## PERSONAL AND SOCIAL

Our Golden Crust-Bread is the best that can be made. You can get it fresh in Patagonia by 9 o'clock a. m. Made by HOME BAKERY, Nogales, Ariz.

Mrs. P. R. Suljivan and daughter, Di, of Bisbee are visiting Mrs. H. H. McCutchan. Mrs. Sullivan is Mrs. McCutchan's sister.

Mrs. Nettie Gillman and daughters of Redondo Beach, Calif., are guests of Mr. and Mrs. H. H. McCutchan.

WILL EXCHANGE a Winchester hammerless, pump action, long barrel, 12-gauge shotgun, model 1912, practically new, for a good 20-gauge shotgun of same pattern. Inquire at The Patagonian Office for further information.

H. H. McCutchan and twin sons visited Mansfield Tuesday, taking a load of gasoline to use at the A. F. Gross mining property.

Supervisor and Mrs. W. T. Roath of Elgin were Nogales visitors Monday, when the former attended the regular meeting of the board.

Mr. and Mrs. Robert Thompson of Canby were Nogales visitors Monday.

Fire extinguisher chemicals may be obtained of Bert Blabon at the East Side garage, Patagonia, for all makes of apparatus.

### SPECIAL NOTICE

The Real Estate Exchange has some good farms and city property for sale. All kinds of legal blanks, abstracts of title furnished, transfers made and acknowledgements taken. If you have real or personal property for sale list it with us and we will help you sell it. For particulars, call on, or address, A. H. GLIDEWELL, 100 Duquesne Ave., Patagonia, Ariz.

### Masked Bandits Get \$10,000

San Francisco, Aug. 4.—Four men, masked, held up the United Bank and Trust Company's branch on Hayes street, near Octavia, this afternoon and escaped after looting tills and vaults of between \$8,000 and \$10,000.

Mr. and Mrs. Sam Foster were Fort Huachuca visitors Tuesday.

Mr. and Mrs. Marvin Davis were Nogales visitors Monday and Tuesday.

Ed Armor was a county seat visitor Monday.

J. J. Farley was a Nogales visitor Monday.

Our Golden Crust Bread is the best that can be made. You can get it fresh in Patagonia by 9 o'clock a. m. Made by HOME BAKERY, Nogales, Ariz.

Mrs. W. J. Mitchell and son, Billie, left last Friday for California in their new car, purchased from N. B. Mercer.

A. E. Sanders, proprietor of Piggly Wiggly Nogales Co., accompanied by Mrs. Sanders and their daughter, Dorothy, motored to Tucson last week to meet the Misses Ella Roy Riggs and Eleanor Ray Pritchard of El Paso, school chums of Miss Dorothy. The young ladies will spend several weeks at guests at the Sanders home before returning to the Pass City to resume their studies in September.

Miss Lola Peck, daughter of Mr. and Mrs. A. L. Peck Sr., and Daniel A. Quinn of Yuma, Ariz., were married this week in Nogales at the Sacred Heart church. The young couple will spend their honeymoon in California, and will make their home in Yuma upon their return.

### OLD IRONSIDES' GREAT VICTORY WON JUST 115 YEARS AGO

In the present effort to "Save Old Ironsides," it would be particularly appropriate if success crowned the campaign by August 19, since that is the 115th anniversary of the Constitution's greatest victory, the day when she humbled the proud British ship, Guerriere.

The story of that victory is one of the most thrilling in all American naval history. It's the sort of story that every American should be proud to tell his children. If you do not know that story, be sure to read the illustrated feature article, "Old Ironsides' Greatest Victory," by Elmo Scott Watson in this issue of The Patagonian.

The Patagonian, \$2: Worth the Price

### SOUTHERN CALIFORNIA AGAIN SHAKEN BY EARTHQUAKE

Los Angeles, Aug. 4.—The Los Angeles area of southern California got a 10 to 45-second shaking early today as reminder that it still was within the area of possible seismic convulsions, but waited in vain during the day for another of the earthquakes, which usually come bunched.

The temblor, appearing in most places as two distinct shocks, rumbled its way from the mountains to the sea and up and down the coast for more than 50 miles. From Ventura on the north to the Orange county beaches on the south residents were rolled about in bed, while dishes and windows rattled and furniture shifted around.

The only damage reported from any point was a broken water main near the downtown district of Los Angeles. The main, which was twisted enough to cause a leak, was quickly repaired.

Office buildings in Los Angeles swayed widely in the shake, which began at 4:22 a. m. and continued perceptibly for 10 or 15 seconds.

San Pedro, the city's harbor community, seemed hardest hit by the slow-moving temblor. A marine lookout declared the earth continued to vibrate for 40 or 45 seconds. Santa Monica, Hollywood, Anaheim, Pasadena and other cities sent in reports that talked closely as to duration and degree of severity of the first quake of any consequence to visit the southland since the destructive Imperial Valley jolts of last January 1.

### 500 Deer Killed First Day of Season

San Francisco, Aug. 4.—Approximately 500 deer were killed on the first day of the 1927 season, it was estimated today by the state fish and game commission on the basis of the duplicate deer tags received from successful hunters.

The largest buck killed was a 7-pointer, brought down by Paul Blanche Jr., of Gonzales, in Monterey county. The largest kill reported was from Mendocino county, where hunters bagged 17 deer.

Democrats appear to agree on one thing, at least. They are all against a third term for Cal. Maybe that's why he has announced that he doesn't choose to be a candidate in 1928.

Baxter Hunt went to Fort Huachuca Tuesday for a consultation with the army doctor.

Mrs. Fannie Mathis was an Elgin visitor Monday.

### MICKIE SAYS—

YOU GOTTA KEEP YER NAME BEFORE THE PUBLIC TO BE A SUCCESS—IT AINT ENUFF TO GET IT THERE—AND TH' BEST WAY IS TO HAVE A REGULAR SPACE IN THIS NEWSPAPER. EVERY ISSUE AID PUT IN A LIL' SOMETHING ABOUT YOUR BUSINESS.

### CAMPBELL NOT OFFER MEXICO EMBASSADORSHIP

Washington, Aug. 4.—Reports that Thomas E. Campbell, former governor of Arizona, had been offered the post of ambassador to Mexico were denied today at the office here of Mr. Campbell.

### NEW FIGHT ON TO SAVE MEN FROM DEATH PENALTY

Boston, Aug. 4.—Although Governor Fuller has refused to extend executive clemency to Nicola Sacco and Bartolomeo Vanzetti, principles in a famous murder trial, the long battle to save the lives of the two men has not ended.

Today while the minutes of the last week of life for the condemned men ticked away, it became known that the attorneys who had fought their case before the state supreme court and the governor had retired, and that new counsel had been retained to take any further legal steps possible to avoid the electric chair.

Arthur D. Hill, Boston lawyer, who formerly was associated with Fred Moore of California in the Sacco-Vanzetti defense, was selected as the new attorney. He refused to discuss reports that the United States district court or the United States supreme court would be approached in an effort to stay the hand of the executioner.

"I have been consulted with a view to seeing what steps of a legal nature, if any, can be taken in the circumstances," he said. "It is not possible at this time to make any further statement."

In a lengthy statement issued late today the retracing counsel criticized the secrecy with which Governor Fuller conducted his personal investigation of the Sacco-Vanzetti case and referred to the fact that the decision of the advisory committee named by the governor to conduct an independent investigation had not been made public.

While their friends were studying new means of averting their death sentence, now set for August 10, Sacco and Vanzetti in the death house at the Charlestown state prison heard with little show of emotion the news that the governor had refused to intervene in their behalf.

Sacco professed to have expected an adverse verdict, but Vanzetti, more optimistic, indicated surprise.

### ELGIN NEWS NOTES

Mr. and Mrs. W. F. Neil left Saturday for a six weeks' visit with friends and relatives in Texas, Oklahoma, Kansas and Arkansas.

Mr. and Mrs. Sid Simpson entertained a number of friends at dinner of last week.

The many friends of Earl Henry met at the road camp at Elgin in honor of his birthday. An enjoyable time was had by all. "Hot dogs," cake, coffee, and fruit were enjoyed while good music was part of the program.

The ranch home of Mrs. Ida Patee was burned to the ground about two weeks ago. The only thing saved was a dress that was hanging on a clothes line.

Mr. Farris was an Elgin visitor this week. He says there has not been any rain at his Rain Valley ranch this summer.

### UNION PACIFIC RAILROAD ADDS ARIZONA TO ADVERTISING LIST

Phoenix, Aug. 4.—Arizona's newest million-dollar tourist development enterprise, marking the entrance of a third transcontinental railroad into the field of advertising Arizona's beauties to the world, even though it operates no lines in the state, will be in operation next summer.

The new tourist attraction will be in the Union Pacific railroad's big hotel on the north rim of the Grand Canyon, announced only a short time ago and under construction. Announcement that it will be completed by June, 1928, the opening of the next summer tourist season, is contained in a report of its development plans which has been furnished by F. H. Knickerbocker, general manager of the Los Angeles and Salt Lake Railroad Company of the U. P. system, to the Arizona Industrial Congress, Arizona's statewide development body.

The Union Pacific now has under active construction on the north rim of the Grand Canyon a main hotel building, cabins, garage, chauffeur's quarters and rest stations, and also a hydro-electric power plant, pipe line and water reservoir, Mr. Knickerbocker advised the industrial Congress. The cost of these facilities will amount to \$750,000, and in order to hasten their completion, the construction work will be pushed through the winter, caterpillar snow plows having been acquired to keep the roads to the north rim through the Kaibab forest open during the winter months.

The new Union Pacific hotel will be almost directly opposite El Tovar hotel, on the south rim, and new trails are being constructed from the north rim to the floor of the canyon to connect with the trails from the south rim of the canyon on a scale far greater than ever before, the new lodge will give the Grand Canyon National Park an unsurpassed set of tourist accommodations and facilities, as the national park service is engaged in an extensive program of road and trail construction and improvement on both rims, and the Santa Fe-Harvey system is largely expanding its south rim facilities.

The U. P. entrance into the Arizona tourist field is a sequel to its development of tourist facilities serving the national park and Bryce Canyon in southern Utah, though it is worthy of note that its expenditures at the Grand Canyon will exceed the combined cost of its facilities at those points. As is the case with Zion Park and Bryce Canyon, its travel to the Grand Canyon will be by motor stage from Cedar City, Utah, and the three famous attractions may be linked in a loop tour embracing some of the most scenic spots of northern Arizona and southern Utah. The company's investment in motor buses and trucks to serve that section already totals \$300,000, Mr. Knickerbocker stated, while \$147,000 has been expended to provide telephone connections linking the respective attractions.

Extension of the Union Pacific's tourist development to the north rim in Arizona will automatically result in bringing to the state large numbers of travelers from the more northerly routes, and coupled with immediate construction of the Lee's Ferry bridge, making possible a highway connecting the transcontinental motor routes through Arizona and Utah, it is expected to give a added impetus to northern Arizona's development as a national playground.

### Woman Suicides Via Dynamite Caps

San Francisco, Aug. 3.—After placing two dynamite caps in her mouth, Mrs. Louise M. Montgomery, 55, committed suicide yesterday afternoon by lighting a connecting fuse and blowing off her head.

The suicide occurred in Golden Gate Park where several park visitors were sauntering along nearby walks.

The explosion of the fulminate fuse blew the upper part of the woman's body to shreds. Mrs. Montgomery left a note for police explaining that she was not connected with a recent bombing case here, but giving no motive for her act.

President Coolidge panned some gold, and the opposition press meanwhile panned the president.

Dr. Butler declared that there is no great man living in the world today, but he didn't say it in Rome.

Arizona explorers have discovered an unfinished dam, 1000 years old. Probably an ancient Musula Shoals.

### NAVAL PARLEY AT GENEVA FAILS TO REACH AGREEMENT

Geneva, Switzerland, Aug. 4.—War between Great Britain, the United States and Japan is unthinkable, it was declared by Hugh S. Gibson, America's chief representative, at the closing session of the tripartite naval conference today. Hence there is no reason, he added, why an agreement, which has not been obtained at Geneva, should not be reached shortly as the result of direct negotiations between the governments for a reconciliation of the divergent views.

The closing of the conference, held in the presence of a large assembly, was carried out without the employment of fireworks of recrimination, and, as W. C. Bridgeman, head of the British delegation, said:

"We are not desponding in a spirit of bitterness or despair."

After the adoption of a joint declaration suggesting direct negotiations between the governments, Mr. Bridgeman walked up the stairs of the Hotel des Bergues, in whose ballroom the last act of the naval drama was played, to the private office of Mr. Gibson and shook his American colleague warmly by the hand. This was hailed as an indication that the first lord of the British admiralty believed the differences between the United States and Great Britain, manifested at the conference, was nothing more serious than a slight family tiff.

Admiral Saito, distinguished member of the Japanese delegation, joining in the thought of Mr. Gibson and Mr. Bridgeman, declared in his valedictory address that he, for one, declined to interpret the results of the conference as a rupture of negotiations. He was convinced, he affirmed vigorously, that in some form or other attempts to limit extravagance and competition in naval building, already limited in practice by common sense, will continue and eventually succeed.

The joint declaration, adoption of which involves automatic adjournment of the conference, represents an effort to summarize the viewpoints of the three delegations on the matters on which they agreed and on those on which they disagreed. The declaration shows that the conference was wrecked on two points—first, that of total tonnage limitation for cruisers, on which the British and Americans were unable to reach agreement; second, on the problem of so-called eight-inch gun cruisers.

The declaration emphasizes that the British, while proposing a limitation of the size of warships of all classes, opposed the principle of limitation by tonnage alone. This opposition was based on the ground that the largest ship and the heaviest gun permissible must inevitably become the standard.

### AIMEE REORGANIZES ANGELES TEMPLE CONTROL BOARD

Los Angeles, Aug. 3.—Aimee Temple McPherson today announced the formation of a board of control for Angeles Temple, a definite step, she intimated, towards her entrance into evangelistic work in other fields.

There will be seven members on the board, herself and one from each department of her institution. "The days of one-man control are gone forever at Angeles Temple," the evangelist said.

"The new plan is to build upon the wagon-wheel pattern. Each of the seven department heads will represent a spoke while I will be the hub."

As a concession to the evangelist's leaning toward allegorical treatment of ideas, the desks of the board in the general office will be arranged in the hub and spoke design. It was announced. Mrs. McPherson will be the hub as well as rear admiral and chief keeper of the lighthouse.

One thousand churches with light-houses on top of them, new costumes featuring sailor collars, gold braid and epaulets, were mentioned in important points of interest in her new scheme of things today.

### JULIAN DENIES HE'S INDICTED

Los Angeles, Aug. 3.—Receivership proceedings that threw the Julian Petroleum Company into the courts did not involve C. C. Julian, organizer of the corporation. Reported in a news story as having been one of several men indicted in connection with the court developments of the case Mr. Julian said: "I am neither a defendant nor in any way involved in the proceedings. I have had no connection with the Julian Petroleum Corporation since December, 1924."

### HOOVER BOOSTED FOR G. O. P. PRESIDENTIAL NOMINATION

Washington, D. C., Aug. 4.—Political discussion in the national capital turned largely today from President Coolidge's announcement that he does not "choose" to run in 1928 to the prospects of the various men whose names have been put forward as eligible for the Republican nomination.

Secretary Hoover, Vice President Dawes, Frank O. Lowden of Illinois, Senator Borah of Idaho, and Speaker Longworth were among those around whom much of the speculation centered.

Other names mentioned in the informal discussions of the politicians included those of Charles Evans Hughes, Senator Watson of Indiana, Senator Johnson of California, and Senator Fess of Ohio. Both Mr. Hughes and Senator Watson have announced they will not be in the race.

There was no small amount of speculation as to which one of the present mentioned eligibles would "inherit" the bulk of Coolidge's strength in the party organization. It was conceded, however, that it was too early and the situation too befuddled for any except the wildest sort of guesses.

Those who still adhered to the opinion that President Coolidge had left the way open for him to accept the nomination if forced upon him by the convention asserted that with the field full of candidates and favorite sons there was the possibility of a deadlock which might force the leaders to turn to the president for a way out.

While there will be much discussion of candidates and probably considerable activity among their friends during the next few months, it may be early next year when the preferential presidential primaries are held before names will go down in black and white.

Sixteen states have such primaries, New Hampshire holding the first on March 13, and West Virginia the last on May 29. So far as Republican national committee headquarters here is advised in only one of the states is a declaration of acceptance by the candidates, that is South Dakota, which holds its primary May 23. The 16 states have a total delegate strength of 492 out of the 1109 which will sit in the convention.

### SECRET SESSION FOR COLORADO RIVER COMMISSION

Phoenix, Aug. 3.—Members of the California Colorado River Commission who will arrive in Phoenix tomorrow morning for a conference with the Arizona Colorado River Commission will be asked to address a joint session of the Arizona state legislature, it was announced by members of the Arizona commission.

The sessions of the two commissions will be held behind closed doors it was announced.

It is planned, the Arizonians said, to call the two houses of the state legislature, now assembled in special session, into a joint session in the house chambers for the purpose of hearing the California commissioners, should the plan prove acceptable to the visitors.

Other than the proposed plan of giving the California commissioners the opportunity to address the state legislature on river matters as they see them, the members of the Arizona commission declared they had no plan to follow in the joint meeting tomorrow.

### C. M. T. C. IN NOGALES GETS UNDER WAY

Approximately 200 boys from this state and New Mexico, Texas, Colorado and Oklahoma are in attendance at the annual Citizens' Military Training Camp of the Eighth Corps Area at Camp Stephen Little Nogales, under the supervision of Col. A. J. Dougherty, commander of the 25th Infantry.

The young men are quartered in tents on the Camp Little reservation, and are equipped by the army. The international border line is closed to the young men attending the camp and citizens of Nogales and the military authorities are providing entertainment for them.

Levin Sued By Maurice Drouhin, Paris, Aug. 3.—Maurice Drouhin, French aviator, began action against Charles A. Levine and Zeking to compel him to fulfill terms of a tentative contract signed early in July, when Dr. uhin was chosen pilot of Levine's monoplane, "Columbia," in a return trip across the Atlantic, from Paris to New York.

This age finds Camel worthy  
of leadership

THE people of this modern, busy age are always anxious to recognize quality, and they have placed Camel first among cigarettes.

Modern smokers have an experienced taste that quickly learns to know good tobaccos. Camel is their favorite, because they recognize in it the choicest tobaccos grown, blended to bring out their exquisite taste and fragrance.

Camel has won its way to the top in the hardest-to-please age ever known because it has the qualities of goodness that make smoking a pleasure. You will revel in the enjoyment of these cigarettes. No better smoke can be made.

"Have a Camel!"

THE NEXT CONGRESS

Whether there shall be a special session before the Seventieth Congress regularly assembled in December or not, it appears that the stage is being set for one of the most strenuous sessions in recent years.

While it is conceded that one of the paramount issues to be considered is flood relief, other problems, old and new, will clamor for solution. Farm relief, tax reduction, national defense, Boulder dam, and many other measures will be put forward, not forgetting the perennial controversy over Muscle Shoals.

An indication of the fierceness of the impending struggle over these measures may be seen in the renewed activity of the "farm bloc," whose leaders recently held a conference in St. Paul, where it was proposed to combine several issues in a sort of coalition program, whereby support for one bill is sought to be traded for support for another. For example, it is said that the middle west will support the Boulder dam bill and possibly government operation of Muscle Shoals in return for aid from advocates of these measures in support of the McNary-Haugen bill.

Even though such a coalition be agreed upon by the leaders concerned, whether they can actually deliver the votes in congress in accordance with such an agreement remains to be seen. But whatever the lineup may be on the several important measures involved, it seems certain that the Sixty-ninth congress will have nothing on the Seventieth as a fighting body when the record is finally written.

BIG POSTAL FIGURES

Considerably more than one-fourth of the ordinary expenditures of the United States government are required for the operation of the post office department, for which the last annual budget provided \$757,969,115.

Ten years ago the amount appropriated for the postal service was only \$324,833,728, or considerably less than one-half that required this year.

More than 300,000 persons are now employed, salaries being the principal item of expense. Railroad transportation of mails costs about \$100,000,000 annually, while equipment and supplies require an expenditure of several millions, among the items being about 1400 tons of twine, 3,500,000 yards of canvas for mail bags, 2,400,000 locks, more than 8,000,000 gallons of gasoline for motor vehicles and hundreds of tons of stationery.

Postal receipts fall many millions short of expenditures, owing to the great cost of the rural free delivery service and the handling of many tons of official mail which pays no postage.

Under present postal law there are a number of glaring inconsistencies in rates, but it is likely that an effort will be made to adjust these by the next congress. But whatever its faults, the United States postal service is not only the largest but also the most efficient in the world.

LINDY WRITES A NOTE

Among the many letters received in New York by Colonel Lindbergh one morning recently was one from a boy in Boston, who wanted the aviator to fly over the hospital in which he is a patient.

The request appealed to Lindbergh, but as it could not be complied with he wrote the lad a note and sent it, with a photograph, by air mail. The note read:

"Dear Ned: I saw your letter today just before leaving on my tour of the country. I can't fly over the hospital in Boston where you are because it would be against the law, but in order not to disappoint you entirely I am sending you a picture of myself and the 'Spirit of St. Louis,' which you can show to the other boys and girls who are with you.

"I hope you will be well soon and that you can get back to your home in Spokane in time for the air races in September. There will be lots of aviators there and you can race them close up.

"With my best wishes,
"Charles A. Lindbergh."
And when he received that note and photograph it is easy to believe that Ned was the proudest boy in Boston.

Plans are being made for 35 miles of subways in Osaka, Japan.

Marriage announcements recently sent out by a Paris couple carried a touch of originality. After the names of the newly wedded pair it was stated that they "have the pleasure of announcing their marriage celebrated in the Church of St. Philippe du Roule. Pray for them."

Tribulations of a traveling salesman are revealed in a recent letter from one of them, who says: "The average traveling man is obliged to take a great deal of abuse from his sales manager, and then some more from his wife." Still, he isn't with either of them constantly, so it might be worse.

John F. Weakley, bank cashier at Donelson, Tenn., recently demonstrated that there is nothing "weakley" about him except his name. When two bandits attempted to rob the bank he shot it out with them, capturing one and chasing the other away without booty.

A German burgomaster says the United States could give Europe eternal peace, but we doubt that cancelling war debts would do it.

LEGAL ADVERTISEMENT

ARTICLES OF INCORPORATION

PIGGLY WIGGLY SOUTHWESTERN CO.

KNOW ALL MEN BY THESE PRESENTS: That we, the undersigned, do hereby associate ourselves together for the purpose of forming a corporation under the laws of the State of Arizona, and do hereby adopt the following Articles of Incorporation:

ARTICLE I.
The names, residences and post office addresses of the incorporators are as follows: A. E. Sanders, 724 Grand Ave., Nogales, Arizona, and Lella Sanders, 724 Grand Ave., Nogales, Arizona.

ARTICLE II.
The name of this corporation is "PIGGLY WIGGLY SOUTHWESTERN CO."

ARTICLE III.
The principal place of business of the corporation shall be Nogales, Santa Cruz County, Arizona, but the corporation may have such branch offices, within or without the State of Arizona, as may be hereafter established by the Board of Directors, and meetings of the Board of Directors may be held at any business transacted at any branch office.

ARTICLE IV.
The general nature of the business proposed to be transacted by the corporation is as follows:

(a) To carry on and engage in the business of establishing, maintaining and operating "Piggly Wiggly" stores; to buy, sell, trade and deal in, at wholesale and retail, groceries, provisions, food supplies, vegetables, all kinds of grain, bran, hay, farm and dairy products and products, articles and things for personal, domestic and household use, and generally all goods, wares and merchandise incidental to a general grocery, vegetable, food supply, meat, poultry, fish, game, produce and provision mercantile business; to buy, sell, store and deal in poultry, fresh, salt, pickled, smoked and cured meats, fish, oysters and sea food products, and to buy, sell, slaughter, pack, cure and otherwise handle poultry, cattle, calves, hogs, sheep and livestock generally, and to manufacture, sell and deal in, at wholesale and retail, the products thereof.

(b) To obtain, register, purchase, lease or otherwise acquire, to hold, use, own, operate, develop and introduce, to sell, assign, lease, pledge, mortgage, grant or acquire licenses and franchises in respect of, and otherwise deal in and with or turn to account any and all copyrights, copyrights, trade marks, formulas, secret processes, devices, trade names and distinctive marks, business systems, patents, patent rights, applications for patents, brevets d'invention, and all inventions, licenses, privileges, improvements and processes used in connection with or secured under letters patent or otherwise of the United States or of any other country, relating to or useful in connection with any lawful business of the corporation, including the good will of the same.

(c) To borrow and lend money, and to make, draw, accept, endorse, acquire, buy and sell all or any negotiable or transferable instruments and securities; to make and perform contracts, to purchase, lease, or otherwise acquire, own, exchange, sell, or dispose of, pledge, mortgage, hypothecate and deal in, real estate, any and all kinds of property, real, personal and mixed, and the good will, rights and property of any person, firm, association or corporation, and pay for the same in cash or stock, bonds or obligations of this corporation, or otherwise.

(d) To issue bonds, notes, debentures or other forms of corporate obligations, and to sell, pledge or hypothecate the same and to secure the payment thereof by mortgage or otherwise upon all or any part of the property of the corporation; to purchase, acquire, hold, sell and dispose of the stock, bonds or other evidences of indebtedness of any corporation, domestic or foreign, and to issue and exchange therefor its stock, bonds or other obligations.

(e) Without in any particular limit, any of the objects, or purposes or powers of the corporation, the business or purposes of the corporation shall be from time to time to do any one or more or all of the acts and things herein set forth, and all such other acts, things and business or businesses in any manner connected therewith, or necessary, incidental, convenient or auxiliary thereto, or calculated directly or indirectly to promote the interests of the corporation or enhance the value of or render profitable any of its property or rights, as such a corporation may lawfully do; and in carrying on its business, or for the purpose of obtaining or furthering any of its objects, to do any and all acts and things, and to exercise any and all other powers which a co-partnership or natural person could do and exercise, and which now or hereafter may be authorized by law, and either as, or by and through principals, agents, attorneys, trustees, contractors, factors, lessors, lessees, or otherwise, either alone or in conjunction with others and in any part of the world; and in addition to have and to exercise all the rights, powers and privileges now or hereafter belonging to or conferred upon corporations organized under the provisions of the law authorizing the formation of such corporations.

ARTICLE V.
The authorized amount of the capital stock of this corporation shall be Two Hundred Thousand (\$200,000.00) Dollars, divided into ten thousand (10,000) shares of common stock at the par value of Ten (\$10.00) Dollars each, and one thousand (1000) shares of preferred stock at the par value of One Hundred (\$100.00) Dollars each. The holders of the preferred stock shall be entitled to cumulative dividends thereon at the rate of Eight (\$8.00) Dollars per share or eight per centum of the amount of par value for each and every fiscal year of the life of the corporation and no more, payable out of any and all surplus or net profits, quarterly, half-yearly or yearly, as and when declared by the Board of Directors, before any dividends shall be declared, set apart for, or paid upon the common stock of the corporation. Said dividends on the preferred stock shall be cumulative, so that if the corporation shall fail in any fiscal year to pay such dividends on all of the issued and outstanding preferred stock, the dividends shall be paid, but without interest, before any dividends shall be paid or set apart on the common stock. Subject to the foregoing provisions said preferred stock shall not be entitled to participate in any other or additional earnings or profits of the corporation. The owners or holders of preferred stock shall have no voting powers whatsoever, nor shall they be entitled to notice of any meeting of stockholders of the company.

In the event of the dissolution or liquidation of the corporation, or a sale of all its assets (whether voluntary or involuntary) or in event of its insolvency or upon any distribution of its capital, there shall be paid to the holders of the preferred stock the par value thereof, to wit, One Hundred (\$100.00) Dollars per share, and the amount of all unpaid accrued dividends thereon, before any sum shall be paid or any assets distributed among the holders of the common stock; and after the payment to the holders of the preferred stock of its par value and the unpaid accrued dividends thereon, the remaining assets and funds of the corporation shall be divided among and paid to the holders of the common stock according to their respective shares. The Board of Directors may in their discretion declare and pay dividends on the common stock concurrently with dividends on the preferred stock, for any dividend period of any fiscal year when such dividends are applicable to the common stock; provided that all accumulated dividends on the preferred stock for all previous fiscal years and all dividends on the preferred stock for previous dividend periods for that fiscal year shall have been paid in full.

The whole or any part of the preferred stock shall be subject to redemption at One Hundred Ten (\$110.00) Dollars per share and accumulated dividends thereon at any time after one year from the issue thereof, at such time or times and in such manner as the Board of Directors shall determine. Upon subscription therefor said capital stock shall be paid into the corporation in such manner and upon such terms as the Board of Directors may fix in cash, services, or by the sale, transfer or assignment to the corporation of property, property rights or interests therein, real, personal or mixed, to the uses and purposes of the corporation, and in payment for which shares of the capital stock of the corporation may be issued, and such stock so issued shall thereupon and thereby become and be fully paid up and non-assessable; and in the absence of a factual fraud in the transaction, the judgment of the Board of Directors as to the value of the services rendered or property purchased shall be conclusive.

ARTICLE VI.
The time of the commencement of this corporation shall be the date of the filing of its articles with the Corporation Commission of the State of Arizona and the recording of same in the office of the County Recorder of Santa Cruz County, Arizona, and the termination thereof shall be twenty-five years thereafter, with the right in the corporation to renew its charter for an additional period of twenty-five years as now provided by law.

ARTICLE VII.
The management and conduct of the business, property and affairs of the corporation shall be vested in and conducted by a Board of Directors of not less than three (3) nor more than seven (7) persons, and all directors, except in case of vacancies, shall be elected at the annual meeting of stockholders, except the first board, which is chosen as in these articles hereinafter set forth. The officers of the company consist of a President, Vice-President, Secretary and Treasurer, and such other officers as the Board of Directors shall deem expedient, and all shall be elected or appointed by the Board of Directors. Any two or more officers, the duties of the incumbent of which are not inconsistent, may be held by the same person. Both the officers and directors shall hold their offices for the period of one year from and after election and qualification and until their successors are elected and qualified, unless removed by the board. The directors shall have the right to fill any vacancy occurring in the board by death, resignation, or otherwise and the person or persons elected to fill any such vacancy or vacancies shall hold his office until the

next regular meeting of stockholders.
ARTICLE VIII.
The regular annual meeting of the stockholders shall be held at the principal office of the corporation on the third Monday in January of each year, commencing with the year 1929.

ARTICLE IX.
The incorporators shall name the persons who shall constitute the first Board of Directors and when so selected by the incorporators said members of the board shall serve until the first annual stockholders' meeting and until their successors are elected and qualified.

ARTICLE X.
The Board of Directors shall have the power to make and alter the by-laws of the corporation; to fix the amount to be reserved as working capital, and to authorize and cause to be executed mortgages, debentures and other obligations which shall be liens upon the property and franchises of the corporation, and in general to exercise all the powers and authority of the company not expressly withheld from said board by law, or by these Articles of Incorporation, or by the affirmative action of the stockholders.

ARTICLE XI.
The stockholders and members of this corporation and their private property shall be exempt from any liability for the debts of this corporation.

ARTICLE XII.
The indebtedness of this corporation shall at no time exceed the sum of One Hundred Thirty-three Thousand, Three Hundred Thirty-three and 33/100 (\$133,333.33) Dollars.

ARTICLE XIII.

## WALTER P. CHRYSLER'S TRAFFIC TALKS

### TRAFFIC CONFERENCE MAKES RECOMMENDATIONS

Some of the recommendations of the various speakers at the recent city traffic conference held in Chicago under the auspices of the National Automobile Chamber of Commerce are of interest because the opinions of the speakers are the results of thorough surveys and years of study. Included among the suggestions are these:

That big cities permit parking in congested districts only where the stored cars will not seriously hinder street movements.

Establishment of a simple and uniform traffic code for cities and their suburbs, and the placing of this simplified code in the hands of every vehicular operator.

Constant campaigning for the repaving and widening of streets and the improvement of by-pass and high speed roads, and the planning now in all cities for twice the present traffic volume.

Support and encouragement in all communities of city planning organizations to formulate sound building plans and force them to completion. Classification of all streets and segregation of their traffic.

Widen streets and terminal roads by set back ordinances if widening is not possible otherwise.

Develop the principle of benefit assessment and excess condemnation.

Speed up transit to the maximum by the use of all transport agencies and simplify the routing of street cars, busses and other public vehicles.

Organize day storage garaging in small units at 25 cents a day or \$10 a month.

Give special study to motor freight operations and further regulate the use of trucks in congested districts.

Following a test of six months, Cleveland traction officials have reported that the aluminum street car is quieter than the usual kind and operates at a saving of about 20 per cent in power. It weighs but 15 tons as compared with the 21 tons of the usual steel type. The decrease in noise is due to the fact that aluminum is not as good a conductor of sound as steel.

Resembling a huge spider, a dusting apparatus, mounted on a tractor, spreads insect-killing preparations on plants at the rate of 25 acres a day. The dust is distributed through four nozzles and is kept from blowing away by a canvas covering, one on each side of the machine. These have flaps that closely surround the plants and give each one an intensive dusting for about eight seconds.

## The City Market

### What's New?

A rubber, washable wallpaper has been developed in Germany.

By a new system of carbonization in England it is said that five times the usual amount of electrical energy may be obtained from a ton of coal.

Through a new process furs may now be dyed in various patterns, or pure white, as desired.

A suit of chain armor, containing 50,000 links was recently completed in England after two years of labor in its manufacture.

Tall towers with tanks of chemicals for spraying fruit trees have been installed in orchards near Yakima, Wash.

A French inventor claims to have invented an airplane, operated by a compressed air motor, which will rise straight upward from the ground.

Easily installed in the wardrobe or closet, a vaporizing outfit, operated with current from a lighting socket, is said to be effective in eradicating moths. A chemical, placed in a small basin, is vaporized by the heated bulb and permeates the clothing so that six hours' treatment assures thorough work, no matter how deeply the eggs or larvae may be imbedded in the fabrics.

### STUDY OF QUAIL ENEMIES MADE

Attention to the food supply and nesting cover of quail and to controlling the natural enemies of these birds will result in better development of quail preserves, according to the biological survey of the U. S. department of agriculture, which is participating in a cooperative quail investigation in northern Florida and southern Georgia. Destruction caused by wind, rain, and fire can not be controlled, but animal enemies may be kept in check. The investigation has shown that among natural enemies that eat quail eggs or prey on the nestlings, the greatest destruction is wrought by skunks, cotton rats, and snakes, although opossums, raccoons, weasels, cats, hawks, owls, and crows also cause some losses. The fur bearers have been best controlled by trapping and the cotton rats by poisoning. Snakes depend on cotton rats for food, as well as on other small rodents, so that if the numbers of the cotton rats are reduced, the snakes may go elsewhere. Cooper hawks are destructive to quail and may be controlled by destroying their nests. Marsh hawks prey upon cotton rats and kill very few quail and may be considered beneficial.

### "MUSIC HATH POWER"

San Francisco, Aug. 4.—Music hath power to soothe the savage breast—but not the law!

Joe Ressel was lonely, particularly yesterday morning, for he had run out of "hop."

Soft strains of harmony by a radio drifted to his ears as he lingered by a San Francisco radio store.

Here was a cure for his loneliness, so Joe helped himself to the radio.

The General Electric station suddenly took on more "hop"—the trio played louder than ever.

Joe quickened his pace with the music shrieking from the miniature radio set under his arm.

Attracted by the music and Joe's plight, Policeman Kennedy investigated. Now the radio set is back in the store and Joe is in the "coop."

All over a little music!

### STATE MINING NEWS IN BRIEF

Tucson—Calumet & Arizona Mining Co. to make extensive development at Hilltano group of silver-lead mines, located near Pantano.

Metal mining generally in Arizona continues active, with considerable new construction and development work under way.

Kingman—Work on experimental ore recovery plant here being pushed to completion.

Jeome—Squaw Peak Coppe Mining Co. making extensive developments.

Phoenix—Production started in newly installed furnace of Arizona Quicksilver Corporation in northern Mazatzel mountains, 80 miles from Phoenix.

Yuma—Two important gold strikes occur in Little Hatchet mountains.

Many wildcat oil test wells being drilled in southern Arizona.

Holbrook—Frank A. Gillespie & Son to drill test oil well south of Babbitt's Tanks on National Old Trails Highway.

Clifton—Work resumed at old Clara consolidated mines at Swansea.  
 Winslow—Good progress made in Arizona Sunshine oil well prospect.

More to read in The Patagonian than found in most weeklies

### INTERESTING NOTES

Americans own about seven times as many automobiles as all the rest of the world combined

A prism used by Sir Isaac Newton in his experiments has been acquired by the British museum.

Mounted police of London are equipped with first aid dressings and are instructed in their use.

It is claimed that a new searchlight will pierce a dense fog 20 miles. It might be useful as an aid to clear thinking.

Now Mr. Ford has also apologized to Sapfo. Anyone else with a grievance should speak up while Henry is in an apologetic mood.

To simplify the task of straightening bent automobile fenders, an efficient roller press has been designed. It literally "irons out" the dents and can be adjusted to many angles and positions according to the requirements of the job.

Starting or stopping simply by turning a switch, an eight-foot boat is run with current from two storage batteries and develops a speed of 7 miles an hour. It will go for about 14 hours continuously on one charging. The motor used is a common type of automobile starter and is rewound so that it will reverse the drive shaft whenever it is necessary to stop the boat or back it out of the docking place. The craft is especially suited for fishing as it is silent.

### Snappy Stuff

Easily attached to the spout of the teakettle, a flat-topped chamber makes use of the steam to renovate and iron ties, dresses and other articles. The garment to be treated is drawn over the steamer with pressure to crease it, the vapor reaching all parts of the fabric.

Improved tone and increased carrying power are claimed for a fife that has a square instead of a round body. According to the inventor, it is the result of some 40 years' testing and experimenting, and its greater power has been gauged by actual sound measurements.

A drilling machine with 18 different speeds, made possible by the substitution of friction-drive disks for the usual belts and gears, is a distinct departure from the usual design. A direct reading speed dial shows at a glance the speed at which the machine is operating.

The Smithsonian Institution is trying to find the complete skeleton of an American elephant, only partial remains of these animals having been discovered so far.

When pancakes stick to an aluminum griddle it may be because the recipe does not include enough fat. Add a little more and the trouble may be corrected.

At the opening of a new railroad at Anqora, Turkey, one camel and 100 sheep were sacrificed.

Weighing 194 tons and 92 feet 6 inches in length, a passenger locomotive used on the Canadian National railways is the largest in the British commonwealth. It cost \$100,000.

About 3,600,000 persons in Germany, approximately 6 per cent of the population, are over 65 years of age.

Campbell, former governor of Arizona, who may be made ambassador to Mexico.

### NEWS REVIEW OF CURRENT EVENTS

#### Naval Conference Resumed With Not Much Hope of an Agreement.

By EDWARD W. PICKARD

WITH the return to Geneva of the British delegation, the naval limitation conference was resumed; but there was a feeling there and in Washington that the parity was doomed to failure. Viscount Cecil and W. C. Bridgman had submitted to the British cabinet their demands and their entire policy, and apparently were upheld in every particular. Sir Austen Chamberlain, foreign secretary, then made a statement to the house of commons that left little hope that an agreement could be reached. The crux of this was that he considered the permanent formula adopted at Washington for limiting battleships inapplicable for certain classes of cruisers to have sounded the death knell of the conference. It was to apply this formula to auxiliary craft that President Coolidge called the conference. Sir Austen suggested that an agreement might be reached for a shorter period than originally planned, or on destroyers and submarines only, in case the three powers could not agree on a maximum cruiser tonnage; but this idea was coldly received by the American officials in Geneva and in Washington.

Dispatches from Geneva said the final British proposals were as follows:

1. That, since an agreement has practically been reached on submarines and destroyers, a convention shall be framed providing for 90,000 tons of submarines and 180,000 tons of destroyers, with an approximate 65 per cent ratio for Japan.
2. That a quota of 300,000 tons shall be adopted for all cruiser types.
3. That the ratio between the United States, Great Britain, and Japan for 10,000-ton cruisers carrying 8-inch guns shall be 12-12-8, or, if this is not acceptable, 15-15-10.
4. That the next smaller cruiser class shall be limited to 7,500 tons, carrying 6-inch guns.
5. That the question of providing extra smaller cruisers for Great Britain from its obsolete vessels shall be left to the Washington conference in 1931.

Congressman Martin E. Madden of Illinois, chairman of the house appropriations committee, who has been traveling in England, gave an interview at Torquay in which he said that if Great Britain was not willing to give America the equivalent of English ship power with respect to speed, range, tonnage, etc., there was every reason to believe that the United States naval building program would have the support of the appropriations committee. An agreement putting our navy out of balance with Britain's would not be ratified by congress, he said. Ambassador Gibson has been told by the State department that the United States would rather have him return to Washington without a treaty than to sign an agreement which fails to safeguard American interests or make possible real naval economies.

FOR three days about two dozen governors of states and some guests, in annual conference at Mackinac Island, Mich., discussed all manner of topics related to the public welfare, devoting a large part of the time to food control and farm relief. The executives do not adopt resolutions at these meetings, but they were unanimous in favoring food control of the Mississippi river and its tributaries by the federal government and in blaming that government for past neglect of that problem and the consequent losses. Governors of the Middle West and West had a lot to say about the agricultural problem and most of them seemed to favor a measure like the McNary-Haugen bill which the President vetoed.

There was a general condemnation of election corruption but the govern-

ments disagreed on the method of purification. A limited expression on federal control of hydro-electric systems was largely opposed and the sentiment against the centralization of power in Washington bureaus was all but unanimous. A proposed house of governors was called ridiculous by one governor and commended by others.

Gifford Pinchot, former governor of Pennsylvania, found opportunity to tell the conference that Senator-elect Vare should be ousted from the senate, and to make a bitter attack on Secretary of the Treasury Mellon as Vare's political partner.

**PRESIDENT AND MRS. COOLIDGE** attended the pageant at Custer, S. D., celebrating the days of gold discovery, and experienced some thrills not on the program. Two big horses broke from a covered wagon they were drawing and, with the doubletree attached, ran through the crowd straight for the box where the Chief Executive and his party were seated. A mounted cowboy managed to turn them aside, the throng opened for them and they disappeared over a near-by hill. When Mr. and Mrs. Coolidge were returning to the State Lodge they were overtaken by a violent rain storm which made travel over the slippery, sloping roads rather perilous. Mr. Coolidge has been asked by several cities to use his influence in the matter of the location of the Republican national convention of next year, but last week he declared he had no choice, though he would be glad to confer with the national committee if it desired. It is said that San Francisco now has more votes pledged to it than any other city.

The President is seriously considering the invitation to visit Havana next spring, extended by President Machado of Cuba, and to address the Pan-American congress there. He might make such a proposed trip the occasion of visiting Porto Rico to inform himself of conditions in that island, the people of which are clamoring for changes in their form of government and the election of a governor of their own people.

**MRS. ANNE U. STILLMAN** and her son, "Bud," found place on the front pages again last week, for the young man was married in the Grand Anse camp, in the Quebec woods, to Lena Wilson, forest girl and former servant in the Stillman household. Fif managed the whole affair with great eclat, gathered a lot of notable wedding guests and decked her new daughter-in-law with magnificent diamonds. Of course the news photographers were there in swarms, and as Father L'Ami was performing the ceremony some of them pressed too close. Fif flew into a rage and upset them and their cameras and bombarded the whole squad of camera men with plates until they fled to the woods.

**MARION COUNTY PROSECUTOR REMY** of Indianapolis and his aids are working their way through a great mass of documents turned over to them on the order of ex-Dragon Stephenson, the life convict, which he says substantiate his charges against Indiana officials; and a new grand jury at Indianapolis is supposed to be investigating Stephenson's alleged control of the 1925 legislature. Gov. Ed Jackson continued silent concerning charges of misconduct in office, and two Indianapolis papers, the News and Times, asked him to show his innocence or resign. Editors of other Indiana papers back up this demand, the Republican organs saying the governor owes it to his party, as well as to himself and the state, to dispel the cloud of mistrust now enveloping the statehouse. Prosecutor Remy says the disclosures may rock the state and shock the nation.

**FREDERICK STERLING**, the first American minister to the Irish Free State, presented his letters of credence to Gov. Gen. Timothy Healy in Dublin and took up his duties. The ceremony was made elaborate by the Irish, their best troops acting as escort for Mr. Sterling and lining the route of the parade to the vice regal lodge in Phoenix Park. After seeing the governor general, the minister exchanged calls with President Cosgrave. Mr. Sterling's first task will

be the negotiation of a commercial treaty between America and Ireland, replacing the old American treaty with Great Britain.

**IGNORING** the Chinese treaties with the powers, the Nationalist government at Nanking has promulgated a new list of tariffs on luxuries, running from 15 to 60 per cent. American exports to China are especially hard hit, and the American merchants in Shanghai met and decided to send a strong protest to Washington, though their hope of relief was small.

Though Gen. Feng Yu-shiang was continuing his advance on Peking, along the line of the Hankow railway, Gen. Chang Kai-shek, generalissimo of the National forces, was reported to be in a precarious position because the Radical forces from Hankow were moving down the Yangtze toward Nanking and also were threatening to advance south through Chekiang province on Shanghai.

**FRANCE**, or its government, is about fed up on Russian communist propaganda and Premier Poincare called in the soviet ambassador, Christian Rakowsky, and told him most emphatically that unless Moscow's Red agents in France were recalled at once France might be provoked into breaking off all relations with Russia. Rakowsky hurried to Moscow to confer with his chiefs. Eight communists, convicted in Paris of being spies in the pay of Russia since 1924, were given unusually severe sentences.

Secretary General Turati of the Italian Fascist party in a speech at Ravenna predicted that a clash between the Fascist and the Bolshevik conceptions of the state must come, and that the victory would rest with Fascism.

**NEW YORK** was all set to undergo the inconvenience of a strike of traction workers, and the interborough managers were prepared to continue service with strikebreakers—when Mayor Walker intervened and in two hours won both sides to agree to a settlement that resulted in at least a truce. The trouble probably is not over, however, for the union leaders assert they are now free to organize the traction workers, while the interborough officials deny this.

**ACCOMPANIED** by his brother, Prince George, and by Prince Minister Baldwin, the prince of Wales has come over for another visit to Canada. On August 7 these three distinguished men will represent England at the formal dedication of the Peace bridge between Buffalo and Fort Erie, Ontario, built to commemorate a century of unbroken peace between the United States and Canada. The United States will be represented by Vice President Dawes and other notables.

**LEUT. CARLETON C. CHAMPLION** of the army went up for an altitude record at Washington, and when seven miles up his airplane motor caught fire. Refusing to use the parachute because he was determined to save his barograph record, he descended by head and tail spins and flames with a small extinguisher. Several times the machine was out of control, but Champlion finally landed safely in a cornfield. Then he learned that he had failed of a record by 1,000 feet.

**MAURICE E. CRUMPACKER**, representative in congress from Portland, Ore., committed suicide by jumping into San Francisco bay, after previously attempting to kill himself with poison. The reason for his act was not revealed.

Cardinal Cernoch, primate of Hungary, died in Budapest after a long illness.

**CHICAGO'S** worst marine tragedy since the sinking of the Eastland 12 years ago occurred Thursday when the little excursion steamer Favorite sank in a squall. Twenty-six persons were drowned, fifteen of them being children and ten women. Fifty crew passengers and members of the crew were saved.

### DADDY'S EVENING FAIRY TALE

Mary Graham Bonner

#### BLUEY COVE

Mr. and Mrs. Seagull didn't really know what to do.

They loved their home, which was in a big harbor, for they enjoyed seeing the boats pass and hearing the different whistles.

All kinds of boats passed—ferry-boats, sailboats, old fishing boats, great big boats that went across the ocean, and little tugboats.

The seagulls would fly overhead and then they'd land on top of the water, but they never could stay there long, as the boats would come along and they would have to fly off.

Of late Mr. and Mrs. Seagull, at though they were still as fond of their home as ever, became rather worried for the little seagulls didn't seem to be able to get out of the way of the boats as quickly as the old seagulls could.

Mr. and Mrs. Seagull were afraid that one of them might get hurt by a boat.

Of course, the little seagulls were quite certain that nothing like that would ever happen, but one day it did.

They were playing tag on the surface of the water, and so interested

A Great Boat Was Coming.

In their game that they didn't notice until too late that a great boat was coming along.

The captain of the boat had blown the whistle to scare the seagulls away. They hadn't heard it at all, so busy were they playing, and it hit poor little Bluey Seagull.

One of the others called out: "Oh, fly up quickly, Bluey!" He was not badly hit, for the pilot of the boat had seen the seagulls and made the boat slow down.

Bluey was frightened almost out of his wits, but with the encouragement of the other seagulls he managed to fly off.

When Mr. and Mrs. Seagull saw what had happened to Bluey they were horrified and quickly flew off with him all the other little seagulls following.

They flew as far from the harbor as they could, for now that Bluey had been hit, they didn't think life in the harbor where the boats passed was so attractive.

In fact, they decided they would never go back there again.

They flew so far that they reached a little cove at the head of the harbor, and when Mr. Seagull saw it he said: "This will be our new home."

Mrs. Seagull said: "We will never leave this home until all our little seagulls are grown up, for then they will always be safe and can play all they want to without being afraid of getting hit by the big boats."

So it was decided, and the cove was named Bluey Cove because it had been on Bluey's account that they had moved there.

And of all the seagulls he was the happiest and the most relieved.

But all of them were very much pleased with Bluey Cove.

#### A Riddle in Rhyme

My first is an animal wild, that one sees in a country where grow many trees—It is thought by the farmer to be his foe.

My second a lady does wear in the street If she is stylishly dressed and neat; And the men and women wear it also, if the weather is cold and there is frost and snow.

My two joined together a flower will be; It grows in a country surrounded by seas.

From it a powerful drug is taken; If you don't solve this I'm much mis-taken.

Answer—Foxglove

#### Wanted to See Him Unfold

The car was parked at the curb with the boy friend's 6 foot 6 inch brother tucked under the wheel. Little Toddy stood gazing in rapturous astonishment at the seemingly never-ending length of him. Her expression amused me.

"What's the matter, Toddy?" With her eyes still staring, she stage-whispered: "I'm waiting for him to unfold."

Mother—How terrible. Burglars go to prison.

Tommy—Not me. Teddy's going to be a lawyer.

### The Kitchen Cabinet

(By 1927, Western Newspaper Union.)

"Some people are too little to do big things and too big to do little things, hence they do nothing."

#### 'ASTY' DISHES

A cupful or two of any well cooked and seasoned meat may, with a little thought, be made into most tasty food. Hash is a most delicious dish when well seasoned and one that is a great favorite in many families. Mix

(twice as much chopped potato (cooked) with the chopped meat; if not sufficiently fat add suet or butter, stir and cook, adding a little onion juice and milk or thin cream, to moisten. Serve piping hot.

**Spanish Chicken.**—Make a sauce of one tablespoonful of butter and two of flour with two cupfuls of chicken broth or water with a teaspoonful of extract of beef. Add one cupful of chicken cooked and finely chopped, one small onion cut into bits and two tablespoonfuls of cooked peas. Heat thoroughly and serve on toast.

**Deviled Chicken.**—Make a sauce of salt, pepper, dry mustard, paprika and grated lemon peel with a little of the juice of the lemon, Worcestershire sauce, and a few drops of tabasco. Heat until hot, add cubes of cooked chicken and cook until well heated through. Add a tablespoonful of butter and serve.

**Soup Meat.**—Do not throw away soup meat. Chop it, add seasonings of various sorts and use it to stuff peppers, onions or tomatoes. Also use it for beef loaf with a tomato sauce. The flavor has been taken out of the meat in the soup, but the food value is all there, and adding seasonings makes the meat palatable.

**Chicken Goulash.**—Cut into dice two medium sized uncooked potatoes. Put into a frying pan two tablespoonfuls of olive oil and when hot add the diced potato; stir and cook for five minutes, then add a cupful of boiling water, a crushed clove of garlic, a cupful of cooked chicken and salt to taste. Cover and cook until the potatoes are done, stirring frequently.

**Shepherd's Loaf.**—Place seasoned chopped meat in a small bread pan and cover with seasoned mashed potatoes. Brush with egg and bake until well heated through. Turn out carefully on a hot platter and surround with buttered green peas.

#### Meal Planning.

In the ideal family where everyone eats all kinds of food and enjoys it, the meal planning is not such a complicated problem.

Where one does not drink coffee, another wishes some other grain drink, another milk, cocoa or chocolate, preparing just the drinks for the family is a morning's task. With the dozens of cereals on the market, many ready to eat, that problem need not bother. It is a good plan to alternate them so that there will be a variety. It is no more expensive to have five or six boxes going at a time than to have one kind and use up the entire box before buying another variety.

Toast is considered almost an indispensable breakfast dish, but even toast gets monotonous. Try having muffins of various kinds, waffles or rice. Toast may be varied by using a dash of cinnamon and sugar on buttered strips of hot toast or fried toast (called French), dipped in egg and milk. Piled hot ruffin fashion, they are both pleasing to the eye and make a change from the regular slices.

For dinner there is a wide range, depending upon the taste and pocket-book. Usually the people who have the most money to spend on food enjoy the simplest fare, for they know often by food experience what rich and heavy food will do to destroy one's health and digestion.

Meal planning is a woman's job. It is like housework—"powerful constant." In most homes the noonday meal is a light one, for the school and business worker finds it better to leave the heavy meal when there is more time and leisure to digest it. The luncheon is a simple meal. One may have soup, a dish of escalloped vegetable or other hot dish, a cup of tea or hot drink. If cool—iced drinks, which will be found sufficiently sustaining for the mid-day meal.

Many overparticular housewives waste valuable time in doing work which could be done well in half the time. Well-ironed clothing is always a joy to look upon, but hours in ironing may be saved by placing the sheet on the table or board and ironing small things upon it. The hems well ironed and sheet well folded will look as well when laid in the drawer as if every inch had been ironed. Much of the family ironing may be slighted in this way, giving time for more important work, such as reading the news of the day, keeping informed on the world's progress.

Frankforts sliced very thin and cooked in butter may be served with mayonnaise potatoes.

Nellie Maxwell

# Old Ironsides' Greatest Victory

"CONSTITUTION" AND "GUERRIERE,"

By ELMO SCOTT WATSON

Isaac did so man and rake her,  
That the decks of Captain Dacre  
Were in such a woful pickle  
As if Death, with scythe and sickle,  
With his sling or with his shaft,  
Had cut his harvest fore and aft.  
Thus, in thirty minutes, ended  
Mischief that could not be mended:  
Mast, and yards, and ship descended,  
All to David Jones' locker—  
Such a ship, in such a pucker!—Old  
Song.

During the present nationwide campaign to raise funds for the restoration and preservation of the historic frigate "Constitution," it would be singularly appropriate if this patriotic effort were crowned with success by August 19. For that is the 115th anniversary of Old Ironsides' greatest victory, the day when she fought the terrific engagement with the English frigate Guerriere off the coast of Nova Scotia, and "in one-half hour raised the United States to the rank of a first-class power." In all the brilliant record of this wonderful old warrior there is no incident more thrilling than the story of her duel with the proud ship which here

on her sails in letters red,  
Words of warning, words of dread:  
"All who meet me have a care!  
I am England's Guerriere!"  
On August 2, 1812, the Constitution, commanded by Capt. Isaac Hull, sailed from Boston in the hope of falling in with some of the British war vessels which were supposed to be lying in wait for American shipping along the Atlantic coast from Nantucket to Halifax. Hull was especially anxious to meet the Guerriere, commanded by Capt. James Richard Dacres, who had sent word to American commanders that his ship was "not the little belt" (a reference to the dispute between the two nations over who had been the aggressor in the engagement in which the American ship, President, almost destroyed the British ship, Little Belt, before war had been declared).

After cruising about in northern waters for more than a week, during which time he overhauled several small fry of British shipping, Hull, still seeking big game, finally turned Old Ironsides southward. About two o'clock on the afternoon of August 19 the lookout reported a sail on the horizon. Hull immediately gave chase to the stranger and at half past three discovered that it was a British frigate. Sailing to within a league to the leeward of the enemy, Hull shortened sail, cleared decks for action, hoisted the American flag, beat to quarters and bore down on the enemy to bring her to close combat.

Seeing this action the enemy ship also prepared for action and when the Englishman had hoisted three ensigns Hull saw to his joy that his adversary was the one ship he had been seeking, the Guerriere. Captain Dacres opened the engagement with a broadside of grapeshot, filled away and sent in another broadside on the other tack. On account of the distance which separated the adversaries, however, neither broadside took effect. For the next hour the two vessels maneuvered much in the manner of two boxers, each trying to get in a position to rake the other with its gunfire and at the same time avoid being raked. Finally the Guerriere began to draw off with the Constitution in close pursuit, trying to bring the fight to close quarters. At last about six o'clock in the evening the Englishman took a position that indicated he was willing to engage in a yard-arm to yard-arm fight and Hull closed in until the bows of the Constitution doubled the quarter of the Guerriere.

From the moment that the American ship had begun to close in on the enemy the fire of the English guns had begun to strike Old Ironsides. Lieutenant Morris, Hull's second in command, became impatient and, going to his commander, asked permission to open fire. "Not yet," was Hull's quiet response. Nearer and nearer the two warships drew together and again Morris repeated his request only to receive the same quiet "Not yet."

### Gentle Hint

Slowly he drew away from her. His arms dropped to his side. Suddenly his hands fixed themselves into a death clutch on the divan. She looked at him in surprise. Such a sudden change. He shook all over (the divan). His eyes bulged. His breath came in gasps. His scalp moved as though trying to crawl under his collar. His color faded and then came back. He abandoned. Slowly he relaxed, a peace-

ISAAC HULL

JAMES RICHARD DACRES

At last as the bows of the American ship drew alongside the enemy, Hull shouted "Now, boys, pour it into them!" Instantly Old Ironsides' forward guns, which had been double-shotted with grape and roundshot, poured forth a terrific volley which swept the Guerriere and bathed her decks in the blood of her men. But the men of the Guerriere had not been idle. The two ships were now within half a pistol shot of each other and the Englishman's guns were pounding the American vessel. But for every blow that he dealt he received two in return. Within fifteen minutes the Guerriere's mizzen-mast was shot away, her main yard, spars, sails and rigging were torn to pieces by the hail of metal from the Constitution. The Britisher brought up in the wind as the mizzen-mast gave way and the Constitution passed slowly ahead, poured in a tremendous fire, lured short around the bows of the enemy to prevent being raked, but fell foul of the Guerriere, her bowsprit running into the larboard quarter of the enemy ship. At this moment the cabin of the Constitution was set on fire by the forward guns of the Englishman but the flames were put out quickly.

As the two vessels lay locked for a moment, each side attempted to board the other. Fierce volleys of musketry amid the roar of the big guns aided to the horror of the scene. The Americans who were attempting to board the enemy were led by Lieutenant Morris, Master Atwyn and Lieutenant Bush of the Marines. Morris and Atwyn were severely wounded and Bush was shot down. Before the Americans could accomplish their purpose, the sails of the Constitution were filled and she shot ahead and clear of the enemy ship. As she did so the Guerriere's fore-mast went down, carrying with it the main-mast, leaving that proud ship a shattered wreck rolling in the trough of the sea.

Hull hauled off his vessel a short distance away, made hasty repairs on the rigging of his ship and at sunset bore down to a position which would enable him to rake the crippled Guerriere. But the Englishman was through. A jack that had been kept flying on the stump of the mizzen-mast was lowered as a signal of surrender. Hull sent Lieut. George C. Read to board the prize. As Read stepped on deck and asked for the commander, Dacres appeared. "Commander Hull's compliments and he wishes to know if you have struck your flag?" said Read. Dacres, calmly looking over the wreckage that surrounded him, replied dryly, "Well, I don't know; our mizzen-mast is gone, our mainmast is gone, and, upon the whole, you may say we have struck our flag." Read then offered the services of a surgeon or a surgeon's mate. "Well, I should suppose you had on board your own ship business enough for all your medical officers," said Dacres. "Oh, no," replied Read. "We have only seven wounded, and they were dressed half an hour ago."

One casualty which the Constitution had suffered but which Read did not mention was one illustrative of

ful expression on his face. He was silent for a moment. Then he arose, once more a man. She looked at him wondering, for she had never seen a man act thus before. "At last," he cried. "I have succeeded in yawning with my mouth closed."

**College "Wranglers"**  
Wrangler, literally a disputant in the colleges of Cambridge university, England, is a term now applied to a student who attains a place in the

those ludicrous incidents which so often accompany historic events. In those days the uniform of American naval commanders was an affair of much gold lace and buttons as to the coat, ruffled shirts and tight knee breeches. At the opening of the engagement Hull, after twice saying "Not yet," to Morris's request for permission to open fire, had finally given the word and as he did so he twice bent forward almost to the deck. When the smoke of that first thunderous volley cleared away it was discovered that Hull's energetic movements had split his tight breeches from waistband to the knee! But there was no time to change then and in this unbecoming costume he continued to direct his men throughout the battle.

The Constitution kept near her prize all night. At dawn the officer in charge of the Guerriere reported that she was filling with water and in danger of sinking. So Hull sent his boats to bring off the prisoners and the prize crew and by three o'clock in the afternoon the ship was deserted. She was too much damaged to be saved, so she was set on fire and fifteen minutes later an explosion that scattered blazing brands far and wide over the waters marked the end of "England's Guerriere."

Hull arrived in Boston on August 20 and reported his victory to the secretary of war. When the news spread it was received everywhere with the wildest demonstrations of joy, for it meant that England's reign as "the mistress of the seas" was beginning to wane. Hull was the hero of the hour, especially since his victory dispelled the gloom that had been caused by the surrender of his uncle, General Hull, at Detroit a short time before. The commander and his men were feasted at a great celebration in Faneuil hall. Hull was voted a gold medal by congress and \$50,000 in prize money was distributed among his men. Other cities honored him and the name of Isaac Hull has come down in American naval history along with that of John Paul Jones as one of our greatest naval heroes. Thereafter the Constitution was known as "Old Ironsides," and although she won other victories none was more brilliant than this one.

**Weakened on the Way**  
The vicar considered himself a very good preacher, and was always ready to hear people's opinions of his sermons. Meeting an old parishioner, he asked:  
"Well, Mr. Snooks, and how did you like my sermon yesterday?"  
"Ye see, parson," was the reply, "I haven't a fair chance with them sermons of yours. I'm an old man now, and by the time I manage to get to the church all the front seats are taken and I have to sit at the back. There's old Mrs. Smith and Mrs. O'Callagher's daughters and Bert Snow and all the rest of 'em sitting in front of me with their mouths open swallowing all the best parts of your sermon, and what goes down to me is purty poor stuff, parson, purty poor stuff."—LONDON TRUTHS.

first-class in mathematics at that university. The head wrangler used to be known as the "senior wrangler," but that distinction is now at an end, as the names are no longer arranged in the order of merit.

**Father's Position**  
A father is a member of the male species who is supposed to spend one-half his time doing the things his family wants him and the other half answering their complaints because he did it.—BALTIMORE SUN.

## Prices for Beef Cattle Highest

All Classes and Grades Have Participated in Advance Since 1920.

(Prepared by the United States Department of Agriculture.)

Beef cattle this season have sold the highest for the season since 1920 when prices were on a high level because of war inflation, according to a review of the spring cattle market issued by the bureau of agricultural economics, United States Department of Agriculture. All classes and grades of cattle have participated in the advance, the general price increase over last year and the five-year average ranging from 12 to 27 per cent.

The present comparatively high price level for the better grades of fed steers is unusual for this season of the year, says the bureau, and is attributed partly to the fact that receipts of all cattle at the principal cow-belt and eastern markets were 4 per cent smaller during the first four months of this year than during the same period last year. There was a considerably larger decrease at some of the markets, particularly those receiving a high proportion of fed cattle. The premium for weight also has been a factor in raising the average price for the better grades of fed steers.

**Slaughtering Was Less.**  
During each of the past five years production for the first four months exceeded that for the same period a year previous, but this year proved to be an exception. Beef produced from cattle slaughtered under federal inspection during the first four months of this year was 3 per cent less than was produced in the same period of 1926. Most of the decrease occurred in March and April. The live cost of these cattle to slaughterers for the four months averaged \$8.08 against \$7.39 in 1926, an advance of 8 per cent over last year, or 14 per cent over the five-year average. The long-time trend in cattle slaughter has been upward, especially the number of head slaughtered under federal inspection and the quantity of beef which moves into commercial channels.

The generally higher average prices for slaughter cattle during the past few years have been accompanied by increased total and per capita consumption of beef, indicating an increasing consumptive demand for this product. With total beef consumption increasing in population, with consumers adjusted to the heavy beef consumption of the last few years, and with the present trend of potential supplies downward, the outlook for the industry appears very favorable.

The strong demand for steer cattle the past spring was reflected in an increased movement of such cattle out of southern areas. During the first four months of this year, cattle receipts at southern markets increased 40,000 head or 28 per cent over the same period last year. Also the higher price for the lower grades of cattle has increased the receipts of such cattle at the small cow-belt markets. The decrease, while small as to total numbers, amounted to 17 per cent.

**Period of Overproduction.**  
The cattle industry for a number of years has been passing through a period of overproduction which has resulted in curtailment, liquidation, heavy market receipts, and consequently a high slaughtering ratio to numbers remaining on farms and ranges. This has temporarily increased the tendency to market cattle at younger ages, resulting in a more rapid turnover. With the present trend away from the production of aged grass steers our beef supply depends more on the feeder.

The higher price level for cattle may possibly be accompanied by some further culling and liquidation of range herds this fall, but we are approaching the end of the period of overmarketing and, except for forced marketings because of drought conditions, the number of cattle forced on the slaughter market will be limited. Prices in western areas have increased more proportionately than have prices at the central markets. Breeding animals and growing stock are in "strong hands," and with available pasture or range, excessive market supplies of range cattle for several years seem doubtful.

The total number of all cattle and calves in the 17 western states has declined about 1 per cent since 1920, and the total for the United States has declined 1½ per cent. While it is impossible to make any definite segregation between dairy and beef cattle, beef cattle in the West seem to have decreased fully 25 per cent during the past seven years.

**Carefully Inspect and Repair Farm Equipment**  
Much of the loss and annoyance from breakage may be avoided by carefully inspecting and mending weak parts of the farm equipment before the rush work begins. Inspect the binder and your other harvesting equipment now so repairs may be ordered for weak and broken parts early enough to avoid delay when you should be in the field. "A stitch in time saves nine," applies admirably to machinery repairs. Do the work as soon as possible if you didn't do it last winter when details of that sort should have been attended to.

## Standards for Honey Attracting Attention

Will Aid the Beekeepers in Grading Their Product.

(Prepared by the United States Department of Agriculture.)

All exhibits of honey at the Ohio state fair this year will be judged according to the United States standards for honey as given in the United States Department of Agriculture Circular 410-C, "U. S. Standards for Honey."

Such demonstrations of the use of the United States standards for honey, says James L. Hambleton of the division of bee culture investigations, will not only aid beekeepers in the work of grading their honey but will also give the public an opportunity to learn something of the work that is being done in standardizing food products. Only through grading to uniform standards is it possible for the consumer to know, when he buys honey or any other food product supposed to be of a certain quality, that he is getting that quality.

In addition to the grading rules, the circular contains much other information on grading and packing honey. The circular will be sent free on request to the Department of Agriculture, Washington, D. C.

Members of the Pan-American Conference on Standardization, which met at Washington during the Third Pan-American Commercial conference early in May, visited the exhibit and demonstration of the United States standard grades for honey prepared by the division of bee culture investigations, in collaboration with the bureau of agricultural economics, of the United States Department of Agriculture. This work was shown in connection with the exhibit of the bureau of agricultural economics in the new standardization building.

Much interest was manifested in this exhibit as a means of facilitating export and import trade in honey and as a basis for international standardization, as standard honey graders used in this work are now located in Berlin and London as well as in the export ports of the United States. Standard graders are also in use in New Zealand.

## Killing Potato Beetles by Using Poison Spray

Potato beetles multiply with such rapidity that the loss of a few days' time in getting at them with a spray may mean thousands to kill instead of tens. In view of this every grower should be prepared with spray materials to hold this pest in check. The following are well known and approved formulas for this purpose:

**A Sound Sleeper**  
Arsenate of lead one pound to 50 gallons water. Powdered arsenite of lead one pound, paris green one pound, hydrated lime one pound, and 50 gallons water. Calcium arsenate one pound, to 50 gallons water. Paris green one pound, hydrated lime one pound, and 50 gallons water.

The difference between sprayed and unsprayed potatoes is generally the difference between a good crop and no crop.

## Good Pasture Grass to Help Milk Production

Good pasture grass holds a place in the list of delicacies for dairy cows which no other feed can quite fill. It does have a wonderfully stimulating effect on milk production after a cow has gone through the winter on dry feed alone. However, the ability of grass to produce milk is generally overestimated, and a cow cannot maintain a heavy flow of milk on grass alone. Grass, and especially early grass, contains a high per cent of water and it is a physical impossibility for a cow to eat enough to supply nutrients for more than 25 to 30 pounds of milk a day. Cows giving more than this should receive grain in proportion to their production.

## Agricultural Items

You can prevent hog cholera by vaccination; you can't cure it.

The outlook for dairying is better than it has been for some years.

Where live stock is kept and manure is available, ten tons per acre as a top dressing to wheat will often double the yield.

To add strength to concrete, mix six and three-fourths gallons of water with a sack of cement, then add stone and gravel.

By rotating the garden insect pests do not trouble as much as when they are allowed to harbor from one year to another in old garden rubbish.

It's penny wise and pound foolish not to spend money in preventing losses from poor seed, insects, and diseases, unsystematic marketing, etc.

Sheep can be pastured on sweet clover alone as the only pasture or the only feed, though there will be some likelihood of sheep bloating when pastured in this way.

In feeding trials at South Dakota State college the feeding of ground barley was found to be the most efficient method of utilizing this grain as a fattening feed for pigs.

## Centenarian Last Man of Grand Army Post

Washington post, G. A. R., of South Boston passed out of existence, when its last surviving member, John Connors, died at his home at the age of one hundred one. A native of Ireland, he joined the navy before the outbreak of the Civil war, fought in the battle of Mobile bay, and remained in the service for many years. It is not extraordinary that a Grand Army post should come to an end through the death of all its members. There were many that have been so terminated, and in most of them the membership has been reduced to a handful. The Civil war ended 52 years ago, and that means an approximate age of eighty for even the youngest of the surviving veterans. But John Connors was close to forty years old at the end of the war, old enough to have been the father of some of the boys in blue. Even among his South Boston comrades there must have been some who were young enough to be his sons. Yet it was his fortune to outlive them all. To him fell the unexpected distinction of being the Last Man.—Providence Journal.

## A New Way to Make Jellies

Without Staining Fingers—Without Long Hours of Boiling—Without Depending Upon Berries or Fruit Being in Season.

One of the most interesting and yet one of the simplest new products in the food field is called minute jelly. It is pure fruit or berry juice already boiled down and concentrated. To this concentrated juice, fruit pectin in the right amount has been added. The pectin is that part of fruit which makes jelly "jell." It is as pure and wholesome as the fruit juices.

To make the jelly take the little bottle of concentrated juice, pour in a sauce pan, add water and sugar according to directions on the bottle and boil a few minutes. Then pour into jelly glasses and when it has become cold you have the most delicious pure fruit jelly you ever tasted.

A few bottles kept on hand, selected according to your taste for jellies, and you can make up a few glasses just as you want it. One small bottle makes two glasses of jelly. If you wish to try two bottles send us twenty-five cents and we will give you your choice of grape, mint, pineapple, orange, raspberry, strawberry or blackberry. Or four bottles—all different—for fifty cents. Address Department W-1, General Packing Corp., Cranford, New Jersey—Adv.

## Buried Like Royalty

At the burial of former mayor James Baker of Guildford, England, recently, his aldermanic robes were buried with him.

## For Love

He—"Sylvia's going to marry for love this time?" She—"Well, she can afford to retire."—Life.

## Sliding Scale

From a foreign paper comes the story that an American publisher called to Dean Inge: "Will you write your life? Offer two thousand pounds." The dean calmed back, declining the offer. The publisher then called: "Will you write life of Christ? Lower terms, of course."—Boston Transcript.

## BABIES CRY FOR "CASTORIA"

Prepared Especially for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups. Contains no narcotics. Proven directions are on each package. Physicians everywhere recommend it.

The genuine bears signature of

Chas. H. Fletcher

## "Only Girl's" Idea of Lover Not Flattering

District Attorney Wallace, discussing the punishment recently meted out to immoral plays, said at a luncheon in New York:

"These people expected praise and pelf. They got instead—well, what they got instead must have made them feel worse than the young bond salesman.

"The young bond salesman said nervously to a pretty girl at a dance: 'I'm all shot to pieces over Helen. Can't sleep or nothing. I'd give the world if I could find out whether she cares for me or not.'"

"Helen often speaks of you," said the pretty girl. "She calls you her 'good resolution.'"

"By gosh, but that makes me happy," said the bond salesman; and then he added, "I wonder what she means by that?"

"She tells me," laughed the pretty girl, "that she means you're always broke!"

## American Patents

Let anyone think Americans have got the limit with inventions, the United States is still issuing about 35,000 patents a year.

## Buried Like Royalty

At the burial of former mayor James Baker of Guildford, England, recently, his aldermanic robes were buried with him.

SLEEVELESS FROCK IN FAVOR; MILLINERY FOR MIDSUMMER

TO BE sleeved or to be sleeveless, "that is the question," and at present the sleeveless frock has taken a majority...

the now-so-fashionable broad-brim hat. Furthermore, the advent of these wide brims, some of which are enormous...

JUST THE THING FOR TENNIS

are red-headed. The vogue for enticing white with red is confirmed throughout sports modes.

of this picture. Not only is the use of ribbon pronounced, but a few exclusive French shapes hint at a return to favor of the upturned brim.

SOME MIDSUMMER HATS

fastening interprets the white-with-a-touch-of-color mode to the point of fascination. There is also a strong liking expressed for yellow with white.

likely she who is so fortunate as to acquire the original of this modish chapeau, will buy navy kidskin shoes and handbag to complete the color ensemble, according to latest style dictates.

New Antenna Is Aid to Reception

Cleaning Connections and Attention to Ground Wire Improves Set.

By DON C. WALLACE The tendency nowadays is to add tubes to the radio set. Sets are now using five, six or eight tubes with results.

Another form of improvement, which lessens the likelihood of stray noises and racket, is the thorough cleaning of all the contacts and connecting wires.

The ground connection should be thoroughly cleaned and tightened. When this has been done no one should be able to move the ground clamp, even if it is roughly jerked.

All of the foregoing is general. The real improvement will come when the antenna is improved. Dollar for dollar, there is nothing which will improve the volume, the clearness, and consistency of radio reception quite so much as a good antenna.

Many an otherwise good antenna is spoiled because the insulators have been in use for a year or more. A thin coating of soot and dirt has been formed. The texture of the insulators is often really changed as a result of air, heat and cold.

Radio dealers have found that deaf persons are often purchasers of radio sets. This can be more easily understood by the recent surveys made by experts.

Radio Beacons for Ocean Flights Seen Possible

This summer's onrush of nonstop flights over the Atlantic has revived the idea of establishing radio beacons across the ocean to make such air travel safe.

So great a radio authority as Dr. J. H. Dellinger, head of the radio laboratory of the United States bureau of standards, foresees this possibility.

Such a proposal, says Dellinger, "is entirely feasible, and while these beacon stations will not be established in mid-ocean this year or next, it is not unlikely that they will be constructed within ten years."

Transatlantic airplanes taking advantage of these directive radio beacons would have to be equipped with a radio receiving set operated by one dial, a visual indicating device for denoting when the aviator is traveling in a zone of safety as outlined by the double-beam radio waves, and a means of shielding the airplane engine ignition system so as to prevent interference with radio reception.

Esthonia's Radios Must Not Cause Interference

If the radio laws of Esthonia, that small country in the heart of Europe located between the Gulfs of Finland and Riga and bordered by Russia and Latvia, were enforced in the United States, a large number of the radio receivers now in use would be antiquated.

Lack of volume at the output does not always indicate battery weakness. It may be closely linked up with the failure of the audio amplifier tubes to do their customary work.

Many set operators take volume weakness as an indication that there is something wrong with their batteries. Often they will stop reception, and without taking the trouble to test the "B" battery, will switch on the charger.

Burnt Out Transformer May Still Be Utilized

In many radio junk boxes will be found burnt-out audio-frequency transformers. As it is almost always the primaries of these transformers which burn out, the instruments can be utilized very satisfactorily by connecting a 100,000-ohm fixed resistor across the primary terminals and a .001 to .01-mf. condenser between the "grid" and "plate" terminals of the transformer.

Radio an Aid to Those Who Are Hard of Hearing

Radio dealers have found that deaf persons are often purchasers of radio sets. This can be more easily understood by the recent surveys made by experts.

Radio dealers have found that deaf persons are often purchasers of radio sets. This can be more easily understood by the recent surveys made by experts.

CHICKEN POX IS VERY CONTAGIOUS

Chicken pox (sometimes called sorehead) is a very contagious disease. It makes its appearance in the form of irregular whitish patches or festers which later develop into brown spots or crusts (resembling a scab or sore) on the comb, wattles, eyelids, and around the beak and nostrils.

The best way to prevent birds from this as well as many other diseases, is to keep all roosting quarters clean, dry, and well disinfected. During the summer, when the disease is most common, mix 3 pounds of powdered sulphur with each 100 pounds of dry mash, allowing the birds to eat all they want.

If, however, a flock becomes infected in spite of all precautions, no time should be lost in treating the birds by applying a liberal quantity of carbolic acid to the affected parts.

So as soon as the disease makes its appearance spray with some good disinfectant (preferably some wood preservative or kerosene preparation), and scald the drinking fountains and feed dishes thoroughly with boiling water.

Poultryman Should Cull All Loafers From Flock

Because egg prices are going down and feed prices are going up, poultrymen cannot afford to keep "star-boarders," according to the poultry department at the New York State College of Agriculture, which says that about 25 per cent of the hens in the average farm flock in New York state are loafers that do not pay their own way, and at the same time eat food and occupy room in the poultry house that the laying hens should have.

For several years poultrymen from the college have spent much of their time during the summer months culling poultry for the farmers in New York state, and last year a total of 252,000 birds were handled. The men who do the culling are trained poultry judges, and the cost of the service to the farmer is about one and one-half to two cents for each bird handled.

On the basis of the number of birds actually discarded, the cost to the poultryman is about five or six cents a bird. The department says that it costs 20 to 30 cents a month to feed a hen, therefore, the saving for the farmer is evident.

Poultry Notes

Sell broilers and fryers promptly. Keep the poultry house clean and the birds are more likely to keep healthy. Chicks to be used as breeders or layers should be provided with plenty of green range. Chickens with good capacity and good appetites are the ones that fill 'be egg basket. Produce clean eggs so none will have to be washed to give a good appearance. Eggs that have been washed will spoil quicker than those that have not, so produce them clean at the start. A green feed is essential to egg production. To raise green feed successfully is one of the greatest problems of the poultryman who wishes to have eggs when the price is high. Market the surplus cockroaches or keep them separate from the pullets for most satisfactory growth. The young chickens should be kept comfortable. Get them on perches early, as crowding retards growth and causes crooked breast bones. A hen cannot very well feed mites at night, lice in the daytime and have much time to lay eggs. Sanitation, plus good feeding and management are all essential for best results.

Gentle Art of Lying Not Unknown in East

We are prone to give Westerners credit for telling the biggest yarns, but here's one from China which shows the lying is not confined to any particular location.

Two coolies were sunning themselves on the docks of Hongkong waiting for an English or American liner from which they could earn a few yen.

Wandering Alligator Finding an alligator in a rosetash in her garden, a Kansas City woman had what she described as the thrill of her life. The woman was clearing shrubbery from the rosetash when "something" snapped at her hand.

Tender, Aching, Perspiring Feet

Amazing Relief in 5 Minutes or Money Back.

Get a bottle of Moore's Emerald Oil with the understanding that if it does not put an end to the pain and soreness and do away with all offensive odors your money will be promptly returned.

Portraits Given to Post

Portraits of two Elizabethan women who were killed in action in France have been presented to Elizabeth Post No. 130 of the American Legion by their mothers.

Pistol Team's Challenge

The pistol team of the Pasadena (Calif.) post of the American Legion has issued a challenge to Legion marksmen throughout the country to a contest "under any conditions."

Business Combines Old

The origin of corporations has been attributed to the Romans, but they are said to have existed in Greece in 794 B. C., in Phoenicia 600 B. C., and in Italy 400 B. C.

The Last Survivor

Flyosan has killed all his millions of friends and relatives

No wonder he's blue. He knows he's next. Flyosan has killed every single fly and mosquito in thousands of homes this summer. Flyosan is the modern best way of fighting flying pests—not one at a time. Flyosan is the original liquid insect spray (non-poisonous). Use Flyosan itself, not one of its imitations. Flyosan not only kills all the flies and mosquitoes in your home but also rids it of the millions of deadly, disease-bearing germs which each one carries.

SICK WOMAN SOON RECOVERS

By Taking Lydia E. Pinkham's Vegetable Compound

"A neighbor advised me to try Lydia E. Pinkham's Vegetable Compound, which she said had helped her so much. So I bought a few bottles and tried it out. It sure helped me wonderfully. I felt much better. My work was no longer a dread to me. If I hear of any one who is troubled the way I was, I will gladly recommend the Vegetable Compound to them and I will answer any letters in regard to the same."

Woes of a Bank Teller Banking, as understood by some women, is a mysterious process, according to one bank teller. The other day a woman landed in her bank book filled with scratched pages and illegible scrawls.

The Idea! "Didn't that lawyer know you were a movie star?" "Hain't the least suspicion. Why, he offered to get me my divorce without any publicity."

Peterman's has the right insecticide for each insect. Flyosan, Liquid Spray—kills flies and mosquitoes. Peterman's Ant Food—exterminates ants. Peterman's Discovery, Liquid—exterminates bed-bugs. Peterman's Roach Food—exterminates that cockroach army. Peterman's Moth Food—protects against moths.

Selwood of Sleepy Cat

By FRANK H. SPEARMAN

WNU Service.

Copyright by Charles Scribner's Sons

CHAPTER XVII

The Death in the Cards. After supper James McAlpin, with some ceremony, drove Selwood's team—the rangy American bays—up to the hotel...

"To come around in the morning; I've worked about fourteen hours today." The waitress appeared perplexed. "I told him you wouldn't want to be interrupted," she said in an earnest whisper...

with Pardaloe and the Indian listening, he spoke. "We got away from here yesterday morning O K—after you turned back, Bob—Starbuck, Meg, and me, and we made time on the Medicine Bend trail till daylight..."

creek, close as we could to where they lay. We waded out and one of the boys took hold of their feet, and the other one and I took their shoulders together, so we got 'em out to the wagon the way they lay, 'n' got 'em into the wagon. So, John—well—here we are..."

here—men gettin' killed and that kind. 'Well, Christie, I says, 'it's partly the fault of the climate. You've got to remember it's mighty hard for a man to die here—I mean, to die the old, bed-fashion, natural death. This is a wonderful climate; it's given you, my girl, a fine husband. He came out here half dead, and if he hadn't come, he'd 'n' been dead long ago. And look at him now! Why, Christie, I says, 'if they didn't kill off somebody by main force once in a while out here, or bring in some more doctors to reduce the population, people would get so thick, they'd be laying out the mountain-tops for town lots."

"It Picked Me Up Like a Match."

something to work on. Now let's hunt up John, and drive that partnership nail into him while the iron's hot!" It was not, perhaps, most of all, the bribe of an already established and congenial business that held Selwood on the crest of the Rocky Mountain divide...

SOUTH-WEST NEWS NOTES

Stockholders of the Otis Farmers' Gin Company of Carlsbad, N. M., have ordered equipment for a new gin to replace the plant which was destroyed by fire last year. The city of Yuma has applied to the Arizona Corporation Commission for a certificate of convenience and necessity to operate a water, electric light and gas utility in Yuma.
