Development of Morning Glory Under Way

Heavy Machinery For Deep Sinking To Arrive Soon

To Sink Shaft on Mineral Hill Ore Body; Modern Equipment

New Road to Mine Being Built to Facilitate Hauling of Ore and Machinery; Latest Methods of Ore Extraction and Separation to Be Used; Work Started

MANY WEALTHY MEN INTERESTED

Gen. Mgr. J. A. Hamilton of Chattanooga To Take Up Permanent Residence in Patagonia and Keep Things Moving

The Morning Glory mine has installed a hoist, pumps and other machinery preparatory to sinking a deep shaft on the Mineral Hill ore body to a depth of approximately 600 feet. The old machinery has been overhauled and put into first class working order. The intention of General Manager J. A. Hamilton of Chattanooga, Tenn., is to block out an immense tonnage of ore in advance of the erection of a large mill. There is now blocked out in the Morning Glory mine one of the largest low-grade ore bodies in this section of Arizona, which could keep a mill running for a long time, but Mr. Hamilton is working along right lines in determining to uncover as much ore as possible before the mill is completed.

When it is remembered that the Big Jim ore horizon is but 300 feet from the junction of the Mineral Hill ore body and the Morning Glory vein, it may be realized what important results are to be expected in the new shaft being sunk. Large tonnage equipment has been ordered and the surface plant and foundations will be completed by the time the new machinery arrives here. The equipment on the way includes a full Diesel power plant, compressor units and such auxiliary machinery as hoists, motors, pumps, drill-sharpening machines and other things necessary to make a fully equipped mine.

A road is being built from the county highway to the mine to facilitate hauling of machinery and ore. The new road is being constructed along good grades on the hillside where danger from washouts is at a minimum.

Property Located Well

The Morning Glory ground is located in the center of what is, probably, the most highly mineralized area of Santa Cruz county. The Big Jim, Derrick-Patagonia, Amigo, Hardshell, Black Eagle, Hermosa, Trench, American, Hermosa, Mowry, Blue Nose Extension, Morning Glory, and others, are all within a small area, and all but three of them have produced much high-grade ore in the past. Some of them are now producing substantial tonnages of good-grade shipping ores.

Well Financed and Equipped

This property is expected to take its place as one of the large producers of this district now that financing has been completed and the proper equipment having been purchased and on its way to the mine. Those familiar with the Morning Glory property, its past record and future possibilities, are predicting a great future for it. With the introduction of selective flotation, the ore bodies now developed in the mine can be handled with profit.

State Mining Notes

Superior—Development work is in progress on the 800-foot tunnel on the Salem Lead-Gold Company property.

Benson—Work has started on the oil well eight miles west of here.

Holbrook—Reliance Oil Company receives string of tools.

Phoenix—Old gold mine in Paradise Valley reopened.

Pima—Underwriters Syndicate spud in well on Mary S. Mack farm.

Humboldt—Concentrating plant will be ready for operation September 1.

Ajo—Plans under way to resume work in Ben Lomond mine, 50 miles east of here.

Douglas—New lead smelter of the Phelps Dodge Corporation blown in this town.

Tombstone—Lead-zinc ore body has been reopened in Cave Canyon.

Yuma—Silver Mines Consolidated ships 300 pounds of cyanide precipitates to Selby smelter.

PRECIPITATION HERE THURSDAY WAS .97 INCH; TOWN FLOODED

Rainfall in town and adjacent mountains Thursday assumed virtual proportions of a cloudburst. While the precipitation in town was but .97 of an inch, according to J. R. Collie of the Corner Store, who keeps weather records for the U. S. weather bureau, the fall in nearby mountains must have been much more, as the town streets were flooded for several hours after the rain had ceased falling.

Just about the time the Sioux Indians christened President Coolidge "Chief Leading Eagle," he announced that he did not choose to lead the G. O. P. elephant.

PERSONAL AND SOCIAL

Our Golden Crust Bread is the best that can be made. You can get it fresh in Patagonia by 9 o'clock a. m. Made by HOME BAKERY, Nogales, Ariz.

Mr. and Mrs. William P. Greene of Cananea, Sonora, spent several days this week in Nogales. Mr. Greene is a son of Mrs. Charles A. Wiswall owners of the Cananea Cattle Co., of Cananea, and the Greene Cattle Co., of the San Rafael Valley, this county.

Elbert Kinsley of the San Rafael Valley was a Nogales business visitor Thursday.

RABY CHIX—White Leghorns (Tancred strain), Barred Rocks, R. I. Reds and Turkeys. Special low prices to broiler plants for August delivery. ENOCH CREWS, Seabright, Calif.

R. N. Keaton of the San Rafael Valley was a Nogales visitor Monday.

J. J. Sullivan of the San Rafael Valley is putting in a pit silo, which will be 30 feet in depth when completed.

Mr. and Mrs. Clyde Baldwin and Mrs. Bud Baldwin of the San Rafael Valley were Patagonia visitors Monday.

Mrs. Mattie Johnson of Canillo was a Patagonia visitor Wednesday.

Our Golden Crust Bread is the best that can be made. You can get it fresh in Patagonia by 9 o'clock a. m. Made by HOME BAKERY, Nogales, Ariz.

Mr. and Mrs. Ralph Zimmerman and the former's sister returned this week from Los Angeles where Mr. Zimmerman had been attending summer school at the University of Southern California.

Supt. J. J. Peterson of the Big Jim mine was a Nogales visitor Tuesday.

San Rafael Valley Notes

R. N. Keaton was a visitor Wednesday to Fort Huachuca.

Mr. and Mrs. Henry Woods and some friends from Tucson were San Rafael Valley visitors this week.

T. F. Heady, foreman of the San Helen Elliott, were valley visitors Wednesday. They also visited friends at Canillo.

Mrs. Bud Baldwin and Mrs. Jim Frazier visited the San Rafael ranch Wednesday.

Mrs. J. J. Sullivan and son were Patagonia visitors Wednesday.

Pat McCarty of Vaughn was a visitor last Friday at the McPherson ranch.

Troy Ramsey and son of Elgin were in the valley Tuesday.

Mrs. Rosie Buchanan and son of San Antonio, Texas, are here visiting her parents, Mr. and Mrs. J. W. Williamson.

Some Pajamas
A young man had a fine collection of African trophies, and among them a splendid buffalo head.

"What a wonderful head!" said a girl who had come to inspect them. "How did you get that? Was he very savage?"

"I had a deuce of a time with that 'buffalo,' replied the hunter. "Never had such a morning in my life. I 'hot' it in my pajamas."

"Good heavens!" murmured the girl. "How did it get there?"

P. D. LEAD SMELTER BLOWN IN

Douglas, Ariz., Aug. 18.—The new lead smelter of the Phelps Dodge Corporation, Copper veeen branch, will be blown in today, according to J. Owen Ambler, smelter superintendent.

Fires have been burning in the blast furnace and under lead kettles for the last several days, and more than 3 0tons of pig lead are being placed in the furnace preparatory to dumping the first charge and blowing in. The ore for the first charge came from the Shattuck and Copper Queen mines in Bisbee. This ore has been concentrated and sintered during the last few days, the sintering machine having been placed in operation Monday.

A large amount of Shattuck and Copper Queen ore and concentrates is now on hand in bins and stock piles, having been received for the last 60 days. All ore at the new smelter is sampled by the automatic mechanical sampler immediately upon arrival, the sampler being the first unit completed.

LOST AVIATORS NOT YET FOUND

Honolulu, Aug. 18.—The Aloha, winner of the second place in the Dole race, will leave immediately for a sea cruise in search of the Golden Eagle and Miss Doran. Martin Jensen, pilot, who left the hotel for the flying field at 11:30 Pacific time, and Paul Schluter, navigator of the great flight with him in the Aloha, will take off as soon as the flyers arrive at Wheeler Field for a cruise over island waters in the hope of obtaining some clue regarding the whereabouts of the Pedlar and Frost planes.

"There's nothing I wouldn't do to try to establish communication with the planes and help rescue the flyers," the Honolulu aviator said. Day dawned in Hawaii today with no trace of the missing planes, Miss Doran and the Golden Eagle.

The first move by officials of the army and navy will be an addition of airplanes to the flotilla of destroyers and submarines now combing the waters of the Pacific. All the navy craft engaged in the search reported by radio to Pearl Harbor at 7:30 this morning, Pacific time. Their reports were all the same:

"No sight of planes."

A. S. H. COMMISSION TRIES TO BOOST LEFEBVRE'S SALARY

Phoenix, Aug. 18.—After designating Monday, Aug. 22, as the date of its next meeting, the newly appointed Arizona State Highway Commission adjourned its initial session here late yesterday. Upon convening next Monday the commissioners will consider the budget for the department for the fiscal year 1927-28. Under the provisions of the highway bill creating the commission, it cannot make any expenditures until the adopted budget has been certified to the state treasurer and the state auditor.

The commissioners appointed E. L. Whitworth of Tucson, formerly southern district engineer, as motor vehicle division superintendent. W. W. Lane, chief engineer of the department, was reappointed by the commissioners.

It was stated unofficially that quite a heated discussion took place during the session over a proposed raise in the salary of State Engineer Lefebvre. The first day it was said that it was proposed that his salary be increased from \$6000 a year to \$7500, but the motion was voted down. On the final day of the session, however, the motion is said to have been reconsidered and to have carried by a vote of 5 to 3, although this rumor could not be confirmed, as the commissioners refused to be quoted on the matter of salaries.

It appears that the present coal strike has a rather poor publicity department.

NE WSIGNAL SYSTEM EVOLVED BY AVIATORS

Oakland, Calif., Aug. 17.—A new system of radio communication between the Dole racers and the battleships and land stations was evolved by Naval Lieut. Ben Wyatt. Instead of sending their call letters by continental code, as originally planned, the planes will send their starting numbers by a dash or a series of dashes, as the case may be.

MICKIE SAYS—

EVER SINCE TH' ANXIETY DAYS WHEN FOLKS FROM NIPPUR USED TO SLIP UP TO BAYLON TO BUY THINGS, THERE HAS ALWAYS BEEN SOME TRADING OUT OF TOWN, BUT NO LIVE STORE KEEPERS EVER QUIT THEIR ADVERTISING ON THAT ACCOUNT.

GEOLOGIST-MINING ENGINEER SAYS PATAGONIA HAS GREAT FUTURE AS MINING CAMP

W. E. Brooks, mining engineer and geologist, of Los Angeles, has completed a survey of the Harshaw mining district, particularly that part in the vicinity of the Big Jim, Trench, Morning Glory, World's Fair, Hardshell, etc. He was brought here by Pres. A. G. Keating of the Big Jim and Gold Dust mining companies to make a report of the district. Mr. Brooks has been here on several previous occasions in years gone by and says he has always had faith in the district and has had no reason to change his mind.

Mr. Brooks said that mining engineers generally are speaking more favorably of Santa Cruz county's mining properties, and he predicts that mining in this section is bound to receive support from investors. He stated, further, that he believed Patagonia will see a gradual but substantial increase in development of the mines from this time forward, as the mining fraternity has learned that ore here, formerly believed to be worthless owing to complications of metals and unknown methods for their treatment can now be mined at a good profit owing to new methods of separating ores that have been developed and perfected.

Mr. Brooks is of the opinion that there will be developed large tonnages of ore when sinking has been completed in properties already under development.

EARHART HOUSE BURNS

Wednesday morning about 5:30 fire destroyed the house on the former Earhart homestead on the Patagonia-Nogales road. The homestead was recently purchased by H. B. Thurber of the Rail-A ranch, which adjoins the Earhart property, and the house was used as a residence by Mrs. Grace A. Farrell, county school superintendent, who is at Flagstaff attending summer school at the Northern Arizona Teachers College.

No one was in the house at the time of the fire, but it is said that a party of tourists with a California license on their car had entered the house Tuesday night and were entertaining themselves with the piano and music in the house. It is presumed that one of the party threw a lighted cigarette or cigar on the floor and the fire resulted.

The furnishings were partially insured.

ART GOEBEL FIRST TO LAND AT HONOLULU IN DOLE RACE

Wheeler Field, Honolulu, Aug. 17.—Art C. Goebel, in the monoplane Woolaroc landed here at 12:23, Hawaiian time.

Goebel will get the first prize offered by Dole, the Hawaiian pineapple magnate.

San Francisco, Aug. 17.—Admiral Richard H. Jackson, commander in chief of the battle fleet, tonight directed five destroyers in addition to the Oraostook and Langley of the air squadron to search the Pacific ocean for two missing Dole flight airplanes.

The action of Admiral Jackson was radioed here. He is on the MacDonough, one of the rescue destroyers on the track of the planes about 600 miles from San Francisco.

Wheeler Field, Honolulu, Aug. 17.—With the arrival here at 2:20 p. m. today of Martin Jensen's Aloha and Art Goebel's Woolaroc at 12:23:33 p. m., two of the four planes to make successful hops in the \$35,000 Jas. D. Dole air race from Oakland, Calif., to Hawaii were at their goal. Though Jensen and his navigator, Paul Schluter, hopped off from the mainland at 12:34 p. m., San Francisco time, Tuesday, just two minutes before the Woolaroc left the ground, they arrived at Wheeler Field 1 hour 55 minutes 27 seconds in the wake of the big blue and yellow monoplane.

No reports of the Miss Doran and Golden Eagle, the other two planes that started for the islands, were received after they passed the Farallon Islands, just outside of San Francisco.

The monoplane Woolaroc, driven by Goebel, stunt flyer of the Hollywood movies, and navigated by W. V. Davis, U. S. Navy lieutenant, won the Dole first prize of \$25,000.

Other planes which started at about the same time that the Woolaroc did had not been seen since about 4 p. m., Pacific time, yesterday, but during the night two planes were heard passing over the steamship Manulani. They were not identified, and the location of the other contestant planes—the Golden Eagle and the Miss Doran—could not be stated.

The first to greet the victorious Goebel was Mrs. Martin Jensen, wife of the pilot of the Aloha, Honolulu's entry by popular subscription. Mrs. Jensen dived under the whirling propeller of Goebel's plane as it came to rest and kissed him several times. Even as she did so she inquired for news of her husband, whose fate and that of the others out over the Pacific then remained uncertain.

Jim Dole was caught in the crush as he went out on the field to greet the fliers. The prize donor smiled broadly as he gripped the hands of both men. "I'm mighty happy, boys, that you arrived safely," he said.

ELBERT H. GARY BURIED AT WHEATON, ILL.

Wheaton, Ill., Aug. 17.—The body of Elbert H. Gary, whose rise to fame from the position of an obscure county lawyer to one of the dominant figures in the world of finance and steel, arrived home today aboard a special section of the Twentieth Century Limited. An escort of motorcycle police accompanied the hearse to this city. Mr. Gary died at his New York City home Monday.

Simplicity will mark the funeral services tomorrow morning at the Memorial Methodist church at 10:30. The only music during the service will be furnished by the Oriental quartet of Chicago, who will sing "Lead, Kindly Light" and other of Mr. Gary's favorite songs.

Burial will be in the Gary mausoleum in the Wheaton cemetery, where the body will lie beside that of Mr. Gary's first wife.

"I AM THE COUNTRY WEEKLY"

Lest we forget the fundamental piece of the Country Weekly in the lives of any community, or misunderstand the rise or decline of a community because of the presence or absence of such an essential to modern progress, let us read and re-read the following characterization by Professor Bristow Adams of Cornell University, says the Research Department of the National Association of Farm Equipment Manufacturers:

"I am the Country Weekly. I am the friend of the family, the bringer of tidings from other friends; I speak to the home in the evening light of summer's vine-clad porch or the glow of winter's lamp. I help to make this evening hour; I record the great and the small, the varied acts of the days and weeks that go to make up life. I am for and of the home; I follow those who leave humble beginnings; whether they go to greatness or to the gutter, I take to them the thrill of old days, with wholesome messages. I speak the language of the common man; my words are fitted to his understanding. My congregation is larger than that of any church in town; my readers are more than those in the school. Young and old alike find in me stimulation, instruction, entertainment, inspiration, solace, comfort. I am the chronicler of birth, and love, and death—the three great facts of existence. I bring together buyer and seller to the benefit of both; I am part of the market place of the world. Into the home I carry word of the goods which feed, and clothe, and shelter, and which minister to comfort, ease, health, and happiness. I am the work of the week, the history of the year, the record of my community in the archives of the state and nation. I am the exponent of the lives of my readers. I am the Country Weekly."

Now every dealer in merchandise, whether pumps or pants, newcomer or old settler, should analyze his own contribution to his Country Weekly in the way of subscriptions and paid space. If he hasn't helped make that paper, he hasn't done his full duty by his community, nor has he reaped the full harvest from his selling efforts as a result.

TO ENCOURAGE AND STABILIZE MINING

Federal and state taxation of mines, improvement in the silver market, stabilization of the mining industry, workmen's accident compensation and improved methods of treating mining products will be considered at a joint convention of the western division of the American Mining Congress, the western regional section of the American Institute of Mining and Metallurgical Engineers and the governors of the American Silver Producers' Association, at Salt Lake City during the week beginning August 22. Several hundred delegates are expected to attend.

The Salt Lake meeting will bring together for the first time in a number of years the complete membership of the general tax committee of the American Mining Congress for the purpose of formulating definite recommendations to congress for tax revision as applied to the mining industry.

This convention will be of benefit to all branches of the western mining industry.

CRUELTY TO ANIMALS

To one of humane tendencies it is distressing to witness the utter disregard of animal suffering which is shown by thoughtless or vicious persons.

Acts of unnecessary cruelty to dumb animals are an indication of either a lack of education or a serious moral defect on the part of those who practice them. Children should be taught very early to treat animals with kindness. Without such teaching a child is very likely to develop cruel tendencies, particularly when the example of unfeeling indifference is set by older persons.

As a prominent educator recently said, any system of education which neglects training in the humane treatment of animals is falling in its duty.

We have noticed another thing: Any person who is cruel to animals will bear watching in all his other relations of life.

NEW WONDERS PROMISED

Scientific progress continues at a marvelous pace, so that we never know what new wonder tomorrow may bring forth. Two new marvels are promised soon, according to a press dispatch, which tell of airplane power of wireless, and a motor fuel formed by dissolving a chemical capsule in water.

Nicola Tesla, famed inventor of electrical and radio appliances, predicts that aircraft will be driven by light electric motors receiving their power from generating stations on the ground. He claims that he has demonstrated that power by wireless can be transmitted half way around the earth without losing as much as 1 per cent of its energy.

R. Rex Renee, wartime aviator, declares that he is having built an airplane capable of a speed of 375 miles an hour, in which he expects to make a round trip between New York and Paris in September, requiring but 24 hours. He claims to have the secret of the new chemical fuel which will make this speed possible.

Whether these two revolutionary innovations shall materialize remains to be seen, but their announcement in any event indicates the daring ideas which men are employing in their further conquests of the air.

ARTICLES OF INCORPORATION OF PIGGLY WIGGLY SOUTHWESTERN CO.

KNOW ALL MEN BY THESE PRESENTS: That we, the undersigned, do hereby associate ourselves together for the purpose of forming a corporation under the laws of the State of Arizona, and do hereby adopt the following Articles of Incorporation:

ARTICLE I.
The names, residences and post office addresses of the incorporators are as follows: A. E. Sanders, 724 Grand Ave., Nogales, Arizona, and Lelia Sanders, 724 Grand Ave., Nogales, Arizona.

ARTICLE II.
The name of this corporation is "PIGGLY WIGGLY SOUTHWESTERN CO."

ARTICLE III.
The principal place of business of the corporation shall be Nogales, Santa Cruz County, Arizona, but the corporation may have such branch offices within or without the State of Arizona, as may be hereafter established by the Board of Directors, and meetings of the Board of Directors may be held and any business transacted at any branch office.

ARTICLE IV.
The general nature of the business proposed to be transacted by the corporation is as follows:

(a) To carry on and engage in the business of establishing, maintaining and operating "Piggly Wiggly" stores; to buy, sell, trade and deal in, at wholesale and retail, groceries, provisions, food supplies, vegetables, fruits, kinds of grain, bran, hay, farm and dairy produce and products, articles and things for personal, domestic and household use, and generally all goods, wares and merchandise incidental to a general grocery, vegetable, food supply, meat, poultry, fish, game, produce and provision mercantile business; to buy, sell, store and deal in poultry, fresh, salt, pickled, smoked and cured meats, fish, oysters and sea food products, and to buy, sell, slaughter, pack, cure and otherwise handle poultry, cattle, calves, hogs, sheep and livestock generally, and to manufacture, sell and deal in, at wholesale and retail, the products thereof.

(b) To obtain register, purchase, lease or otherwise acquire, to hold, use, own, operate, develop and introduce, to sell, assign, lease, pledge, mortgage, grant or acquire licenses and franchises in respect of, and otherwise deal in and with or turn to account any and all copyrights, concessions, trade marks, formulae, secret processes, devices, trade names and distinctive marks, business systems, patents, patent rights, applications for patents, brevets d'invention, and all inventions, licenses, privileges, improvements and processes used in connection with or secured under letters patent or otherwise of the United States or of any other country, relating to or useful in connection with any lawful business of the corporation, including the good will of the same.

(c) To borrow and lend money, and to make, draw, accept, endorse, acquire, buy and sell all or any negotiable or transferable instruments and securities; to make and perform contracts, to purchase, lease, or otherwise acquire, own, exchange, sell, or dispose of, pledge, mortgage, hypothecate and deal in, real estate, any and all kinds of property, real, personal and mixed, and the good will, rights and property of any person, firm, association or corporation, and pay for the same in cash or stock, bonds or obligations of this corporation, or otherwise.

(d) To issue bonds, notes, debentures or other forms of corporate obligations, and to sell, pledge or hypothecate the same and to secure the payment thereof by mortgage or otherwise upon all or any part of the property of the corporation; to purchase, acquire, hold, sell and dispose of the stock, bonds or other evidences of indebtedness of any corporation, domestic or foreign, and to issue and exchange therefor its stock, bonds or other obligations.

(e) Without in any particular limiting any of the objects, or purposes or powers of the corporation, the business of purposes of the corporation shall be from time to time to do any one or more or all of the acts and things herein set forth, and all such other acts, things and business or businesses in any manner connected therewith, or necessary, incidental, convenient or auxiliary thereto, or calculated directly or indirectly to promote the interests of the corporation

or enhance the value of or render profitable any of its property or rights, as such a corporation may lawfully do; and in carrying on its business, or for the purpose of attaining the foregoing objects, to do any and all acts and things, and to exercise any and all other powers which a co-partnership or natural person could do and exercise, and which now or hereafter may be authorized by law, and either as or by and through principals, agents, attorneys, trustees, contractors, factor alone or in conjunction with others and in any part of the world; and in addition to have and to exercise all the rights, powers and privileges now or hereafter belonging to or conferred upon corporations or organized under the provisions of the law authorizing the formation of such corporations.

ARTICLE V.
The authorized amount of the capital stock of this corporation shall be Two Hundred Thousand (\$200,000.00) Dollars, divided into ten thousand (10,000) shares of common stock at the par value of Ten (\$10.00) Dollars each, and one thousand (1000) shares of preferred stock at the par value of One Hundred (\$100.00) Dollars each.

The holders of the preferred stock shall be entitled to cumulative dividends thereon at the rate of Eight (\$8.00) Dollars per share, or eight per centum of the amount of par value for each and every fiscal year of the life of the corporation and no more, payable out of any and all surplus or net profits, quarterly, half-yearly or yearly, as and when declared by the Board of Directors, before any dividends shall be declared, set apart for, or paid upon the common stock of the corporation. Said dividends on the preferred stock shall be cumulative, so that if the corporation shall fail in any fiscal year to pay such dividends on all of the issued and outstanding preferred stock, such deficiency in the dividends shall be fully paid, but without interest, before any dividends shall be paid or set apart on the common stock. Subject to the foregoing provisions said preferred stock shall not be entitled to participate in any other or additional earnings or profits of the corporation. The owners or holders of preferred stock shall have no voting powers whatsoever, nor shall they be entitled to notice of any meeting of stockholders of the company.

In the event of the dissolution or liquidation of the corporation, or a sale of all its assets (whether voluntary or involuntary) or in event of its insolvency or upon any distribution of its capital, there shall be paid to the holders of the preferred stock the par value thereof, to wit, One Hundred (\$100.00) Dollars per share, and the amount of all unpaid accrued dividends thereon, before any sum shall be paid or any assets distributed among the holders of the common stock; and after the payment to the holders of the preferred stock of its par value and the unpaid accrued dividends thereon, the remaining assets and funds of the corporation shall be divided among and paid to the holders of the common stock according to their respective shares.

The Board of Directors may in their discretion declare and pay dividends on the common stock concurrently with dividends on the preferred stock, for any dividend period of any fiscal year when such dividends are applicable to the common stock; provided that all accumulated dividends on the preferred stock for all previous fiscal years and all dividends on the preferred stock for previous dividend periods for that fiscal year shall have been paid in full.

The whole or any part of the preferred stock shall be subject to redemption at One Hundred Ten (\$110.00) Dollars per share and accumulated dividends thereon at any time after one year from the issue thereof, at such time or times and in such manner as the Board of Directors shall determine.

Upon subscription therefor said capital stock shall be paid into the corporation in such manner and upon such terms as the Board of Directors may fix in cash, services, or by the sale, transfer or assignment to the corporation of property, property rights or interests therein, real, personal or mixed for the uses and purposes of the corporation, and in payment for which, shares of the capital stock of the corporation may be issued, and such stock so issued shall thereupon and thereby become and be fully paid up and non-assessable; and in the absence of actual fraud in the transaction, the judgment of the Board of Directors as to the value of the services rendered or property purchased shall be conclusive.

ARTICLE VI.
The time of the commencement of this corporation shall be the date of the filing of its articles with the Corporation Commission of the State of Arizona and the recording of same in the office of the County Recorder of Santa Cruz County, Arizona, and the termination thereof shall be twenty-five years thereafter, with the right in the corporation to renew its charter for an additional period of twenty-five years as now provided by law.

ARTICLE VII.
The management and conduct of the business, property and affairs of the corporation shall be vested in and conducted by a Board of Directors of not less than three (3) nor more than seven (7) persons, and all directors, except in case of vacancies, shall be elected at the annual meeting of stockholders, except the first board, which is chosen as in these articles hereinafter set forth. The officers of the company consist of a President, Vice-President, Secretary and Treasurer, and such other officers as the Board of Directors shall deem expedient, and all shall be elected or appointed by the Board of Directors. Any two or more officers, the duties of the incumbent of which are not inconsistent, may be held by the same person. Both the officers and directors shall hold their offices for the period of one year from and after election and qualification and until their successors are elected and qualified, unless removed by the board. The directors shall have the right to fill any vacancy occurring in the board by death, resignation, or otherwise and the person or persons elected to fill any such vacancy or vacancies shall hold his office until the

next regular meeting of stockholders.

ARTICLE VIII.
The regular annual meeting of the stockholders shall be held at the principal office of the corporation on the third Monday in January of each year, commencing with the year 1929.

ARTICLE IX.
The incorporators shall name the persons who shall constitute the first Board of Directors and when so selected by the incorporators said members of the board shall serve until the first annual stockholders' meeting and until their successors are elected and qualified.

ARTICLE X.
The Board of Directors shall have the power to make and alter the by-laws of the corporation; to fix the amount to be reserved as working capital, and to authorize and cause to be executed mortgages, debentures and other obligations which shall be liens upon the property and franchises of the corporation, and in general to exercise all the powers and authority of the company not expressly withheld from said board by law, or by these Articles of Incorporation, or by the affirmative action of the stockholders.

ARTICLE XI.
The stockholders and members of this corporation and their private property shall be exempt from any liability for the debts of this corporation.

ARTICLE XII.
The indebtedness of this corporation shall at no time exceed the sum of One Hundred Thirty-three Thousand, Three Hundred Thirty-three and 33/100 (\$133,333.33) Dollars.

ARTICLE XIII.

Of Inestimable Value
The modern, well-appointed funeral home that we place at the service of those we serve is of tremendous value in the majority of cases.
No ordinary home is suited for the exacting requirements of a funeral service, and hence the funeral home is greatly preferred. There is no charge for its use; it is an integral part of our service.

Present-day smokers find their sheerest enjoyment in Camels

THE people of this age spend millions for the good things of life. And they place Camel first among cigarettes. Modern smokers make money, but when they spend it they insist on quality, and more people today buy Camels than ever bought any other cigarette. Camel value has won the modern world. Money cannot buy choicer tobaccos, nor a more glorious blending. That's why increasing millions in the modern age single out this famous smoke as their favorite. You, too, will find it yours.

"Have a Camel!"

© 1927, R. J. Reynolds Tobacco Company, Winston-Salem, N. C.

He Was a Big One
My knees shaking, I rang the bell. When the door opened, there stood the biggest man God ever made, and right behind him was a man twice as big!

Have you heard the great song hit entitled: "He rowed his girl upstream and paddled her back?"

Tex Rickard is overlooking something by not signing up Almee and Mother Kennedy for a 10-round argument.

"Ultimately," says a critic, discussing Londoners' preference for riding instead of walking, "legs will merely be ornaments." But only some.

She—"I can tell a lady by the way she dresses. Can't you?"
He—"I never watched one dress."

NOGALES HIGH SCHOOL HEAD TO TEACH IN CALIFORNIA

Nogales, Aug. 13.—A. J. Mitchell, principal of the Nogales High school for the past several years, wired his resignation to Supt. Frank Rose, in which he stated he had accepted a position in a junior college in California for the next school year.

Mr. Mitchell was one of the most popular young men of Nogales and was a member of the American Legion, Masonic Lodge, and the Hiram Club. He was interested in all civic matters and took active part in them. Mr. Mitchell attended the summer school at the University of Southern California, and is visiting relatives in Los Angeles with his family at Long Beach.

A. N. G. TO HOLD ANNUAL DANCE AT AZTEC CLUB

Nogales, Ariz., Aug. 13.—The annual dance of the 158th Infantry, A. N. G., will be held in Nogales, Sopora, Saturday night at the Aztec Club. Captain Ed Reeves, commander of Company A, manager of the Aztec, will furnish plenty of entertainment for the attending officers.

A cordial invitation is extended to civilians of the county to be present Saturday night.

INYO COUNTY BANKERS SHORT MORE THAN A MILLION

Los Angeles, Aug. 17.—State Bank Supt. W. C. Wood announced the discovery of an additional shortage of \$430,000 in the affairs of Wattersson brothers, Inyo county bankers, who already are charged with the embezzlement of \$800,000 from their five suspended banks.

The shortage was in the funds of the Owens Valley Irrigation district.

ARMOUR HEIRS GET \$25,000

Chicago, Aug. 17.—The wealth of J. Ogden Armour, once considered so vast that he was reputed to be one of the richest men in the world, was a matter of conjecture at the time of his death.

The Chicago Herald and Examiner said the packer was a victim of the war and lost so heavily that his heirs would share in an estate worth less than \$25,000. He was once worth \$150,000,000.

Mr. Armour died August 16, in London, Eng., from an attack of typhoid fever.

THE METAL MARKET

New York, Aug. 18.—Copper easy; electrolytic, spot and futures, 13.25c. Tin, easy; spot and nearby, \$63.75; Oct., \$63.62½. Iron, steady, unchanged. Lead, steady; spot, 6.75c. Zinc, quiet; East St. Louis, spot and futures, 6.37½c. Antimony, spot, 11.50@11.75. Bar silver, 54 5/8c; Mexican dollars, 41 1/8c.

Supervisor Hugo W. Miller to Texas County Supervisor Hugo W. Miller, assayer, of Nogales, and family are on their way to Ballinger, Texas, for a six weeks' vacation. Mr. Miller will attend the national rifle shoot at Camp Perry, Ohio, following his visit in the Lone Star state.

Increase in Julian Oil Overissue. Los Angeles, Aug. 17.—The Express says examination of permits issued by the corporation commission shows a total of Julian Oil overissue of 5,233,000 shares, or 1,000,000 more than previous estimates.

Snappy Stuff

Miss Constance Pelton of Evanston, Ill., threw ink on a man who peeped into her window, and he was identified by the stains and arrested.

Ronald Claven of Cardiff cut off his wife's ear when she scolded him for making too much noise.

Miss Elizabeth Koren of Lake Forest, Ill., walked two miles in her pajamas before she woke up.

Bert Cells of Paris, who claimed to be a "Messiah," was adjudged insane upon petition of his wife.

A boy baby born to a woman in Budapest has a third arm growing from his left shoulder.

Roscoe Winz of South Carolina made a quick 50-mile trip to Charleston to get his marriage license corrected so as to wed on the day set.

Franoise Delaine, a Paris waiter, left an estate worth \$500,000, made from tips given by patrons.

After presenting a barmaid with a beer mug filled with jewels, Count Otto Roesechen of Dresden was declared insane.

Henry Shippen of St. Paul, after his store had been robbed three times, hung up a sign which read: "Burglars, your welcome is worn out."

Mrs. Hannah Cort, wife of a miner at Durham, Eng., has given birth to her seventh pair of twins, and has a total of 29 children.

It looks as though the opposing generals in the next war may be General Ford and General Motors.

Even actors will admit that a hiss from the audience is not so disconcerting as one from a colloping tire.

Anyway, Darius Green made the first non-flight stop.

"We" Covered by Insurance

Map Shows Route of Lindbergh's Three-Month's Cruise Over Forty-eight States and Seventy-five Cities

NEW YORK—Colonel Charles A. Lindbergh may be one of the most daring aviators in the world, but that does not mean that he is not also one of the most careful and conservative. For, according to Harold Guggenheim, President of the Daniel Guggenheim Fund for the Promotion of Aeronautics, Inc., under the auspices of which "Lindy" is making a three-months flight into every State in the Union, the Colonel and his plane have been completely covered by insurance.

Four policies aggregating \$150,000 have been written. The Independence Companies of Philadelphia issued three policies, insuring the plane for \$15,000 against destruction by fire, \$10,000 for property damage and from \$10,000 to \$100,000 against public liability. The life of the Colonel has been insured by the United States Life Insurance Company in favor of his mother for \$25,000.

Thus "We" have been entirely covered, except against theft. Airplanes can, of course, be stolen, but the risk of separating the flying Colonel from his machine even in

NEWS REVIEW OF CURRENT EVENTS

Sacco and Vanzetti Given Twelve-Day Reprieve—Gen. Wood's Death.

By EDWARD W. PICKARD

SACCO and Vanzetti, who were to have been executed August 11, were granted 12 more days of life by Governor Fuller of Massachusetts, after Justice Holmes of the United States Supreme court and Judge Anderson of the Federal Circuit court had denied appeals for a writ of habeas corpus on the ground that they had no right to issue the writ unless the case was without jurisdiction. The reprieve was given on the condition that the approval of the state executive council in order to allow a ruling on a writ of error by Justice Sanderson of the state Supreme court which, if approved, would take the case to the full bench of the Supreme court. Celestino Madellos, sentenced on another murder charge to die at the same time, was included in the reprieve. Justice Sanderson let the matter go to the full court.

It is to be hoped by all right-minded Americans that this new delay in the leisurely course of justice was not due in any way to the noisy, violent demonstrations which radicals and sentimentalists have been staging in nearly all parts of the world. That the bombs, threats and sloppy appeals of those people, who are certainly misinformed, to say the least, could have any influence on our courts and governors would be humiliating indeed. Meetings of protest against the execution of the condemned men were held, or attempted to be held, every day in Boston, New York, Chicago and other American cities and also in cities in Europe, and South America. Hostile mobs in various places threatened American embassies and consulates, and in Casa Blanca, Morocco, a gang of radicals tore down the American flag, desecrated it and burned it. The police, here and abroad, did what they could to break up these demonstrations and many arrests were made. Congressman Johnson of Washington, chairman of the house immigration committee, warned all aliens domiciled in this country that if they partook in anti-government demonstrations they would be liable to deportation under the act of 1919. Although President Coolidge has more than once let it be known that he does not consider he has any right to intervene in the Sacco-Vanzetti case, he was again asked to do so in a telegram from Victor L. Berger, Socialist congressman from Wisconsin.

ONE of America's very best soldiers and citizens and its most eminent colonial administrator passed away when Maj. Gen. Leonard Wood, governor general of the Philippines, died suddenly in a Boston hospital following an operation for a tumor in the skull. On Tuesday he was buried, with full military honors, in Arlington National cemetery among the dead members of the Rough Riders whom he led so gallantly in the Spanish-American war.

Born in New Hampshire in 1860, Leonard Wood was graduated from Harvard medical school and in 1885 entered the army as a contract surgeon. His rise thereafter was swift and spectacular. While serving with General Miles he captured Geronimo, the notorious Apache, and won the congressional medal of honor. When the war with Spain broke out he was made colonel of the Rough Riders recruited by Theodore Roosevelt and was promoted to brigadier general. As military governor of Cuba he did such excellent work that the islanders will ever revere his memory, and already they are preparing to erect a monument to him. President McKinley made Wood a major general in the regular establishment, and previous to the World war he was the most vigorous proponent of preparedness. When America entered the war, General Wood trained the Eighty-ninth division with characteristic skill and

thoroughness, but President Wilson and Secretary Baker did not permit him to go to France as its commander. Instead he was kept in this country except for one observation trip to Europe. In 1920 he was a popular but unsuccessful candidate for the Republican Presidential nomination. President Harding appointed him governor general of the Philippines, and he held that troublous post until his death, administering the affairs of the islands with the greatest ability and firmness in the face of the continuous opposition of the native advocates of independence and of a change in the form of government.

THAT President Coolidge meant his "do not choose" to be a positive declaration of a renomination is now accepted by nearly every one, but some of his strongest supporters still have hope that he can be successfully "drafted." Senator Simeon D. Fess of Ohio, who himself has been mentioned as a likely possibility for the nomination, visited the President in the Black Hills and pleaded with him not to make his decision irrevocable.

"If they can't get along without me now, what will they say four years from now?" the President replied, according to Senator Fess.

Mr. Coolidge reiterated his thought that "this is not a one-man country," and gave Mr. Fess the impression that he wanted to be relieved of the burdens of the office.

Senator Fess told the President that the logic of the situation called for his nomination by the convention, and said he believed the convention would seek to draft Mr. Coolidge.

"Don't echo that sentiment," the President replied, according to Senator Fess.

Whatever the attitude of the President, Ohio will instruct her delegation for Coolidge or nobody, the senator said.

On Wednesday Mr. Coolidge went to Rushmore mountain, on the face of which Gutzon Borglum is to carve the heads of Washington, Jefferson, Lincoln and Roosevelt, and dedicated it as a national monument, delivering an address on "The Spirit of Patriotism."

VICE PRESIDENT DAWES, in his address at the dedication of the Peace bridge between Buffalo and Port Erie, Ontario, created something of a sensation by his comments on the recent futile naval disarmament conference. Though he said the party was not altogether a failure, he plainly indicated his belief that the inability of the American and British delegates at Geneva to agree was due to insufficient parliamentary preparation and the preoccupation of the conferees with the needs of their own countries. His implied criticism of the American delegates was resented by administration officials in Washington.

Secretary of the Navy Willbur conferred with the President and it was stated that they saw no need for radical change in the administration's naval policy because of the failure of the Geneva conference. This policy is the completion of the moderate building program determined upon long before the conference at Geneva was called, and now to be carried out by congress as if this conference had never been held. The President sees nothing alarming in the situation. He does not think the Geneva conference will make an increase over this five-year program necessary. Consequently, there is a prospect of another contest in congress next winter between those who approve this moderate program and the advocates of a bigger navy.

WITH about a dozen planes almost ready for the race from California to Honolulu in competition for the Dole prize of \$35,000, the flight committee and the Department of Commerce recommended that the start be postponed for not more than two weeks because some of the planes and crews were believed to be not yet properly equipped or qualified. The Honolulu committee vetoed the postponement, but all the pilots signed an agreement not to start before noon of August 18. The demand for better preparation was partly due to the death of two contenders, Lieuts. George W. D. Covell and Richard S. Waggoner of the navy, when their transoceanic mount crashed near San Diego and burned.

SUIT has been filed in Cleveland against the Brotherhood of Locomotive Engineers, alleging that notes, properties and securities "of little or no value" had been "unloaded" by the Brotherhood of Locomotive Engineers Co-operative bank there on the Brotherhood Investment company, the holding company of all the brotherhood's financial undertakings.

The suit, brought by two stockholders of the investment company, asks for an accounting of all profits made by the bank in its dealings with the investment company, and that all transactions be declared null and void which resulted in loss to the investment company.

ASSISTANT SECRETARY OF THE TREASURY LOWMAN announces that the treasury's plans for the resumption of the manufacture of medicinal whisky this fall have been abandoned, because there is no shortage now and supplies in government warehouses should last for seven or eight years. Although no recent gauge of the amount of whisky actually on hand had been taken, it is estimated that at least 20,000,000 gallons of aged whisky is now safeguarded in bonded warehouses. Another 10,000,000 gallons of brandy and other medicinal beverages are available for prescription use. The withdrawals during 1926 were 1,889,338 gallons.

STANDARD OIL COMPANY of New Jersey got ahead of all other similar concerns the other day when its president signed an agreement with the German dye trust for the mutual exploitation and development of patents. The dye trust owns the Bergius process for making crude oil and naphthalene from coal and lignite. The products of this process, it is expected, will be on the market soon. Also, the chemists predict that the by-products will yield rich returns. Although the details of the agreement were carefully guarded, there is a conjecture that many millions of dollars will flow from the United States to the fatherland as compensation for the dye trust's giving the Standard Oil the use of its patents.

KING FUAD of Egypt, on his way home from England, stopped in Rome for a visit and achieved the distinction of being the first sovereign of a non-Christian country to be formally received in private conference by the pope. Moreover, Pius XI decorated Fuad with the order of the Golden Spur, and the two exchanged miniature oil portraits of each other. The pope sent an elaborate escort for Fuad, but the latter, who had been the guest of the Italian government, had first to move to a hotel.

RESUMPTION of military operations in the Chinese civil war were seen in the mobilization by the Christian general, Feng Yu-shiang, of 50,000 of his best troops on the border between Honan and Shantung provinces. He plans a flank movement against the northern troops controlling Shantung.

Seemingly the Japanese have failed to force a compromise between Gen. Chiang Kai-shek, the Nanking commander of Nationalists, and Marshal Chang Tso-lin. A Shanghai correspondent says: "Since the Japanese are polling the entire Shantung railway for the obvious purpose of blocking a movement northward, complications are almost inevitable, particularly since General Chiang already has declared his intention of treating the Japanese troops the same as the northern militarists if the Japanese try to interfere. General Chiang recently seized several shipments of German war supplies intended for Marshal Chang."

INDIANA wets rejoiced when Rev. E. S. Shumaker, superintendent of the state Anti-Saloon league, was adjudged in contempt by the state Supreme court and was sentenced to 90 days on the state farm and fined \$250. Jess E. Martin, an attorney for the league, also was found guilty of contempt, but was not sentenced, being absent from the state. Legal steps to save Shumaker from serving his sentence were taken at once. The prohibitionists of the state and some ministerial organizations rallied to his support with offers of sympathy and money.

The KITCHEN CABINET

DELICIOUS SALADS

There is no time of the year when salads are not enjoyed. When the appetite is not so keen the crisp, fresh greens, vegetables and fruits are most welcome.

A dish of salad is like the soup kettle—almost anything edible may go into it. One that is both attractive and tasty, is:

Stuffed Tomato Salad.—Remove the centers from nice ripe even-sized tomatoes and chop the pulp, mix with equal parts of cucumber cut into small cubes and season with a tablespoonful or more of chopped onion. Fill the shells and top with a large spoonful of mayonnaise dressing. Sprinkle over the dressing a bit of shredded green pepper and serve the tomato cups on a lettuce leaf.

Asparagus Salad.—Arrange a few tips of asparagus which has been marinated in French dressing in a ring of green pepper. Serve with a spoonful of mayonnaise dressing on the lettuce which holds the asparagus.

Cucumber Jelly.—Cut peeled cucumber and tomatoes into dice, saving the juice. Dissolve half a package of gelatin in two cupfuls of the liquid; add when dissolved to the diced vegetables, stir until well mixed, pour out to chill. Cut into cubes and serve in tomato cups. Juice added to the liquid will improve the flavor. Serve with mayonnaise dressing.

Lettuce and Peanut Salad.—Chop fresh peanuts using one-half cupful for four salads. Sprinkle over crisp fresh lettuce with one or two green onions finely sliced. Serve with a highly seasoned French dressing.

Peas, Pickles, Peanut Salad.—This salad is prepared, using equal parts of peas and peanuts and one-half as much finely sliced and chopped sour pickle. Serve on lettuce with a good boiled dressing.

Pear and Pepper Salad.—Cut into bits two or three ripe pears. Marinate with French dressing one finely diced apple and one green pepper cut into shreds. Mix with the pears and add a cupful of pecan or walnut meats. Serve on lettuce with a good mayonnaise. This salad is also most tasty served in nests of watercress.

Good Things to Eat. We really do not know how to cook vegetables unless we can make them both edible and attractive; not unless we can conserve every fraction of their food value and are so familiar with their composition that we can develop it by cookery. The really efficient cook wastes nothing—neither the vegetable itself, the water in which it is cooked nor the parings or tops.

Chicken Soup With Vegetables.—Peel a pint of small onions and cook until tender in very little water. Line a soup tureen with thin slices of toast, cover with the cooked onion, add one cupful of cooked peas and a quart of chicken stock. Serve at once.

Chicken a la Reine.—Clean, dress and truss a fowl as for roasting. Rub it well with onion or garlic. Place in a baking pan with one-half cupful of good stock, add a sprig of parsley, a bayleaf, a blade of mace, and three small onions tied together. Add one-half cupful of cooked rice and cook slowly in a moderate oven until the fowl is cooked. Remove the herbs and onions and serve with the broth slightly thickened.

Corn Custards.—Mix one cupful of grated corn with three slightly beaten eggs, add one-half cupful of milk, one-half teaspoonful of salt, a teaspoonful of onion juice, and a few dashes of paprika. Put into small molds and steam, covered with buttered paper. Cook twenty minutes and serve with a tomato sauce.

Bourgeois Eggs.—Cut thin slices of bread, spread with butter and sprinkle generously with grated cheese. Beat up eggs enough to cover the toast well, add salt, pepper and a pinch of grated nutmeg; pour over the bread, which is arranged on a platter. Set in a moderate oven until the eggs are cooked. It is wise to put a good platter into a dripping pan of hot water.

Squash en Casserole.—Take two and one-half cupfuls of cooked squash, add three-fourths cupful of thick stewed tomato, two tablespoonfuls of butter, one and one-half teaspoonfuls of salt, one tablespoonful of grated onion, one-half cupful of chopped meat, fish or nuts, mix well and cover with three-fourths cupful of buttered crumbs. Bake in a hot oven until well browned. Serve from the dish.

Roast Beef With Mexican Sauce.—Reheat cold roast beef, cut very thin in the following sauce: Cook one onion finely chopped in two tablespoonfuls of butter for five minutes. Add one red and one green pepper chopped, one clove of garlic also chopped, and two tomatoes cut into pieces. Cook fifteen minutes. Add one teaspoonful of Worcestershire sauce, one-fourth teaspoonful of celery salt and salt to taste.

Old King Thunder had been sleeping peacefully back of the clouds for days and days and weeks and weeks and even months and months. Suddenly he woke up with a start. "Crash!" said he, "I'm wide awake all of a sudden."

"Dear me, what a long sleep I have had. I really feel ready for a good time now."

"How about it, old Queen Thunder—shall we have a frolic?"

And then such a loud rumble of thunder was heard down on the earth. For old King Thunder roared with delight when he first woke up, and as he woke up old Queen Thunder she roared, too, when she answered him:

Daddy's Evening Fairy Tale

BY MARY GRAHAM BONNER

KING AND QUEEN

Old King Thunder had been sleeping peacefully back of the clouds for days and days and weeks and weeks and even months and months. Suddenly he woke up with a start. "Crash!" said he, "I'm wide awake all of a sudden."

"Dear me, what a long sleep I have had. I really feel ready for a good time now."

"How about it, old Queen Thunder—shall we have a frolic?"

And then such a loud rumble of thunder was heard down on the earth. For old King Thunder roared with delight when he first woke up, and as he woke up old Queen Thunder she roared, too, when she answered him:

"I'm glad you woke me up, old King."

The Thunder King and Queen always speak at the top of their lungs. They always want to make up for lost time, and they always call each other loud.

They like that. "Well," said old King Thunder, "we'd better be off on our frolic."

"First of all, though, we must send our invitations to our friends, the bright light flashes of lightning."

"It wouldn't be a real frolic without them."

"They lend so much spirit to the frolic and are so willing to flash and crash."

"How I do love the words crash and noise and roar and storm!"

"They do my heart good."

"But as you said before, old King Thunder," said old Queen Thunder, "we must be off."

And so, first of all the clouds began slowly to change into their dark costumes—some of them looked as black as night, and others looked very dark with strange gray edgings which made them look very wild.

And then came the bright little flashes of lightning with old King Thunder and old Queen Thunder.

Of course all the little children of old King and old Queen Thunder came along, too.

And I mustn't forget those other guests at the frolic—the king and queen of the rainclouds and all the raindrops—every one of them, and they danced down on the earth in the wildest glee.

"Well, now I'm up," said old King Thunder. "I think for a day or so we'll have to have more frolics, and then for another nap to get up our wonderful energy for the next time."

And they all agreed it was a good idea.

"Red Tape" Hampering Business in Poland

Like most governments of countries in economic difficulties, the Polish government has tried to improve matters by a network of regulations and prohibitions. Goods can still only be imported with a license and until lately it was very hard to send money out of the country. Such regulations, if applied at all by a not too well co-ordinated or experienced administration, must apparently affect the small as well as the great.

When the London Daily News correspondent was sent a pipe as a birthday present, which had probably cost \$1 or so, to receive it he had first to trudge off to the ministry of trade and industry for a special import license. One lady wanted to send 25 cents in currency to cover postage of a parcel, to a friend in England. She asked a post office official how to do this and he is said to have replied, gravely and politely: "First, madame, you must have the permission of the minister of finance."

Might Spare a Few It is said that never was there a gentler critic than Doctor McClintock of Dickinson college. One day a young creditor presented his speech for Doctor McClintock's approval. He evidently did not anticipate adverse criticism.

He received it, nevertheless, given in the doctor's gentle, humorous way, which never could offend.

"It's a good speech," he said, "but there is, perhaps, a little too much of a certain sort of rhetoric. For instance, I find two midnight owls, two midnight wolves, three American eagles and four unfurled banners. It seems to me the supply exceeds the demand."

Still Find War Victims That an average of 30 bodies a week are found in France and Belgium is the report of an official of the Imperial war grave commission. The number is decreasing, as many as 100 being recovered in a week last year.

The finds are made by farmers re-entending land, by builders restoring devastated areas and by others searching for old metal in battlefields. A reward of 10 francs is offered by the British, the French and the Belgian governments, and paid according to the nationality of the body found.

Self-Regulating Iron The iron equipped with a thermostat eliminates the effort involved in connecting and disconnecting the iron from the electric source and in cooling and reheating it again. The thermostat works automatically inside of the iron and controls the heat so the iron is never too hot for ironing, but maintains always an even temperature.

Not Product of Panama Panama hats are not made in Panama, as popularly supposed. They are manufactured almost exclusively in Ecuador and Peru. The misnomer arose from the fact that such hats were introduced to the world through the isthmus of Panama.—Pathfinder Magazine.

Rare "Pa, what is a rare volume?" asked Clarence. "It is a book that comes back after you have loaned it," replied Pa.—Vancouver Province.

Ye Gods! Another Atrocity Flysan still killing flies and mosquitoes by the millions

ARE you still fighting flies and mosquitoes by swatting them one at a time? Or do you use Flysan—original and best liquid spray (non-poisonous)—which wipes them out by the wholesale?

Maggots and the common house-fly, the deadliest pests that invade the home, are lashed with millions of disease germs.

"Swatting" them scatters these deadly germs into the air which you and your family breathe.

Flysan floats through your rooms. It destroys all these germs as well as all the flies and mosquitoes which carry them.

YOUNG WOMEN MAY KEEP WELL

By Taking Lydia E. Pinkham's Vegetable Compound Here is Proof

St. Paul, Minn.—"Here is a little advice I would like to have you put in the papers," Mrs. Jack Lorberer of 704 Dellwood Place wrote to the Lydia E. Pinkham Medicine Company. "If young women want to keep their health and strength for the next thirty years of their lives, it is best to start in right now and take Lydia E. Pinkham's Vegetable Compound. I have tried the Compound myself and received fine results from its use. In describing her condition before taking the Compound, she writes, 'I was afraid in my own house in broad daylight, I used to lock the doors and pull down the shades so that nobody could see me.'"

One day a booklet advertising the Vegetable Compound was left on her porch and she read it through. In so doing, she found a letter from a woman whose condition was similar to her own. "I bought Lydia E. Pinkham's Vegetable Compound," Mrs. Lorberer continued, "and have had fine results. My condition made me a burden to my husband. Now I ask him, 'How is housekeeping?' and he says, 'It is just like being in Heaven!' Are you on the Sunlit Road to Better Health?"

Keep Stomach and Bowels Right By giving baby the harmless, purely vegetable, infant and children's medicine, MRS. WINSLOW'S SYRUP brings astonishing, gratifying results in making baby's stomach digest food and bowels move so they should. Guaranteed free from narcotics, opiates, alcohol and all harmful ingredients. Safe and satisfactory. At All Drugists.

Hanford's Balsam of Myrrh For Cuts, Burns, Bruises, Sores Money back for first bottle if not suited. All dealers.

Callouses Quick, safe, sure relief from painful callouses on the feet. At all drug and shoe stores. Dr. Scholl's Zino-pads Put one on—the pain is gone.

Seating Left to Chance A pack of playing cards is used to seat Bangor (Maine) Rotarians at their regular Tuesday noon luncheon. Each table, seating six, is designated by a card, as "king table," "queen table," and so on. As the members enter each one receives a card from a well-shuffled pack. His seat is at the table represented by the card. The result is that it is not often that the same six are grouped at the same table on successive meetings.

Nellie Maxwell

Buck Privates to West Point

OPPORTUNITY still beckons the ambitious American youth.

True, farm boys don't become bank presidents with the same frequency nowadays as when Horatio Alger's fictional characters typhed the struggling American youth. Yet the come-on hand of the lady known as Luck but whose real name is pluck still gestures for all who are alert to see.

Four years ago, seven clear-eyed, upstanding, straight-thinking young Americans caught her gesture.

Result: today the seven are embarked on the honorable career of army officers, duty commissioned by the President of the United States, after a four-year stretch of mental and moral upbraid designed to turn them out equipped to occupy, with credit, any position in life to which they may aspire.

Your Uncle Sam was the godfather. It was the beloved gentleman with the plumed hat, the striped trousers, and the starchy vest, not Dame Fortune, who sponsored the ambitious seven.

All of which means just this—that the seven formed this year's contingent of former buck privates among the graduating class at West Point recently. Coming up from the ranks of the regular army, they qualified for admission to the military academy through annual examinations which are now open to all enlisted men of Uncle Sam's forces.

Real Democracy

Once a year the historic and unexcelled institution on the Hudson throws wide its doors and from out of the rank and file of soldiers enter such as have demonstrated their right to wear on their shoulders the insignia of leadership.

The son from the lean farm in Iowa and the pampered pride of the richest banker in Wall street are "buddies" under the skin. Such, at least, is the principle and practice at West Point. Democracy—not "Who are you?" but "What can you do?"

The list of young men who by reason of their perseverance and their determination to achieve now wear the Sam Browne belt and shining shoulder bars of an officer show that the ambition of Young America is as broad as her boundaries. Observe that none of them are former service men nor had they distinguished themselves in purely military events. All are men of a year's service or more who apparently enlisted in the army with the idea of competing for a West Point scholarship.

Cadet Lieut. Hans W. Holmer, twenty-six, of Medford, Ore., one of the seven, upset West Point tradition when he won the much-prized title of "Honor Man," making a total of 2,757.05 points out of a possible 2,975. The first regular army appointee ever to gain such distinction, he stood No. 1 in the class of 1927, consisting of 203 cadets. Cadet Harold A. Kurstedt of Weehawken, N. J., another of the seven, took second highest honors with a total of 2,744.60.

The remaining five ex-soldiers graduated also to relatively high positions. They were: Cadet John T. Holst of New Haven, Conn.; Cadet Cyril E.

Cadets of the class of 1927, United States Military Academy, who were appointed to the academy from the regular army: (Left to right): John R. Lovell, Ottumwa, Iowa; John A. Schwab, New York City; Cyril E. Williams, Ontario, Canada; Harold A. Kurstedt, Weehawken, N. J., formerly of Mt. Vernon, N. Y.; Hans W. Holmer, Medford, Ore.; Charlie Wesner, Green Lake, Wis.; John T. Holst, New Haven, Conn.

Williams of St. Catharines, Ontario; Cadet John R. Lovell of Ottumwa, Iowa; Cadet John A. Schwab of New York City, and Cadet Charlie Wesner of Green Lake, Wis.

In the rigorous training courses which give West Point rank with the finest military academies in the world, all seven of the regular army appointees acquitted themselves above average. Cadets Kurstedt and Schwab were cadet captains and Cadet Holmer a cadet lieutenant. Cadet Schwab was one of the best polo players in the Point.

An All 'Round Man

Cadet Holmer was rated as expert with both the automatic pistol and service rifle. As a member of the cadet wrestling team Cadet Kurstedt won his "A" while Cadet Lovell established an enviable record in athletics, playing on the football eleven for three seasons and on the boxing team four. Last year he was captain of the boxing team.

Besides these seven graduates there are 124 other cadets now at the academy who were appointed from the ranks of either the regular army or National Guard.

This high percentage of the membership of the corps of cadets has been attained by the regular army largely through the training extended to aspirants at West Point preparatory schools conducted throughout all departments of the army. By their aid this year, 95 soldiers were coached to take the final examinations for entrance to West Point this summer.

The men were entered in the preparatory schools after having satisfied certain elementary requirements at the camps and stations they were serving in. To attend youths must be between the ages of nineteen and twenty-two, have at least one year's service in the army, and possess the equivalent of a high school education.

Get Another Chance

To fall to qualify for the preparatory school at first need not mean the bursting of the young soldier's bubble of hope. On the contrary, failure has seemed merely to spur many of them on to further study and greater determination to make good. These men who rise from the ranks are moved by determination, persistency and intelligence.

The soldier-students are quartered in regulation army barracks when attending preparatory school and under the usual soldier discipline with the exception that lights are allowed to burn as long as there is home work to be done. The curriculum includes all the necessary academic subjects and

cent of combined sulphur. Vulcanization must therefore be prolonged and the rubber compound must contain sufficient sulphur to produce the grade of hard rubber desired.

Molding Rubber

The bureau of standards says that rubber is not poured into molds in a molten condition, but is molded in steam-heated presses, the temperature of the molds being high enough to cause the rubber to become plastic and assume the shape of the mold. Hard rubber contains at least 21 per

cent of combined sulphur. Vulcanization must therefore be prolonged and the rubber compound must contain sufficient sulphur to produce the grade of hard rubber desired.

Cadet Harold A. Kurstedt, 2nd Lieutenant in 1927

is drawn up for the sole purpose of preparing the students to meet the fairly rigid West Point entrance tests. The preparatory schools run from the fall months, throughout the winter, to April, when the final examinations are held.

But it is one thing to gain entrance to the United States military academy—and another to graduate. Some of the most promising youths from fine homes are "found," although carefully prepared prior to entering the academy at the leading educational institutions. Partly because of the high-notch of physical perfection and partly because of the strict drill and discipline, those without previous military training experience difficulty in keeping up with their classes. The ex-ranker, however, has in the few short years since his entrance to the academy was authorized by congress shown a distinct ability to excel in cadet activities.

An afternoon at the "Point." The cadets are under canvas.

On the parade ground, squads of officer material are swinging into step, the formations that make of the army a vast, efficient machine hitting on all 12 cylinders.

Commands ring out. "Make it snappy," is the big idea.

Squads, Squads, Squads!

Squads with guns, squads without guns, squads at target practice. The pride of doing a thing with zest and doing it right is in the carriage of each high-held head, of each pair of straight shoulders.

An interval. Again the parade ground is alive with youth. Mass athletics. The tennis courts show flying, leaping figures. Out there they are practicing lacrosse. This group is trying at making a winning getaway for future track use. Another group concentrates on the great national game, baseball. At the far side, eager forms destined to win glory on the football field are trying out. One group is bulging up itsiceps by raising and lowering itself on the green velvet carpet of outdoors.

Over on the hotel veranda, a fortunate chap in the immaculate whites of the season twirls his visored cap and chats, consciously with one who is obviously a girl from home. There a few strollers through the shady paths which lead toward the shimmering waters of the river.

Romance and health and education! Thus does Opportunity offer the allure of her smile to any American youth who has the courage to claim her.

Gave Jefferson Idea

Thomas Jefferson was the first President to conceive the idea of an exploration of the country reaching to the Pacific coast. He says in his autobiography that he obtained the inspiration from John Ledyard, a young New England sailor, in 1786.

Grain Marketed by Cooperation

Shows Greatest Development in Farmers' Elevators in Western States.

(Prepared by the United States Department of Agriculture.)

Co-operative marketing of grain in the United States shows its greatest development, from the standpoint of the volume of business handled, in farmers' co-operative elevators, of which there are more than 3,300 listed with the United States Department of Agriculture. Most of them appeared in the Middle Western states. Farmers' elevators are most numerous in Illinois, Iowa, Kansas, Nebraska, North Dakota, Minnesota, South Dakota, Ohio and Missouri. There are a few co-operative warehouses in eastern Washington which receive and market grain. Some attempts have been made by farm organizations to form federations of local elevators, but on the whole these attempts have not been successful.

Organize Wheat Pools.

A total of 16 wheat pools have been organized since 1920, but only 9 of these were active in 1925. The first association was formed in Washington and a second association was formed in Idaho in 1920. Organizations were set up in Oregon, Montana, Oklahoma and Kansas the following year. In 1922 the Arizona, California, Colorado, Nebraska, North Dakota and Texas associations were organized. South Dakota and Minnesota did not organize until 1923, and the most recently organized association, that of the Central states soft wheat growers, began operating in 1924.

The wheat pools quite generally utilize the facilities of the farmers' elevators in receiving and forwarding grain to market. Several of the associations lease or own terminal facilities for the handling of grain, while certain of the pools are now considering, or have already organized, subsidiaries for the acquisition and operation of country elevators.

Organize Sales Agencies.

A number of attempts to organize co-operative sales agencies have been unsuccessful, but in spite of this other associations organized for the same purpose have been successful. There are at the present time at least four central selling agencies operating on our principal grain markets, as well as several sales agencies which serve only certain of the wheat pools.

The total volume of business handled by all co-operative grain marketing associations in 1925 was \$750,000,000, transacted for 620,000 members.

Some Species of Hawks Beneficial to Farmers

Not all hawks are harmful, in the sense that they are supposed to be; that is, in catching chickens and song birds and quail. The biological survey of the United States Department of Agriculture points out that there are a number of different species of hawks, and the food habits of all are not the same. Some prey almost entirely upon small mammals, such as mice, ground squirrels, and rabbits, whereas the food of others consists chiefly of birds. The latter are the species that are responsible for the bad reputation of all hawks. The bird eaters should be killed at every opportunity, but it is equally important that the others be spared, for they do a great deal of good in destroying small-animal pests of the farmer. The bird-eating hawks include the Cooper hawk and the sharp-shinned hawk, and these species prefer to capture their prey by swift, fierce darts from the concealment of thick foliage. Most of the other hawks are beneficial to the farmer.

Agricultural Items

The only good corn borer is a dead one.

A barn owl makes a valuable mouse catcher.

Sharp tools save power, power costs money, hence—?

Send for experiment station bulletins on fertilizers and soils. They will help your garden.

The crop that suffers most for proper cultivation is the crop of country boys and girls.

Competition may be the life of trade, but co-operation will certainly add vigor to the life of farming.

Wool should be stored in a clean, dry place until it is sold. It should never be stored in a basement.

The farmer who has no more live stock than a chicken on the farm should have a permanent pasture.

Sweet clover may be sown alone in the fall like alfalfa. If sown in wheat it should not be seeded until spring.

Discouraged farmers have this consoling encouragement: When you are at the bottom of the grade the only way you can look is up.

If wire fences are grounded to permanent moisture every five or ten rods the danger of stock being killed while near the fence during a thunderstorm is materially decreased.

Discarded Mower Is Easily Put in Shape

Little Time and Money Will Put Machine in Order.

Many times an old mower is discarded as worn out when a little time and money spent in replacing worn parts and adjusting the machine would put it in first-class shape again. It is pointed out by R. L. Shaw of the farm mechanics department, college of agriculture, University of Illinois. Mower troubles can be classed under three main heads, namely: heavy draft, side draft and uneven or ragged stubble.

Heavy draft is caused from lack of lubrication, dull sickle, wear and side draft due to improper adjustment of the cutter bar parts. The cutter bar with the sickle and other cutting parts is the chief source of trouble. Side draft is due to a dragging back on the cutter bar of the uncut hay or grass and insufficient tension on the supporting spring to the cutter bar. A dull sickle in a properly adjusted cutter bar will not give side draft.

"In adjusting the cutter bar parts see that the guards are all in line. A hammer may be used to drive the ledger plates must be held in place tightly and the edges must be sharp. The clips must hold the sickle sections down against the ledger plate so that the cutting will be done without chewing the stalks. The sickle sections should always center in the guards at the end of each stroke.

"Sickle breaking is a trouble experienced in some mowers and is usually due to the worn condition of the wearing plates, clips and guides that hold the sickle head in place. Adjustments for taking up this wear are provided on all mowers."

Efficient and Uniform Toxicity Made for Rats

According to results of experiments conducted jointly by the bureau of biological survey and chemistry of the United States Department of Agriculture, a powder can be made from dried red-squill bulbs which has an efficient and uniform toxicity for rats, but at the same time apparently does not unduly endanger human beings or domestic animals.

The use of powdered red squill for the destruction of rats is comparatively recent in this country, although the poison has been in limited use in Europe for centuries. It has never come into popular use, however, even there, because of its tendency to vary greatly in potency. Several of the factors influencing its toxicity have been developed during the course of the present investigation. Officials of the Department of Agriculture anticipate that these experiments will be of material assistance in the production of a uniform and stable squill product. This poison should greatly benefit the poultrymen and farmers generally who hesitate to use some of the commercial rat poisons on account of the attending danger to live stock.

Best Time to Make Hay From Red Clover Crop

The time to make hay from sweet clover is either the year after it is sown or the same fall it is sown. The best hay is obtained the same fall. Ordinarily it should be cut in September. It can be cut as late as October 1, if the weather at that time is suitable for curing the hay. The crop need not be cut any higher than any other hay crop.

In the late summer, the sweet clover plants form numerous large buds at the crowns which produce the next year's crop, and after these buds are well formed the sweet clover is ready for the winter, and taking off the season's growth does not injure it.

The second season, sweet clover must be cut high to keep from killing it. Two or three green leaves and branches should be left on the stubble. A thin stand of plants can be cut lower than a thick stand.

Farmers Being Urged to Cast Vote for Alfalfa

John Brown, agricultural agent in Owen county, Kentucky, taking advantage of the open political season, is urging farmers to cast their votes for Mr. Alfalfa. He says that if Mr. Alfalfa is elected he promises to do many things of real benefit to agriculture. Some of his promises follow:

- "1. If elected I promise to put more dollars in the pockets of farmers.
 - "2. I will see to it that we have better luck with sheep, because we will have better feed.
 - "3. I promise to gather nitrogen from the air and store it in the soil, thereby building up fertility."
- And he will make good. Vote for him.

Destroy Cutworms by Use of Poison and Plowing

The Iowa station reports that farmers have successfully controlled cutworm and army-worm invasions by broadcasting a poison mash with an endgate seeder. This mash is easily prepared from the following formula: Wheat bran, 20 to 25 pounds; paris green or sodium fluoride, 1 pound; cheap molasses, 2 pounds, and water, 2 gallons. Early fall plowing of grass and pasture land hits the worms in their weakest spot, however, as it destroys a large part of the available food supply for late fall and early spring feeding.

Ask for **POST TOASTIES**
—corn flakes that stay crisp in milk or cream

Delicious hearts of corn—flaked and toasted double-crisp. Try them!

Until you have tasted Post Toasties you have no idea how good corn flakes can be. Flaked from the hearts of tender white corn, deliciously seasoned and toasted double-crisp, they have the true delicate flavor of the corn. Ask for Post Toasties by name.

In the red and yellow, wax-wrapped package, they are always fresh and ready to serve. Have them tomorrow morning for breakfast. Treat everyone at the table with a bowlful of these golden corn flakes—the corn flakes that stay crisp in milk or cream.

Hoodoo Day

George Bernard Shaw was ridiculing the American marriage system, or rather the ease with which divorces are obtained here.

"I was at a dinner here in London," he scoffed, "when I heard an American girl and a young English chap discussing their approaching marriage."

"But don't you think that being married on a Friday might be un-

lucky?" the Englishman asked. To which the American girl replied: "That's so! You wouldn't be able to get a divorce before Monday!"

The bureau of standards says that rubber is not poured into molds in a molten condition, but is molded in steam-heated presses, the temperature of the molds being high enough to cause the rubber to become plastic and assume the shape of the mold. Hard rubber contains at least 21 per

Vienna Still Beautiful

Bevedere Palace in Vienna.

(Prepared by the National Geographic Society, Washington, D. C.)
VIENNA, torn by recent riots, has had since the World war a vastly different atmosphere from that which enveloped it a decade and a half ago under the Hapsburgs. But physically it has remained the same beautiful city.

Until recently one of the richest and gayest cities on the continent and the center of Europe's oldest empire, she is today the capital of a few mountains and rivers that occupy a small corner of her former dominions. The dissolution of an immense polyglot empire has brought Austria close to ruin and put Vienna largely in pawn to the world.

On the edge of a shriveled little republic of 6,000,000 insolvents, Vienna for several bitter years lived on alms, while her currency dropped until it took many thousands of her twenty-cent pieces to make one American dollar.

Surrounded by countries that nursed ancient grudges against her, dependent on them for nearly all her food and fuel, and with only worthless money with which to pay her bills—this was the fate which brought almost unparalleled national misery upon a highly civilized people in a famous center of learning, art, and culture.

Recent years, bringing a loan guaranteed by the League of Nations, and a replacement of worthless money by new units, have seen considerable betterment over the dark days of seven years ago; but even so, Vienna, and the sadly shrunken territory of which it is the capital can hardly be said to be wholly out of the economic woods.

Despite the tragic atmosphere that has clung round her recently, Vienna is still a beautiful city, with the cosmopolitan charm of Paris. In area she can compete with London, for her limits embrace more than 105 square miles. The city, however, is not built up to its limits, but is surrounded by a belt of meadows and wooded hills known as the Wiener Wald, from which many of the beautiful trees have been cut down in recent years.

Many Beautiful Buildings.
 No finer buildings can be found in Europe than in this city of the Hapsburgs. Several races labored at building Vienna for more than a thousand years, and the artistry of many peoples is represented here. The buildings are a record of the changing taste of western civilization.

Baroque architecture, which came to grief in Rome and to perfection in Vienna, has many brilliant examples, particularly in the Inner city. This is the oldest part of Vienna and is enclosed by the famous Ring-Strasse, a boulevard 157 feet wide, with double rows of trees, and built, like the old boulevards of Paris, on the site of fortifications which once extended for three miles about the core of the city.

Within or on the Ring are the imperial palace buildings, the great Gothic cathedral of St. Stephen, the celebrated university, the parliament building—that Greek temple where the national assembly of the republic now sits—the immense twin museums, the Exchange building which is the city's pulse, the opera and the Hofburg theater, all in a setting of linden and horse-chestnut trees, which frame the boulevard and avenues and line the walks of Vienna's lovely parks.

Outside the confines of the Ring are many palaces, embassies, chateaux, museums, hotels, and handsome stone apartment houses like those of Berlin. In this splendid setting an economic upheaval after the armistice completely overturned every normal social condition and changed the destinies of all classes of the population. The working man is now on top of the heap and will be provided for as long as the Social Democrats are able to make their governmental machine function.

Next down the new economic scale come the titled aristocracy and the other upper classes who used to live by "unearned increment." Many of these have spent their principal since the revolution and have come to bitter poverty.

Lowest on the scale is the middle class—the real tragedy of Vienna. Forming a fourth of the population and including the intelligentsia, this entire class, to whom the city in large measure owes its greatness, has suffered greatly since 1918.

The plight of this middle class is the last thing the traveler sees. If he is a casual person, who lives on surfaces, he may even leave the city with the impression that all is going well with the Viennese. There is nothing in the hotel district on the Ring to indicate to him that here is a city that is running along on mere hope.

How It Looks to the Tourist.
 He will be served plenty of good food. He will see many luxuries in the shop windows priced beyond his pocketbook. Opera tickets are unobtainable, he may find, unless he tips a hotel porter to stand in line at seven o'clock in the morning. Gay crowds that bet freely will surround him at the races. He will pass flower stands piled with roses of the American beauty variety, and fruit vendors who have mounds of hothouse strawberries, larger by far than those sold in New York. He will see drab corners blazing with oranges.

If he wishes to take tea at a smart cafe, he will have to get there early or he will find all the tables filled. Strolling about the Ring afterward, he will see scarcely a person who is not well dressed and well fed.

But all this is seen in the Vienna of the tourist, near the Ring. Dollars, pounds, francs, and lire keep the hotels and shops running at a profit. Here, too, come the exchange and war profiteers, known as the schiebers, who became wealthy while the rest of Vienna starved.

The gaiety which has always characterized the soul of the Viennese has an elastic quality which has enabled them to survive the most extraordinary hardships and soul-racking times without depressing their bubbling spirits.

As long as a man has his old Tyrolean hiking costume of leather breeches and a feathered cap, and a woman her peasant's costume, with its black bodice and red apron, they will pack raincoats, bread, and cheese into a knapsack, take their children by the hand, and start off for the country.

Every Sunday and holiday is spent in care-free tramping. Laughing and romping, the bare cupboard at home forgotten, they hike to the country, through sun or rain, to some favorite spot in the Wiener Wald.

At nightfall they turn back, entering the city as the opera and theater crowds are rushing to catch the last trams for the suburbs. Perhaps a bottle of wine has prepared them for their long walk back in the darkness and inspires them to shout and sing as they return to the scene of their privations.

Their sufferings have left no deep or bitter impressions. Like irresponsible children, many seem to regard the aftermath of the war as hard punishment, after which they were sent to bed without any supper. But tomorrow surely they will be forgiven and the good old times of plenty will come back.

Coffee Houses and Galleries.
 The famous coffee houses of Vienna, where the population repairs, even in business hours, for newspaper reading, letter writing, chess or gossip, are still well patronized as they were even during the darkest days. The Austrian cannot change his spots, even when national calamity is upon him. He still lounged half his time away, although his allowance of coffee and schnapps was cut down and he could no longer be generous to the waiters.

Vienna has always been to the south of Europe what Moscow was to the north—a great studio and market for art. The magnificent galleries, filled by the Hapsburgs, have drawn students from all over the world. The shop windows still display luxurious whimsicalities of modern art in whose invention the native craftsman excels. Exquisite ceramics, dyed silks, wooden articles, and tooled leather have been Viennese specialties.

Political changes have not altered the city's geographical situation, and the Danube still flows to Vienna through the opening in the mountain ranges, bearing ships and their cargoes for distribution in eastern Europe. Vienna is still and must remain a sort of inland seaport on the largest commercial waterway in Europe (except the Volga in Russia). Vienna's position on the map gives promise of being her salvation.

POULTRY

EGGS IN AUTUMN BRING A PROFIT

The fall season and the advancing price of eggs offer an opportunity in marketing this product that is not found at any other season of the year, according to G. T. Klein, extension poultryman at the Kansas State Agricultural college. September, October, and November find egg prices rapidly increasing and the demand good for a high quality product.

Many of the most successful poultrymen are taking advantage of these favorable prices by shipping to the large egg markets rather than selling locally. In general it has been found profitable to ship eggs on a rising market. Mr. Klein points out. The practice, however, seems hardly fair to the local buyer who handles the eggs during the season of less favorable market conditions.

"Experience has shown that it is not advisable to ship on a falling market," he declared. "This means that shipments must be discontinued about the first of the year unless a special market paying considerably above prevailing market prices can be secured. In a well organized poultry program, especially if the stock is well bred, this is not a serious matter as eggs can then be sold to a hatchery or for hatching purposes, thereby providing a 10 to 15 cent margin over the market prices for an additional period of four months."

"Eggs for shipment should not be more than a week old and it is even preferable to ship twice a week if volume permits, and new 30 dozen cases should always be used. Complete directions for packing can be secured from local express offices."

"The eastern markets have all the inferior eggs they can use and what they most want is a high grade selected product. They are very particular about the cleanliness of the egg, and want it to be of high quality."

Fine Alfalfa Chaff Is Excellent for Chicks

The fine alfalfa chaff gathered from around the mangers makes an excellent green feed for young chicks, and it is also good scratching litter for the colony brooder houses. Some poultry men believe that it will pay to keep the chicks off the range for about three weeks to reduce the danger from coccidiosis. They will supply green feed and attempt to make range conditions in the house.

Poultry men who do not have alfalfa for other live stock can buy alfalfa meal for chicks. This varies in price according to the quality.

Some of the commercial starting mashers have a little alfalfa-leaf included. In feeding either alfalfa-leaf meal or sprouted oats to chicks, it is difficult to give any exact quantity which should be given. Chicks develop rapidly in weight and their requirements increase from day to day. The practical way of feeding green feed to chicks seems to consist in giving each flock about as much each day as they will clean up in an hour or two without waste. Then the chicks can pick at the sprouts or alfalfa leaves when they wish, and all the chicks in the flock will have a chance at some green feed.

Poultry Squibs

Cull, and sell slacker hens.

Remove males from the poultry flock.

Minerals are often limiting factors in egg production.

There is considerable strain on a hen caused by laying nearly every day, even if that production is during the natural season for heavy laying.

A young orchard or a wild plum grove or a grove of sunflowers are ideal places to raise chicks. Some successful poultry raisers grow their young chicks at the edge of a corn field.

Poultry farming seems most efficient of all farming—is it because women do most of that?

While hens will live and even keep in fair health on poor rations, well-balanced, palatable feeds are essential to good egg production.

Skim milk, either sweet or sour, and buttermilk are especially valuable feeds for young chicks in hot weather, making the diet lighter without reducing its nutritive value.

One of the faults of many feeders is that they do not give their hen enough feed, rather than too much.

Chickens will do best if the sexes are separated. The cockerels should be removed from the pullets when they can be distinguished.

In order for an accredited flock to qualify as a certified flock, the owner must use male birds from hens that have a trap nest record of 200 eggs or more per year.

Current Wit and Humor

"George and Herman, you'll both stay in after school and write the name of your birthplace 50 times," said the teacher to the two bad boys. School over, the boys settled down to their task. The teacher, looking down the rows of desks, saw Herman in tears. Why, what's wrong, Herman? she asked. "It isn't fair," replied the boy through his tears. George was born in Erie and I was born in Conque-nessing. He's almost through!"—The Pathfinder.

DUMB AND SATISFIED

"Well, say what you please, but my sweetie's flivver is good enough for me."

Supply Equal to Demand

There's much material for fame. We'll still be celebrating. When we have cheered one honored name, Another stands in waiting.

"H" of a Time

Director Bob Hill sauntered into one of the fashionable clubs one afternoon between idens and proceeded to make himself comfortable in the barber's chair. The barber clipped and clipped at Bob's bushy locks and Bob fell asleep. He suddenly awakened as the barber said: "Anything hon the 'air, sir?" "I'm not interested in radio," muttered Bob as he tried to turn over.

Oh Sads

Bill—What is Bob so pleased about?
 Harold—He's got an idea for an invention that will make him a millionaire.
 Bill—Well, what is the big idea?
 Harold—A cake of flying soap for shower baths.

DIDN'T FILL THE BILL

"Your wife doesn't seem to have the artistic temperament."

No Such Luck

The fool and his money are parted full soon. Could the fool and his auto be. Oh, what a boon!

Ever Thoughtful

"In a little while we can go to the North pole by airplane."
 "Yes," answered the jovial realtor. "When we get through selling warm Florida sands in winter we can make a jump and sell Arctic snowbanks in summer."—Washington Star.

Not Only That

Burglar—I beg your pardon, sir, but I mistook your house for mine.
 Owner—Yes, and I should say you've done the same with my goods.

Those Husbands

Vera—My husband was furious when I asked him for a two-seater.
 Yvonne—Was he? My husband is different. I asked for a seven-passenger and he never said a word.
 Vera—Did you get it?
 Yvonne—Of course not.

Her Fault

Wife—Doesn't your conscience hurt you for telling these lies?
 Hubby—Why should it? You don't believe me.

Lesson for August 21

GOD'S PROMISE TO DAVID

LESSON TEXT—I Chron., chapter 17. **GOLDEN TEXT**—Thy throne, O God, is forever and ever a sceptre of righteousness as the sceptre of thy kingdom. **PRIMARY TOPIC**—God's Promise to David. **JUNIOR TOPIC**—How God Rewarded David. **INTERMEDIATE AND SENIOR TOPIC**—How God Gives Us the Better Things. **YOUNG PEOPLE AND ADULT TOPIC**—God's Great Promises.

I. David Desires to Build a House for God (vv. 1, 2).

Having subdued all his enemies, David sat down in his new and beautiful house to meditate. While thus musing, he is led to see the incongruity of dwelling in a house of cedar while the Lord's place was so common. A truly devout soul cannot be content to dwell in personal ease and luxury while the Lord's work is neglected. David's proposition met with Nathan's approval, but the next day he came with definite instructions from the Lord regarding it.

II. David's Desire Denied (vv. 3-8).

While fully appreciating David's motive, the Lord disapproved his plan. The rejection of his plan was not because of his nonappreciation of David, for He had taken him from the lowest walks of life and elevated him to the highest place among men. He assured him also that the cause would not suffer because of this change of plan. Two reasons may be assigned for God's prohibition of David's plan.

1. David was a man of war (I Chron. 22:3; 28:3).

Since the kingdom of God is to be a peaceful kingdom, it was not fitting that a man of war should build the capital city. This was not a reproach of David for being a man of war. The enemies of the Lord must of necessity be put down. No peace or rest could be to God's people till the enemies were subdued. It showed, rather, that David had done his work and that the time had now come for another to take it up.

2. The time and circumstances were not fully ripe. God's house should be a great house, therefore it would require a man's best energies to build it. The nation's treasury was no doubt much depleted by the wars. Since much money would be required, ample time was necessary to enable the people to accumulate funds.

III. The Lord Pledged Himself to Do More Than David Proposed (vv. 9-15).

1. David was to have a great name (v. 8).

David's name has gone down in history as one of the great men of the earth. It was a long way from herding his father's sheep to the throne of this great nation.

2. Israel to be established in a central place (v. 9).

The nation was not again to be moved away, nor to be wasted by the children of wickedness.

3. He was to enjoy God's continued favor and help (v. 10).

All his enemies were to be subdued. 4. Perpetuation of the kingdom in David's line (vv. 11-14).

(1) "Build thee a house."

This means a granting unto him of a posterity, a family line. David proposed to build a temple as a place in which to worship God. God purposed to establish the kingdom in David's line. This was to be perpetuated in David's seed after him.

(2) "Establish his throne" (v. 12).

This means the placing of him in a position of royal authority. (3) The kingdom was to be perpetual (vv. 13, 14).

He was to be settled in his kingdom forever. Disobedience to God would be visited with chastisement (II Sam. 7:15), but the covenants were not to be abrogated. Chastisement has followed, but David's seed is destined to occupy the throne (Luke 1:31-33; Acts 15:14-17).

(4) David's Worship (vv. 16-27).

In his actual worship, note: 1. His humility (vv. 16-18). Those who really worship God approach Him with great humility. 2. His praise (vv. 19, 20). Out of a heart of gratitude he praised God for His faithfulness and grace.

3. His gratitude (vv. 21, 22).

He had an appreciation of God's fidelity and expressed his gratitude to Him for it. 4. His petition (vv. 23-27). All praise and expressions of gratitude led up to the offering of definite petitions to God.

Peace of the Heart

Thou art the true peace of the heart; Thou art its only rest; out of Thee all things are full of trouble and unrest. In this peace that is in Thee, the one chiefest eternal good, I will lay down and sleep.—Thomas a Kempis.

Unselfishness

Unselfishness is a crown that scintillates glory long after the wearer has gone to his eternal reward.—Baptist Record.

Pretty Things that are Made at Home

HAVE you seen the new beach robes the girls are making? If you have you'll want to get out the work basket and get one together with all possible speed ere summer gives place to autumn's way. They're just the simplest things to make you ever saw. Absolutely nothing but a big square of gingham in a novelty design of any colors you please with a broad band of plain for the border. Some of the very elaborate ones are lined with thin silk, and some are fashioned of a border of printed organdie in a small floral or polka dot design. One seen recently was of white and a border in red with a polka dot design. These are very effective on young girls, even more so than the silk scarf when worn with tub frocks, and much smarter.

What a clothes problem midseason invariably thrusts upon us! At this juncture sheer summer frocks cast into the discard, mind not determined as to autumn's final choice—

ATTRACTIVE BEACH TOGS

novelty check gingham with wash silk borders. You've no idea how pretty silk and gingham are together until you try them. One of the more exclusive designers recently showed one of these beach robes in orchid silk ratine lined with wood-violet silk and trimmed with a wide border of the wood violet and futuristic corner designs in three shades of violet silk. It was a most expensive affair. Yet it was nothing but a big square about sixty inches wide, to be draped about the figure like a shawl, or used as a beach blanket. The same effect could be achieved in gingham, or its character could be changed to a designed center and plain border, like that in the sketch, at very little expense.

And speaking of gingham, do you know what beautiful smocks you can make from the new novelty ghinghams? These are not the old-fashioned staples in checks and stripes we are apt to think of in terms of kitchen aprons. They are as different as day is from night. The colors and designs are wonderfully worked out in number, compose or contrast effect, frequently with superimposed trends that look like embroidery. The one in the sketch is fashioned from a new novelty stripe in umber effect in rose. This particular design also comes in powder blue, almond green and beige.

Flat stitched plaits also are a means of attaining the desired styling. This is the method employed for the attractive gown in the picture, which, by the way, is a model which called forth any amount of favorable comment, displayed as it was at an exclusive style show presented by the Fashion Art League of America. There are many points of interest about this frock which have a direct bearing on the autumn style trend. Perhaps its most outstanding feature is the flat-stitched plaits arranged in two tiers. Thus is the fashionable flare achieved, yet flatness about the hips is maintained by the stitching.

There is going to be an unlimited amount of flaring done this coming season, according to latest advice from Paris. Sunburst plaits, side plaits,

BEIGE KASHA DRESS

Many tearrooms are now uniforming their employees in gingham smocks on account of its crisp and colorful effect.

Another fashionable accessory some of the more exclusive shops are showing, but which you can make for yourself at less than half the cost, is the Deauville scarf of organdie. Some of the prettiest ones are of white with circular flares, shirred fullness are a few of the "ways and means" which will be resorted to for the accomplishment of the flare.

STORY FROM THE START

Garth Guthrie, Canadian war veteran, having to live in the open on account of weakened lungs, is factor of a Hudson's Bay post at Elkwan. He came back from the conflict with a permanently scarred face, which as he realizes cost him the love of his fiancée, Edith Falconer. Sir Charles Guthrie, his brother, is a millionaire war profiteer.

CHAPTER I—Continued

In the autumn Garth had been sent north with Etienne Savanne, a veteran servant of the company, to winter at the fur post at the mouth of the Elkwan. When the Christmas mail from Albany was sighted on the white river trail, the mingled feelings with which Guthrie watched the approach of the dog-team bringing word from home— from her—were the cause of puzzled self-analysis through the months to follow. In July when he sailed into Fort Albany in his York boat with his fur packs, his year on the silent west coast was up. The mail he found waiting his arrival brought the news that he was now brother of Sir Charles Guthrie; announced the decision of Ethel and Clara for an August wedding on the return of the exile; dwelt at length on the rise in Guthrie steel; and disposed of his health in the casual surmise that it had been fully restored by the year in the open.

The last had drawn a bitter smile from the man who read. Pages for the personal affairs of the writers, and a line for the lungs he had brought back from the Hun drive for the Channel ports. So they were waiting in Montreal, were they, for his return, to bend him to their petty ways—shape him into a business machine, like Charlie—when he had breathed the stinging air off the ice-fields of the bay; seen the caribou drift across nameless tundra at dawn; camped under a canopy of stars while the aurora blazoned the north; wakened to the raucous chorus of the Canadas and watched the "waves" rally their legions in the autumn? How blurred, after this, the once poignant memory of Ethel Falconer was growing! How petty seemed the obsession of Charles Guthrie for money and power to the man who had found in the peace of the west coast an opiate for his doubt and disillusion!

With no attempt at defense of his decision to remain for another year, Guthrie wrote home, and without regret, had sailed out of the delta of the great Albany with Etienne, bound for Elkwan.

The men who had lain beside his sleeping dog with his thoughts while the wind roared through the alders, hammering the anchored tent, and the rain beat its intermittent tattoo, sat up, and placing the candle lantern at his elbow, drew a letter from his pocket and read:

"Dearest Garth: "I don't know what to say—I'm simply stunned. Either you are still ill—are deceiving us, or take this method to humiliate me before your family and the world in the hope that I shall voluntarily give you up. Of course, if you no longer love me, there is nothing to be said. Do you love me still, Garth dear? So long as you do, I shall wait.

"Devotedly—until you wish it otherwise, ETHEL."

This had been her answer to the burning of his bridges—utter abandonment of her pride, and he had once thought her proud. Nevertheless, each new reading of the letter brought to Guthrie by the fall packet a fortnight before, had quickened the memory of what this girl, vibrant with life and physical charm, had meant to him—this girl whom he had humiliated. Often, standing before her vivid likeness in his quarters he had gazed at the alluring face, the faultless modeling of neck and shoulders, and marveled at the spell which held him in the north while such loveliness waited his return. She still had power to stir him, but his moods of self-censure and remorse were short-lived. The north had won.

CHAPTER II

At daylight the challenge of the alre-dale waked the sleeping man. With hair erect on mane and back, the dog squeezed through the lashed tent flap to break into furious barking. "Shut up, Shut! Etienne's dropped in for breakfast," called Guthrie. Presently, weighted down with his load of wet geese, a bent figure pushed through the alders accompanied by the leaping alre-dale. "Good morning, Etienne! You had a bad night of it in the bush." The wiry half breed cuffed his load on the platform above his head, and grinned. "I mink good camp een de spruce wid beeg fire, an' roast some goose." With difficulty the men boiled their tea and a kettle of gause; then, to avoid the flying sand, went into the tent to eat.

"We ought to be starting for Elkwan, Etienne. I don't like to leave her too long, sick as she is."

The swart face of Etienne Savanne grew grave as he nodded.

"She nevalre see de snow once more."

"That's why I hate to leave her alone with old Anne. I'd never forgive myself if— Guthrie paused to stare at the tent wall.

The black eyes of his companion softened. "You ben good man, m'sieu. Dat girl die long ago een de bush."

"Yes, the condensed milk has kept her alive—but she should have gone to the mission at Albany."

The other shook his head; then struck a match and lit his pipe before replying.

"You are new man in dees country. You don't know Injun squaw. At Albanee—widout you—she not be happy."

Guthrie reddened under his deep tan. He knew only too well. "But they would have taken better care of her," he protested.

Etienne slowly shook his head. "Too late, m'sieu. She live more long here dan at Albanee."

All day while the norther flayed the west coast, Guthrie and Etienne dressed and salted geese. Deep in the winter, when the caribou had drifted back from the coast, the geese, freed

Sailed Out of the Delta of the Great Albany.

from the salt by boiling, would be a welcome change from the fat bacon of the company's stores. The wind held into the night, but when the men turned out of their blankets at sunrise the blow was over.

At noon the goose hunters launched the canoe and driving her through a quarter sea, pushed down the coast for the shelter of Akimisk Island. They were rounding the low headland of Elkwan point when Garth, slaving in the bow, was aroused by an exclamation from the stern man.

"Look! A boat!" Etienne pointed his dripping paddle across the yellow strait to the shore of the island. "Shipwrecked—somewhere! Dey use de oar."

In the distance, crossing to the mainland, Guthrie made out a boat. "Dey wave to us!" cried Etienne. "Dey see de canoe!"

From the craft, still miles away, showed a flutter of white.

"We'll come up with them on the lee side of the point," and Guthrie, whose thoughts were at Elkwan, whose arms were driven by fear—fear that in his absence tragically had had its grim way, lunged viciously with his paddle.

In the quiet waters beyond Elkwan point, the two boats approached with- in hailing distance. In the ship's dory four men were rowing, while two figures sat in the stern. The crew of the boat rested on their oars.

"Hello, canoe!" Guthrie answered the hail, and shortly the Peterboro came up with the larger craft. "You've lost your ship?" he began.

The black-bearded figure in the stern of the boat, ignoring the question, demanded: "You're Hudson's Bay people?"

"Yes, we're bound to the Elkwan just below here. You've lost your ship? Where did you leave her?"

Guthrie's curious glance shifted from the bearded spokesman to the girl at his side wearing a pen-jacket and a sou'wester, below the brim of which fluttered a plume of dark hair. As the boats swung together, the alre-dale, mane and tail stiff, grawled menacingly at the strangers, but a low command from his muster silenced him.

"Our schooner's ashore on the outside of the island. We left Fort George day before yesterday, and were off Cape Jones when the blow struck us. It crippled our rudder and drove us straight across the bay. We couldn't head into it."

that blow," said the surprised Guthrie. "Your boat must have got a pounding on those flats."

"It did, but we struck at high tide and managed to get most of our stuff off her. Then, this morning, we fell into the hands of a pirate."

"Pirate!" Guthrie exclaimed.

"Oh, Archie," protested the girl, "that's hardly fair. He paid for what he took, and helped with the last of the stores."

"Who were they—where from?"

"They were in a little sixty-foot power schooner, the Ghost, St. Johns, and the leader was a red-headed ruffian with a mutilated face—horrible!"

The black eyes of Etienne Savanne snapped as they met the backward glance of his chief. "McDonald, Ha! Ha!" said the half-breed with a grin that mapped his swart face with lines.

"What?"

"Yes," nodded Guthrie. "Your pirate was undoubtedly the famous Laughing McDonald. The Indians call him 'McDonald Ha! Ha!' because of the grin—from that scar."

As he spoke, Guthrie was aware that the grave eyes of the girl were curiously studying him—the second man with a scarred face she had met since her shipwreck on the west coast. Instinctively he got the impression that those sober eyes had themselves looked on suffering—tragedy. The blood rose to his forehead as he went on: "They think he's sort of a super-man—the Indians. He's hypnotized them; but, and he met the girl's straight look, 'you say he treated you fairly?'"

"I think he did," she said, and, as she tucked the loose lock of chestnut under her cap, while the color showed faintly at her temples, he wondered if she had read his thoughts.

"Treated us fairly," exploded the bearded man. "Well, I call that—"

"How many men were with him?" roughly interrupted Guthrie.

"Four. There was an Eskimo, too."

"One a big, bearded chap?"

"Yes! The others I took to be sailors."

Guthrie nodded to Savanne. "That's the Newfoundland whaler who brought him into the bay last year," he said; then continued to the stranger, "You had the honor, sir, to meet the man who has stamped the fur trade from Whale river to Fort Churchill. He took fifty thousand dollars' worth of fox out of the bay last year."

"Hum! Why didn't you drive him out—arrest him?"

Guthrie laughed. "Arrest him for what? He has as much right here as we. Then, you know, there are not many who would resist the job."

"Relish the job! Bah! I thought you fur men were—"

The speaker was interrupted by a voice suddenly grown hard with impatience. "It's getting late. My name is Guthrie—this is my assistant, Etienne Savanne. You'd better step that mast. You'll need the sail or you won't make Elkwan before dark."

"I'm Dr. Archibald Quarrier, sir, geologist. We've been prospecting for iron and copper on the east coast," snapped the other, visibly annoyed.

"This is my sister, Miss Joan Quarrier. How far did you say we were from Albany?"

Guthrie smiled into the amused eyes of the girl, who seemed to enjoy the discomfiture of her brother.

"You're ninety miles from Albany. Your boat can't be beached like a canoe. It would depend on the wind."

Then, as he glanced at the sun, dread of what he might find at Elkwan led Guthrie to finish abruptly: "Follow me into the river mouth. Our accommodations are limited, but you are welcome." And delivered of this lie, with a sweep of his paddle, he separated the boats.

"How about my stuff over on the island; it's very valuable?" called Quarrier after the retreating canoe.

"You can send men for that and bring it to Albany?"

But the paddles of the now fast-moving Peterboro lunged and swung in unison, the question ignored.

Beyond the river valley the musk-og was smothering a sun veiled in haze when the Peterboro approached the log landing below the huddle of buildings on the high shore, which was Elkwan. The problem of caring for the guests which the storm had brought Guthrie had been swiftly crowded from his thoughts by solitude for those he had left at the post, a week before, when the necessity for beginning the hunt of their winter supply of geese had compelled his absence.

He was overdue, and Anne was old and ignorant. He would never forgive himself—never cease to be haunted by the eyes of the doomed girl he had left in the care of the Cree women, if— But no! It was unthinkable—too hideously tragic that it should have come to her, alone with old Anne. Fear of the thing had depressed him on his summer trip to Albany—had harassed him through the last two days, a prisoner to the wind.

The ache of his own loneliness through the first weeks at the sanatorium had lent him deeper understanding of the frightened look in the eyes of the girl whenever of necessity he had left her, even for a few hours, in the care of old Anne. But always he had returned to find her, and the joy in her wistful face had been fit recompense for his haste to turn back—to keep his word to a waif of a half-breed, that he would be with her at the end.

Guthrie leaped up the cliff trail to his quarters. Opening the door, he announced his coming in a voice that belied his fear.

"Back again! How's all my family?"

A squat Indian woman shuffled into the living room, her wide mouth splitting a swarthy face in a grin of delight.

"Allo! We glad you come!"

Guthrie expelled a deep breath of relief. A voice from an adjacent room called faintly:

"Nia! nia! You come back! It sees long tam!"

"Yes, Ninda," He bent over the cot where lay the wrath of a girl in whose face, thin to emaciation, great dark eyes glowed feverishly as she smiled up to him in her joy.

Guthrie drew a chair to the bedside and took in his the hot hand which lay on the coverlet. The fever was worse.

"It was the storm, Ninda—the wind we could not travel."

The blue-black hair, heaped in braids on the dusky skin, shot over the high cheek bones with the flush of fever. She had fainted rapidly since he left, but in her hour of extremity she would not be alone.

"You go—no more?" she whispered searching his bronzed face.

He shook his head. No more, Ninda. Anne came in with some hot condensed milk. The girl sipped a little then smiled at the pitying face of the man with its scar furrowing the right cheek.

"You here all tam now, Ninda sleep."

With a sigh her eyes closed. As Guthrie left the room, he looked back on the pinched oval of her face hovering a smile.

"Where the boat, Etienne?" he asked, huskily, entering the trade house, which stood in the clearing out side the dog stockade.

"She come slow along the shore—not far now."

Guthrie went down to the landing to meet his guests. The lack of space at his quarters—at first thought embarrassing—was now a source of satisfaction, for there would be room for Miss Quarrier, only. Her pompon-brother and the rest would sleep in the trade-house. He would take Quarrier in to meals and the other could eat with Etienne.

And then, there was Ninda, (TO BE CONTINUED.)

Glory Long Departed From Ancient Karnak

Karnak is a village in upper Egypt with a population of about 15,000. The village has given its name to the northern half of the ruins of Thebes on the east bank of the Nile, the southern part being known as Luxor. The Karnak ruins comprise three great enclosures built of crude brick. The most northern and smallest of these contained a temple of the god Mont, built by Amenophis III, and restored by Ramesses II and the Ptolemies. Except a well-preserved gateway, little more than the plan of the foundation can be traced. The southern enclosure contained a temple of the goddess Mut, and is almost as ruinous as the east, but on a much larger scale. The third or central enclosure is of vast dimensions, forming approximately a square of 1,500 feet; and it contains the greatest of all known temples, the Karnak temple of Ammon. Thebes became the royal residence, and Ammon of Karnak was the great god of the state. Different vines added to the temple of Karnak

and to Thebes. Alexander the Great the Grecian conqueror of the East restored a chamber in the festival hall. The walls of the buildings throughout as usual in Egyptian temples, are covered with scenes and inscriptions, an many record the annals of kings and of battles and campaigns.

Wasps That Eat Metal

An insect known as the steel wood wasp can do considerable damage to lead.

A piece of pine wood infested with larvae of this wasp had been used as a core on which to roll some sheet lead. When, on reaching maturity they attempted to escape, they cut through the lead instead of traveling lengthwise through the wood.

Each sheet of metal was one-tenth of an inch thick, and the insects penetrated 15 thicknesses of lead before escaping.

The man with a grievance is, grievance to others.

SOUTH-WEST NEWS NOTES

The famous Hopi Indian snake dance was held Aug. 23 at Polacca or "first mesa."

Joseph Liberman, Gallup, was elected department commander of the American Legion in convention in E. Las Vegas.

The new state bridge over the Gila river on the Phoenix-Yuma road near Gillespie dam was opened to traffic last week.

At the recent convention of the New Mexico department of the American Legion in Las Vegas Santa Fe was voted the next convention city.

Construction is to start soon in Silver City, N. M., on a new \$75,000 building at State Teachers' College and a new \$60,000 public school building.

Five miles of surfacing, all that will be done on the trail this year, has been completed on the Coronado trail, according to word received from Clifton, Ariz.

The outbreak of infantile paralysis in New Mexico has shown a decrease in intensity. Dr. George S. Luckett, director of the state bureau of public health, announced in Santa Fe.

The tax levy for state purposes extended against the value of all property in the state of New Mexico assessed on the tax rolls for this year will be .0078000, State Tax Commission announced in Santa Fe.

R. A. McLeskey, superintendent of the Alamogordo, N. M., city schools, returned recently from the University of Arizona, and states that the Alamogordo faculty is now complete, with a number of new teachers on the list.

The game and fish commission of New Mexico in session in Santa Fe, has created two new game refuges in Catron county, one at North Lake and the other of Dault, State Game Warden Edgar L. Perry announced.

Mrs. Emma Radich, driver of a vehicle that struck Stewart I. Phillips, Globe, Ariz., garage owner, injured him so severely that he died a few hours later, was arraigned on a manslaughter charge and was released on bond of \$750.

Governor R. C. Dillon of New Mexico issued a requisition on Governor George W. P. Hunt of Arizona, for the return to Silver City of Legrande E. Bates, a former barber of Silver City, charged with a felony, who was arrested at Holbrook, Ariz.

Articles of incorporation have been filed in Phoenix by the Arizona Auto and Aviator Company of Miami. The incorporators are William A. Coffin and C. Polson of Miami and James O. Gilliland of Globe. The capital stock is \$100,000 divided into \$1 shares.

Abraham Manuel, three-year-old Indian child, was instantly killed and his grandmother wounded by the accidental discharge of a gun in the hands of Henry Manuel, the boy's uncle, near the Sells Indian reservation, according to a report of the tragedy received in Tucson.

The act of the 1919 New Mexico Legislature appropriating \$25,000 each year to be used in cooperation with the United States Biological Survey in eradication of predatory animals in the state, is still operative, according to an opinion handed down in Santa Fe by Attorney General Dow.

Reports from Prescott, Ariz., state that the final payment in the Coburn Cattle Company liquidation was sent a few days ago to the trustees, Robert E. Smith, Seattle, and Vincent Whitney, San Francisco, marking the completion of ranch receivership settlement at a figure placed roughly at 70 cents on the dollar.

A request to Mexican authorities for a military band and a squadron of aviators to join in the celebrating the Junta Patriótica Fiesta to be held Sept. 15 and 16, and to remain in Tucson as representatives of the southern republic to greet Col. Charles Lindbergh when he arrives a few days later, has been made by officials of the association in Tucson.

The one-half mill levy for the state of New Mexico institutions' building funds, the increase of one-half mill in the levy for road purposes, and the deficit of more than \$375,000 on Jan. 1 in the state's funds were held to be responsible for the decrease in the tax levy for state purposes in 1927, in a bulletin issued in Santa Fe by the State Taxpayers' Association.

The Arizona tax rate for 1927 will approximate 93 cents for each \$100 of assessed valuation of property in the state, according to an estimate of the rate made in Phoenix by the State Tax Commission from tentative figures on the amount to be raised by the levy and the total valuation of property in the state. The 1926 tax rate was 67 cents, or 26 cents less than the estimated rate for 1927.

The right of the board of regents of the University of New Mexico to issue building and improvement bonds in the amount of \$190,000, as provided by the State Legislature, was upheld in a decision handed down by the State Supreme Court in Santa Fe.

Extensive mining activities in the Black Range by the Mineral Mountain Copper Company, financed by a Los Angeles syndicate, and the Black Range Mining Corporation, backed by Fort Worth, Tex., capitalists, bid fair to open up new wealth producing mines in Grant county, N. M.

Progress Being Made in War on Bacteria

Disease-causing bacteria have many devices to perpetuate their kind in an adverse world. Bacteriologists of the Hooper Foundation for Medical Research, University of California, have shown that tetanus spores may resist the temperature of boiling water for ninety minutes, botulism in vegetable juices for five and one-half hours and those of a closely related but harmless species, of eight and one-half hours. Other workers have proved that typhoid and other organisms may remain alive for years at refrigerator or lower temperatures. This constitutes a factor of great danger for man and animals which it is the function of scientific research to obviate, says Dr. George E. Coleman, of the Hooper foundation. "The brilliant success," he states, "that has been attained already, in which the experimental use of mice and guinea pigs has played a large part, is constantly being probed by statistical evidence of fewer food poisonings and typhoid outbreaks as well as by increased protection from many of our other microscopic foes."

Interesting Youth of Nation in Aviation

Thousands of boys and girls on organized playgrounds in some 800 American cities are expected to compete this summer in a national model airplane construction and flying contest encouraged by a committee headed by Orville Wright, airplane pioneer. The recent achievements of aviation, particularly the Lindbergh flight, inspired this competition, which will be conducted by the Playground and Recreation Association of America. It will come to a climax at national finals to be held in Memphis in October. The contest was suggested by Dr. John H. Finley, educator and editor, as a means of interesting the youth of America in the scientific principles underlying aviation. The three federal air secretaries, F. Truhee Davison, of the War department; Edwin P. Warner, of the Navy, and William C. McCracken, of the Commerce department, have accepted membership on the contest committee.

"Things here will never be quite the same since old Roswell Ripp is gone," said Riley Rezzidore of Petunia. "When he finally shut up and departed for the Better Land a strange bush fell upon the village. He had differed with and from everybody else on religion, politics and every other subject on earth, and was at all times ready to go state. In his opinion there were just two sides to every question—his own side and infernal foolishness. He never argued; he simply stated his position and then attempted to out-eyell all opposition, and usually accomplished his purpose."—Kansas City Star.

Using the principle employed by some garages in this country for quick cleaning of automobiles, a railway in France has installed large vacuum tunnels for its cars. All that is necessary is to pull a train through an archway lined with brushes and vacuum cleaning attachments, which are operated automatically, and the cars are thoroughly cleaned and polished when they emerge.

"When the tourist arrived home he pulled on his face and kissed the pavement of his native city."

"Emotion?"

"No, banana skin."—London Tit-Bits.

"Miss Denze, allow me to present Professor Bright." "Oh, professor, please do something absent-minded."

"I never told you how my husband proposed, did I?"

"No, did he propose?"

How learned many a man would be if he knew all that is in his own books!—Schoenbauer.

Men are great chiefly because they can't help it. It is seldom a pleasurable state.

"There's a place for everything." "Heh?" "Even wrinkles are valuable in selling a bulldog."

Friend—Are you affiliated with a reform organization? She—Indeed, I am. I'm married.

There are many records of hens producing 300 or more eggs in a year, but the average annual yield in the United States is only 72.

When a man has real troubles he keeps them to himself.

CHILDREN CRY FOR "CASTORIA"

Especially Prepared for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years to relieve babies and children of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep without opiates.

The genuine bears signature of

Case of Nerve

"Don't worry," said the dentist. "I always give my patients—ab—something to—ab—quiet their nerves."

"Then what was that fellow in there yelling for?" demanded the skeptical sufferer.

"More!"—American Legion Weekly.

Green's August Flower

is a mild laxative, and has been in use for sixty years for the relief of constipation, indigestion and similar stomach disorders. A trial will convince you of its merit. 30c and 60c bottles. At all druggists. G. G. Green, Inc., Woodbury, N. J.

Raleigh's Restless Spirit?

Bedlington church, Surrey, England, in which Sir Walter Raleigh is believed to have been married to the niece of Sir P. Carey, is to be restored. The headless ghost of Sir Walter is said to have been seen in the churchyard.

Tender, Aching, Perspiring Feet

Amazing Relief in 5 Minutes or Money Back.

Get a bottle of Moore's Emerald Oil with the understanding that if it does not put an end to the pain and soreness and do away with all offensive odors your money will be promptly returned.

Don't worry about how long you've been troubled or how many other preparations you have tried. This powerful penetrating oil is one preparation that will help to make your painful aching feet so healthy and free from corn and callous troubles that you'll be able to go anywhere and do anything in absolute foot comfort.

So marvelously powerful is Moore's Emerald Oil that thousands have found it gives wonderful results in the treatment of dangerous swollen or varicose veins.

FRECKLES

can be removed. For real satisfaction use Dr. C. H. Berry Co's Freckle Ointment. It does the work. Ask your dealer or by mail prepaid. \$1.25 and 60c. BEAUTY BOOKLET FREE DR. C. H. BERRY CO., CHICAGO, 2975 Michigan Ave.

England's Rich Coal Field

One of the richest coal fields in the world, estimated to contain 23,000,000,000 tons, has been discovered near Hull, England. It is a continuation of an exhausted vein and extends 40 miles to the coast.
