influenced solely by what he deemed best for Arizona."
—Arizona Gazette.

Vote It Straight

Democratic State Central Committee

GOVERNOR GEO. W. P. HUNT

George W. P. Hunt has served Arizona in many capacities. As a private citizen his constructive work in building up the industry and business of his community attracted the attention of the citizens of his country to his sterling integrity and ability. They elected him to serve Gila county in the Territorial Legislature and in the Territorial Senate. His colleagues in the Territorial Senate elected him as the President of the Senate three times. Gila County elected George W. P. Hunt as one of its delegates to the Constitutional Convention to draft the Constitution of Arizona, and his colleagues in that body chose him as the President of the Convention. He was elected as the first Governor of the State and was twice re-elected. Upon his retirement from public office, President Wilson chose him as a mediator in the industrial disputes that were prevalent in Arizona, and later selected him as United States Minister to Siam, where he served with distinction and he negotiated and signed the treaty under which Siam and the United States now transact their business. George W. P. Hunt was chosen as the Standard Bearer of the Democratic Party for Governor in 1922, was re-elected again in 1924, and was the overwhelming choice of the Democrats in the recent Democratic Primary as their choice for Governor in the present campaign. The outstanding issue in this campaign is the question of the determination of Arizona's rights in the Colorado river. George W. P. Hunt has been tested and the State knows his policies have been successful, and that he can be depended upon to continue the fight for Arizona. His opponent has been an advocate of the Colorado River Compact without reservations and only during the present campaign changed his position because he deemed it to be expedient. Arizona's future and destiny are safe with Hunt.

PATAGONIA UNION HIGH SCHOOL NEWS

(By Fidel Valenzuela)
Many grim, sad, and pale faces were seen last Thursday and Friday evening at the examinations which were held on that day.

Last Thursday the Civics class took their final examination on the Constitution of the United States. As all pupils in this class are exceptionally bright, it is expected that all will receive excellent grades. On the following day the rest of the school took "exams" in English, geometry, algebra, American and ancient history, and also in farm shop.

(By Volney Douglas)
Last Saturday the Patagonia orchestra played three selections at the Santa Cruz County Fair at the beginning of the school program. The orchestra did not make an extra good showing, due to the noise and confusion. They have been requested to play for the Woman's Club at Nogales.

(By Olive Douglas)
October 25 the teachers and pupils of the Patagonia Union High School attended the political speaking at the Lee Opera house, at which Governor Hunt spoke.

Monday afternoon after hearing Mr. Miller, head of the Vocational Training Board of Arizona, and Mr. Owen, another man on the board, the P. U. H. S. went down to the opera house and heard speeches made by Governor Hunt, Tom Foster, state inspector C. O. Case, superintendent of public instruction, and Lavin Vaughn, corporation commissioner. After this they returned to the high school, where Messrs. Case and Vaughn each gave a talk on school matters.

(By Emma Nye)
Last Monday C. O. Case, state superintendent of public instruction, and Mr. Vaughn, corporation commissioner, visited the P. U. H. S. Mr. Case spoke on "What Can Be Accomplished by an Idea," and illustrated the point by the aeroplane. He also encouraged the school children to go on as long as possible. Mr. Vaughn's talk was on burning to make one's mind obey them. Also, he said that a person who knows a great deal about books and nothing of vocational work would not be as useful in the world as one who could use both mind and hands.

Both visitors stayed after school and talked to Mr. Zimmerman, the principal; Mr. Gibbs and Miss Perley.

(School Editorial)
A high school is the means of obtaining a general education looking toward general culture, broader vision and better citizenship. It also gives one vocational training, helping the better adjustment of the individual to his or her job.

Large corporations have night schools where those who have not sufficient education are required to attend.

The national government requires all of its employees to take an examination, which, in order to pass, one must have a high school education or better.

The Nogales cost per student is \$187.00 while for the P. U. H. S. it is \$187.57-7. The Patagonia school has one advantage—one-third of the teachers' salaries are paid by the state.

Now we have an accredited school which is recognized in any college or university in the state. Why not keep it? It is a grand little school. Ask any of us that go to school here and find out. We are for it, body and soul. Try us.

(By Vernon Lewis)
Mr. Miller, head of the state vocational department, and Mr. Owen, member of the same department, visited the Patagonia High school and each addressed the pupils. Mr. Miller stated that he was delighted to see the change that has been made in the high school building and grounds since he last saw them. He was also agreeably surprised to see the number of students attending the school. He praised the people who did their best to promote the high school and said he believed the trustees, who have served faithfully without pay, deserved much credit. Mrs. Farrell also was praised. Mr. Miller says that the chance for a good education is as good here as anywhere; that

We Are Always Ready
to serve you with good printing. No matter what the nature of the job may be we are ready to do it at a price that will be **Satisfactory**

when one finishes this school he can go on to university the same as anyone who graduates from any high school.

He expressed his interest especially in agriculture and home economics. He said that since one should be able to apply what he learns the students should practice at home what they learn at school.

Mr. Owen, like Mr. Miller, showed the students the value of a good education. He thought that the school motto, "Learn to Do by Doing," was a very significant one. He related several interesting short stories that kept everyone laughing during his entire address.

(By Gordon Farley)
Halloween, the night of Jack-o'-lanterns, witches and all sorts of fantastic figures, will be observed in an appropriate manner on Saturday, October 20. Beginning at 9 o'clock in the evening and lasting until the wee hours of the following morning, the Junior masquerade dance will afford an evening of pleasure for all those who attend.

The music, which will be furnished by Lefebvre's orchestra, will be full of harmony and jazz.

Good eats will be abundant at 12 o'clock with plenty non-alcoholic beverages, such as coffee and punch, to stir between bites.
Cornstarch, pumpkin and vari-

POLITICAL ANNOUNCEMENTS

DEMOCRATIC

Sheriff
I hereby solicit your support for the office of SHERIFF of Santa Cruz County, having received the nomination at the primary election as the Democratic candidate. I have given the county the best service I am capable of during my two previous terms and promise an efficient and economical administration if re-elected.
HAROLD J. BROWN.

School Superintendent

I hereby solicit your support at the general election, November 2, for the office of COUNTY SCHOOL SUPERINTENDENT. I have used my best efforts to make the schools of Santa Cruz County the best in the state, and believe my work is self-evident. If re-elected I shall continue to do my full duty as County School Superintendent.
GRACE A. FARRELL.

REPUBLICAN

For County Attorney

Having been nominated as the Republican candidate for the office of COUNTY ATTORNEY, I hereby solicit your support at the general election, to be held November 2, 1926.
Bonsall Noon

colored lights will furnish a real Halloween atmosphere.
Anyone who desires to buy a ticket can do so by notifying any student.

News Item

The lockers for the school arrived last Thursday, the 21st, and the boys from the farm shop, including Mr. Zimmerman, put them together Friday. Mr. Zimmerman gave every student in school a locker and a certain number. He also made it very plain that if any books were found lying around he would take them into his office, where it would cost the student 10 cents to get it back. I'm sure we will all be very careful not to get into that habit, not because we love to see our lockers, but because the dimes are scarce nowadays.

Governor Hunt Shoots Bolt Into
Tucson Audience

(Continued from page one)

nor any right in the Colorado river—that we had forfeited them.

"Identify any such doctrine," exclaimed the governor. "I foresee in the future a state growing in industry and commerce, and becoming one of the great states of this commonwealth because of the six million horsepower of hydro-electric energy that will be developed in that great gorge. Industry will come to Arizona and the machinery and spindles will hum, be-

cause, when the coal and oil are exhausted in other sections of our country, as long as time runs and water flows, the giant turbines which will be built in the Colorado river will turn, supplying power for the wheels of industry. That is the stake for which I am fighting and that is what my opponent and his advisors are willing to throw away.

"I am a Democrat," concluded the governor, "and believe in government by political parties. I say to you that if you place the administration of the affairs of the state of Arizona in the hands of the Democratic party your government will be administered in the interest of the state and the people of Arizona."

"Can you think of anything more utterly useless than silk stockings?" asked the intensely practical man.

"Not unless it's the thing that stands on street corners watching them," answered his wife.

Business Poor? Try Advertising

Popular Mechanics

She turned to the young man who was showing her through the locomotive works and, pointing, asked: "What is that big thing over there?"

"That's a locomotive boiler," the young man replied.

"And what do they boil locomotives for?"

"To make the locomotive tender," Exchange.

A clergyman from northeastern Pennsylvania tells the story of an Italian who brought his baby to him to be baptized.

"Now," he said, "you see you put the beam right. Last time I tell you I want my boy call 'Tom,' you call him 'Thomas.' This time I want him call 'Jack,' I no want you call him 'Jackass!'"—Judge.

Patagonia Union High School's big masquerade will be held tomorrow night in the opera house. Proceeds to go toward school athletic equipment.

Official Proceedings of Bd. of Supervisors

(Continued from page 5)

roads between Bear Valley and Montana Camp, and asking that some work be done on these roads, as they are in very bad condition.

Anna H. Ackley appeared before the Board asking that she be allowed an extra clerk in the County Treasurer's office for two weeks in order that she could get out the tax notices for the year 1926. The same was allowed by the Board of Supervisors.

J. B. Bristol appeared before the Board with reference to road signs advertising Santa Cruz County and Nogales, also the matter of views and pictures of the scenic spots of the county for advertising purposes.

In the matter of the assessment of the Southern Arizona Power Company, referred to the County Attorney for an opinion, the same was submitted by the County Attorney setting out the law with reference to the same, and giving as his opinion that the Board of Supervisors were without jurisdiction at this time to make any change, and further as his opinion that the State Tax Commission should not order any change made at this time.

Mrs. Grace Farris appeared before the Board with reference to transportation in School District No. 28. She was instructed to take the matter up with the County Attorney for his opinion. No other action was taken by the Board of Supervisors on the subject.

The Board of Supervisors now proceeded to make the official canvass of the election returns of the Primary Election held on September 15, 1925, and found the total vote cast in the various precincts to be as follows, viz.:

Nogales Precinct No. 1—	
Ward No. 1	329
Ward No. 2	219
Ward No. 3	323
Calabazas No. 2	93
Tubac No. 3	44
Patagonia No. 4	149
Harshaw No. 5	41
Santa Cruz No. 6	46
Leech No. 7	30
Candle No. 8	19
Montana Camp No. 9	8
Elgin No. 10	31
Sopori No. 11	20
San Rafael No. 12	38
Sonolita No. 13	32
Vaughn No. 15	35

Total vote cast 1457

The full tabulated canvass and returns are found in this issue of The Patagonian. The Board adjourned to meet on October 14, 1926.

JAMES L. FINLEY,
Chairman.

Attest:—A. DUMBAULD, Clerk.

The Complete Circuit Diagram for the "A," "B," "C" Line Supply Device Described Herewith.

The biggest difficulty to be overcome in obtaining "A" current from the house a. c. lighting supply is in finding a rectifier that will pass sufficient current for the filaments and yet make battery elimination an economical proposition. In the course of a description of an efficient "A," "B," "C" line supply device in the *Radio Broadcast Magazine*, B. F. Roland writes as follows: "A logical solution to the difficulties of "A" power filtering is to connect the filaments of the radio tubes in series, thus reducing the overall current consumption.

The accompanying diagram shows a unit which has been found entirely satisfactory for use in conjunction with a receiver employing 109 type tubes in series. Due to the fact that the current consumed is small, the filter choke coils are of reasonable proportions. This device will supply voltages and currents as follows:

- "A" battery—60 milliamperes, 6 to 30 volts.
- "B" battery—Up to 25 milliamperes, at 200 volts, 60 (variable) volts, 45 (variable) volts.
- "C" battery—From 0 to 50 volts.

The use of the device is, of course, restricted to radio receivers employing tubes similar in characteristics to the UX-100 or DV-3 tubes with filaments wired in series, and under these conditions its performance as a universal power is ideal. The device illustrated is adaptable to any type of radio circuit and has been used with success on a three-circuit regenerative set, the Browning Drake, and tuned radio-frequency receivers, with variations of each type. Transformer-resistance or impedance-coupled amplifiers have been employed indiscriminately with equally good results.

The Power Transformer
In the diagram, T_1 is a General Radio power transformer designed for 50 watts, 110 volts, at full load. The high voltage secondary provides 350 volts each side of the tap at the center at no load. The third winding, T_2 , provides 5 volts at 5 amperes for the "raw" a. c. filament supply of an UX-112 or UX-171 power-amplifier tube. This may be supplied by a separate filament lighting transformer. In this construction, a Branch unit serves the purpose nicely. Across each half of the secondary, T_2 is connected a 0.1-microfarad buffer condenser, C_1 , and C_2 of 1,000-volt flash test type. The outer ends of this winding are connected to the filament terminals of a standard UX type socket, into which is plugged the new type BH Raytheon rectifier, R_1 , which is capable of passing 85 milliamperes. The plate terminal of the socket, corresponding to the cathode of the Raytheon tube, is connected to the plus side of the filter circuit. The filter circuit of this power unit includes choke coils, L_1 capable of passing 85 milliamperes direct current without heating, and having a residual inductance of at least 25 henries per choke at this value of direct current. The General Radio type 306 standard "B"-substitute choke is admirably suited for this service. Others which fulfill the above requirements will probably be equally as satisfactory.

The voltage-control unit shown at the right-hand end of the diagram has been tried under all conditions, and has given good service. There was some difficulty in obtaining proper values and current-carrying capacities of the various resistors and, after considerable testing, the units specified were adopted. All of the parts in the control unit may be obtained from regular stock of the various manufacturers or their dealers. For the plate voltage of the power-amplifier tube, the maximum "B" plus is taken directly from the terminals of the filter circuit. This terminal provides approximately 200 volts at full load. A clarostat, R_3 , is used to control the voltage output of the next lower tap ("B" plus in L) and will give from 80 to 135 volts approximately on the usual plate-current drain at this voltage. The "B" plus detector tap is obtained through the use of another clarostat or a Bradelyohm No. 10, R. One-microfarad condensers are connected in both of these cases from the "B" plus variable to "B" minus to bypass rheostat noises, and to prevent undesirable coupling between the various amplifier stages.

"C" Battery Voltage.
The "C" battery voltage is obtained from a wire-wound variable resistance of the proper value. As this resistance carries the full-load current of the device, it must be designed to carry 70 to 85 milliamperes without change of resistance, and without excessive heating. If high "C" voltages are desired, say up to 60 volts, the Federal No. 25 potentiometer is a good resistance to use here. It has a maximum resistance of 1,850 ohms, and will carry the full-load current fairly satisfactorily. A General Radio No. 214 potentiometer may be used in this position to supply "C" voltage up to 34 volts, and does so with much less heating. An 11mf. condenser is connected from "C" plus to "C" minus to prevent undesirable coupling effects and distribution. If 60 volts "C" bias are required and 85 milliamperes pass through the resistance supplying it, the power that must be taken care of is 5.1 watts.

The a. c. filament winding, T_2 , may not be available to the average constructor who may, however, have access to a 50-watt transformer having other satisfactory windings. In this case a Thordarson doorbell ring-line transformer may be used to light the filament of the power amplifier tube. This transformer will be found to give the proper voltage without a filament rheostat for the UX-171 and UX-112 tubes, using the winding marked "6 volts." A 400-ohm potentiometer, R_8 , is connected across the 5-volt a. c. supply and the center tap is returned to the "B" minus terminal of the supply unit. The adjustment of this potentiometer is very critical in order to eliminate all a. c. hum from this source. The "A" plus terminal of the power supply is obtained by dropping the "B" plus max. through a suitable rheostat to the required "A" battery voltage. The resistance used in this position should have a range of from 3,000 to 5,000 ohms, and a current-carrying capacity of 60 milliamperes. As there was no rheostat of these requirements available, the writer used a combination of fixed and variable resistances to achieve the degree of control required. A fixed Ward Leonard 3,000-ohm unit was placed in series with a Ward-Leonard 5,000-ohm fixed resistor, around which was slung a Federal No. 25 potentiometer.

Flexible Wire Handy When Experimenting
If you like to try occasional changes in your receiver, or if you want to experiment with temporary circuit arrangements or new instruments, you will find it convenient to keep a number of lengths of flexible insulated wire hanging from the side of your experimental table. The wires should be from six inches to two feet in length, and their ends equipped with small spring clips of the kind that look like the clasp.

Ordinary single lamp cord, which costs about a cent a foot, is ideal for the purpose, as it combines mechanical strength with electrical utility. It is a good idea to buy a number of six-foot lengths in three or four colors of insulation and to cut up the different colored pieces into odd size. Then when you make a half dozen or so temporary connections and the wires cross each other or become otherwise entangled you will find it a simple matter to trace the circuit with the aid of the varicolored leads.

In fastening the end of the wires to the clips twist them securely around the binding screws so that they will not fall out even if the screws themselves loosen. Of course the best idea is to solder the wires permanently in place, although it is desirable sometimes to remove a clip and to tighten the wire directly beneath an available binding post.

At any event, tape down the frayed ends of the insulation near the clips with narrow slices of ordinary white adhesive tape, so that the insulation will not run back and eventually bare the wire beneath to view. White adhesive tape is preferable to black friction tape because its outer surface is not sticky and does not tend to pick up dirt as easily as the latter material.

Strong small spring clips with tenacious jaws can be bought for less than five cents each in any radio store. Glass towel rods make excellent antenna insulators. Such rods may be obtained in the nickel and dime stores.

POULTRY

LAYERS SHOULD NOT BE TOO FAT

The skillful feeder tries to get his laying hens to consume the greatest amount of feed possible. That is, the greatest amount of feed which chickens will use in the production of eggs is the most profitable. Therefore, any stated amount cannot be followed in all cases. You should feed what your hens will clean up without getting fat. As soon as a better hen-producing feed than the other grains, more corn should be fed during cold weather than on warm winter days. Dry flocks should be kept before the fowls at all times, so that they can have access to them whenever hungry. This saves time and labor. Chickens do not have to grind the mash in their gizzards, so it can be eaten at any time the chicken feels inclined to do so.

It is estimated that hens which are kept confined eat from 70 to 100 pounds of grain and mash in a year. Light breeds such as Leghorns and like breeds will eat the smaller amount. This means that each hen will eat 3 to 4 ounces a day. A quart of dry mash mentioned above will weigh approximately one pound. A quart of scratch feed will weigh approximately 1½ pounds. Therefore, one quart of such a dry mash and one quart of such a scratch feed, would be enough to feed 10 hens of the larger breeds one day. Plymouth Rocks, Wyandottes, Rhode Island Reds and Orpingtons are considered the larger general purpose breeds. If you have a more or less number of hens you can figure from these amounts how much you should feed each day.

Late Molting Hens Are Best for Breeding Pen

During the molt hens lose all indications of production, including compact, large, moist vent, good laying condition as indicated by some surplus fat in the abdomen, and bright head parts. Therefore, do not try and use these indications during the molt. Early molters are usually the poor producers; late molters are usually the best producers.

One way to pick out the best hens for laying to use in the breeding pen would be to mark the late molters and breed only from them next spring. Improvement cannot be made without selection. Now is the time to begin increasing your next year's egg supply by picking out the hens that have laid the latest in the season. These will usually be the late molters. Mark them and put them in a breeding flock next spring and breed only from them.—Extension Service, Colorado Agricultural College.

Shed-Roof House

Ten feet is about the right depth for a shed-roof house, with the front wall six feet high and the rear one four feet. Face the front wall south or southeast to get the direct sunlight, and leave it open part way down. Then have shutters covered with burlap, or curtains, to cover this opening in stormy or cold weather. In sections having severe winters, there should also be curtains to drop around the roosts on cold nights.

Poultry Facts

Young Ganders make better breeders than do young geese.

Lice will kill not only poult but also mature turkeys. Watch for them.

Poultry farming cannot be called poultry farming unless every branch of the work is touched.

Dampness is a foe to turkeys of all ages. Keep them in when it rains, and when the grass is wet with dew.

Already the poultry breeder is dreaming of the chicks which he will hatch next March and April and the wise breeder will give some thought to the hens and pullets from which he will breed next spring.

Green feeds are of great value to fowls and should be supplied to the flock through the winter months.

Arrange your market, if you have not already done so. Poultrymen who accept any old market they can get seldom make the highest profits that they are entitled to.

Most of the vegetables that can be stored through the winter make satisfactory green feed for poultry. They include cabbage, beets, carrots, potatoes and mangolds.

It is hard to find more profitable birds to keep on the farm than a flock of turkeys.

Poultrymen advise keeping the selected young roosters by themselves in preparation for the breeding season.

Much equipment is not essential to raise turkeys successfully, but considerable work is required in their care, especially while they are very young, care and cleanliness being two important factors.

A Work of Art and Skill

The work of a fisher (Matt. 4:19) is rather a work of art and skill than of force and violence.—Trench.

Lesson for October 31

THE EVILS OF STRONG DRINK

LESSON TEXT.—Prov. 23:29-35
GOLDEN TEXT.—At least he biteth like a serpent and stingeth like an adder.
PRIMARY TOPIC.—Learning to be Temperate.
JUNIOR TOPIC.—The Control of the Appetite.
INTERMEDIATE AND SENIOR TOPIC.—Alcoholic Beverages Hurtful to the Individual and Society.
YOUNG PEOPLE AND ADULT TOPIC.—Light Wine and Beer a Menace.

1. Woes of Those Who Indulge in Wine (vv. 29, 30).
No more graphic description of the evils of the winebibber has ever been given. It portrays in the most impressive manner the miseries that attach to the drunkard's life.

2. The bitter remorse which causes one to cry out, "Alas!"
Many are the expressions of bitter regret which come daily from the lips of the drunkard. Sometimes it is the sorrow of disgrace, loss of manhood and self-respect. Sometimes it is the sorrow of poverty of the individual and his family clothed in rags and half starved. Sometimes it is the sorrow of following a broken-hearted wife to her grave and seeing his children scattered among strangers.

3. Contention, strife and quarrelling.
Much of the fighting among men is directly caused by their passions being inflamed by strong drink. The drunkard is man is always ready for a fight. He takes offense as well as gives offense. He not only has these from without, but he has struggles within. His conscience and his appetite are warring with each other.

4. Babblings and complainings.
The winebibber complains of everything, ill-luck, broken fortune, ruined health, loss of friends, of fate and of God.

5. Wounds without a cause.
These are wounds which might have been avoided from fights in which a sober man would not have engaged and from accidents which are purely the result of intoxication.

6. Redness of eyes.
This has reference to the blood-shot eyes of the tippler which ruins and dims his vision.

7. All these woes come upon those who tarry long at wine (v. 30).

8. The Attitude Enjoined (v. 31).
Look not at it. Do not put yourself in the way of temptation. The only safe attitude toward strong drink is total abstinence, and the only sure way of total abstinence is not to even look at it.

9. The Drunkard's Bitter End (vv. 32, 35).
1. Acute miseries (v. 32). "It biteth like a serpent, and stingeth like an adder."
Strong drink, like the poison of the serpent, permeates the whole system and ends in the most fatal consequences, the bitterest sufferings and death.

2. The perversion of the moral senses (v. 33).
(1) This excitement causes the eyes to behold strange things. This denotes the fantastic images which are produced on the brain of the drunkard. Even when delirium tremens does not result, there are awful fancies which are beyond the possibility of realization. Since eternal just always comes with wine drinking, it is no doubt true, as the Authorized Version has it, "Thine eyes shall behold strange women."

(2) "Thine heart shall utter perverse things." His moral sense being perverted, his utterances partake of the same. He tells lies, his words cannot be believed.

3. He is insensible to danger (v. 34).
The drunkard is unsteady. His brain reels to and fro, he is foolishly, even as one who would lie in the top of a ship's mast where there is the greatest danger of falling off.

4. He is insensible to pain (v. 35).
The drunkard is utterly ignorant of what happens to him while under the influence of strong drink. The drunkard has many bruises and wounds for which he cannot account. He did not realize when he received them.

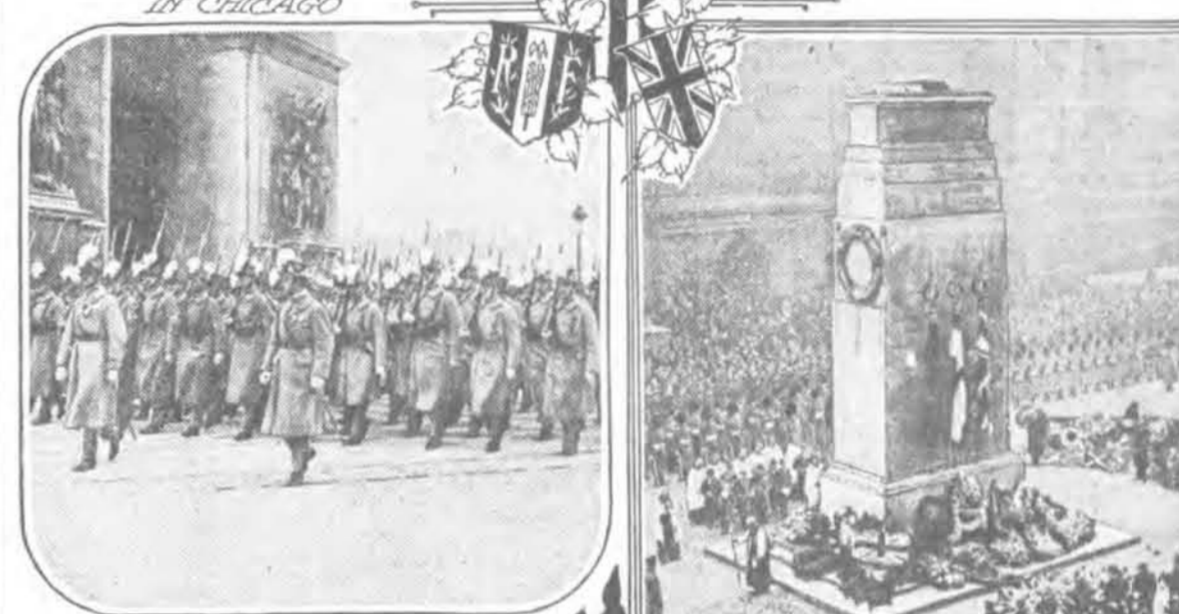

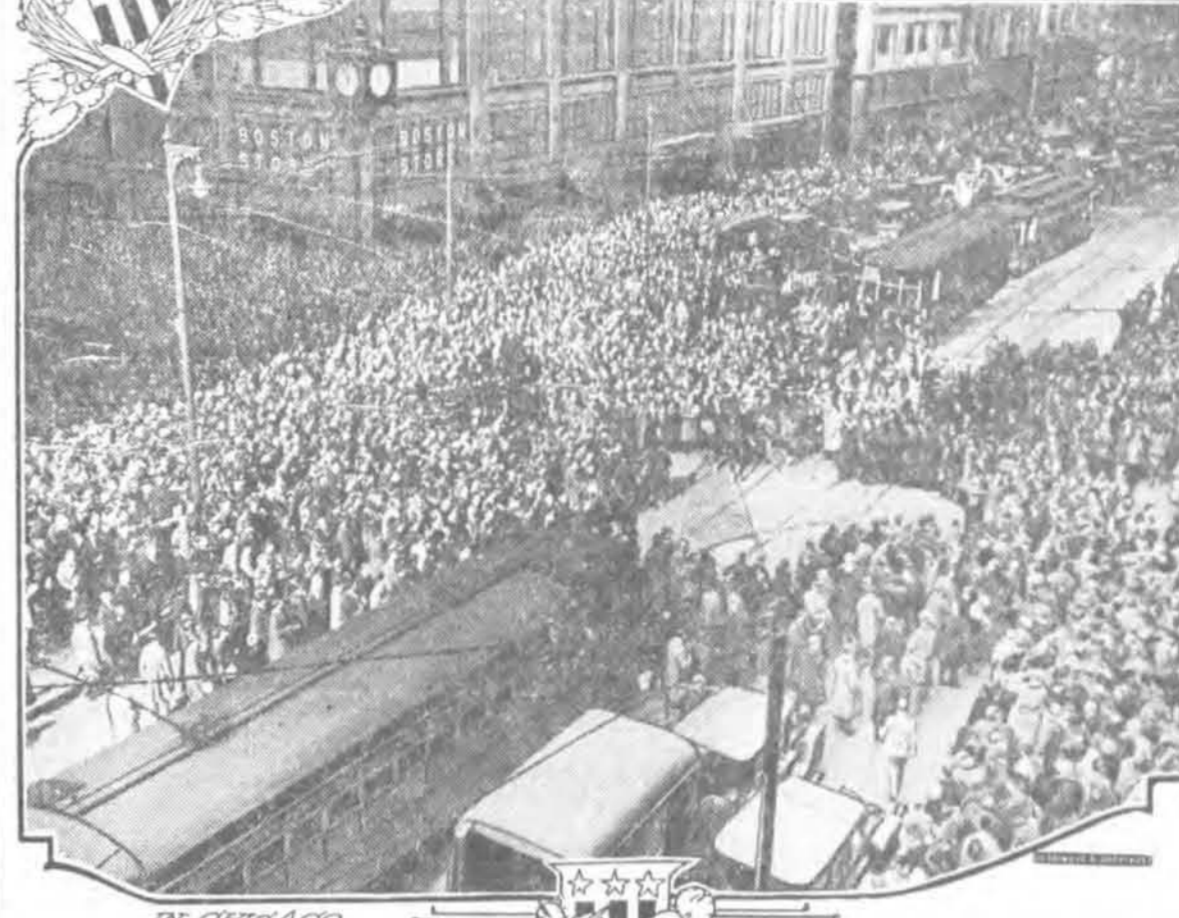

5. His abject bondage (v. 35).
After all his sufferings, sorrow and disappointment he goes on as a bond-slave to follow the ways of sin.

6. Hell at last, for no drunkard shall enter the Kingdom of Heaven (1 Cor. 6:10).

The Rock of Ages

A sailor in a shipwreck was once thrown upon a small rock, and clung to it, in great danger, until the tide went down. "Say, Joe," asked his friends after the rescue, "didn't you shake with fear?" "Yes," replied Joe, "but the rock didn't." Christ is the Rock of Ages.—Sabbath Reading.

Armistice Day, 1926

WASHINGTON, Monday, Nov. 11, 2:48 a. m.—The armistice between Germany, on one hand, and the allied governments and the United States, on the other, has been signed.

The State department announced at 2:45 o'clock this morning that Germany had signed.

"The department's announcement simply said: 'The armistice has been signed.'

"The World War will end this morning at 6 o'clock, Washington time, 11 o'clock Paris time.

"The armistice was signed by the German representatives at midnight.

"This announcement was made by the State department at 2:50 o'clock this morning.

"The announcement was made verbally by an official of the State department in this form:

"The armistice has been signed. It was signed at 5 o'clock a. m., Paris time (midnight eastern time) and hostilities will cease at 11 o'clock this morning, Paris time, (6 o'clock eastern time).

"The terms of the armistice will not be made public until later."

spirit of Armistice day? Eight years are not enough to determine a tradition. The war is yet too close to us, and only time can tell what is to be the spirit of this day.

But already we look forward to it as an American national holiday. In this autumn of 1926, in which falls the eighth anniversary of Armistice day, the outward and visible sign of the inward and spiritual grace which animates the American breast is tribute to the heroic soldier dead in the form of honors to the Unknown Soldier.

The world will not soon forget the solemn ceremony with which Great Britain on the second anniversary of Armistice day laid to rest "A British Warrior" in Westminster abbey.

Nor will it soon forget how France honored her heroic dead by making Arc de Triomphe the burial place of "Un Soldat Français" from Verdun. Here under the central opening of this great structure lies a simple slab. At the head is a single flame burning night and day. There is no fence of iron to inclose it nor is it watched over by guards. Visit it any day of the year and you will find it flanked by modest bouquets of flowers placed there by those who well know the toil of war.

And at Arlington, America's national cemetery where the heroic dead, lies also our "Unknown Soldier."

The vision of the homecoming of this "Unknown Yank" will for long be cherished by our people.

What do we remember? The selection of America's unknown soldier on at Unions, the bestowal of the Victoria Cross at the decoration of the Legion of Honor, the journey to Le Havre under escort of an honor guard, the French memorial observance at the seaport.

The cruiser Olympia's arrival at Washington after dark; the silent transfer to the capitol; the lying in state in that rotunda of the most impressive structure in the world.

The funeral service according to United States army regulations: A battalion of field artillery, a squadron of cavalry, a combat regiment of infantry, a battalion of marines and sailors, the Marine band.

Official mourners: Holders of the Medal of Honor; one representative for each 10,000 of the four million men who served in the armed forces, named by the states of the Union; officers and enlisted men from each arm of the service; a member of the American Legion from each state and territory.

The funeral procession passing along Pennsylvania avenue on its way from the capitol to the Arlington Memorial amphitheater; the lining of the entire route with infantry from the regulars and the National Guard.

The reception at the Arlington Memorial amphitheater by the President of the United States, heading an assemblage of the great of the world; the funeral oration of the President; funeral services by army and navy chaplains; interment in front of the entrance of the amphitheater at a spot which overlooks the city of Washington, with the capitol and Washington's monument and the Lincoln memorial in the background.

The moving strains of the funeral march; the roll of the drums; the measured cadence of marching feet; the blowing of "taps" by the buglers; the volley by the firing squad.

The flag at half-mast throughout the nation.

The American people at silent prayer through a hushed two minutes.

Armistice day of 1926 will be observed in America from coast to coast. Citizens will pause for two minutes of silence and face toward the east. An epitome of the nation's observance will be the services again at Arlington at the tomb of the unknown soldier.

In spirit America's Armistice day will be a glorification of the "Fighting Yank." So hurray! for the "Fighting Yank!" For "Fighting Yanks" are all good Americans who gave their best when the country called.

But this is not the popular conception of the terms. The popular theory is that "light of the moon" is the time when the moon is going from "new" to "full," and "dark of the moon" when the moon is on the wane. The fact is the terms are purely popular and have no scientific significance whatever.—Pathfinder Magazine.

Integrity in Art
The more beautiful the work, the more it is essentially the work of people who are striving for the fulfillment of the law and the realization of a loveliness which they have not

yet attained, which they feel even farther and farther from attaining the more they strive for it. And yet, is a still deeper sense, it is the work of people who know also that they are right.—Ruskin.

Similar Traits
"Ruskin: 'Three hundred years old this he, sir, very historical, and never stick nor stone altered in all the years.' Visitor: 'Must be the same landlord as mine.'—Passing Show.

Dark and Light Moon
The weather bureau says that "light moon" or "light of the moon" means all that time during which the moon is above the horizon through the fore part of the night, or from dusk to bed time—11 o'clock p. m., for instance. "Dark moon" or "dark of the moon" means all the rest of the time, or all the time that is not "light of the moon." But this is not the popular conception of the terms. The pop-

**FURRED VELVET EVENING WRAP;
SHOES AND HANDBAGS TO MATCH**

COMES again the whirl of social events and with it a pageantry of lovely-of-the-tovelliest apparel for women. Everlasting points to a season of super-elegance. Especially are evening wraps sumptuous to an impressive degree. Brilliant in color, enriched with fur and regal in styling are they.

Velvet is a chosen medium for the fashioning of lady's evening wrap. This fall for velvet accents the fabric in both solid coloring and also in striking velvet facones which com-

And now it is the shoe and bag ensemble which is giving the woman of smart fashion the thrill of "something new." Real artistry of design and workmanship is displayed in these exquisite leather effects. The fact that these matching sets impart an aspect of fastidious elegance to the costume assure for them a vogue of flattering success.

A glance at the picture herewith is enough to incite the desire to be one of the first to flumm this new and interesting fashion of matching shoes to

AN EXQUISITE EVENING WRAP

line artful patterning and multicoloring with fascinating results.

So supple is the modernized velvet, it yields to manipulation as gracefully as does the daintiest of chiffon. Which is as it must be since a vast amount of shirring and intricate working of the fabric itself play a prominent part in this season's styling.

Regarded as a latest expression of the French mode is the exquisite Philippe et Gaston velvet evening wrap in this picture. A study in detail of this magnificent model is illuminating as to Fashion's trend. Firstly, it is in deep cherry coloring, thus emphasizing the predilection for red tones. Secondly, it has a shirred yoke, which is doubly significant in view of the fact that yoke-styling characterizes both dress and wrap of latest creation, and as to shirring it is an item of outstanding importance. Thirdly, this modish wrap is back-banded, which is at present considered essential to good style. Fourthly, it is lavishly embellished with fur in accordance with fashion's dictate for this fall and winter. Finally, the voluminous sleeve proclaims

one's handbag. One of the latest flat-bag models is here shown in conjunction with trim street oxfords of golden brown kidskin. This same printed leather trims the oxfords. Attention is especially called to the flatness of this large envelope purse, this model having displaced the pouch bag of last season.

Bag and slipper need not be an absolute match, but since harmony for the entire costume is the guiding thought in modern dress, they should at least be chosen in the same tones and spirit of design. In the picture at the top a very flat handbag carries out the same blonde tones of the simple one-strap slipper. The entire ensemble is exquisitely wrought. The workmanship of the bag by Patou accents a perfect finesse of detail. Especially is the narrow top frame with its metal slide a beautiful piece of artistry. The blonde kidskin of the shoes is combined with an underlying leather printed in deeper tones and stitched together with a graceful scalloped line. From each point of the scallops a single line of self-col-

DISPLAYING REAL ARTISTRY

a style note of supreme significance for the big sleeves in dolman, angling and Vionnet effects dominates the mode.

An interesting note in regard to the evening wrap is the large collar of ostrich which often replaces fur. Gold ostrich is fashion's latest whim. Metal lace trimming also embellishes many a gorgeously colored velvet evening wrap.

Wraps of black velvet exquisitely furred with white ermine and wondrously lined in hand-embroidered crepes are among the season's notable evening wrap offerings.

ered stitching radiates to the center of the shoe in what is known as the sun-ray pattern.

The use of color in footwear is increasingly important. White brown leathers, developed in all sorts of fantastic interpretations in which reptile-like leathers feature spectacularly, there is also a considerable showing of navy blue kid footwear. Black footwear touched with color is also fashionable. Colonial pumps with gorgeous buckles still hold their own among favorite footwear types.

If great ambitions dominate your work,
If you are sighing for a lofty mind,
Just watch yourself and see you do not shrink
The common little ways of being kind.

MEAT AND OTHER DISHES

Tongue. which has been lightly corned, if put to cook in water to cover for several hours, then skinned and simmered in the following sauce or baked in it, will be found delightful eating. Take a pint of good strong beef stock, a teaspoonful of Worcestershire sauce, a few drops of tabasco, half a cupful of seeded raisins; pour over the tongue and cook for an hour, basting often. Remove the tongue to a hot platter and pour the sauce around it. Serve hot.

Veal With Vegetables.—Take a good thick slice of veal from the leg, brown it in a hot pan with two tablespoonfuls of butter, turning often to brown without burning. Now cover with a layer of chopped carrots, onion, turnip and potato; sprinkle with chopped celery and pour over it the browned gravy slightly thickened. Bake slowly until tender in a moderate oven.

Steak may be browned and cooked with onions, tomatoes, mushrooms or served with baked ham in butter and lemon juice. We are prone to serve certain foods in certain ways and we often think we are tired of the foods when it is the way that they are served of which we tire.

Bran Bread.—Take four cupfuls of wheat bran, two cupfuls of whole wheat flour, three-fourths of a cupful of New Orleans molasses, a teaspoonful of salt, a teaspoonful of soda, two cupfuls of sweet milk, two tablespoonfuls of shortening, a few raisins, and bake one hour.

Apple fritters are always enjoyed. They may be served with a sauce as dessert or on the plate with the dinner when pork is served.

Tuna Fish In Peppers.—Cut the steen ends from six peppers, remove the seeds and veins and soak in cold water for an hour. Drain and pack the following mixture into the peppers: To two cupfuls of tuna fish, add four eggs slightly beaten, one cupful each of milk and bread crumbs, season with salt and pepper. Sprinkle with buttered crumbs and bake in a hot oven or until thoroughly hot.

Veal With Spaghetti.—Cut two pounds of veal from the shoulder in small-sized pieces to serve, brown in hot fat, add two sliced onions, a tablespoonful of salt, a dash of red pepper, a tablespoonful of sugar, a can of tomatoes and a pound of spaghetti. Cook slowly three hours on the back of the stove or in the fireless cooker. Mutton with carrots and peas is good cooked this way.

More Good Things.
Now that the chestnut season is at hand one may have many delectable dishes. Here is a delicacy which is expensive when bought, but may be prepared at home. Boil the chestnuts a few minutes, removing the shell and blanching, until tender. Prepare a rich sauce on butter, drop them into it and put into a can and seal. This may be used in various dishes as garnishes.

Bolled Chestnuts with Celery and Chicken make delicious salads. An apple or two may be added to make the salad go farther, without spoiling its tastiness.

Rice Custard.—Cook one cupful of rice in one quart of milk with a bit of salt and four tablespoonfuls of sugar. When the rice is nearly done add four beaten egg yolks and finish cooking. Place in a baking dish and cover with a meringue of the beaten whites to which flavoring and sugar have been added. Serve cold.

Imperial Rice Pudding.—Soak one-third of a box of gelatin in one-half cupful of water. Put three cupfuls of milk into a double boiler; when boiling, stir in one-half cupful of rice, a half teaspoonful of salt and cook until the rice is tender. Now add one-half cupful of sugar, remove from the heat, add a teaspoonful of vanilla and the gelatin. When cold add a pint of whipped cream and put into a mold. Serve unmolded, very cold.

Eastern Sandwiches.—Put through a meat chopper one small onion and quartered, one red Spanish pepper, one sweet green pepper, one Nonchalant cheese. Add a half teaspoonful of salt, a pinch of powdered sugar and spread on slices of buttered bread.

Dainty Sweetmeat.—Mix together one cupful each of puffed rice, raisins, figs and dates with a bit of finely minced orange peel and lemon peel that has been dried. Put all through the meat chopper, adding a handful of nuts. Make into balls and dip in chocolate or roll in sugar.

Baked Bananas en Casserole.—Place peeled and halved bananas in a casserole with a sauce of melted butter, lemon juice and sugar poured over them. Bake, basting occasionally, and serve with half a glass of currant jelly poured over them at the last. Serve with broiled steaks.

Nellie Maxwell

Daddy's Evening Fairy Tale
By Mary Graham Bonner

ARRIVAL IN CITY

Douglas and Dorothy had just arrived in the city. They had lived in the country where their neighbors were the cows and pigs and chickens, and where the view from their window was of long stretches of green fields and tiny brooks and the wandering streams here and there.

Now they were in the city where wonders were no longer wonders, but actual facts; wonders that really, really happened, a fairyland in actual truth.

They had thought of this journey for so long that it almost seemed beyond belief that they had actually taken it and that their long looked-forward-to and promised visit to their beloved Uncle John was at last about to begin.

Here they were in a big station. Uncle John was there to meet them and he had shown them how he had found out all about their train from the booth they called "Information Bureau." He had waited on a bench while upon a big blackboard was written the trains due to arrive and the time at which they would arrive.

He had waited in line with many other people and how excited Douglas and Dorothy were when they caught sight of him.

They had been right on time, "Trains never get mixed and are hardly ever late," said Douglas. How thrilled they were at the entrance to the city. They heard of trains arriving and going out all the time.

"I can see how people would want to come," said Dorothy, "but not how any one would want to leave here."

"We shall start our adventures this very day," said Uncle John. "Now we are going in a train with noisy ears which runs along on tracks right through the ground."

"Oh," shivered Dorothy, "it will be dark and I'll hate it. Let's have another adventure first."

"No," said Uncle John, "it won't be dark at all. In fact it will be bright enough to read story books while sitting in the cars if you wish to do so. You'll find lots of people reading."

"See," said Uncle John, "when you get there if what I have said is not so."

They were going now toward some stairs. "The trains are even lighter than these stairs and this platform," said Uncle John, as they approached the platform at the foot of the stairs.

Oh, what a big, busy, bustling cavernous place it was. There were trains stopping, there were some going wild, zing past as if they were running away. Douglas and Dorothy with Uncle John got into one of the long rows of trains which had stopped and almost were trampled upon by several people. What a rush they were all in! How different from the country! The rows could always wait a few minutes to be milked.

But at once they were off again. A banging of doors, after the guards had called out to everyone to "Watch Your Step."

They had never had any one say that to them in the country. It was nice to think that everything was so thrilling and dangerous that one had to watch every step in the city. That was a most wonderful feeling for two children to have who had never been near a city before in all their lives!

Now they were off. And every once in awhile they stopped, while people rushed off and guards called out names of stations.

Then they went rushing madly through semi-dark tunnels which they looked at through the front platform of the first car. Dotted all along were queer mysterious lights, purple red, green, blue, all signals for the motor men.

"It would be rather fearful if anything happened to the motorman in one of these dark tunnels," said Douglas.

"Oh, what a thought," said Dorothy, who was both terrified and fascinated by the subway.

"You needn't worry about that," said Uncle John. "Should anything happen to the motorman—or should he drop his hands, the cars would all automatically stop—and that means stop of their own accord. That is a modern wonder."

Lady Astor Depicted in Role of Autocrat

Lady Astor is particularly good to the young men of the American Embassy. She has decided ideas about evening hours for parties, however, that don't always square with the fancy of her guests. At a dinner and reception she gave for the duchess of York she showed the majority of the people home shortly after they had dined.

The gay younger crowd, however, could not be easily disposed of, and Lady Astor, withdrawn from ballroom to dining room, and through the halls letting full snuffly hints that as far as she was concerned the festivities were over. She told the orchestra to go home.

Presently Lady Astor announced in no uncertain tones that if the young people had any homes to go to they were to live themselves in that direction and not to waste time.

"I am sleepy," said the American-born postess, "and you should be if you're not." Silence, and darkness soon enveloped the Astor mansion.

"DANDELION BUTTER COLOR"

A harmless vegetable butter color used by millions for 50 years. Drug stores and general stores sell bottles of "Dandelion" for 35 cents. Ad.

Tangier Noted as City of Intrigue

Every one in Tangier, Morocco, is either a spy of some government or interest concerned in Moroccan affairs or is being spied upon. Probably the majority of the spies are volunteers, enthusiastic amateurs who get a great thrill out of strolling and whispering about. They give a certain comic opera air to the place. If one goes to Tangier for anything other than the ordinary tourist visit, the chances are he will require a private spy of his own, assigned to follow him about and report his actions and intentions to the French or Spanish authorities. With all its amusing features, the spy industry of Tangier has some excuse for being. While Abd El Krim was still a power, it was at the tables of the Cafe Central that many of the deals for the shipment of contraband arms were made. Because of its position on the strait of Gibraltar, within sight of the European shore, the city always has been a place of intrigue.—New York Times.

DEMAND "BAYER" ASPIRIN

Take Tablets Without Fear If You See the Safety "Bayer Cross."

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 26 years. Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

A Canadian Cathedral

Five ancient stones forwarded by the authorities of Canterbury have been sent to Victoria, B. C., to be incorporated in the new cathedral there, the cornerstone of which was recently laid. The stones were first used in building the Abbey church of the Monastery of Saint Augustine between A. D. 597 and A. D. 605. Later, they were built into Canterbury cathedral itself. The Cathedral of Christ church, British Columbia, in which they will be incorporated, will have two towers, rising to a height of 135 feet, and joined by an arch 85 feet high. A central tower will rise 185 feet above the level of the nave floor, and will be visible all over Victoria and far at sea.

A Lady of Distinction

Is recognized by the delicate, fascinating influence of the perfume she uses. A bath with Calumet Soap and hot water to thoroughly cleanse the pores followed by a dusting with Calumet Toilet powder usually means a clear, sweet, healthy skin.—Advertisement.

Why Propose?

Larry:—Dad, there has been something I've wanted to ask you for weeks and weeks. I—
Gloria:—It will take place a week from tomorrow, dear. Mother and I have it all planned.

Prominent Pueblo Man Quickly Restored to Health
Well-known Contractor a Victim of Nervous Indigestion, Loss of Sleep and Dizziness. Strength Restored. Praises Tanlac

Pioneer blood flows in the veins of Frank Good, a prominent Pueblo, Colo., contractor. But even his brawn, muscle and splendid health broke under a strain. "Fit" left its mark and threatened his life.

"I had almost given up hope of ever getting well," said Mr. Good, "when I began taking Tanlac. My strength had vanished, sapped by the poisons that raged through my system eating away brawn, undermining health and leaving me a human wreck. My arms and legs were so weak they were almost useless. When I walked dizzy spells made me reel. My stomach was so upset that I couldn't eat without bloating and suffering from tormenting indigestion.

"I followed the advice of a friend and began taking Tanlac. I recommend it to anyone ailing. "This tonic worked wonders. Pain vanished. Quickly my old strength returned. I began to have a great appetite and ate everything without a sign of pain. Tanlac certainly put me on my feet, made me stronger, gave me better health than I have had in years."

Tanlac often banishes pain that ravages health and builds up strength. It helps free the system of poison caused by constipation and sluggish liver. It is nature's own remedy made from roots, herbs and acids according to the Tanlac formula.

Banish sickness from your life, enjoy the benefits of strength and golden health. Begin taking Tanlac. The first bottle often brings surprising results. Ask your druggist for Tanlac—today!

Fish Travel Far to Escape From Storms

That fish are capable of swimming hundreds of miles seeking refuge from storms has been proved in the waters of St. Andrew's bay, at Panama City, Fla., according to a dispatch from that place. Some of the local fishermen returned with an enormous catch of a kind of mullet that is never seen in those waters. Its habitat is the Gulf of Mexico off the southernmost shores of the west coast, a distance of 300 or 400 miles. Large schools of various kinds of fish foreign to this district have been seen in the gulf outside the city in the last few days swimming in this direction. In an apparently exhausted condition. Another interesting occurrence, but one which preceded the storm, in this section, was the fact that hundreds of thousands of gulls flew into the harbor and its connecting bays for several days prior to that event.

Radicals!

Diner—These sardines are terrible!
Waiter—But they're imported, sir.
Diner—Well, they ought to be imported, every one of them.

There are three folding segments in a new automobile wheel that is claimed to be fitted in tires with a minimum of effort.

Confirmation Wanted

Dear Friend—Why don't you ask your husband's advice on the matter? Himself—I intend to, as soon as I decide on what I'm going to do.

Overdoing?

Hurry, Worry and Overwork Bring Heavy Strain.

MODERN life throws a heavy burden on our bodily machinery. The eliminative organs, especially the kidneys, are apt to become sluggish. Retention of excess uric acid and other poisonous waste often gives rise to a dull, languid feeling and, sometimes, toxic backaches and headaches. That the kidneys are not functioning perfectly is often shown by burning or scanty passage of secretions. More and more people are learning to assist their kidneys by the occasional use of Doan's Pills—a stimulant diuretic. Ask your neighbor!

DOAN'S PILLS 60c

Stimulant Diuretic to the Kidneys
Foster-McLure Co., Mfg. Chemists, Buffalo, N. Y.

Injection of a new kind of all rayless doctors to make better X-ray studies of the lungs and chests of tuberculosis patients.

Children Cry for

Fletcher's CASTORIA
MOTHER:—Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitations, always look for the signature of *W. C. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

Love's Argument

"But I told you I don't love you."
"Well, experience is the best teacher."

There is nothing to be gained by being a knacker.
Candor is the brightest gem of criticism.—Disraeli.

Good Artificial Milk

Artificial milk, which is asserted to possess all the qualities of fresh cow's milk, is to be manufactured in Denmark. The product is said not to be merely a substitute for milk as the real buttermilk is replaced by vegetable fats and the addition of choline gives it character of fresh milk.

SOUND HEALTH

demands pure foods. To have easily digested bakings use Calumet. Every ingredient officially approved by U. S. Food Authorities.

CALUMET
THE WORLD'S GREATEST
BAKING POWDER
MAKES BAKING EASIER—IT'S DOUBLE ACTING
Sales 2 1/2 Times Those of Any Other Brand
