Some came wso jeered at your bewilderment,

take you in.

Some kicked you, shouted, threw things 'till you'd gone; But, oh, more cruel was the one who

And petted you, and murmured-

and went on.

BUY HOME PRODUCTS

Campaigns having for their object the neouragement of buying products manufactured near at home have been carried on in various communities with varying success for many years. Nearly every one agrees that the idea is sound in principle, but many fail to put it into practire when their time comes to buy.

Any local industry which manufactures a worthy product and sells it at a reasonable price might be enabled to grow large through the loyal suppert of home people. Its growth would enable it to increase its payrolls, increase its consumption of locally produced raw materials, build up increased taxable wealth, and in every way contribute to the progress and prosperity of its community.

These are trite and self-evident facts which have been put forward time and again, yet many otherwise good citizens deliberately contribute to the upbuilding of distant cities at the expense of their own communities through failing to patronize home industries and mercantilo establish-

The simple policy of buying at home would do more for the average town than can be accomplished by all the commercial organizations and boosters' clubs which may be maintained. These organizations are needed, of course, but their efforts should be aided by the all-iuportant policy of supporting the enterprises already present in the community.

Natives in equatorial Africa still try a person suspected of crime by giving him poison. If he dies he is consdered guilty; if he survives, it is taken as evidence of innocence. If some American bootleg concoctions were used there would probably be fev acquittals.

According to some psychologists, the proper treatment for murderers and thugs would be to domicile them in cheerful hospitals, with special food and entertainment, together with the constant ministrations of pretty

An Open Letter to the Editor

From the President of General Motors

LAST SPRING I wrote you that my belief in the country newspaper had led us in General Motors to decide to advertise our products together in the small-city press of the country.

The returns from the series of the messages recently published have justified that faith; and we shall continue to advertise in your community through your newspaper this fall.

It occurs to me, however, that some of your readers may be asking: "What is General Motors?" and "Why is General Motors?" These are fair questions and I should like to answer them as frankly as I can.

General Motors was organized some years ago on the theory that a group of large companies, working together, could render a better service than they could separately. In this we simply applied to industry a principle that is as old as civilization as regards the human family and human progress.

Original members of the General Motors family were Buick, Cadillac, Chevrolet, Oakland and Oldsmobile, together with the Delco-Light Company and other well-known companies manufacturing automotive equipment. By joining together their resources, we were able to establish great Research Laboratories, a 1245-acre Proving Ground and the GMAC Plan of credit purchase; to effect vast economies in purchase and manufacture and distribution; to assure and maintain the quality of every product in the General Motors family.

Has the General Motors family principle proved itself in practice? The best answer, I think, is to compare the

Chevrolet, Buick, Cadillac, Oldsmobile and Oakland of today with the models of five or ten years ago.

Then add Pontiac, a General Motors creation, Add LaSalle, another General Motors creation. And then consider how General Motors has developed these cars into a complete line, within which any family may find a suitable quality car at the price it plans to pay: "A Car for Every Purse and Purpose."

Another example is Frigidaire, the electric refrigerator. General Motors had the resources to spend millions to develop a satisfactory refrigerator, and then to apply to its manufacture the same processes which have increased the utility and lowered the cost of the automobile.

We believe that this record justifies General Motors as an economic institution. Its products are quality products, first of all. Their prices represent the economies of united effort passed on to the purchaser. In the last year one in each three automobiles chosen by the public has been a General Motors car. The service of Delco-Light electric plants has extended to more than a quarter million homes, while Frigidaire has become the world's largest selling convenience of its kind.

We believe also that the values now offered in the current General Motors products (which are listed below) prove anew that "many minds are better than one" and that a family of companies, working together, can produce results which are decidedly in the public interest and of increasing benefit to the individual family.

Very truly yours,

Alfred P. Sloan, Jr., President General Motors Corporation

WALTER P. CHRYSLER'S

CAN'T HOLD BACK PEDESTRIANS IN CHICAGO LOOP

E. J. McIlraith, of the Chicago Surface Lines, before the City Traffic Conference in Chicago, made some observations of interest to those concerned with city and

town traffic problems. He said: "Progress through streets is choked by loading and unloading at curbs, by pedestrians, taxicabs and a dozen other factors that cannot be prevented. On Fifth Avenue in New York, the average speed is 5 miles per hour; for buses it is 2.6 miles per hour. In Chicago loop it is 11 miles an hour and that is from 50 to 100 per cent faster than

was three years ago. "At State and Madison Streets-Chicago-at the busy hour 1,100 persons pass from curb to curb every minute. If they were made to wait for traffic signals, they would never get across; there isn't temporary

Improve Dairy

High-Class Bull Is Essential

if Improvement Is to

Be Made.

(Prepared by the United States Department of Agriculture.)

Every dairy herd needs a high-class

bull at its head if the herd is to be

Improved, says the United States De-

partment of Agriculture. For the

dairyman who has a small herd and is

short on finances, the champest and

best way to obtain the use of first-

class pure-bred bulls is through the

work of a co-operative dairy-bull as

Purpose of Organization.

A bull association is a farmers' or

ganization whose chief purpose is the

breeding of better dairy cows through

joint ownership, use, and systematic

exchange of prepotent dairy bulls of

high-producing ancestry. Improvement

of the herd that may be expected

through membership in such an or-

ganization is discussed in Farmers'

Bulletin 1532-F, "Dairy-Herd Improve-

ment Through Co-operative Bull As-

sociations," Just Issued by the bureau

Through the system of transferring

bulls from block to block, the bull as-

sociation makes it impossible to keep

the desirable buils as long as they

live or are fit for service. This enables

a bull's daughters to come in milk and

be tested while he is still owned by

the association, and furnishes a means

of determining which bulls are siring

bulls that do not get satisfactory

Study of Records.

A study of the records of the

daughters of bull-association bulls

showed an average yearly mature pro-

duction of 8,071 pounds of milk and

duction the daughters excelled the

dams by 13.5 per cent and in butterfat

production by 14.4 per cent. Some of

the sires are very outstanding. One

NEWS REVIEW OF CURRENT EVENTS

Champion Tunney Defeats Dempsey in Lively Ten-Round Battle.

By EDWARD W. PICKARD

E VERYTHING else in the world moved back and gave the center of the stage, last week, to the "fight of the century," the battle in Chicago for the heavyweight championship between Gene Tunney, title holder, and Jack Dempsey, former champion. As nearly everyone in the country knew within a few moments after the finish, Tunney retained the title by outpointing Dempsey in most of the ten rounds, despite the fact that he was knocked to a sitting position in the seventh, taking the count of nine. In the words of one expert observer, it was simply a case of a boxer who was much faster winning a ten-round decision over a fighter who always commands respect because of his punching power.

Aside from being a good battle, the fight was the most remarkable in the history of the ring in the matters of attendance and receipts. In round figures, there were 145,000 men and women gathered in the Chicago stadium to witness it, and they paid \$2,800,000. Tunney's purse was \$900,-000 and Dempsey received \$450,000. The net profit for Tex Rickard's Madison Square Garden corporation was about \$718,000.

The contest attracted an extraordinary number of notable persons of both sexes, among them many senators, governors and lesser officials, members of the British nobility, and at least one person of royal bloodthe Princess Xenia of Greece, wife of William B. Leeds, Jr. Mr. Leeds and his party of five traveled from York to Chicago by airplane, as did a good many others, Special trains from every direction carried at least , ten thousand to the battle.

Unbiased spectators of the fight, including at least one of the two judges, said the referee, David Barry, was fair throughout, though he might have penalized Dempsey for the use of the rabbit punch on the back of Tunney's head. The Dempsey camp complained that the count was five seconds slow, when Tunney was floored in the seventh round, but this was admittedly due to Jack's slowness in getting to a neutral corner after the knockdown. The extra seconds were of great value to Tunney. Whether he could have recovered without them is a matter of opinion.

ONLY two hour of deliberation were needed by the jury to find John L. Duvall, mayor of Indianapolis, guilty of political corruption. His punishment was fixed at thirty days' imprisonment in the county fall and a fine of \$1,000. In addition the jury declared him ineligible to hold any public office or employment for a period of four years from November 2. 1925, the date of the offense. Duvall's attorneys announced they would appeal for a new trial and then take the case to the Supreme court. The verdict does not become effective until the appeals have been decided, and meanwhile Duvall may legally continue in office. The specific charge against Davall was that he accepted | trolt. In class C. for a nonstop flight, a bribe of \$14,500 and political support from William H. Armitage, long the boss of Indianapolis politics, and that in return Duvall pledged that Armitage might name the members and govern the policies of the city board as mechanic, both of Michigan, crashed of public works, from which are given many thousands of dollars of public improvement work.

N OTHING quite like the invasion of France by the American Legion-the "second A. E. F."-ever took place before. Despite predictions of disorders and other unpleasantnesses, the second visit of the doughboys to the land where they fought was an unqualified success, their reception by the people of Paris was warm and enthusiastic, and the holding of the convention in the French capital really seemed to strengthen Mr. Young is regarded as a victory the bonds of amity between France

and the United States. Furthermore. the Legionnaires in general managed to enjoy themselves without in any way disgracing themselves, which was to be expected since they are not in responsible boys. The spectacular feature of the week

was the parade of the Legion immediately after the opening session of the convention. For the second time in history the chains of the Arc de Triomphe were let down, and more than 20,000 members of the Legion passed under that beautiful monument, each pausing to lay a tlny boujust of pink roses upon the tomb of the Unknown Soldier. That shrine of France was covered with a floral mound twenty feet square and six feet deep before the last man had dropped his tribute. In the ranks of the marchers were the American women's war organizations and many women members of the families of the Legionnaires. Gathered thick along the line of the parade were about all the people of Paris, and in the front ranks of the crowds were the disabled veterans of the French army, overcome with emotion as their old fellow fighters passed by dipping their flags low before the crippled and blinded heroes. oneral Pershing, Commander Savage, Marshal Foch and other notables led he parade in motor cars, and when it reached the Place de la Concorde they dropped out and occupied places in

That evening the largest dinner ever given in Paris was served at the Four thousand Legion naires, including all the official delegates, were the guests, and the food. prepared by 500 chefs, was the best the city could provide. Next day the Legion gave a big banquet in honor of President Doumergue at which General Pershing and Marshal Foch were the chief speakers and Franco-American solidarity was the main subject of the toasts. Wednesday many of the visltors, led by General Pershing, went to Douaumont and the desolated slopes around Verdun and there "Black Jack" hald a tribute to Marshal Petain an French soldiers who under him held that position throughout the war and gave their lives by the hundred thousand. The marshal, white haired and with haunted eyes, was a pathetic figure in the coremonies at the Douaumont ossuary, where all the bones gathered in the Verdun sector are

the reviewing stand.

In the Legion convention sessions the livellest debate was over Gen. William Mitchell's attempt to win endorsement for his pet plan to have installed immediately a separate air department in the cabinet. A majority of the delegates favored a motion ask ing for the "organization of national acronauties into a separate department of national defense, headed by a cabinet secretary," but they added as soon as warranted."

Edward E. Spafford of New York was unanimously elected national commander of the Legion. Mr. Spafford, a Vermonter by birth, was gradunted from the Navy academy in 1901 and served in the navy until 1914, when he resigned to enter business, In 1917, with our entrance into the war, he returned to active duty in the navy. He is forty-seven years of age.

TNENTY-FIVE planes started from New York for Spokane in the national air derby, which was divided Into three classes. In classes A and B, for which stops were provided, the respective winners were C. W. Holman of St. Paul and C. W. Meyers of Dethere were but two starters-Eddle Stinson and Duke Schiller, Both were forced to land in Montana.

The first plane off in class A. with R. E. Hudson as pilot and Jay Radike at Long Valley, N. J., and both men were killed.

D ANIEL R. CRISSINGER, governor of the federal reserve board, having resigned from that body, the Pres-Ident appointed Roy A. Young, for eight years governor of the Federal Reserve bank of Minneapolis, to succeed him. It is understood that after the appointment is confirmed by the senate, Mr. Young will be chosen governor. Meanwhile the duties of that office are being performed by Edmund Platt, vice governor. O UR new ambassador to Mexico is to be Dwight Morrow of New Jersey, a member for twelve years of the banking firm of J. P. Morgan & Co. He was a classmate of the President in Amherst and Mr. Coolidge offered him the diplomatic post last summer. He recently accepted and told the President he would at once resign from the Morgan firm.

that the appointment of Mr. Morrow to cover the thumbs and paims and will not mark any change of policy then a tayer of dirt to absorb the toward that country in the present stickiness will make a surface on the oil and land disputes, it is believed mitts that will wear well and also that the banker's acceptance means be rough enough to pull the shucks that the chances of clearing up the quickly. A set of thumb stalls of difficulties between the two countries heavy cotton flannel or light canvas are brighter than before. It is felt are mighty handy if a mitt should rip that Mr. Morrow would not have consented to represent this government at Mexico City unless he believed that conditions were such that he had a reasonable chance of settling the present troubles, precipitated by American property confiscations in Mexico.

REPLYING to the French governsy, the American government has made | minutes and then rubbing them well an emphatic protest against discrimina- with glycerin before going to had tions against American commerce, each night. such as the recent increases in French threaten retaliatory action, it did point out the existence of section 317 of the tariff act, under which it would be possible for the President to assess additional duties or impose embargoes on goods coming from nations which discriminate against the commerce of the United States.

FRENCH resentment against the action of Christian Rakovsky, Russion ambassador, in signing a Communist manifesto calling on workers of other coutries to rise against their governments, has culminated in an official statement to Moscow that further negotiations with the Russians are broken up, cooked and served like regarding a pact of nonaggression can- string beans. They make a good adnot be conducted until Rakovsky has been recalled.

T WAS announced in Louisville that members of the Burley Tobacco since it is based upon the performance Growers' Co-operative association in of the individual hill, Kentucky, Ohio, Indiana, West Virginia, Tennessee, Missouri, Virginia, and North Caroling, will, within the next few weeks, receive a total of between \$16,000,000 and \$18,000,000, the sum representing payments on the 1923, 1924 and 1925 crops, according to information given out.

PRESIDENT COSGRAVE and his government won the Irish Free State election but by only a margin of six votes in the Dall Eireann. It is expected there will be no change in the government for a year, despite this slender majority. A new loan is

Farm Horseshoeing Information Given Herd by Sires

Using Unshod Animals Will Result in Tender Feet.

(Prepared by the United States Department of Agriculture.) With the passing of the blacksmith shop from every crossroad, hamlet and village, the farmer is experiencing considerable difficulty in getting his horses shod. The solution of the problem in a large measure devolves upon the farmer himself in tearning to do the work on his own farm. To assist the farmer in learning to care for the feet of his work stock properly and to shoe his horses, if necessary, the United States Department of Agriculture has prepared an Illustrated bulletin on farm horseshoeing, known as Farmers' Bulletin 1535-F.

Using unshed horses and mules for pulling heavy farm machinery wears off the horny wall of the foot at the ground surface more rapidly than growth is supplied from above and will result in tender feet. A wellshod horse not only is kept in serv ice but he is a more efficient worker in that he can better apply his strength because be has a better footit is important, however, that shod horses have regular attentionthat about every four to six weeks the shoes be removed, the hoofs trimmed, and the shoes retitted.

Ready-to-wear shoes of various sizes for horses and mules can now be obtained and greatly simplify the shoeing problem for farmers. A copy of the bulletin may be obtained by writing to the United States Department of Agriculture, Washington.

American Mule Ousting

Horse for Farm Work Recent statistics show that the longared, loud-voiced mule still continues to do a full share of the work of the form despite the progress of motorpropelled machinery, writes Uthat V. Wilcox in the Dearborn Independent. The mule population of the United States has grown nearly a million head in the eleven years following 1914. It is now estimated at more than 5.411,000,

Government officials note that the growers of cotton, tobacco, rice and ugar cane have swung over almost entirely to the use of mules in preparing their crops. Experience seems to indicate that the mule can do the most work on the cheapest feed and with the lowest grade of driver.

Reports from the leading mule marcets of the country, such as St. Louis, Kansas City, Atlanta and other places, show that the demand for mules is today very keen. In fact, one handler of farm animals sald that "not since the war, when mules were used for cannon fodder, has the demand been so brisk."

The mule is becoming a favorite over the horse for the farm. The Kansas City market, as an example, showed 65 per cent horses to 35 per cent mules in other years and now it is 85 per cent mules and 15 per cent

Lime for Alfalfa Year

in Advance Is Favored The best time to lime in preparation for alfulfa seeding is a year in advance, according to a bulletin in "Liming for Alfalfa," by F. J. Alway and C. O. Rost of the soils division, Minnesota agricultural experiment station. In fact, lime may be applied two or three years in advance of seeding vithout any loss in beneficial effects. If, however, one wishes to seed a dece of alfalfa in less than a year, he can get good effects by applying his lime several weeks in advance. The effectiveness says the bulletin. which is for free distribution on apollention to the division of publications, University Farm, St. Paul-Is much increased by thorough mixing with the soil. Usually time or ground limestone is best applied after plowing. Then the disking and harrowing in preparation of the seed-bed provides the necessary mixing.

The farmer who decides a year in alvance to seed up area to alfalfa MO+O+O+O+O+O+O+O+O+O where lime is needed, may very well surend his ilmestone and then put the field into corn. The limestone will not damage the most sensitive coung plants.

Muddy Potatoes Should Be Dried Before Storing

Muddy potatoes should be dried so that they may be sorted before placing in winter storage. Rotting potatoes are hard to detect while covered with mud, and herein lies the chief danger of storing muddy potatoes. This year many of the potatoes are

eing dug out of the mud. The opin ion that muddy potatoes will not keep storage is unfounded. In the Andean highlands of South America, its native habitat, the potato tubers are stored naturally in the soil all

in tests at the Ohlo experiment station, John Bushnell, potato specialist, has found that sound potatoes keep equally well whether stored muddy or dried first. However, unless only sound tubers are stored the ots may spread during storage.

It is better, therefore, to dry and sort muddy potatoes before placing them in winter storage. If spread out in a thin layer on a floor the mud dries and usually shells off readily. making it easy to sort the tubers when moving them from the drying shed to the storage cellar or pit.

Evening Gowns are Classy

By JULIA BOTTOMLEY CERTAIN types of evening gowns of present vogue are classics in dress the same as certain books and poems are classics in literature. The prestige of these sartorial "classics" rests solely upon the supremacy of fabric elegance and its artful draping, suggestions of frills or furbelows being strictly taboo.

Such are the lovely gowns which are "peems without words" created of has the coveted snug hipline and it

velvet. In their development the stylist concentrates on the theme of the snug hipline, with classic draping which brings the fullness to some strategic point at the side or front, at

decrees. An exponent of the classic type is here pictured. It is made of heavy white crepe satin. As will be seen, it

the same time accomplishing the

graceful Irregular hemline which Paris

feathers." For the daughter of the household who is "going away" to college or finishing school, the subject of party frocks is a vital one, Selection of an evening dress modeled after the style of the one illustrated will proclaim the discriminating taste of its

If not of satin, then choose velvet for the making of this frock, for a "velvet season" is surely upon us. The new velvets are marvelously textured, being supple and almost as sheer as chiffon. In fact they are variously called sheer velvet, transparent velvet, also georgette velvet.

Black velvet fashioned along youthful lines is the mode of the hour for the debutante and her younger sister. However, for those who are inclined to cofor, the new autumn satins and velvets are a revelation of colorbeauty.

There is a whole range of lenfbrowns brought out this season which are unusually attractive. There is a tendency toward wine tones, too, and many delightful shades of blue. Beige and green are also included in the list of favored colors

An exception to the rule of no trimming for the fashionable classicdrape silk and velvet evening freck, is the presence of a sparkling rhinestone buckle or ornament, placed either at the girdle or at the bipline. (@, 1927, Western Newspaper Union.)

Sour Cream Will Add to Cooked Dressing

If you have on hand some sour cream, you may prefer to make a cooked dressing. A good method is as follows: Beat an egg very light, and add to it a quarter teaspoonful of mustard, half teaspoonful of salt, quarter teaspoonful of paprika pepper, half tablespoonful of sugar, quarter cupful of vinegar, and one cupful of sour cream. Mix well and cook in a double boiler, stirring constantly, until thick and smooth. If this dressing

has any tendency to separate, strain

ounces of egg white, rather than a specific number of eggs.

If women would generally weigh their eggs and persuade dealers that a dozen very small eggs are not worth as much as a dozen big ones, the custom of seiling eggs by weight would soon become estab-

Selling Eggs by Dozen or Pound.

An old chicken may be simmered with seasonings until tender and then prepared in many different appetizing ways. One of the nicest ways to use it is to make a chicken loaf, which can be served hot or cold. The following recipe supplied by the United States Department of Agriculture requires two cupfuls of cooked chicken: Chicken Loaf.

Loaf Is Appetizing

2 cupfuls finely 2 eggs cut cooked ½ cupful mashed chisken canned peas I cupful fine bread Salt

crumbs Paprika

1½ tablespoonfuls Onion and green
butter or chicken fat butter or chicklg cupful milk en fat

Heat the milk and moisten the crambs with it and combine with the other ingredients, adding the beaten eggs last. Place the mixture in a greased baking dish or pan and bake in a modern oven for one hour, or until firm and brown. Turn out on a platter and serve hot or cold. If served cold garnish with sliced tomato.

On the Funny Side

TIME TO LAUGH

Biffkins was suffering from liver rouble and the doctor told him that if he laughed fifteen minutes before each meal his condition would improve. One day in a restaurant, while Biffkins was having his little laugh. a man at the opposite table walked over to him and said in an angry manner: "What the dickens are you laughing at?"

"Why, I'm laughing for my liver," said Biffkins.

"Well, then, I guess I had better start laughing, too. I ordered mine balf an hour ago."

Dick Hanley Has Hard Job

Aside from facing one of the stiffest grid schedules in the conference this fall, Coach Dick Hanley, Northwestern's new grid leader, is up against the problem of finding suitable successors to Ralph Baker and Bob Johnson, all-American players, who are lost to the squad through graduation.

Both players performed brilliantly for the Wildcats during the last three years, and their absence will leave two big holes to fill. As quar-

ter back, Baker was the lending spirit of the squad, while Johnson's performance in the line made the forward wall one of the most formidable in the conference. Other capable performers who will not be back are Paul Griffith, Ade Schumacher and James Solheim, half acks, and Otto Siebenmann, guard.

Coach Hanley is not expecting the freshman squad of last year to present him with much in the way of varsity material. There are a few youngsters, principally back field men, who will make a strong bid for a regular job, but they are not likely to replace many of last year's regulars.

Hanley is pinning his hopes for success this fall on his back field aces, Capt. Vic Gustafson and Leland (Tiny) Lewis. In Gustafson the Purple coach feels he has one of the best ball-carrying backs in

Umpire Aids Needy Baseball Player

An umpire with a heart has been found. He is Dr. Justin L. McCarthy, chief official of the Attleboro (Mass.) shop league, Impressed by the gentlemanly spirit of a young pitcher-outfielder and learning the lad was not to return to college because of financial difficulties, "his honer the Umps" got in touch with a wealthy friend and with their combined aid the player can go to college again. The other players believe there may be a Santa Claus after all.

Scout Charley Hickman Praises New Mack Star

Charley Hickman, scout for the Cleveland Indians, believes the Athletics grabbed one of the best outfielders in the minors when they bought "Mule" Haas from the Atlanta Crackers. Hickman avers that Haas is one of the greatest fielders he ever saw outside of the majors and the Indians would have bought him had Atlanta's price tag been a few thousand dollars smaller.

Haas, who is no relation to the veteran Bruno Haas, is completing his third season in the Southern league and was given a brief trial by the Pirates at the end of 1925. The Bucs bought him from Birmingham, where he batted .316, but considered him too green for immediate service and released him in 1926 to Atlanta. Bert Niehoff, who played second base for the Phillies the year they won the pennant, is managing the Crackers and predicts that Haas will be a regular in the Mack lineup next season. The future Mackman is hitting at a .348 clip and has always been a cen-

Bobby Jones Not Sure

Bobby Jones has not definitely made up his mind about returning to Great Britain in 1928 to defend his title of British open golf champion, tie so informed his friends recently.

"I shall return to my law studies," said the champion, "and future plans must depend upon circumstances."

Officials Get More Work

A noted official gives his angle on the new football rules as follows: "The only trouble with the new rules may be that they make the work of the officials more complicated, and it Is not good for any game to make the job of the men who run it too prominent. "One trouble with basket ball has been too frequent interruption of actual play by the referees' whistle. They should be careful to see that the same thing doesn't happen in foot-

Lesson for October 2

ELIJAH ON MOUNT CARMEL

LESSON TEXT-I Kings 18. GOLDEN TEXT—Choose you this ay whom ye will serve.
PRIMARY TOPIC—God Hears Elljah's Prayer, JUNIOR TOPIC-Standing Alone for

INTERMEDIATE AND SENIOR TOP-IC-Standing for God Against the YOUNG PEOPLE AND ADULT TOP-IC-The Courage of Conviction.

1. Elijah's Message to Ahab (vv. 17,

13).

When Jezebel became the wife of King Ahab, she waged a savage warfare against God's prophets, killing all she could find, and thus seeking to abolish the true religion and set up idolatry instead. Elijah suddenly appeared, announcing the suspension of moisture (I Kings 17:1) as a judgment upon the people for their idolatry. He sounded three striking notes In his message:

1. "As the Lord God of Israel liveth." He knew that he represented the living God, therefore did not fear to come into the presence of the king. 2. "Before whom I stand." His standing before God indicated his con-

stant readiness to go on His errands. 3. "There shall not be dew nor rain these years, but according to my word." This suspension of moisture continued for three and a half years, and rain came in answer to Elijah's

prayer (Jas. 5:17): II. A Challenge to Baal Worship (I Kings 18:17-46).

As soon as Elijah had delivered his message concerning the drought, he retired from the king's sight. 1. Elijah shows himself to Ahab (vv. 17, 18).

(1) Ahab's question (v. 17). His aim in this question was no doubt to intimidate Elijah.

(2) Elijah's answer (v. 18). He denled the charge and boldly declared that the calamity which had befallen the nation was caused by the idolatry of Ahab and his family.

2. The bold challenge (vv. 19-24). (1) The people assemble (vv. 19, 20). At the urgent request of Elijah the king convened the people.

(2) The ringing call to decision (vv. 21-24). a. The question asked (v. 21). Many of the people had not wholly forsaken God. They attempted to worship both God and Baal, b. The silence of the people (v. 21). This may have been because of fear of the king or ignorance, for many were of the opinion that to be religious was the only thing necessary, irrespective of the being worshiped. c. The method of decision (vv. 22-24). Two sacrifices were to be provided, one to be offered to Baal, the other to God.

3. The test applied (vv. 25-39). (1) Offering by the prophets of Baal (vv. 25-29). Elljah gave the prophets of Baal the first opportunity to prove whether Baal was a real God. (2) The Offering by Elijah (vv. 30-

39). a. The people invited near (v. 30). His object in inviting the people was grasp the genuineness of the test. . The altar repaired (vv. 30-32), Elijah took twelve stones, representing the united nation. c. The offering on the altar (vv. 33-35). After the bullock was in place he had four barrels of water three times emptied upon the sacrifice and the wood so as to fill the trench about the altar. So sure was Elijah that God's power was sufficient that he heaped difficulty upon difficulty. d. Elliah's prayer (vv. 36, 37). This was a model prayer, (a) It was based upon covenants (v. 36). All real prayer rests upon covenant relationships, (b) Its object was God's exaltation (v. 36). Elliah was jealous for God's glory, but the only thing that he asked for himself was to be known as God's servant. (c) It was for the salvation of the people (v. 37). e. The result (vv. 38, 39). (a) The fire of the Lord fell and consumed, not only the sacrifice, but the wood, stones and dust, even licking up the water in the trenches. (b) The people fell on their faces and confessed that the Lord was the God.

4. The execution of Baal's prophets (v. 40). Israel's government was a theocracy. God was their king. Idolatry was treason against the King. These false prophets were traitors to club of the Virginia league, has been God and therefore should die. sold to Toronto in the International

5. Elijah vindicated (vv. 41-46). The proof that Elljah was God's prophet was incomplete until rain came. III. Elijah Taken Up Into Heaven (II Kings 2:1-15).

Not only was the prophet vindicated in that the offering was consumed and rain came, but God took him to Himself when his work was done.

Faith of Our Fathers

"The church should be kept the source of spiritual life and power. Never before dld the world so need emphasis upon the 'faith of our fathers living still,"-Rev. B. Allen

Saved From Doubt

At last Thomas was saved from doubt. What saved him? Love for Christ. He had anchored his soul to the Nazarene with a mighty and abiding love,-Vance.

Sunday School 1492 to 1927

COLUMBIES AT THE COURT OF ISABELLA @Photos by Underwood & Underwood

NEW YORK SKYLINE

By ELMO SCOTT WATSON N THE year 1492 there ap-

peared at the court of Ferdinand and King Queen Isabella of Spain a man named Christopher Columbus, or Cristobal Colon, a poverty-stricken, discouraged sea captain who at the age of fiftysix had all but given up a boyhood dream and the

hope of ever realizing the fondest ambition of his life. "He was tall and well built, of dignified mien, with red hair and beard, a long ruddy face, dear gray eyes and aquiline nose," writes Dr. I, B. Richman author of "The Spanish Conquerors," volume two of the Yale university press 'Chronicles of America." "To inferiors his manner was exacting and brusque, to equals it was urbane and to superiors it was courtly. His figure showed to advantage, whereof he was not unduly aware, and he evinced a taste for vellow in beads and for crimson and scarlet in caps, cloaks and shoes.

"Unlike the Spanlards, whom he vas to lend, Columbus was not in disposition primitive; he had no relish for blood and suffering. He was, however, proud, with a measure of austerity, and he was highly romantic and strik-

ingly devout." Such was the man whose great achievement is celebrated on October 12 of this year, 435 years after that achievement took place, and perhaps it was the romantic element in his nature which made him, despite all discouragement, hold fast to his dream of finding a shorter route to the wealth to see clearly in order that they might of the Orient by sailing directly west across the "Sea of Darkness," For the wise men of his day scoffed at his plan, ridiculed his idea that the earth was round like a ball, called him a

visionary and a foolish schemer. This was not his first appearance at the royal court of Spain. He had been there once before and had falled just as he had failed at the court of another monarch. The story of his fallures and his final triumph, as giv en by Doctor Richman, follows:

He obtained an audience with the king of Portugal and laid before him a definite proposal. He asked for three aravels equipped and supplied for rear; and, in the event of lands being ound, for the vice-royalty and etual government therein, a tenth of the income therefrom, the rank of nobleman, and the title of grand admiral.

what he felt to be the vanity and pre sumption of the petitioner that he promptly referred his plea to a counoil of three experts, by whom, afte me deliberation, it was dismissed, ereupon Columbus, late in 1485, or Thereupon early in 1486, left Portugal for Spain. What first occurred is not known resumably Ferdinand and Isabella after a courteous hearing, smilingly put by the question of exploration, for they referred it to the queen's con-fessor, Hernando de Talavera. who at length, late in 1490, reported adversely for Columbus, and the sover-

eigns accepted the report. Columbus would seem to have gon back to Portugal, but by May 12, 1489 he was again in Spain and in attendnce upon Ferdinand and Isabella at the siege of Baza.

Columbus was poverty stricken and, or once, discouraged. With what cheer he might, he met his friend, the for-ner guardian, Antonio de Marchena, and also (perhaps for the first time) the officiating guardlan, Juan Perez, once

onfessor to Oueen Isabella Ry thes three, under the stimulating zeal of the monks, a plan was contrived. Co umbus should thoroughly canvass the nuritime section, having Pales for a center for all possible information regarding pioneer voyages into the Sea f Darkness. Not long after his return Guardian

Juan Persz, and perhaps Pinzon also rote to Queen Isabella, asking a furher hearing for Columbus and project. The request was granted. umbus, repeating with emphasis the terms submitted to King John II, de-manded of Ferdinand and Isabella a paient of nobility, the admiralty of the ocean, the vice-royalty and government of all lands discovered, and " ommission of 10 per cent upon every thing within the limits of his admir-alty which might be bought, ex-changed, found or gained." That, in he should demand three caravels, to cost possibly two million maravedis (\$5,000), was by com-

of January, Columbus was dismissed a second time from the Spanish court and departed sorrowing. The royal flags streamed from the towers of the Al-hambra, for Granada had fallen, but in his event our Genoese took little interest. His course led him toward Cordova. . . When only two leagues from Granada who should overtake him but a royal constable, sent posthaste by the queen with or-ders for his return! His demands, one and all, would be compiled with. He set sail from Palos August 3, 1492, at

Such was the start of his historymaking voyage. The story of that voyage is a familiar one—how "as the last dim outline of the Islands faded from their sight, many of the sailors were completely overcome. Some shed tears

world'; others, unable to restrain their grief, broke out into loud and bitter lamentations"; how they continued to be alarmed as the three tiny vessels plunged on into the wilderness of the water and especially as the needle of their compass seemed to be bewitched and varied more and more, as they went on, to the west of north instead of toward the North Stur; how they plead with their leader to turn back and how in the words of the poet, the reply of Columbus to all questions was "Why, shall you say at break of day? Sail on! Sail on! And on!"

And then on October 12, 1792, he reached his goal-not the Indies of his dream but America! Before the expedition had set out Martin Alonso Pinson, an associate of Columbus, in a recruiting appeal to the seamen of Palos had said "Friends, come with us! Come with us on this voyage! Here you are in poverty. Come with us, for according to accounts you will find the houses with roofs of gold and you will return rich and prosperous!" Although they never realized that dream of riches it was their venture which eventually resulted in the building in the New World which they had reached n nation whose wealth is vastly greater than all the riches of which Columbus ever dreamed. To the eyes of many an immigrant from the native land of Columbus the skyline of New York rising up out of the ocean to the overhanging clouds has seemed to be truly that of a city composed of "houses with roofs of gold" in the "Promised Land,"

There is much disagreement among historians as to the truth about this man. Christopher Columbus-dispute as to his paternity and his nationality and dispute as to his right to the title of "Discoverer of the New World." Seven cities of Greece are said to have claimed the great poet, Homer, for their own. But no less than seventeen towns vie for the bonor of being "the birthplace of Columbus." Italy says he was an Italian; Spain insists that he was born in Galicla, a Spanish province; Portugal lays claim to him as a native son, as does Corsica, once

a French Island. Contrary to all school history teaching, there are those who insist that Columbus did not discover the New World. They would give that honor to the Norsemen or to any one of a number of navigators who are believed to have dared the Atlantic long before he did-Breton, Spanish, Portuguese or some native of northern Africa. But after all, the question of his nationality and the question of who was the first European actually to set foot on land in the New World are reintively unimportant. For it was the achievement of Columbus, be be Spanfard, Italian or Portuguese, that

1492 to 1927! Four centuries have passed since Columbus sailed out into the unknown but the message he gave to the world then still lives, the message of the ultimate triumph of falth and high courage and steadfast purpose over superstition and Ignorance and fear. And the message which Columbus day brings to Americans each year is the inspiration, amid discouragement and apparent defeat, to "sail on and on and on."

Helium Gas First

The discovery of helium gas on he sun preceded its discovery in comnercial quantities on the earth by about 50 years. Lockyer in 1868 found a new gas in the spectrum of the sun while studying the flames shooting out from its surface. The gas was new because the color of the line representing it, when analyzed by the spectroscope, was distinctly different from anything previously

known. Twenty-eight years later | gate and found in his samples that traces of the same gas were found in uraninite, and for the first time scientists knew that it was present on earth as well as in the sun. More years passed and it was discovered that helium was a product also of the disintegration of radium, says Popular Mechanics Magazine. Still later, during the World war, Kansas housewives began to complain that the natural gas supplied for cooking was deficient both in heat and light. A unlversity professor was sent to investi- coronation of all the rulers of Russia.

helium, a noninflaumable, inert gas, was to blame. Its extraction in paying quantities from Texas gas wells followed.

Famous Russian Crown

Probably the most valuable and ineresting of all the Russlan crowns was the one made in 1762 for Catherine II by Bauzie, a celebrated Jeweler of the day. Since the time of Catherine this crown has been used at the

STORY FROM THE START

Garth Guthrie, Canadian war veteran, having to live in the open on account of weakened lungs, is factor of a Hudson's Bay post at Elkwan. He came Bay post at Elkwan. He car back from the conflict with permanently scarred face, which he realizes cost him the love of his fiances, Edith Falconer, Sir Charles Guthrie, his brother, is a millionaire war profiteer. With Etienne Savanne, halfbreed, his firm friend, Garth meets Doctor Quarrier, geologist, and his sister Joan. Their schooner has drifted ashore. Quarrier complains he has been robbed by a man known as "Laughing Mc-Donald." At Elkwan an Indian girl, Ninda, tuberculosis victim. om Garth has befriended, is dying. Joan, trained war nurse, cares for Ninda, but the girl dies. Charles Guthrie writes reproach-ing his brother for not coming home. Charles' wife assures him Ethel still loves him, but Garth in his heart knows better. Three of McDonald's party visit Elkwan seeking to buy gun shells. From them Garth learns of evil talk among the Indians concerning him and Ninda With Etlenne's Saul Souci, "medicine man" of the Crees, and gets his promise to persuade the Crees to take their furs to Elkwan instead of to McDonald. Garth is ambushed by Joe Mokoman, Ninda's reput-ed father, whom the factor had driven from Elkwan.

CHAPTER V-Continued

The Ojibwa leered, "You tak' de woman. You kick Joe Mokoman. W'at you do wid de woman?"

"She is dead," said Garth, quietly. "You tak' de woman to Albanee You geeve Joe Mokoman mooch debt? The face of the speaker knotted with hate of the man who was measuring the distance which separated them and-wondering.

"What do you want-how much trade goods?" tempo..zed the white man as he covertly e ged a foot forward in the snow.

"You geeve sled-load; flour, tea, blanket, gun?" The face of the Indian lighted with the thought of the spoll which awaited him at the post,

"You want a four-dog sled-load? Garth scratched his knotted forehead, as if debating the value of the goods, It was twenty feet-he couldn't make it. He must get nearer, somehow, he thought.

The Indian nodded, "Four-dog team -flour blanket all re-" With a quick movement he brought the gun to his shoulder as the white man slid a moccasin nearer, "Beka! Stop!" he cried, his swart face purple with rage. "You move, I keel you!"

It was no use. There was no chance of getting close enough for a lunge. Garth changed his tactics as the evil eyes of the other narrowly watched him. Turning his back, Guthrie calmly proceeded to finish the dressing of the carlbou.

For a space the Ojibwa stood holding the gun on the back of the white man, his face picturing amazement and doubt. Then he said: "You geeve me dis stuff?"

"Sure," replied the man, busy with his knife, as he mentally groped for a way out of his predicament-puzzled as to whether the Indian would shoot if he rushed him.

"You lie-I feex you!" warned Mo-

Roman. For a space there was no unswer from the man using the skinning knife; then sucdenly getting to his feet and facing the Indian, who warily covered him with his rifle, Garth said good naturedly: "You'll get the sledload," but the eyes of the man who smiled had seen something which had started his heart pounding in his throat. His fingers, blue with cold. shut on the handle of his knife, turning the knuckles white. "Oh, yes! I'll give you-the stuff," said Garth, Jerkfly, his muscles stiffening like clamped springs as he waited. "You come to Elkwan-and I'll give you-all the stuff-you can-

"Get 'em, Shot !" roared Garth, lunging forward and to one side, while a blur of black and tan catapulted into the Indian's back, carrying him headlong to the snow, as the rifle exploded. With a snap of powerful Jaws, the hood of the Olibwa was torn from his head-a lunge and the long fangs met in the flesh of the shoulder; then Guthrie dragged the maddened dog from the shricking man who writhed

in the snow, arms shielding his face. With a grip on the collar of the struggling dog. Garth picked up the rifle on the snow and regained his own, while the Indian whined over his

lacerated shoulder. "Well, how about it now?" rasped Guthrle with a hard laugh, stroking the neck of the excited airedale.

"Hold out dog!" cried the Ojibwa, getting to his feet and backing away from the black and tan fury who

"I'll hold the dog. He won't bother you. And you stay where you are, You're going to tell your story to Saul

strained toward him, hot with lust

The evil eyes of the Ojibwa widened in surprise. "Souci?" he muttered.

"Yes! Souci is going to Akimiski to watch you people. He'll put devils into some of you before the winter is over. Now what did you throw that gun on me for? I ought to give you a good hammering."

The Indian essayed a smile but his face showed his fear. "I not shoot-I-" Then he asked weakly: "You lie w'en you say you geeve de trade good?"

"I lied," was the dry reply. "Now we'll start for the lake. Mush!"

When Etienne and Saul returned from the Muskeg, Garth told his story, "By gar, dat good dog, Shot!" And Etlenne rubbed the dog's ears.

"Yes," and Guthrie took the hairy head in his hands as he smiled into the dog's worshiping eyes. "He did the trick for Garth, didn't be?" he said as he bent and rested his face against the alredale's neck.

"Dis man, I t'ink cum up riviere for McDonald Ha! Ha!" sald Saul, "You think he is working to get the up-river trade away from us, too?"

Saul nodded. "He was here before

de Ice, some hunter tell me." Garth turned to Etlenne, "So McDonald is out to swamp us-bog all the fur this year? Well, we'll give him a fight for it, Etienne," he said, savagely smarting with stung pride at the cool attempt of the free-trader to steal the

river trade from under his nose. "Wat you do wid dis skunk?" And Etienne nodded toward the prisoner. sitting dejectedly on the opposite side of the fire.

Saul looked hard at the white man. who did not answer, then said in Cree to Etienne: "This weasel of an Ojibwa only makes trouble. It is better to send him back to McDonald Ha! Ha! under the Ice," and the Cree drew a sinewy hand suggestively across his

At the words and gesture, Joe Mokoman slowly changed color. His hands shook with fear. Drops of sweat stood out on his forehead. The small eyes of Etlenne twinkled with amusement as he repeated the remark to his chief,

"It would serve him right, Saul, but I want him to take a message to Mc-Donald."

That morning, with sleds heavy with carlbou meat, the three started for Elkwan with the agent of McDonald Ha! Ha!

CHAPTER VI

When the last ice-cap, which imprisoned the north, receded, leaving in its wake the great inland sea of Hudson's bay with its long arm plercing the hinterlands to the south, among the many islands scattered in its track, by far the largest was Akimiski, And through the centuries Akimiski came to be known as a favorite haunt of the black, the black-cross, and the silvergray foxes. And each winter, the Hudson's Bay company sent hunters there to seek the precious pelts. Then came the Revillon Freres, and they also sent men to winter on the island, for the spoil of its wind-harried tundra, which paralleled the west coast for sixty

miles, was priceless, And now to this land of the little foxes of the glossy black and silver pelts, for which fair women would pay fabulous prices in the markets of the world, had salled the schooner of a stranger seeking the loot of the Aklmiski barrens-a man of daring, who had salled straight to the course, and whose little schooner already lay tocked in the shore ice of Seal cove. Here, while the tides, freighted with broken ice, still patroled the strait, barring the birchbarks of daring hunters, cutting off the shore posts from all trade, McDonald Ha! Ha! was prepared to welcome the trappers of Akimiski with his flour and sugar and tea, his tobacco and cloth and gew-

gaws. Garth Guthrie sat in his trade-room with old Saul and Etienne, in council of war. For days after their return from up river, the wind had made the strait impassable to the York boat, which had been left at its summer anchorage in the channel for this use. The tide had kept the lower river open and with the right wind the thing could be done, Garth had reasoned. But the Indians had shaken their heads. It was sure madness not to wait for the cold, which would set the ice far out from each shore. Then they might hazard it with the canoe on the sled.

As for Joe Mokoman, he had spent the days in whimpering over the sudden wenth which awaited him in the attempted crossing. But Guthrie had a message for McDonald, which Moko-

man was to carry It was the penalty. Garth told him, with a twinkle of the eye, for throwing a gun on a Hudson's

Bay factor. But the severe frost might hang off for weeks, until after Christmas, in fact; and the hunters would take their fur to the schooner, Guthrle argued. and the man who had lived for four years with risk in each breath he inhaled, in every measured minute, insisted that the attempt be made to cross the strait at once. So one morning they put out with a westerly wind and by much rowing and battering and dedging of drifting ice, landed Saul with his dogs, and Mokoman, on the shore ice of Akimiski, ten miles across the strait from Elkwan point.

Saul set out with his dog team for the camp of his sons, while the Olibwa started down the coast with Guth rie's letter to McDonald, which ran: "Mr. McDonald,

"Schooner Ghost, Seal Cove, Aktmiski Island.

'Dear Sir: "The bearer of this letter, Joe Mokoman, the Indian you sent up river to steal the trade from me, is returned to you with thanks. He tried to ambush me at Elkwan lake, and it is solely owing to the fact that I could use him as a messenger, that you look

upon his handsome face again, "The purpose of this communication is to announce that, as you intend to hog the trade of Akimiski from your strategic position at Seal cove, I shall use my position on the Elkwan to insure that trade going to me alone, so you may spare yourself the trouble of sending any more Indians up river, for you'll never hear of them again, As to the Island trade, I was here first, and I'm going to fight you for it.

"GUTHRIE, ELKWAN," Then the two men started back in the leaking York boat, and after a day of slavery at the sweeps, with the help of the northeast wind and the tide, reached Elkwan, and warped the craft up out of harm's way to her winter berth on the high shore.

The fight was on, but the saving of their share of the Christmas trade in foxes, when the pelts were prime, depended on the ice. Saul had a free hand to pick up all the skins he could get hold of for Guthrle at a good price if the Indians would wait, but the lure of the schooner's trade-goods, within easy reach, would be too much for the mercurlal Crees, unless the strait froze and they could cross to Elkwan for the New Year's festivities. The strait impassable, Garth and Etienne knew that the bulk of the valuable fur would go to McDonald. That was the problem they faced as they sat in the trade-house on their return, and made their plans.

"What makes you think that Saul can get them to hold their fur and keep away from the schooner?" Guthrie asked. Since Etlenne's two evenings of smoke talk with old Saul, in his shack at Elkwan, before the Treaty Chief was landed on the Island, the head man had acquired an optimism

which somewhat puzzled his superior, The black eyes of the half-breed snapped. "I t'ink Saul weel mak' de medicin' for dem. He ees beeg shaman wid dose Elkwan an' Kapiskau Cree.'

"Can he control all his own people?" "Some ov dem-some not, mebbe." "What has medicine making got to do with getting our share of the trade,

Again Etlenne's leather-skinned face broke into a net-work of fine lines as his eyes lighted with amusement. "You see, M'sieu' Guthrie, w'en he

start to work." Garth was interested. He had thought only of Saul's influence as Treaty Chief. The use of magic in the defeat of McDonald's plans lent a

new angle to the matter. "You mean that he's going to hold a pow-wow of some kind and declare that the schooner is bad medicinehaunted by evil spirits?"

"Well," mebbe he have dream dat schoonair breeng bad luck, yes. Mebbe he see devil on dat schoonnir, I don' know. He tell me he weel mak' de medicine-lodge on de Islan'."

"Well I'll be d-d!" It had never entered Garth's mind that the reputation of old Saul as one having intimate relations with spirits, good and evil,

could be put to use on the Island. But the wily old three had evidently taken It for granted that he was to set his powers as a conjurer against the odds which confronted the factor of Elkwan. "Etlenne, it's a great Idea! If he

can bewitch that schooner, we'll lick em yet! "Old Saul say he not know what he do. Some hunter ovair dere are stranger. He tak' de dog an' go see dem, den he .mak' merficine-lodge and breeng all the Injun to hear de spirit

The Idea was masterful. If the old shaman could corvince the hunters of Akimiski that the schooner was 'tabu," forbidden ground to the Crees -that it was the haunt of demons and spirits who had taken this method to lure the Crees to perdition, he could hold much of the trade for Elkwan. Nervously pacing the floor, Guthrie voiced his enthusiasm for old Saul's

"Etienne, if he can bewitch the schooner, we'll make them work to get that fur. Why, we can use the very name against them-'The Ghost.' Haunted with devils! The Devil Ship! That's the idea! Laughing McDonnid may not get the haul he figures on, after all.

Into the night, the two discussed the plan of the old Indian to undermine the operations of McDonald Ha! Ha! against the fox pelts of Akimiski, But when he sought his bed, the thoughts of Garth Guthrie were of the short, swift days when a girl with dark, straight-gazing eyes and a mass of unruly hair whose errant tendrils defied restraint, had noiselessty taken charge of the house and the stricken Ninda-who had, with such delicacy, eased the sting of the tragedy which followed his homecoming.

To the girl who, in her blond lovellness, smiled from his dresser, in the dim candle light, Garth vouchsafed the acknowledgment of a doubtful shake of the head. "The sister-in-law of the great Sir Charles Guthrie," he quoted from Clara's letter. "No, you haven't changed, my dear. You're the same old Ethel." And he blew out the candle. But before he slept, he told himself that whatever Christmas might bring in the way of Ill luck to Elkwan, it would be compensated for by the arrival of the mail team from Albany with Joan Quarrier's premised letter.

Frozen in under the lee of the timberless hills circling the cove, the schooner of Laughing McDonald lay sheathed with Ice and snow, snugly wedged in her winter berth, her bare poles and stack, from the galley, alone narking her in the litter of broken ice.

In the cramped area of the little cabin, plled with boxes, sat three men: Skene, the middle-aged Newfoundland mate, with the short leg; Breault, the master, big, black-bearded, eefy, with small, hard eyes, which shifted overmuch as he talked; and on a strongly made wooden box with a heavily stenciled end, was doubled the third. Although hunched on the box of ammunition, his long arms clasping his knees, the lean bulk and length of the man were manifest. From the sleeves of his arctic overshirt, wrists and hands, eloquent of the bone and thews muffled in the thick clothes, protructed. Anywhere between Whale river on the east coast and Elkwan, the face of this man would have furnished his identification. Below rebellious russet bair and cold blue eves the devastation left by a shell fragment had baffled the art of the plastic surgeons. The patched semblance of a mouth, twisted with its gashed cheek into an endless leer, like a gargolye on a gothic tower, stamped the face of Laughing McDonald with an aspect flendish, diabolical. Young, with the body of a Viking, this man with eyes blue as the bergs which sweep its coast had returned to Canada from the war, wearing for features a comic mask, which, according to their kind, shifted the eyes of the beholders in pity, or drew the stealthy snigger of derision, But most, who for the first time looked upon the great-shouldered giant with the iceblue eyes and mangled mouth, turned to marvel what a man for the eye must have been he who was now "Laughing McDonald." (TO BE CONTINUED.)

Indians Resent Terms Derogatory to Race

Melvin R. Gilmore of the Museum | of the American Indian in New York says that the Indians resent having the words "squaw" and "papoose" applied to their women and children. "The use of the terms 'buck,' 'squaw and 'papoose' is not only an offense against refined speech," according to Glimore, "but those who use such terms are thereby incapacitated to fairly appreciate the Indian, or anything of Indian culture. The psychological effect of the use of such terms is to inhibit the mind of one who uses them from estimating Indians in their

Strength Tests

Tests of strength have been made, and the following are given as the average figures for the white race; The "lifting powers" of a youth of seventeen is 280 pounds; in his twentieth year this increases to 320 pounds; and in the thirtieth year it reaches its height-365 pounds; at the end of the thirty-first year the strength begins to decline, very slowly at first. By the fortieth year it has decreased 81 pounds, and this diminution continues until the fiftieth year is reached, when the figure is 230 pounds. After this period the strength falls more and more rapidly until the weakness of old age is reached,

proper human relationship. And I may say that of all the wrongs and injustices suffered by the Indian race, the native American race, none causes more bitter, burning resentment, and naturally so, than this of declassing Indians apart from all human kind by the use of these reprehensible and derogatory terms."

Book Buyer Got Bargain

A recent issue of the Boston Herald nnounces the presentation to the Harvard College library of "A Book for Boys and Girls," by John Bunyan, and published by "Nathaniel Ponder at the Peacock In the Poultrey, London," Ordinarily a child's story book would not be of great interest to Harvard librarians, but this book is different. Perhaps Miss Miller, the former owner of the book, can best realize just how different this book is from the other books, for she purchased it from a peddler for about six cents and only a few months ago sold it at auction in Loudon for \$10,000.-Market for Ex

Paris' Lone Oak Parls, which contains more than 100,000 trees, has only one oak tree. The commonest ones are platanes chestnuts, elms and maples.

SOUTH-WEST **NEWS NOTES**

The Elephant Butte Project Fair to be held in Las Cruces, N. M., October 19 to 22, promises to outstrip any of the nine previous fairs.

The Indian fair, held in Santa Fe during the flesta, brought to Indiana who had pottery, paintings, baskets, beadwork and jewelry to sell, more than \$1,100.

A carload of young fish was to be sent from federal hatcheries to Elephant Butte lake, according to advice received in Las Cruces from the United States bureau of fisheries, Malcoim Titus, W. D. Parker, Sr.

and W. D. Parker, Jr., are held in jail at Santa Rosa, N. M., charged with the brutal murder of "!arcelino Oca-60 years old, at Puerto De Luna,

With a \$4,000 fund made available by the State Finance Toard, a specialist will be brought to New Mexico to minister to an estimated 75 persons left crippled by the infantile paralysis epidemic. George E. Woodin of Boston has

bought the Memphis mine at Organ, miles east of Las Crucas, N. M ... which since the \$0's has produced half a million dollars in copper, lead, zinc and silver.

Approximately \$5,000,000 will be realized on the cotton crop under the Elephant Butte project this year than last, provided the favorable market prices continue, according to recent estimates made in Las Cruces, N. M.

The first unit of the new Elks home of Spanish design is nearing completion at Gallup, N. M. Plans have been made for its dedication Oct. 12. In which prominent lodgemen from Ari zona and New Mexico will take part

Luis Hidalgo was found guilty of econd degree murder by a jury in district court at Las Cruces, N. M. for killing with an axe his sweetheart. 13, and her mother, Mrs. Anita, Manynez, near Berino last Juana

J A. Castillo of Gallup, New Mexico, has been appointed assistant state superintendent of public instruction succeeding R. L. Baca who resigned when District Jude Reed Holloman held that as he is a state representative he cannot hold the office.

The chili crop at Vinton and in the lower Mesilla valley is valued at \$50,-000 for the 100 acres planted, according to estimates made in Las Cruces, N. M. A dehydrating plant under construction at Vinton will take care of the crop after the green shipments are completed.

An educational "roundup" of Navajo Indians is in progress on the reservation in New Mexico. Capt. Herbert Redshaw of the Indian service with his helpers, is making a thorough canvass of the reservation for students who have been enrolled in government schools.

Lt. Osborne C. Wood, son of the late governor general of the Philippines, and whose Wall Street activities but recently held him in the pub lic eye, is in Santa Fe to work for a mining company. Asked about his financial adventures, Lt. Wood replied with a grin, "We'll just forget all that, I've got a job and I'm going to be

busy with it." The council of all the New Mexico Pueblos, assembled at Santo Domingo recently, adopted resolutions touching on the Middle Rio Grande conservancy project and opposing any condemnation of Pueblo lands for conservancy or the involving of the Pueblos in the conservancy project, in any general appropriation bill and requesting that any leislation contain narantees against the allotment of In-

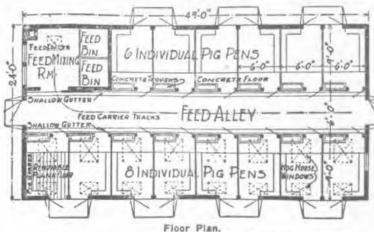

Plans are being made for the commercialization of the great beds of white sands or gypsum west of Alamogordo, New Mexico. Interested in the project are J. V/. Ady, Colorado Springs, Colo., and Dr. Charles L. Lindas of Cripple Cree' and Denver, Colo. These parties have leased 63 .-000 acres in the heart of the gypsum deposit and expect to erect a building material factory in the future. The project, if carried through, would mean the extension of railroad facilities.

Catron county, New Mexico, abolished by an act of the last New Mexico legislature, effective June 30, 1928. when it is to be absorbed by Socorro and Grant counties, will still be fighting for existence if the Supreme Court upholds Judge Reed Holloman's recent decision. Judge Holloman ruled that the suit to prevent the enforcement of the legislative act cannot be brought until the act becomes operative, next June. Hence Catron coun ty, which was created in 1921, can wait until next year for legal action. If the Supreme Court upholds Judge Holloman

After being vacant for more than eight months, the permanent presidency of the University of Arizona has been filled. Dr. Homer Lerov Shantz, head of the department of botany at the University of Illinois, whose work as former member of the government bureau of plant industry has received high praise from William M. Jardine. secretary of agriculture, was named by the board of regents to take over the administration of the University in the fall of 1928.

Plenty of Sunlight Assured for This Specially Designed Hog Barn

By W. A. RADFORD

Mr. William A. Radford will answer estions and give advice FREE OF COST on all problems pertaining to the subject of building work on the farm for the readers of this paper. On account of his wide experience as editor author and manufacturer, he is, with out doubt, the highest authority on the subject. Address all inquiries to Wil Ham A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

Sunlight is nature's greatest aid to sanitation. This fact is recognized by all who have made a study of design ing houses for sows and their young pigs. Not only does the warmth of the sunlight admitted to the house insure the small pigs against chills, but the sun also keeps the interior of the nouse dry and sanitary. These facts were the basis for the

design of the hog house shown in the illustration. The round, gothic-shaped roof permits of numerous roof windows, so placed that they will admit sunlight, no matter how high or low the sun. As the house is placed so that its length is north and south, the first rays of the morning sun strike the lower windows on one side, and the last rays of the afternoon sun likewise are let into the building. This house is 24 feet wide and 49

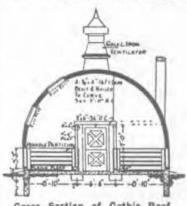

feet long. It is of frame construction. the rafters for the gothic roof being of built-up pieces of lumber, to get the semicircular shape, as shown in the cross-section of the building shown with the floor plan below.

The floor plans show eight individual pens on one side of the house and six on the other, all facing a center feed alley. At one corner is the feedmixing room and bins for feed. Over the feed alley is a carrier track which leads from the feed room to all of the pens. This is a labor-saving convenlence and enables one man to care for

the sows and the pigs easily and

with a saving of much time. Removable pen partitions are specified in the plans, so that the house may be used as a shelter after the pigs and their mothers have gone to pasture. It will be seen from the photograph that is reproduced that the house was located so that several lots were available for the pigs during the summer.

Half floors of plank slightly raised from the true concrete floor supply a

Cross Section of Gothic Roof,

place for the deep litter that makes the heds for the small plgs when the weather is cold, and the concrete or metal troughs that are installed in each pen are easily cleaned. A shallow gutter that runs the length of the building at the front of each row of pens permits the attendant to hose out the pens and keep the house clean and sanitary.

This is an unusual type of farrowing house, but it has many features that will be recommended to the farmer who raises a considerable number of pigs, especially so when the sows are bred to farrow in late winter or

Examine Grades in Oak

Flooring Before Choice There are several grades of oak flooring. In quarter-sawed oak the

best grain is known as "clear," having one face practically clear from defects. The next grade is known as "sap clear," which has one face practically free of defects, but admits an unlimited amount of bright sap where the amount is limited in the best grade. The third grade of quartered oak may contain sap and also admits slight imperfections, including an occasional small knot. Plain sawed oak comes in the following four grades: Clear, select, No. 1 common and No. 2 common. The common grades include wood which may have defects of various kinds, but which will serve to lay a sound floor. These common grades should not be used by the homebuild er. It might be well to quote the uses of different grades of oak as recommended by the oak flooring bu-

Clear quartered oak (either red or white) is the best grade of high-class residences. Sap clear or select quartered oak is an economical substitute for clear quartered oak when a dark finish is desired. Clear plain-sawed oak for medium-priced residences, No. 1 common onk for cheap dwellings and No. 2 for common oak for industrial uses and for cheap tenements.

Imitations All Out

of Favor in Decorations 'If you must use artificial flowers,' advises un interior decorator, "use only those which look decidedly artificial. No one can be fooled by artificial flowers and a clever imitation is a sad substitute for the real flower at best. Glass flowers, shell flowers, bead flowers or painted wood flowers add a decorative note to the home without suggesting that they are used neasuse they are cheaper than the real articles. They are purely docorative objects and not imitations of ceal flowers."

Floor Color Important

Why mar the effect of pretty furishings with a commonplace floor? Rooms are much more livable and radiant when the floor plays its' part in the color scheme.

Rust-Proof Copper Nails

Obviate Water Seepage A common cause of early leakage of a wood shingle roof is rapid corresion of the nails with which the shingles are fastened. If you use wooden shingles it is much more economical to use copper or brass roofing nails as a protection against this source of

rapid deterioration. But there is no better roof covering than copper, and while you might have said it costs too much, you have seen that it is cheaper because you pay for it only once. It lasts as long as the very foundations of your house. It needs no unkeep, repairs, nainting. It is fireproof, 100 per cent Connected with the ground by the downspout it furnishes a most desendable protection against lightning. A copper roof is economical in construction because it is much the lightest weight roofing material. In addition a copper roof with the beautiful old green protective coating the weather, or the roofing contractor (for it is possible to color copper in

the appearance of any structure. There are, of course, other good coofing materials. But time has proved copper the best, and while others may perform satisfactorily, you know that copper positively will.

24 hours) quickly gives it, enhances

Practical Builder Knows

What Materials Are Best The up-to-date builder knows from experience what construction materials wear the longest, look the best and satisfy the home owner most. Accordingly, he makes helpful and valuable suggestions. For the roof-s type of roofing which has proved good. for the trim-s kind he knows will please. And for the walls, wallpaper, because it adds life, color, beauty and is recommended as correct style by the country's leading decorators.

Oak Floors

Many an old home needs moderniz ing and an oak floor fald over the old worn flooring will do as much as any other single improvement to tone up the Interior. Selling or rental value will be increased out of all proportion to the small cost of installation,
