

PERSONAL AND SOCIAL

P. M. Etchells was in yesterday from Mansfield. He reports the work in the Gross stunnel of the American Boy mine progressing satisfactorily, although the rock is extra hard at the point the work has reached, which necessitates the use of heavier drilling tools. Mr. Etchells expects to receive the new equipment immediately and proceed with the work.

Mr. McCullough of Los Angeles, son-in-law of the late J. W. Kelly, is here for a few days attending to details incident to the assignment work on the Rand group of mining claims, which were purchased by Mr. Kelly shortly before his death.

Mr. and Mrs. J. M. Rena, of W. Va., are en route by auto to visit the latter's parents in Patagonia, Mr. and Mrs. F. A. Stone. Mrs. Rena was Miss "Tootsie" Stone before her marriage.

Mrs. R. H. Zimmerman has gone to Illinois for a visit with her parents.

Miss Sadie Perley, high school teacher, and Doris Seibold left last week by auto for Iowa, where they will spend the summer vacation with Miss Perley's mother.

Mr. and Mrs. J. S. Gatlin were Nogales visitors Tuesday.

Mike Hogan and J. J. Peterson of Harshaw were in town today.

Mr. and Mrs. Herman Bender of Harshaw were county seat visitors Tuesday.

Carl Peterson, immigration officer at Lochiel, was in town Wednesday.

Miss Dorothy Farrell, daughter of Mrs. Grace A. Farrell, county school superintendent, who has been attending teachers college at Mesa, is visiting her mother for a few days, prior to attending summer school at Flagstaff. Mrs. Farrell also will spend several weeks in Flagstaff, attending summer school.

Mrs. Charles May of Crittenden was a county seat visitor Tuesday.

ELKS TO HAVE PATAGONIA NIGHT

Nogales Lodge No. 1397, B. P. O. Elks, will hold their regular meeting June 14. The meeting has been designated "Patagonia Night," and is also the anniversary of the birth of the American flag.

The regular session of the lodge will consider election and initiation of candidates for membership.

Following the meeting in the lodge room, a banquet will be served to our newly initiated brothers and to all brothers present at Nut's Place, Nogales, Sonora, at which Charles E. Hardy will deliver an address, referring particularly to the history of our flag.

All Patagonia Elks should attend this session, as it is intended to get the Elks from this part of the county all together and create a desire in them to attend lodge meetings more regularly.

DENVER PIGGLY WIGGLY PAYS BIG DIVIDENDS

Denver, Colo.—The Piggly Wiggly Grimes Company has mailed checks for the regularly quarterly dividend of 35 cents per share and an extra 10 cents per share, making a total of 45 cents per share in the outstanding capital stock of record November 25. This is the fourteenth quarterly dividend since acquisition of the Denver Piggly Wiggly stores in June, 1923, or a total of \$442,591 paid in dividends, which is \$2 per share per annum on the outstanding capital stock. The company is also carrying a total surplus of \$340,052, as shown by the balance sheet of October 31.

The sales and earnings for 1926 are considerably in excess of any previous year.

PATAGONIA FIREMEN TO MEET AT CIRCLE Z 9:30 SUNDAY A.M.

Members of the Patagonia Volunteer Fire Department are requested to be at Circle Z ranch Sunday morning at 9:30 o'clock to complete preparations for the 4th of July Rodeo.

Time is flying, and there are not many more days before the 4th. Much detail work is yet to be accomplished, and it is hoped that all who can will be at the Circle promptly at 9:30 in the morning.

Big Jim mine crew has gone 125 or more feet into the ore shoot on the 250-foot level, which is showing no signs of getting "lean," according to reports from the mine. Work is progressing on the 350-foot level, where work is being rushed to tap the ore shoot from below. The mill is running two shifts and turning out high-grade concentrates.

Miss Vera Parker, who taught at the Lincoln school, Nogales, last term, has gone to Clarkdale, Ariz., to spend the summer vacation with her parents, Mr. and Mrs. W. D. Parker. The Parkers formerly resided in the San Rafael Valley.

Mr. and Mrs. J. W. Williamson of San Rafael Valley were Nogales visitors Thursday.

Harry Fryer of San Rafael Valley was a Patagonia visitor Thursday.

Val Valenzuela Jr. attended the funeral of M. Escalada in Nogales Wednesday.

Mrs. E. H. Evans and children who have been living in Tucson for some time, are spending the summer in Patagonia.

Frank Reichert of Mansfield spent a few days in town this week.

Mr. and Mrs. A. G. Keating of Los Angeles, who spent several days at the Big Jim mine last week, returned by automobile to their home on the coast Sunday afternoon.

Mr. and Mrs. Frank Seibold have 11 children spending the summer at their "junior dudo ranch" near Patagonia.

Mr. and Mrs. W. F. Neil and a party of friends, of Elgin, were Nogales visitors Wednesday.

Fred Edsmith of the 3-R mine was in town Saturday for supplies and mail.

Dr. A. W. Hardtmayer is critically sick at the ranch of Mrs. Sam White, Sonolia.

ELGIN NEWS NOTES

Mrs. Emma Johnson of Fulerton, Calif., is visiting friends at Elgin and Rain Valley. Mrs. Johnson owns a ranch in Rain Valley. She says it seems good to see the sun shining on more.

Troy L. Ramsey motored to Tucson Monday.

A number of Elginites attended the dance Saturday night at Sonolia.

Miss Evelyn Hanson has been enjoying a visit with Miss Frances Wilcox of Fort Huachuca for the past 10 days.

Mrs. E. L. Knight and Mrs. Eva Barnett visited friends Monday at the Fort.

Mrs. Tallas and daughter, Annie, were Elgin visitors Monday.

Mr. and Mrs. A. L. Hanson entertained a number of friends at a dinner party Sunday in honor of their daughter Evelyn's 16th birthday.

ELSIE ZIMMERMAN WEDS

Elsie Zimmerman, formerly of Sonolia, but at present a resident of Long Beach, Calif., was married last week in the coast city. She will make her home in Los Angeles with her husband, following their return from their honeymoon.

TUBERCULAR GIRL SUICIDES

Phoenix, June 9.—Choosing death by her own hand rather than a few days of life as a sufferer from advanced tuberculosis, Helen Turner, 21, formerly of Hammond, Ind., set fire to her bed in a small cottage southeast of Phoenix and was burned to death in a few minutes.

JOE WISE SUCCEEDS ESCALADA

Nogales, June 10.—J. E. Wise, well known resident of this city, has been elected by the Nogales aldermen to succeed the late Manuel Escalada.

A passion for gambling is said to be a normal human instinct, which possibly accounts for so many marriages.

Girl Scythe Champ to Defend Title

Helen Bernaby, girl scythe champion, and the men she bested in mowing contest Above, modern machinery for harvesting hay.

NORTH DANVILLE, N. H.—Helen Bernaby, champion scythe wielder, is whetting her trusty blade to uphold her honors against all comers in the hand cutting of hay at the state agricultural college contest to be staged at the university next month. With a crowd of 1,000 cheering her on, the 19-year-old "Maude Miller" last year swung her scythe to victory over an even dozen stalwart men. Of course, it was a sporting event, as the entire group of contestants could not begin to cut as much hay in a day as a 6-foot modern mowing machine.

Hay harvest is one of the most scientific and important farm jobs, says the Research Department of the National Association of Farm Equipment Manufacturers. Over 100,000,000 tons are put up annually. West of the Missouri river nearly half the hay crop is alfalfa. Small grain is cut for hay in large areas on the Pacific slope. The annual legumes have a big following in the Southeast—cow peas, vetches, peanuts and field peas. At the barn, the harvest is speeded by tracks in the top of the barn, which enable carriers to bring the hay from the wagons to the different parts of the mow via grapple hooks, shears, harpoons or slings. These have all been greatly im-

proved in recent years and now the gas engine is used for hoisting, one man on the load of hay doing both the sticking of hayfork and the hoisting and dumping from his place on the load. Better mowers, pulled in tandem in large fields, or with wide cutting sickle bars, are also now used, while wagons are pulled in fleets by tractors to cut down man labor and increase quality of hay put in mow through cutting at the proper stage. The work of chemists and metallurgists in developing better steels for sickle bars, where four times the pre-tractor strain is required, is one of the distinct advances in the new tractor-drawn machines.

COLUMBIA FLIERS IN GERMANY SPEND THE 4TH IN PATAGONIA OWENS VALLEY GETS 30-30 RIFLES

Berlin, June 7.—Conveyed by 15 German planes, the deafening roar of whose motors could hardly compete with the hoarse "hoos" of the 150,000 enthusiastic spectators gathered in an arduous Templehofer airbase, Clarence D. Chamberlain and Charles A. Levine finally descended upon Berlin in their Bellanca plane Columbia this evening.

It was a real welcome for the delayed aviators. The fact that the people of Berlin suffered a great disappointment Monday morning, when the plane was expected, had nothing to do with the greeting extended to the Americans when they arrived. Crowds many times as large as had made the pilgrimage on the previous day to the field spent all afternoon in picnic fashion and spirit scanning the sky for a glimpse of the Columbia. The watchers crowded the airbase to its capacity and lined up many rows deep along the fence enclosing the immense field.

Yesterday's anxiety gave place to happy confidence, the drowsy lassitude of those who had kept vigil all night turned to joyousness, and was expressions gave way to happy laughing faces.

A touch of carnival was added at 5 o'clock, when a brass band, in gaudy, flaming Hussar uniforms with gilded drapery, marched onto the ground and played American and German airs alternately. As on the day before, Berlin's huskiest and smartest police were on duty keeping perfect order, though in their zealous efficiency sometimes causing annoyance to guests, such as the staffs of the American embassy and consulate, foreign diplomats and higher officials of the German and Prussian governments by frequent scrutiny of their admission cards.

Forest Fire D-ifts Across Line Tucson, June 10.—Four hundred acres of United States forest reserve land, about 15 miles west of Nogales, were burned over yesterday by a grass fire which originated in the state of Sonora, Mexico, and then spread across the international boundary. Troops from Camp Little, Nogales, aided in battling the flames, according to a message to headquarters here of the Coronado National forest. The fire was under control last night.

Reading maketh a full man, but if he fills up on some current literature he might as well remain empty.

Patagonia's Second Annual Rodeo will be held at Circle Z ranch, just below town, on July 4th. The program has not been fully made up as yet, but will be given in full in next week's Patagonian.

Some of the best riders and ropers in southern Arizona will compete for prizes. There will be wild horse riding, calf and steer roping, horse racing and all the stunts usual to a first class rodeo.

There will be a big barbecue at noon, in a shady spot beneath the trees at the Circle Z ranch, followed immediately by the big show, in the play field below the ranch buildings. There is a 17-acre field surrounded by large shade trees, beneath whose spreading branches autos will be parked. There is plenty of room for everybody to witness the cowboy sports without crowding. Late arrivals will find room in the great circle.

DORIS DORE, 21, BRANDED

Hollywood, Calif., June 9.—Doris Dore, 21-year-old actress, who appeared in "An American Tragedy," was branded early today with the letter "K" on her forehead, chin, breast, arms and hands by a man wielding a razor, who forced his way into her apartment. Police believe he is either a degenerate or a seeker of revenge.

She said she had been disturbed three nights by knockings on the door of her apartment, but admitted the man in the belief he was a friend with whom she had a misunderstanding yesterday. Miss Dore, who was taken to the emergency hospital, does not know the significance of the branded letter. The actress told a story about which detectives are dubious: That she was hounded from New York to Hollywood by members of a secret society in which she signed as a member for fun. No blood was found on the bed in her apartment.

Moscow, June 9.—Soviet indignation over the assassination in Warsaw of the Soviet minister to Poland turned against England almost to the exclusion of Poland. The government issued a communique alleging British complicity in terrorist plots and cuttings in Russia, while the entire press directed its verbal batteries against England.

The only mention of Poland made is to the effect of her pretention of regret as the usual procedure of bourgeois diplomatic etiquette.

Los Angeles, June 9.—Rumblings that promised new outbreaks of the storm which has hovered over Owens valley, scene of a long and bitter battle between city and ranchers over water rights and reparations, were heard today with reports of substantial purchases of rifles and ammunition by valley residents and the buying of guns by the Los Angeles water and power bureau.

Since May 27, the thunder of three dynamitings of the Los Angeles city aqueduct has heralded the gathering of new war clouds. Monday 35 business men of Bishop organized the first of several armed squads of "minutemen" with the purpose of "protecting Owens valley property from any attack by Los Angeles city detectives."

Ten 30-30 rifles and 2000 rounds of ball cartridges were sent today by a Los Angeles store to a Bishop hardware company. The valley store said all of the guns and ammunition had been ordered in advance by individuals. The Los Angeles store was unable to meet at once a further order for 40 additional rifles.

Simultaneously it was reported that the city power and water bureau recently purchased more than 50 sawed-off shotguns and rifles and a quantity of ammunition for shipment to the Owens valley.

NEWMAN IS ACCUSED OF FIRST DEGREE MURDER

Prescott, Ariz., June 9.—A. H. (Ace) Newman, superintendent of construction of the Lightning Delivery Company of Phoenix, today was held to answer to the Yavapai county superior court on a charge of first degree murder in connection with the slaying of Shedwin Higgins, 20-year-old employe of the company, on June 1st. Newman's bond was increased from \$5000 to \$7500 when the preliminary hearing was concluded.

Mrs. Lucy Higgins, 18-year-old widow of the slain man, asserted at the preliminary hearing that Newman made several attempts to kiss her and put his arms around her. This was alleged to have taken place the day previous to the shooting.

A prominent surgeon declares that light-haired persons resist disease better than dark-haired ones.

In a Pennsylvania bank is a vault door 45 inches thick and weighing 40 tons.

MINING NEWS FROM ALTO

(By Josiah Bond)

Work on the Colossus in the Josephine, north of Alto, has disclosed the hanging wall of the lode in a crosscut at the 50-foot level, showing the lode to be 9 feet wide, including the shaft. The footwall has not yet been seen, but crosscuts will be driven both ways at the 100 level. A few feet below the 50 crosscut the lode showed considerable gray copper, and runs handsomely in silver. The Colossus is now being examined with a view to the erection of a mill by Los Angeles parties attracted by the certainty of large tonnage. There is plenty of water in the drycut time coming from the upper tunnel, which has a length of 150 feet, and reaches the wall of the lode. The discovery of such an enormous tonnage is considered important by the owner, Josiah Bond.

The Morning Star mine of Martin Wilson has been looked at by operators, with a mill in mind, the immense blowout on that property having received considerable attention during the last year. A tunnel lower down is being planned to function in connection with a fine mill site in the canyon bottom.

Work is being done on the Franklin, belonging to the Richardson estate, by Fred Smith, who has leased that property and the M. & S. nearby, about a mile east of the Alto postoffice. A new shoot of excellent lead ore has been uncovered by him, with much ore on the dump.

O. A. Reid has been sinking a shaft on the Sure Shot, in Josephine Canyon, and is getting some fancy ore in a strong vein. His home is on the Camp Bird group, and he has a fine garden, and during this last month has been distributing fresh strawberries of very large size and luscious flavor. These we believe are the first strawberries grown on the south slope of the Santa Ritas. The rest of his garden looks fine. He has running water on this claim, and an ideal camp site, as well as the continuation of the Pio Juanas lode down to the watercourse.

The Pinal, leased by Los Angeles parties from John A. McDonald, is making good progress in their crosscut from the 300-foot level. This ground makes considerable water, which is held to be a good sign by old-timers. Several veins of good ore have been met already, but no drifting will be done until the bid lode is struck. This mine employs American machine drillers.

Messrs Shannon and Dowd of Patagonia are reported at work on some claims owned by Bird and John Yoan near Agua Caliente.

Miguel Coronado has just made a small shipment from the Burgoon claim, belonging to Josiah Bond. This was a good lead ore carrying silver.

The fence around the Baca Float is being repaired and extended to hold cattle.

MANUEL ESCALADA, 60, DIES IN NOGALES JUNE 6

Manuel Escalada, aged 60, one of the best-known citizens in Santa Cruz county, and a resident of Nogales for many years, died suddenly about 4:30 o'clock Monday morning. He was a prominent business man, director of the Nogales Chamber of Commerce since its inception, and one of the most active workers in the city's civic affairs. Death came suddenly, following approximately 10 minutes of suffering. His death was a great shock to his many friends.

Deceased had been a resident of Nogales for 35 years, during which time he built up one of the largest wholesale and retail mercantile businesses in this part of Arizona. Funeral services were held in the Catholic church, and interment was made in the Nogales cemetery. The Knights of Columbus conducted the burial services.

Mr. Escalada is survived by his widow, Mrs. Domitila Revuelta de Escalada, and three sons, Jose, Louis and Manuel. Jose, who is in Spain as Escalada Brothers' Nogales representative, was not able to attend the funeral, but Louis and Manuel were at home when the father died.

All business was suspended in Nogales in honor of the dead man, who probably had the largest funeral attendance in the history of the border city.

It is said the zebra is rapidly becoming extinct.

LINDBERGH TO HAVE GREATEST WELCOME IN HISTORY

Washington, June 9.—Requests of patriotic and other societies for an opportunity to do homage to Colonel Charles A. Lindbergh during his official welcome and reception in Washington June 11 are swamping the committee on arrangements. With the possible exception of the organizations of war veterans and the United States Flag Association, which is to conduct vesper flag service at the capitol Sunday evening, all of these societies probably are doomed to disappointment.

All of the time of the heroic aviator for Saturday, after his arrival from Europe at noon aboard the cruiser Memphis, has been allocated and the committee perfected plans today for all of Sunday afternoon, which will be taken up with the trip to Arlington cemetery to lay a wreath on the tomb of the Unknown Soldier and to the Walter Reed army hospital to greet the sick and wounded there.

At the Walter Reed hospital the veterans organizations may be given five or ten minutes to present their colors and deliver to the hero of the hour a parchment testimonial of their appreciation of his epic flight. Lindbergh himself may elect to attend the flag service, but that is left with him.

When his ship docks at the President's wharf, at the Navy Yard, the now most highly acclaimed of American citizens will be greeted by two men who have made their names imperishable in the development of aviation, Commander Richard Evelyn Byrd, U. S. N., the first man to fly over the North Pole, and Commander A. C. Read, U. S. N., the first man to cross the Atlantic in a plane.

They will be in full-dress uniform, and Colonel Lindbergh himself may wear a uniform carrying the insignia of his new rank as colonel in the Missouri National Guard Air Service. This uniform will be delivered aboard the Memphis by an army blimp which will go out from Langley Field to greet the flier.

TOO MUCH MAIL FOR LINDBERGH

Washington, June 9.—Mail for the nation's hero, Colonel Charles A. Lindbergh, invited by Postmaster General New, literally has swamped the post-office department here, and it's delivery furnishes a problem which Mr. New called on the semi-official reception committee today to help him solve.

The hundreds of thousands of letters, many of them registered and others marked "special delivery," will be placed in new mail sacks, and loaded on screened trucks which will take up places in the Lindbergh parade behind the cars carrying the semi-official reception committee.

Actual delivery will be made through R. R. Blythe of the Wright Aircraft Corporation, who is Colonel Lindbergh's personal representative in Washington, taking care of invitations, mail, telegrams and cards sent here for the New York-to-Paris flier.

Thousands of air mail letters for Lindbergh are being assembled at Chicago, Cleveland and New York, and will be brought here by airplane with the assistance of the army air service and private air corporations.

FLAG DAY PROCLAMATION

Washington, June 8.—It is as necessary to cherish the unseen things the American flag stands for as to respect the national emblem itself, President Coolidge said yesterday in calling upon the public to observe next Tuesday, June 14, as Flag Day. "Liberty and union," he said in a proclamation, "freedom of thought and speech under the rule of reason and righteousness as expressed in our Constitution and laws, the protection of life and property, the continuation of justice in our domestic and foreign relations—these are among the high ideals of which our flag is the visible symbol."

JULIAN POOL LOANS, \$18,000,000

Los Angeles, June 9.—The district attorney announced today that reports of a fine grand jury showed Julian pool loans amounted to \$18,000,000 instead of \$12,000,000. The prosecutor announced the discovery of two additional loan pools, one locally for a million and a half and the other for half a million operated at Tijuana.

According to A. M. Ghepke, president of the Nogales National bank, a \$250,000 tourist hotel is to be erected on Juno Heights, on the Patagonia-Nogales highway, about a mile from the city limits of Nogales.

"How Long Should a Farm Wife Live?"

Above—Motor truck used in Nebraska farm water system demonstrations. Left—The "Old Oaken Bucket," full of "poetry and poison" and source of backache for the housewife carrying the water daily through her lifetime. Below—Typical farm water system installations.

CHICAGO—That the average American farm wife is entitled to at least another ten years of life that the present farm water system deprives her of is the contention of the Research Department of the National Association of Farm Equipment Manufacturers. The U. S. Department of Agriculture finds that three out of four farm water supplies are pollutable, and only one out of ten farms have running water in the farm home to eliminate the killing drudgery that farm women have borne through the ages in carrying buckets of water in and out of their homes since the days of cave life.

Between 1901 and 1920; this added life to each of millions of people being largely credited to increased sanitary measures via abundant and safe water supplies in the great cities. On the other hand, a great portion of the rural areas still know the agony that comes from shallow and polluted wells, while typhoid still takes its toll in the rural districts. To remedy this condition and aid the farmer via the Farm Bureau, extension departments of the state colleges and U. S. Department of Agriculture, many manufacturers and their dealers are now co-operating in demonstrations and installations.

Here is shown the truck recently fitted up by a Nebraska manufacturer of pumps and windmills to co-operate with the University of Nebraska and county bureau offices. The various types of farm home water systems are shown, including the pitcher pump and sink that can be installed for \$15 or \$20 and removed by renters who want to move. The gas engine, windmill, pressure and automatic systems are shown also. Thus, every need and every farm purse is fitted and the day of emancipation is brought closer for thousands of farm women in Illinois, Kansas, Michigan, New York, California and Missouri and other states where such demonstrations have been held. The slogan of the National Federation of Women's Clubs, "Running Water in Every American Home," is used in this campaign.

FARMERS AND BUSINESS

Regardless of what may be done in the future with respect to legislation intended to aid the farmer, it will never attain the place to which it is entitled until farmers make up their minds to organize effectively for mutual protection and cooperation.

Because of the scattering of farmers over such a wide territory, and the difficulty of getting them together even to discuss their own problems, the task of organization is a hard one. While several farmers' organizations of national scope already exist, they really include only a very small percentage of all farmers. While these bodies are helpful, they can never be really effective without a large and loyal membership.

As Secretary Jardine stated in a recent speech, "Big business is efficient because it is organized. It knows the best methods of production and what the market demands, both quantity and quality. Organization will bring to agriculture the same benefits that it has brought to business."

John Webb, a 19-year-old lad from Anniston, Ala., attracted much attention in New York one day recently, his every movement being eyed with good-natured approval. He had made no record airplane flight, nor had he figured in any other spectacular performance. He was only a casual visitor, yet crowds followed him about. The explanation is that he weighs 612 pounds.

Of course, bootleggers will respect the new ruling of the supreme court which makes them liable for income tax on their profits.

Generally speaking, milking is not considered a particularly heroic occupation, nor one fraught with more danger than that attending Bossy's "kicking the bucket." But Captain Schneider of the Berlin Zoo recently won temporary fame by extracting half a gallon of milk, desired for experimental purposes, from a lioness in his keeping.

Recently a seat on the New York stock exchange sold for \$210,000, a new record price. Quite an advance since May 17, 1792, when 24 brokers met under a cottonwood tree in Wall street and formed an association, of which the present stock exchange, with 1100 members, is the outgrowth.

TO HOLDERS OF SECOND LIBERTY LOAN BONDS

EXCHANGE OFFERING OF NEW TREASURY BONDS

Notice is given of a new offering of UNITED STATES TREASURY BONDS, dated June 15, 1927, and bearing interest from that date at the rate of 4 1/2 per cent. The bonds will mature in twenty years, but may be called for redemption after sixteen years.

Second Liberty Loan bonds will be accepted in exchange at par. Assured interest on the Second Liberty bonds offered for exchange will be paid as of June 15, 1927.

Second Liberty Loan bonds have been called for payment on November 15, 1927, and will cease to bear interest on that date. Holders of such bonds who desire to take advantage of the exchange offer should consult their bank or trust company at once. The exchange privilege will be available for a limited period only, and may expire about June 15th.

Further information may be obtained from banks or trust companies, or from any Federal Reserve Bank.

A. W. MELLON,
Secretary of the Treasury.

VIRTUE OF PATIENCE

One of the greatest aids to worthwhile accomplishment is the quality of patience. This applies to laying the foundation for a successful career in any profession or business. The person who depends upon short cuts and quick-action devices frequently meets with bitter disappointment, if not disgrace.

This is particularly true with respect to the accumulation of wealth, as many misguided individuals now behind prison bars can regretfully testify. Many men who go wrong through speculation with other people's money do not set out deliberately to be criminals, but they think they see an opportunity to make a "killing" and take the chance. They intend to replace the appropriated funds if they win, but they usually

lose in the end. Such instances are related by a recent writer on thrift:

One man used money not his own in what he considered a surt-thing real estate deal. The venture failed and one more was added to the suicide roll. Another lost in playing the market, then stole from his firm, lost again and went to prison. Innumerable cases like these might be cited.

On the other hand, the patient plodder, who builds upon a sound and honest foundation, frequently achieves success which is denied to the speculative plunger. In fact, patience is generally one of the surest aids in the accomplishment of any worthy purpose.

An important discovery involving the treatment of throat and lung diseases with acid fumes is reported from Germany, where almost startling results are said to have been attained.

Like many other discoveries of value to mankind, the efficacy of acid fumes in promoting health was noticed accidentally. In a factory where acids were used for cleansing rags, it was observed that the employees had a peculiar feeling of wellbeing and were also free from grip and colds, even when these maladies were epidemic in the vicinity.

These observations led to experiments with animals and human beings, which confirmed the premonition in a scientific way. Guinea pigs were placed in an acidified atmosphere, while others were kept in ordinary air. Both were infected with

tuberculosis bacilli, with the result that those in ordinary air died, while those in the acidified rooms remained healthy.

Later it was found that mild cases of tuberculosis in human beings were healed by exposure to acid fumes, while the treatment appeared to give absolute immunity to the disease when administered to healthy persons. The method of giving the treatment is very simple and is thus described:

"The specially prepared acid is merely put into an evaporating dish and placed at the bedside of the patient, so that the air becomes charged with the vapors, which are thus drawn into every crevice of the lungs and bronchial tubes at each breath."

Modern smokers praise the integrity of Camels

THIS is the age of frankness and plain-speaking, and it rates Camel first among cigarettes.

For Camel is that kind of a smoke. Camel is all quality and no false front or show. Camels are made of the choicest Turkish and Domestic tobaccos grown—no substitutes. And the finest blending ever given a cigarette.

It is Camel character that has won the smokers of today—such honesty of taste and fragrance as never was known in a cigarette before. You'll find all dreams of smoking pleasure realized in this modern, quality cigarette.

"Have a Camel!"

Try Three Tones

BUTTERICK
1280

FASHION, being a perfect lady, has always
held firmly that black is black and white
is white, but this spring the fickle woman
has found that there are many shades of
every color, and she uses two or three of
them all at once in one frock. White,
gray and black, for instance, might be
used in the frock above for waist, second
tier and third tier respectively. The
romantically named shades of Palmetto,
Gooseberry and Pistache green, and the
exotic tones of Fiesta, Castilian and
Goya red made interesting combinations
for two composed frocks of this nature
recently presented on Fifth Avenue, New
York. To balance this richness of color
the cut of the composed frock is, as you see
quite simple.

In the province of Ladakh, in the
Himalayas, many of the women have
more than one husband at the same
time.

Sidelights

By Marcy B. Darnall

Curiosity continues to get folks into trouble. George Mallory of Buffalo amused himself in church by gouging his pocketknife into a small metallic object he had picked up. A loud report startled the congregation and George found a thumb and forefinger missing. He had been playing with a dynamite cap.

Chicago undertakers were frowned upon by the city aldermen when they asked permission to use fire engine sirens on their hearses, so as to better clear traffic for funeral processions. Alderman Byrne said: "What's the big idea? Nobody who is dead is in a hurry to get anywhere."

How long can you hold your breath? If you have not practiced the art, half a minute or less may be your limit. But E. L. Gaylor, student at Wesleyan University, Middletown, Conn., held his for 14 minutes 2 seconds, after filling his lungs with pure oxygen. The previous record was 10 minutes, made by a student at the University of California in 1916.

Harold Youman of Owasso, Mich., was observed walking on the street striking himself over the head with a board. Police took him to a hospital for inquiry into his sanity. He explained that he was merely punishing himself for his stupidity in losing the affections of his sweetheart.

A press dispatch states that A. F. White of Santiago, Chile, who writes with both hands at the same time, wants to know if anyone else can perform the feat. Well, we can—on a typewriter.

Possibly the sheiks brag also about how many kisses they get to the gal-lou.

"MISS UNITED STATES"

Here's Dorothy Britton, 19-year-old dress-shop employe of New York City, who has been crowned America's newest beauty queen at the International Beauty Pageant in Galveston, Texas. Miss Britton was selected from thousands of New York City's fairest girls in a mammoth competition held under the auspices of Smart Set Magazine. She is now in Hollywood, where a brilliant career in the movies awaits her. She neither drinks nor smokes, and has always worn long hair.

Perhaps the juvenile crime wave may be attributed to the passing of the Statute of Liberty in New York harbor.

We suppose it's natural that a peevish aviator should get hopping mad and go up in the air.

Newspapers in 13 languages are printed within sight of the Statue of Liberty in New York harbor.

Eight organists of large Paris churches, including the famed Notre Dame Cathedral, are blind men.

Few of us fully realize the perils which have always beset pedestrians, even before the day of automobiles. The Vicksburg Daily Herald of August 12, 1865, protested the custom of "throwing of slop in the streets from windows as it is practiced to a great extent by many," also relating the misfortune of a lady walking on the street who "received the contents of a bucket of dirty water, soiling her dress so it is unfit for future wear."

The most fastidious boarder in New York Zoo is the Australian platypus, a peculiar creature described as half animal and half bird, which requires daily \$4 worth of earthworms and grubs, supplied by schoolboys, who thus earn spending money. That's an awful lot of good fish bait to lay out for one critter.

The only short cut to knowledge is found in carefully avoiding short cuts.

NEWS REVIEW OF CURRENT EVENTS

Lindbergh Is on Way Home—Flood Control Conference in Chicago.

By EDWARD W. PICKARD.

CAPTAIN LINDBERGH is on his way home, due to receive a welcome that will throw into the shade even the remarkable ovations given him in Paris, Brussels and London. Sailing from Cherbourg, he is a passenger on the United States cruiser Memphis at the express invitation of President Coolidge and will go direct to Washington to be the President's guest and to receive the Distinguished Flying Cross and to be promoted, presumably to the rank of colonel. The young aviator's mother was invited to visit in the temporary White House at the same time. The President appointed Secretary of War Davis, Secretary of the Navy Wilbur, Secretary of State Kellogg, and Secretary of Commerce Hoover a cabinet committee in charge of the welcoming arrangements, but details were turned over to the District of Columbia commissioners.

One of the plans already agreed upon includes the gathering of the largest group of aircraft ever assembled to greet a distinguished visitor to Washington, which will meet the Memphis at a point about fifty miles at sea and convey the ship to Washington. As the cruiser enters Chesapeake bay the escort will be joined by nine navy torpedo, bombing, and scouting planes, and further up the Potomac more than a score of army planes from Langley Field, Va., as well as sea-planes from Hampton Roads and the naval air station, will be added. After a day in Washington, Lindbergh will fly to Staten Island and put himself in the hands of the New Yorkers, who have planned a tremendous reception.

The international political importance attached to Lindbergh's flight was responsible in part for his speedy return. He earnestly desired to visit a lot of countries in Europe, feeling that it might be a long time before he got over there again. But it became evident that the nations he did not visit would feel slighted, and he was persuaded to give up his plans. Besides, President Coolidge was desirous of receiving the air hero before leaving for his vacation in the Black Hills of South Dakota, his departure for that place being scheduled for June 13.

Lindbergh flew from Paris to Brussels, where he was received in state by King Albert, who made him a Chevalier of the Royal Order of Leopold. Then he flew over to Croydon, England, where a mob of hundreds of thousands welcomed him so vigorously that he and his plane barely escaped serious damage. In London Ambassador Houghton presented him to King George and other notables and the king awarded him the air force cross. He attended various banquets and other functions and went to the Derby as the guest of Lord Londsdale. Meanwhile his plane was being dismantled for shipment to America, so he borrowed a plane and flew back to Paris to say farewell to the French people and to Ambassador Herrick, whose tactful guidance meant so much to the aviator during his stay in France.

Five leading American engineering societies last week gave to Lindbergh, Orville Wright and his late brother, Wilbur Wright, the Washington award for outstanding engineering accomplishment. Lindbergh's plane was equipped with a Wright motor.

THOUSANDS of prominent men, answering the call of the mayors of Chicago, New Orleans and St. Louis, gathered in Chicago to discuss the great Mississippi valley floods and to try to devise methods of preventing the recurrence of the disaster. The participants in the conference included United States senators and congressmen, governors, mayors and other officials, business men of all varieties, engineers and labor leaders. Senator Pat Harrison of Mississippi as chair-

man of the organization committee called the assemblage to order and Secretary of War Davis delivered a message from President Coolidge. Among the other speakers were Secretary of Labor J. J. Davis, Maj. Gen. Edgar Jadwin, chief of army engineers; Senator W. L. Jones and Representative Frank R. Jones, chairmen of the congressional flood control committees, and Speaker Nicholas Longworth. Before leaving Washington for Chicago, Mr. Longworth had a conference with President Coolidge and said afterward that flood control legislation, together with tax reduction would be given the right of way by the house when congress meets in December.

Conditions in the flood area improved slowly, but the "sugar bowl" parishes of Louisiana were being converted into a huge lake as the blanket of water moved gradually to the gulf outlet.

MARSHAL CHANG TSO-LIN'S northern Chinese armies met with great defeats in Honan province, through the forces of both the Han-kow and Nanking factions of the Nationalists advancing in the campaign against Peking. The northerners retreated to the north of the Yellow river and Chang prepared for desperate resistance at Paoingfu and Tschow. The peril of foreigners in the Peking area was so imminent that nearly two thousand American marines were sent there from Shanghai and about as many more were en route there from the Philippines. This will make a force of more than 4,000 Americans in Peking and Tientsin. The British and Japanese also were sending large numbers of troops there, together with many planes to patrol the railway between the two cities. Japan also landed considerable forces at Tsinrao, which action provoked both the northern and the Nationalist authorities.

The diplomatic corps in Peking determined on plans for the defense of the legation quarter in the event of a crisis, but dispatches from Washington say President Coolidge decided that if disorders occurred Minister MacMurray and the American legation should be moved to Tientsin or possibly Shanghai, the navy believing it will be much easier to defend Americans at those points than at Peking. Senator Hiram Bingham of Connecticut, who has been traveling in China, was caught in the disorders resulting from the rout of Chang's troops in Honan. He escaped unhurt but he and his party were robbed of all their valuables.

SOVIET RUSSIA, extremely sore over the break with Great Britain, is determined to keep the Chinese situation as bad as it can. The executive committee of the Third Internationale decided to make a more intensive campaign in support of the Chinese revolution and to appeal to the workers of the world to assist soviet Russia to sabotage other nations in the coming "inevitable war."

Alexis Rykov, president of the council of people's commissars, addressing a plenary session of the Moscow soviet, declared that the British rupture with Russia was a prelude to war. The international situation therefore, was threatened with grave complications. The British government, he asserted, wished to improve its position by provoking war, in which it hoped to play a leading part, leaving "the dirty part of the work" to other peoples, who, being thereby weakened, would be subordinated to Great Britain. To this danger the soviet union opposed a steady policy of peace.

PRESIDENT COOLIDGE in his Memorial day address at Arlington told his audience that the United States must maintain armed forces sufficient to protect it from attacks, or expose itself to aggression and destruction. He added to this warning a pledge of his leadership in an effort to end war through international agreements. But while he spoke of the country's desire to discard the element of force and deal with other powers on the basis of understanding and good will, he cautioned that "we could no more dispense with our military forces than we could dispense with our police forces."

Ambassador Herrick, speaking in France, created something of a sensation by making a strong attack on

soviet Russia for its attempts to undermine other governments.

FIFTEEN balloons started from Akron, Ohio, in the annual elimination race, and the three winners all landed in Maine. W. T. Van Orman with the Goodyear entry won first place with 727 miles; E. J. Hill with the Detroit Flying club's balloon was second with 665 miles, and Capt. W. W. Kepner, pilot of the U. S. Army No. 3, took third place with 602 miles to his credit. Not an accident of any sort marred the event.

RIOTOUS mobs in Tampa, Fla., made three determined attacks on the jail with the intention of lynching a prisoner who had confessed to murdering five members of a family. The crowds were repulsed first by the police and then by members of the National Guard; the soldiers were forced to fire on the attackers and killed four persons.

GOVERNOR FULLER of Massachusetts, who is studying the Sacco-Vanzetti case, has appointed an advisory committee to aid him in determining his course in that puzzling matter. Its members are President Abbott Lawrence Lowell of Harvard, President Samuel W. Stratton of Massachusetts Institute of Technology and Judge Robert Grant.

CHARLES P. TAFT, publisher of the Cincinnati Times-Star, and Mrs. Taft have given their valuable art collection, their residence and \$1,000,000 to the people of Cincinnati. Announcement of the gift, made at a meeting of the Cincinnati Institute of Fine Arts, said it was given for the advancement of "the artistic and musical education and enjoyment of the people of Cincinnati."

EGYPT is in danger of losing her independence again. The government, under the influence of the Wafd nationalists, a wealthy Moslem organization, announced plans to reorganize the army without consulting the British and to refuse credits for the British sirdar. The British government sent a prompt warning against such action, accompanied by threats and reinforced the latter by dispatching three battleships to Alexandria and Port Said. Sir Austen Chamberlain, British foreign secretary, explained to the house of commons that if the Wafd politicians got control of the army it would become a potential hostile force and would complicate Great Britain's task of defending the Suez canal.

BELGIUM and Italy are on the verge of a quarrel, the trouble starting with the attitude of the Belgian foreign minister, Vandervelde, who is a Socialist, toward Fascism. His attacks were brought on by Italy's demand that Belgium expel Italian political refugees. Mussolini recalled the Italian ambassador, Marinus Cambiasso, leaving the embassy to a charge of affairs indefinitely. Vandervelde refused to modify his attitude and was supported by the Socialist deputies.

OPENING of the sale of liquor in Ontario province under government control attracted crowds of thirsty Americans to Windsor and Toronto, and they, together with equally thirsty Canadians, almost mobbed the liquor stores. The demand for bottled booze and for the permits without which it could not be purchased was so great that some places had to close until more supplies could be obtained.

PRIMO DE RIVERA, premier-dictator of Spain, has called a national assembly to meet September 13 for the purpose of drafting a new constitution and a new electoral law giving universal suffrage and absolute freedom of the ballot.

GEORGE SOUDERS of Lafayette won the 500-mile automobile race at Indianapolis on Memorial day, driving his little Duesenberg car at an average speed of 97.54 miles an hour and going the whole route without relief.

PRESIDENT COOLIDGE'S selection of the Black hills as his vacation place gave great joy to South Dakota. He will occupy the state game lodge near Rapid City, and the executive offices will be established in the new engineering building of the State School of Mines in Rapid City.

The Kitchen Cabinet

(© 1927, Western Newspaper Union.)
Let's just be glad.
So many joys are given
To us, each day and moment that
we know,
For you and me the blue sky arches
over,
For you and me the slender daisies
bloom,
Let's just be glad.

FOOD FOR THE FAMILY

A ripe olive yields twice as many calories, or heat units, as the green olive, and is nearly equivalent to bread as food, which we consider the staff of life. One has to cultivate the taste for the ripe olive; it is becoming better known, but is still little used in the greater part of the United States.

Of course the ripe olive is more easily digested than the green, as well as being richer in food value. Ripe olives are especially good because of their delicate flavor in meat sauces, dressings and made dishes.

A half dozen ripe olives finely minced added to a giblet sauce to serve with roast turkey or chicken is especially fine.

Olive Salad.—Take four tart apples, one small bunch of celery, one-half cupful of walnut meats, and three-fourths of a cupful of pitted olives, ripe. Cut the celery, apples and olives into julienne strips, add the nuts and mayonnaise dressing and serve in a nest of lettuce.

Hawaiian Salad.—Place a slice of pineapple on a leaf of lettuce. On it arrange alternate sections of orange and grapefruit, carefully stripped of all connecting tissue. Between each piece of the fruit place a one-eighth section of ripe olive. In the center of the pineapple place a ball of cream cheese seasoned with mayonnaise. Sprinkle with paprika and serve with French dressing. The pineapple juice, as well as the grapefruit juice may be used instead of lemon juice or vinegar.

Olive Sauce.—Melt four tablespoonfuls of butter and add a teaspoonful of chopped olives and cook until well blended and softened. Remove the olives, add five tablespoonfuls of flour, one-half teaspoonful of salt and a few dashes of pepper; add two cupfuls of brown stock and cook until thick. Cut one dozen olives from the pits, drain and add to the sauce. Serve with game or meat.

A Chapter on Sauces.

A sauce is as important to a dish as the ordinary seasoning of salt is to our food. Without it the dish is flat, stale and unprofitable. A very ordinary dish with a quantity, tasty and appropriate sauce has made many a chef and hotel famous.

Certain foods are enhanced in flavor and food value as well as improved in appearance by a proper sauce.

With lamb we like mint sauce; with pork, apple sauce; with turkey or chicken cranberry sauce; these are always associated.

Veal without a snappy tomato sauce, or one of onion, is usually tasteless and unpalatable.

With venison we like a spiced grape jelly to blend with the gamey flavor of the meat.

Wild duck seems best with not too sweet oranges sliced and served with a good French dressing. Tart jelly is also well liked.

Fish of any kind is always better served with a sauce. Oyster sauce is one well liked to serve with fish, as is tartar sauce and bechamel.

Bechamel Sauce.—Prepare a white sauce, using cream and white stock, either of veal or chicken; thicken with flour and butter cooked together. The water in which celery is cooked, oyster liquor or lobster mixed with milk makes a good sauce. A richer sauce is made by heating an egg or two and pouring the hot sauce into it slowly, beating well.

Scoubise Sauce.—Boil three large onions till very soft. Drain and rub the onion through a sieve. Stir the onion pulp into a rich white sauce made with milk or cream. This is a sauce used for lamb or mutton.

Tartar Sauce.—Mix one tablespoonful each of vinegar and Worcestershire sauce, one salt-spoonful of salt and heat in a bowl over water. Brown one-third of a cupful of butter in an omelet pan and strain into the first mixture. Serve with broiled fish. The sauce should be served hot.

Cauliflower With Golden Sauce.—Cook the cauliflower in little water, drain and while very hot pour over a sauce prepared as follows: Mix until smooth one tablespoonful of flour with the yolks of two eggs, add one-fourth of a cupful of cream, one-half cupful of milk and the cauliflower liquor with three tablespoonfuls of lemon juice. Cook over hot water until thick. There should be one-fourth of a cupful of the cauliflower liquor. Add two tablespoonfuls of butter bit by bit, stirring until all is melted, then pour over the cauliflower and serve at once.

Nellie Maxwell

POULTRY

YOUNG GOSLINGS NEED GOOD CARE

When the goslings are raised in brooders they must be closed up at night for the first two or three weeks. After that they may be allowed to come and go if their pen is safe from dogs and other prowlers. Their runs should be so arranged that they will have plenty of grass.

By the time the goslings are a month old they will have reached a size which is comparable to small hens and may then be given wide or free range or be kept confined in yards where grass is available. If the grass in their yards gets eaten down it is necessary to supplement it with waste from the garden, lawn clippings or similar green stuff. On such food the goslings will make good gains but the addition of a little grain is advisable.

Water for drinking should always be available for the goslings. While they are small the vessel should be protected so they cannot get into it. While the weather is cool it is well to provide water only for drinking. After the weather settles and becomes warm there is no harm in giving them water so they can splash around in it.

Stale bread or a mash comprised of corn meal and shorts are the feeds most often used to supplement the grass ration of little goslings. Others use a more complete mash similar to that fed to chickens which contains animal food, skim milk or some dried milk products.

The profit in raising geese comes from the fact that they are great foragers and make the bulk of their gains on feed that is otherwise unsalable. It is a mistake to try to raise them largely on a grain ration which increases the expense; besides, they do not do so well as when given more forage.

What Good Hen Consumes During Course of Year

What one good hen eats in a year was shown by the poultry department of the Minnesota College of Agriculture in an exhibit at the Minnesota state fair. Of scratch grain she consumes 20 pounds cracked corn, 10 pounds oats, 10 pounds barley. Her laying mash, which is fed in a hopper, totals 8 pounds each of corn meal, ground oats, wheat bran, wheat middlings, and beef scraps with the addition of 1 per cent charcoal and 1 per cent salt. She eats 4 pounds of oyster shells and 2 pounds of grit fed separately in a hopper. Her feed bill totals \$15.23 a year.

If she eats she must more than pay her board bill, says the poultry department, and they showed the yearly egg production of four different hens: 1, pays board and little more; 2, pays board and 90 cents; 3, pays board and \$1.80; 4, pays board and \$4.70.

Poultry Facts

Milk is a valuable feed for hens. Hens should have vigor and good size before they lay.

Turkeys or geese should be killed by sticking in the back of the mouth.

Hard luck may be an alibi, but it isn't always an excuse.

Giving the chicks some form of milk at the start stimulates their appetites and promotes growth.

It's a good plan to start culling the flock with the chicks, by killing the weak, sickly ones that will never repay their cost.

The way brooder chicks act in the evening is a good guide as to the heat. If too much, they will stay away from the hover, and if too little they will crowd up near the stove.

Free range away from the poultry yard should be provided with clover for pasture whenever possible. It is the best known way to get good, healthy, vigorous pullets for winter laying.

The main reason for the variations in the prices of eggs and dressed poultry is the variation in their quality.

Exercise generates heat and promotes health. Make the poultry flock work for their grain by feeding it in a deep, clean litter of straw.

Eggs for hatching should not be kept longer than 10 to 14 days before setting. They should be held at a temperature between 40 and 50 degrees Fahrenheit and turned once each day.

Many people make a mistake in not getting the brooder house thoroughly warm before putting in young chicks.

Eggs from a well-bred, uniform flock of some one breed will be more uniform in color and should bring more per dozen than a mixed lot.

If you have surplus milk, by all means give it to the hens. If it comes or is in the shape of buttermilk, the chicks, so much the better. It is a good food besides being a health promoter.

POST TOASTIES

—corn flakes that stay crisp in milk or cream

Flaked hearts of corn toasted double-crisp and full of flavor

Post Toasties are the kind of corn flakes that make breakfast a real event. Millions prefer them for their delicious flavor and lasting crispness. A crunch of goodness in every spoonful. Crispness that lasts to the very bottom of the bowl.

POSTUM COMPANY, INC., BATTLE CREEK, MICH.

South Carolina Tract Made Bird Preserve

President Coolidge, by a recent order, has set aside a tract of about 2,350 acres in Jasper county, South Carolina, as a preserve and breeding ground for native birds. The area embraces certain abandoned rice lands belonging to the United States and abutting on the Savannah river, near Savannah, Ga., and is to be known as the Savannah river bird refuge.

The new reservation has been placed under the administration of the biological survey of the United States Department of Agriculture. It will be unlawful for any person to hunt, trap, capture, disturb or kill any bird or wild animal of any kind whatever, to take or destroy the eggs of any such bird, or to injure, molest or destroy any property of the United States within the limits of the reserve, except under such rules and regulations as may be prescribed by the Department of Agriculture.

Housing Problem

"Thousands of corpses are burned, tens of thousands are homeless," said Arthur Brisbane, speaking of the Japanese earthquake. And, if you never have been a homeless corpse, you don't know what hard luck is.—Springfield Union.

It isn't a real victory unless everybody concedes it. Take heed how ye hear!

Death outwits them

ANTS come to steal your food. Black Flag protects your food by killing the ants. And it kills them all. Not one escapes alive.

Black Flag is the deadliest bug-killer ever discovered. It keeps your home absolutely free from ants. Cleans out fleas, bed-bugs and roaches, too. Used outdoors, it will wipe out whole ant-hills. Bugs simply breathe it and die—but it is absolutely harmless to humans and pets. Sold at drug, grocery, hardware and department stores. Two forms—Powder 15c up.

only **25¢** for the 1/2 pint **LIQUID**

BLACK FLAG

Lindbergh and Herrick at Le Bourget Airdrome

This photograph, just received from Paris, shows Captain Lindbergh with Ambassador Herrick being greeted at Le Bourget airdrome by Col. Poli Marchetti, commanding officer.

Fast Cruiser Memphis Brings Lindbergh Home

Photograph of the U. S. S. Memphis, a light cruiser that was selected to bring Capt. Charles Lindbergh home because of its speed.

Lindbergh's Smile of Triumph

Photograph of Capt. Charles Lindbergh, hero of the nonstop flight to Paris, with the boyish smile that wreathed his face at the completion of his great feat.

Wearing Legion of Honor Medal

Captain Lindbergh, with President Doumergue of France and Ambassador Herrick, just after the young aviator had been decorated with the medal of the Legion of Honor, seen on his breast.

HIS FLYING CROSS

Above is a sketch of the distinguished flying cross, new American decoration, awarded to Captain Lindbergh. He gets the first one of these crosses made. The medal is of bronze suspended from a silk ribbon of the national colors. It is a simple cross on which is superimposed a four-bladed airplane propeller projecting slightly beyond the ends of the cross. In the angles of the cross are sun rays, forming a square typifying the splendor and glory of the deed for which the cross is awarded.

TO BE DRY CZAR

Seymour Lowman, former lieutenant governor of New York, who is to be assistant secretary of the treasury in charge of prohibition, to succeed Lincoln C. Andrews, August 1.

Beam Wireless Is Scientists' Goal

Directing Waves in Sharply Defined Beam, Like Searchlight, Not Likely.

By DR. J. H. DELLINGER
Chief of Radio Laboratory, Bureau of Standards.

The conspicuous success of broadcasting frequently gives rise to speculation as to the possibilities in other applications of radio. The waves from a radio station have a natural tendency to spread out in all directions. Broadcasting, as we have it today, is the culmination of development of the nondirectional property of ordinary radio waves.

From the early days of radio it has been a goal of scientific imagination and effort to concentrate a beam of radio waves in one direction like a searchlight. The possibilities of individual communication and of navigational aids and control, if such a thing could be done, are fairly obvious. We are so accustomed to think anything possible with radio that we dislike any thought of limitations. Many efforts have been made to produce radio beams, and a number of very interesting things are being done with such directive properties as radio waves do have.

Work Thus Far.

The directing of radio waves in a very sharply defined beam, like light from a searchlight, is a consummation not likely to be achieved. Nevertheless the approximations that have been and are being made are of very great value. About ten years ago Marconi demonstrated that by the use of a parabolic reflecting arrangement radio waves could be partially directed in a desired direction. With such an arrangement the intensity of the waves along the desired direction was several times that at angles greater than 30 degrees from that direction. With waves of the order of 3 to 10 meters in length a reflecting arrangement of practical size can readily be constructed and the waves can be transmitted distances of several thousand miles.

From this beginning, reflecting arrangements of improved types have been developed by American and other experimenters, giving the evolution of the so-called beam system. The beam system has been adapted for practical use, particularly by Great Britain. Beam stations are carrying regular radio traffic between England and Canada, and other beam stations are being erected for communication with other parts of the British empire. In these stations wave lengths up to as great as 100 meters are used and the reflecting devices are very large, straight rows of antennas. Instead of relying upon a parabolic arrangement of reflectors the currents in the various wires of the straight row have their phases so adjusted as to reinforce radiation in a particular desired direction and diminish it in other directions.

New Short Wave Discoveries.

Certain things have been discovered in the realm of high frequencies or short waves in the last year or two which give renewed interest to the possibility of using beam methods for communication between one point and another. Very short waves exhibit the phenomenon of skip distance, that is, beyond a short distance around the transmitting station there may be a zone of several hundred miles where the signal cannot be received and beyond this there will be another zone of a certain width where the signals come in very well.

If now it were possible to confine such waves sharply along a given line from the transmitting station, the area where they could be received would be limited in two different directions and thus the signals from the transmitting station would be receivable at just one limited area on the earth's surface.

By suitable control of the wave lengths and times of transmission this system would permit the putting of a message down at any desired spot on the earth. The trouble is that beams cannot be sent out anywhere nearly sharply enough to accomplish this. The dream of radio as a means of individual and secret communication between persons at any two desired places on the earth thus fades away.

It is in the realm of navigational aids that directional radio has attained greatest success. The directional finder is a device now well known to mariners. In its simplest form it is merely a coil of wire which indicates the direction from which a radio wave is coming merely by turning the coil and listening to the variation of the intensity of the received signal.

This simple device has many uses. By virtue of its complete lack of response to waves coming from a direction at right angles to the plane of the coil, it can be used to eliminate interference from any particular station. As an aid to ocean navigation it is particularly valuable under conditions of fog.

Radio in Sweden

More than 200,000 radio receiving sets are in use in Sweden, a rapid development of interest extending over the entire country.

Here is a Simple Way to Avoid Corroded Contact

At some time or another most set owners have been bothered by static which were first attributed to static, then to loose connections and finally traced to corroded terminals of the "A" battery, or perhaps the "B" battery, if a storage "B" battery is employed. All of you probably have noticed upon examining your storage battery that a whitish substance forms on the positive terminal and that this oozes into the wire or clip to which the wire is attached.

The most common way of overcoming such corrosion is to scrape the battery terminal and the connecting wires and to cover both with grease so that the air cannot get at the surface.

Here is a method which not only eliminates corrosion entirely, but also keeps the connecting wires so placed that the acid fumes of the battery cannot destroy their insulation. The process is a simple one and the materials needed are only some six-inch pieces of bus bar, a soldering iron and some solder. A piece of bus bar is soldered to each of the battery terminals and the clip on the lead wire is then fastened to the other end of the bus. This keeps the contact connection a good distance from the battery and keeps the wires where the fumes cannot reach them.

Two Small Lengths of Bus Bar Eliminate Nuisance.

not destroy their insulation. The process is a simple one and the materials needed are only some six-inch pieces of bus bar, a soldering iron and some solder. A piece of bus bar is soldered to each of the battery terminals and the clip on the lead wire is then fastened to the other end of the bus. This keeps the contact connection a good distance from the battery and keeps the wires where the fumes cannot reach them.

Values of Grid Leaks for the Best Reception

The first and probably the most common use of high resistances is to be found in detector circuits as grid leaks. In order that the vacuum tube may function at its highest efficiency it is necessary that the grid leak shall be of proper value, and, moreover, that it shall remain constant under all conditions both operating and climatic.

There is much loss of energy and considerable distortion of the reproduced sound if the grid leak is not of the proper value at all times. Furthermore, if the grid leak varies in resistance value, which has heretofore been the case with the inked-paper type, there is danger of considerable noise in the reception. Fortunately, when once the correct leak has been found, it may be left permanently in circuit since there is no need with present-day detector tubes of altering this value.

The following table, prepared by the engineering staff of the International Resistance company, gives the correct values for metalized registers employed as grid leaks with the usual detector tubes:

Type Tube	Grid Leak Values
200	0.5-2 2-5 megohms
129	2-5 5-9 megohms
WD 11 or 12	2-4 4-7 megohms
291A	2-5 5-9 megohms
298A	1-5 2-5 megohms

Since the plate voltage has some what to do with the value of the grid leak, it goes without saying that the higher the plate voltage on the detector tube the higher the grid leak value. However, it is well to have several resistors of different values on hand to experiment for the best efficiency.

Tasmania-Schenectady Within Five Minutes

Schenectady.—To Australia and return in five minutes is a radio record established by the broadcasting station of the General Electric company. Four members of the Australian industrial commission were recently visiting here and delivered brief radio addresses over 2XAF, the General Electric's experimental station operating on a wave length of 32.79 meters. The speaking began at 5:30 a. m. and ended at 5:48. At 5:53 a. m. William Jackson, a Schenectady amateur wireless operator, picked up at his private station, 2AHM, a test message from W. T. Watkins, an amateur operating station 7DX, at Hobart, Tasmania. This message stated that the entire 2XAF program had been received. "It was fine business, loud and clear. Could even hear the microphone rustle," the message said.

Rejuvenating Plan Is Not Wholly Practicable

While it is true that some radio fans have had success in the process of rejuvenating tubes, nevertheless it is the opinion of many experts that this plan is not wholly practicable. Doubtless the success of such a plan depends upon the rejuvenating equipment used as well as the ability of the operator to use it properly.

Many make a mistake in overloading the tube without following it up with a gradual period of overloading. In some cases just the reverse is the situation, as, for instance, where the radiolst decides to give the old tube a 20-minute period of just moderate overloading, failing to give it a good shot of power at the outset.

Children Cry for

MOTHER:—Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.

To avoid imitations, always look for the signature of *Wm. C. Fletcher* Absolutely Harmless—No Opiates. Physicians everywhere recommend it.

Phone Silencer Invented Gosh All Hemlock!

Holding one's hand over the telephone mouthpiece while conversing "aside" with other persons in the room is not necessary if a device recently perfected by a British inventor is used. By pushing a lever on the silencer, which fits behind the transmitter, sounds in the room are entirely cut off from the wire.

Paris arbiters of men's fashions have approved of a royal blue evening suit for men to be worn with pale blue crepe de chine underwear, says a news item. As we latched up our one gallus with a nail and read this item, we nearly swallowed our chewing tobacco. —Ohio State Journal.

SAY "BAYER ASPIRIN" and INSIST!

Proved safe by millions and prescribed by physicians for

- Colds Headache Neuritis Lumbago
- Pain Neuralgia Toothache Rheumatism

DOES NOT AFFECT THE HEART

Safe Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets Also bottles of 24 and 100—Druggists. Aspirin is the trade mark of Bayer Manufacture of Monocrotinacidester of Salicylicacid

When your feet hurt, are tired, sore or perspire, shake into your shoes Allen's Foot-Ease, the Antiseptic, Healing powder for the feet. It takes the friction from the shoes and gives immediate relief. Makes stockings wear longer, too. Write Allen's Foot-Ease, LeRoy, N. Y., for a Free Sample. Sold at all drug and toilet goods counters

Destroyed Currency
A flat sum of \$1,000,000 is carried on the books of the United States treasury as "unknown-destroyed," according to Paul Kinkead in an article in Liberty. This, he explains, attempts to account for all currency that is lost or destroyed, but, as he says, "A much greater percentage of paper money is lost than is shown on the books—how much, the treasury has no way of knowing."

Rugby Popular in Holland
Rugby football, almost unknown in Holland ten years ago, is becoming more and more popular in that country. The students of the Delft University of Technology have an active team. Watches and clocks made in this country in the past year had a value of nearly \$82,000,000, the production breaking all records.

Quarantined!

Millions of cockroaches already exterminated! Beware!

THERE'S PANIC in Bugville! Cockroaches are dying by the thousands!

Use Peterman's Roach Food in your house. Exterminate every roach.

Don't fight roaches with a spray. You must have a powder. Peterman's is the right powder.

It entices roaches from their hiding places. They carry it back on their legs and bodies to their nests behind baseboards, under floors where no spray could possibly reach.

Every adult roach, the young, every egg in the entire colony is exterminated. No odor. Nothing is left but a little dry dust. Use

Peterman's Roach Food now. Keep them out. Don't let them get a start.

Here is the right insecticide for each insect:

- PETERMAN'S ROACH FOOD exterminates that cockroach army.
- PETERMAN'S ANT FOOD exterminates ants.
- FLYSON kills flies and mosquitoes.
- PETERMAN'S DISCOVERY exterminates bedbugs.
- PETERMAN'S BOTH FOOD protects against moths.

You must have a specific insecticide for each insect. No single insecticide will exterminate them all. We have had nearly 50 years' experience. We know that is true.

Peterman's has the right insecticide for each insect. On sale wherever drugs are sold. **Peterman's** 200 Fifth Ave., N. Y. C.

Pretty Things that are Made at Home

CREPE-TWIST, canvas-worked sports sets, consisting of hat, belt and bag—sounds interesting, does it not? And in their original gay coloring they are ever so much handsomer than the picture reveals them. Everyone who catches a sight of these charming sets for sportswear, feels an urge to buy some material so as to lose in no time in taking up this fascinating handcraft.

One can secure at almost any fancy-work department canvas belts stamped ready to work; also the stamped hat, which, by the way, has a sectional crown seamed together, likewise ready-to-work canvas handbags, the latter coming in almost any devised

ment at a glance. These models, which are so directly interpretative, bring to mind a discussion which took place quite some time ago in a circle of designers concerning the possibilities of millinery art. The question brought up was: "Can a hat have expression?" Is it possible for it to tell a story as does a picture? Without a doubt the query finds its answer in the smart 1927 millinery in this picture.

Is tennis your hobby? Could anything more apropos in the way of millinery for the occasion be conceived of than the first hat in this group? Note how the tennis net is suggested with a lattice-work of straw

THESE ARE EASILY MADE

type from fanciful wrist-bags to envelope purses. If one has ideas of their own, then buy the canvas by the yard, cutting out and stamping the hat, belt and purse as fancy dictates.

For the crepe-twist used for embroidering, one must go to the department where fancy crepe and tissue paper is sold. The remarkable part of this handsome twist is that it is really a yarn made of tightly twisted crepe paper which has been processed to be as durable as raffia and it works up just as effectively, with the advantage of costing but a trifle.

The work itself is easy of accomplishment. All that is required is simple embroidery stitches directed by the stamped guide to fill in the background in stripes, as the pocketbook shows, or in squares as used for the hat. The floral pattern is filled in with solid stitch also, but of course tempered to the character of the design.

All sorts of interesting decorative

braids, together with a clever placement of racquet and ball in lieu of an ornament.

You prefer golf? Was ever a hat better tuned to the sport than the one shown at the top to the right? Clever is that grassy arrangement of straw fringe around the crown, not to mention the ingenuity of the golf sticks and bag effect.

An enthusiast over football? On a cool day the helmet-like cap centered to the right will prove just the combination suited to sportswear for this event.

The hat below to the left cannot fail to be of appeal to the girl intending to win the next game of hockey. If the proposed plan of wearing millinery apropos of the profession proves popular, we will see something like the chapeau which concludes the group. It has been suggested that this model be described as "note" worthy. This very unusual creation was designed for no less a personage

HATS FOR SPORTSWEAR

features are introduced, such as colored beads interworked in cunning ways. The belt in the picture has a pattern of beads running throughout its length in connection with its multi-colored background of crepe twist.

The handbag is sewed into a metal or composition frame after the manner for handmade ribbon purses.

There is an interesting trend of realism developing in the realm of millinery in that certain new models interpret the occasion for which they are intended. The group of "topic hats," as some call them, as here pictured, tell the story of this new move-

than Rosa-Raisa, the famous opera star.

Handpainting is contributing an interesting novelty to sports hats in the way of clever scenic effects. A pretty white yachting hat of felt recently designed showed a painted marine which included sailboats and blue waves with pennants and flags interworked. A simple national blue silk cord was tied about the crown. A similar painting appearing on the sleeves of the white silk blouse is worn with it.

Improved Uniform International Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean, Moody Bible Institute of Chicago, (©, 1927, Western Newspaper Union.)

Lesson for June 12

PETER DELIVERED FROM PRISON

LESSON TEXT—Acts 12:1-17.
GOLDEN TEXT—Man are the afflictions of the righteous: but the Lord delivereth him out of them all.—Ps. 119:21.
PRIMARY TOPIC—God Takes Care of Peter.
JUNIOR TOPIC—God Answers Prayer for Peter.
INTERMEDIATE AND SENIOR TOPIC—How Does God Deliver Us?
YOUNG PEOPLE AND ADULT TOPIC—The Power of United Prayer.

I. Peter's Imprisonment (vv. 1-4).
1. By whom (v. 1).
Herod, the grandson of the wicked Herod, who slew the innocent children of Bethlehem.
2. The reason (v. 3).
It was to gain the favor of the Jews. Herod was not a Jew, but an Edomite, therefore knew that his success was dependent upon his having the good will of the Jews. Herod for the sake of popularity manifested a deep sympathy for degenerate Judaism. It was but the sympathy of the politician. Since the church had developed so as to be a successful rival of Judaism, indeed was already displacing it, he saw an opportunity to curry favor with the Jews by putting forth his hands against it.
3. The method (v. 4).
He was arrested, put into prison and guarded by four quaternions of soldiers. A quaternion is a guard of four soldiers. Humanly speaking, it was impossible to escape. They had doubtless heard of Peter's escape from jail before, so they thought they would take no risks this time. However, they made one fatal mistake—they left out God.

II. The Church of God in Prayer (v. 5).
The church was at a crisis. Her situation was most grave. James, one of the brethren of the church, was dead, and Peter, the most prominent of all, was in prison. In this desperate strait they did the wise thing—they betook themselves to prayer. It was a noteworthy prayer.
1. It was unto God, not unto men, or to be heard of men. This is a very common fault today. All true prayer is unto God.
2. It was united prayer.
There is peculiar power in the united prayer of God's people.
3. It was an intensely earnest prayer.
It was more than unceasing prayer. It was the earnest desire of the soul as it stretched itself out toward God.
4. It was definite prayer.
They specifically offered prayer to God for Peter. Their prayer was concentrated, definite and specific.
III. Peter Delivered by an Angel (vv. 6-11).
1. Peter sleeping (v. 6).
This shows that he was not greatly disturbed over the matter. The Lord keeps in perfect peace those whose minds are stayed on Him. (Isa. 26:3).
2. Peter leaves the prison (vv. 7-10).
A heavenly light shone in the prison. The angel smote Peter on the side; the chains fell off. Peter put on his clothes and passed by one guard after another through the iron gate out into the city.
3. The effect upon Peter (v. 11).
Although the matter was so wonderful to Peter, even outside his consciousness, when he came to himself he was assured beyond peradventure that God had miraculously delivered him from Herod's wicked hands.

IV. Unconscious Unbelief (vv. 12, 19).
1. Behavior of Peter and the church (vv. 12-17).
Peter went to the house of Mary and knocked. The knock was answered by Rhoda who was so overjoyed that she forgot to open the gate, and ran in and told them that Peter was at the gate. The disciples were not prepared for such good news, and even accused her of madness. She, undaunted, insisted. They offered as an explanation that perhaps it might be Peter's guardian angel in his likeness. They got more than they expected. Peter rehearsed unto them the Lord's dealing with him, and instructed them to make these things known unto James and the brethren.
2. The behavior of the soldiers (vv. 18, 19).
There was great agitation among them as to what had become of Peter. This was a serious matter since they were responsible for him. Not being able to account for Peter's escape Herod commanded that they be put to death. After this Herod went down to Caesarea. Here he was adored as God. Because he arrogated this honor to himself, the Lord smote him. Herod died, but the Word of the Lord grew and multiplied.

Life and Death
It is good when the garden of life and the sepulcher of death are linked with Him who was crucified. He makes the garden tenfold richer and more beautiful. He robs the sepulcher of its terror and gloom.—Rev. Alex. Smellie, D. D.

Cynicism
I hate cynicism a great deal worse than I hate the devil; unless, perhaps the two were the same thing.—R. L. Stevenson.

DO YOU KNOW A GOOD EGG?

It has
**A clear firm white
An upstanding yolk
A good flavor
A strong shell**

Look for these qualities and encourage the PRODUCTION & MARKETING of BETTER EGGS

CONSERVE FOOD VALUE AND GOOD FLAVOR BY KEEPING EGGS IN A CLEAN COOL PLACE
U.S. DEPARTMENT OF AGRICULTURE WASHINGTON D.C.

A poster emphasizing the more important qualities of a good egg has just been issued by the United States Department of Agriculture. It shows an egg broken into a dish, yolk and white in natural colors. There is also shown in the poster a group of egg dishes, and the text is devoted to giving information to the consumer concerning the more important qualities of a good egg as brought out when it is broken out of the shell.

Encourage Better Eggs.
Housekeepers can encourage the production and marketing of better eggs by giving attention to the qualities of a good egg, and exercising greater discrimination in purchasing eggs for home use.
Those who wish to display the poster, which is 14 by 20 inches, may obtain copies from the United States Department of Agriculture, Washington, D. C.

Korean Lespedeza Good as Pasture Plant Is Drought Resistant and Grows Readily on Poor Acid Soils.

(Prepared by the United States Department of Agriculture.)
A small package of seed sent to the United States Department of Agriculture from Korea seven years ago has upheld the old saying, "good things come in small packages." Sown at the department's experimental farm at Arlington, Va., in a row a rod long, which yielded eight ounces of seed, the material proved to be a species of lespedeza new to the United States. Careful handling to increase this small seed supply and subsequent testing at various state experiment stations has shown the new introduction to be a valuable addition to the forage crops of this country.

Quite Drought-Resistant.
The Korean lespedeza, although closely related to the Japanese species commonly found in the South, is earlier and adaptable to regions farther north. It is quite drought resistant and grows readily on poor acid soils. It is a legume and is recommended chiefly as a summer pasture crop rather than as a hay crop. Its value lies in the fact that it will reseed the ground and will grow in the hot months when grass on poor, droughty land is brown and dead.
Although grown only on a limited acreage as yet, on account of an insufficient seed supply, Korean lespedeza promises to be especially important for a section of the country described as lying between southern Pennsylvania and northern Ohio on the north and the southern border of Virginia and Kentucky on the south, extending from the Atlantic coast to Iowa. It has also given promise in Kansas, on the eastern border of the Great Plains, but how far west it may prove valuable is not yet known.

Seed Supply Inadequate.
The great need at present to further the establishment of this new legume is a sufficient seed supply. There is a demand for all the seed that can be grown for several years yet to come, says the department, and the few farmers who already have a small acreage are urged to harvest a supply of seed for sale. Although lespedeza will grow readily at points farther north than the zone described, it does not mature seed there. In the adapted region mentioned the plant produces a plentiful supply of seed.

Agricultural Facts
Seed oats should not be clipped.
If cows leave the alfalfa leaves in the mangers they are getting too much protein.
The average poultryman usually makes more money by marketing surplus males as broilers rather than as capons.
The corn borer will get the farm industries dependent on corn, such as dairying, unless the farmers get the corn borer first.
Cabbage that grows with solid heads that weigh about three pounds each usually bring more money than those that grow larger or that are not firm. The type known as Intermediate Danish ballhead is said to be best.

Finest Athletes Come From Cold Countries

The most athletic countries are those with the lowest average temperature, according to computations made by Dr. Guillermo Hoxmark of the Argentine weather bureau on the basis of performances at the last two Olympic games in Antwerp and Paris.
Twenty-six countries were represented and the number of inhabitants of each were divided by the number of points gained, thus giving the number of thousands of inhabitants per point. The countries were then ranged in the resulting order.
When brought into relation with the average annual temperature it appeared that a high average athletic ability and a low average temperature go together.
The figures of the two competitions taken separately and together, give approximately the same result. In each case Norway, Finland and Sweden head the list in the order named. Great Britain stands twelfth; Spain, Czechoslovakia, Japan and Egypt are among those at the bottom of the list.

Bell-Ans Halts Over-Acidity

This Widely Used Sure Relief Can Be Depended On Every Time.
How disagreeable, how exasperating, how embarrassing to be suffering from gas, belching, heartburn, sick headache, nausea and other digestive disorders. BELL-ANS for indigestion is a harmless, pleasant Sure Relief. Tested by over 20 years' use. 25c and 75c Pkgs. at all drug stores, or send for free samples to Bell & Co., Inc., Orangeburg, N. Y.—Adv.

Bigger Babies

In a letter to the Journal of the American Medical Association, a New York clothing manufacturer asserts that his company has been forced to increase the size of the dresses for one, two and three-year-old children. Persistent complaints that the necks of the dresses were too small have come to him during the past year for the first time in thirty years' experience. Most of the complaints came from California. This seems to show that the size of American babies is increasing. Californians may now point to another benefit of their glorious climate.

Cat Adopts Skunks

A mother cat with four kittens came to the farm of F. A. Jones at Brookfield, Mo., but Jones, having other ideas on the subject, consigned the four kittens to the creek. The next day his small son informed him that the kittens were safe and sound. Recalling the traditional nine lives, Jones investigated and found that the cat had acquired four other kittens without doubt, but instead of their being some other feline offspring they were of the genus mephitic, or common American skunk.—Indianapolis News.

Corporation Runs Farms

One Boston corporation is running 20 farms in Iowa bought at sacrifice prices, says Capper's Weekly. Babson, the statistician, believes that during the next few years a number of such corporations will buy up at bargain prices the best of the farms now for sale. Several concerns have been organized for this purpose. The farming of the future, Babson believes, may be done by big business corporations the same as in other branches of industry.

Pays Way With Milk

The most ingenious way of working one's way through college, we believe, is demonstrated by a senior in a West coast university. He entered as a freshman accompanied by a cow. He started a milk route at once, and now owns three cows and does a flourishing business.—The Outlook.

Girl Scouts

About 13 in every 1,000 girls between the ages of ten and nineteen in this country are girl scouts. Leaders in girl scout activities number 16,500, and organization extends to 791 communities. Camps are held in 43 states.

FARMER WOMAN IN OKLAHOMA

Praises Lydia E. Pinkham's Vegetable Compound Because It Gave Her Health and Strength

In a sunny pasture in Oklahoma, a herd of sleek cows was grazing. They made a pretty picture. But the thin woman in the blue checked apron sighed as she looked at them. She was tired of cows, tired of her tedious work in the dairy. She was tired of cooking for a household of boarders. Besides caring for her own family. The burdens of life seemed too heavy for her failing health. She had lost confidence in herself.
One day she began taking Lydia E. Pinkham's Vegetable Compound and her general health began to improve. She took it faithfully. Now she can do her work without any trouble, sleeps well and is no longer blue and timid. This woman, Mrs. Cora Short, R. R. 9, Box 387, Oklahoma City, Okla., writes: "Everybody now says: 'Mrs. Short, what are you doing to yourself?' I weigh 135 and my weight before I took it was 115. I have taken seven bottles of the Vegetable Compound." Other women who have to work hard and keep things going may find the road to better health as Mrs. Short did, through the faithful use of Lydia E. Pinkham's Vegetable Compound. Ask your neighbor.

Bunions
Quick relief from pain. Prevent shoe pressure. At all drug and shoe stores.
De Scholl's Zino-pads
Put one on—the pain is gone.

BABIES LOVE MRS. WINSLOW'S SYRUP
The Infant's and Children's Regulator Pleasant to give—pleasant to take. Guaranteed purely vegetable and absolutely harmless. It quickly overcomes colic, diarrhoea, flatulency and other five disorders. The open published formula appears on every label. At All Druggists.

Selwood of Sleepy Cat

By FRANK H. SPEARMAN

WNU Service.

Copyright by Charles Scribner's Sons.

CHAPTER X—Continued

"All right. That's settled. Carry," continued Selwood, "thinks this place is getting too noisy for you, Dave. All these squatters coming in, and the clatter they make. He says you'd do better out under the pines a few miles up river, and I've got things arranged to get you up there today. The weather's settled now, and I've got time to move you—what do you say we start today?"

"I know where I'm comfortable, better than Carry does. I'll stay here." Selwood, with patience, continued to dwell on the advantages of country life. But the old soldier resisted all blandishments, and in the end his patience gave out first. "Look here, John," he exclaimed with a snap of disgust, "you're beating round the bush, like these crooked Sleepy Cat lawyers. I know what's going on, if I am flat on my back. The Vigilantes are ready to move. Where did you get the idea I was afraid of Vigilantes?" Selwood shrugged his shoulders. "Where did you get the idea I thought you were?"

"Well, you're trying to ship me out of town—you and Carry. Now, John, I'm not going—that's flat—not for all the Vigilantes in the Rocky mountains."

As Tracy uttered his declaration, Bill Pardaloe, in a huge camel, stuck his head within the tent. Selwood, paying no further attention to the intruder, vainly tried in low tones to persuade Tracy it would be sheer folly to remain where he was. He reminded Tracy of his helpless condition and of what his obstinacy might mean; he begged him to consider his own feelings, if there were none of his own to move him. The old gambler proved adamant to every consideration, and, not only that, he grew more and more set against all proposals. "John," he exclaimed, ragging like a grizzly at bay, "are you running, too?"

"You know very well, Dave, there's a heap of difference between a well man's running and a wounded man's being carried out of the way of a fight."

"You going to stay?"

"There's no reason why I shouldn't."

"And fight?"

"Nobody will miss me if I do fight."

"If you stay, there's just one answer—you get killed," said Tracy. "Dash you, I know you better than you know yourself. Now, John, listen. The old man, gray, wizened, unshaven, hollow-eyed, but stern, his iron-gray hair falling in a great mat over his wrinkled forehead, sat bolt upright on his cot. He tore open the breast of the coarse shirt he wore—his only upper garment—and pointed to an American flag, tattooed over his heart.

Selwood sat with the eyes of youth silently fixed on his country's emblem. Bill Pardaloe stepped closer. In craned his neck forward, pulled off his tattered hat to get still closer, and peered dumbly at the tattooed breast.

Tracy spoke to Selwood. "John, I don't say I've never done anything to disgrace it. It went on, but I fought for that old flag three years. I tramped down the Peninsula with McClellan, and double-quickened back again; I stood, heel to heel, against Pickett at Gettysburg, with George Meade; I went up against the Bloody Angle in the Wilderness with Grant. It don't mean a continental to a lot of folks nowadays, but it means something to me yet. Does anything you've ever seen me do, John, look to you as if I'd run from a blamed parcel of Vigilante crooks? I'll admit I'm no saint. I'm no preacher—"

"You're preaching right now, Dave."

"Then, d—n it, let me preach—but the worst I've ever done was to invite a man to back his luck against mine. I've played crooked with crooks. I'll admit it, but no honest man can say I've ever stacked a deck against him—I took my chances, same as he took his."

"Now, a parcel of Vigilantes threaten to hang me—I know, some of 'em told me. I left the best of my life in health and strength down on the Jim river for this old flag—that's why I can't put up a man's fight today—"

He bared his right breast. There was a gap in it in which you could lay a hen's egg. "A Johnny Reb shell took that lung, John—"

He tore open, with fierceness, the shirt sleeve of his left arm—"a minnie ball splintered that arm, John—you know it's no good. It wasn't that fight with Frank Sanger that did for me. I was done for with no wealth to earn a living, and here I am—and not sorry for it. Well, they can hang me. But let it be done after I'm dead. And then," he muttered with satisfaction, "the blamed skunks have got to hang the old flag with me. I tell you again, I don't say I've never done nothing to disgrace it. I don't say I'm proud of winding up as a gambler. But things is as they is. And if this is my last stand—why, it's all right."

He reached his hand out toward the tent pole. "Give me my gun, Bill." With Selwood sitting in silence, Pardaloe lifted from the nail on which

it hung by the scabbard an old Colt's army revolver. Tracy took it almost affectionately. "Leave this with me," he said, falling back on his frowsy pillow. "Bring me a couple dozen cartridges—that'll be all I need."

Selwood smiled. "More'n you'll need, Dave," he said quite undisturbed.

Selwood continued to smile; not mirthfully—seriously, rather. He just stilled the mumbling old gladiator—half toothless, laid low after many a stout fight—stiffened in joint, frayed in nerve, caressing the old gun with a shaking hand, so feeble he could with difficulty hold up his head, and with only the gray eyes flashing the old fire as he buried defiance at his enemies—it was not a cheerful picture! No home to die in; no woman to tender with his pain or patient with his irascibility; no child's kiss to close the weary day—just a human derelict, cast by the storm and wave of civilization on its outermost shore—such was Dave Tracy.

"What you looking at me that way for, John?" demanded the old gambler peevishly.

"Nothing, Dave, nothing—just thinking I'll be back again." He rose as he spoke. Pardaloe peered—

as if in farewell—at Tracy and pushed his way outside. "See here," exclaimed Tracy, detaining Selwood. "You n' me's been partners, ain't we? You say you're stayin'. You talk about my getting killed—how d'y' suppose I'd feel if you got killed?" Selwood laughed lightly. "It's what's comin' to both of us, I guess, Dave."

"Carry me up the hill to the hall, you and Pardaloe; I'll stay and you go. I'd a blamed sight better be defending the hall than you, I'm no loss to anybody on earth—"

"Neither am I, Dave."

"What about the girl that brings me soup two and three times a week? What's she bringing it to me for? What did she bring me an apple for today? Because she thinks a lot of me—or you?"

Selwood winced. "Because she's kind-hearted," he said irritably. "Don't talk nonsense." But he was red in the face.

Tracy followed up sharply. "It's you, Selwood—not me—you. I don't have to be told what a girl's thinking when she'll set right there where you're settin' now, and listen as long as I'll talk about you."

Selwood shrugged his shoulders. "You're wasting your breath to talk about me." He flung out to the tent in no very pleasant frame of mind.

The valley, the river, and the flats were in shadow when Selwood stepped outside. Turning up street, his eyes fell on the hill, where the front windows of the big gambling-house burned in the glow of the sunset. Busy with his thoughts, he reached the barn, spoke to Scott, who stood in the doorway, directed him to bring Pardaloe with him as soon as it was dark, and, making sure that all ordered was in readiness, Selwood walked on up the hill.

CHAPTER XI

The River Bridge.

It was two hours yet to opening time. He unlocked the front door of the hall, crossed the room to his office, unlocked the door, entered, locked it behind him, sat down at his desk, unlocked it, and pulled open a drawer in which he kept his stock of ammunition. Besides the boxes of cartridges and cleaning implements there were in it two cartridge belts and two Colt's revolvers. There was still daylight enough for his purpose, and Selwood, taking first his own gun and in turn the two guns in the drawer, began the task of taking down, cleaning, and assembling the three.

It gave him plenty of time to think. Warning had come—his defiance had answered it—at least, for John Selwood. He had been told what to expect; he had said how he should meet it; there remained only the question of how far twelve cartridges loaded into two guns expressly for this occasion would carry him after the opening shot.

It was too much to hope that he should live to fire them all, and he fell to speculating on how many loaded cartridges would be found in the two guns when they picked him up. It enraged him to think of being cornered by Vigilantes; and escape now was so easy—and always there was Christie in the background of his thinking. But his word had been passed—whether foolishly or not, was beside the question. He had told the "real estate boomers" where they would find him.

In the street he heard a beating of hoofs and a chorus of whooping yells from drunken men heading down-town on a drunken spree. Carry's words came back to him: "It's Saturday night. All the Calabasas horse-tieves ride into town for a spree. They'll all get in. But they won't many get out."

He did not know the men—he only knew that in their company a skele-

ton horseman, astride a skeleton steed, galloped noiselessly ahead; that death that night would sink, as he said, falling back on his frowsy pillow. "Bring me a couple dozen cartridges—that'll be all I need."

Selwood smiled. "More'n you'll need, Dave," he said quite undisturbed.

Selwood continued to smile; not mirthfully—seriously, rather. He just stilled the mumbling old gladiator—half toothless, laid low after many a stout fight—stiffened in joint, frayed in nerve, caressing the old gun with a shaking hand, so feeble he could with difficulty hold up his head, and with only the gray eyes flashing the old fire as he buried defiance at his enemies—it was not a cheerful picture! No home to die in; no woman to tender with his pain or patient with his irascibility; no child's kiss to close the weary day—just a human derelict, cast by the storm and wave of civilization on its outermost shore—such was Dave Tracy.

"What you looking at me that way for, John?" demanded the old gambler peevishly.

"Nothing, Dave, nothing—just thinking I'll be back again." He rose as he spoke. Pardaloe peered—

as if in farewell—at Tracy and pushed his way outside. "See here," exclaimed Tracy, detaining Selwood. "You n' me's been partners, ain't we? You say you're stayin'. You talk about my getting killed—how d'y' suppose I'd feel if you got killed?" Selwood laughed lightly. "It's what's comin' to both of us, I guess, Dave."

"Carry me up the hill to the hall, you and Pardaloe; I'll stay and you go. I'd a blamed sight better be defending the hall than you, I'm no loss to anybody on earth—"

"Neither am I, Dave."

"What about the girl that brings me soup two and three times a week? What's she bringing it to me for? What did she bring me an apple for today? Because she thinks a lot of me—or you?"

Selwood winced. "Because she's kind-hearted," he said irritably. "Don't talk nonsense." But he was red in the face.

Tracy followed up sharply. "It's you, Selwood—not me—you. I don't have to be told what a girl's thinking when she'll set right there where you're settin' now, and listen as long as I'll talk about you."

Selwood shrugged his shoulders. "You're wasting your breath to talk about me." He flung out to the tent in no very pleasant frame of mind.

The valley, the river, and the flats were in shadow when Selwood stepped outside. Turning up street, his eyes fell on the hill, where the front windows of the big gambling-house burned in the glow of the sunset. Busy with his thoughts, he reached the barn, spoke to Scott, who stood in the doorway, directed him to bring Pardaloe with him as soon as it was dark, and, making sure that all ordered was in readiness, Selwood walked on up the hill.

The idea is to stop all the birds that try to fly the coop tonight. And they figured no one from Calabasas would be leaving town till pretty late, anyway." Selwood asked whether the team and horses were ready. Pardaloe came straight from the barn. His eyes set rather harder than usual with the prospects of the night, appeared closer, if possible, together, and glistened with a deeper light; while if suspicion could more completely characterize his manner, it seemed now heightened in view of coming events. "They're hitched, John," he said darkly, "chevin' their bits in two and tearin' up the plank's right now in the gangway."

"I suppose you know," said Selwood, addressing both men, "I'm going to take Dave Tracy out of town. He's my partner; I'll never see him hurt while I'm alive. He refused to go, as you know, Bill," he said to Pardaloe, "and he's bull-headed enough to put up a scuffle rather than be dragged out. No matter. Carry put a sleepy dose in Tracy's coffee tonight. By this time he should be under; I hope he is. But he's got to go now, whether he drank the coffee or not. I won't see him strung up on a telegraph pole, if I have to kill him to get him out of town."

"How you going to get across the bridge?" asked Pardaloe grimly.

"I'll attend to that. You say the river road isn't guarded, anyway," Selwood addressed the words to Scott.

"It wasn't when I rode up from the west bridge. The trail will shake Dave some, but we can get over it if we can get to it."

Big Haynes loomed up out of the darkness. "What's up, boys?" he asked as he walked in and saw the three men in confab.

"We don't know yet," said Selwood. "But I'll be away for two or three hours. There's talk of trying to clean the town up tonight. Skillman is in Medicine Bend, and I leave you in charge of the place here, Haynes. I expect to be back before anything much happens. But if you have to run, get a good start—you're fat."

Haynes, hngering a gun as big as a toy cannon, looked hurt. "Who'm I going to run from, John? You're putting this place in my charge, till you get back?" he asked, to confirm his understanding.

"I am."

"What time'll you be back?"

"If I'm not back by eleven o'clock, don't look for me."

Haynes straightened up. "I'll hold this place against all comers till

twelve o'clock," he said composedly. "Give me a couple of good men." He added, nodding significantly toward Pardaloe and Scott, "and I'll hold this place against all the Vigilantes in Sleepy Cat."

"I need a couple of good men, myself," replied Selwood drily. "I might send up Bill Page."

Adding only a few details to his injunctions, Selwood, returning to his room, picked up a shot-bag full of loose cartridges, and leaving the place that embraced all his earthly possessions walked rapidly down to the barn, followed by Pardaloe and Scott. As the street door was opened by Selwood, McAlpin rose from the fringe of darkness.

"Things are fixed," the barn boss half whispered, as the three men entered the office. "Two men are watching the back door; they've got a couple ten-gauge guns and plenty of buckshot cartridges—loaded 'em myself—five drams and plenty of buckshot. John Lefever has got six men over at the warehouse, all heeled, and more a-comb'n. If they get us, John, they'll know we're here!"

The waiting team, freshly fed and watered, was hitched to the light wagon. Beside the wagon was an extra saddle-horse for Pardaloe; Selwood had mounted up. "John," whispered the barn boss, clasping Selwood's knee as he stood beside his horse, "what's the place to find you, if I need you?"

Selwood hesitated. "We're trying for the south trail up the river, but I doubt we'll ever make it. We'll either be up at the beaver dam, or more likely, at Calabasas. If you come after me, try Calabasas first."

At a signal from Scott, who took the reins, McAlpin threw open the doors, and Scott, with Pardaloe at his side, carrying his redoubtable shotgun, and Selwood on horseback, clattered out of the barn.

Selwood, with a lantern, entered Tracy's tent. The old soldier had drunk his coffee. He lay heavily asleep. Pardaloe, waiting, peered inside. Selwood motioned to him. The wagon was backed close up to the door, and Selwood gathered up Tracy's belongings. Then, at a nod, Pardaloe picked Tracy, bedclothes and all, up in his arms and, with Selwood holding back the fly, carried him out and lifted him into the wagon.

The cot was lashed inside the wagon; the tent was struck and stowed beside it. In less than ten minutes the little calvacade was headed as quietly as the restive horses would let them for the bridge. Pardaloe, his shotgun between his knees, staring into the darkness, Selwood pushed ahead on his horse to try the passage.

He reached the bridge only to be halted by two men, who stepped out of the dark on either side, covering him with shotguns.

Selwood halted his horse. "What is it, boys?"

"Can't cross this bridge."

"Why not?"

"Nobody can cross the bridges tonight without a bridge pass."

"Well, we've got passes—good on all bridges, trails, and boulevards—but they're not the kind of passes we like to use on decent men. We're crossing this bridge tonight, boys, but we're willing to play fair. How many of you are there?" asked Selwood untruffled.

"Plenty to hold this bridge."

"There are just two of you—if there were any more they'd all be poking their guns under a peacemaker man's nose. Listen! There are four

to manage a battery of guns that could catch fire a hundred shots per minute. And so the gun came back, though the Germans managed to make an imperfect copy. The real secret of the hypodermic machine was never unmastered in Germany, even in 1914, when the Kaiser's armies captured plenty of models—Pierre Van Paassee, in the Atlanta Constitution.

Two backwoodsmen in Maine knocked at the door of a house at the edge of the forest. "Hello, Ed!" said one of them to the farmer who came to the door. "Say, we come across the dead body of a man over there in the hollow an' we kinda thought 'twas you."

"That so? What'd he look like?" asked the farmer.

"Well, he was about your build—"

"Have on a gray flannel shirt?"

"Yep."

"Hoots?"

"Yep."

"Was they knee boots or hip boots?"

"Let's see. Well, they were, Charley, knee boots or hip boots? Oh, yes, they was hip boots."

"Nope," said the farmer. "Twasn't me."—Boston Transcript.

of us. If you say fight, it's a fight, but you haven't got a ghost of a chance. And you're doing nobody any harm in letting us take a sick man out of the fight uptown tonight. I'm going out over this bridge and coming back, myself, over this bridge inside two hours. I'll give you my word, I'm coming back."

He had talked only long enough to allow Pardaloe to crawl back over Tracy and out of the hind end of the wagon. Selwood told the guards, frankly, just who he was—they laughed at his claim to his identity; he offered to show them the sick man in the wagon—it was all in vain. He talked loud for a few minutes and frinted the guards; touched his horse enough with the spur to keep his feet shuffling, and Scott, trying to quiet his horses, kept them stamping and clamping on the bridge planks. But all the while Selwood was making the noises, and all the while the guards stood their ground, his eyes were searching the circle of darkness to his right, where his eye, long practiced, followed a hulking object slinking slowly and noiselessly forward.

Creeping like a huge cat from behind the wagon on to the bridge; pausing for long words or the impatience of the horses' feet; advancing, step by step, at the clamping of their bits and the straining at their harness, Pardaloe crouched in readiness behind the nearer guard waiting only for Selwood to act.

"It's foolishness, boys, to keep poking shotguns into me," protested Selwood. "It would be better for you and better for me if you'd stand back. And any man that calls himself a friend of mine ought to be over TO THE LEFT by this time. If I'm shot I FALL TO THE RIGHT, Man!" he exclaimed, addressing the guard on his left hand, "you're so close I can smell the powder in your cartridge. Well, if we can't cross, we can't. It looks to me as if YOU'RE READY. And I'm ready. Go!"

With a lurch, sudden as thought, Selwood jerked his horse to the right and throwing his lines, keeled from the saddle to the bridge floor. As he did so, the toe of his left boot caught the barrel of the shotgun on that side with a blow that kicked the gun into the guard's stomach. One barrel exploded; the charge went into the air. In falling, Selwood, striking up with his hand the barrel of the second shotgun, threw himself bodily on the right-hand guard. The two men clinched to the ground, and the gambler pulling, in the struggle, the revolver from the breast harness, brought the butt down twice on the fighting guard's head. Pardaloe, who had placed himself, as directed, behind the left guard, butted him violently from behind, above the knees, grabbed both ankles, and as the guard's shotgun went off, threw him with a grunt backward clear over his own head. The man struck sprawling on the plank floor, and Pardaloe was on top of him before he knew what had happened. Selwood's horse reared and plunged at the discharge of the gun, but, fortunately, hit no one under foot. The struggle of the surprised guards was quickly over—neither had a chance against men practiced in encounter.

Selwood was first to speak. "Throw me a piece of rope, Bob," he said, astride his man.

"Don't waste no rope on these birds," growled Pardaloe, "dump 'em into the river!" He was really plucking his yelling victim to follow his own advice when Selwood intervened.

"Hold the man—and the him," said Selwood, sternly, meantime trussing his own victim. "We may have visitors one minute—work fast."

Scott, and Pardaloe with much grumbling, carried the crestfallen guards, tied and roughly gagged, well into the bushes at the left of the roadway. "Sorry to gag you this way, boys," explained Selwood, leaving them, "but I'll be back by twelve o'clock and turn you loose, if you don't have better luck. Next time, stand back out of reach, as I advised you to. Don't expect to stick your shotguns into a man's ribs and not get kicked."

(TO BE CONTINUED.)

Kaiser's Experts Let Big Opportunity Pass

Colonel Deport, inventor of the "75," the rapid-firing gun that saved France, died a few years after the war. Before he passed away the colonel wrote the story of the gun and revealed how France came within an ace of losing the plans and models long before the war. When the first models had been constructed, they were carefully sealed in a freight car and shipped to an isolated section of the country for a tryout. The car was by mistake hooked up to a goods train, destined for Germany and actually landed on German soil. The Germans opened the car and immediately officers of the artillery school came down to examine the guns meticulously. But they let them go again, reporting that no officer would be able

to manage a battery of guns that could catch fire a hundred shots per minute. And so the gun came back, though the Germans managed to make an imperfect copy. The real secret of the hypodermic machine was never unmastered in Germany, even in 1914, when the Kaiser's armies captured plenty of models—Pierre Van Paassee, in the Atlanta Constitution.

Two backwoodsmen in Maine knocked at the door of a house at the edge of the forest. "Hello, Ed!" said one of them to the farmer who came to the door. "Say, we come across the dead body of a man over there in the hollow an' we kinda thought 'twas you."

"That so? What'd he look like?" asked the farmer.

"Well, he was about your build—"

"Have on a gray flannel shirt?"

"Yep."

SOUTH-WEST NEWS NOTES

Uncle Sam's mail carriers met in Tucson recently for the annual three-day state convention of the National Association of Letter Carriers.

The town of Augustina, between Magdalena and Dattil, in Socorro county, New Mexico, has petitioned James L. Cooper, postal inspector, for a postoffice.

T. P. McGinnis, former postmaster at Kelton, Ariz., was found guilty of receiving stolen property by a jury in the Cochise county Superior Court at Tombstone.

W. C. Hornberger of Phoenix was elected president of the Arizona Utilities Association at the joint convention of that organization and the Pacific Coast Association held in Flagstaff.

The state game and fish commission in a special meeting held in Santa Fe Saturday decided to continue the services of J. Stokley Ligon, game expert, whose service has been completed.

Officials of the Mountain States Telephone & Telegraph Company have announced that they had purchased the Gallup Telephone Company, which has operated the Gallup, N. M., exchange since it was built.

Judgment against W. E. Carroon, former deputy state treasurer, in the amount of \$35,000 for alienation of the affections of Mrs. J. G. Straughn, was awarded in favor of Straughn by District Judge Reed Holloman in Santa Fe.

That the total acreage of burned-over national forest lands in the Tucson district for this season already exceeds the amount burned during the entire 1926 period, was announced by the Tucson office of the forest service.

Eight cars of wool have been shipped from the Artec station by San Juan county wool growers.

A banner year is expected in the Lincoln National Forest by those close in touch with the situation at Roosevelt.

Elvis Ashby was formally charged with first degree murder in the Cochise county branch court at Bisbee in connection with the fatal shooting of James O. Gilman during an altercation at a public dance pavilion in Bisbee.

Plans for a campaign to bring more tourists to Mesa Verde National Park in Colorado were under way in Farmington. Action followed a joint meeting of the Farmington Chamber of Commerce and the Durango (Colo.) exchange.

Forest fires totaling 131 occurred in the Lincoln National Forest during the five-year period from 1921 to 1925, according to figures recently compiled in the Lincoln headquarters offices in Alamogordo. A total of 3,661 acres were burned over.

Mrs. Earl Garr, business and club-woman of Casa Grande, is the first woman mayor in Arizona. She received the most votes for city council and automatically became mayor of Casa Grande. She led her nearest male competitor by a single vote.

Construction work on several miles of railroad track at three points between Las Vegas and Glorieta to eliminate many curves will be started immediately, it was announced at division headquarters of the Santa Fe railroad in Las Vegas, a few days ago.

Governor R. C. Dillon of New Mexico named Katherine Stinson of Santa Fe, said to be the world's greatest aviatrix and a pioneer among women in flying in America, to represent New Mexico at the first national conference for the development of commercial aviation which was held at St. Joseph, Mo., June 6 and 7.

The list of dead resulting from the collision of the Santa Fe flyer, the California Limited, near Flagstaff mounted to two, when it was reported that Lee Evans, negro, dining car waiter, died while en route to the Santa Fe hospital in Los Angeles. Mrs. Bernice Watson of Los Angeles was the first victim of the crash.

F. H. Clark, owner and manager of the Clayton Telephone Company, has announced the conclusion of sale of his telephone holdings in Clayton to the Mountain States Telephone and Telegraph Company. The sale was made subject to the approval of the Interstate Commerce Commission. The entire holdings will be turned over on or before Oct. 1 of this year.

A Pima county Superior Court jury took just four minutes to convict Mrs. Eva Dugan, housekeeper and self-asserted common law wife of A. J. Mathis, aged rancher who mysteriously disappeared from his home near Tucson, Ariz., on a charge of grand larceny in connection with her sale of Mathis' automobile in Amarillo, Tex., several weeks later.

Miss Mitzie Richards of Needles, Calif., was bound over to the District Court in Albuquerque after a preliminary hearing on a charge of assault with intent to kill William H. Fortune, wealthy Los Angeles oil man in a road house near Gallup, N. M.

The New Mexico state land office has issued an order to the effect that all rental notes given as evidence of rentals due on all grazing and agricultural leases issued hereafter shall bear interest at 8 per cent from maturity rather than at 12 per cent as heretofore.

SUCH A BORE

"On being offered \$70,000,000 for one of his properties," we read, "Mr. Mellon replied, 'It's a good price, but I don't care to be bothered reinvesting \$70,000,000.'"

That has frequently been the objection in our own case. "No," we say quietly but firmly, "your proposition is interesting, but really we prefer not to have the bother of rehandling and reinvesting \$50,000,000 or \$30,000,000; it cuts into our golf so."—New Haven Register.

Plenty of Slate

"Put that down on the slate," charged the impecunious citizen of the dealer who had sent him up a ton of coal.

"I ain't got no slate," snapped the vendor ungrammatically.

"You ain't? Well, when I get home I'll guarantee to dig enough out of my bin to cover the roof of a house."

First Link—"He's golf-crazy." Second Link—"Let him alone—it's a disease that has to take its course."

The Better Plan

This living for tomorrow. May be some people's way—Tomorrow may bring sorrow—Let's live a lot today!

A Natural Surgeon

"I believe," declared the Irishman, "that me youngest son's born t' be a surgeon."

"Phwat leads ye t' say that?" asked his friend.

"O! caught him usin' th' scissors on a book O'd lately bought, an' before O'd stop him he cut out th' appendix."

Tough Luck

"I see," said Jones, at the supper table, "that the visible supply of coal will be exhausted in 15,000 years."

"John Smiffen Jones, that's just like you," exclaimed Mrs. Jones snappily. "I told you to order enough for the whole winter."
