WE STILL HAVE 'EM WITH US

Each generation of men from time immemorial has produced its pessimists and cynics, who have view with alarm the deplorable tendencies of their contemporaries.

According to these gloomy individuals, morals has always been in evidence, with the skills for perdition well greased.

As a matter of fact, there has been little change in human nature since the dawn of civilization. At any time in the world's history there have been ample grounds for pessimism on the part of those who prefer to look upon the dark side.

"Morals—Falling rapidly. Modesty (female)—Quite out of fashion. National Honor—None on the market.

"Public Taxes—In great abundance. Religion—No price offered. Public Virtue—A contraband article; if discovered would ruin its possessor."

But there was nothing original in the lugubrious reflections of this writer of 126 years ago. The same things, insubstantially, were said centuries before, are being said today and probably will be said for centuries to come.

KNOWLEDGE AND APPLICATION

It is a fine thing to know a lot, but it is even better to be able to do things. Many persons who have at their command a considerable assortment of information are unable to put it to very much practical use.

This was illustrated in a sort of "confession" article by a teacher in a recent issue of the Journal of the National Educational Association. She wrote:

"I can solve a quadratic equation, but I cannot keep my bank account straight.

"I can name the kings of England since the War of the Roses, but I do not know the qualifications of the candidates in the coming election.

"I know the economic theories of Malthus and Adam Smith, but I cannot live within my income.

"I can explain the principles of hydraulics, but I cannot fix a leak in the kitchen faucet.

"I have studied the psychology of James and Titchener, but I cannot control my own temper.

"I can conjugate Latin verbs, but I cannot write legibly."

While this picture may be somewhat overdrawn, it serves to illustrate the futility of much that passes for education, when its acquisition is not accompanied by training which leads to its useful employment in everyday life.

CAN YOU BEAT THIS ONE?

Recently the editor of the Publishers' Auxiliary bemoaned the fact that good fish, snake and other animal stories have become scarce. Perhaps there are no new ones, but we ran across one this week, modestly credited to "Exchange," which ought to qualify for the old scrap book, whether it is now or not.

A kind-hearted farmer up in North Dakota found a rattlesnake caught in a trap and compassionately released the reptile and went his way. The snake followed his liberator home and exhibited such friendliness that the farmer kept it as a pet. When the weather got cold, the rattler was allowed to sleep in the kitchen. One night, hearing a commotion downstairs, the farmer rushed down to find the snake tightly coiled about the neck of a burglar who had entered the house. The snake's tail was stuck out of the window, frantically rattling for the police.

By observing all the health rules, you may add 20 years to your life—provided you can afford to live that much longer.

Most people can make up a splendid list of best books they have never read.

PITTSBURGH PLAN SAVES ROAD BUILDING COST

In discussing the subject of street paving, J. D. Strain, of the bureau of highways and sewers, Pittsburgh, Pa., gives some practical suggestions for saving taxpayers' money. He says: "In earlier days, in every city, a great deal of block stone pavement was laid. We had this condition in Pittsburgh. The years passed on, and while the street was still there, it did not have the smooth, even wearing surface desired by the auto drivers. The question was whether to tear up these entire streets and put down a modern pavement from the ground up or to salvage, if possible, the investment already made, which in our case was very great.

"And so we began covering this block stone with from 3 to 4 inches of bituminous concrete covered with a 1/2-inch top. This treatment has been given to mile after mile of our city streets, with the result that we have high-class driveways meeting every modern demand, with a saving of more than one-half of the cost of new construction."

Many states and counties are following this same practice in utilizing a well-packed gravel or macadam road while giving a first-class pavement at from one-third to one-half the expense of entirely new construction.

ADVERTISING RESPONSIBLE FOR STOCK OWNERSHIP BY PEOPLE

A notable change may be seen in the trend of advertising nowadays. Not so long ago, the really big advertisers were patent medicines and baking powders. Today, financial advertising is featured because the public has more money to invest; wage-workers, who in the old days barely existed, today have a surplus. Prosperity is general; there is at least a little money everywhere, and the public has the desire to invest. The old day of individual ownership of every business is passing on. Men buy and sell collectively; they invest collectively, to get collective service that no individual capital could provide. They buy as corporations, where the very volume of the investment, and its creed of universal service, makes it more safe from radical forays of every kind.

The corporations of today are the people's corporations; we—everybody—finance their building and buy their products for ourselves as owners. "Public ownership" is here in its ideal form. Railroads, big business, public utilities, mines, factories, improvement districts, schools, canals—a thousand things that used to be more or less exclusive "picking" for the few political and financial giants, are to play for the many without regard to wealth or position.

America was never as truly American as today, with almost every family owning some form of industrial security that pays a profit. This is a safe and sane condition.

INDUSTRY WORTH ENCOURAGING

One of the greatest new copper plants in the world is located in Arizona. It takes the lowest-grade ores, and by handling them on a large enough scale, is expected to make copper at a new low figure.

It looks like a long chance, to spend millions for a plant to handle 1 per cent copper. But mining money is always brave, and given a fair chance I will accomplish seemingly impossible feats. Good mining laws mean encouragement for an industry that is a great taxpayer, a great employer of labor and a great investor of money.

In the Patagonia district today are some of the greatest investment opportunities to be found in the mining industry. Many new organizations are forming or are already on a sound production basis, some of them being in charge of men of unquestioned integrity, which offer the investor one of the best gambling chances to be found in the mining world. Money will be made here, in large amounts, in the near future, and those who get in on the ground floor are the ones who will reap the harvest of dividends when the properties are brought to full production.

Episcopal "Bishops' Crusade" Begins Jan. 6th Starts Nationwide Evangelistic Campaign

Dispatches from Washington announce the opening there of headquarters for a nation-wide campaign which will be launched early in 1927 to carry the principles of a practical and militant Christianity into every hamlet and village throughout the United States.

(C) Harris & Ewing Rt. Rev. James E. Freeman, Bishop of Washington, On Right, Rt. Rev. Thomas Campbell Darst, Bishop of East Carolina and (below) Rt. Rev. George Ashton Graham, Bishop Coadjutor of Albany

Plans for the campaign are underway in this city and vicinity, as well as in every parish and mission station of the Church. During the first two months of 1927 simultaneously, from the Atlantic to the Pacific, and from the lakes to the Mexican border, day and night, these representatives will be engaged in a wide spreading effort, which, initiated by the House of Bishops of the Episcopal Church, and backed by the National Council of the communion, has been given the name of "The Bishops' Crusade."

Its promoters announce that it is not a campaign to raise money, to proselytize among members of other communions, nor even primarily a movement to gain new members for the Episcopal Church. As defined by its leaders it is a crusade to secure a new allegiance to the whole Christian program, particularly that of the Episcopal Church, on the part of all communicants.

The Rt. Rev. James E. Freeman, D. D., Bishop of Washington, in a statement outlining the Crusade, says: "There are abundant evidences that all about us in the episcopal world there is a new and pressing demand for an exposition of the life and teachings of His whose message is eternally new. That Christ has a message for the modern world, adapted to modern needs, is one of the most demonstrable facts of our time. The persistence of Jesus in human thought and affection excels even the originality of Jesus."

The Bishops' Crusade will be preceded by a period of spiritual preparation beginning on St. Andrew's Day, November 29, on which occasion Episcopal Churches here and elsewhere throughout the country, will be open throughout the day for continuous prayer for the success of the Crusade. On January 6, 1927, the Crusade will be formally launched. For the purpose one hundred of the most prominent bishops, priests and laymen are being impressed into service. This crusading force will be divided into teams of two and three each, and on a fixed day will go forth to the strategic points selected covering the broad expanse of the nation. Day and night through the period of Epiphany season they will address mass meetings, hold conferences, conduct services. At one and the same time the Crusaders will be at work in Maine and California, Oregon and Florida. Special hymns will be sung, and special prayers said. Stress will be laid upon the part which religion can be made to play with resulting benefits, in the fields of capital and labor, international peace, better civic government, the settlement of the divorce problem, the training of youth.

The Crusading teams will give a week in each designated center. Thereafter, from the strategic points which will have been covered, the work will be taken up by local organizations and the campaign will be carried into every parish and mission station of the Church in Continental United States. The Bishops' Crusade is being directed by the National Commission on Evangelism of the Episcopal Church, of which Rt. Rev. Thomas C. Darst, D. D., Bishop of East Carolina, is the Chairman.

draws Day, November 29, on which occasion Episcopal Churches here and elsewhere throughout the country, will be open throughout the day for continuous prayer for the success of the Crusade. INDUSTRIAL EDUCATION

The Minneapolis Tribune editorially declares that crime is our country's most expensive luxury. It quotes statistics charging that crime costs the United States about \$10,000,000,000 a year. Loss in loot alone is about \$3,500,000,000. Loss in diverted manpower is \$6,500,000,000 more.

Each year crime costs America a sum equal to the entire war debt owed our country by Europe, or twice what it costs to run the government. In any one year we spend ten times as much for crime as we have spent on highways. Reducing crime one-half would in five years wipe out the national debt, costing each inhabitant \$33 a year. The Chicago crime commission says that city has 30,000 crooks and criminals costing the city \$200 a year each.

What is the remedy? Is it play or work? Does any nation spend more money on college and high school sports like baseball and football than ours? Do the children of any country play more and work less than our children? A genius proposes spending millions in every state on more playgrounds for children.

What is more conducive to crime among the growing generation of boys and young men than idleness and spending money they never earned? Nebraska is considering a department of higher education to relate the student with and prepare him for an honest-to-God job for life best fitted for him. San Mateo-Burlingame union high school has more than half its boys working, learning trades, as well as making their grades.

Is it not time to ask our schools whether industrial education of our youth is not the solution of the problem? Are not habits of industry and earning money before you spend it a good way to reduce the national crime burden? Every ten workers other than those in public service must support one government employe; a national statistician says that these public employes cost each non-government worker \$126 a year, and that 81 per cent of all the American income goes to public employes and public charges.

The driver who tries to beat a train to a grade crossing is responsible for more than himself. His guilt is clear if anyone with him or on the train is killed or injured.

Whoever named it the "funny bone" had a mighty sense of humor.

"NEWS and PROGRESS" No. 9. ECONOMIC SIGNIFICANCE AND SERVICE OF THE AMERICAN NEWSPAPER AND NEWSPAPER ADVERTISING—From latest volume in Manhattan Library of Popular Economics, republished in serial form through courtesy of Bank of the Manhattan Company, New York.

FOLLOWING THE NEWS

ANY attempt to trace or to classify the various economic influences which flow from that great modern institution, the American newspaper, it is necessary at first to mention certain phases and to recognize innumerable others. So varied and complex are the activities and influences of a newspaper, that it would be impossible to list them all. As the market place of the community, functioning through its advertising columns, the newspaper produces economic results that are fairly obvious and easy to identify—such as advertisement and circulation for the laying of a pipe, the stimulation of trade locally and nationally, the lowering of prices and increasing of profits. Likewise, the influence of those direct actions or departments of the newspaper, devoted to the news of commerce, finance, industry and transportation, are not difficult to trace.

The great of these other columns in which the reader finds the general news of the day? It may be the simple notice of a bank's withdrawal of a deposit, or it may be the news of some sensational robbery or a fire at a manufacturing plant. It may be an "Act of God" or an act of violence. But whatever its subject may be, scarcely a few minutes which pass its eye into instant life the business or professional activity of some 7,000,000 or millions of people.

For instance, the day's paper may contain a cable dispatch about the League of Nations, and next to it one from Washington, in which several American senators are quoted on the subject at the World Court. Both these questions are of the very wide and varied international relationships, with their bearing on national debts, the validity of credits and the value of foreign bonds. They could, therefore, concern the American investor in foreign securities and the American dealer in foreign markets.

Then, one may read of the arrest of a criminal gang. Not only are there particular cracks chancing with burglary, but hundreds of thousands of dollars, but their own and those of others like them are the reason for high premium rates in this class of insurance—a matter of concern to thousands of policyholders.

Incidentally, it is interesting to note the way in which business men are able to get suggestions from newspaper items that would seem at first to have little relation to them. For example, in a recent article, a bonding salesman explains his method of discovering opportunity in casual headlines. Thus, when his eye catches the headline, "Three Million Dollar Fire Sweeps Dock," his thoughts leap ahead to the time when plans for rebuilding will be discussed and contractors and sub-contractors will require contract bonds. By inquiry of the owner the names of those who will probably get the contracts he will be able to be acquainted with this opportunity.

LEGAL ADVERTISEMENTS

CANVASS OF VOTES FOR PATAGONIA UNION HIGH SCHOOL BOARD OF EDUCATION

Since W. F. (Prodi) Barnett is a resident of Patagonia School District No. 6 and threw other candidates of said district each received a higher vote than said W. F. Barnett, he cannot legally hold a position on the Board of Education of the Patagonia Union High School. (See Page 118, Arizona School Law, Paragraph 3775, Section No. 2.)

Mr. Robert Carlson received the second highest vote cast for any candidate residing outside of Patagonia School District No. 6. Therefore said Robert Carlson is legally elected for the one-year term from the outside district.

Table with columns for School Districts and Candidates (R. C. Larimore, A. C. Dalton, T. E. Heady, R. A. Campbell, Carl Zinsmeister, J. R. Colffe, Jean McFarland, R. C. Blason, Fred Barnett, Robert Carlson). Rows list districts like Alto District, Canilly No. 10, Duquesne, Elgin No. 20, etc.

REFORESTATION DEPENDS UPON TIMBER USE

The idea that to curtail the use of forest products is in the best interest of increasing our wood supply, is false, said an official of an eastern lumber company in a recent radio address. It is better to increase the growth of forest material rather than to curtail the output, he declared.

GOV. G. W. P. HUNT EXPRESSES GRATITUDE TO VOTERS

In the following letter, Governor G. W. P. Hunt expresses his gratitude to the voters of Arizona who supported him during the recent campaign: "To the Voters: I want to express to the voters of Arizona who supported my candidacy for re-election on November 2 my heartfelt appreciation for their support.

"The trouble with us Americans is not that we have been cutting our forests and using them, but that we have not been growing new ones," he said. "New we are taking up that job. While we are waiting for the young trees to get big enough for sawing, we must remember that the woods are full of aged and dying trees that ought to be cut and used if we are to prevent waste—and that is as much conservation as planting a young tree.

"I shall endeavor to secure the co-operation of the legislature to further build and develop the state of Arizona in the interest of the people of our state. "Again thanking those who made the victory possible, I am, very sincerely, Geo. W. P. Hunt, governor."

Housewives are often disappointed when cream fails to whip or when the whip does not "stand up" stiffly. Sometimes this fault is due to the dairyman's furnishing cream with too little fat. Cream should contain at least 30 per cent fat in order to give a satisfactory whip. In some cases the housekeeper probably has not kept or whipped the cream at a low enough temperature. Cream for whipping should be thoroughly chilled. In hot weather the bowl of cream may be set in a pan of ice water during whipping.

Some people might work faster if they were not too modest to show off.

GOITRE CAUSED

Sleeplessness, Run Down Condition and Lump in Throat. Colorado Lady Tells of Relief.

ILL. MAN INVENTS NEW FORD

GAS SAVER AND QUICK STARTER. Walter Critchlow, 4402-P street, Wheaton, Ill., has patented a new gas saver and quick starter that beats anything ever gotten out. With it on, Fords show as high as 66 miles on one gallon. Other makes do equally well. This new invention saves gas and oil, makes a Ford start instantly in any weather and completely de-carbonizes the engine. Mr. Critchlow offers one free to advertise, write him for one. He also wants County and State Distributors who can make \$500 to \$2500 monthly.—Adv. 12-19

"IT PAYS TO ADVERTISE"

NOTE: It would be illegal to publish these statements if not true. Mrs. F. Bowditch, Monte Vista, Colorado, says she will tell or write how she was relieved of her terrible gopher two years ago. The misery has never bothered since. Sorbol-Quadruple, a stainless liniment, used. Get more information from Sorbol Company, Mechanicsburg, Ohio, all drug stores, locally at Evans Mercantile Company.—Adv.

\$29,686,214 in Dairy Products and Eggs Shipped Out of U. S.

Map showing shipping routes for dairy products and eggs from the U.S. to various countries like Canada, Mexico, Cuba, Panama, and South America. Text below the map states that dairy products and eggs valued at \$29,686,214 were exported from the United States in the year ending June 30, 1926.

ANONYMOUS LETTERS GOT AS MUCH STANDING WITH US AS A POLECAT HAS AT A SWAGGER SCHOOL PIENIE. WE GOT TO KNOW THE AUTHORITY FOR ALL ITEMS AND LETTERS WE PRINT, TO PROTECT OURSELVES

STATE MINING NEWS IN BRIEF

Bisbee—United Verde Extension's Bisbee Queen Development Company starts on \$200,000 program.

Dragoon—Murdock Mining Company has taken over and will operate the Black Jack mine.

Phoenix—The Arizona Quicksilver Corporation to construct a five-mile road from Goawick property to Sunflower mine.

Kingman—Main shaft of Katherine Gold mine has attained depth of 280 feet and is to be continued to the 350-foot level, before drifting or crosscutting is undertaken.

Oatman—Stemwinder Gold Mines Company has started work on its Line Road tunnel.

Kingman—Foundations being prepared for 20-ton milling plant, soon to be constructed by Gold Door Mines Company.

Congress Junction—Following rich strike made by Sonora Development Company at Newsboy group of claims, plans are being considered for erection of flotation plant and concentrator.

Canon—Plans being prepared for new milling plant for Kay Copper Corporation.

Christmas—Hope Metals Company to erect mill and install power plant.

Jerome—Plans made for resumption of work on New Jerome Superior Copper Company.

Salome—Britannia Gold Mines Company building 30-ton gold milling plant.

Tucson—Considerable activity in Baboquivari mining district reported.

To wash a pillow, transfer the feathers to a muslin bag two or three times the size of the ticking. This may be done easily by sewing the edges of the opening of the tickup and bag together and shaking the feathers from one to the other. The feathers and ticking are washed separately. Scrub the feathers in a weak solution of washing soda, using a good suds. Rinse in two or three lukewarm rinses and then dry. Beat from time to time. After washing the ticking, starch it on the inside with a very stiff starch mixture, applied with a sponge. This closes the pores of the material and prevents the feathers from working their way through. The ticking is then dried and refilled.

Howard Keener, at the Patagonian office, will acknowledge your legal papers, put the Notary's Seal thereon—and has for sale all kinds of legal blanks.

FOR SALE—House in University District, five rooms; near high school Tucson, Ariz. 608 East Fourth St.

Have liver and bacon for dinner rather than breakfast. For one thing, people are not demanding the heavy type of breakfast formerly eaten. Liver is one of the most important meats in regard to the protein and calories it furnishes the body, and it also contains all three vitamins. Recent experiments have shown it to be one of the most valuable sources of iron in cases of anemia. No distinction in food value is made between the various kinds of liver.

A man can run faster than a woman, yet he lets her catch him.

**Industrial Conditions in the State
for October**

Opening of fall brought a general upturn in most business lines, with prospects of a good winter season. From all accounts both wholesale and retail trade have been running ahead of last year, and while no boom is in sight, there is every indication that the steady progress of the past several years will be continued.

The principal adverse element in an otherwise favorable agricultural season is the low cotton market. Picking is in full swing, and up to October 1 about 12,000 bales had been ginned in Maricopa county and 9500 in Yuma county. Warm weather interfered with fall lettuce planting to some extent, and not more than 10,000 acres are now expected in the state for winter shipment.

Heavy rains through the southeastern sections, accompanied by some precipitation in other parts, did damage to highways and transportation facilities and some damage to crops in that area the latter part of September, but had a beneficial effect on ranges. Stock is in good condition, and there has been little of importance in market developments.

The mining industry has been unchanged, with development active and production continuing at the same rate as for some time. The \$6,000,000 leaching plant of the Inspiration Consolidated Copper Company has been finished, and several other large construction programs are nearing completion.

Banking transactions in principal cities of the state, as reported to the Arizona Industrial Congress, showed both increases and decreases from the previous month and the same month of 1925.

Agriculture

Cotton continues to be the center of interest in agricultural activity. Although considerable shedding occurred before the advent of cooler weather, the crop is generally in fair condition, and apparently no great damage was done by storms the latter part of the month. Pima long staple is reported giving excellent yields and prices for it have held a fair level, but the outlook for the predominating shorter staples has been rendered more unfavorable by the declining market. Picking is in full swing, and ginmings to October 1 amounted to 12,000 bales in Maricopa county and 9500 in Yuma.

Warm weather had an adverse effect on fall lettuce plantings in the Salt River valley, necessitating a good deal of replanting and reducing the stand. Present indications are that about 8000 acres will be harvested there this winter, with probably a larger spring acreage than has been expected. Yuma acreage is now placed at 2000.

Citrus fruit shipments have begun from the Salt River Valley, with promise of a good season. Movement of between 40 and 500 cars is in prospect, with from 300 to 350 cars of grapefruit and the rest oranges. Seedling grapefruit is now being shipped, and seedless, which forms about 75 per cent of the crop, will begin moving in 10 or 15 days. Orange shipments will begin in about a month.

Increased production in practically all field crops is indicated for this year in preliminary estimates of the department of agriculture. Advance estimates were for production of 760,000 bushels of wheat, against 672,000 last season; 810,000 bushels of barley, against 700,000 1,104,000 bushels of corn, figured in grain yield equivalent, against 780,000; 293,000 bushels of sweet potatoes, against 260,000; 1,102,000 bushels of grain sorghums, figured as grain yield equivalent, against 980,000; and 554,000 tons of hay, against 539,000.

RICHEST COPPER DEPOSIT

The romance as well as the scientific and technical aspects of metal mining is set forth in a recent publication of the geological survey of the department of the interior, entitled "The ore deposits of the Jerome and Bradshaw mountain quadrangles, Arizona." The area includes the famous United Verde and United Verde Extension mines, as well as many that are smaller and less well known.

The first discoveries of placer gold in this region were made in 1863, but they did not prove profitable. Beginning in 1875, many rich gold and silver bearing lodes were found, and by 1885 many of these were exhausted, although others were productive until 1905. The United Verde deposit was worked for silver about 1880, but the value of the copper output soon exceeded that of the silver, and it is now the richest deposit of pyrite copper ore in the United States. Since 1900, the dividends paid by this mine have exceeded \$63,000,000, and although 2500 feet deep, it will probably be very productive for many years.

Livestock

General rains over most of the grazing area, and especially heavy in the southeastern part of the state, did much to refresh Arizona ranges the latter part of September. Though too late to produce grass in many sections, the precipitation replenished water supplies and will aid materially in supplying winter feed on the lower elevations.

From a range standpoint the past season has been a peculiar one, with insufficient moisture during the normal wet seasons and considerable rainfall in ordinarily dry periods. Spring rains made the condition of ranges and stock excellent during the summer, while the lightness and spotted nature of summer rains indicated considerable deterioration in the fall. The past month's storms will be of material benefit, though winter feed probably will be short in some districts. Stock has remained in excellent shape.

A fair amount of contracting of range cattle for fall delivery has been reported, and apparently has been most active in the northern counties. A considerable number of cattle remain to be sold, but renewed activity on the part of buyers is expected to follow rains in California. The fat cattle market has maintained recent levels.

Sheep men are preparing for movement to winter feeding grounds in the north, which will be general in another month. Sheep are in fine condition. The wool market has shown considerable improvement in recent weeks.

Mining

Intensive activity in the development of new properties, little change in the operations of the big copper producers, and completion or near completion of a number of large construction programs characterized the month in mining. Among the latter the completion of the Inspiration Consolidated Copper Company's \$6,000,000 leaching plant was outstanding, while the \$1,250,000 smelter reconstruction of the Phelps Dodge Corporation at Douglas and the \$750,000 new concentration mill of the United Verde Copper Company at Jerome will be finished this winter.

Extensive development of new properties and revival of old ones that has taken place in Arizona in the last year is illustrated by U. S. geological survey figures, which show 356 mining properties producing in 1925, against 275 in 1924. This number is expected to show a further increase this year, as many of the newer and smaller mines have installed milling and other equipment to begin production.

Among other construction and development, the Central Copper Company at Dos Cabezas has completed a \$350,000 500-ton mill and is considering doubling its capacity; the Tonopah-Bonanza Development Company at Camp Belmont has its initial milling units and power plant in commission; the Chloride Mining Company at Chloride expects to have a custom mill in operation by the middle of October, treating mainly ores from the Hidden Treasure mine. Several properties in Mohave county have increased production. The Big Jim mine at Patagonia has struck a large vein of lead-silver ore in sinking its shaft and are into about 36 feet of high-grade with no indication of the ore body's depth, as no footwall has yet been struck.

The copper market made a fractional decline the latter part of the month, closing it at 14 1/2. Beginning of operations of the Association of Copper Exporters, formerly known as the Copper Export Trading Company, in October, was awaited with interest.

THANKSGIVING TURKEYS TO BE HIGHER

Thanksgiving turkey eating will be somewhat more costly this year than in the past two years, according to a holiday prediction made by a prominent commission man on the coast. The turkey crop is not as large as it was last year or the year before, and a prediction of 50 to 60 cents a pound for this year's Thanksgiving turkey is not considered pessimistic.

The cool weather this fall as been favorable "turkey weather." So long as the days and nights are comparatively warm, turkeys continue to roam the country and fall to put on flesh. When the temperature falls, they are content to cease wandering off, and settle down to grain feeding, which rapidly adds pounds of turkey meat. The crop generally is further

advanced than at this time in several years, and reports from the country consistently tell of the high quality of the turkeys. In Texas, which is the big turkey state for turkeys, the crop is believed to exceed last year, when many of the young poults were lost during the hot dry summer. Oklahoma, Arkansas, Missouri, Kansas, Iowa and Ohio are expected to have fewer turkeys for the market this season, while the other states report flocks of about the same size as last year.

Stocks of turkeys in storage are less than half as large as at this time a year ago and 40 per cent below the five-year average. Reserves of frozen turkeys, therefore, will be less of a market factor this season than last. Holdings of chickens and fowls are five million pounds larger than the five-year average, however, offsetting to some degree the decline in turkeys.

Spuds Are Scarce Again

YOU will not be able to eat so many potatoes this year and on an average you will have to pay more for what you eat, according to the Sears-Roebuck Agricultural Foundation. While there will be 25,000,000 bushels more potatoes than last year, the prospective crop of 352,000,000 bushels is still 50,000,000 short of the five-year average. Farmers devoted 3,202,000 acres to potatoes this year, the Foundation finds, and according to the latest of

Belair reports, these should yield on the average 110 bushels per acre. In 1925 the yield was only 103.0, while in 1924 it was 127 bushels. The present prospects are for a crop 15 per cent below normal. Based on studies over a period of 23 years, the Department of Agriculture indicated that prices will be about 37.5 per cent above normal, and while prices are expected to be higher, the extreme high prices of a year ago are not likely.

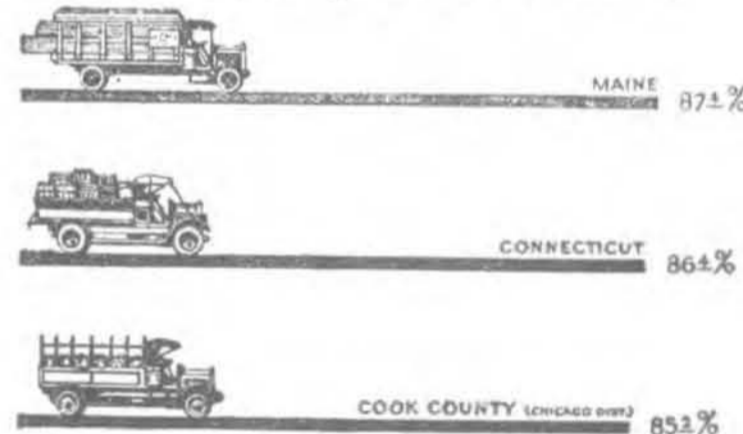

Hot Indian pudding with vanilla ice-cream on the side is a popular New England combination.

Apples may be canned as sauce, in pie pieces, or whole in sirup. They may also be baked and canned.

Dill pickles are made by putting them in a mild salt solution with dill herb to give distinctive flavor. The United States department of agriculture will tell you how to do it.

Use a thermometer when making bread, to test the temperature of the dough and that of the atmosphere during rising, as well as the heat of the oven.

Truck Haulage Under 40 Miles

Do motor trucks compete with railroads? If they do, it is mainly in goods carried less than 40 miles, according to data presented to the Interstate Commerce Commission by the U. S. Bureau of Public Roads. Figures given above show the percentage of truck haulage over the highways which is for less than 40 mile distance. Witnesses before the Commission at hearings being held throughout the country point out that trucks render a special quick delivery service, and that the short haul is not the profitable part of railroad business.

Our Doll Show
Opening the Gift Season
November 15th

We've planned for the children—and their parents, too—a Doll Show which we know they'll sure think the best ever! Every kind of Doll imaginable is shown!

You Are Cordially Invited To Attend
Such friendly, human little dolls! Such beautifully dressed dolls! Don't miss them!

Every Type of Lovely Doll

Tables are given in the report showing the details of annual production of the metals since 1900 for each of the 15 or more districts in the area described. The total value of all metals produced to the end of 1923 is estimated at about \$200,000,000.

**BLACK SATIN IN POPULAR FAVOR;
SHOES, HAT AND BAG TO MATCH**

AS TO the question of modish fabric for your best dress-up afternoon frock, fashion promptly answers in two simple words—black satin. Where's the thrill of newness in black satin, say you? It is all in the styling, in the cunning artful styling. To which declaration the latest satin models from Paris bear eloquent testimony.

It would be difficult to find a dress of a more distinctive modishness than the one which June Marlowe, that lovely actress of screen fame, is wearing in this picture. The skirt portion is fascinating to the eye in its multitudinous scallops so intricately interwoven in the form of tiers. The blouse effect in this one-piece dress features long tight sleeves and high

The fact that the ensemble theme is prominent in the mind of the stylist this season, accounts for the being of the handsomely designed group in this picture. This adorable set is of ebony kidskin—the new name Paris has given to black kid. With the revival of the vogue for fabrics in black, it is natural to foresee the incoming of the mode for black shoes. Ebony kid in its deep dull luster is considered far smarter than the leather of high gloss. Here we have a naive hat of ebony kid with a narrow turn-back of gray snakeskin. The flat envelope purse is displayed in two views. The one on the inset shows the handsome front flap which is embellished with a conventional perforated design, the same

OF DISTINCTIVE MODISHNESS

collar. Cut-steel nailheads artistically pattern collar, cuffs and belt. An intriguing touch is given this model through colorful flowers embroidered in wool, cleverly placed so as to give the appearance of a bouquet tucked in the belt. Are you wondering as to the color of the chapeau which Miss Marlowe is wearing with this strikingly handsome frock? It is a silvertone gray velvet.

In designing the black satin frock representative of choicest mode, not only do scallops play an important part but there is also an abundance of shirring stressed in ways most unique. Yokes are also frequent in smart fabric manipulation and these are accented in case of the erpeback satin frock by using the luster side in reverse with the dull finish.

Applied trimmings accent massive fringes, sometimes skirting the satin

repeated on the smart slippers. Both purse and shoes are strapped with snakeskin, identical to that used for the facing of the hat.

The use of new leathers in hats is very interesting and the outlook is for its widespread exploitation. A favored medium is leather spotted to imitate leopard, the same working up smartly effective in matching kid accessories.

Sometimes the set of hat, bag and shoes is augmented with a belt. The vogue for navy blue kidskin footwear is pleasingly accompanied with a trend toward hat and bag to match.

Carrying out the ensemble idea also are the chapeaux of flat, spotted calf-skin or unshaved lamb, with narrow belts of the same smooth polt.

There is much interest just now in curious reptile leathers. Shaded reptile effects are the latest for flat un-

A MATCHED SET

gown with all the grace of a befringed Hawaiian maiden's dancing frock. Metal embroidery is also generously bestowed on the black satin frock, also rhinestone buttons and clasps whose sparkling beauty lend a note of enchantment to the modern all-black frock. This vogue for rhinestone embellishment is becoming more and more pronounced, not only for evening but for daytime costume as well.

der-arm bags, and the coloring is repeated in the shoes.

Inlaid leather work has become very popular for novelty footwear, and it lends itself delightfully to the new leather accessory sets, such as pictured here. With solid colored leathers for the foundation, it is an inspiration to the designer to be able to work in details of the fanciful inset leather, and to thus inter-relate these accessories until the costume appears in perfect ensemble.

Thus, lady finds she is required to be very discriminating in selection of headwear and footwear with all the other trifles incidental to attire, for either these must be a perfect match or at least maintain a pleasing harmony.

JULIA BOTTOMLEY.

The KITCHEN CABINET

(By 1926, Western Newspaper Union.)

It makes a heaven-wide difference whether the soul of a child is regarded as a piece of blank paper to be written upon, or as a living power to be quickened by sympathy, to be educated by truth.

CHESTNUT TIME

These delicious nuts may be used for every course in the menu, beginning with a cocktail and soup, and ending with confection.

French Chestnut Soup.—Peel and boil a quart of large chestnuts for twenty minutes in salted water. Remove the brown skins and chop the nuts. Add a teaspoonful of salt and one of sugar, the rind of a lemon and a quart of water. Cook half an hour, then rub the nuts through a sieve, add two quarts of chicken stock, or veal stock, add a teaspoonful of minced parsley, a tablespoonful each of flour and butter cooked together, season with pepper and salt, simmer twenty minutes, add a beaten egg and strain again. Serve hot.

Chestnut Stuffing for Fowl.—For a small turkey allow a quart of chestnuts. Boil, mash, and add seasonings of butter; add bread, onion, thyme or sage and egg to bind.

Marron Glaces.—This is a favorite French confection. Blanch and drain the chestnuts until tender, then drain and spread on a shallow buttered platter. Have ready a pound of sugar with half a cupful of water boiled to the thread stage. Cool and while still warm pour over the nuts, let them stand in a warm place for thirty-six hours, then remove the nuts. Have ready another syrup, like the first, but add one-fourth of a teaspoonful of cream of tartar; boil hard for seven minutes, then drop the nuts into it. When boiling stir and skin out the nuts and drain them. When dry they are ready to serve. Enclose in airtight cans to keep them from softening.

Deviled Chestnuts.—Shell one cupful of chestnuts, cut into thin slices after blanching and fry in butter until well browned, using as little butter as possible. Season with tabasco sauce and a little salt. If the tabasco is not liked use red pepper.

For chestnut gravy to serve with turkey—To two cupfuls of gravy add three-fourths of a cupful of cooked and mashed chestnuts.

The Farmer's Wife.
The great trouble with most wives is they make a wrong start. If they give all and expect nothing they will get just that—nothing, unless married to a man of a much character. She should have help in the hard places. Just as she gives it when a rush of work comes on the farm, and her help may be needed in an emergency.

The farmer's wife who does what others could do as well and often better, is certainly allowing herself to become a dandy.

The average farm woman is up at four or five in the morning to prepare the early meal for several men, for the farmer must have help. Why not she as well. Most men have all the improvements on the market for making work lighter.

The average farm woman uses an ordinary tub and washboard for her laundry equipment when there are washing machines that run by power or electricity, with mangles that will do all the flat ironing so quickly and easily.

Why does not the farmer's wife have a vacuum cleaner, a bread mixer, running water and modern plumbing in her home? The answer is because she has not expected or often asked for them. The same power that is used to saw wood, pump water for the stock, grind feed or separate milk will work effectively in lightening the labor in the house.

In many thousands of small-town and farm homes, all the wife has to spend is what she can save from egg money. She used to make butter and sell that, but now all milk is taken to the factory and often in many homes the cream is denied her for ordinary use, because the money is needed for farm uses.

In how many homes are there plenty of magazines and good reading for the various ages of the family? Luxuries they are often called, but we often notice where the wife is ground down to no luxuries, the husband indulges himself with treats which he simply can't have.

Circumstances alter cases; some women demand everything and give nothing; they are the exception instead of the rule, however.

The farmer's wife today is the most important woman in the world, and she should be treated accordingly. She sends into business life more sturdy, clean, fine sons and daughters than the city woman, and she should have lights, conditions and privileges that will help her to fill the position more happily. When this time comes mothers will be more willing that their daughters stay on the farm to live in God's beautiful country, for here is true independence and contentment under right conditions.

Among other unique devices for softening electric lights are the fashionable parchment torcheres which may be bought ready for painting. They may be tinted with soft yellows and reds blended together, or decorated with floral or other decorations. One who is not clever at painting can get beautiful effects by cutting out designs from crepe paper, pasting them on the torchere and then painting over the entire surface with thin, transparent, amber sealing wax paint.

Nellie Maxwell

Gifts Made of Ribbon

A wristbag full of joy awaits any member of the family who wakes up Christmas morning to find herself possessing a bit of fairy like the pretty bag, or the garters shown here. The bag is simply made of two pieces of wide, black ribbon cut rounded at one end and sewed together. Two shirred tucks are run in above the seam. It is lined with colored silk and gathered into a fligree silver mounting. Narrow black and pink satin ribbon is shirred over flat elastic for the garters, which are finished with bows and rhinestone ornaments.

A Pretty Work Basket

This highly decorative work basket makes a charming gift that every woman will love. It is made of paper rope, in a dark brown shade that will harmonize with any woodwork, or furnishings, and requires a wire standard and frame for the basket. The rope is woven over this, leaving open spaces about the sides. A ray cretonne forms the lining and is gathered into a brown silk tassel at the bottom and closed with draw strings of brown silk cord at the top.

Useful Silken Ladies

Everywhere in the shops this year there are dainty and fascinating bisque dolls with dignified coiffures and pretty faces, waiting to be dressed in spreading silk skirts. These doll torsos are made in several sizes and are used as shades over electric lights or posed over telephones, lamps or work baskets and piercements. Wide offetta ribbon clothes the blond beauty pictured and the thinnest ribbon flowers adorn her bodice. She is posed over a small wicker basket.

Parchment Torcheres

Among other unique devices for softening electric lights are the fashionable parchment torcheres which may be bought ready for painting. They may be tinted with soft yellows and reds blended together, or decorated with floral or other decorations. One who is not clever at painting can get beautiful effects by cutting out designs from crepe paper, pasting them on the torchere and then painting over the entire surface with thin, transparent, amber sealing wax paint.

Sees Radio Movies Matter of Course

"I expect to see and hear by electricity the Presidential inauguration in 1923 even though I may be thousands of miles away from Washington," declares Dr. Gerald Wendt, director of the division of industrial research, Pennsylvania State college. He is forecasting electrical advances that are sure to be made in the next few years by industrial research. "Single pictures are already being sent across the sea," he points out. "When a more sensitive photo-electric cell is developed, a picture will be transmitted as rapidly as the movie can flash it on the screen. In Washington during the ceremony, the microphone will have a 'microscope' alongside it and I shall be sitting in my own living room seeing and hearing the entire performance as if I were on the spot. Then we shall have radio movies for every home."

"DANDELION BUTTER COLOR"

A harmless vegetable butter color used by millions for 50 years. Drug stores and general stores sell bottles of "Dandelion" for 35 cents.—Adv.

Bad Outlook

"This is a knotty case. Eight women on the jury."
"The woman you defend?"
"Is accused of stealing another woman's cook."
"What's worrying you?"
"I'm afraid they'll hane my client."

If Kidneys Act Bad Take Salts

Says Backache Often Means You Have Not Been Drinking Enough Water

When you wake up with backache and dull misery in the kidney region it may mean that you have been eating foods which create acids, says a well-known authority. An excess of such acids overworks the kidneys in their effort to filter it from the blood and they become sort of paralyzed and loggy. When your kidneys get sluggish and clog you must relieve them, like you relieve your bowels, removing all the body's urinous waste, else you have backache, sick headache, dizzy spells; your stomach sour, tongue is coated and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, channels often get sore, water scalds and you are obliged to seek relief two or three times during the night.

Either consult a good, reliable physician at once or get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then get fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate sluggish kidneys, also to neutralize acids in the system, so they no longer irritate, thus often relieving bladder weakness.

Jad Salts is inexpensive, cannot injure and makes a delightful, effervescent lithia-water drink. Drink lots of soft water.

A Warning

Governor Smith of New York said in a speech, talk at Bear Mountain camp last month:

"We should marry young, but not too early."
"A pretty girl of eighteen said to her prematurely aged father, looking twelve like his forty years."
"Dad, what's your birth stone?"
"I don't know," the man answered with a warty sigh. "The birthstone, I expect."

Cuticura for Sore Hands.

Soak hands on resting in the hot soaps of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with clean paper. This is only one of the things Cuticura will do if Soap, Ointment and Talcum are used for all toilet purposes.—Advertisement.

Woman is most perfect when most womanly.—Gladstone.

When anger rises, think of the consequences.—Cicero.

CENSUS REVEALS ASTONISHING FACT

8,549,511 Working Women in United States

MRS. W. M. BAILEY
Parkville, Mo., 27, ATLANTA, GEORGIA

Many Say Lydia E. Pinkham's Vegetable Compound Helps Keep Them Fit to Work

8,549,511 women would be a vast army. According to the 1920 Census of Manufactures, that is the number of women and girls employed in all trades in the United States.

Napoleon said, "An army travels on its stomach." This army of women works, washes and irons, takes care of my five boys, and tend to my chickens and garden, and tend before I had to hire my washing and part of my housework."—Mrs. ANNA COLE, R. R. 2, Parkville, Missouri.

wants to keep her job or hopes for a better one, she must guard her health.

Atlanta, Ga.—"My system was weak and run-down, and I was tired. I was this way for five years or more. I read your advertisement in the papers and I decided to try your medicine, the Vegetable Compound, but I did not begin to take it regularly until after I was married. I got so much good from it that I feel fine and have gained in weight. I work in a broom shop, but my work is not so hard on me now, and I keep my own house, and work my garden, too. I am telling all my friends of Lydia E. Pinkham's Vegetable Compound and how it has helped me."—Mrs. W. M. BAILEY, R. R. 2, No. 5, Box 27, Atlanta, Georgia.

Missouri Woman Helped

Parkville, Mo.—"I am proud to recommend Lydia E. Pinkham's Vegetable Compound. I was so ill that I could not lie down at night. Then I got my husband to go to the store and buy me a bottle of Lydia E. Pinkham's Vegetable Compound and I was up and around before the first bottle was gone, although I only weighed about ninety pounds. I took six or eight bottles and was able to do all my housework, washing and ironing, take care of my five boys, and tend to my chickens and garden, and tend before I had to hire my washing and part of my housework."—Mrs. ANNA COLE, R. R. 2, Parkville, Missouri.

First Lawsuit at 103

The oldest resident of Cape Girardeau county, William Huskey, one hundred three years old, has "gone to law" his first time in an effort to set aside a deed filed by his son, transferring property in Snelleville to the son, according to the South-west Missourian.

Farm Forest Is Now Good Savings Bank Condition of Timber Is Deciding Loan Factor.

The farm forests are the farmers' best savings banks and in many instances the presence or condition of the timber on a farm is the deciding factor in the making or refusing of a loan by banks.

Mr. Graeber states that the Federal Land bank of Springfield, Mass., considers that a stand of merchantable timber is a liquid asset and a stand of young timber increases in value each year.

Save the bees this winter. Losses in the entire eastern states last winter amounted to over 50 per cent. Many of the remaining colonies were too weak to produce surplus clover honey.

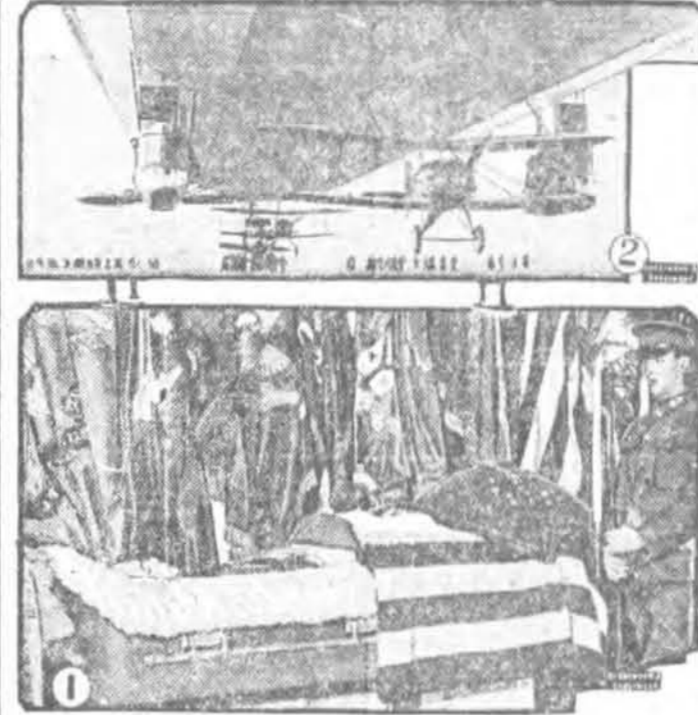

System of Yarding Aids Fight on Poultry Pests Poultry diseases and parasites, which are serious enough under even good methods of flock management, are doubly bad when the poultry on the farm is not controlled under a definite system of yarding.

Improved Roads Bring Dollars to Minnesota One way that good roads bring money to Minnesota is related in a letter received by C. M. Babcock, Minnesota state highway commissioner.

Fertilizer Benefits in Many Ways With Wheat Because it is the most important and most apparent, farmers sometimes forget that increased yield is only one of the many beneficial results of supplying adequate fertility for the wheat crop.

Improved Roads Bring Dollars to Minnesota One way that good roads bring money to Minnesota is related in a letter received by C. M. Babcock, Minnesota state highway commissioner.

FARM FACTS Sweet corn makes old land young again. Good fences are profitable investments. Plan well before you build—it will save you many dollars.

1—Remains of Gen. George Bell, Jr., lying in state in Chicago.

2—British airship carrying two airplanes which were launched successfully in full flight.

NEWS REVIEW OF CURRENT EVENTS

Result of the National Election—G. O. P. Nearly Loses Senate Control.

By EDWARD W. PICKARD ELECTION day was far from satisfactory to the Republican party, for it almost if not quite lost control of the senate and its majority in the lower house will be considerably reduced.

CONGRESSMAN MARTIN MADSEN of Chicago, the able chairman of the appropriations committee of the house, makes the welcome announcement that taxes on next year's incomes will be cut between \$300,000,000 and \$400,000,000.

Nothing can happen to me until I have finished my work, declared Premier Mussolini after the sixth attempt to assassinate him had failed, and it would seem that his fatalistic attitude is justified.

French police, after a year of watching, descended on a nest of Catalonian plotters against Spain in Perpignan and arrested 93 conspirators on the eve of their proposed uprising for the independence of Catalonia.

PRELIMINARY hearing of the Alamo McPherson case in Los Angeles resulted in the holding for trial of the evangelist, her mother, Mrs. Kennedy, and Mrs. Lorraine Wiseman.

OF THE eight states in which prohibition referenda were held, six voted wet, one voted dry but elected a wet senator, and one voted dry entirely.

Wheeler, general counsel for the Anti-Saloon league, admitted the drys had had setbacks all over the country and declared these only "challenged the drys to get better than ever."

IMMEDIATELY after it became known that Senator Butler was defeated the air was full of reports that he would at once resign as chairman of the Republican national committee.

CONGRESSMAN MARTIN MADSEN of Chicago, the able chairman of the appropriations committee of the house, makes the welcome announcement that taxes on next year's incomes will be cut between \$300,000,000 and \$400,000,000.
