

## PERSONAL AND SOCIAL

### NOTICE OF REWARD

\$250 will be paid for information leading to the arrest and conviction of any person cutting fences on the north half of the Baca Flant.

C. L. NORTHCRAFT, Mgr. 9-2-4t

Mr. and Mrs. Carl Peterson of Lochiel were Patagonia visitors Thursday.

Mr. and Mrs. R. C. Blabon were Tucson visitors Sunday.

Five extinguisher chemicals may be obtained of Bert Blabon at the East Side garage, Patagonia, for all makes of apparatus.

Mr. and Mrs. T. E. Heady of the San Rafael ranch returned home Monday evening from Tucson, where they completed arrangements for the entry of Mrs. Heady's daughter, Miss Helen Elliott, into the University of Arizona.

N. H. Evans of North Carolina was a visitor Tuesday and Wednesday at the San Rafael Valley ranch of Miss Grace Van Osedale.

Our Golden Crust Bread is the best that can be made. You can get it fresh in Patagonia by 9 o'clock a. m. Made by HOME BAKERY, Nogales, Ariz.

Customs Officer Harry Steen reported the capture of a Mexican booze smuggler Wednesday night near Lochiel. He was caught with two five-gallon cans filled with mescal.

### "UNCLE BILLIE" POWERS DIES

William T. Powers, familiarly known as "Uncle Billie," died last Friday night at the home of his sister, Mrs. Richard Farrell, at Harshaw, from heart failure.

He was 78 years old at the time of his death, and had been a familiar figure in this district for many years. Deceased had suffered for many years from rheumatism, but had been feeling much improved lately. His sudden death was not anticipated by his relatives and friends.

He is survived by two sisters, Mrs. Richard Farrell of Harshaw and the other a resident of New York city. Funeral services were held in Patagonia Sunday and were attended by a large number of friends and relatives.

### G. A. R. MEMBERS DECREASING

Grand Rapids, Sept. 15.—Thirty-seven thousand survivors of the Grand Army of the Republic voted today, through delegates at the national encampment, against a joint reunion of the northern and southern armies of the Civil War. The mortality rate among the veterans is about 12,000 a year. Commander-in-Chief Walsh said, and the Grand Army will have disappeared almost entirely within three years. He reiterated the statement that "while two of us are left, we'll stick together."

### "IT PAYS TO ADVERTISE" MICKIE SAYS—

GASOL CRITICISM DON'T WORRY US MUCH, AS EVERY PERSON IN THE PUBLIC EYE, FROM MOAN DOWN TO THE PRESIDENT OF THE UNITED STATES, HAS BEEN A TARGET FOR THE KNOCKERS' YEP

Our Golden Crust Bread is the best that can be made. You can get it fresh in Patagonia by 9 o'clock a. m. Made by HOME BAKERY, Nogales, Ariz.

Regan Gardner of Elgin narrowly escaped death early Wednesday morning, when the A. C. Dalton milk truck overturned near the Thurber-ranch on the Patagonia-Nogales highway while on its way to Nogales with a load of milk. The truck was badly damaged, the milk was lost, but the driver escaped serious injury.

FOR SALE—10-ft. Aermotor windmill, 2 1/2 h.p. gasoline engine and Myers Bulldozer pumpjack. Inquire at The Patagonian office. 9-16-4tp

E. F. Bohlinger was a business visitor in the county seat Thursday.

Mrs. Grace A. Farrell, county school superintendent and Charles Pierce returned early Thursday morning from Phoenix, where the former was attending a conference of the state board of education.

WILL EXCHANGE a Winchester hammerless, pump action, long barrel, 12-gauge shotgun, model 1912, practically new, for a good 20-gauge shotgun of same pattern. Inquire at The Patagonian Office for further information.

Harry B. Tinsman of the San Rafael Valley was a Tucson visitor over the week-end.

Frank Powers of the World's Fair line was in town today on business.

### VAUGHN NEWS

Jim Fraizer spent the week-end at his Vaughn ranch. He is employed at Fort Huachuca.

Mr. and Mrs. James Parker visited their ranch Sunday, coming from Fairbank, where they are making their temporary home.

The ladies of the Adobe Church on the Hill will give a plate luncheon on the evening of Friday, September 23, at 8 o'clock, for the purpose of raising money to finish payment for the piano.

Mr. and Mrs. George C. Sleeth are expected to be at the Adobe church the second Sunday in October. They are on their way here from New York to spend the winter at their Tucson home. They have taken a great interest in religious work in southern Arizona and are frequent visitors at the Vaughn church during the winter months.

Mrs. H. L. Stoddard has returned to her Vaughn ranch following a visit with her mother in Superior.

Mr. and Mrs. R. E. Ross have leased the old Frank Neil ranch in Vaughn and will stay indefinitely on account of their son's bad health. Mr. Ross recently sold his dry cows in Tucson.

### BROCK AND SCHLEE ABANDON IDEA OF FLYING THE PACIFIC

Yokyo, Sept. 15.—William Brock and Edward Schlee, aviators who flew more than half way around the world, today made plans to return to the United States by steamer. The flyers announced that if the Pride of Detroit could be embarked upon any liner they would return on that vessel.

The decision to abandon the flight is due to persistent arguments of American Ambassador MacVeagh and friends of the flyers. At first Brock and Schlee declined to listen, but at noon the abandonment was announced. The flyers appeared angry and declined to discuss the reasons for the announcement.

### COPPER STOCKS 10,734 TONS LESS THAN AT END OF JULY

New York, Sept. 14.—Stocks of refined copper on August 31 were 93,654 tons, a drop of 10,734 tons from July. Production in North and South America during August was 119,736 tons and shipments 130,520 tons, the American Bureau of Metal Statistics reports.

A British society has issued a book containing portions of the Bible in 550 languages.

## Dr. Crane Finds His Greatest Thrill In Ministering to Millions of People

"Ministering to millions of people gives me more of a thrill and greater joy than anything else I could possibly do."

This statement was recently made in an interview by Dr. Frank Crane, noted author and writer, whose daily editorials are read by more than 20,000,000 newspaper readers throughout the country.

As Dr. Crane talked, the interviewer was impressed by the breadth and depth of his human sympathy, his anxiety to serve his fellow man.

"Early in my life as a preacher," continued Dr. Crane, "I learned that people didn't want to listen to long sermons. So I made mine short, cut them down to twenty-five minutes and found that even then they were too long. This set me to thinking. If people only seemed to grasp one point at a time why not give it to them just that way? The thought came to me that if they could see this one point stated briefly in print it would impress itself on their minds as no speaker could possibly do."

Dr. Crane then described the heart-aches and disappointments which followed before he succeeded in getting this idea across; of resigning his pastorate in Worcester, Mass.; of tramping the beaten paths to editorial offices where he found it difficult to get a hearing; and of finally accepting an offer of \$1 a day to write six editorials a week.

That was less than fifteen years ago and today his editorial is seen in papers in every state in the Union, in England, France, Denmark, India, South Africa, Australia and Japan. He is widely quoted from platform and pulpit. His name in America is a household word for truly, he ministers to millions.

"How do you keep your fingers on the pulse of the reading public?" the interviewer asked. "How can you be sure that your editorials are striking a responsive chord?"

Dr. Frank Crane

A secretary entered the room with an armful of mail.

"Here's how I know that I am reaching the hearts of my readers," replied Dr. Crane, pointing to the huge stack of mail. "Each day I receive hundreds of greeting cards, messages of appreciation from my readers all over the world." He held up a dozen cards for the interviewer's inspection. There were greeting cards from half a dozen states, two from England, one from Mexico, one from Australia and one from far away Singapore.

"My job is to study people, and to write to and for them. I know them enough to know they don't want to be preached at nor to hear me moralizing about them. They are after knowledge about themselves. That's what they want to know — themselves. And when through the course of the year I receive thousands of greeting cards and cheerful messages, I know that in something I wrote the sender of the card had seen — himself."

### INCREASE IN ENROLLMENT AT PATAGONIA UNION HIGH

With an increase of 22 students over last year's attendance the Patagonia Union high school opened with a full high school course of study. Fifty-three pupils are on the register so far. Two new courses of study have been put into the school. A commercial and a Spanish course. Chemistry also has been added.

Following is the teaching staff: R. H. Zimmerman (principal), history, chemistry, business arithmetic; Mrs. Harlowe M. Mills, Spanish and English; Miss Basha G. Simons, typing, shorthand, physiology and bookkeeping; Miss Sadie Perley, home economics and general science; Mack W. Gibbs, mathematics and agriculture.

Due to the increase in enrollment, the farm shop boys have constructed a building to be used as a science laboratory, which will accommodate 30 students.

A staff for the Mesquite, the school paper, has been selected, and they give promise of making it a better paper than it was last year.

Monday an election will be held to decide who the officers of the student body will be. There are two tickets in the field. The "Reds" and the "Greens." Results of the election will be given in next week's issue.

### State Mining Notes

Kingman—Lease taken on old Enterprise mine about 20 miles east of here, and development is under way.

Oatman—Rapid progress is being made in unwatering the shaft of the Lucky Boy mine in the Oatman Eureka field.

Kingman—Ore from the 20th Century mine will be milled.

Jerome—Verde Contact Copper Co. to develop claims in Verde main district.

Chloride—Chloride Mining Company is working two shifts and putting through 100 tons of ore daily.

Kingman—Rotimbering of the Cole shaft of the Calumet & Arizona Mining Co. is down to the 800-foot level.

Bowie—Drilling continues at Bowie well No. 1 with two shifts working.

U. of A. May Have 1800 Students Tucson, Sept. 15.—It is predicted that by tonight 1400 students will be enrolled for the first semester at the University of Arizona. Registrar C. Z. Leisher stated yesterday that more than 1300 names were already on the rolls at that time, and that it was possible that the total would reach the neighborhood of 1800 by the time all have registered.

Joseph Werner of Wilmette, Ill., pulled his own tooth with a pair of pliers and nearly bled to death before he could get to a doctor.

### JAMES T. PARKER ADMITTED TO BAIL FOLLOWING DISAGREEMENT OF TRIAL JURY

Tucson, Sept. 9.—At about 3 o'clock this afternoon the jury considering the evidence in the trial of James T. Parker, charged with the murder of Urey Ford, night merchant police, appeared in superior court and reported that no verdict could be reached.

The foreman stated that the jurors had exhausted every practical effort to secure a verdict, but that the final vote stood 9 and 3, but he did not state what the nine or three were so determined upon.

Judge Jencks then questioned the foreman if there was any chance whatever of an agreement with further deliberation? The answer was, "No chance." The judge then asked other jurors and the attorneys in the case and they expressed the same opinion.

The jury was then dismissed by the court, and the defense attorneys immediately made an application for bail for the defendant. They asked that he be released "under heavy bail."

"Perhaps your idea of heavy bail and mine might be different," said the judge. "I consider a heavy bail about \$25,000, but I had in mind about \$10,000."

Defense counsel immediately objected, saying that \$5000 would be sufficiently high, as Parker was well known, had lived in this vicinity all his life, and was "not a floater."

The judge answered that possibly \$5000 might be sufficient to bring him back into court and it might be possible that he would be willing to return without bail, but that he felt that he could not reduce the bail below \$10,000, and added that \$10,000 bail could probably be furnished almost as easily as \$5000 by more than one person furnishing it. Therefore, he so ordered the bail fixed at \$10,000.

The case grew out of the killing of Urey Ford on the night of April 21, in front of the Consolidated National bank.

### SONORA BISHOP UNDER BOND

Tucson, Sept. 15.—The Rt. Rev. Juan Navarrette, bishop of Sonora, Mex., for whom a secret indictment was returned last week by the United States federal grand jury of the Tucson district court, yesterday came from his present home at Nogales, Ariz., and voluntarily surrendered to the federal authorities. A cash bond of \$2500 was furnished by the Rev. Peter Timmermans of the San Augustin church here, and Bishop Navarrette was released, pending his trial in federal court.

Navarrette is held on the charge of attempting to incite a military expedition into Mexico against the Calles government. He has been an exile from that country since the time of the trouble between the government and the Catholic churches.

The details of the United States charge against him have not been made public.

### RUTH ELDER SAYS SHE'LL FLY ACROSS ATLANTIC

Roosevelt Field, L. I., Sept. 15.—As determined as she is pretty, Miss Ruth Elder, the flying beauty contest winner of Lakeland, Fla., announced Wednesday night that nothing would deter her from hopping to Paris in her monoplane, American Girl.

Miss Elder and her co-pilot, George Haldeman, arrived from Wheeling, W. Va., at 6:45 p. m., making the flight in 5 hours 15 minutes.

Miss Elder wants to start "in a day or two." The small yellow monoplane, a replica of the ill-fated Sir John Carling, and the Brock and Schlee plane, may possibly undergo necessary tests by Sunday.

### PIECE OF OLD GLORY WRECKAGE FOUND BY STEAMER

St. Johns, N. F., Sept. 12.—The government steamer Kyle, chartered by the New York Daily Mirror to search for the missing transatlantic monoplane Old Glory, reported to the government tonight that she had picked up a piece of the plane late today, but had found no trace of the crew.

The message from the Kyle said the wreckage was found at 4:30 this afternoon.

The ship's position was given at latitude 51:17 north, longitude 39:32 west.

No particulars of the parts of Old Glory which were picked up were forwarded to the government.

### TIDAL WAVE CAUSES DEATH OF 1000 IN JAPAN

London, Sept. 14.—The Tokyo correspondent of the Daily Express said that casualties from storms on the Kyushu Island are expected to exceed 1000 killed and injured. The dispatch added: "Two hundred seventy people killed in Kumamoto prefecture. One thousand are missing and 750 houses washed away and 2000 others flooded."

The tidal wave followed deep rumblings, indicating a submarine earthquake. The wave rose 10 feet high over the towns of Kojima and Nakamura, causing wholesale destruction. Some houses were swept two miles inland.

Many districts in Korea and Japan were visited by a terrific typhoon and heavy damage was caused at widely scattered points.

Five thousand houses were inundated and 15,000 made homeless at Moura. Nagasaki suffered heavy damage. Radio appeals from Kojima and other districts indicate the lack of food and medical supplies.

It is impossible to estimate the damage.

Tokyo, Sept. 14.—The typhoon which has been sweeping the Island of Kyushu, left a toll of 400 dead and missing, said an official estimate here today.

The number of injured is placed at 300 and close to 1000 homes have been wrecked.

One steamer sank and five sailors were drowned.

### E. G. LEWIS GETS SIX YEARS IN FEDERAL PENITENTIARY

Los Angeles, Sept. 13.—E. G. Lewis, promoter of Atascadero Estates of California and of University City, a suburb of St. Louis, Mo., today was sentenced to serve six years in the federal penitentiary at Michael's Island, Washington, following conviction last week of using the mails to defraud in his promotion schemes.

Major H. L. Kramer, associated with Lewis in his transactions, and convicted at the same time, was sentenced to serve two years in prison and pay a fine of \$250 on each of nine counts charging mail fraud. The sentences will run concurrently. He also was ordered to pay a fine of \$2500 on a tenth count charging conspiracy.

Lewis was assessed fines totalling \$13,000.

The sentences were pronounced after motions for new trials, based on the alleged misconduct of a juror, were denied.

Lewis is credited with having gotten more than \$100,000,000 in the United States during 20 years of high caliber promoting.

Kramer, who is 62 years old, insisted that he had had no representation at the trial. "I have spent 20 years in the advertising business," he told the court, "and have expended more than \$10,000,000 for advertising things of my own creation. During that time I have paid the government half a million dollars for postage stamps alone." He was the inventor of several widely advertised remedies.

### STORM DAMAGE SLIGHT IN THIS STATE

Phoenix, Sept. 13.—Arizona today took inventory of severe rainstorms which swept the state Sunday night and Monday. The gain to crops and range was found to have surpassed the material damage by many thousands of dollars.

Practically no damage was done to the cotton crop and lands in cultivation, for fall and winter crops received a bountiful amount of moisture. Range lands in the northern, eastern and south-central portion of the state were materially benefited by the precipitation which passed the one-inch mark in most districts and reached as high as six inches in Yavapai county.

Highways were reported to be passable in all sections of the state. No irreparable damage was reported to State Engineer Lefebvre, although maintenance crews were busy putting interstate roads in first class condition.

Damage to the intake of the Phoenix city water system on the Verde river was reported in an official statement by the city engineer, and city authorities have requested citizens to discontinue sprinkling their lawns.

To prevent the destruction of historic buildings, the entire city of Toledo, Spain, has been made a national monument by official decree.

### LARGE CROWD OF SANTA CRUZ CITIZENS TO SEE LINDBERGH

Next Friday, September 23, many Santa Cruz county citizens will go to Tucson to welcome Colonel Charles A. Lindbergh, when he arrives in that city on his trip around the United States in the interest of aviation. A special train will be run from Nogales on which it is expected at least 500 persons.

The 21st Infantry band from Camp Little and approximately 100 soldiers from there will take the special train for Tucson besides the large number of others who have signified their intention of going.

The Nogales special will leave the border at 9:30 a. m. Friday and will arrive in Tucson at 12 m. The return trip will land the excursionists in Nogales at 10:30 p. m.

### LEWIS W. DOUGLAS SAYS STATE GOVERNMENT IS ROTTEN

Phoenix, Sept. 13.—The Arizona Republican quoted Congressman Lewis W. Douglas, democrat, as saying in an interview:

"I have no hesitancy in branding the present state administration as the most inefficient and deplorable in history. Politics is the dominant factor in the state government, which is controlled by a group of political tricksters seeking to further their own personal ends. I cannot boast of Arizona's government. In fact, I feel ashamed when I look about me and see how the state is controlled. When I say the state administration is deplorable, I mean what I say. "In fact, I would add that the present administration is absolutely rotten, and with a group of politicians in control of state offices we can expect little relief."

### MEXICANS CELEBRATING GREAT NATIONAL HOLIDAY

Last night at 11 o'clock Mexican independence was again proclaimed, as has been the case for many years, and local Mexicans started on a two-day fiesta with a dance in the local opera house.

Historical Data Since September 15, 1810, when Don Miguel Hidalgo, a priest, to whom Mexican people proclaim allegiance as the man who freed the nation from foreign oppression, sounded the famous "El Grito," Mexican independence has been in jeopardy many times, but it is the independence proclaimed by Don Hidalgo that Mexico is now celebrating.

It was on the night of September 13, 1810, that the Mexican people, freed from the fear of French or Spanish intervention, rose against the politico-ecclesiastical oligarchy above them and under the leadership of Don Hidalgo at Guanajuato started a revolt. Don Hidalgo was defeated, captured and executed the following year, but another priest, Morelos, took his place, and in 1815 shared his fate, after, in 1813, proclaimed the independence of Mexico.

From then on the country was torn with guerrilla warfare. In 1820 the upper class with its superior resources had again regained the upper hand and there was one lone revolutionary leader left, the half-breed, Guerrero. Later the republic became an independent monarchy under Ferdinand of Spain. Again the country was ruled by viceroys, and in a war among themselves, Mexican independence under Ferdinand or a Bourbon prince was recognized.

The first Mexican congress met on February 23, 1822, and Iturbide was made emperor. He soon quarreled with the congress and Santa Anna started making trouble. Iturbide abdicated April 19, 1823, and later was shot. A constitution modeled after that of the United States was adopted on October 4, 1824, but with many changes.

Since then there have been many changes in the constitution, a new one being adopted with each succeeding revolution. Many heroes of Mexico rose and fell, among them Benito Juarez. The constitution adopted February 5, 1857, with amendments, is the same under which the republic now operates.

Between times there was the taking over of the country by the soldiers of Louis Napoleon and the crowning of Maximilian as emperor of Mexico. Later Juarez forced him out and he was shot on June 19, 1867.

**A PATRIOTIC CREED**

"The American's Creed," adopted by congress in 1919, is not as well known to the citizens of the country as it should be.

This creed was selected through a contest, open to all Americans, for the purpose of securing "the best summary of the political faith of America." The author of the successful manuscript was William Tyler Page, a descendant of President Tyler.

The phrases composing it are taken from the Preamble and the Constitution of the United States, the Declaration of Independence, the Oath of Allegiance and from utterances of distinguished patriots, all woven together into a complete and lofty sentiment, as follows:

"I believe in the United States of America as a government of the people, by the people, for the people; whose just powers are derived from the common consent of the governed; a democracy in a republic; a sovereign nation of many sovereign states; a perfect union, one and inseparable; established upon those principles of freedom, equality, justice and humanity for which American patriots sacrificed their lives and fortunes.

"I therefore believe it is my duty to my country to love it, support its Constitution; to obey its laws; to respect its flag, and to defend it against all enemies.

**SUCCESS STANDARDS**

Everyone leaves behind some impression on the world, whether for good or evil. Often what the world calls success during a person's lifetime turns to dross in the final accounting. Mere accumulation of wealth is a poor standard by which to judge the usefulness of one's life.

When the late Franklin D. Lane, former secretary of the interior, died in 1921, it was said that he left no estate whatever. Yet he was one of the finest public servants that ever graced a president's cabinet.

The estate of the late Samuel Gompers amounted to but \$30,000, an insignificant sum in this age of multimillionaires, but the influence of his work will be felt for generations yet to come.

Hundreds of instances may be recalled in which men who have made a powerful impression on the world have died comparatively poor in material possessions.

After all, the most priceless legacy one may leave to his family and to his country is a record of duty well performed. While material success is not to be despised, it should never be sought through the sacrifice of ideals. Service to humanity is of more consequence than the accumulation of wealth, and true success depends upon what we contribute to the betterment of our fellow men.

**NO CAUSE FOR ALARM**

There exists in this country today two widely differing classes of publicists, who speak and write of war and peace. Fortunately, both classes agree that war is a bad thing and peace a good thing, but their views as to how peace may be best preserved are far apart.

One class urges preparedness in the form of surpassing armaments as the only safeguard, while the other advocates refusal to engage in war under any circumstances.

The common sense view is somewhere between these two extremes. We must have protection against possible aggression, yet we should diligently impress on our statesmen the fact that our people, especially the common people who bear the brunt, are thoroughly tired of war.

Much injury is being done to our reputation as a peace-loving nation by undue agitation for extensive military preparedness. Our army and navy experts are keeping abreast of the times in their technical studies and experiments, as they should do, but the country is in no mood to stand for excessive expenditures for armaments which may be obsolete within a few years. There is nothing to get excited about just now.

Rouged lip stains spoil the looks of pretty white cigarettes.

Some who stand for progress are content to remain standing.

**Stage Is Most Lucrative of Arts, Declares Ziegfeld Follies Star**

RUTH ETTING

**Ruth Etting, Artist and Actress, Finds Stage a Gold Mine**

New York City—The stage is the only one of the arts that pays—pays the landlord and the milkman as well as the artist's yearning for fame and a creative outlet.

Ruth Etting, singer, dancer, song writer, star in the new Ziegfeld Follies, speaks with the confidence that comes with the knowledge of a four figure a week contract at hand.

"A painter may paint masterpieces, a musician may be a second Mozart, but the chances are great that the masterpieces may not be discovered until after the painter is buried, and the musician may never have enough money to hire a hall," declares Miss Etting. "This is especially true when the artist happens to be a woman. A career on the stage, if the woman is truly talented, brings its reward, both monetary and artistic, while the woman is still young enough to enjoy that reward. The world of the theatre is a rapid moving world, and more or less faithful once it has placed the laurel wreath on a favorite. To a woman who makes good on the stage there are many profitable years

in which she may earn further fame."

While the young actress who only a short time ago left her home in David City, Nebraska, is enthusiastic over the stage as a career for women, she warns the modern girl that she must be ready to meet the demands of the stage.

"Few artistic professions demand as much brain and brawn work.

"Perhaps that is the reason for the large salaries. In my own case, every song must be separately studied as each picture must be clear to the audience for both eyes and ears. I am singing a waltz ballad now 'Hawaii Moon,' in which the composer has captured the music of the sea, not the angry, ominous, dashing of turbulent waves but the haunting melody of South Sea waters.

"I try to express a music that is the lullaby, the love song of an island people, the moaning, plaintiveness of the sea that surrounds them.

"This is by no means easy and I worked for weeks before I got the desired effects.

"Stage life is glorious, thrilling, lucrative, but every thrill claims its quota of the hardest kind of mental and often physical endeavor. But I haven't one regret at my choice of profession."

A hotel owners' association will take drastic steps to prevent guests being robbed by transient crooks. Proprietors must protect their rights.

A New York specialist says a woman's refusal to tal kis a sign of insanity. Fortunately, such cases are rare.

**TEN HEALTH RULES**

While not particularly original, the ten commandments of health suggested by Miss Maria Leonard, dean of women at the University of Illinois, are worthy of consideration. She says: "Eat less, chew more; ride less, walk more; clothe less, bathe more; worry less, work more; idle less, play more talk less, think more go less, sleep more; waste less, give more; scold less, laugh more; preach less, practice more."

There is a pretty good lot of advice in the above forty words, which are worth going over several times, giving thought to each suggestion. Better observance of these rules would tend to promote health and consequently a longer and more useful life.

A hypocrite is one who pretends to believe you when he knows you are lying.

When you take steps to get away from debt, don't let your foot slip.

William M. Small of St. Louis believes that the sun revolves around the earth and offers \$100 for proof to the contrary. The difficulty in earning that \$100 would not be in furnishing the proof, but in getting the same through William's understanding.

A Pennsylvania man got so excited over his preparations to commit suicide that he dropped dead of heart failure.

Under a new Turkish law all officials and other persons employed by the government must wear clothing made in Turkey. This is a very practical as well as drastic application of the trade-at-home idea.

It takes sophistication to enable a flapper to look unsophisticated.

Some husbands never seem able to bring the truth home to their wives.

### VICTIMS OF DELUSION

From India comes news of further human life sacrifice to superstition. The young son of a native official fell sick and was thought to be possessed of the devil, whereupon it was sought to appease a local goddess and exorcise the devil by offering up the lad's sister as a sacrifice, which was done.

The boy failed to respond to this vicarious treatment, so he was bound naked near a holy place and allowed to die of starvation and exposure.

The boy's father and two brothers were sentenced to death for the crime and his sister-in-law was given life imprisonment.

While such proceedings appear heathenish to us today, and they certainly are heathenish, we may reflect that equally atrocious crimes were committed at Salem, Mass., at the instigation of a president of Harvard University, Rev. Increase Mather, and his son, Rev. Cotton Mather, in 1692.

With the horrible Salem witchcraft delusion in mind, we should not condemn the benighted natives of India too severely.

### TO HOLDERS OF SECOND LIBERTY LOAN 4 PER CENT BONDS

### EXCHANGE OFFERING OF NEW TREASURY NOTES

Second Liberty Loan bonds have been called for payment on November 15th next, and no interest will be paid after that date.

Notice is given of a new offering of United States Treasury notes, in exchange for Second Liberty Loan Converted 4 1/2 per cent bonds. The new notes will be dated September 15, 1927, and will bear interest from that date at the rate of 3 1/2 per cent. The notes will mature in five years but may be called for redemption after three years.

Interest on Second Liberty Loan Converted 4 1/2 per cent bonds surrendered and accepted in exchange will be paid to November 15, 1927. The price of the new notes, in 100's, holders surrendering Second Liberty Loan Converted 4 1/2 per cent bonds in exchange will receive, at the time of delivery of the new notes, interest on such Second Liberty Loan Converted 4 1/2 per cent bonds from May 15, 1927, to November 15, 1927, less the premium on the new notes issued.

Holders of Second Liberty Loan Converted 4 1/2 per cent bonds who desire to take advantage of this opportunity to obtain Treasury notes of the new issue, should arrange with their bank for such exchange at the earliest possible date, as this offer will remain open only for a limited period after September 15th.

Further information may be obtained from banks or trust companies, or from any Federal Reserve Bank.

A. W. MELLON, Secretary of the Treasury, Washington, D. C., September 6, 1927.

# Announcing- THE NEW ZEROLENE

To the motoring public of the Pacific West the Standard Oil Company of California presents The New Zerolene, "The Standard Oil for Motor Cars".

THIS new lubricant is the latest achievement in petroleum products of the Company's research laboratories,—a modern oil for modern motor cars.

The New Zerolene is a wholly distilled oil—by Company processes which take only the highest lubricating values from the best of California crude oils. Every drop is pure lubricant.

The New Zerolene "stands up" at any engine temperature.

The New Zerolene forms no hard carbon.

The New Zerolene does not "thin out"—when the crankcase is drained it is still "live" and "oily".

The New Zerolene is economical—in initial cost and in amount consumed.

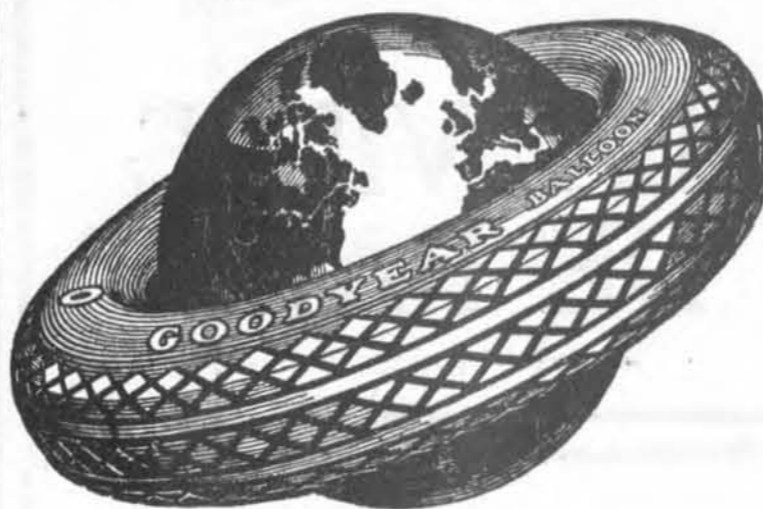

The New Zerolene is made in three grades or bodies, No. 3, No. 5 and No. 7. There is a correct grade for your car and every car made.

Zerolene "F" for Fords, an oil especially manufactured to meet the demands of the Model T Ford, remains unchanged.

At all Standard Oil Service Stations and at dealers.

MONEY CAN'T BUY A BETTER OIL than THE NEW ZEROLENE

STANDARD OIL COMPANY OF CALIFORNIA

People who wouldn't think of going to any but a good, reputable dealer for food, clothing, or furniture, patronize the worst kind of "dumps" when it comes time to buy a tire.

They do this thinking it is necessary in order to get a tire bargain.

We'll sell you the best tire made—a Goodyear—at a price as low as you can get anywhere.

**SPokane-GOTHAM DERBY NEXT MONDAY; 50 PLANES ENTERED**

Spokane, Wash., Sept. 13.—Fifty airplanes were declared eligible today for the New York-Spokane air derby races starting from Roosevelt field next Monday and Tuesday.

Eighteen have entered in the Class A race for larger planes, which starts at 5 a. m. Tuesday, and 32 in the Class B race, to start at 5 a. m. Monday.

Six airplanes have been entered in the New York-Spokane non-stop race, for which entries will not close until Thursday.

Six airplanes have been entered in

the San Francisco-Spokane air derby races, two in the Class-A race and four in the Class B contest.

Entries for the national air races here September 23 and 24 also remain open.

We hear a good deal nowadays about the young ideas of some of our older men, but it appears that this is nothing new. An old newspaper published 40 years ago records the stunt of a farmer near Owingsville, Ky., which isn't slow. A neighbor girl was in love with his two sons and couldn't make a choice, so the old fellow sent them both away, and then, being a widower, married the girl himself.

Charles Blazier of Brooks, Alberta, Canada, owns what is said to be the only antelope farm in the world.

Former Grand Duke Dimitri of Russia is now employed as a wine salesman in France.

The Freeman's Journal of Dublin, published for 161 years, has suspended publication.

Discovery of a new source of radium supply on the western coast of Sweden has been reported.

A doctor gets paid according to his knowledge of the patient's physical and financial condition.

The government of Norway is spending \$200,000 in building a church for Norwegian sailors in London.

**WHAT'S NEW?**

Dr. Charles Russ of England claims to be making progress toward proving his theory that certain rays or emanations are emitted from the human eye, which may account for the power the gaze of some persons has upon others.

Composition wall board only one-half inch thick, but capable of resisting fire and sudden temperature changes, has been patented.

A new stabilizer for airplanes, which automatically adjusts the machine's rudders by an electrical device, has been invented in France.

It is claimed that a stone-cutting machine recently invented will do anything in stone that a circular saw will do in cutting lumber.

Wire so fine that it cannot be seen with the naked eye, yet having considerable strength, has been made by George Taylor, a government physicist. This wire will be useful in surgery and in certain phases of electrical work.

From British Honduras come some strange animals that crawl like alligators, have thick armor like turtles and can jump more than six feet. If a pedestrian were like that, he might cross the street with reasonable safety these days.

**WALTER P. CHRYSLER'S TRAFFIC TALKS**

WIDE STREETS NEEDED IN SUBURBS

Developers of suburban property have learned that it is quite necessary to provide wide streets and substantial paving. To lay out narrow streets has proved unprofitable because families are building homes with two and three-car garages attached and streets must be of a width to make possible easy and safe use of motor cars.

The suburban family wants more street room and less congestion and is in the country partly for that reason. Realtors know this.

The modern family in many instances requires a car for father's business and another for the other members of the family. Often a car is needed to get the children to school.

Good cars at low prices today make two available for the former price of one.

Many find that all of the adult members of the family require their own cars.

Cities rapidly are paying more and more attention to inlets and outlets. The motor car has made possible escape from congested areas, and consequently there is need for wide highways leading to and from the city.

When one makes a study of the progress the American cities are making in adapting themselves to the requirements of motor vehicular transportation and in solving traffic problems, he is inclined to pay rather eloquent tribute to the resourcefulness and enterprise of the American city. To be sure there are many problems yet unsolved and some of them are very perplexing but in time a solution for those same problems will be found.

**CARSON PATENTS NOT NEW, SAY DEFENSE ATTORNEYS**

Tucson, Sept. 15.—The Carson reverberatory furnace patents are not new, was the contention of the defense counsel yesterday in the celebrated patent case involving millions of dollars, now being fought out in the United States district court.

Attacks against the validity of the patents were repeatedly launched by

H. A. Elliott of Ellinwood & Ross of Bisbee, who is chief counsel for the Phelps Dodge Corporation, one of two defendants.

The defense attorney endeavored to trace the side-charging idea in reverberating furnaces as far back as the 60's, and even pointed to a similar custom that prevailed in Swansea, Wales, in olden times.

## COATS MATCH BLANKET OR RUG; SMALL TYPES IN FALL MILLINERY

IT WOULD seem as if the mode is taking more and more to the idea of moving in "sets." For our handbags and hats and belts and shoes to be matched—there's no longer a thrill in that. In fact, matching sets like these have grown to be a habit, not a novelty.

That one's coat be matched to the color of one's car, or for it to be fashioned of the identical plaid of one's motor or steamer rug—well that is a different story. Anyway, fashion's latest wrinkle is to accompany the plaid coat worn by the traveler at sea or the motorist, with a blanket or rug to match.

It is really not necessary to be motorizing or crossing the ocean in order

the season is far advanced. Even now backless pads and little wings are used unattractively—quills also.

The newer felts have a lustrous, satiny finish, with long nap. These are very aptly called soleil felts. There are as many velvet as felt hats among early models. Quite a few models are of velvet and felt in compose.

A representative group of snug-fitting hats is presented in the illustration as follows:

The first hat is black felt with a tiny excise of a brim done in satin. A gold galloon applique emphasizes an earlap trim, which repeats at the opposite side.

A skullcap with a flare which bridges the top of the hat is illus-

COAT MATCHES THE BLANKET

to acquire one of these luxurious coats, for they are to be had without the rug. The real object of the picture is to convey the fact of the employment of these handsome woolen steamer blankets for the making of the better grade sports coats such as are gracing this autumn's style parade.

These patrician sports coats declare the fact of quality in not only the superb cloakings of which they are made, but equally so in the elegance of the furs which trim them. Some of the favorite furs used are pointed lynx, natural vicuña, genuine wolf and fox, some fitch, and there is a special vogue for beaver. It develops also, this season, that pointed furs are considered outstanding.

Very swagger coats are also made of novelty patternings, rough

trated to the right at the top. It, too, is of felt in the new cocon shade. It stresses the fashionable buckle-trim.

Black stitched suede felt is smartly designed in a unique shape shown to the left, below. It displays a handsome ornament such as are in such active use this season.

To the right, below, the shape is felt with cut-out leaves, revealing a velvet background. Rhinestone ornaments add a decided touch of smartness.

An ingenious handling of felt with velvet is featured in the little cling-tight hat shown last. The felt is slashed just large enough to let a tab of the same slip through.

Tiny cloches which cling to the head like a cap are made entirely of shirred velvet. Sometimes an enormous choux of the velvet is placed at

FALL MILLINERY TYPES ALL SMALL

cheviot and camel's hair cloaking, often unfurred, but perhaps having a smart scarf-collar. It is the proper thing to wear with these coats minus for a large flower of the cloth of which the coat is made.

Novelty coats show unique trimming touches of calfskin or snake-skin.

Paris modistes are still loyal to the little cling-tight shapes—and so are we in America. The skullcaps and toques in the autumn millinery collections are indulging in all sorts of whimsical notions which add to their allurements. Most of the new snug hats exploit the earlap effect, if not on both sides, at least on one.

There is every evidence of a wide use of ornaments, and feather fanciers still no doubt capture the mode before

one side. Then again the silhouette is not disturbed by any trimming, a sparkling ornament being the only adornment.

Milliners are also producing very fascinating effects by using velvet and felt together. Sometimes velvet in the form of drapes and choux trim the felt helmet or toque, or vice versa. A very effective working of the two together is achieved by fancifully designing the belt in cutout by patterning, which makes a fine showing against the velvet background.

Pyrography, done with a heated needle as on leather, is a new development which is producing wondrous effects on felt hats. Often the felt takes on, under this process, the aspect of tooled leather.

JULIA BOTTOMLEY.  
(©, 1927, Western Newspaper Union.)

## Two-Tube Set for City or Country

Distance, Volume, Selectivity Assured; Dry-Cell Tubes May Be Used.

By RODNEY VAMBRISK,  
in Radio World.

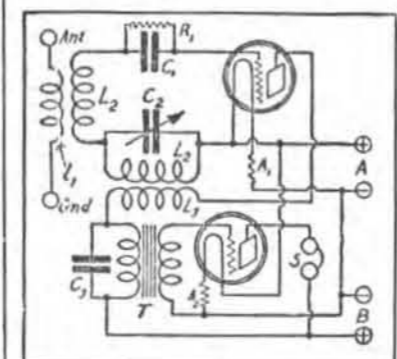

A good little receiver for distance, volume, and selectivity is shown in the diagram. It is also well suited for portable purposes, since the entire set can be built in a small space, and dry-cell tubes, such as the 4V-109 type, may be used. The antenna wire, properly insulated, can be strung up between two trees, while the ground can be made in the moist earth with the aid of a piece of iron pipe.

Only Two Controls.

There are only two controls, the variable condenser C1, which may be .0005, .00035 or .00025 mfd., and the tickler. The filaments are automatically adjusted with the aid of 4V-109 ampere tubes, A1 and A2. The coils can be made or purchased. When buying, be careful to select a coil matched to the variable condenser to be used. If the coils are to be made, use 2 1/2-inch diameter tubing for the primary and secondary windings and 1-inch tubing for the tickler. No. 22 dec wire can be used for the primary and secondary windings, No. 26 ssc being used for the tickler. L1 consists of ten turns, regardless of which type condenser is used. L2, using the .0005 mfd. condenser, consists of 55 turns. Using the .00035 mfd., it consists of 70 turns. Using the .00025 mfd., it consists of 80. The tickler, with the .0005 mfd., consists of 35 turns. With the .00035 and .00025 mfd., it consists of 40 turns. It will be necessary to wind the wire over itself in these cases. The grid condenser C1 has a capacity of .0001, while the grid leak R1 has a capacity of 6 megohms. The bypass condenser C3 has a capacity of 0.001 mfd. Any type of audio-frequency transformer can be used, the low ratio type being preferable.

A cabinet which is 6 inches high, 10 inches long and 6 inches deep can be used to house the parts and the batteries. Only about 5 inches of the space will be found necessary to house the tuning elements. "C" batteries should be used for filament supply, while for "B" supply, three small 2 1/2 volt batteries should be used. Place the coil and condenser as far apart as possible. The sockets should be placed with the F posts to the panel. The filament switch should be placed in between the tickler and condenser controls.

Although L2 in the circuit diagram is drawn as if it were two separate coils, it is only one continuous wind-

Circuit Diagram of Two-Tube Receiver for Home or Portable Use, Only Two Controls.

ing. It was drawn that way to indicate the mutual inductance relationship between the tickler (plate) and the grid winding.

Use Speaker in City.

When using the set in the city it will be found quite practical to use a speaker. The antenna should be about 75 feet in length. Either hard-drawn bare No. 14 copper or insulated wire should be used. The lead-in should be soldered onto the antenna wire, while the ends of the wire are securely attached to the insulators in the home; it is only necessary to hook the insulators onto screws in the tree when in the country. Try to choose a tree which has the fewest leaves and is in the direction of the smallest number of trees.

It will be found that good results may also be had by driving a large nail in the tree and tying the bare end of the antenna wire to this nail. The highest portion of the tree should be used. Use the main trunk of the tree if possible.

## Try to Get Best Tones When Operating Your Set

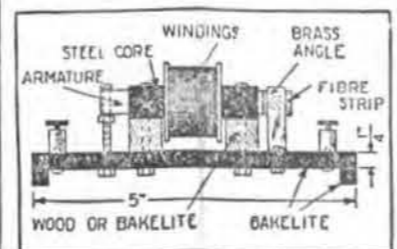

Some of the new sets feature what is known as a tone control. This is a small knob usually located on the inside of the set. While your set may not have anything on this order, nevertheless you have a very effective tone regulator in the form of the rheostat controls on the "B" eliminator.

The one that regulates the "B" current for the amplifier tubes often is sensitive. Just try adjusting it when the set is running and note the difference in tone. Where line voltages tend to vary widely it is well to make an occasional adjustment during a broadcast just to be sure you are getting the best from the set.

## Automatic Relay Switch

Built for Small Outlay  
By H. J. DANA,  
in Radio News.

Details of construction are here given for an automatic relay switch, designed to operate under the control of the filament switch of the radio set, which will cost the average experimenter but very little for materials. The magnet core is of 3/8-inch round iron 5 inches long, the ends of which are driven firmly into 3/8-inch holes in pole tips made of 1/2 by 1 1/2-inch iron, about 2 1/4 inches long. The armature is of 3/4 by 1-inch iron, one end of which is pivoted, or hinged to one of the pole tips as shown in the illustration.

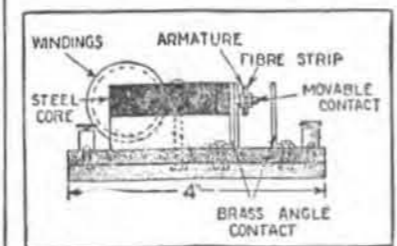

Side View of Automatic "B" Supply Switch, Which is Simple of Construction.

The other end of the armature is retained by a brass yoke which also serves as a guide. An adjustable flat spring on the armature serves to hold the contacts open when not in use.

The relay contacts consist of brass machine screws, to the tips of which are soldered the alloy contacts taken from the vibrator on a Ford spark coil. These contacts, which control the eliminator circuit, are threaded into insulated brass blocks, one of which is screwed to the free end of the armature, and one to the adjacent tip of the electromagnet. It will be noted that both these contacts are insulated from the armature and the pole tip, but connected by wires to binding post as shown.

The magnet coil was found to require about 200 ampere-turns to oper-

End Elevation of Automatic Switch, Showing Movable Contact and Armature.

ate the switch satisfactorily. It is also desirable to use a magnet coil which, for a radio set using six UV-109 tubes, would reduce the "A" supply not more than one-half volt. Such a winding was designed, using 600 turns of No. 16 cotton-covered magnet wire wound on the 3/8-inch iron core. This magnet coil is connected in series with one of the wires from the 4 1/2-volt "A" battery to the radio set. The relay contacts are connected in series in one of the 110-volt A. C. supply wires leading to the power unit.

## FOR THE NOTEBOOK

One thousand watts constitute a kilowatt.

A hot room or damp places will bring about the quick end of most dry cells.

Use a thin sliver of wood when testing and trouble-shooting about the receiver. Never use a screwdriver.

Cover battery terminals with a thin coating of grease to prevent the creepage of electrolyte from the cells.

When working on high-tension current, it is well to have the pliers insulated with rubber hose slipped over the handle.

Always store and keep the unused vacuum tubes, whether in home-made racks or cartons, standing upright in a vertical position.

Tin foil used in the construction of high-grade paper condensers usually consists of 85 per cent pure tin and 15 per cent lead.

Sound waves from a cone speaker, when placed in a corner, are sent out in much the same way as from a horn of large dimensions.

The receiving range of a set is less in summer than in winter, due to the energy absorbed by a greater amount of sunlight as sounds travel through space.

The effectiveness of the antenna system depends largely upon the character of the ground connection. A good ground connection is often more important than a good antenna.

Mount regular detector tubes on soft rubber sponges.

Cheap tubes consume an excessive amount of current.

Never apply a soldering iron on fixed condensers so long that the plastic seal becomes fluid. Such a condition proves that a poor man is handling the soldering iron.

When a trickle charger is used, it is not necessary to remove the vent caps of the storage "A" battery. But if the charging rate is two amperes or more, the caps should be removed.

It is folly to assume that the use of a trickling charger does away with the need for a battery hydrometer. It is a good check on the working of the charger.

## Cause Battery Drain

The use of poor tubes is costly. Have them tested occasionally and discard any that do not come up to the average standard. The use of old tubes simply means greater "B" battery consumption for the same signal strength.

The happy life may be poor in externals. It may have many restrictions, and many privations but, if it enshrines the pure in heart, the power of loving, serving, and sacrificing, it is beautiful in contrast to the worldly life of pleasure that finds no peace or rest in the soul itself, only perils activity like that of a cloud of insects that will die and leave no trace of the great interest of the world.

## WAYS WITH TAPIOCA

Tapioca is not half well enough appreciated as a dessert. It is especially inviting when combined with fruit of various kinds.

**Apple Tapioca.**—Take one-half cupful of the minute tapioca, one-half teaspoonful of salt and a cupful of sugar with three

cupfuls of boiling water. Cook until the tapioca is transparent, then pour it into a well-greased baking dish and cover the top with peeled and quartered apples. Bake until the apples are done. Serve hot or cold with sugar and cream.

**Peach Tapioca.**—Use a half dozen or more of fresh ripe peaches or canned ones, sprinkle with sugar to sweeten, then stand one hour. To one cupful of boiling water, add three cupfuls of boiling water, one-half cupful of sugar and one-half teaspoonful of salt. Cook until the tapioca is transparent. The peach juice from the can may be used in the cooking. Line a mold with the peaches, fill with the tapioca and bake thirty minutes. Serve with cream.

**Tapioca Rabbit.**—Cut fine one cupful of rich cheese, add it to a pint of milk, one-half teaspoonful of salt, a teaspoonful of mustard, dash of red pepper and two tablespoonfuls of minute tapioca. Cook until thick in a double boiler and just before serving add a well beaten egg. Serve on toast or crackers.

**Tapioca Custard.**—Soak two-thirds of a cupful of tapioca one hour in cold water, drain and add four cupfuls of scalded milk and cook in a double boiler for half an hour. Beat three eggs slightly, add one-half cupful of sugar, one teaspoonful of salt and pour on gradually the hot mixture. Turn into a buttered baking dish, add a tablespoonful of butter and bake thirty minutes in a slow oven.

**Maple Tapioca.**—If the maple sirup or sugar is at hand that is best, otherwise use one-fourth cupful of brown sugar with one-half teaspoonful of maple flavoring; add one-half teaspoonful of salt and pour on gradually the following: Three cupfuls of boiling water to which one-half cupful of tapioca has been added. Cook in a double boiler after the first ten minutes and serve cold with sugar and cream.

**Picklin' Time.** It is surprising how quickly the fruit closet shelves are filled by adding a jar or two, a few glasses of jelly or preserves and conserve as the fruit is in season. Everyone likes a tender luscious slice of watermelon pick-

le and it should be prepared for the winter months.

**Watermelon Pickles.**—Peel the rind and cut into neat slices. Cover with salt water and let stand overnight in water to cover. In the morning drain and cover with clear water, let cook until the rind is tender so that it pierces easily with a toothpick. Drain again and make a sirup, using brown sugar, a little vinegar, and a bag of spices; when boiling hot drop in the watermelon and cook until clear. Place the rind in jars and boil down the sirup until quite thick, then pour boiling hot over the pickles and seal.

Many prefer the ripe cucumber for sweet pickles. Treat them in the same way.

**Piccantini.**—Take two gallons of green tomatoes chopped fine, eight large onions also chopped, three quarts of vinegar, six tablespoonfuls of mustard seed, one tablespoonful each of cloves, allspice, mace, celery seed and two pounds of granulated sugar. Let the tomatoes and onions stand overnight sprinkled with salt. Drain in the morning, mix with the spices and cook until tender.

**Olive Oil Pickles.**—Take one hundred small cucumbers sliced thin, leaving the peeling on them. Also take three pints of small onions also sliced thin, three ounces of mustard seed, one ounce of celery seed, one ounce of white pepper and two scant cupfuls of olive oil. Add one and two-thirds cupfuls of salt to the cucumbers and let stand three hours. Let the sliced onions stand in cold water three hours. Drain well and mix the onions, oil and cucumbers with the spices. Put into jars and fill the jars with good vinegar. Keep in a cold place. Good in ten days.

**Mint Vinegar.**—Put into a quart jar enough fresh mint carefully washed to fill it loosely, fill up with vinegar and let stand well covered three weeks. Strain, bottle and cork. Such vinegar will keep for years. Tarragon, chervil, or any other herb may be used in the same manner.

From the western extremity of the Rain Forest the leaping waters of the cascade can be seen to best advantage, while its entire front, bordering on the great crevasse into which the river hurls itself, furnishes a superb view of the crest of the falls from end to end, except when interrupted by the whirling masses of spray that

flow from the seething cauldron below.

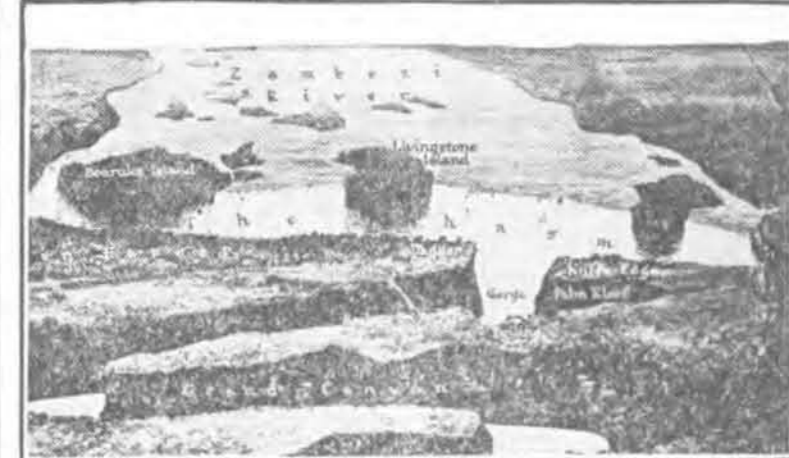

**View From Danger Point.** But the most thrilling scene is from the eastern extremity of the Rain Forest at Danger point, where the treacherous vines and grasses, clinging to the rocks with hungry, desperate roots, tempt one to the very verge of the precipitate cliffs that seem to tremble with the terrific shock of the cataract. So dense here at times is the mass of vapor hurled from the seething cauldron that the sun's rays can no longer penetrate it, and complete darkness envelops one as he is deluged by the downpour, while the terrific thunder of the falls drowns all other sounds and makes his own voice inaudible.

Occasionally a violent blast opens a rift through the blackness and mist, disclosing a momentary view of the lashing waters in the boiling cauldron, whose heaving, battling surface and pyramids of emerald foam change with kaleidoscopic rapidity.

An interesting spot is the kloof, or pain garden, hidden in the first of the serpentine curves of the canyon below the falls and reached from the bridge by a zigzag pathway, which descends in comparatively easy stages through a tangled primeval jungle to the rushing waters of the gorge below. Here again nature, with lavish hands, has shown her prodigality. Palms of enormous size and variety, bathed by eternal spray, mingle so densely with other forest growths as completely to shut out the direct rays of the sun and form a safe refuge for the richly plumbed parrots and monkeys that frolic in their branches. From the edge of the waters of this tropic jungle an upward view of the falls enables one to appreciate them in their full height and beauty, and to carry away a lasting impression of their majestic grandeur as seen from below.

The lip of the falls is broken by four islands, which interrupt its flow just as Gont Island divides Niagara. The natives appropriately named the first of these Boruka Isle—"divider of waters." Between this point and the shore the river channel is deep and shelving, and the leaping waters of the cascade rush with fearful impetuosity, shooting clear from the precipitous walls in their mad flight to the abyss 250 feet below, while the echoing woods ring with the thunder of their bolterous gloe.

# Victoria Falls

Perspective View of Victoria Falls.

(Prepared by the National Geographic Society, Washington, D. C.)

THE best-known scenic attraction in Africa is undoubtedly the Victoria falls of the Zambesi, on the line between southern and northern Rhodesia. This is one of the three greatest waterfalls in the world, worthy to rank with Niagara and with Iguazu in South America.

From immemorial times an atmosphere of mystery and superstition has hung over these African falls, so profound that Livingstone, who discovered them in 1855, had the greatest difficulty in persuading his followers to accompany him, as they believed the region to be the home of monsters and devils of destruction. Vestiges of these traditions still exist, although the Cape-to-Cairo railroad, which crosses the river less than half a mile below the falls, is rapidly dispelling them.

Going by rail from Bulawayo one sees, some 10 miles before reaching the falls, five enormous columns of vapor shooting their rose-tinted shafts hundreds of feet heavenward. This is a marvelous scene in the early morning. With the first rays of the rising sun comes a picture of color of wondrous loveliness. Delicate tints of violet, crimson, and heryl play through the mounting spray as it shoots higher and higher, ultimately disappearing as virgin clouds in heaven, while the ever-increasing thunder of the waters lends an added solemnity to the view.

Notwithstanding the magnitude of Victoria Falls, the first view of them is disappointing. Although nearly a mile in width and 400 feet in height, the grandeur of their proportions is eclipsed by the sudden disappearance of the river as it plunges into a narrow, rocky fissure extending across its entire width. Only at a single central point is there a breach in this fissure through which the falls can be seen and appreciated in their full proportions, where the converging waters rush madly to the zigzag canyon below. So restricted is this view that there is an entire absence of that awe-inspiring and almost paralyzing effect which strikes the visitor dumb with wonder and amazement when Niagara bursts on his near vision. On first sight of the Victoria falls one involuntarily exclaims, "Oh, how beautiful!" but they lack the majesty of Niagara.

**Must Be Seen Many Times.** No single visit can adequately reveal the fullness of their charms, but repeated excursions must be made to their islands and precipices, their rain forests and projecting crags, their rainbows and cataracts and many-sided views of their exquisite setting in the emerald framework of tropic forests, before their indescribable beauty can be appreciated. The fascination of discovering new and hidden charms from different points of view grows on the visitor and becomes one of the greatest attractions.

As the rainy season commences in Rhodesia in November and continues in the form of tropical showers until April, the most advantageous time to see the falls is in May, when the seething torrents are at their flood. November also has its attractions, when the river is low, for then the chasm is comparatively free from mist, disclosing vistas and views of the great abyss of rare beauty which before were wholly obscured by the whirling columns of spray.

The bridge of the Cape-to-Cairo railroad is the favorite point selected by artists, as the picture through the narrow gap at Danger point exhibits the full extent of the angry waters as they leap from the precipices to the abyss below.

There is a hotel near the railway. From its verandas a magnificent panorama of the canyon and Batoka gorge can be seen. A walk of half a mile brings one to "the place where the rain is born," as the natives call the Rain Forest. This is a phenomenon of rare beauty, especially to the botanist, for here the tropic heat and constantly falling spray produce a wealth of vegetation of wonderful luxuriance and variety. Every living thing bursts forth spontaneously here, from the delicate maiden-hair fern to the feathery-leaved palm and the hoary habob, 70 feet in circumference.

From the western extremity of the Rain Forest the leaping waters of the cascade can be seen to best advantage, while its entire front, bordering on the great crevasse into which the river hurls itself, furnishes a superb view of the crest of the falls from end to end, except when interrupted by the whirling masses of spray that

M., and a 45,000-egg incubator ordered.

## SOUTH-WEST NEWS NOTES

Work has been commenced on a new poultry hatchery building at Fortales, N. M., and a 45,000-egg incubator ordered.

Ralph Whistler upset the dogs, played some excellent golf and captured the New Mexico state golf championship trophy.

The first bale of cotton ginned at Las Cruces this season sold at auction, netting Mayfield & Hunt, the growers, 75 1/2 cents per pound.

A number of highway officials from various states are expected to attend the meeting of the U. S. Highway 66 association in Albuquerque, October 10th.

The Pinon Mohair Growers' Association near Alamogordo, N. M., is expecting a clip that will run considerably over 100,000 pounds. Shearing started September 5.

Contracts for the erection of three buildings at a cost of \$190,000 at the New Mexico state university were let at a recent meeting of the board of regents in Albuquerque.

He defeated Dr. P. G. Cornish, Jr., of Albuquerque, former state champion, in the final match at Raton, which was forced to the thirty-seventh hole after thrilling episodes.

The 1927-28 school year of the New Mexico School of Mines at Socorro, N. M., opened on September 6 with prospects bright for the most successful year in the history of the school.

R. E. Shepherd of Boise, Ida., was elected president of the Western States Taxpayers' Association at the annual meeting of delegates in Santa Fe. Boise was chosen as the 1928 convention city.

Paul H. Deming, formerly cashier of the Bank of Jerome, was brought back from California to face criminal charges in connection with the failure of the bank, after vainly trying to fight extradition.

Delinquent county and state taxes in the 14 counties of the state of Arizona totaled \$3,950,267.53 on June 30 of this year, according to a report issued in Phoenix by the Arizona State Tax Commission.

A deposit of magnesite and dolomite has been located about ten miles east of Las Cruces, in Dona Ana county, New Mexico, by Frederick W. Snyder, mining engineer of El Paso, Tex., who is associated with Col. Charles Hunt, also of El Paso.

The recent removal of B. F. Morris, Sr., and Alberto Amador as members of the board of regents of the Spanish-American Normal school at El Rito, N. M., by Governor R. C. Dillon was without legal authority, Attorney General Robert C. Dow has held.

Approximately 25,000 fingerling trout have been turned into the streams of Mora and San Miguel counties, New Mexico, recently by the state game and fish department. The streams were stocked with 50 cans which averaged 500 three-inch trout to the can.

Pending the determination of litigation between the state of Arizona and the United States over service over the disposition of the Kaibab deer herd, state and forest service officials have agreed to open restricted areas of the forest to hunting during the month of October.

Cattlemen at Nogales, Sonora, have practically abandoned making shipments to the United States as the result of an increase in the cattle exportation tax from one to 25 pesos (about \$12.50), per head, ordered by the Mexican government, according to word from Nogales, Ariz.

Judge Colin Nebbett of Santa Fe, president of the New Mexico Game Protective Association, was re-elected by acclamation at the annual meeting of the state organization in the court house at Albuquerque. The other officers, all of whom were re-elected but one are Charles Springer of Cimarron, first vice-president; Fred Sherman of Deming, second vice-president, and E. L. Safford of Santa Fe, secretary-treasurer. Guy Reid of Carlsbad was elected third vice-president to succeed E. W. Tamony of Gallup.

A recent chamber of commerce meeting in Farmington, N. M., developed into a mass meeting to consider offering the Well railroad a land subscription of \$1,500,000 to build from Marion to Farmington. The new railway company is incorporated in New Mexico, with a capital of \$4,000,000, of which \$500,000 already is subscribed. The San Juan basin four year ago subscribed \$5,500,000 in land to secure a railway from Los Angeles, but proponents failed to build the road. The meeting unanimously agreed to support the campaign for land subscription.

Fourteen prehistoric dwellings are within walking distance of Crafts del Navajo, the distinctive resort of B. I. Staples at Coolidge, New Mexico, 20 miles east of Gallup. These houses are estimated to be from 1,500 to 3,000 years old.

The New Mexico State Teachers' College at Silver City, N. M., opened for the fall and winter term September 6 with seven new instructors listed. During the next six months several new buildings will be constructed at a cost of approximately \$75,000.

## Improved Uniform International Sunday School Lesson

(By REV. P. B. FITZWATER, D.D., Dean Moody Bible Institute of Chicago) (©, 1927, by Western Newspaper Union.)

### Lesson for September 18

#### THE KINGDOM DIVIDED

LESSON TEXT—1 Kings 12:1-24. GOLDEN TEXT—Friede goeth before instruction, and a haughty spirit before a fall.

PRIMARY TOPIC—God Punishes a Foolish King.

JUNIOR TOPIC—God Punishes a Foolish King.

INTERMEDIATE AND SENIOR TOPIC—The Folly of Pride.

YOUNG PEOPLE AND ADULT TOPIC—How to Prevent Divisions.

The movements leading up to the disruption of the kingdom had begun in Solomon's reign. He saw in Jeroboam the leader of insurrection and endeavored to kill him. Jeroboam fled to Egypt until Solomon's death (1 Kings 11:40). Having been informed by the prophet Ahijah that he was to have ten tribes over which to rule, as soon as he heard of Solomon's death he returned to be ready to take up his work.

#### I. The Demand of the People (vv. 1-4).

This was occasioned by the burden of excessive taxation and enforced labor, which was required by Solomon in order to build costly houses and temples for his heathen wives. The people were groaning under its weight. Upon the accession of the new king Rehoboam, the people, through their leader Jeroboam, came with the request that their burdens be made lighter, promising loyalty to him on the condition of lightened burdens.

#### II. Rehoboam's Foolish Decision (vv. 5-15).

1. Rehoboam consulted with the old men (vv. 5-7). These were men of experience who had been Solomon's advisers. Being acquainted with the condition as imposed by Solomon, and knowing the temper of the people, they advised that the people's request be granted.

2. Rehoboam consulted the young men (vv. 8-11). These young men had grown up with him, possibly were his half-brothers, sons of Solomon's many wives. Being thus brought up in the luxury of the harem, they were ignorant of the legal right of the people. Therefore they advised that the burdens be increased.

3. Rehoboam followed the advice of the young men (vv. 12-15). At the appointed time he announced his purpose to the people. He even answered them roughly, asserting his purpose to increase their burdens and sorrows. He assumed that it was his right to rule and that it was the people's role to obey regardless of conditions.

#### III. The Revolt of the Ten Tribes (vv. 16-24).

Upon Rehoboam's announcement of his rash purpose all Israel cried out, "What portion have we in David? . . . to your tents, O Israel."

1. Rehoboam's attempt to collect tribute (vv. 18, 19). As he endeavored to collect tribute from the ten tribes, Adoram, his tribute gatherer, was stoned to death. So violent was the opposition on the part of the people that Rehoboam had to flee to Jerusalem to save his life.

2. Jeroboam made king over Israel (v. 20). They seem to have lost so time in selecting a head so as to be strong in their opposition to Rehoboam.

3. Rehoboam's attempt to compel the ten tribes to return to David (vv. 21-24).

To effect this, he assembled his army of 180,000 men. Through the prophecy of Shemaiah, which forbade them to go against their brethren, they were persuaded to return.

IV. Jeroboam's Scheme to Unify the Ten Tribes (vv. 25-33).

1. He established calf worship (vv. 25-28).

(1) He built houses and high places (v. 31). This was against the direct command of God. God had directed His people to destroy the high places and to break down the idolatrous centers. So we see that Jeroboam, by the demands of his sinful heart, disobeyed God.

(2) He changed the day of the Feast of the Tabernacle (v. 32). The time of this feast was set by the Lord (Lev. 23:33, 34). Jeroboam argued that the change in the time would be better suited to their northern climate, but God, who made the climate ordained the time of the feast. I was his business, therefore, to obey God.

(3) Jeroboam himself intrudes into the priest's office. The act of presumption on his part was the climax of his godless acts, all of which grew out of his wicked heart.

God has established prayer to communicate to His creatures the dignity of causality.—Pascal.

The Business of Life  
The business of life is largely made up of minute affairs, requiring only judgment and diligence.—Beecher.

Be Not as Water  
Be not as water which takes the tint of all colors.—Syriac.

## Current Wit and Humor

### WHY PLUMBERS GET RICH

Mr. Spriggs was complaining loudly to the plumber of the high cost of plumbing.  
"Well," said the plumber, "we've got to pay a man and his helper."  
"But you don't need a helper for a little job like this, do you?" said Mr. Spriggs.  
"No," admitted the plumber. "But, you see, it's like this. The man who goes out to your house has got to take the machine, and it ain't worth while to run the machine for just one man, so we send the helper with him."

### GOING MAD

He—Personally, I think the rising generation is going mad.  
She—They have nothing to get mad about. It's the older generation that's mad.

### "Pie" in Politics

The camera is going strong, and in the misty by and by, they who desire applause may long for the comedian's custard pie.

### Nervous

Madge—Dick is to ask father's consent this afternoon. I feel nervous about it.  
Mollie—Are you afraid your father won't give his consent?  
Madge—No. I'm afraid Dick won't turn up.

### Politeness

Customer—It's really very kind of you to pick up the package I dropped.  
New Clerk—Not at all, ma'am. We men are getting tired of being accused of being polite only to pretty girls.—Progressive Grocer.

### NO RAISE FOR HIM

"Sir, my expenses at home are increasing and I am growing old in your employ, and—"  
"Well, what do you expect me to do—furnish you with monkey glands?"

### Indestructibility of Chatter

There was a little joke. For centuries it grew. Now, when in public spoke, it's just as good as new.

### Kept It

"Why does Binks want a divorce? His wife had half a million when he married her."  
"Well, she still has half a million."

### Terms

"How long is it going to take us to get through this case?" asked the prisoner of his counsel just before the trial.  
"Well," answered the barrister, "me—about three hours; you—about four years."

### Matter of Health

"Out West it is considered healthy to mind your own business."  
"I don't find that idea prevalent at the various health resorts."

### An Unreliable Husband

Helen—He told me I was the prettiest and most interesting girl that he had ever met.  
Gladys—And you will trust yourself for life with a man who starts to deceive you at the beginning of the courtship?

### With Sauce

The pompous man demanded: "Is this a first-class restaurant?"  
"Oh, yes," answered the waiter, "but we don't mind serving you."

## FARMER WOMAN IN OKLAHOMA

Praises Lydia E. Pinkham's Vegetable Compound Because It Gave Her Health and Strength

In a sunny pasture in Oklahoma, a herd of sleek cows was grazing. They made a pretty picture. But the thin woman in the blue checked apron sighed as she looked at them. She was tired of cows, tired of her tedious work in the dairy. She was tired of cooking for a household of boarders, besides caring for her own family. The burdens of life seemed too heavy for her failing health. She had lost confidence in herself.  
One day she began taking Lydia E. Pinkham's Vegetable Compound and her general health began to improve. She took it faithfully. Now she can do her work without any trouble, sleeps well and is no longer a blue checked apron. This woman, Mrs. Cora Short, R. R. 9, Box 287, Oklahoma City, Okla., writes: "Everybody now says: 'Mrs. Short, what are you doing to yourself?' I weigh 135 and my weight before I took it was 115. I have taken seven bottles of the Vegetable Compound." Other women who have to work hard and keep things going may find the road to better health as Mrs. Short did, through the faithful use of Lydia E. Pinkham's Vegetable Compound. Ask your neighbor.

**Keep Stomach and Bowels Right**  
By giving baby the harmless, purely vegetable, infants' and children's regulator, **MRS. WINSLOW'S SYRUP** brings astonishing, gratifying results in making baby eat, sleep, digest food and bowels more as they should at teaching time. Guaranteed free from narcotics, opiates, alcohol and all harmful ingredients. Safe and satisfactory. **Dr. All Druggists**

## For Old Sores Hanford's Balsam of Myrrh

Money back for first bottle if not suited. All dealers.

### Starting Right

Victor—"I would go through anything with you, dear." Vera—"Let's begin with your bank account."

## Slowing Up?

You Can't Feel Well When Kidneys Act Sluggishly.

OVERWORK, worry and lack of rest, all put extra burdens on the kidneys. When the kidneys slow up, waste poisons remain in the blood and are apt to make one languid, tired and achy, with dull headaches, dizziness and often a nagging backache.

A common warning of imperfect kidney action is scanty or burning secretions. Doan's Pills assist the kidneys in their eliminative work. Are endorsed by users everywhere. Ask your neighbor!

**DOAN'S PILLS**  
66c

## The Racer

When I'm burning up the miles—every cylinder working overtime at tremendous temperatures—there's at least one thing I know won't go wrong—and that's spark plugs. **Insistor Champions!**

Champion is the better spark plug because of its double-ribbed silicochrome core—its two-piece construction and its special analysis electrodes.

Champion X-6 for Ford 60¢  
Champion X-8 for other makes 75¢

## CHAMPION Spark Plugs

For your protection be sure the Champions you buy are in the original Champion cartons.

W. N. U., DENVER, NO. 38-1927.

## NEWS REVIEW OF CURRENT EVENTS

### Five More Aviators and Two Planes Thought Lost in Atlantic.

By EDWARD W. PICKARD

FIVE more lives apparently have been sacrificed to the overweening ambition of aviators to make trans-oceanic flights. And there may be further additions to the list before this reaches the reader. Tuesday the great monoplane Old Glory, owned by William Randolph Hearst, took off from Old Orchard, Maine, on a projected nonstop flight to Rome. Lloyd Bertrand and James D. Hill, both experienced flyers, were the pilots, and with them as passenger was Philip A. Payne, managing editor of the New York Mirror. Near midnight the plane was sighted about 350 miles east of St. Johns, N. F., flying well, though the night was foggy and the sea rough. About four o'clock Wednesday morning steamers and shore stations received the dread S O S call from the plane. The radio men and the ships sent out frantic calls for position and six minutes later came the reply: "Five hours out from Newfoundland bound west."

The steamships Carmania, Transylvania, California and American Merchant, all somewhere near the estimated position of Old Glory, carefully searched the sea for hours, but no trace of the plane had been discovered up to the time of writing. Seemingly it was lost without there being an inkling of what had happened to it, even as was lost the St. Raphael and other land planes in which trans-oceanic flights have been undertaken. Anthony H. G. Fokker, designer of the plane, said he thought only engine trouble would bring the plane down. Doctor Kimball of the weather bureau eliminated the weather as a cause, saying there were no severe storms in the plane's path, although there was fog and cloudiness.

There was some hope that the plane might still be afloat even though rescue ships were unable to find it. The huge gasoline tank had a dump valve by which it could be speedily emptied and it would then provide buoyancy for some time. A collapsible rubber raft was carried, but probably the sea was too rough for its use.

On board the Old Glory was a wreath which the pilots had prepared in tribute to the French flyers who had made the first attempt. On it was written, "Nungesser and Coll: You showed the way. We followed. Bertrand and Payne and Hill."

Undeterred by bad weather and ignorant of the supposed loss of the Old Glory, Capt. Terry Tully and Lieut. James Medall in the plane Sir John Carling hopped off from Harbor Grace, N. F., for the last part of their trip from London, Ont., to London, England, on Wednesday. At this writing nothing has been heard of them, and it is assumed they, too, perished in the ocean.

Schlee and Brock in the Pride of Detroit were making good progress in their globe circling flight for a new time record, despite the fact that they were delayed at Constantinople by red tape. The most perilous part of the trip was the jump from Calcutta to Rangoon. At this writing they are in Hongkong. In Tokyo they planned to install a new motor for the flight to Hawaii via Midway Island and thence to San Francisco. Their Detroit friends were trying to persuade them not to undertake the flight across the Pacific, and Schlee's brothers chartered a boat to meet them at Tokyo and bring them to San Francisco, believing that in that way they could still lower the round-the-world record.

Frank Courtney and four companions, who started from Plymouth, England, for New York, via the Azores, in the flying boat Whale, ran into head winds and were forced to land at Corunna, Spain.  
Numerous persons around the Macareo river in Venezuela saw a plane, supposed to have been that of Paul Riedfern, on August 27. It was headed

southeast toward the delta of the Orinoco, which is uninhabited except for a few Indians. There is a chance that the Georgia flyer may be found in the jungle.

CHARLES EVANS HUGHES returned last week from a two months' trip through France, in robust health and so chipper that the reporters who met the boat said he had never been so genial. At once he was put high in the list of possibilities for the Republican Presidential nomination, and though he declared to the interviewers that he believed Mr. Coolidge would be renominated and re-elected, he declined to say that he still stood on his "too old to run for the Presidency" statement, made last May. Politicians in Washington think that all of the potential nominees Hughes would be the one favored by Mr. Coolidge. Many persons have thought Hoover was the President's first choice, but the indications are that these two men are not in such accord as formerly.

In the Eastern states, according to wise observers, the Republican leaders think Vice President Dawes has the best chance to win the nomination, though they admit Lowden will be hard to beat and that Hoover is perhaps the ablest man in the field.  
Among the Democrats not much is heard except "Smith" and "anti-Smith." The popular governor of New York was attacked by Assistant Secretary of the Treasury Lowman in an address at Buffalo for the failure of prohibition enforcement in the Empire state. Explaining why the federal government does not step in and police the state of New York, he declared that in the face of the "open opposition of the state and local officers, it would require an army of 30,000 prohibition agents to handle a proposition like that."

Congressman Boylan, Democrat, of New York, sent to Secretary of the Treasury Mellon a vigorous protest against Lowman's speech as a "gross abuse" of his federal office.

NEW ENGLAND coast guardsmen are involved in another liquor scandal. In Boston five of them and six other men were indicted by a federal grand jury for a run-running conspiracy. Federal investigators charged that protection was obtained in landing liquor by payments of a certain fixed sum per cask. It is further charged that coast guard boats were used in assisting in landings which would otherwise have been difficult. One of the accused men was executive officer of the coast guard base in East Boston.

While on the subject of booze, it may be noted that the province of New Brunswick, Canada, ended its eleven years of prohibition last week. The intoxicating liquor act went into effect and retail liquor stores under control of the government were opened. Purchase permits are not required.

PROHIBITION lost its ablest supporter when Wayne B. Wheeler, general counsel and legislative superintendent of the Anti-Saloon league, died at a sanitarium in Battle Creek, Mich. He had been undergoing treatment for a kidney ailment and was taken to Battle Creek for an operation, but had improved so much under treatment that it was decided not to operate. Then he took a sudden turn for the worse and died on Monday afternoon. The funeral was held in Columbus, Ohio, and Mr. Wheeler was buried beside his wife, who was burned to death a few weeks ago.

Whatever may be thought of the merits of national prohibition and of Mr. Wheeler's methods in bringing it about, there can be no question about the skill and perseverance with which he conducted the affairs of the league. He repeatedly demonstrated his power in influencing legislation and the selection of men for office, and as the general of the dry forces proved himself to be one of the shrewdest politicians in the country. The league could scarcely find one man to fill his place, and it is believed two will be named to take over his work. E. B. Duford, Wheeler's confidential legal adviser, may become general counsel, and some one else the legislative superintendent. The three leading candidates for the latter position are: A. J. Davis, superintendent of the New York State Anti-Saloon league; Rev.

A. J. Barton of Nashville, Tenn., a member of the national league's executive committee, and James White, former superintendent of the Ohio State league.

PRESIDENT COOLIDGE'S last week in the Black hills was uneventful, and he started back to Washington much benefited physically by his summer vacation and ready to tackle such big matters as taxes, ambassadorial appointments, naval building and other questions. The White House, renovated, repaired and with a fine new roof, was all ready for his return. All the inhabitants of Rapid City gathered at the station to bid Mr. and Mrs. Coolidge farewell, and the President made a little speech expressing his appreciation of their hospitality. The eastward trip was interrupted briefly Saturday at Brookings, S. D., where the President dedicated the Lincoln Sylvan theater, built for lectures and entertainments for students of agriculture.

LAST week was not a good one for Russian Communists. Down in Bolivia the government made public conclusive proof that the Third Internationale was plotting communist revolt there and in other countries of South America; and at the same time a number of Red leaders were arrested in La Paz and quantities of explosives were seized. French Nationalists and Conservatives united in demanding the resignation or recall of Christian Rakovsky, soviet ambassador to Paris, because he signed the Trotsky manifesto urging "all foreign soldiers to join the great Red army" and inviting the Reds of all countries "to work actively to defeat their own governments." The French foreign office sent such strongly worded dispatches to Moscow that Chicherin, soviet foreign minister, had to disavow the manifesto, and Rakovsky tried hard to persuade the French that he was not trying to stir up trouble in France. At the annual meeting of the British Trade Union congress in Edinburgh the Communists were overwhelmingly outvoted and a resolution was adopted cancelling all relations with the Russian trade unions and the Third Internationale. The Pan-German league adopted resolutions demanding the dissolution of the Communist party in Germany and the suppression of its organs. The league represents the Nationalist extremists and bases its demands on the recent world-wide demonstrations in favor of Sacco and Vanzetti.

OPENING its eighth annual assembly in Geneva, the League of Nations was a decidedly gloomy gathering. This was due to the failure of the league's disarmament conference in the spring and the collapse of the Coolidge naval parity in August, to which was added the fact that the economic conference was practically devoid of results. Among the notable absentees were Lord Robert Cecil and M. de Jouveval, resigned, and Baron Ishii of Japan. Dr. Alberto N. Guani, Uruguayan minister to France, was elected president of the assembly. Supported by the Belgians, French, Germans and Hollanders, Beelaerts van Bloklands of Holland submitted a resolution asking for the revival of the nonaggression protocol of 1924, declaring the failure of conferences of the past year had proved that actual disarmament was impossible for the time being. Japanese and Swedish delegates criticized the league severely for its failure to bring about reduction of armaments and to curb the quarrels of some of the nations of Europe. Poland's demand for an eastern Locarno guaranteeing its security against Germany and Russia was supported by France, but Sir Austen Chamberlain and the British delegates looked on it coldly.

CHINA'S Nationalist government has disclosed the contents of an agreement with Japan whereby the Nationalists undertake to guarantee the protection of lives and properties of Japanese in Nationalist territory. It is said this agreement led to the Japanese decision to withdraw their troops from Shantung, which movement was accomplished last week. The Christian general, Feng Yu-shiang, wired the Nationalist government that he was launching an offensive against the Northern troops in Shantung province from Honan.

## STORY FROM THE START

Garth Guthrie, Canadian war veteran, having to live in the open on account of weakened lungs, is factor of a Hudson's Bay post at Elkwan. He came back from the conflict with a permanently scarred face, which he realizes cost him the love of his fiancée, Edith Falconer. Sir Charles Guthrie, his brother, is a millionaire war profiteer. With Etienne Savanne, half-breed, his firm friend, Garth meets Doctor Quarrier, geologist, and his sister Joan. Their schooner has drifted ashore. Quarrier complains he has been robbed by a man known as "Laughing McDonald." At Elkwan an Indian girl, Ninda, tuberculosis victim, whom Garth has befriended, is dying. Joan, trained war nurse, cares for Ninda, but the girl dies. Charles Guthrie writes reproaching his brother for not coming home. Charles' wife assures him Ethel still loves him, but Garth in his heart knows better.

## CHAPTER III—Continued

"It was an act of Providence. I wonder," he hesitated, then went on. "If you would care to send word of yourself to an exile, this winter?"

He saw her brows contract in thought. For a moment she seemed in doubt, then turned to him, tense in her earnestness. "You are not merely courteous—you really wish to hear from me?"

His face reflected his pleasure. "You will write then, to the exile?"

There was a sudden gleam of white teeth, a whimsical flash in her eyes, as she asked: "Wouldn't it be ungrateful to refuse so modest a request from one who has rescued the shipwrecked?"

"It would be most ungrateful and cruel," he laughed. "If you'll write, I'll have a little spruce waiting for the Christmas mail, and hang your letter on the tree, with candles."

"Unread?"

"Unread till Christmas morning. Then shot and I will read it together—our Christmas, from you."

"And the other letters?" she queried, avoiding his quick glance.

"The others? Oh, they'll not be interesting—with their criticism and advice and news of my distinguished brother's doings."

"None of them?" Joan Quarrier's voice was strangely throaty as she gazed out over the shimmering river.

"None of them," was the quiet reply. He thrilled at the realization of the absolute sincerity of his answer.

Without meeting his eyes, she turned impulsively to the alreidae who accompanied them. "Good-by, shot! I'm going to miss you, boy!" And she took the head of the dog in her hand. As shot's tall beat the air, his hairy throat rumbled. Then he bared his great fangs and made little snaps at the girl bending over him.

"Why, you've made a conquest!" cried Guthrie. "He does that with no one here."

The girl looked up as she rubbed the dog's ears. "He's only saluting a brother—I mean a sister—in arms."

"One who served, as he did, with the wounded," added the man.

They were at the door of the mission.

"Good-by! The days will drag up there in the snow, waiting for the Christmas mail," said Guthrie, puzzled at his emotion—strangely reluctant to leave her—wondering at himself.

"Good-by, Mr. Exile!" She gave him her firm hand.

Hardly conscious of his purpose, he bent to search the dark eyes, frankly meeting his look. She smiled, he thought, wistfully as he said: "What you did for a comrade in distress—he will never forget. Good-by, Healer of Wounds."

Her eyes widened. Groping for his meaning, she watched him straighten, bring his hand to his forehead in a military salute, and turning, walk rapidly away. Until his tall figure was lost in the shadows, she stood, lips parted, wondering; then slowly opened the door and went in.

## CHAPTER IV

Little did those whom Garth Guthrie had brought to Albany in his York boat sense what this act of friendliness to strangers might mean in days of drudgery—precious days lost from the goose hunt which was nearing its end—for the men from Elkwan. As the boat drifted down the south channel of the delta past the scrub-grown shores of Albany Island, Guthrie's thoughts traversed the days since the storm and the meeting with the girl back at the Albany mission, who was going down the coast and out of his life, as the "waves," from the Arctic, linger through the soft September weather, until the sting of the first northern sends them down the wind. But the "waves" return. There would be no return to the west coast for Joan Quarrier.

He had left her, the night before, puzzled by the elation her promise to write him by the Christmas mail had aroused. And, always, as he strove to analyze the nature of his response

to the appeal of her genuineness—her level-eyed meeting of life—the blond loveliness of Ethel, with her shrinking from the unpleasant—the inevitable—trudged with the knowledge of disillusion. Ethel was growing so vague—so shadowy—here in a land where raw life admitted of no subterfuge—no compromise. And yet, Ethel would wait for the brother of Sir Charles Guthrie, he told himself, with a tightening of the lips; of that he had no doubt.

The York boat reached the open water of the bay as the sun lifted, bringing an easterly breeze. As they worked up the channel to the post, a sense of loneliness chilled the heart of Guthrie. There would be no welcome, which, through the weeks of the summer, he had grown to cherish, on his homecoming—no joy in the wistful eyes of the girl who waited. All that remained to him now was the memory of a devotion—self-immolating, complete. Poor little Ninda!

Old Anne and the wife of Etienne stood on the shore while the voyagers made the boat fast to its buoy. As the men paddled in, it was evident that news awaited them.

"Somebody happen," said Etienne. "Marie ver' mouch excite" w'en she not stan' still."

"Bon jour, ladies!" called Guthrie, as he approached the chattering women on the beach. "What seems to be on your minds?"

"Oh, dey have come here—dos men!" cried old Anne.

"What men?"

"De man in de beeg boat—she was here. Dat one wid de bad face—McDonald! Ha! Ha! de Injun call heem."

Guthrie and Etienne started incredulously at the speaker.

"What did he want?"

"He want talk wid you. He leave dis." Old Anne handed Guthrie a folded sheet of paper. Opening it, he read:

"The Hudson's Bay Company, Elkwan: "This is to save you a trip to the island after the stuff left on the beach by that walrus-faced geologist, Quarrier. I can use most of it, and will pay St. John's prices for it on my return home. Have made an inventory."

"McDONALD."

"Well, he's a cool one!" commented Guthrie.

Etienne shook his black head. "He steal dat stuff, he steal all de fur on Akimiski!"

"Not if I know it! If he thinks he's going to get our share of the Akimiski hunt, he'll have to fight for it. He'll find he can't bluff us," replied Guthrie, with increasing irritation at the thought of the high-handed methods of the unknown. In the north a cache was inviolate, and the stores of Quarrier on the Akimiski beach had not been abandoned, but cached, to be recovered later. McDonald's appropriation of them under the circumstances was a distinct breach of northern custom. If this was a sample of what could be expected from him later, in the light for the Akimiski fox trade, the winter and spring would hardly be dull on the west coast. As soon as they had shot their winter supply of geese, he would have a talk with Graham and Bouche, at Attawapiskat and Kupskewau.

"Too bad, Etienne, we were not here to meet Mr. Laughing McDonald. What did you think of him, Anne? He's a big man with red hair, isn't he?"

"Oh, ver' beeg, strong man, wid hair lak fire. Hees face!" Anne stopped to shudder. "He got de crazy face all tam, from hees hurt mou't."

"Poor devil!" thought Guthrie, "branded for life with that grin! Then he asked: 'Who came ashore with him?'"

"The question was a signal for an emotional outburst from Marie. 'Dey were bad men, M'sieu Guthrie. One beeg one, wid de barbe noir, black beard, he try kees me, de femme of Etienne Savanne.' The black eyes of the comely wife of Etienne flashed with anger at the memory.

"What! Dey try dat wid you, dees peopl'?" The sinewy fingers of the half-breed worked nervously as if groping for a knife handle. "W'at you do, Marie?" he demanded.

"McDonald! Ha! Ha! broke in Anne, 'he talk ver' cross to de black beard—give heem push lak he was littl' boy. Dis McDonald, dey all scare of heem, dose men. Den dey paddle out to de boat."

"Good enough! McDonald seems to be boss all right," laughed Guthrie. "Black beard; that must be the Newfoundland whaler, Etienne, the captain of the schooner."

The face of Etienne hardened. "He mak mouch troubl' on dis coast—dis McDonald! Ha! Ha!—mouch troubl'."

"It looks like a lively winter for us, eh, shot?" And the factor of Elkwan bent to rub the ears of his dog.

It was early October on the west coast, hunting weather, when the geese restlessly crossed and recrossed the wide flats between the timber and the sea, and the duck, in flocks of thousands, endlessly rose from the shallows to skirt for a space, the rim of the tide, only to settle again, and

shortly repeat the flight. When they had shot two back-breaking loads, Etienne and Guthrie started for their camp out where a boulder-strewn sandspit thrusting seaward rendered the launching of a loaded canoe possible at the height of the tide. A mile from the tent on the sandspit, Etienne lifted his lowered head banded by the tump-line which held the flour bags filled with geese. Then he swung round to the bent figure following, eyes on the ground.

"Boat at de camp."

Guthrie straightened until his range of vision included the sandspit. Below the boulders at the nose of the spit lay a ship's boat. A boat could come only from the schooner of McDonald. What were they after?

Nearing the camp, the packers dropped their loads and continued with their guns. If these people had abused shot, chained to his stake—Guthrie's pulse quickened at the thought. Near the tent three men idled, evidently waiting for the owners. "You keep out of this, Etienne. You're sore. Let me do the talking," warned Guthrie, as he approached the camp. Suddenly breaking into a run, he shouted: "Stop baiting that dog, or I'll turn him loose on you!"

Standing out of reach, a young sailor tossed sand into the face of the infuriated alreidae, straining at his leash.

"All right! Turn him loose," was the truculent reply, and retreating, the sailor cocked his shotgun.

"Put down that gun, you young fool!" commanded the elder of the

"I Kicked Him Out, So He Wants His Revenge."

three strangers to the boy, as Garth reached the camp.

"What are you people after—trouble?" demanded Guthrie, fighting for his self-control, for the badgering of his dog had left him hot.

The man addressed grinned good-naturedly and extended his hand. "Good day, Mr. Hudson's Bay; we ain't runnin' away from none. We saw your tent and rowed in to get some shells, if you have any—to sell."

Guthrie took the hand of the speaker, a heavily built man, with a beard, the anger left his face as he said: "Oh, you're not going to take the shells, then?" He was conscious, as he spoke, of the curiosity in the eyes of the man he faced, as they lingered on his scrunched cheek.

"No," drawled the other. "You must think we're pirates. We pay as we go."

"But you robbed that cache on Akimiski—you left a note at Elkwan to that effect."

"McDonald will pay for that stuff—it would spoil in the rain."

"Well, we don't touch a man's cache in the north. By the way, where is this McDonald from?"

"We all hail from St. John's, Newfoundland."

"But McDonald?"

(TO BE CONTINUED.)

## Character of Glass Only Recently Known

The manufacture of glass antedates authentic history. It is only about three-quarters of a century, however, since its true character was ascertained. It is now generally conceded to be a salt—a chemical compound resulting from the union of an acid with a base. The acid is silica, the same that is found in quartz, or the quartz particles of sand. Hence the use of sand in its manufacture.

The base may be potash (or soda), together with alumina and lime—or lead may take the place of lime. Lime is soluble to acids and suited to windows, and chemical purposes. Lead, a softer, more fusible and more lustrous article, suitable for optical instruments.

All acids act to some extent on glass, especially if the latter has an excess of alkali. Even wine may cor-

rode the bottles wherein it is contained. The moisture of the air often dissolves out the alkali, causing the rainbow-like colors (iridescence) of some window panes.

## Find Old Reflectors

In an iron case, concealed behind a wall, the first of the two great telescope reflectors with a 4-foot aperture, constructed 139 years ago by Sir William Herschel, the famous astronomer, for his 40-foot astronomical telescope, has been found during alterations to an old cottage adjoining the observatory house at Slough, England. Sir William Herschel devoted his life to the construction and use of reflecting telescopes for astronomy, and the fame of his instruments was rapidly spread by the brilliant discoveries which he accomplished by their aid.

# POULTRY

## CLEAN HOUSE IS FIRST ESSENTIAL

A clean house is the first essential in good poultry management. The cleaning should be done before the pullets are put in the house for the winter, according to John Vandervort of the University of Illinois. Clean, healthy pullets cannot be expected to remain so if they are placed in a filthy hen house which is likely to harbor worm eggs and disease germs, he points out.

"Nests, roosts, water dishes and other utensils should be taken out of the house and cleaned and then left in the sunlight. Dropping boards should be cleaned and all litter and manure scraped from the floor. The floors, sidewalks and ceiling should then be swept, after which the interior of the house should be thoroughly scrubbed with hot water containing lye at the rate of one pound to 40 gallons of water. No disinfecting should be done until after the house has been thoroughly cleaned and allowed to dry out. The final step includes replacing the fixtures and putting clean litter on the floor and material in the nests. Houses should be cleaned and fresh material put in the nests monthly."

"You may—but you'll sweat some. Now, I want to give you fair warning that some of your people have come to us this summer of their own accord. There's an Injun who claims you stole his daughter—"

"What! That skunk of an Ojibwa? He tells you that?" Guthrie sickened at the thought of Ninda's memory being made the catspaw of Indian gossip.

"That's what he claims. It's none of my business, but he's got it in for you, so don't blame us. He's working for us, of course, for the fur."

"A girl he claimed as his daughter came to Elkwan in June, dying with tuberculosis," said Garth quietly. "She couldn't travel—we took care of her till she died. He tried to hold me up—for stuff. I kicked him out, so he wants his revenge. Just tell him, Mr. —" "Skene," prompted the other. "Just tell him for me, Mr. Skene, that I'll give him the dog if he shows up at the post. He knows shot."

"Looks like a tough old veteran!" commented Skene, admiringly, glancing at the alreidae, tense as a statue, hair and tail up, bristling at his stake.

"He is. He's an overseas man. He's tear that Indian's throat out in one snap."

"There's another matter, too," continued Garth. "When your people came to Elkwan when we were down the coast, one of them—fellow with a black beard—tried something that will get him knifed if he shows up at the post again." At the words, Etienne slowly moved up to a position beside Guthrie, his right hand resting carelessly on his hip, the fingers touching the bone handle of his sheath knife. The bearded leader of the sailors glanced curiously at the flint-like face of the half-breed, and smiled indifferently at the throat.

"Just tell him for me, will you, to keep away from Elkwan?"

"Oh, you mean Black Breaull. He's smiling master—owns the schooner I'm the mate. He's a bit rough, I'll admit, but don't make any mistake about who's boss. McDonald's runnin' this party."

"That's why I'm asking you to tell McDonald that we won't stand for manhandling women on this coast," insisted Guthrie.

"Right-o, I'll tell him. Well, we'll be off," said the big sailor, offering his hand, which Garth shook. "I'm glad to meet a reasonable Hudson's Bay man and one who wasn't sitting snug on the bay when we had our backs to the wall in front of Amiens."

And as Garth stood pondering the remark, Skene turned and joining his men, walked to his boat with a flop. He, too, thought the man who watched, is wearing his service stripes. The sailors lunched their boat in the rising tide, and potting it out to the deeper water, rowed away.

So the memory of Ninda was to be mottled on evil tongues? The story was going out among the Crees that the factor of Elkwan had taken her from her family. It was the kind of tale only too readily believed. Judging from the coolness of Swan, the missionary, Quarrier, without doubt had published it in Albany; soon it would be the property of the whole west coast. Poor, loyal Ninda! Then, the thought of one who had seen and understood came like a breath of clean air from the spruce. He saw her again, her heavy hair touched by the moonlight, her fine, dark eyes with the questioning look, as she said: "Good-by, Mr. Exile!"

"But McDonald?"

(TO BE CONTINUED.)

## Don't Wash Eggs

experienced egg packers condemn the practice of washing eggs with either water or vinegar, most severely because such eggs do not stand up in storage. The fact that the eggs thus treated cannot be detected allows many of them to go into storage with the result that when they are taken out of the coolers next fall and winter their poor quality will result in lessened consumption. So don't wash eggs for sale.—National Poultry, Butter and Egg Bulletin.

## Teach Chicks to Roost

Many people make a mistake in not teaching the young chickens to roost. It is usually advisable to do this when the chicks are from eight to ten weeks of age. When they are allowed to sit on the floor it is difficult to keep them clean and there is a tendency for them to crowd on cold nights, which often results in loss. The chicks can usually be taught to roost by putting perches close to the floor and placing one or two old hens with them.

## Whitewash Formula

Here is a standard formula for exterior whitewash which has been found satisfactory. Dissolve 12 pounds of salt and 6 ounces of powdered alum in about 4 gallons of hot water. Add 1 quart of molasses. Make a thick cream by thoroughly mixing 50 pounds (1 sack) of hydrated lime, or 25 pounds (½ bushel) of quicklime, thoroughly slaked and screened before use with about 7 gallons of hot water. Add the clear solution to the lime slirring vigorously.

Ask for **POST TOASTIES**—corn flakes that stay crisp in milk or cream

So much crisper—these deliciously seasoned corn flakes

Made from the tender hearts of white corn, exquisitely seasoned, Post Toasties have the true delicate flavor of the corn. This unequalled flavor is sealed in lasting crispness by a special toasting process of the Postum Company. Order a package of these refreshing corn flakes from your grocer.

Note how the golden flakes crackle as you pour them into the bowl. Now add milk or cream and taste their crisp flavor and goodness. Ask by name for Post Toasties—the corn flakes that stay crisp in milk or cream. They come ready to serve from the red and yellow, wax-wrapped package.

POSTUM COMPANY, INC., BATTLE CREEK, MICH.

## Huge Statue of Washington

Tourists entering the state of Washington through any one of the four principal roads leading to the commonwealth will be welcomed by a huge statue of the first President mounted on a pedestal 40 feet high, according to Popular Mechanics Magazine. Officially, Washington is the only state in the Union entitled to use such an emblem. The model is being prepared by Alonzo Victor Lewis, a Seattle sculptor.

## Stomach Disorders

are decidedly unpleasant

### Green's August Flower
