# BIG JIM ORE BODY A SENSATIONAL FIND

## PERSONAL MENTION

Miss Marguerite Davidson of Pittsburgh, Pa., and C. Munday Johnston of Dayton, Ohio, were married in Tucson early Sunday morning at the home of Mr. and Mrs. Harry A. De Ford. The ceremony was performed by Justice of the Peace Howard Keener in the presence of Mr. and Mrs. De Ford and Miss Grace Van Osedale of the San Rafael Valley. The young couple are well known here, having been guests at different times of the Commercial hotel for lengthy periods. Following the ceremony, Mr. and Mrs. Johnston left for Nogales, where they have taken a cottage on Ellis street.

James Ritchey has taken a lease on the Arizona-European mine, of which he formerly was superintendent.

Val Valenzuela Jr. and the editor were in Nogales today on business.

County Ranger Jim Kane was an official visitor in Nogales Monday.

Gus Yeary of Elgin was a Nogales visitor Monday.

Mr. and Mrs. G. L. Stevens were county seat visitors Monday.

Charles Everhart of Vaughn was a visitor Monday in Nogales.

Five hundred head of cattle were shipped Monday from Sonoita by Vail & Ashburn.

Jim Rountree, who has been seriously sick with a mysterious disease in a Nogales hospital for several weeks, has recovered partially and has been taken to an apartment by his sister so she can give him her undivided attention.

Immigration Officer Lou Quinn was a business visitor to Nogales Monday.

Ladies' silk hose, all colors, special sale, \$1.00. Washington Trading Co.—Adv.

John Hoy, well-known mining man of Nogales, a former resident of Patagonia, died last Friday of heart failure on board a Southern Pacific train near El Paso while en route to Nogales. He is survived by his widow and several children, who reside in the county seat.

Paint contractors are figuring on the painting of the Commercial hotel.

Miss Ruby Lattimore, national field secretary of the Camp Fire Girls, called at the Patagonia Union High School today and addressed the girls. She was accompanied by County School Superintendent Mrs. Grace A. Farrell.

Imported pongee, natural color, 80c yard. Washington Trading Co.—Adv.

Mr. and Mrs. Munday Johnston, who have been spending the summer at the San Rafael Valley ranch of Miss Grace Van Osedale, have moved to Nogales, where they will reside for the winter.

Carl Zinsmeister of the Circle Z ranch was a Nogales visitor Monday.

Sanitos table cloths, beautiful patterns. Washington Trading Co.—Adv. Mrs. O. V. Kinsley was a county seat visitor Tuesday evening.

Mr. and Mrs. C. L. Northerat were in the county seat Tuesday.

Pat McCarty was a Nogales business visitor Monday.

### OH, EMERY!

Chalfant's peanut brittle is a real home-made confection. Fancy boxed candies for the "particular" trade. Try em out. 235 Grand, Nogales.—Adv.

### Fined \$10 for Disorderly Conduct

Monday morning Constable Jim Kane brought Joaquin and Joe Quiroga and Lorenzo Rodriguez into the justice court and filed a complaint charging them with fighting and disturbing the peace. Two of them still carried the marks of battle and the third, Joe Quiroga, was fresh as a daisy, having been guilty only of striking Rodriguez on the back of the head with a rock. Too much tequila is

## STATE FAIR PROGRAM NOV. 8-13

**Monday—Opening Day**  
9 a. m.—Official opening of the fair. Judging begins in all departments.  
12:30 p. m.—Band concert.

1:30 p. m.—Beginning of grandstand program: Five circus acts, including the famous Flying Colonas, 'Freckles,' the movie dog; Blatherwick Kiddies, Losche and Sterling, and the Lime Trio. Also the Mayse Aerial Circus, daily whippet races, eight feature horse races.

3:30 p. m.—Phoenix High School vs. Albuquerque football game; Gladway and all carnival shows open until midnight.

**Tuesday—Arizona Day**  
9 a. m.—Judging continued in all departments.

1:30 p. m.—Entirely new three-hour grandstand program.

3:00 p. m.—Yuma High vs. Miami football game. Gladway and all carnival shows open until midnight.

**Wednesday—Indian Day**  
9:00 a. m.—Judging ends in all departments.

10:00 a. m.—Beginning of special Indian amusements and sports.

10:30 a. m.—Opening of American Kennel Club sanctioned dog show.

1:30 p. m.—Third day of big grandstand program.

3:00 p. m.—Gila College vs. Phoenix Indian School football game.

**Wednesday Night—War Veterans' Night**

A world's championship wrestling match between Joe Stecher, the title holder, and George Kotsanos, the Greek Adonis. Also fireworks, vaudeville acts, two bands and several preliminaries.

**Tuesday—Armistice Day**  
9:00 a. m.—Start of special Armistice Day program.

10:00 a. m.—Judging ends in dog show.

12:30 p. m.—Band concert on the grounds.

2:30 p. m.—Phoenix Junior College vs. El Paso Junior College football game. Special Armistice Day program for the ex-service men.

**Friday—Children's Day**  
Special program presented for the children by the Arizona Free State Fair Commission.

1:30 p. m.—Beginning of grandstand program.

2:00 p. m.—"Mutt" Show and Boy Scout parade

2:30 p. m.—Big livestock parade.

3:30 p. m.—Tempe Teachers College vs. Flagstaff Normal football game. Gladway and carnival shows open until midnight.

**Saturday—Auto Race Day**  
9:00 a. m.—Gates open for last day of 22nd annual state fair.

1:30 p. m.—Feature grandstand program.

2:00 p. m.—Championship auto races for cash prizes totalling \$2000. Gladway and carnival shows will remain open until midnight.

## FEDERAL TROOPS PUT GALLEGOS TO FLIGHT

Mexico City, Nov. 4.—Nineteen combatants are dead, many wounded prisoners have been taken and a large number of saddle horses rounded up in an encounter between federal troops and rebels headed by the former general, Rodolfo Gallegos, in the state of Guanajuato, according to a communication from the Mexican minister of war.

With the dispersal of this band, the army chief of staff asserts that Mexico is free of any considerable rebellious movement except that of the Yaqui Indians.

## Catholics Believer Responsible

Gallegos' war cry was, "Long live Christ, king." The government openly claims that his short lived movement was backed by official Catholic elements in an attempt to stir up sedition against the official regime. Upon turning from the government's accusation, the Catholic board of strategy issued a written declaration denying the charge and reiterating its innocence of having ever attempted to upset the public order.

The forces of Gallegos are reported to have totaled 80 men inadequately armed. They were surprised by the chief of military operations in Guanajuato, evidently before they were properly organized. After the engagement, in which rifle fire was exchanged for four hours, the rebels fled to the hills.

## World's Title Wrestling Match to Be Held At Arizona's Free State Fair at Phoenix

Phoenix, Nov. 5.—More than 2000 feet of canvas and lumber will be used to construct the temporary arena for the Joe Stecher-George Kotsanos world's championship wrestling match at the State Fair grounds on War Veterans' night, November 10, it was announced today by the contractors in charge.

The contractors will have exactly two hours in which to put up the arena, erect the walls and place the ring and chairs in order. Wednesday at the State Fair will be Indian day, and the braves will hold forth until 5 o'clock. The minute the Indians leave the grounds the workmen will take charge. It will be a real job—for the grandstand gates will be thrown open at 7 o'clock. In those two hours 50 men will be required to labor at top speed.

Electricians and carpenters today were planning their work so that all would be in readiness at 5 o'clock of the big day. The grandstand will be brilliantly lighted as will the bandstands and the ringside. Over the ring will be three huge lights so that the championship match will be visible to every patron of the stand.

It was emphasized by the officials that only half the grandstand, the north half, is being used for the Wednesday night title match, fireworks, band concerts and acts. E. W. Arnold, commander of Phoenix Post No. 50 American Legion, is already worrying where the boys will put the crowds. However, with half the grandstand, box seats and also ringside seats, those in charge believe that there will be ample room for all the visitors.

All Legion officials were emphatic in stating that the Stecher-Kotsanos fight would be a genuine world's championship, two out of three falls affair. Incidentally, this will be the first time in the history of Arizona that a real world's championship sporting event has been staged here. Many of the Phoenix fans are inclined to believe that Kotsanos is the man to life the champ's crown, if anyone can.

Sport experts everywhere class Joe Stecher as one of the most colorful athletes of the present day. At three different times he has been champion of the world. At the age of 21, Stecher threw Charl Cutler with the body scissors. Later on he was defeated by Earl Craddock, but regained it in 1920. From then on he has met and defeated all comers.

In a coast paper it was shown that Stecher makes more money per year than Dempsey did. From January to June of this year Stecher made \$145,000. In that period of approximately 23 weeks, Stecher had defended his title exactly 30 times. The scissor king is now said to be a millionaire.

Stecher has built up his leg power until they are no wad to have a pressure of 2800 pounds. In training, Stecher would take a sack of grain between his legs and squeeze it until the sack burst.

The Greek Adonis, George Kotsanos, who comes here to tackle the champion, is said to be one of the most powerful men in the game today. It was Kotsanos who threw Pete Sauer at the old Capital City arena here in October, 1921. The Greek champ has perfected the wristlock hold until it is now recognized as one of the most deadly holds in existence. Of 1400 grueling mat battles, Kotsanos has lost but 11. He is a graduate of two universities and speaks several languages.

Reports from Doyle's, where the reserved seats went on sale Saturday, indicate there will be a sell-out for the big night. Mail orders for the choice duckets are still coming in, with the mining towns far in the lead.

A telegram was received last night from the Thearle-Duffield Company that the big fireworks shipment was on its way and would reach here by Tuesday. The preliminaries are now being signed up, while the acts and music have already signed on the dotted line, it was said.

## BIG TIME CIRCUS ACTS TO BE FEATURED AT STATE FAIR

Phoenix, Nov. 5.—Five big-time circus acts with some of the best-known performers in the country will be one of the features of the grandstand program during the Arizona Free State Fair, November 8 to 13, according to J. P. Dillon, secretary of the fair. Several of the acts are known to circus fans throughout the country.

Undoubtedly the best known act to be presented at the coming fair will be the famous Flying Colonas. This trio performs amazing daredevil stunts on the trapeze and rings. They have just returned from a tour of Europe, where they were honored by the titled heads of many countries. This big time act was at the state fair two years ago and was a outstanding hit of the grandstand program.

Other acts on this year's program will include "Freckles," the famous

## GUADALUPE MEDRANO SUFFERS FRACTURED SKULL

Mystery surrounds the discovery Monday afternoon of Guadalupe Medrano in her room at the home of her aunt, Mrs. Nicholas Johnson, suffering from a basal fracture of the skull. She was taken to a Nogales hospital for treatment, and so far has not regained consciousness long enough to tell what caused the injury.

Sunday night, in company with a young man from Tucson and a local couple, she attended a dance at Harshaw. About 3 o'clock Sunday morning the four young people returned from the dance in good spirits, according to one of the party. The couple accompanying Lupe and her escort were taken to their homes and the injured girl was taken to the home of her aunt. Mrs. Johnson was not notified that the young lady was injured and only discovered the fact when she heard moaning in the girl's room. An investigation resulted in the discovery that the girl was seriously injured and Dr. Hartmayer was called in to make an examination.

The affair should be investigated by the proper authorities, as it is rumored that the girl was assaulted following the blow on the head.

It is said that the young man who was with her has not been placed under arrest pending the outcome of the girl's condition.

movie dog. This Boston bull provides a real thrill with his light-wire act and his leap for life from the top of a 30-foot ladder. He is said to be the only dog in the world who can turn around on a wire.

Losche and Sterling have a thrilling act made up of a series of cradle, trapeze and ring acrobats. Ralph Losche is said to be the fastest, neatest and best appearing athlete in his chosen line. Miss Sterling, the stunningly dressed and perfectly formed young lady who at times vies with her clever partner is the same girl who recently won first prize as the most perfectly formed woman in the acrobatic world. Her stage presence and ultra-fashionable costumes are said to be a revelation. Also on the program will be the Blatherwick Kiddies whose repertoire includes cowboy stunts, rope spinning, soft-shoe buck-and-wing and fast Charleston stepping.

Last, but not least, comes the Lime Trio, an act that had its premiere in London. This offering is a decided hit, due to the uniqueness of presentation. Two of the men dress as laborers and the third in dummy makeup. A small traveling case containing the figure of the dummy is so roughly handled by the men posing as laborers that the illusion becomes almost perfect.

## SANTA CRUZ COUNTY ELECTS FOUR REPUBLICANS

Two supervisors, the county recorder and county attorney of Santa Cruz county will be Republicans during the next term—all by the grace of the Democrats, who outnumbered Republicans five to one in the registration. Following is the total vote for state, national and county candidates cast in the county:

**State and National**  
McAllister 859, O'Connor 956, Luke 679, Hughes 753, Hayden 642, Cameron 673, Douglas 838, Baughn 472, Hunt 767, Clark 784, Kerby 808, Barnum 509, Frohmiller 1022, Callaghan 977, Murphy 889, Gale 510, Case 771, Thompson 638, Vaughn 800, Kirk 498, Foster 828, Stallings 472.

**For the County**  
Sanders 336, Miller 368, Barnes 193, Hannah 278, Roath 231, Henderson 168, Brown 1021, Chalfant 530, Ackley 1645, O'Neill 472, Robins 729, Noon 826, Farrell 893, Griffith 617, Farrior 886, Burgoon 614, Carroon 706, Jones 817, Lee 1044, Bettwy 878, Collic 643, Walker 1070, Hardy 800, Hathaway 713.

The business of the county will be in the hands of a Republican board of supervisors, who will be advised by a Republican county attorney. This is the first time since 1910 that a majority of the board of supervisors has been Republican. E. C. Clark, Republican candidate for governor was given a majority of 17 votes in Santa Cruz county against Gov. G. W. P. Hunt. Carl Hayden, Democrat, received a substantial majority over Ralph H. Cammeron, Republican, for the office of United States senator.

Up to the time of going to press it appears that Governor Hunt has been re-elected by a narrow margin over E. C. Clark. The race was the closest fought in the state and national races.

## ANNIE OAKLEY DIES IN OHIO

Greenville, Ohio, Nov. 4.—In the hills of Drake county, Ohio, where the girl, Annie Oakley, learned to handle a rifle, will rest the ashes of the noted marksman, who was perhaps the greatest woman shooter of all time.

She was 66 years of age. In her home town she was known as Mrs. Frank Butler. She had spent many years of her life in the show business.

A well known woman is a famous Mrs. Malaprop as regards her speech. "And what in France," asked a friend, "did you enjoy the most?" "Well, I think," said the lady, "it was the French pheasants singing the 'Mousseline'."

If you can't boost this mining camp, don't knock it. It's going to boom!

## SINKING CONTINUES IN HIGH-GRADE SULPHIDES

Strike Said to Be the Biggest and Best Ever Struck in the Southwest; Into 40 Feet of Ore

The Big Jim mine at Harshaw continues sinking into a vein of high grade sulphide ore which is the sensation of this camp. Approximately 40 feet as been sunk in the ore body with no indication of a footwall or hangingwall. The ore is running better than \$50 a ton as it comes from the shaft and the employees, who all own stock in the company, are jubilant over the mine.

## Work to Be Pushed

President A. G. Keating of the Big Jim Mines, Inc., who spent a few days here from Los Angeles, stated that the work of developing the ore body would be pushed as rapidly as possible in an effort to determine its size. It is enormous as it is in thickness, but its length and breadth can be determined only after much drifting has been done, which will be undertaken soon, as Superintendent J. J. Peterson stated while in town yesterday that a station would be cut soon, no matter whether the ore body had been gone through or not.

## Ore Increasing in Value

Superintendent Peterson states that in all his mining experience, which covers many years in many states, he has seen nothing to compare with this new strike, either in size or value of the product. He predicts a wonderful future for the Big Jim.

Instructions from the general manager are said to be to sink the shaft 200 feet more. Drifting will then be done to tap the ore body from the bottom of the main working shaft, which will be struck at some distance from the shaft, the vein lying on a slight incline. However, the entire 200 feet may be in ore, which is not at all improbable, as the values are increasing with each round of shots.

Sinking the shaft is rather a slow process, owing to the fact that the mine is making some water, and following each round of shots time must be allowed to get fresh air into the hole so the workmen can safely go down to muck out the ore and timber the shaft.

## Water is Helpful

Superintendent Peterson states that the mine is not making water enough to interfere with the work of sinking, but that some time is consumed in bealing following the mucking out of the ore. The water, however, a very welcome, as it supplements the supply needed to run the mill, which is handling the ore as it comes from the shaft.

## AMERICAN EDUCATION WEEK

Gov. G. W. P. Hunt has set aside as American Education Week the week of November 7 to 13. The observance of this week is being sponsored by the American Legion, the National Education Association, the American Bar Association and the Daughters of the American Revolution, with more than 150 national organizations cooperating.

It is urged that every community of the state study its educational plans, its educational ideals, and the atmosphere in which its children are brought up. Parents and teachers are requested to visit each other in an effort to solve the common problems of children. Such exercises are urged in the schools and elsewhere as will teach every boy and girl his or her responsibilities as a citizen, train him for democratic living and maintain and perpetuate the best in the life and ideals of the Republic.

## Mabel Strickland Seriously Injured

New York, Nov. 4.—Mabel Strickland, champion horsewoman, was seriously injured at the opening here tonight of the World's Series Rodeo when she lost her hold and fell under her mount. Physicians say her injuries may prove fatal. She had swung herself out of the saddle and under the neck of her mount when she lost her grip and fell. The horse's hoof struck her head and she received a possible fracture of the skull.

## Another Substitute

Clarence (finding a piece of rubber tire in his hash)—There's no doubt about it, the motor is displacing the horse everywhere.

"PROMISE-ALL" RALPH MEETS HIS WATERLOO

That the voters are doing more thinking for themselves and investigating the records of men seeking re-election—as well as those seeking of fees for the first time—was clearly demonstrated at Tuesday's election, when the voters of Arizona, by an overwhelming vote, defeated Ralph M. Cameron for re-election to the United States senate.

Cameron had promised something for the voters in nearly every district in the state of Arizona, and some of the promises he made he knew he could not fulfill. He had made similar promises preceding his election six years ago.

Added to the promises he made during the present campaign were his extravagant claims to credit for every appropriation and every remedial measure for Arizona by the United States government during his term of office.

In making these claims, Mr. Cameron overlooked the fact that the government of the United States keeps an official record of its business transactions and that the people of the country have access thereto. He might have gotten more votes had he been more modest and given credit where credit was due.

So "Promising Ralph" has been relegated to the political "ash heap" to ponder over the matter of whether it is not best to give "the other fellow" his just dues and promise only those things that can be delivered—for Abraham Lincoln once said "You can't fool all the people all the time."

Carl Hayden has been faithful to his trust in Washington through 14 years of service, and his promotion in the senate will mean another long term of activity in behalf of the people of Arizona and the country as a whole.

MINING A COMMUNITY BUILDER

Besides the wages that run into millions of dollars annually, large mining companies in western states buy hundreds of thousands of dollars' worth of local state products every month—explosives, hay, grain, vegetables, printing, fuel and everything a great corporation needs. Most such corporations have adopted a definite policy of buying whatever local people can produce. Most of them offer special terms for the purchase of their corporate stock by employees and citizens right where the business is located. Such companies are the largest taxpayers on city, county and state assessment rolls.

The doctrine of co-operation is being preached and practiced today more by the great mining corporations than by the smaller establishments. The great metal mines of Arizona are models in this line of industry. They are representative of the community because they are the community itself, for in most cases, the community can raise no higher than the standard set for it by the mining company.

As Arizona mining towns surpass those in any other section of the country, they offer good evidence of the sound basis upon which our mining properties have been developed and operated.

THE PEOPLE PAY ALL TAXES

On the subject of railroad taxes, J. M. Fitzgerald, former president of an eastern railroad company, says: "Taxes are the one element of transportation cost over which railway management has no control, and taxes are constantly increasing. For the first seven months of this year railroads paid nearly 17 1/2 millions more in taxes than they paid for the same period of 1925. "If railroad taxes are increasing, your taxes are increasing—because railroad taxes are largely state and local. In other words, the same taxes as are paid by the average citizen. "The idea that taxes are paid by corporations and the rich may be pop-

"NEWS and PROGRESS" No. 8

ECONOMIC SIGNIFICANCE AND SERVICE OF THE AMERICAN NEWSPAPER AND NEWSPAPER ADVERTISING—From latest volume in Manhattan Library of Popular Economics, republished in serial form through courtesy of Bank of the Manhattan Company, New York.

HOW ADVERTISING CREATES NEWS

VERY successful newspaper editor possesses the faculty of being able to sense the existence of an interest on the part of his readers in any subject, and the degree of his success is measured largely by the manner and extent of his response to that interest through the news and editorial columns of his publication.

But why mention a fact that is so obvious and commonplace? What has it to do with the purely economic functions and influences of the newspaper? What relation has it to such things as production and distribution, merchandising and newspaper advertising?

The answers may be found by placing through the columns of any modern newspaper and comparing them with the newspapers of a generation ago which advertising as an arm of merchandising and an educational force was still a sprawling infant in swaddling clothes. The answers may also be found in those numerous departmental sections of the newspaper which are now devoted to such subjects as real estate, finance, automobiles, books, theatres and moving pictures, radio and many others. They demonstrate in a striking way the fact that newspaper advertising not only is news but that it makes news; that through arousing widespread interest in any given subject a public desire is created for more news which the editor is quick to sense and to satisfy through the news and editorial columns of his paper. Likewise news produces advertising, for the modern merchandiser of goods or services is, like the editor, eager to respond to the desire or demand which follows close upon the heels of an awakened public interest.

For example, only a few years ago, the newspapers began to print references to interesting experiments by certain scientists in radio phenomena. These notices were brief, for the most part, and seemed to come from practical affairs as archaeological research in Egypt or Yucatan. Less than a decade later in almost any issue of any newspaper, could be found a regular radio section giving the programs of a number of stations, and often a good deal of additional news and general information. Various papers, indeed, issued weekly radio supplements. Since it is the newspaper's business to study and meet the news requirements of its readers, this demonstrates the existence of a large interest in the subject of radio on the part of the public.

The swift rise of this interest is an interesting illustration of how the advertising and news columns of the newspaper have each reacted upon the other. The attention of manufacturers first was attracted by the published accounts of these radio experiments. They succeeded in producing sets that could be used by the layman, and then undertook to create a market for their sale. This led them into the newspaper advertising columns, where they

blatant—it may sound good—but it means nothing, because the burden of taxation really falls on the average citizen. Every dollar of interest on any public debt is a dollar of tax, and every dollar of tax is a dollar added to the cost of living. Somewhere between production and consumption, food, fuel, clothing—in fact all the necessities of life—carry the tax burden.

GOVERNMENT BY MINORITIES

Voting ought to be viewed as a privilege rather than an irksome duty to be avoided whenever possible. It should be regarded as an opportunity to function as a citizen—an obligation of citizenship in a country where citizenship really means something, says the Townsend (Mont.) Star.

The rapid decline of the popular vote in the last score of years shows that far too many people have subscribed to the false doctrine that a few votes more or less will not change the result, and that they need not waste the time or energy to vote. They neglect to recognize that the grand total is made up of single votes—that one voter can speak as emphatically and decisively as a nation.

A full and free expression of the popular will is not recorded when more than half of the voters remain at home refusing to do their duty as citizens.

The growing tendency to remain away from the polls is alarming, and is an actual peril confronting our representative form of government. Any citizen who does not vote, unless he has good and sufficient reasons for not doing so, is not living up to his responsibilities, and, in the last analysis, does not deserve citizenship in the "Land of the free and the home of the brave."

"MUTT" SHOW FEATURE OF THE FREE STATE FAIR

Phoenix, Nov. 5.—A "mutt" show, under the auspices of the Arizona Boy Scouts will be one of the features of Children's Day at the Arizona Free State Fair, November 12, according to J. P. Dillon, secretary of the fair.

Alley canines will be accorded the same honors as the house aristocrats at this show, according to those in charge. Stray hounds, homeless waifs and shabby runts are all welcome, as the competition is open. Although the Boy Scouts will be in charge of this outstanding display of howling canines, any youngster can enter his pet in the show.

All dogs will be bunched just like the big fellows in the regular dog show to be held on Wednesday and Thursday of fair week. After the large assortment of dogs has been judged they will be paraded in front of the grandstand. There will be many unique and interesting sights at the State Fair, but none will create more applause or praise than the kid-

Bank of the Manhattan Co., N. Y. Public interest in any topic finds quick response from both editor and advertiser

was secured from the public during the single year 1925. The United States has some twenty million individual holders of stocks and bonds, and their foreign investments alone, exclusive of government debts, amounted, in the same year, to approximately \$12,000,000,000. Such figures indicate a remarkable extension of popular interest in finance, to which the financial news and advertising columns minister. All told, it is a new and wonderful chapter in American life, one which may be visualized by comparing newspapers of yesterday and today. The radio, the automobile, the investment bond, are but examples among hundreds. News and advertising columns alike are filled by those who seek to learn, to buy, to sell, and each group in turn reinforces the other, as the volume of production and distribution broadens. In the whole process one essential agency has been consistently and constantly at work to inform and to bring together scientist, inventor, reader, maker, seller, distributor and buyer. That agency is the newspaper. (Next article, "Following the News.")

SCHOOL NOTES

(Genevieve Amado, Editor) The Primary pupils are learning the primary colors, and made balloons to represent them.

Under the supervision of Mrs. Swoyers, great improvement is seen in writing.

Several are taking lessons on the guitar at the noon hour of Thursday.

The Third grade dramatized the story of "The Kitten Who Wanted to Be a Christmas Present" for Mrs. Fortune's room last Friday. The following were the characters: Myrtle Hooks "Kitten" Consuelo Perez "Squirrel" Sam Saldate, Frederick Barnett and Maria Sinohul "Bears" Junior Pycatt "Santa Claus"

The Second and Third grade children are doing well with their free-hand cutting. The clowns they cut out this week are very interesting in appearance.

The Seventh and Eighth grade girls entertained all the rooms Friday by giving the ghost drill and the ghost song.

The Eighth grade had a test in history this week.

The children enjoyed the half day vacation and would like to have election day come oftener.

The Sixth grade girls are about through making slips. Some will begin making Christmas presents.

The Second grade dramatized "The Lion and the Mosquitoes" this week.

The Sixth grade will have a final test in fractions this week.

This English Checkless Checker Carries 15,000 Faces in Mind

LONDON—How many faces do you carry in your mind? When the 350 American hotel chiefs who recently visited Europe were entertained to their banquet of welcome at the Savoy Hotel in London, they were provided with a preliminary thrill by a white-haired man who took their hats and coats in the main cloakroom. This was Joseph, in charge of the electric elevators which bear guests' hats and coats away to an upper room. Joseph checked their hats and things all right, but he never gave a check in return. Joseph never does. He claims to have the most remarkable memory of its kind and the most photographic mind in the world. He claims to carry over 15,000 faces in his mind. He doesn't know the names of them all, but if one leaves a hat or stick with him and comes back for it in twelve months, Joseph never forgets. About six months ago a trio of prominent London specialists in brain and psychology examined Joseph to try and find the secret of his particular "complex." Eventually they put his remarkable memory down to the fact that Joseph had what they called "an over-sensitive brain." Joseph declares that he has never encouraged nor cultivated his memory and has never even learned a piece of poetry by heart. If you open a book in front of him, however, let him gaze at it while you count seven, he will recite to you every word on the page.

"FORGET-ME-NOT" DAY NOV. 6TH

Governor Hunt has issued a proclamation setting aside Saturday, November 6, 1926, as "For-Get-Me-Not" day, as follows:

WHEREAS, When the call to arms was sounded on April 6, 1917, and the young men of our country were called to the colors, if necessary to make the supreme sacrifice, the hearts of the American people were touched, and pledges were made to the boys that a grateful nation would always stand ready to acknowledge their services, comfort them in their distress, heal their wounds, cure their illnesses, provide employment for them upon their return, and succor and comfort the sorrowing relatives of those who failed to return; and

WHEREAS, The war is ended, thousands of disabled veterans are scattered throughout the country, thousands are in the hospitals, the blind, the lame and the halt and crippled and maimed men are endeavoring to earn a livelihood under cruel, keen, competitive conditions; and

WHEREAS, The people of our nation, occupied with the multitudinous problems of everyday existence, have fallen into the habit of failing to remember the drifted cast up by the awful calamity of war; and

WHEREAS, The Phoenix Chapter No. 1, Disabled Veterans of the World War, have set aside Saturday, November 6, 1926, as "For-Get-Me-Not" day, and the people of our state are asked to remember the sick and disabled veterans who are still paying the penalty of the world's madness;

NOW, THEREFORE, I, George W. P. Hunt, governor of the state of Arizona, do hereby designate Saturday, November 6, 1926, as "For-Get-Me-Not" day, and I call upon the people of the state of Arizona to visit the disabled veterans of their acquaintance and to remember the veterans of the war in the hospitals of the state by sending them flowers and material things that will contribute to a fund to assist the organization of Disabled Veterans of the World War in carrying on its work to alleviate and aid the veterans who are in need of assistance.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the great seal of the state of Arizona to be affixed.

Done at Phoenix, the capital, this 30th day of October, A. D. 1926.

GEORGE W. P. HUNT, Governor. (SEAL) Attest: JAMES H. KERBY, Secretary of State. By R. E. McKillen, Ass't. Secy.

IN THE SUPERIOR COURT Of Santa Cruz County, State of Arizona

Action brought in the Superior Court of Santa Cruz County, State of Arizona, and the Complaint filed in the said County of Santa Cruz in the office of the Clerk of the said Superior Court.

STATE OF ARIZONA, Plaintiff, vs A. S. NOON, et al, Defendants. IN THE NAME OF THE STATE OF ARIZONA TO A. S. Noon, Cayetano Yngo, Alfredo Monge Jr., Juan Robles, A. Ojeda de Bufando, Conrado Vastri, Alfredo Urea, John H. Maney, Avellina B. Leon, Charles Genardini, Southwestern Investment & Realty Co., Antonio Lopez, George T. Balachy, William Renny, Lucas D. Rodriguez, Miguel F. Romo, Border Investment & Realty Co., a corporation, Yellow Jacket Mining Company, a corporation, Defendants, Greeting:

In a suit brought to recover delinquent taxes, YOU ARE HEREBY SUMMONED and required to appear in an action brought against you by the above-named plaintiff in the Superior Court of Santa Cruz County, State of Arizona, and answer the Complaint therein filed with the Clerk of this said Court, at Nogales, in said County, within twenty days after the service upon you of this Summons, if served in this said County or in all other cases within thirty days thereafter; the times above mentioned being exclusive of the day of service; or judgment by default will be taken against you.

Given under my hand and seal of the Superior Court of Santa Cruz County, State of Arizona, this 14th day of October, 1926.

(SEAL) ROBT. E. LEE, Clerk of the said Superior Court. Publish Oct. 15, 22, 23; Nov. 5, 1926.

No Secrets to Making Perfect Cup of Coffee

Can Be Achieved By Following A Few Simple Rules Says Famous Cooking Expert

By Mildred Maddocks Bentley Formerly Director of Cook, Housewifery Institute

What is the secret of first-rate coffee—the kind that starts the day right—that makes you feel "like a million dollars"? Literally hundreds of women—and a surprising number of men—have asked me this question in one form or another. And it's an important one—for what can be more blighting to domestic happiness than a cup of muddy coffee or coffee improperly "creamed"? And, on the contrary, what can be more exhilarating than a good cup—fragrant, golden, delicious? Luckily there's no hidden secret about making and serving the perfect coffee—it's just a matter of minding your p's and q's and following a few simple directions.

Selection of Coffee There are many excellent brands of coffee in the market—the choice of one of these is largely a matter of individual taste. But I do want to say that usually coffee in the bean retains its flavor longer than in the ground form—so, if possible, buy the whole beans and grind your coffee fresh for each meal. If, however, the breakfast hour—or fifteen minutes—is too hectic to admit of this extra step, at least keep your ground coffee in an air tight container—a glass fruit jar for instance. And it's well to remember that the more finely the coffee is ground, the easier it is to extract its full strength and flavor—consequently finely-ground coffee is economical and time-saving.

The Coffee Pot Connoisseurs maintain that coffee brewed in a metal pot has a less delicate flavor than in a container of glass, stone-ware or agate. Whatever kind of coffee pot you prefer—it should be scoured frequently and occasionally "boiled out" with water to which a pinch of baking soda has been added—then rinsed, dried, and left uncovered.

If a percolator is used, the pipe should be carefully washed every day with a brush to remove all scum from the preceding brew. For drip coffee, if you do not have a special drip coffee pot, an ordinary one equipped with a double cheesecloth bag will serve the purpose. The cheesecloth should be washed in cold water after using and renewed at least once a week. Keep the bag always moist.

The "Creaming" This I consider quite as important as the actual brewing. Good coffee can so easily be spoiled by using cream of inferior quality or the "top of the bottle" if carelessly poured on. In my study of food habits, I am finding that every year more and more people prefer sweetened condensed milk in their coffee. You see this kind is twice as rich and creamy as ordinary milk and furthermore already contains sugar, thus serving the additional purpose of sweetening the coffee. Try it for a few days, and I think you will agree that the condensed milk gives a delightfully rich, smoothly blended drink, bringing out the real coffee flavor. And of course it is very convenient, as it keeps fresh without ice even after the can is opened—and the cost is extremely moderate.

Now as to the actual methods of brewing. There are several and your choice is entirely a matter of individual taste. If the directions are carefully followed, any of the methods will yield the "perfect cup of coffee"—mellow in flavor, with a delicate, fragrant aroma, free from sediment and of a dark golden hue.

Boiled Coffee Rinse the pot with hot water, put the coffee in the pot—two rounded tablespoons of medium-ground coffee to each cup of boiling water, with an additional spoon "for the pot." Add a little white of egg, or crushed egg shell and about one-fourth cup of cold water, stirring briskly. Add the boiling water, place the coffee pot over heat, and bring to a full boil. Place on back of the stove or over low heat for about ten minutes to settle, before serving. Do not allow the coffee to become unseasoned by excessive pouring.

Percolated Coffee The top cup of finely-ground coffee in six cups of boiling water. Place the coffee in the strainer in the upper part of the pot and let the water bubble up through the tube, percolating through the coffee into the lower part, until the coffee in the desired strength. Five minutes being the usual time required. Serve at once. Coffee made in a percolator is not good if allowed to cook after the required strength is reached.

Drip Coffee Rinse the pot by rinsing in hot water, and wet the strainer. Measure carefully the coffee (finely-ground) allowing one rounded tablespoon for each cup of water. Place in the drip-machine and pour boiling water through the coffee very slowly. Cover and let stand to drip through and serve immediately. Do not allow the coffee to cool. If service is delayed, place the pot in or over hot water. Never reboil by placing over the fire.

Steeped Coffee In making steeped coffee use one rounded tablespoon of coffee to each cup of water, add an additional spoon for the pot. Add cold water. Place over the fire and bring quickly to the boiling point, then let it stand for a moment to settle or add a little water.

Remember—the best coffee will lose its flavor if allowed to stand. Coffee should always be freshly made and served piping hot, as soon as it is brewed. If necessary to let stand, the pot should be tightly covered and the spout closed by stuffing with soft cloth or paper, so that none of the aroma and flavor may be lost.

This I consider quite as important as the actual brewing. Good coffee can so

Card of Thanks

I desire to express my appreciation to the voters of the Third Supervisorial District for their support at the election just closed.

Card of Thanks

I wish to thank the voters of the Second Precinct for their votes and support for the office of Justice of the Peace.

A. H. GLIDSWELL.

SOMETHING TO REMEMBER! THE GREAT BIG American Legion Celebration

TO BE HELD Nov. 11th, 1926 IN NOGALES

Will be the biggest event of the year EVERYBODY SHOULD ATTEND

There will be a big military drill that will be of special interest to residents of the county. A large parade will be one of the features of the day. Many beautiful floats will be in the parade, which will be worth the trip to Nogales to witness. Come down and help the boys to celebrate Armistice Day as it never before has been celebrated.

Card of Thanks

I desire to thank my friends for their hearty support at the general election just held, and particularly the Democrats who forsook their party candidate and gave me their votes. Although defeated, I am none the less mindful of the fact that were it not for the support of the Democrats no Republican could hope for election in Santa Cruz County.

**PATAGONIA UNION  
HIGH SCHOOL NEWS**

(By Gordon Farley)

A meeting of the Constitution Committee was held in Room 1 Monday morning to draw up a Constitution for the student body.

Professor Zimmerman, as principal of the High school, shall be the leading member of the student council, shall act as the supreme court, shall have sole power to ratify or veto all rules and resolutions.

Any High school dance or activity must receive his approval before it can be given. Money derived from such an activity must be deposited in a bank and cannot be withdrawn without his signature.

Other officers will be filled by members of the student body.

With this as a basis, the committee will draw up a Constitution for an organized student body.

(By Sarah Louise Pierce)

The Hallowe'en masquerade dance which the Junior class of the P. U. H. S. gave last Saturday night was a success, both socially and financially. More than 230 tickets were sold and a clear profit of \$107.05 was realized from the dance and supper.

There must have been more than 450 people in the Opera House that night, and over half the crowd was costumed and masked.

The hall had been decorated with Jack o' lanterns, cornstalks and paper streamers of orange, black and white, and the electric lights were slightly dimmed by the orange and black shades which hung over them. Altogether, the sight was very Hallowe'en-like, rather ghostly, and, because of the varied costumes, confusing.

Andy Bettwy won the most-sought-after prize of the evening—a beautiful powder puff awarded to the prettiest man. Clyde Shields, covered with patched and repatched clothes and wearing for the occasion a four-inch nose, won the box of candy given to the funniest man in the hall. Mrs. Andy Bettwy, dressed in the loose robes and strung with the pearls of an Oriental princess, received a box of candy awarded to the prettiest costume.

The dance was such fun that nearly every one stayed until 3 o'clock, and many of them wanted to stay longer.

(By Howard Dalton)

The first class of Vocational Farm Shop boys, Lee Farrell, Gordon Farley, Fidel Valenzuela, Owen Dierking, Volney Douglas, and Howard Dalton, made a trip to Peter Bergier's ranch Thursday, October 28, to look at some sheep, as they will be expected to judge sheep at the State Fair.

The boys of the Farm Shop class took great interest in the study of the sheep, as some of the boys had been able to judge sheep before.

They studied both types of sheep—mutton and wool.

(By Volney Douglas)

Mr. Gibbs, who teaches animal husbandry, plans to take the six boys in that class to the State Fair at Phoenix to judge livestock. They will stop on the way at the University at Tucson to look at some animals, as their trip to the State Fair is so they may be in the judging of animals contest that will be held there November 8. They will probably come back on the 9th or 10th of November—with a few medals—for taking first place in the judging contests.

(By Lois Reeves)

Election day, Tuesday, November 2, the students had a vacation. Every one was very glad to have a vacation, as Saturday was the big dance and Sunday Hallowe'en and every one needed sleep. The teachers expressed the hope that all would be caught up with their sleep and ready for work by Wednesday.

Hallowe'en must have had an "aw-

**California Highway Traffic  
Reported by Farm Bureau**

12,000,000 tons of farm products

Revelation of the extent of agricultural traffic on California highways was made to the Interstate Commerce Commission by E. Abel, representing the Farm Bureau Federation at the San Francisco hearings. More than 12,000,000 tons of farm products are hauled annually over the highways of that state, Mr. Abel reported. This and other data presented are to be considered by the Commission this fall with respect to recommendations to congress regarding regulation of motor vehicles.

Gives Helpful Exercise**

Handles at the sides connected to a chain gear and actuated with a rowing movement propel a bicycle a German

has invented to afford the rider beneficial exercise. It is steered by the feet which are supported on pedals near the position of handlebars in the usual wheel.

**Sound-Sleep Period Less Than  
Five Minutes a Night**

From 1448 measurements of the soundness of sleep of twelve young men subjects at the Mellon Institute for Industrial Research, it was found that they slept without stirring for an average of only a little more than eleven minutes at a time, and, in half of the observations, the average rest period was less than five minutes in length. These facts were determined by having the subjects sleep in special beds equipped with apparatus that recorded any movement such as a change in the position of the limbs or the head. The sleepers retired at eleven o'clock and arose at seven in the morning. Factors designed to produce sound sleep, such as quiet and good ventilation, were carefully watched. In only one of the observations was the period of quiet more than three hours long. The observers concluded that the average healthy person sleeps much less soundly, that is, with much shorter intervals without noticeable movement than is commonly supposed. Fatigue after a day of hard work interfered with sleep in at least one observation. Some

ful" effect on some of the students, as several of the chairs appeared to be rather lonely on Monday morning until about 10 o'clock, when the last one struggled in with a dreary look on his face. "I wonder what the judge said?"

(By Vernon Lewis)

Saturday afternoon several of the High school students and Miss Perley, one of the High school teachers, decorated the Opera House for the Hallowe'en dance. The decorations consisted of crepe paper streamers, light shades and various Hallowe'en decorations in orange, black and white. Jack o' lanterns made from pumpkins were arranged together with cornstalks in front of the stage. Altogether they expressed the spirit of Hallowe'en.

The students said it looked like "a different old hall" after the decorating had been finished.

(By Olive Douglas)

The second period Home Economics class has been making photograph albums and annuals. The girls are making them of marbled paper, made by using oil paints on water and dipping in colored construction paper. The results were very pretty, giving a moire effect. This paper was used to cover the outsides of the albums, which were made of cardboard. These books will be used for pictures of High school students and autographs. Several of the girls are using monograms of their own initials or those of Patagonia Union High School.

This week they are beginning a study of costume design, which will comprise a study of lines and colors, and types.

**News Notes**

The Home Economics class has finished its four weeks' course in Home

subjects rested more during the first half of the night, while others enjoyed greater benefits from the last half and other periods. The tendency of the subjects was to exhibit less activity during the first hour of slumber after settling down to rest, but this steady rest began any time from ten minutes to two hours after retiring.

**Correct C-Battery Voltage  
Important**

Correct C-battery voltages in the audio-amplifier circuit of any radio receiver is important. The battery should have the proper voltage in order that the amplifier tubes may receive the correct grid bias; an incorrect voltage causes distortion. The Collector voltage should be increased if the B-battery voltage is raised, as in the practice of adding a power tube in the last stage. Assuming that the normal total B-battery voltage was 90 before the power tube was added, and a 4 1/2-volt C-battery was used, the power tube should have a plate voltage of 135 and at this voltage a 9-volt C-battery must be used. The proper C-voltage for the tube is specified by the manufacturer and should be followed carefully for best results.

**New Hard Steel to Lower  
Cost of Machinery**

A new hard steel, which can be produced at less cost than present alloys, recently was developed by a steel mill in the Pittsburgh district and given the name of "jalenee." Its surface is extremely hard while the interior is tough but ductile, making it suitable for automobile and machinery parts where there is severe wear, repeated shocks or great stresses. Because of the comparative softness of the interior it can be machined more easily than pure hard steel.

**Airship's Altitude in Fogs  
Measured by Echo**

Almost every aircraft is provided with a barometer or similar instrument for

determining height, but many of these have proved unreliable beyond a certain altitude and many accidents in fogs and in darkness have resulted. A German inventor has adapted the echo method of sounding on steamers to the airship and the airplane with good results, it is reported. The method is essentially the same as that used on water. Sound waves travel from an emitter on one side of the ship, strike the ground and are reflected back where they are registered on a receiver at the other side of the craft. From the time interval be-

Sound emission and reception of the sound, the altitude of the ship is found by a simple calculation. Tests have proved the "echophone" reliable.

**BLAND, SWEET, SAVORY, TART**

Serve a vegetable dinner, similar to the restaurant combination known as "vegetable plate," once in a while. To be appetizing, it must have a variety of flavors—the bland, the sweet, the savory, and the tart. To be satisfying, it must contain enough protein to make it substantial. There must be contrast of texture also, such as the soft, the hard, the rich, and the crisp. Here are a few good combinations: Creamed potatoes, buttered string beans, beets or beet greens with vinegar or lemon juice, raw celery; cabbage scalloped with cheese, carrots, and fried potatoes; baked sweet potatoes in season, spinach with hard-boiled egg, raw cucumbers, scalloped corn, steamed carrots, Swiss chard, raw sliced tomatoes; baked eggplant, buttered lima beans, water-cress; fried tomatoes, mashed turnips or squash, baked potatoes, raw celery.

"Top, I got in trouble at school today and it's your fault."  
"How's that, son?"  
"Remember when I asked you how much a million dollars was?"  
"Yes, I remember."  
"Well, 'Helluva lot' isn't the right answer."

Management and has now started its Child Care and Training. The class will study the food, clothing and training of children under 6 years.

In connection with the course, each girl will observe a child and determine to characteristics of a child of that age, also the mental traits, and determine the part habit plays in the child's life.

**NEW CHURCH TO OPEN SUNDAY**

Next Sunday, November 7, will see the opening of the new Patagonia church. This will be good news to many who have felt that the unfinished building which has stood on the main highway so many years was no credit to the community. The finishing was made possible by free contributions added to some money which was given years ago by different residents and held in bank for this purpose.

A full accounting of all donations and expenditures will be made at the first service on Sunday, which will be held by Rev. C. W. Griffin, the pastor. There will be special music. Fifty copies of a new song book, just published, have been donated and will add much interest to the meetings.

Everybody welcome.

**Just Like 'Em**

"My dear young lady," said the clergyman in grieved tones, as he listened to the extremely modern young girl tear off some of the very latest jazz on the piano, "have you ever heard the Ten Commandments?"  
Modern Young Lady: "Whistle a few bars and I think I can follow you."

**Had Seen Worse**

Lady—"I should think you'd be ashamed to beg in this neighborhood."  
"Tramp—"Don't apologize for it, Mum; I've seen worse."  
Keep bread in a ventilated box, and crackers in tight tins.

# Will They Change the Name of Our Town?

Drawing by Ray Walters.

**D**O YOU like the name of your town? Do you want it changed? Can you present good reasons for making a change? Whether you want a change or not, now is the time for everyone interested in place names to come forward and assist the government in its gigantic task of compiling the hundreds of thousands of names bestowed on geographical units and natural objects throughout America. Now for the first time all the Jones' corners, Wildcat creeks, Hogback mountains and amusingly named hamlets in the country are to be christened officially by the federal government.

This compilation will include the review of each name for authenticity, proper spelling, and in many cases propriety and convenience. Attempts will be made to evolve new names for places which now have none. Then all will be published in an official gazetteer.

"The history of the nation is reflected largely in these names," said Frank Bond, chairman of the United States Geographic board, which is to supervise the work. "It is a big job, and the board will need a lot of voluntary help. We hope to develop widespread and constructive interest in place names."

The board is appealing to the governors of the states to assist in quickening the sources of the vast amount of material which the board must gather and scrutinize. The gazetteer is to contain the name, authentically attested even as to spelling, of every hamlet, village, town and other geographical unit, as well as that of every creek, river, bay, inlet, mountain or natural object having or deserving an identifying name.

In the majority of cases names already exist in undisputed forms, and consequently much of the task will entail compilation only. It is expected, however, that when the board comes to pass on these officially there will be many demands that old names be discarded and new ones adopted. Even without the stimulation to such action as the present work provides, the board in the past regularly has handled many requests of that same sort.

In making up the official gazetteer

many changes probably will be thought desirable in certain instances on account of confusing duplications and sometimes truly objectionable terminology. Recently, for example, the board accepted a new name for Little Smalpoix creek in Wisconsin because of the claim that the old name carried a detrimental suggestion.

The board has good reason for undertaking this work. In probably no other country in the world is there such a tremendous duplication of place names as in the United States. There are, for example, dozens of Deer and Silver creeks. There are ten or more Lookout mountains, at least two of which are of note historically or otherwise. Scores of towns have been named after famous Americans and well-known European places: the Parisles and Londones are legion. This of course results in using the same names more than ever.

There are cases of small villages in the same county using the same names, and many instances of neighboring streams being identified by the same name. These confusions made little difference in the early days of the country, but now, with intensified communication, they are bothersome in many ways. This is particularly true in map making of the kind done by the United States geological survey.

Confusion of many kinds has been found. There are instances of a multiplication of names by common usage for the same place or object. There are small rivers known to people in one county by a name different from the one designating it in another county. Mountains called Hogback

on one side are called Green on the other.

In gazetteering places and objects that have more than one name each the board must decide which are most authentic and appropriate. There is room for a thousand heated local disputes in the clarifying of these confusions. Many people surrender old place names with great reluctance and many others are equally disputative about the way place names should be spelled.

In formulating the gazetteer, new names will have to be originated, for there is still a large number of nameless natural objects of distinction or importance in the country. In the Rockies alone there are hundreds of tall mountain peaks which never have been christened.

In clarifying confusion and finding appropriate new names a vast amount of research in local history, custom, philology and convenience must be done. Little attention will be paid to etymology as usage is a rule ignores that science. When L'Eau Frais becomes Low Freight or custom turns Aux Anes into Ozan the national board raises no staying hand. For the most part the board attempts only to guide the currents of usage.

Old names, such as reflect early history or preserve the names of original settlers, are preferred. The objection that an old name is homely or even ludicrous does not carry much weight with the board. Indian names, wherever preserved, also have the affection of the board. But in passing on these no attempt is made to conform to the originals as against usage or simplicity.

This he named pectin (from the Greek word pectis, meaning rosetum). Bracconot published the story of his researches that led to the discovery of pectin in 1825 in the French Annals of Chemistry.

**Still Awake**  
The world may quit sleep, according to a chemist, but it seems to many of us that a great number of its population abandoned sleep some time ago.—Oklahoma City Daily Oklahoman.

## Named From Genoese

Mincing Lane, London, the center of the wholesale tea trade, derives its name from certain tenements there once owned by the "minchians," or sons, of St. Helen's. There, in the time of the Plantagenets, lived a colony of Genoese traders called galley-men because they brought their wines and other merchandise to Galley wharf, says the London Chronicle. They were a wealthy and powerful

people and one time issued a silver coinage of their own. These coins, known as "galley half-pence," were broader than the ordinary English silver half-pennies but not so thick and strong. Their use was prohibited by an act of parliament in the reign of Henry IV.

**Frenchman's Discovery**  
One hundred years ago Bracconot, a French chemist, while examining various vegetables and fruits, discovered the jellifying principle of fruit

### Lesson for November 7 THE FALL OF JERICO

**LESSON TEXT**—Josh. 6:1-20.  
**GOLDEN TEXT**—This is the victory that overcometh the world even our faith.  
**PRIMARY TOPIC**—Joshua Leads His People to Victory.  
**JUNIOR TOPIC**—The Victory of Jericho.  
**INTERMEDIATE AND SENIOR TOPIC**—How God Helped Joshua.  
**YOUNG PEOPLE AND ADULT TOPIC**—Overcoming by Faith.

Jericho was the key to the land of Canaan. A signal victory here would put the Israelites in control of the land. Failure here would mean irretrievable ruin.

**I. Jericho Shut Up (vv. 1-5).**  
The Canaanites felt secure because Jericho was strongly fortified from the south. Approach to the city from the east was not thought of as the Jordan river was a barrier. The miraculous crossing of the Jordan by the Israelites and their surrounding the city of Jericho greatly alarmed the people—"Therefore none went out and none came in."

**1. God's promise to Joshua (v. 2).**  
"I have given into thine hand Jericho, and the king thereof, and the mighty men of valour." Because of this promise from the Lord their faith had a firm basis.

**2. God's instructions (vv. 3-5).**  
They were to encompass the city with seven priests bearing trumpets of rams' horns. The ark, a symbol of the Divine Presence, went before the people. They encompassed the city once a day for six days and on the seventh day they encompassed it seven times. When the last circuit was made the priests were to give a long blast of the trumpets and the people were to shout with a great shout and the walls of Jericho were to fall down.

**II. The Obedience of the People (vv. 6-10).**  
They advanced according to the directions of their leader, for they were going forth according to the command of the Lord. To the natural eye the means employed were very inadequate, even foolish. If they had looked at the inadequacy of the means in themselves, they no doubt would have faltered, but they believed that He who had given the orders would fight for them. Joshua and his people set out at once to obey the divine directions. The people marched around the city every day for six days. This, no doubt, was very trying to their faith. There was absolutely no connection between the means and the end. Perhaps as the days wore wearily away the whole affair became monotonous. Even at the end of the sixth day there was no change. Doubtless the people on the walls of the city used this unseemly behavior as an occasion of great merriment and ridicule. Even at the end of the sixth round on the seventh day there was no change. Yes, the seventh round brought no change until the very last moment. At the mighty shout, accompanied with the blowing of trumpets, the walls came tumbling down. This is the way of all works accomplished by faith. At the time when everything seems against us, faith holds on and wins the victory.

**III. The Fall of Jericho (vv. 17-20).**  
At the end of the seventh day the seventh round having been made of the city, the long silence was broken with a shout. As the walls crumbled down, the Israelites clambered over them, slaying men, women and children. They were not to spare anything save the gold, silver, brass and iron which were to be saved for the treasury of the Lord. However, Rahab and her household were saved according to the promise of the spies. This wonderful deliverance was calculated to inspire the people with courage and enthusiasm. They could now see how God could fight for them and deliver them from their enemies. Also, it would strike terror in the hearts of the Canaanites. The blowing of the trumpets and shouting of that day with its great victory is typical of the greater day when larger victories shall be won by the Almighty for His people, and even greater consternation will be struck into the hearts of the enemies of God's people (I Thess. 4:16, 17).

Let us learn of this whole lesson that spiritual victories are won upon principles and by means which are not sufficient in themselves. According to human wisdom it is utter foolishness (I Cor. 1:17-20).

**The Living Trees**  
Living trees are always shedding something in order to produce more.

**The Bible Leads**  
Judge the Bible by the influence that it has had upon the lives of men, and it wins first place with all other books trailing in the dust.

**The Christian**  
A Christian, when he makes a good profession, should be sure to make his profession good.

**On God's Side**  
Stand on God's side and He will stand by your side in times of need.

### ON THROUGH SNOW

"You don't suppose it is going to be too long a trip, do you?" John asked.  
He had hated asking that question. He was ready to go on any trip into this land of his, but that he should take the first long sleigh ride, taking Trotty with him, and should run danger of a blizzard, was something quite different.

He had not wanted to ask the question so Trotty would think he was just considering her. That would have been an insult to Trotty.  
Trotty was ten—only a year younger than he was. Nor did he want to say it so it appeared he was in the slightest bit alarmed.

For that would have been nonsense. When storms were at their height, John and his father had enjoyed them most. But if he just suggested that because of their late start and the heavy fall of snow, the trip might be too long, he might save Trotty what promised to be a bad storm.

"Of course not," Trotty said, and then added hastily, high-spirited and

Down the Road Through the Woods.

son that she was, "unless you think we'll quarrel on such a long ride."

"Trotty!"  
"Well, maybe not. There is always this wonderful country of ours to see."  
"Trotty, you shouldn't say such things." Yet he did think that if they turned now it might be better—before it got too late to turn, when they were as near one place as the other. Yet he could not say more. It would sound as though he were afraid—and certainly that was far from the truth.

So they drove on, down the road through the woods. There was just the road cut through the bush, trees on either side so dense and thick that it was easy to believe, even if they had not known, how the little wild animals lived there free from civilization, though never free from their own enemies, their own problems of life struggle.

How deliciously it smelt! "No where," Trotty said, "does the country smell so deliciously."  
"It's perfect now. And even here, quite a little bit back from the sea, I can feel that there is salt air near, and the trees, all these blessed spruce and fir trees, are so good to smell."

How lovely they did look with the heavy white snow settling down upon the dark green of the woods, how cold and crisp and wonderful the air.

But John had been right. This was not an ordinary snow storm, but a true blizzard, such as they, in their country, called a blizzard.

The snow seemed to become thicker and whiter as they drove on through it. Almost it seemed as though they were going into a land that was solid snow with more and more snow being constantly added so that it would not lose its entirely snow buried look. It was getting darker now. The sky was so filled with snowflakes, the whole air was so engulfed by snow, that the trees but a little back from the road were not quite indistinct.

It was as though there was just this road, an edge of snow-covered trees on either side, and thence, all around them a world of snow.  
The road could not be seen ahead. Only Daniel, slinking his ears, went hurriedly on, making trembling neighboring sound at the swirling snow.

"Oh, Trotty," John said, "if it doesn't get any worse, this is great." So on they drove through the snow.

**Ought to Be Some**  
Boy—Why can't I have some prunes?  
Mother—I haven't any.  
Boy—But daddy pruned the trees yesterday.

**Cannot Hold Long**  
What is that which you cannot hold for ten minutes and yet is as light as a feather?  
Your breath.

**Ship and a Sailor**  
What is the difference between a ship and a sailor on top of a mast?  
The ship sails over the sea, and the sailor sees over the salt!

**Not So Dull**  
Professor—Pray how would you discover a fool?  
Dull Student—By the questions he would ask.

**Down and Up**  
Q. What is it that will go up the chimney down, but not down the chimney up?  
A. An umbrella.

## POULTRY

SELECT BREEDING STOCK FOR 1927

Early fall is none too early for poultry keepers to make plans for the 1928 breeding stock, says Cora Cooke, poultry specialist with the department of agriculture, University of Minnesota. A Wisconsin authority has said that the selection of breeders should begin as soon as the chicks are hatched.

Miss Cooke says the following requirements should be kept in mind when breeders are being selected: 1. of a pure breed; 2. high vitality; 3. high producing ability as shown by records or examination; 4. right size and type; 5. conforming as nearly as possible to the proper breed and variety characteristics.

"Further information, such as may be obtained by trap-nesting and pedigree, is very valuable," says the specialist. "Absolute knowledge as to how many eggs a hen has laid in her pullet year, how many times she has been broody, and what kind of eggs she lays is a distinct help in selection. But when trap-nesting is not practicable, ordinary examination will achieve results, though in a somewhat smaller degree."

"After selecting the breeders it is important to keep them in the best physical condition for breeding. This calls for comfortable quarters with plenty of room, fresh air and sunshine. The birds should have an ordinary laying ration which will keep them in good flesh without their getting too fat."

### Bird Tick Very Serious Menace to Turkey Grower

Dr. W. A. Billings of the agricultural extension service, University of Minnesota, warns turkey growers to be on the lookout for the bird tick which has made its debut in Atkin county, its first appearance in Minnesota. This tick should not be confused with the common Minnesota wood tick or the fowl tick of the Southern states. It has the same general appearance, but is a distinct species.

"The ticks are seen most around the eyes and necks of the young turkeys," says Doctor Billings. "They are very destructive and in one outbreak killed 40 out of 40 poult. There is no successful treatment. The only thing that can be done is to go over the birds once or twice a week by hand and pick off the ticks."

"It is possible these parasites were introduced into Minnesota from wild fowl or through the interchange of breeding stock from other states. The tick appeared in Vermont in 1929."

### Teach Chicks to Roost as Early as Possible

As soon as possible chicks should be taught to roost. After they roost the dangers of crowding or piling in the corners is eliminated and a great problem of the poultry keeper is nearly solved. At the earliest opportunity roosts should be installed a foot or eighteen inches above the floor along the back of the house so as to encourage roosting. One should carefully observe the chicks and always provide an abundance of roosting space. The brooder house should be supplied with fresh air so as to afford comfort to the chicks. This discourages their roosting in trees. A good rule is to get the chicks on the roost at the earliest age possible.

### Discrimination Against Eggs in Cold Storage

An interesting argument has been going on recently over the question, "When is an Egg Fresh?" Undue discrimination against eggs that have been kept in cold storage has aroused butter and egg dealers to an effort to change the public attitude. One suggestion is that storage eggs should be labeled "Kept Fresh in Cold Storage." It is pointed out that eggs which are placed in cold storage are of the finest quality, being produced in the spring, and may actually be better after several months of keeping than others which are fresh in the present use of that term.

### Roosts for Turkeys

A great many of the turkey growers build the roosts about 10 or 12 feet high for the large turkeys and about 5 or 6 feet high for the young ones; around these roosts is built a 6-foot fence with a large gate. When the turkeys get their feed and drink on return from the fields they are driven into this enclosure and the gate shut; in this way dogs, coyotes and other animals are kept away and the turkeys are amply protected against thieves.

### Spray for Mites

Mites live in the house, laying low in the daytime, and swarming over the hens at night, sucking their blood and poisoning their sleep with evil dreams. The best way to put a crimp in their game is, first, to scrub the house out thoroughly with strong soap-suds, then spray the walls, roosts and everything else in the house, with a 5 per cent solution of some good coal-tar disinfectant. Repeat the spraying in three or four days and keep the house clean.

# The GIRL in the MIRROR

By Elizabeth Jordan

STORY FROM THE START

Laurie Devon, successful playwright, but somewhat inclined to wiliness, attends the wedding of his sister, Barbara, to whom has been left the great Devon fortune. Laurie had been a gay young chap, but for the last year he has been toiling the mark, through the efforts of Barbara. Laurie, who is wealthy, refuses to settle down to work, announcing his intention of resting and seeking adventure.

CHAPTER II—Continued

Laurie grinned, and the girl infuriated Bangs. He whirled away from it. A footstool impeded his progress, and he kicked it out of the way with large abandon. It was his habit to rush about a room when he was talking excitedly. He rushed about now; and Laurie lit a cigarette and watched him, at first angrily, then with a growing tolerance born of memories of scenes in their plays which Bangs had thrashed out in much this same manner. The world could never be wholly uninteresting while Rodney pranced about in it, cutting the air with gestures like that.

"Here I am," snapped Rodney, "ready with my play, the best plot I've had yet. You won't let me even mention it to you. Here's the new season. Here's Epstein, sitting on our doormat with a check-book in each hand, waiting to put on anything we give him. You know he's lost a small fortune this fall. You know it's up to us to give him a play that will pull him out of the hole he's in. Here's Haxon, the best director in town, marking time and holding off other managers in the hope that you and I will get down to business. And here you are, the fellow we're all counting on—" He stopped for breath and adjusted.

"Yes," Laurie politely prompted him. "Here I am. What about it? What am I doing?"

"You know d—d well what you're doing. You're loafing!" Bangs threw the word at him as if it were a shell from a Big Bertha. "You're loafing till it makes us all sick to look at you. We thought a week or two of it would be enough, when you realized the conditions, but it's gone on for a month; and, instead of getting tired, you're getting more and more into the loafing habit. You abuse time till it shrieks in agony."

"Good sentence," applauded Laurie. "But don't waste it on me. Put it into a play."

Bangs seemed not to hear him. He was standing by the room's one window, now, staring unseeing out of it.

"Here I Am," Snapped Rodney.

His hands deep in his pockets, taking in the knowledge of the failure of his appeal. Under the realization of this, he tossed a final taunt over his shoulder.

"I can forgive the big blunders a man makes in his life," he muttered; "but I haven't much patience with a chap that lies around and shirks at a time like this!"

Laurie removed the half-smoked cigarette from his mouth, and not finding an ash tray within reach, carefully crushed out its burning end against the polished top of the dressing case. He had grown rather pale.

"That will be about all, Bangs," he said quietly. "What you and Epstein and Haxon don't seem to remember is just one thing. If you don't like matters as they are, it's mighty easy to change them. It doesn't take half a minute to agree to dissolve a partnership."

"I know," Bangs returned to his chair, and dropping limply into it, his

hands still in his pockets, stared dependently at his outstretched legs. "That's all it means to you," he went on, morosely. "Our partnership is one in a thousand. It's based on friendship as well as on financial interest. If I do say it, it represents a combination of brains, ability, backing and prospects that comes only once in a lifetime, if it comes at all. Yet in one year you're sick of it, and tired of work. You're ready to throw it all over, and to throw over at the same time the men whose interests are bound up with yours. You're dawdling in cabarets and roadhouses and restaurants, when you might be doing work—" Bangs' voice capitalized the word—"real work," he added fiercely. "work other fellows would give their souls to be able to do."

He ended on a flat note, oddly unlike his usual buoyant tones, and sat stiff as if everything had been said.

Laurie lit a fresh cigarette, drew in a mouthful of smoke, and exhaled it in a series of pretty rings. In his brief college experience he had devoted some time to accumulating this art. Admiringly watching the little rings pass through the big rings, he spoke with studied carelessness.

"It was a pretty good scene, Bangs," he said, "and it showed careful re-hearsing. But it would be a lot more effective if you had a real situation to base it on. As it is, you're making a devil of a row about nothing. I worked like a horse all last year, and you know it. Now I'm resting, or loafing, if you prefer to call it that, and—be hit off the words and fairly threw them at his friend—"It will save you and Epstein and Haxon a lot of mental wear and tear if you will mind your own business and let me alone."

Bangs raised his eyes and dropped them again.

"You are our business," he solemnly reminded his partner. "I've got so I can't work without you," he added, with a humility new to him. "You know that. And you know I've got the plot. It's ready—great Scott, it's boiling in me! I'm crazy to get it out. And here I've got to sit around watching you kill time, while you know and I know that you'd be a d—n sight happier if you were on the job. Good Lord, Laurie, work's the biggest thing there is in life! Doesn't it mean anything at all to you?"

"Not just now," Laurie spoke with maddening nonchalance.

"Then there's something rotten in you."

Laurie winced, but made no answer. He hoped Bangs would go on talking and thus destroy the echo of his last words, with which the silent room seemed filled. But nothing came. Rodney's opportunity had passed, and he was lost in depressed realization of his failure. Laurie strolled back to the mirror, his forgotten tie dangling in his hand.

"We'll let it go at that," he said then. "Think things over, and make up your mind what you want to do about the contract."

"All right."

Bangs replied in the same flat notes he had used a moment before, and without changing his position; but the two words gave Laurie a shock. He did not believe that either Rodney or Epstein would contemplate a dissolution of their existing partnership; but an hour ago he would not have believed that Rodney Bangs could say to him the things he had said just now.

He was beginning to realize that he had tried his partners sorely in the month that had passed since his re-

## Mercy Cut No Figure in Old-Time Justice

The torturing of criminals on "the wheel" is a very ancient form of punishment. In an "improved" form it was revived in Germany in the fourteenth century. The unfortunate victim was laid upon a very large cart wheel, his legs and arms extended and fastened to the spokes, and in that position, as the wheel was turned around, his limbs were broken by successive blows with an iron bar.

In France, where the wheel was used only to punish criminals of the most atrocious sort, the victim was first bound to a frame of wood—in the form of a St. Andrew's cross—that is, two bars of equal length laid crosswise like an X. Grooves were cut transversely in these bars, above and below the knees and elbows, and the executioner struck the limbs of the victim eight blows so as to break them in

## Failures Become Critics

Reviewers are usually people who would have been poets, historians, biographers, etc., if they could; they have tried their talents at one or the other, and have failed; therefore they turn critics.—Cokeridge.

turn to row; and all for what? He himself had brought out of the foolst experience nothing save a tired nervous system, a sense of boredom such as he had not known for a year, and, especially when he looked at Bangs, an acute mental discomfort which introspective persons would probably have diagnosed as the pang of conscience. Laurie did not take the trouble to diagnose it. He merely resented it as a grievance added to the supreme grievance based on the fact that he had not yet even started on the high adventure he had promised himself.

He was gloomily considering both grievances, and trying his tie with his usual care, when something in the mirror caught and held his attention. He looked at it, at first casually, then with growing interest. In the glass, directly facing him, was a wide studio window. It was open, notwithstanding the cold January weather, and a comfortable, middle-aged, plump woman, evidently a superior type of caretaker, was sitting on the sill, polishing an inner pane. The scene was as vivid as a mirage, and it was like the mirage in that it was projected from some point which itself remained unseen.

Laurie turned to the one window the dressing-room afforded—a double French window, at his right, but a little behind him, and reaching to the floor. Through this he could see across a court the opposite side of his own building, but no such window or commonplace vision as had just come to him. In his absorption in the phenomenon he called to Bangs, who rose slowly, and, coming to his side, regarded the scene without much interest.

"It's a cross projection from a house diagonally opposite us," he said, after studying the picture a moment. "It must be that old red studio building on the southwest corner of the square. If we had a room back of this and looking toward the west, we could see the real window."

"As it is," said Laurie, "we've got a reserved seat for an intimate study of any one who lives there. I wonder who has that studio?"

Bangs had no idea. He was grateful to the little episode, however, for spreading over the yielding ground beneath his feet the solid strip on which he had crossed back to his chair. He threw an arm across Laurie's shoulders and looked into his face, with something in his expression that reminded young Devon of a favorite collic he had loved and lost in boyhood.

"All right now?" the look asked, just as the dog's look had asked it of the little chap of ten, when something had gone wrong. Rodney's creed of life was held together by a few primitive laws, the first of which was loyalty. Already he was reproaching himself for what he had said and done. Laurie carefully completed the tying of his tie, and turned to him with his gayest smile.

"Hurry up and finish dressing," he cheerfully suggested, "and we'll go out to breakfast. Since you insist on waiting 'round for me like Mary's little lamb, I suppose I've got to feed you."

Rodney's wide grin responded, for the first time in many days. He hustled about, completing his toilet, and ten minutes later the two young men started out together with a lightness of spirit which each enjoyed and neither wholly understood. Both had a healthy horror of "sentimental stuff" and a gay, normal disregard of each other's feelings in ordinary intercourse. But in the past half-hour, for the first time in their association, they had come close to a serious break, and the soul of each had been chilled by a premonitory loneliness as definite as the touch of an icy finger.

In the quick reaction they experienced now their spirits soared exultantly. They breakfasted in a fellowship such as they had not known since Barbara's marriage, the month before.

If Bangs had indulged in any dream of a change of life in Laurie, however, following this reconciliation, the next few days destroyed the tender shoots of that hope. Laurie's manner retained its pleasant camaraderie, but work and he met as strangers and passed each other by. The routine of his days remained what they had been during the past five weeks. He gaddied about, apparently carelessly, came home at shocking hours, and spent most of the brazen January days

these places. Sometimes he finished his work by striking the criminal two or three blows on the chest or stomach, which usually put an end to the sufferer's life, and therefore were called blows of mercy. The punishment of the wheel was abolished in France at the revolution. In Germany it was occasionally inflicted early in the last century for the crimes of treason and paricide.

## Famous Old English "Beau"

The sobriquet "Beau Nash" was bestowed upon Richard Nash, a fashionable personage of the eighteenth century. He was born in Wales in 1674, and studied law, but later became a gambler, for which he seemed to have a greater liking and aptitude and from which he derived an ample revenue. In 1704 he transferred Bath from a vulgar and neglected watering place into a gay and fashionable resort. The city of Bath, in gratitude for his services, placed his statue between those of Newton and Pope. He lived to be eighty-seven, but his last years were spent in poverty, owing to the act of parliament that suppressed gambling.—Kansas City Star.

wrapped in a healthful summer that infuriated Bangs, who wandered in and out of their apartment like an unhappy ghost. On the rare occasions when he and Rodney lunched or dined together, Laurie was entirely goodhumored and when Epstein was with them seemed wholly inattentive to any hints thrown out, none too subtly, by his producing partner.

"Listen, Laurie," said that disgusted individual, almost a month after the new year had been ushered in, "the new year's here. That's a good time for a young fella to get busy again on something worth while. Ain't it right?"

Laurie suppressed a yawn and carefully struck off with his little finger the firm ash of an excellent cigarette. He was consuming thirty or forty cigarettes a day, and his nerves were beginning to show the effect of this indulgence.

"I believe it is," he courteously agreed. "It has been earnestly recommended to the young as a good time to start something."

"Well," Epstein's voice took on the guttural notes of his temperamental

Her Elbows Were on the Sill. Her Chin Rested in the Hollow of Her Cupped Hands.

moments, "don't that mean nothin' to you?"

Laurie grinned. He had caught the quick look of warning Bangs shot at the producer and it amused him.

"Not yet," he said. "Not till I've had my adventure."

"The greatest adventure in life," he stated dogmatically, "is to make a lot of money. I tell you so. Because then you got all the other adventures you can handle, trying to hold on to it!"

Bangs, who was developing a new and hitherto unsuspected vein of tact, encouraged Epstein to enlarge on this congenial theme. He now fully realized that Devon would go his own gait until he wearied of it, and that no argument or persuasion could enter his armor-clad mind. The position of Bangs was a difficult one, for while he was accepting and assimilating this unpleasant fact, Epstein and Haxon—inpatient men by temperament and without much training in self-control—were getting wholly out of patience and therefore out of hand. Haxon, indeed, was for the time entirely out of hand, for he had finally started the rehearsal of a new play which, he grimly informed Bangs, would make "The Man Above" look like a canceled postage-stamp.

Bangs repeated the comment to his chum the next morning, during the late dressing-hour which now gave them almost their only opportunity for a few words together. He had hoped it would make an impression, and he listened with pleasure to a sharp exclamation from Laurie, who chanced to be standing before the door mirror in the dressing-room, brushing his hair. The next instant Bangs realized that it was not his news which had evoked the tribute of that exclamation.

"Come here!" called Laurie, urgently. "Here's something new; and, by Jove, isn't she a beauty!"

Bangs interrupted his toilet to lounge across the room. Looking over Laurie's shoulder, his eyes found the cynosure that held the gaze of his friend. The wide-open studio window was again reflected in the mirror, but with another occupant.

This was a girl, young and lovely. She appeared in the window like a half-length photograph in a frame. Her body showed only from above the waist. Her elbows were on the sill. Her chin rested in the hollows of her cupped hands. Her wavy hair, parted on one side and drawn softly over the ears in the fashion of the season, was reddish-gold. Her eyes were brown, and very thoughtful. Down-dropped, they seemed to stare at something on the street below, but the girl's expression was not that of one who was looking at an object with interest. Instead she seemed lost in a deep and melancholy abstraction.

Laurie, a hair-brush in each hand, stared hard at the picture.

"Isn't she charming?" he cried again. Bangs' reply revealed a severely practical side of his nature.

"She'll have a beastly cold in the head if she doesn't shut that window," he grumpily suggested. But his interest, too, was aroused. He stared at the girl in the mirror with an attention almost equal to Laurie's.

## Who is this girl in the mirror?

Thin Man—You're a coward! You're even afraid of your own shadow!

His Stout Friend—Well, why shouldn't I be? It looks like a crowd following me!

## Enough of It

Thin Man—You're a coward! You're even afraid of your own shadow!

His Stout Friend—Well, why shouldn't I be? It looks like a crowd following me!

To BE CONTINUED

## A WOMAN'S LOGIC

Mrs. Jones cast an entirely new light—and, it may be, a wholly reasonable one—on the problem of woman's dress the other night. She and Mr. Jones were awaiting cutlers, and Mr. Jones surveyed her new gown rather critically. "Isn't it a little extreme?" he suggested. "A little short and low cut?"

"Well, I don't know," said Mrs. Jones, "they are coming to see me, aren't they—not the dress?"—Argonaut.

## Sense of Superiority

"Why don't you go into politics?" "I am in politics," answered Miss Cayenne. "I cast a vote every time I have the opportunity."

"Why don't you run for office?" "I cling to the idea of feminine superiority. I prefer having a man requesting me to vote for him to being in a position where I would have to request him to vote for me."—Washington Star.

## PREVENTIVE MEASURE

She—Why do men always try to hold girls' hands?

He (in a trifle cynical)—Probably to keep the girls from putting their hands in our pockets.

Something Missing

He tried to cross the railroad track before a rushing train;

They put the pieces in a sack,

But couldn't find the brain.

The Wife Learns to Drive

"I asked a policeman, like you told me."

"Well?"

"He said I was on the wrong side of the street, so I left the car there and walked over."

Liars All

"So you went fishing with Brown yesterday. What did you catch?"

"Ask Brown. I've forgotten the number we agreed on."

THE CALF HAS HIS DAY

The Bull—I hear the prodigal's returned. Ain't you scared?

The Fatted Calf—Not me. The boss turned me loose and I butted the prodigal off the premises.

Die of Joy

"If ignorance is bliss," said Black To White, "well, then, my boy, you'd better get your life insured. You're apt to die of joy!"

The Truth of the Matter

"I wouldn't marry him if he were the last man in the world."

"If he were the last, you'd be killed in the rush, dear."

Remembered

Wife—You think so much of you old golf, you don't even remember when we were married.

Hubby—Sure, I do. It was the day after I sunk the 30-foot putt.—New Bernian.

Unfortunately

"Most men never think seriously of acquiring a fortune until they're married."

"Perhaps they only realize then how badly they need one!"

Enough Said

Beatrice—And we had a fellow in our party who could talk French, you know.

Millicent—Like a Frenchman, my dear?

Beatrice—Naw; like an American.

Enough of It

Thin Man—You're a coward! You're even afraid of your own shadow!

His Stout Friend—Well, why shouldn't I be? It looks like a crowd following me!

## WEEKLY South-West NEWS ITEMS

Twenty tons to the acre, or better, is the showing expected from the sugar beet harvest in San Juan county, N. M.

The Northern New Mexico Poultry Association is staging a drive in Colfax county to get every man who has chickens into the organization.

George Dillman, a real estate man, ended his life at Albuquerque by shooting himself at his home. He had been in ill health and despondent.

H. C. Porter, aged 37, De Atreico (N. M.) farmer, was accidentally shot and fatally wounded by his brother-in-law, Vint Shulburn, at Rancho de Atreico.

The sixteenth annual convention of the New Mexico Bankers' Association adjourned at Roswell a few days ago after one of the most successful meetings of the association ever held in the state.

Rollin Reed, Yuma, Ariz., business man, has been elected commander of the H. H. Donkersley post of the American Legion. Dr. E. G. Colby, retiring commander, was presented with a handsome ring.

An eighth of an acre of strawberries netted a Yuma valley (Ariz.), farmer \$150 this year. Another farmer cut an average of twenty pounds daily for four months from two rows of asparagus, 500 feet long.

The First Baptist Sunday School of Tucson has inaugurated a class for deaf mutes. Mrs. L. J. Worsham, who understands the sign language, is teacher and she also translates the pastor's sermons for those deprived of hearing.

Rare white bees, Arizona stingless bees, golden-colored bees, leather-colored bees—and bees of a few other colors will be featured by the apary department at the twenty-second annual Arizona Free State Fair, November 8 to 13.

Blasting at the Big Jim mine at Patagonia, Ariz., revealed that thirty inches of ore had been cut, assaying fifty-two ounces of silver and 21 per cent lead per ton. This is in addition to fifteen feet of rich milling ore already encountered.

Union county, N. M., won third place in the state livestock judging contests held at State College near Las Cruces. De Baca county got first place, and Lee county second. Union county gave Lee a close race for second place. In fact, there was no great difference between any of the counties.

The United Verde Extension Mining Company will enter the Bisbee district, taking over the control of the Bisbee Queen Development Company. Work on a development shaft will begin immediately after legal matters have been settled, and \$200,000 or more will be spent in exploration work.

The funeral of A. E. Baker, who died at Las Vegas, N. M., was held from the Nolan Funeral Home. Interment was made in the Masonic cemetery. Mr. Baker, who had been employed by the Western Newspaper Union for a number of years, came here with Mrs. Baker last May in an effort to recuperate his health.

The newly formed New Mexico Lumber Dealers' Association elected their first cabinet officers in convention at the Alvarado. K. J. Baldrige of Albuquerque was made president, Charles Proebstel of Santa Fe, vice president, and J. M. Donliffe of Albuquerque, treasurer. The secretary of the association, it was decided, will be appointed by the officers, to fill a full time position with salary.

Several nationally known speakers will be in attendance at the annual conference of the Eastern Arizona Teachers' Association to be held in the Hill street school, Globe, November 22, 23 and 24. Adrian Newsen, head of the department of public speaking in the University of Oklahoma, will be very prominent on the program. He will come with quite a reputation. Dr. Otis Caldwell, head of the Lincoln Training School, teachers' college, Columbia University, will also speak. Last, but not least, there will be Miss Maude McBroom, superintendent of elementary education at the University of Iowa.

The 1923 government census of the manufacturers of the state of New Mexico lists ten industries as the leading ones of the state. These are the manufacturers of beverages, bread and other bakery products, car and general construction and repairs at steam railroad repair shops, manufacture of confectionery, flour mill and grain mill products, ice cream, ice, manufactured lumber and timber products, lumber planing mill products, printing and publishing, saddlery and harness. These account for 159 of the total 186 establishments listed at that time with twenty-seven establishments being credited to all other industries.

A cashier's check for \$23,471.15 was handed to J. W. Wentworth, clerk of the Superior Court, in behalf of the town of Miami, Ariz., as a sequence to the verdict of the jury in the condemnation suit recently heard between the town and the Miami Copper Company.

At a meeting of the board of trustees of Clayton, N. M., before a committee of citizens of the town, \$2,000.00 of the city's redeemed water works bonds and \$7,392.50 of canceled interest coupons from water works bonds were destroyed by burning.

## THROUGH ADVICE OF NEIGHBOR

Woman Tried Lydia E. Pinkham's Vegetable Compound

"A neighbor advised me to try Lydia E. Pinkham's Vegetable Compound, which she said had helped her so much. So I bought a few bottles and tried it out. It sure helped me wonderfully. I felt much better. My work was no longer a dread to me. If I hear of any one who is troubled the way I was, I will gladly recommend the Vegetable Compound to them and I will answer any letters in regard to the same."

Mrs. BERTHA MEEHAN, 910 Center St., Lansing, Mich.

"I had been sickly ever since I was fifteen years old. After taking Lydia E. Pinkham's Vegetable Compound I got so I could do all my housework and I am in good health."—Mrs. MAUDE K. WILLIAMS, Ketchikan, Alaska.

From Michigan to Alaska, from Maine to Oregon and from Connecticut to California letters are continually being written by grateful women recommending Lydia E. Pinkham's Vegetable Compound.

The Compound is made from roots and herbs and for more than fifty years has been helping to restore run-down, over-worked women to health.

Are you on the Sunlit Road to Better Health?

Marjorie—"What do you think John said, daddy, when I told him that when we were married I wanted a city residence, a country place, three autos and a lot of servants?"

Daddy—"Well, what did the paragon say?"

Marjorie—"He said that if I would sleep more on my right side, I wouldn't have such dreams."

Head aches are a good sign of poor digestion, when hard-worked stomach begins to complain. The whole system suffers and we have constipation, dizziness, offensive breath and similar disorders.

GREEN'S AUGUST FLOWER has been relied upon for such sufferers for the past sixty years, and has contributed to the health and well-being of thousands of men, women and children. At all druggists. If you cannot get it, write to G. C. Green, Inc., Woodbury, N. J.

Serpent of Eden was willing to give apples away. He couldn't sell them for 10 cents apiece.

## Mrs. Stanko's Health Restored

Young Pueblo Mother of 3 Children Relieved of Nervousness, Gastritis, Sluggish Liver.

Thanks Tanlac.

As Mrs. ANNA STANKO, 836 E. Evans Ave., Pueblo, recently said: "Without good health a mother's life is unbearable. Sooner or later she breaks down."

"I narrowly escaped this plight. For many years I neglected my health. Headaches caused by poisons in my system, due to a sluggish liver, almost drove me mad. I suffered from fainting spells. Everything I ate caused me pain."

"I read what Tanlac had done for others and tried it. It cleaned my system, toned up my liver. Now I eat everything without trouble and sleep well. I feel stronger than I have in years. Tanlac is a wonderful tonic. It helps build strength, relieves pain and provides good health."

Tanlac, made from roots, barks and herbs, is sold by your druggist. Get your first bottle today!

Doubt indulged becomes doubt quelled.

DEMAND "BAYER" ASPIRIN

Aspirin Marked With "Bayer Cross" Has Been Proved Safe by Millions.

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 26 years.

Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

There are some things that are better said than done, but lozenaking isn't one of them.

## Faulty Elimination

Should Be Corrected—Good Elimination Is Essential to Good Health.

If you would be well, see to your elimination. Faulty kidney action permits toxic material to remain in the blood and upset the whole system. Then, one is apt to have a tired, languid feeling and sometimes, a toxic leakage or headaches, and often some irregularity of secretions, such as scanty or burning passages. More and more people are claiming the value of Doan's Pills, a stimulant diuretic, in this condition. For more than forty years, Doan's have been winning favor the country over.

Ask your neighbor!

DOAN'S PILLS 60c

# Pretty Things that are Made at Home

AS TO Christmas presents it is time to be up and doing, for the calendar waits not for the laggard. Why not make someone happy with a "tissue twist" pocketbook like the one shown in the picture? Surely you would and I would just love to receive such a useful and beautiful gift, now wouldn't we? So will your dear friend.

The marvelous thing about this purse of elegant appearance is, that it is made of tissue twist, which is in reality crepe paper processed and hard-twisted until it is as strong and durable as any embroidery floss. Tissue twist can be purchased at any counter where they sell fancy crepe

even the simplest frock look "scrumptious."

Now that cuffs are assuming such an important position as an outlet for ideas which are "different," not only do the latest lingerie sets feature them, but fashionists are also detailing gowns and coats with cuffs of unique and picturesque aspect.

Among the lingerie sets, cuffs acquire distinction in that they are very deep and wide and graceful. When frilled or organdie, net and lace, their effectiveness is such as is achieved in the accessory set worn with the simple black satin frock shown at the top of this picture.

The pirate cuffs on the figure in the

FOR THOSE HANDY WITH THE NEEDLE

paper, your nearest stationery store for instance. For the stamped oblong piece of imported canvas, if they haven't it at the store where you buy the tissue twist, you will be sure to find it in any fancywork department or specialty shop. It requires for this pocketbook six hanks of gray tissue twist, also one of red and two of green, also leads in three bright colors. Thread a short darning needle with the gray tissue twist and work in the background solid, over and over in strips as stamped. Then finish around the edge with the red tissue twist, sewing over and over. To keep the edge smooth and even take the stitches over a darning needle held flat and close to the canvas edge, slipping it out as you go. The flower design is now filled in with the beads, just as you see in the

foreground are typical of the present mode. Copied in white, beige or pink broadcloth or heavy wash satin they serve to add to the charm of any frock.

This same tendency toward the picturesque and unusual which marks the accessory or detachable cuff, is reflected throughout all sleeve designing. Especially is the fur and cloth cuff on the coat indulging in fantastic interpretation. Frequently the fur or cloth cuff reaches well-nigh to the elbow and it flares or ripples, assumes a melon or muff shape, or perhaps buttons or loosely flaps at the pleasure of the designer.

Frocks which are otherwise unadorned bear either startling cuff versions, or if not cuffs, then unusual wrist treatments wherein much rich embroidery and coloring attract the

## The KITCHEN CABINET

(By 1924, Western Newspaper Union.)

As Summer's handmaid, faring homeward late,  
Set down her burden at the palace gate,  
Came Autumn, dallying along the road,  
Snatched up the basket with its priceless load,  
And at a sudden whim, about the head,  
Tossed gold and jewels with a reckless hand.

—Harriet Symonds.

### FALL FOODS

Both chicken and cauliflower are such favorite foods that a combination of the two will be enjoyed.

**Chicken With Cauliflower.**—Cut up chicken as for fricassee, wash, cover with boiling water, heat to the boiling point and after five minutes' boiling simmer until tender. Separate the cauliflower into florets, cover with boiling salted water and cook until tender. Cook a dozen slices of carrot until tender. Arrange the chicken on a serving dish, the cauliflower and carrots around the chicken. Take one-fourth of a cupful of fat, cook an equal measure of flour, add salt, pepper and one cupful of chicken broth, stir until well blended; heat the yolk of an egg, add a teaspoonful of lemon juice and stir; pour the sauce over the chicken and vegetables and serve at once.

**Tomato and Pear Salad.**—Peel ripe firm tomatoes and cut into eights, cut pears after peeling in same-sized pieces. Alternate a section of pear and tomato, making a flower-shaped design on heart leaves of lettuce. Place a spoonful of mayonnaise in the center.

**The Three P's Salad.**—Take a cupful each of peas, peanuts rolled like coarse crumbs, and finely minced moderately sour pickles. Mix well and serve with mayonnaise dressing on lettuce.

**Cream Cheese Salad.**—This may be made with any variety of soft cheese. To two cream cheeses add two tablespoonfuls of cream, one pimento, twenty-four olives and half a cupful of blanched almonds. Chop all the ingredients separately, mix all together or thoroughly with a wooden spoon, press into a mold lined with paraffin paper. When firm and chilled unmold and cut into slices. Serve on crisp heart leaves of lettuce with French dressing.

### Something to Eat.

Fish is such a well liked food that even small portions of leftovers will make most acceptable dishes.

**Fish a La Creme.**—Carefully remove all the bones from cold boiled fish, flaking the meat with a fork. To a bubbling hot tablespoonful of butter add a tablespoonful of flour and a pint of milk; season with salt and cayenne pepper. Put a layer of the flaked fish in a well-buttered baking dish, add a layer of white sauce, top fish and sauce, then sprinkle the top with well-buttered crumbs. Bake until brown. A bit of onion may be added if blood.

**Corn Chowder.**—Cut one-fourth of a pound of salt pork into small dice and cook in saucpan until brown, then add two onions chopped, cook until lightly colored, add two cupfuls of diced potatoes which have been par-boiled five minutes. Melt two tablespoonfuls of butter, stir in one tablespoonful of flour, and when well blended add two and one-half cupfuls of milk; cook five minutes, add the corn (a pint) cut fresh from the cob, salt and pepper to taste. Just before serving add three tablespoonfuls of rolled cracker crumbs. Serve hot.

**Fruit Jelly.**—Soak half a box of gelatin in three-fourths of a cupful of cold water. Heat a pint of milk, add a cupful of sugar, one and one-half squares of grated chocolate, and a pinch of salt. After sending take from the heat, add the gelatin and when it begins to thicken add a half teaspoonful of vanilla, a fourth of a cupful each of raisins, chopped candied ginger, citron and a few currants. When firm serve with cream.

**Baked Kippered Herring.**—Wipe two kippered herring, lay on a board and rub well with pepper, salt and cloves. Put into a baking dish, cover with vinegar, add a bay leaf, cover with buttered paper and bake in a moderate oven twenty minutes.

**Oriental Stew.**—Simmer gently together two cupfuls of lamb or mutton cut into dice, a cupful of water, two tablespoonfuls of butter, a chopped onion, a cupful of cooked peas or beans chopped. Season with salt and pepper and a teaspoonful of curry powder. Boil one-half cupful of rice and when tender place in a border around the stew. Season the rice well with salt and butter.

**Washington Pie** is a great favorite with nearly everybody. Bake a good white cake in two or three layers and top together with sweetened and flavored whipped cream.

**Heated sardines**, made hot in their own oil, then drained and served on strips of buttered toast with a crisp fresh lettuce salad, is another well-liked supper dish.

## Just What Occurs Inside Voltmeter

### Happenings Differ in Detail in Various Types of Meters.

By JOSEPH L. MCGRATH in Boston Globe.

When testing "A," "B" or "C" batteries with a voltmeter the terminals of the meter are connected to the positive and negative of the battery and the pointer of the meter flies over to a certain point on a calibrated scale.

What happens inside the meter differs in detail in different meters, but, in all common types, current flows in at one terminal, by force of the voltage, performs its duty in the meter, and flows out at the other terminal.

In a perfect voltmeter there would be no current flowing through the meter, but we do not need such a degree of perfection. By allowing a very small current to flow, magnetism is set up which causes the needle to register. The force acting on the needle is figured by multiplying the number of turns of wire in a coil in the meter by the amount of current flowing through it.

As example: A coil having 100 turns with a current of .075 amperes would give a product of 7.5, and a coil of 50 turns with a current of .150 ampere would also give a product of 7.5. Now let us assume that the force rep-

resents by 7.5 will cause the needle to read 45 volts, on the scale. Though both meters read 45 volts on the scale, one is a good meter and the other is not so good because it is far from our theoretical standard and has excessive losses.

**Other Important Factors.**  
If we had perfect voltmeters we could leave them connected in the circuit at all times, but because even a good meter will draw .075 amperes which would be a large percentage of the normal current of a "B" battery, it is not well to leave the meter in circuit.

The bearing in which the needle swings is another important factor in a meter, for a poor bearing means that extra current will be required in the coil to swing the needle.

The better meters, therefore, have more turns in their coils and better bearing than the cheaper type, all for the purpose of keeping the current at a minimum and the efficiency high. High efficiency also means correct indication and that is what we use meters to get.

The better meters, therefore, have more turns in their coils and better bearing than the cheaper type, all for the purpose of keeping the current at a minimum and the efficiency high. High efficiency also means correct indication and that is what we use meters to get.

The better meters, therefore, have more turns in their coils and better bearing than the cheaper type, all for the purpose of keeping the current at a minimum and the efficiency high. High efficiency also means correct indication and that is what we use meters to get.

Fig. 1 Shows Principal Parts Inside of One Type of Voltmeter.

## "Truphonic" Audio System Uses a Grid Impedance

The year's new idea in quality audio amplification is the "truphonic" system, which makes use of a grid impedance coil.

When a transformer is used, the grid potential has to be kept negative. As soon as the grid goes positive, there is a partly shortened circuit in the secondary of the transformer and a temporary reduction of the magnetic coupling. The result is distortion.

The "truphonic" system has been developed and magnetic coupling has been eliminated. In the diagram is illustrated the "figure 8" lamination by means of which the two choke coils, plate and grid, are mounted on the same lamination. Through the fixed condenser linking the two coils

is very high compared with other resistances or single impedance circuits.

The amplification factor is kept constant within a very small percentage from the lowest notes received to the highest harmonics or overtones. Regarding the amount of amplification, three stages of the "truphonic" system will give a greater amplification than two stages of transformer in a ratio of about 5 to 4.

It has been found helpful to add a fixed resistor of 25,000 ohms, connected between the P. post of the first coupler and the common ground and "A" allows lead. In series with the grid coil.

Radio tubes are made of thin glass and glass breaks easily under shock. The guy who used to listen in on the party line now visits his neighbor so as to listen in on the radio set.

A loop antenna is supposed to intercept maximum signal strength when it is pointed toward the transmitter, but this directional property is affected by the surroundings.

United States naval stations along the Atlantic coast have started a regular system for broadcasting weather reports to aircraft in flight and for the exchange of weather information between naval air stations.

When computing the length of the radio aerial the lead-in should be counted as part of the length. This part of the antenna is just as important as the part supported in the horizontal plane.

Because connections have a bad habit of working loose every effort should be made to keep them tight, and, in many cases, they should be soldered to insure staying tight. A bad connection either means a noisy set or weak signals.

## What Is "Static"?

Static is caused by lightning flashes, often many hundreds of miles away. The lightning flash sets up a train of radio waves which, when they strike a receiving antenna, interfere with the reception of stations. No device has been discovered as yet which will eliminate static interference as experienced with the ordinary radio receiver.

## RADIO WAVES

Radio tubes are made of thin glass and glass breaks easily under shock. The guy who used to listen in on the party line now visits his neighbor so as to listen in on the radio set.

A loop antenna is supposed to intercept maximum signal strength when it is pointed toward the transmitter, but this directional property is affected by the surroundings.

United States naval stations along the Atlantic coast have started a regular system for broadcasting weather reports to aircraft in flight and for the exchange of weather information between naval air stations.

When computing the length of the radio aerial the lead-in should be counted as part of the length. This part of the antenna is just as important as the part supported in the horizontal plane.

Because connections have a bad habit of working loose every effort should be made to keep them tight, and, in many cases, they should be soldered to insure staying tight. A bad connection either means a noisy set or weak signals.

Binding post strips should be so arranged that all high-potential terminals are as far apart as possible. It is also wise to place the aerial post at one end of the strip and the ground post at the other. In this way, leakage between terminals will be kept at a minimum.

# Children Cry for

**Fletcher's CASTORIA**  
MOTHER:—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

**Beyond Him**  
It was during a tennis match a year or so ago at Chevy Chase, Big Bill Tilden had been running into very poor luck all morning and things seemed to be going from bad to worse when a little old lady stepped up to Mr. Tilden between sets and asked him anxiously, "Will you please tell me when Mr. William Tilden, the great champion, is going to begin to play tennis?"

"God only knows, madam," replied that gentleman, as he walked sully back to the court.—New Yorker.

**Shave With Cuticura Soap**  
And double your razor efficiency as well as promote skin purity, skin comfort and skin health. No mug, no slimy soap, no germs, no waste, no irritation even when shaved twice daily. One soap for all uses—shaving, bathing and shampooing.—Advertisement.

**"Best" Manners Always**  
"Manners," it has been said, "are not like clothes; it is a bad thing to have two suits of them—one for best and one for every day. Wear your best manners all the time; they suffer most from being put away than by constant use. If you keep your best manners for company, they will fit you badly, and your visitor will suspect they were put on for him. Wear your second-best clothes at home if you will, but not your second-best manners. To whom is it worth while to be courteous, if not to the people you love best?"—Helen S. Dyer.

**Explaining It**  
"Brother, we must do something to remedy de status quo," said a negro preacher to his congregation.  
"Brother Jones, what am de status quo?" asked a member.  
"Dat, my brother," replied the preacher, "am de Latin for de mess we're in."—The Outlook.

**Build Up Your Health With DR. PIERCE'S GOLDEN MEDICAL DISCOVERY**

If You Would Avoid COUGHS, COLDS, GRIPPE.

A Tonic which Dr. Pierce prescribed when in active practice 60 years ago. In Liquid or Tablets, at your Dealers. Send 10c. to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for trial pkg. Tablets.

**An End to Bones**  
Grouch—What's become of that fellow Bones, who was known as the perfect driver?  
Morgan—He met Jones, the Impertinent one.

**None in Her Wardrobe**  
"Frivolous is the modern girl's long suit," says an exchange. Apparently it's the only long suit she has.—Houston Transcript.

**Earn \$25-\$50 Per Week**  
No capital required. Get in business for yourself selling PARKER'S OVERSHIRT, shoes, gloves, shirts and trousers, the world's most famous garments, direct to wearers—no middle man or full time street canvasser through agencies. Write today for particulars. Will teach you how to sell by mail. HAMILTON, CALIFORNIA. MANUFACTURER. Market & San Pedro Streets, Los Angeles, Calif.

**PARKER'S HAIR BALM**  
Restores Color and Beauty to Gray and Faded Hair and is sold at Druggists, Hair Dressers, etc.

**HINDERCORNS** Removes Corns, Calluses, etc., stops all pain, ensures comfort to the feet, makes walking easy. Use by mail or at Druggists. Hirsch Chemical Works, Patonville, N. Y.

**Women Give Jobs to Men**  
The large number of unemployed in England and in other countries of Europe has led many mercantile and other establishments to displace their women employees who are married and fill their positions with men.

**Safe**  
Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100.—Druggists.

**Safe**  
Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100.—Druggists.
