COUNTRY DEPENDS UPON MINING

The mining industry, through research, has developed methods of mining and treatment of ore that have created vast reserves of ore which once were waste rock. It has discovered and developed new uses for the various minerals. And all of this work is going forward continuously, meeting the needs of an ever-developing civilization.

The mining industry is stable. When a new venture has been brought to the production stage, and has reached a dividend paying basis, stock in the company takes its place in the investment market along with railroads, manufacturing and other industrial undertakings.

The public must not ignore the importance of the mining industry. It pays a major portion of the total taxes collected in a score or more of states, furnishes direct employment to more than a million citizens, and indirectly to several times that number, provides more than 50 per cent of the annual freight tonnage of the railroads, and supplies raw materials for the manufacture of most of the conveniences and luxuries of life.

#### AIRPLANE SAFETY

In the development of passenger air lines in the United States one of the greatest obstacles to be overcome is fear of accidents. While air travel in passenger planes has been comparatively fee fom casualties, the fatalities among military and stunt flyers have been so great as to give prospective passengers cause for alarm.

That safety i nthe air can be attained is well illustrated by the record of European passenger lines, particularly those of Germany. In 1925 and 1926 German passenger planes sowered more than 6,000,000 miles and carried approixmately 85,000 passengers, with only one fatal accident

in the two years.

These planes flew on schedule, even under unfavorable weather conditions, and afforded service between Germany and distant places, including London, Paris, Madrid, Rome, Constantinople and Moscow, as well as intermediate points. During 1926 the regularity of schedules averaged 98

With constant improvements being made which make for even greater safety there is no reason why entire confidence in air transportation should not be secured, provided pilots are selected and trained with greater care than has been done in America in the past.

Germany's success has been largely due to the exacting requirements demanded of pilots. There some of the most experienced and successful war aviators and stunt flyers have been refused licenses to pilot passenger planes, in which strict observance of safety rules is demanded, as well as courage and skill.

Through the same rigid requirements with respect to machines and personnel, America can undoubtedly duplicate or excel the German record for safety.

#### VALUE OF NEWSPAPER ADS.

A. A. Anderson, secretary of the Pacific Coast Building-Loan Association, in an address at the Pacific states savings and loan conference, recommends newspaper advertising as the most effective and economical means of reaching the public. Further, he urged that the building-loan associations throughout the United States should have a fund of at least \$1,000,000 for such a campaign.

As Mr. nAderson knows, it has been fully demonstrated that the nowspaper stands by itself as a carrier of messages to the greatest possible number of people. It is the only medium that is sure to reach the claim of a community and be read. This fact is being more fully appreciated every day.

The sialler city dailies and country weeklies are the great medium for reaching the masses of the people who represent the majority of the reading and buying power of this nation.

The cafeteria idea has only recently been introduced in London restau-

Perhaps they are called bungalows because so many of them are designed by bunglers.

It always seemed to us that celebrating the anniversary of a celebrity's death was a rather poor expression of gratitude.

A writer declares that "there are no longer Maltese dogs in Malta." If they want their dogs longer, they might import a few dachshunds.

Coolidge and McAdoo have been heard from, but the static appears to be bad around Albany, N. Y.

Handkerchiefs Have History

Silk and paper handkerchiefs were common in China long before the Christian era and, from this beginning, the article has had an interesting history. It first appeared among Anglo Saxons as a cloth worn at the bel: to remove perspiration. Churchmen were the first to use handkerchiefs in Europe, and for a time only priests were allowed to carry them. In the 16th century, it was not uncommon to mention the handkerchief

## **NEWS REVIEW OF CURRENT EVENTS**

Scores Killed and Hundreds Injured by a Tornado at St. Louis, Mo.

By EDWARD W. PICKARD

BETWEEN seventy and one hundred persons were killed and about six hundred injured by a terrific tornado that swept through St. Louis, Mo., "thursday. An area of six square offer in the city was ravaged by the wind and heavy rain, and the property damage may exceed \$75,000,000. More than 5,000 homes were destroyed, as well as numerous business buildings. The storm's path was northeast, across the Mississippi river, and in the Illinols towns of Granite City, Venice and Mådison several persons were killed and much damage done.

Governor Baker of Missouri ordered out the National Guard to patrol the storm area in St. Louis, and the local Red Cross as well as hundreds of members of the American Legion turned out for relief work. Mayor Victor Miller issued an appeal for eash contributions to aid the thousands who had been rendered homeless. and a citizens' committee was organized to co-operate with the Red Cross in raising funds.

FINANCIERS and many other persons are still immensely interested in the recent action of the federal reserve board reducing its rediscount rate, and it seems certain that the affair will be the subject of a congressional investigation. Members of the board, it is said, expect such an inquiry and are prepared to defend their course. It is charged that the rate was reduced at the behest of the governors of the British, French and German central banks, and at least one Federal Reserve bank governor. George W. Norris of Philadelphia, frankly admits that the action was taken for the purpose of aiding European finances, and thus benefiting the United States. He explains this as follows:

"Great Britain has just recently gone back to the gold standard, Germany, Austria and Hungary are stabilized. Poland is about to be stabilized, while France and Italy are not. The United States, with haif the gold in the world, is vitally interested in the preservation of the gold standard among sontions.

"The situation in Europe is such that several of the great banks in England and on the continent saw that they would have to raise their discount rates unless the rates over here were lowered. If they had been compelled to advance their rates, it would have thrown a chill on business throughout the continent and in England. This in turn, would seriously affect our export business with those nations just at the time when volume shipments of cotton, wheat and other commodities are beginning."

It is said the visit in the summer of Sir Montagu Norman, governor of the Bank of England, who was accompanied by Schacht and Rist of the German and French banks, respectively, was for the express purpose of inducing the federal reserve board to reduce the rediscount rate and thus bring about the flow of money to Europe, where higher rates were maintained. Norman succeeded in this and the immediate result was what he almed at. With the American rate 1 per cent below that of London funds began to flow back to the British market and sterling exchange began to plane. advance, being now at par, an unprecedented situation at a time of year when there is heavy British buying of American cotton, grain and other products.

might have been disciplined for putlishing the article without first submitting it to the Navy department. Secretary Wilbur has taken what most of us will regard as the wiser course and has called on Magruder to submit to the Navy department promptly a full and detailed statement embodying his plan for reorganizing the navy and the Navy department upon more economical lines."

"Of course, I have no such plan now," said the admiral, "and I have so informed the department. To make such a plan would require the expert assistance of a number of officers and the necessary clerical help over a long

Admiral Magruder charged that the navy supported too many admirals and too few enlisted men, was tied up with red tape, was overorganized ashore and affoat, that uneconomical methods begun in war time were continued and that the navy had failed completely to demobilize following the World war. He asserted that many of the navy yards would be discontinued were it not for political influences.

B EARING on the navy situation comes a statement from the White House that President Coolidge wants first-class army and navy establishments maintained in this country and has no intention of asking any reduction in the amount of funds now expended annually for national defense. The President is convinced that the country is well able to meet the taxes imposed by present expenditures of \$700,000,000 annually, for the army and navy, and his main desire is to insure that the best possible military and naval establishments are obtained with the funds voted by con-

A MERICAN Legionnaires, who are traveling about Europe after the close of their convention, are being recelved everywhere with great enthu slasm. So far the only unpleasantness was the attempt to bomb the train on which Commander Savage and his party were going to Italy. This was laid to the Communists and fortunately was frustrated by the fact that the train was running behind time. King Victor Emmanuel received the party in the royal palace at Pisa in most democratic fushion, and in Rome the Legionnaires were greeted by the city officials and immense throngs of cheering citizens. They marched to the grave of the Unknown Soldier and laid a wreath upon it, then changed to evening dress and were received in audience by the pope.

Meanwhile another group of the Legionnaires was having a fine time in London and elaborate plans were made by the English for festivities and a reception by King George this week, when the party with Mr. Savage were due there.

G REAT BRITAIN won the Schnelder trophy in the semplane race at Venice when Flight Lieut, S. N. Web ster in a Napier supermarine plane whirled over the course of 314 miles at an average speed of 281,488 miles an hour or about 4.7 miles a minute This broke all existing speed records. and on the straightaways Webster flew at a rate of five miles a minute His average time for the closed course was five miles an hour faster than the average of Maj. Mario de Bernardi in a land plane over the open course two years ago, when the Italian estab-

Arthur Gilliom, attorney general of Indiana, addressing a gathering of Republican workers, warned them that unless they killed the klan in the state they would kill the party. He declared the Democrats were partly responsible for the super-government rule there, but this was warmly denied by R. Earl Peters, Democratic state chair-

> COMPLETE anarchy seems about to prevail in all China south of the Yangtse river. The Hankow Nationalist government virtually collapsed when the Central Bank of Canton, the Bank of China and the Bank of Cummunications declared a two months' moratorium. They have a total of \$64,000,000 in paper currency issued in Hupeh province alone. Tang Shenshi, military head of the government. fled aboard a warship. The Nanking government of the moderate Nationalists, also seemed about to fall, and the Communists are forming councils of the workers and peasants and calling on all of those classes to take

> An official Russian dispatch says Eugene Chen, former Chinese Nationalist foreign minister, and Mme. Snn Yat-sen, widow of the founder of the Chinese republic, were married recently in Moscow.

I ICHTENSTEIN, the little Euro-Dean principality which ties between Switzerland and Austria, suffered severely from floods that followed three days of torrential rains, Its villages were almost wiped out and many lives were lost. Bavarian, Austrian and Swiss troops all crossed the borders to help rescue the people. The floods also caused great damage in neighboring regions and railway service was interrupted.

agents of Pangalos, the former dictator who is in a fortress awaiting trial on a charge of treason. Many arrests have been made and all the police have been armed with guns. Enemies of Mussolini assert that the trouble in Greece is fomented by the Italian premier, who gets blamed for almost everything in that part of the world.

BARON AGO VON MALTZAN, German ambassador to the United States, was killed in Germany when an airplane in which he was traveling to rejoin his wife, crashed. He had made himself very popular in Washington and was considered one of his country's best diplomats.

Lew Shank, auctioneer and former mayor of Indianapolis, one of the most picturesque figures in Indiana public life, died suddenly. Another notable American who passed away was Edward T Jeffery, former president of the Illinois Central and widely known for his achievements in the railroad world.

BERNARD J. DOTY of Memphis. Isld right on the ground, if it is well drained. President of France after serving part of an eight-year prison term for desertion from the French foreign legion while on active duty in Syria. He was ordered to rejoin his regiment in Algeria. Doty had served in the American army during the World war and his case attracted much attention both in the United States and in France. ills desertion in Syrla was brief and was caused merely by homesickness.

M EXICAN troops fought two engagements in the state of Jalisco with rebels described as "Catholic fanatics" and killed 34 of them. In one of the combats Father Sedano, a Catholic priest, was captured, courtmartialed as the leader and promptly executed.

The long-distance telephone line between Washington and Mexico City was formally opened last week by a personal conversation between President Coolldge and President Calles, As neither understands the other's language the talk was interpreted at both terminals. Other distinguished persons were at each end of the line. and the United States army band and the Mexican national band placed the

#### Farm Flock Is Most Important

Poultry Still Is Backbone of Need for Using Improved Industry on Specialized Farms.

Prepared by the United States Department of Agriculture.) In spite of the growing importance

of the specialized poultry farm and the commercial farm tlock the general farm flock is still the backhone of the poultry and egg industry from the standpoint of volume of productionaccording to Roy C. Potts, chief poultry marketing specialist, United States Department of Agriculture.

Small Farm Flocks. The farm flock is rather small in size and is only a small part of the activity on the general farm, often not being considered a very important part. But in the aggregate, more than 80 per cent of the total production of poultry and eggs comes from Just such flocks. Because of its minor importance the general farm flock is likely to be subjected to some neglect at times, to be less cared for at all

not been highly improved. Specialized poultry farming, how ever, has been on the increase during the last six or seven years and coutinnes to become more and more im-Specialization is mainly along the lines of egg production. On specialized farms poultry is the sole or main business and the owner is dependent upon it almost exclusively for his living. Generally the most up-todate methods are employed and the most improved stock used.

times, and to consist of stock that has

Commercial Flocks. The commercial farm flock on the other hand, is not an exclusive enterprise on the farm but is one that is given more than usual attention in management and breeding. The poultry and egg crop of the country is produced by these three primarily different types of flocks or farms, the most important of which is still the general farm flock.

#### Alsike Clover Thrives

on Sour or Wet Soils On wet, undrained fields where the production of ordinary crops is difficult or impossible alske clover can be made to produce large quantities of valuable feed, says F. L. Davis of the soils department of the Missouri College of Agriculture, Alsike clover will grow and produce well on sour land where the common red clover wouldn't make a stand. It is the one variety of clover that tolerates acid

The most important reason for advocating alsike clover is that it will grow on sour or wet solls to which other crops are poorly adapted. The most important benefits derived from growing it on these soils are: (1) It does not feed the land down to such an extent that it lowers the production of the following crop, and (2) It makes one of the best green manures of the

legumes, Greater yields of crops are grown following alsike clover than other crops. An extended experiment at the GREECE is having a strenuous time Rhode Island experiment station comtrying to prevent a coup by paring cabbages, mangels, rutabagas buckwheat, potatoes, rye, corn, millet. oats, onlons, red clover, squash, timothy, alsike, and red top showed that alsike was almost unsurpassed in this respect. Alsike clover produces almost as well as red clover and better than erimson or white.

#### Substantial Floor for

Machine Shed Essential Any implement house is better han none-even the simplest, most inexpensive type pays for itself in a eason or two. But from the stand point of convenience it pays to build machine sheds, and a floor of some kind is a good feature.

If of wood, the floor should be of two-inch planks, laid on loists or, beams, which in turn should be kept off the ground by flat stones or concrete blocks. Such floors last quite long, especially if there he ventilation beneath them to keep the wood

Concrete makes the ideal floor for a machine shed, of course, it can be

#### XO+O+O+O+OXO+O+O+O\*O\* Agricultural Notes MO+O+O+O+O+O+O+O+O\* Crop rotation is the surest method

of weed control. Save the straw. It will help to take

the place of bny this fall and winter Canada field pens probably make the heaviest cover-and to stop wash ing they are hard to beat.

In sile building, the first and most important consideration is its size in relation to amount of stock kept.

Early planted corn may not grow much larger than later planting, but the early planting will mature first. Well-rotted barnyard manure is

good fertilizer for the garden. It should be applied at the rate of 20 tons to an acre and should be worked into the soil. . . .

At least two cultiveflons for son peans which have been planted solld and at least three cultivations for hose grown in rows will aid in increasing yields and profits.

#### Growing Demand for Clean Milk

Methods in Production Is More Pronounced.

Prepared by the United States Department of Agriculture.)

The need for using improved methods in producing the public milk supply becomes more and more pronounced as time goes on, says R. J. Posson, associate market milk specialist of the United States Department of Agriculture. As cities grow larger or become more numerous, the milk supply must necessarily be transported from greater distances and handled in larger quantities. To withstand such treatment it must be produced under the most sanitary con-

Furthermore, says Mr. Possen, there is an increasing domand for clean milk on the part of the consumer, and health officials are requiring that improved sanitary methods be used in its production. Unless care is taken in producing it, therefore, great losses may result from the rejection of milk by dealers or health departments and from the lessened demand for lowgrade milk. The responsibility for clean milk at the source is placed squarely on the shoulders of the milk producer

Produce Clean Milk.

By observing certain precautions, clean milk can be produced with very little more effort than milk which is not clean. These precautions are dis cussed by Mr. Posson in Leaflet No. 3, Improved Sanitation in Milk Production, just issued by the department. The first requirement for clean milk is a herd of healthy cows. Once It is determined by test that the cows are free from tuberculosis and are otherwise healthy, pains should be taken to clean them thoroughly before they are milked. Wiping the udders with a damp cloth removes the danger of contaminating the milk by falling hair and dust particles. Since bucteria cause milk to sour they should he kept out of it by every possible

Further precautions in the production of clean milk require that only healthy people be employed in a dairy. that they wear clean clothing, and that milking be performed with clean, dry hands. The use of small-top palls is recommended as a means of reducing the amount of impurities that fall

Every dairyman should be certain that he has a pure, safe water supply. Wells should be located on the high est available ground. A separate dairy house or milk room should be provided. Milk to be sold should never be handled in a dwelling as there is too much chance of dangerous contamination in case sickness occurs in the family.

#### Clean Utensils.

Milk utensils which are not properly washed or sterilized may be the greatest source of contamination. They should be rinsed inside and outside with luke-warm or cold water as soon as possible after use, then placed in a wash vat, scrubbed with a brush in warm water containing a soda ash alkaline washing powder soap, rinsed placed in a sterlizing cabinet, and thoroughly steamed.

The best way to prevent multiply ention of bacteria which unavoldably get into the milk is to cool the milk as soon as possible after it is produced and keep It cold Bacteria are tiny single-celled plants, which, like most other plants, require warmth to grow. If milk is cooled to 50 degrees F, or below and held at that temperature, bacterful development is very much retarded. Milk should not only be kept cold until it leaves the farm but should also be protected from the sun and warm air while being transported from farm to city.

A copy of the leaflet may be secured by writing to the United States Department of Agriculture, Washington, D. C.

The value of wood ashes as a fertle

#### Value of Wood Ashes as a Fertilizer Will Vary

fizer varies considerably, depending upon whether or not they have been teached, kind of wood they came from, method of burning, etc. Good quality wood ashes contain 5 to 7 per cent potash and 1.5 to 2 per cent of phosphoric acid. If the ashes have heen leached by lying out in the weather they may contain not more than I per cent of potash and an equal amount of phosphoric acid. The amount of calcium will vary from 20 to 50 per cent but it usually runs between 30 and 35 per cent. By way

of comparison high grade ground

limestone may contain as much as 98

Blanching Celery While Growing Is Best Method

per cent calcium compounds.

If celery is not blanched white growing the green statks can never be fully blanched. The common methnd of blanching and perhaps the hest way is to till up the growing celery as it grows, with earth, it will blanch slightly when stored in eellar or if grown in pots and placed in the cellar, but when stored for winter most of the white stalks are new growth made by moving materials from the older status and leaves to form the newer stalks and teaves. This new growth will be

practically white when the sun does

not shine on them.

#### Feel Stiff and Achy?

To be Well the Kidneys Must Thoroughly Eliminate Waste Poisons from the Blood.

OES every day find you lame, stiff and achy? Do you feel tired and drowsy—suffer nagging backache, headache and dizzy spells? Are the kidney secretions scanty and burning in passage?

Know, then, that these are often signs of improper kidney action. Sluggish kidneys allow acid poisons to remain in the blood and upset the whole system.

If your kidneys are acting sluggishly, assist them with Doan's Pills. Doan's have established a nation-wide reputation. Are recommended the country over. Ask your neighbor!

#### **Proof That Ancients** Suffered as We Do

Sufferers from pyorrhoes, and kindred diseases of modern civilization are apt, even if they lose all their teeth, to console themselves with the thought that, at least, they have contracted something original.

They think to themselves, perhaps: Well, Sir Watter Raleigh could not ave had this. My great-great grandather, the admiral, did not suffer from this. He may have had gout and bronchlifs, but never nyorrhoes or the fashionable Influenza.

But these modern sufferers have apgrently been congratulating themselves unduly. There is nothing new under the sun; certainly there is no disease which has any true claims to originality. Even cheumatoid arhritis is proved to be thousands of years old. A mummy that goes back 2000 B. C. shows the existence of this disease. Other munimies exmined showed gout, tuberculocis and worrhoen,-London Answers

#### Has It Come to This?

Grandmother has beautiful long. hick hair, which she wears piled high n her shapely head and of which she very proud. Recently her fourear-old grandson arrived with his oung mother from California for a isit. When granmother bent over him to greet him with a loving kiss, he gazed at her unsmillingly for sevnents and then pointing to he knot of hair, asked in an awed one of voice:

#### Find Throws Light on Old Times and Customs

Kitchen utensils of the Greeks and Romans of the Fourth century, B. C., have just come to light at Canopus. near one of the mouths of the Nile. according to Prof. Ralph Van Deman Magoffin, president of the Archeological Institute of America. Excavation at a temple near this site has yielded up mementos or offerings left by thousands of pllgrims that make clear many phases of life in antiquity. The collections include many kitchen utensils and a nearly complete set of Greek and Roman weights. Many of them are tokens vowed by soldiers who hoped for success in war, "Some are sling shots," explained Doctor Magoffin, "while many are tiny replicas of the soldiers themselves on elephant or horseback. Grain baskets and camels seem to have been the favorite gifts from merchants: weights from looms are found in considerable numbers. Many of the pleces are unique, and their publication and exhibition will add much more to our growing knowledge of ancient times."

#### Why He Succeeded

Honored politically and professionally, during his lifetime, Dr. R. V. Pierce, whose

is going to wear colorful velveteen this season. It really is not practical, nor is it according to the latest dictates of the mode, to plan a collegiate wardrobe these days without reckon-

ing on velveteen for jackets and skirts. First of all, in regard to the popular colors for velveteen, one has choice of very wonderful leaf browns, copper, amber and toast shades, also ravishing wine tones, likewise navy and

black and green, the latter from light to dark. Then there is the new printed velveteen, which makes up so cleverly into the separate blouse

Youthfulness, that so-much-to-be-desired quality in schoolgirl clothes, is stamped all over the coed outfit in the picture. It is really astonishing what miracles a little velveteen lacket like this one can perform in solving the "what to wear" problem of school-faring young women.

Here are several ways to make one velvet tacket do duty as part of many ensembles. Suppose, for Instance, a complete little suit consisting of jacket and skirt of velveteen with a simple little matching sweater-blouse of Jersey, plus a lingerle blouse or two, constitute the original purchase, and oh! yes! do not forget to order a separate belt of the velveteen. Just think of the changes afforded in this initial investment.

Next. In buying the one-piece cloth dress which is inevitable in every school outfit, choose wool crepe and match or blend its color to that of the cont of one's velvet mit. Here is where the velvet best plays its part. This cloth frock topped with the velvet incket will achieve an ensemble costume, as will be seen in the illustration.

To further the wearableness of the velveteen jacket pose it over a twoplece knitted or jersey frock, the kind that are "all the rage," having a swenter blouse with a skirt of same either plaited or gathered so as to attain the fashionable full hemline. Of course a stitched matching velvet hat is a final touch of chic.

(©, 1927, Western Newspaper Union.)

#### Children and Pets Teach the children to take care of

their own pets and they will enjoy

The poplar trees paid not the slight-

est bit of attention. They still stood

with their heads straight up in the

Soon the elves heard the poplars

muttering. This is what they said:

## Bedtime Story for Children

By MARY GRAHAM BONNER Down by one bank of a river was a row of weeping willow trees, and on the opposite side stood a row of poplar trees.

One day the brownles thought they

would like to have a breakfast party nderneath the row of weeping wilin a pan of water as you would in making a custard. If the potatoes "Yes," said one of the elves, when the brownles were inviting them to over and not only be difficult to clean

their brenkfast party, "I think it would be a fine idea. "But somehow, we've always felt sorry for those poplar trees standing

opposite. "I will tell you what we'll do. "We'll each have a breakfast party, and then we'll tell our experiences,

"How about it, brownies?" The next morning the brownies with pienic baskets, and he elves with heir picnic baskets started off for

their breakfast parties. They went in bonts of pond tily leaves down along the river until they came to the weeping willows and the

olers and there they senarated. "Good-by," they shouted to each And soon they could be seen from

either side unpacking their baskets. "Well," sald the elves to the popfar trees, "we've come to honor you!" And they made deep, low bows before the poplar trees.

"We'll be much obliged if you go to those silly weeping willows," they

whispered, as they waved just a little

in the wind. "The idea of thinking you've pald us a compliment to come and eat your ally food here.

"Why, it's almost an insult to uswhy, we-we are the friends of the

#### Washing Machines and How to Make Wise Selection

Types of Washing Machines.

of a washing machine, especially if it can be run by electricity, but they are often puzzled when it comes to making a selection from among the many different makes. All of the makes on the market can be classified into four types, according to the principle on which they operate. Selection becomes a matter of personal preference for a particular operating principle. Each type has its advantages. In au, the washing is done by some device that forces soapy water through the

clothes until they are clean. The bureau of home economics of the United States Department of Agriculture has a permanent toan exhibit of a number of makes, differing within each type only in detail of construction. A visit to this exhibit would be a help in deciding which machine was best for one's purpose,

The cylinder type of washer has a perforated cylinder of metal or wood in which the clothes are placed. This revolves in an outer container holding soap and water. The cylinder has blupt projections on the inside, which carry the clothes along as it revolves, It reverses its direction automatically from time to time. The water gusbes through the perforations and cleanses

"And our little leaves play with the "Aren't they far more important

than anything else? "Breezes have their own way, you know. They're most independent and do just as they choose,

"And we're very friendly with Mr. Moon-we have very high-up friends. "And we'll thank you if you'll leave

Now the elves couldn't help but laugh when the poplars said their friends were very high up, for certainly no one could deny that Mr. Sun and Mr. Moon were anything else but high up in the world.

But off they went hey told their story.

"Why," whispered the weeping willows, "that's why we have so many

"We like everybody-we don't try to reach for the moon.

"We're so glad you've all come, "We'll keep you so cool-and if you want to know why we weep-it's for joy-sheer joy!" (Copyright.)

(Prepared by the United States Department | the clothes. There is a second type of Agriculture.)

Most women realize the convenience of cylinder machine in which the cylinder is in the form of a flattened perforated box which moves back and forth so that the clothes tumble from one end to the other.

The "dolly" principle consists of a revolving device suspended in the center of the tub, fastened either to the clothes first in one direction and then In the other. The corrugations of the sides and bottom of the tub help to

cleanse the clothes partly by friction. In the oscillating type of machine, the tub itself rocks and tilts back and forth, tossing the clothes from one end to the other, and the water moves in a curving path,

The vacuum-cup type of machine by development of the funnel on a stick device in vogue twenty or more years ago. The soapy water is forced through the clothes by the pressure and suction produced by the cups.

When buying an electric machine, specify the voltage of the local current, and whether It is direct or aiternating, and if alternating, the cycle. Consider the shape and size of the machine in relation to the room, where you expect to use it. Be sure it is not too large. Choose a flat top if you are likely to want it for a working urface between wash days. Buy a machine of the right capacity for your average washing, and of the right height for you to operate. Find out whether the manufacturer's repair service is easily available. Simple construction is advisable. The frame should be strong and rigid, but it should be possible to rell the machine about on casters. The mechanism and gearing must be properly covered for safety and cleanliness, and the motor should be located where it will not get wet. Ask how often the machine must be oiled and whether that can be done easily. Any movable parts, such as a cylinder, should be light to weight and easy to handle. The water outlet should be practical for easy drainage. See whether the wringer can be used when the machine is washbrownles by the weeping willows and | ing. Consider the possible advantages of a centrifugal drier.

#### Rapid Work Secret of Successful Jelly Roll

(Prophred by the United States Department of Agriculture.) Rapid work is one of the secrets of making a successful jelly roll. Any preferred recipe for sponge cake may be used. It should be baked in a thin sheet. The cake must be handied while warm, just out of the pan, or it will break when you try to roll it. Before taking the cake from the oven, spread a piece of waxed paper on the table. Sprinkle it with powdered sugar. Turn the cake out on

Making a Jelly Roll.

this, upside down, and trim off the crusty edges on the sides. Spread pulckly with Jelly or preserves, and begin rolling at the side nearest you. When the cake is rolled up, roll the paper around it and tie it in place so the Jelly roll will keep its shape. The United States Department of Agriculture will furnish you with a recipe for sponge coke.

## Delightful Chili Sauce a Variation of Catsup

Preparing Ingredients of Chili Sauce.

(Prepared by the United States Department of Agriculture.) Chili sauce is an appetizing variation of tomato catsup, containing red and green peppers and spices. It is often served with meats or fish or used as a seasoning for sandwiches. It may be put into mayonnaise to give flavor. The bureau of home economics tells how to make it:

Chill Sauce.

cupfuls chopped red pepper cupfuls chopped green pepper & cupfuls chopped onions 3 tablespoonfuls sait

1 cupful sugar 2 cupfuls vinegar 1 traspoonful cloves teaspoonful alispice

Combine the chopped vegetables, the sult, the sugar, and simmer this mixture until it begins to thicken. Then add the vinegar and spices and cook the mixture down until it becomes a thick sauce. Pour into hot sterilized jars and seal. Or bottle the sauce and seal with wax. This recipe yields about three quarts of sauce.

#### Recipes That Will Be Welcomed When Cold Dishes Are Wanted

Oh! to be big enough to follow Archbishop Benson's principles: "Not to call attention to crowded work or petty fatigues, or trivial experiences. To seek no favor, no compassion: to deserve, not to ask, for tenderness. To heal wounds which in timer past my cruel and careless hands have made. Not to feel any uneasiness when my ad vice or opinion is not asked, or is set aside."

By NELLIE MAXWELL There are so many delightful dishes which may be made and frozen unstirred or molded, that

there is an infigite variety from which to choose,

Cherry Mousse,-To a pint of double cream add three tublespoonfuls of powdered sugar, a cupful of cherry Juice and a drop or two of almond extract. Chill and whip the cream until stiff, then add the other ingredients. Turn into a mold,

for four hours, Nougat Ice Cream.-Cook together cupful of sour cream and a cupful of sugar until it reaches the soft ball stage when tried in cold water, flavor and add a cupful of blekory nut meats or pecans, add one quart of rich milk to which has been added a cupful of

cover closely and pack in ice and salt

sugar and when cool freeze as usual. Fruit Crown.—Peel, core and quarter three sweet apples and three quinces. cover with sweet cider and cook until tender: remove the apples unbroken. Measure the cider and add enough to make a plnt. Over half a box of gelatin pour half a cupful of cold cider, set into cold water and stir until it

border mold, tipping the mold so that the jelly will line the mold. Now fill with chopped and cooked quinces and the apples. Cover with Jelly and set away to chill. Invert on a cold dish and fill the center with sweetened cream or pour it around the mold Garnish with browned almonds Grape Nectar,-To a quart of grape

fuice add a pint of sirup and the luice of four oranges. Chill and when serving add a bottle of charged water, Pineapple Drink.-Add a pint of prepared sirup (water and sugar cooked together) to a pint of grated

pineapple. Set on ice for three bours. add a bit of lemon juice, strain and Grape juice prepared as a drink is delightful with addition of a bottle of

ginger ale.

Ever Ready Lemonade.-Boll together one cupful each of sugar and water. add one-half cupful of lemon juice, cook a few minutes and bottle. Keep in the ice chest until it is ready for the addition of water and ice and the drink is ready. A tablespoonful of this sirup to a glass of water makes a

Mashed chestnuts makes a most danty and appetizing dish to serve with meats as one does potato. Cook and season them as for mashed

Peach Bouchees.-Bake a rich biscult dough over timbal molds and when cold fill with sweetened sliced peuches over which has been poured n little orange juice; serve topped with whipped cream,

(C. 102) Western Nawapaper Cress.)

#### Leading Grid Star at Gate

Two years ago the debate was red hot between the East and Far West over the relative gridiron merits of Red Grange, the galloping ghost of Illinois, and George Wilson, sensational University of Washington halfback,

Both were all-American selections and both turned to professional gridiron, where their performances aroused fresh argument. The dis-

Red Grange.

however, when it comes to comparing their relative drawing powers. As a gate attraction. Grange is alone. He is the Babe Ruth of his sport, It takes only a cas-

cussion ceases abruptly,

ual squint at the figures of C. C. Pyle to prove this. The promoter made over \$100,000 with Grange's New York eleven last season and is surrounding Red with an all-star cast for the 1927 season. He lost \$37,000 with Wilson's Wildcats, a roving outfit, which will be among the missing this year, although Wilson himself may land a pro berth with one of the teams in the newly consolidated National Foot Ball league.

Grange's playmates this fall, Pyle says, will include Eddie Tryon, former Colgate star; "Wild Bill" Kelly, crack Montana player, and Jeff Cravath, Southern California center last year.

Morton Kaer, Southern California halfback and 1926 all-American choice, also may come into the Pyle fold.

\*<del>\*</del>

San Francisco is anxious to hold the annual Army-Navy football classic.

Coach Lou Young intends having the Penn football team use the huddle system this fall.

Now they ask you in the locker room: "Do you shoot this course in par, bogey or bobby?"

The Braves recently paid \$15,000 for a rookle outfielder named Clark in the Virginia league.

Yale plans to build a field gymnaslum for use of its athletic teams during the winter months

The first golf tournament for the United States public links championship was held at Toledo in 1922.

John McMullen, all-American tackle of Notre Dame, will be assistant coach of this year's Creighton university football squad.

Topeka has purchased Outfielder Eddie Ries from the Okmulgee club. Pitcher Gribble, Joplin city leaguer. has been signed by Okmulgee.

This new Italian boxer, Roberto Roberti, hasn't a chance to become heavyweight champion. There hasn't been a single suit filed against him.

The original name of Jack Sharkey is Joseph Paul Cukoschay. He was born in Binghamton, N. Y., of rents October 26.

. . . The only unassisted triple play ever made by a major league outfielder is credited to Hines of the old Providence club, who turned the trick in 1878.

. . . Welker Cochran, holder of the 18-2 balkline billiard championship, and Jake Schaeffer, ex-titleholder, are playing exhibition matches on the Pacific coast.

Rob Meusel has been the only memher of the New York Yankees who has been seriously handlcapped by injuries this year, suffering both a bad leg and arm.

Bill Barrett, heavy hiting catcher of the Knoxville club of the South Atlantic association and home run king of the circuit, has been sold to the New York Giants.

"Uncle Steve" Phillips, eighty-fiveyear-old veteran of light harness racing, who scored many outstanding victories with Sleepy Tom fifty years ago, is still active in this sport.

Cyril Coaffee, a native of Winnipeg, but now a resident of Chicago, looks like a sure thing for the 1928 Canadian Olympic team, which will be the third in which he has competed.

Long distance swimming is one of the new sports which is becoming popular throughout the United States. No fewer than 12 cities are holding marathon swimming races this season.

Bill Klem umpired his first professional game in the old Connecticut league in 1898. Afterwards he umpired at various times in every state of the Union and in many foreign countries.

C. Edwin Cockey of Queenstown Md., a representative of an American bank in the Orient, enjoys the distinction of being the "star" twirler of amateur baseball clubs now playing in Hongkong.

Willie Yap, a Chinese boxer, broke into the ring when he substituted for two fighters who falled to show up for their bouts in a San Francisco club. He won both bouts and has been a professional ever since.

## 

Red Killefer Gets

Plenty of Rest Red Killefer, manager of the Seattle club of the Pacific Coast league, drew more than a month's vacation last season. He was chased from the park on 38 occasions for trouble with the umpires and the total time he was off duty was 38 days, If a change is as good as a vacation, Killefer profited immense-

ly as he had plenty of change.

Some of the specie variety was

deducted from his pay envelope.

#### Tackling Parson

Rev. Charles H. Urban, candidate for tackle position on the University of Pennsylvania team, is shown helping to build the Penusylvania Christian association building in Philadelphia. The tacklin' parson has been working on the building all summer in order to harden his muscles for the football season grind.

#### Princeton Grid Players

in Different Vocations

The football stars of Princeton university turned sailors, stokers, bron cho busters and mountain climbers during the summer vacation in prepgration for a strenuous schedule this fall.

Bill White and Sam Levine, two linesmen, stoked the bollers in the hold of an ore ship between New York and San Francisco. Mike Miles, fullback, and Chuck Howe, varsity center, boarded ship as common seamen Ed Wittmer, a backfield candidate, and Joe Caldwell, guard, spent the

summer working on a Western ranch. Bill Moore, a freshman tackle last fall, worked in the Oklahoma oil fields. Jack French and Jack Lewis, linesmen, worked with a road construction

gang. Red Owen, fullback, was employed on a New York skyscraper.

#### Dr. Cooke Says Dribble

Ban Hurries Up Game

Basket ball will be a "much better and faster game" with the passing of the dribble, Dr. L. J. Cooke, former basket-ball coach at the University of Minnesota for 27 years, sald in commenting on the recent change in the rules which tie the dribble down to one bounce, beginning next season.

"It will make the game a quick passing, speedy game that will be a better contest to watch and will also eliminate many personal fouls," said Doctor Cooke.

"It will not entirely eliminate stalling, however, as many coaches seem to think it will," he continued. "The short man will undoubtedly be handicapped with this new style of play."

Secret Drill Aid

Suit Some Coaches

Secret football practice is desirable, not so much for the sake of keeping plays secret as for the protection of players' feelings in the view of Dr. C. W. Spears, head coach at the University of Minnesota.

"I am not greatly concerned," he remarks, "about keeping pet plays secret. Feelings of young players I consider far more important. If I have to 'call' a player he accepts my remarks in the right way if only players hear. But a "call-down' in front of a large gallery is demoralizing."

TENNIS AND GOLF CROWD BASEBALL

During Last Decade Boys Desert Diamond Game.

Golf and tennis have made great inroads into the ranks of the boys who formerly manned the sandlot dia-Compare the number of golf links in the country today with those of a quarter of a century ago. Of the great hosts who knock the little white pill over the hill and dale the great majority have been at it less than ten years.

Those busy golf courses need a tremendous lot of boys for caddying purposes, especially on Saturdays, Sundays and holidays. The kids who used to get up at six o'clock in the morning on the Fourth of July to get the early baseball diamond now get up that early so that they can carry clubs over three rounds.

The American boy doesn't change. He always stood ready to make an honest dollar, and golf gives him a chance to knock out from \$2 to \$5

Then the kids also are playing golf. They also are faking more and more to tennis. Many can go back to the time when we regarded boys who brought their tennis rackets to school with a certain amount of superior disdain. Tennis, they thought, was a "sissy" game, not to be compared with such a manly sport as baseball. Today most every one knows that playing a double-header doesn't take nearly as much starch out of one as a hard five-set match.

#### Emmer, Crack Shortstop, Is Headed for Majors

Frank Emmer, Minneapolis shortstop, can hit as well as field. Emmer tled the all-time American assocaltion fielding record of 22 consecutive errorless games by handling 140 chances without an error.

Emmer has been batting better than 300 all season. During his fielding spree he was tied for runner-up position for home-run honors. The day he tled the A. A. fielding record he drove out a triple to score three runs, putting his team back into a winning spurt at a time when it was four runs behind and there was only one inning to go.

Cincinnati but was sent back. He is determined to vindicate himself and is considered to be headed again for the major leagues

#### Helen Wills Disagrees

With Suzanne Over Pros Professionalism in tennis bores Miss Helen Wills.

"If I were as poor as a church mouse should not become a professional," Miss Wills asserted.

"I cannot quite understand how anyone can play such a good game when he or she knows that the prize will be received whether the game is won or

But Mile. Suzanne Lenglen thinks differently. She is quite certain that "sport professional or otherwise, does not spoil a woman's femininity."

"Far from it," was Mile, Lenglen's reply to criticisms that too much indulgence in athletics and sport was tending to make women masculine.

Meehan's Star Team

"Chick" Meehan's crack New York university football team, which went through last year's opponents like a prairie fire, losing only the last game of the season to Nebraska, indulged in early gridiron practice at Farmingdale, L. T. Coach Meehan has a number of last year's veterans around whom to build his team. The photo shows "Chick" himself.

Improved Uniform International

(By REV. P. B. FITZWATER, D.D., Dean Moody Bible Institute of Chicago.)
 (©. 1927, by Western Newspaper Union.)

Lesson for October 9 ELIJAH HEARS GOD'S VOICE

LESSON TEXT-I Kings 19. GOLDEN TEXT—Wait on the Lord, be of good courage, and He shall strengthen thine heart. PRIMARY TOPIC - Elijah Hears

God's Voice, JUNIOR TOPIC - God Encourage: INTERMEDIATE AND SENIOR TOP-IC-Listening to God's Voice.
YOUNG PEOPLE AND ADULT TOP-IC-How God Speaks to Men.

I. Elijah's Flight (vv. 1-14). Upon Ahab's return from the excitement on Mount Carmel, he told als wife all that Elijah had done, that even all her prophets had been hewn to pleces by the sword. This so enraged her that she sent a message of death to Elljah, who seems to have been waiting at the gate (vv. 1, 2). Though Elijah had courageously stood before the king and the priests of Baal, he now cowered before this woman, and fled for his life. Let us beware lest when we think we stand, we fall (I Cor. 10:12).

1. Elijah under the Juniper tree (vv. 3-7). The juniper tree was a shrub of the desert which afforded shelter and protection to travelers from the burning sun by day and the cold wind by night.

(1) His request (v. 4): This was that he might die. This was no doubt a foolish thing for him to say, but let us be as considerate toward him as was God. The discouragement, and even despondency, of Elijah, was due to the nervous strain of about four years of unusual service for God, which culminated on Mount Carmel. Such nervous reaction is to be expected, and surely the heart of this lesson will be missed unless we see it in that light, and see God's tenderness toward his overwrought servant.

(2) God's tender treatment (vv. 5-7). a. He gave him sleep (v. 5). "He giveth His beloved sleep" (Ps. 127:2). b. He sent an angel to cook Elijah's meal (vv. 6, 7). The angel of the Lord is usually understood to be the second member of the Holy Trinity. If this be correct, then we see Jehovah-Jesus preparing food for His-servant Elljah, as He afterward did for His discouraged disciples by Galilee. 2. Elijah at Horeb (vv. 8-14). God

had kindly ministered to His discour-

aged prophet so that he would be in a fit condition to receive the needed instruction and correction. (1) God's interview with Elijah in the cave (vv. 9, 10). a. God's question, "What doest thou here, Elljah?" (v. 9). This was a stinging rebuke though most kindly given. It implied that his appointed messenger was now far away from the field of duty. How blessed to know that "A God-forsaking saint is not a God-forsaken saint"

b. Elijah's answer (v. 10). Elijah tried to vindicate himself by asserting his jealous loyalty to God-that in only rejected his message and dishonored God, but sought to destroy him. the mount (vv. 11-14). While standing before the Lord on the mount, God caused a mighty demonstration of wind, earthquake and fire to pass before him, to show unto him the nature

of the work he had been doing for God, and to show him what was lacking in his work for the fullest attainment of success. Elijah had about him much of the whirlwind, earthquake and fire. His work had been terrifying and alarming, but it lacked in gentleness and love. This object lesson in the days of God's working is a needed message for this age, which is so wonderfully characterized by noise and clamor. The world is not "taken for Christ" by the fleshly energy and enthusiasms of conventions and committees, but by the gulet hearts who go forth proclaiming God's Word In the energy of the Holy Spirit,

II. Elijah's Return (vv. 15-18). Though Elijah had erred, God brought him again into His service. How comforting to know that God does not reject His servants because of their fallures in times of despondency! He deals with them after the motive of their hearts. Elijah was nourished and instructed by the Lord and then sent on a high mission. God took Elijah out of himself by giving him a new commission. Before God would come in His charlot to take Elijah home, he sent him upon a threefold ministry.

1. To anoint Hazael king over Syria (v. 15). 2. To anoint Jehu king over Israel

(v 16). 3. To anoint Elisha as his own successor in the prophet's room (vv. 19-

#### Look Up to God

Dare to look up to God and say: Deal with me in the future as Thou wilt: I am of the same mind as Thou art; I am Thine; I refuse nothing that pleases Thee; lead me where Thou wilt; clothe me in any dress Thou choosest,-Epictetus.

#### One Vast Union

We behold all around us one vast union in which no man can labor for himself without laboring at the same time for all others.-Longfellow.

HE Capitol at Washington, symbol as it is of the nation's growth, is soon to have an addition, according to present plans, Although the Cupitol has passed through three major stages of expansion, it is not yet completed. To relieve the congested state of the quarters in which the government is called upon to tran-(2) God's interview with Elijah on sact its business at the present time and to give the Capitol better architectural balance with the present senate and house wings, a new wing

> the east front. The history of the Capitol goes back to the first administration of George Washington, In July, 1790, Washington signed a bill passed by the senate, definitely locating the Capitol on the Potomac river in the District of Columbia, which had been established under the eighth section and first article of the Constitution.

is to be added to the central part of

The bill provided for the appointment by the President of three commissioners, who, under his direction, were to make a survey of a required territory and were empowered to purchase or receive by present such land as the President thought necessary for the use of the government.

The three commissioners selected by Washington were David Stuart of Virginia and Daniel Carroll and Thomas Johnson of Maryland. In order to give every architect in the country opportunity to offer a plan for the Capitol, Washington and the three commissioners wrote the following advertisement:

A premium of a lot in this city to be designated by impartial judges, and five hundred dollars, or a medal of that value at the option of the party, will be given by the commissioners of the Federal building to the person who be fore the 15th day of July, 1732, shall produce to them the most approved plan for a Capitol to be erected in this city; and two hundred and fifty dollars, or a medal, to the plan deemed next in merit to the one they shall adopt. The building to be of brick and to contain the following spartments to wit: a conference room and a room for the representatives, suffi-

persons each; a lobby or antercom to the latter; a senate room of 1200 square feet area; an ante-chamber; 12 rooms of 600 square feet each for committee rooms and clerks' offices. It will be a recommendation of any plan if the central part of it may be detached and erected for the present with the appearance of a complete whole, and be capable of admitting the additional parts in future, if they shall be wanted. Drawings will be expected of the ground plots, elsva-tions of each front, and sections through the building in such directions as may be necessary to explain the internal atructure; and an esti-mate of the cubic feet of brick work mposing the whole mass of walls.

A fee of \$500 for designing a national capitol would be looked upon as a joke by architects of today, but in the early days of the Republic that sum was a munificent one, indeed. At any rate, 16 plans were submitted as a result of the advertisement in the newspapers and they were sent in by a few real architects, a few draftsmen and by a number of other persons who were neither architects or draftsmen, but to whom that \$500 and the glory of being the designer of the government building were very attractive. The architect whose plan was accepted was Stephen Hallet of Philadelphia, a Frenchman, But be was deprived of the honor by a curious accident. Jonathan Trumbuil. the celebrated artist, had a friend, Dr. William Thornton, of Philadelphia, whose hobby was that of amateur drafting and who had won some renown as a designer of the Philadelphia library. Trumbull suggested to Thornton that he submit a design for the Capitol and send it to the President, Washington preferred Thornton's plan to Hallet's, and although the latter and his friends stirred up considerable of a row over the matter, the doctor's plan was finally ac-

The design by Doctor Thornton called for a domed rotunda, a portico and two wings. But funds were so scarce when the young government set out to build the Capitol, it was decided to erect only the north wing at first. It was this wing which was completed in 1800 and lute which library were moved. "The Oven," a his affairs of state.

cient to accommodate three hundred | temporary round brick structure, was put up the next year on the site of the house wing, but the permanent structure of this was not finished until 1811. Then came the great calamity, one of the most disheartening which the infant republic had ever suffered. During the War of 1812 the British captured Washington, burned the new Capitol, the White House and other public buildings. It seemed an almost impossible task to President a and his subordinates to rebuild the charred remnants of the government buildings. But a few weeks later, Madison called congress in special session, and as a result of its action the rebuilding of the Cap-Itol began.

By 1843, however, it was discovered that the Capitol was already too small for the needs of the government, and congress passed a resolution providing for the enlargement of the building by the addition of a wing on the south side. Nothing was done about the matter until 1850, when Jefferson Davis, then a senator from Mississippi, requested an architect named Robert Mills to submit plans for the enlargement of the Capitol. Mills' specifications called for new wings on the north and south and a dome in the center of the original building. Davis succeeded in getting through the senate an appropriation of \$100,000 for each wing, but the muse reduced it to \$50,000 for each and arranged for competitive bidding in the planning. The plans submitted by T. U. Walter of Philadelphia, which were especially favored by President Millard Fillmore, were finaly selected.

It took more than six years for the completion of the work, and during that time it was discovered that the original appropriation of \$50,000 for each wing would be decidedly insufncient. In fact, the total cost was something over \$8,000,000. The new house wing was occupied for the first time December 16, 1857, but the senate did not move into its wing until January 4, 1859. Now, after seventy years, a new wing is to be added to the Capitol to give Brother Johnathan, the lusty young glant among untions, congress, the Supreme court and the plenty of room in which to carry on

#### Sold

A "swell-head" went to a fashlonable artist to have his portrait painted. The fee was pretty stiff, and the likeness too true to be flattering. Not well pleased, the sitter demurred at

the price. "Well, you need not pay for it unless you want It," said the artist. "Then you'll have it on your hands.

#### "Sneeze Gas"

The introduction of a small quantity of a recently discovered "sneeze gas" into illuminating gas is the suggestion of a prominent American gas expert, with a view to lessening the

## MEN MAROONEI

#### STORY FROM THE START

Garth Guthrie, Canadian war veteran, having to live in the open on account of weakened lungs, is factor of a Hudson's Bay post at Elkwan. He came back from the conflict with a permanently scarred face, which he realizes cost him the love of his flancee, Edith Falconer. Sir Charles Guthrie, his brother, is a millionaire war profiteer. With Etienne Savanne, halfbreed, his firm friend, Garth meets Doctor Quarrier, geologist, and his sis-ter Joan. Their schooner has drifted ashore. Quarrier complains he has been robbed by a man known as "Laughing Mc-Donald." At Elkwan an Indian girl, Ninda, tuberculosis victim, whom Garth has befriended, is dying Joan, trained war nurse. cares for Ninda, but the girl dies Charles Guthrie writes reprosch-ing his brother for not coming some. Charles' wife assures him Ethel still loves him, but Garth in his heart knows better. Three of McDonald's party visit Elkwan seeking to buy gun shells From them Garth learns of evil talk among the Indians concerning him and Ninda. With Etienne's Garth wins the friendship of Saul Souci, "medicine man" of the Crees, and gets his promise to persuade the Crees to take their furs to Elkwan instead of to McDonald. Garth is ambushed by Joe Mokoman, Ninda's reput-ed father, whom the factor had driven from Elkwan "Shot," Garth's airedale companion on many battlefields in France, many battlefields in France, saves him, and the Indian is taken, a prisoner, to Elkwan. Garth sends Mokoman to Mc-Donald with a message of de-flance, and the war is on.

#### CHAPTER VI-Continued

"So you saw Joe Mokoman, aid you, Skene?" The bass of McDonald broke the silence with an odd, sturring articulation, due to the misshapen lips. "Yes. He says he's covered most of

the camps at this end of the island. Of course, the blizzard held him up." "And they'll come in with their fur,

Christmas week?" "Most of 'em will, he thloks." The older man wrinkled his bushy brows as he filled his pipe. "These two halfbreeds from Revillon Freres, in that shack beyond Big point, have been after them hard, you know. They've

Bay handed 'em-about our poor stuff, and chentin'." "By gar!" burst out Breault. "I run dese people off de Island, toute

given 'em the same talk the Hudson's

suite. Where is dere camp?" "You would, would you?" drawled McDonald, "You don't seem to realize that we're anchored here in this ice until May. Do you want the French and the Hudson's Bay to notify Ottawa that a gang of pirates are running amuck on the bay? We can't fight the government, you know. We're here to take out the fur eatch of Akimiski, not to lose the schooner, the fur, and stand trial in the bargain, for God knows what."

Breault's face darkened behind his black beard as he muttered in feeble protest, his small eyes shifting from his chief to Skene for support of his suggestion.

The sober Skene shook his head. "No! If you manhandled those French company men, we'd be in a masty mess, tled up here with two years' trade of fur. A snug nest egg for each of us for the government to confiscate. You're crazy, Breault."

"Now what did he learn of the wherenbouts of this treaty chief. Soucl, whom Guthrle landed with

"Joe says he headed for the north end of the island to find his sons. He hasn't been seen since."

"Well, you can bet he's out to beat us if he can, but how can he keep those hunters away from us this Christmas if the strait is open? The Indians say it seldom closes until Jan-

"He can't," agreed Skene. "They'll never wait till then to cross the ice to Elkwan when they know we'll pay more for the fur right here, within easy reach. They always have a blowout New Year's, and they'll come here to have it. We'll give 'em a good one. We can afford to."

"Right-o!" McDonald nodded, then added; "Your hunch on this Elkwan man seems to be borne out by his bucking the ice in that York boat. Only a man with guts would tackle that strait in a

"There aln't no doubt about his color," said Skene with finality, exhaling a cloud of smoke. "He's due to give us a fight, as he wrote you-just how I don't see, but I've seen enough fightin' men in the last five years to know the look of 'em-. He's one."

"He mus' scare you, my fr'en' leetle blt, w'en you meet heem on de

beach," bantered Breault. The heavy brows of Skene lifted in a look, close to contempt, which he cast at the speaker. "Breault, I've been in places that would have turned that black hair of yours gray. Scare me? This Elkwan man was civil, and I was civil. I was after some shells, But don't forget the message he sent you. He said if that black Frenchman ever showed up at his place again, he'd get a knife stuck into him. And I'm betting he told the truth-from the ugly look of a half-breed he had with him. When the straft freezes why don't you go and find out?"

Breault laughed derisively. "I onlee kees de squaw."

"Yes," added McDonald. "Get this straight in your thick head. You

ter, here. We're after fur-not wom-

Angered. Breault sneered viciously "You don' have to worry bout de women."

In searlet patches blood smeared the maimed face of the man on the box. The deep blue of his eyes blackenedthen flamed. Slowly, he straightened his long body notil his russet head touched the deck above. A huge fist trembled in the bearded face of the man whose small eyes shifted in secret fear. "You drop another word like that to me, you slacker, and I'll hammer you into jelly."

Stiff in his seat. Skene stolcally puffed at his pipe, watching through the corners of half-closed eyes the groping right hand of the Frenchman.

The master of the Ghost swallowed hard-choked. His eyes waveredthen fell before the flaming mask, grotesque, terrible in its fury, of the man who bent toward him. The moving hand of Breault stopped-limp.

Slowly McDonald regained his seat, the sweat standing in beads on his wide, bronzed forehead. Refilling his pipe, he lighted it and ignoring the rebuked Breault, turned to Skene.

"Where were we? Oh, yes! Now when does Joe start for the other end of the Island? I'm curious to learn what that old Souel is up to,"

"Now that he's got a dog-team, he intends to start-" The voices of men on deck, evident

ty halling some one on the Ice, cut

off Skene. McDonald called, "what's the fuss about on deck?"

"Dog-team on the Ice," came the reply.

The three men got into Eskimo parkas and went on deck. Halfway from the shore a dog-team was making its way over the lumpy ice of the

"Who is it? Recognize him?" asked Skene of the east coast Cree Interpreter, who was wintering on the Ghost. "It's not Joe?"

The Indian shook his head. Presently the booded driver of the approaching huskles called: "Kequay!" and shortly reached the rail of the schooner, watched by the curious knot of men on deck.

Making his dogs fast, the stranger clambered aboard, and with a grave "Kequay," shook the hand of each of the group-then spoke in Cree to the interpreter.

"Who is he?" asked McDonald. "He's got a cut to his jib that's different from most of these Crees. Shrewd

looking old party." "He says he's Souci, Treaty Chief of the Elkwan Crees," replied the interpreter. "He cum to mak' talk with

McDonald Ha! Ha!" Skene and McDonald exchanged sur

prised looks. "What's this?" said the latter in an dertone, "Why, it's the bird Guthrie put ashore with Joe to work against

"Here's our chance to put one over on Mr. Hudson's Bay." chuckled Skene. "He must have a proposition to make, or he would have kept away from us. He's got nerve, I'll say. Joe told me he'd shoot him if he met him

Shortly the old Indian, the fur hood of his caribou capote pushed back from a shock of raven hair, sat in the warm cabin with McDonald and Skene. His story, told through the interpreter, for he said he spoke no English, was brief. Yes, as they had been told, he was Treaty Chief of the Elkwan Crees, and had been sent by Guthrie to attempt to hold the trade until the struit closed. But the Hudson's Bay ompany had a cold heart. It always had given the hunters little for their

keep away from the squaws this win- | fur, and now when others came to trade, and threatened to take the fur from the old company, its heart was still cold, and it offered less than the new traders. He, Souci, a chief, had been promised reward if he saved part of the trude and brought it to Elkwan; but what reward? It was the pay of a sonaw. "His two sons al ready had three black fox pelts and eight silvers-worth double what the factor at Elkwan had promised for his winter's work. Now, he had great influence with the Cree hunters-was a shaman, and many of them would walt until the strait closed and go to Elkwan. What would McDonald Ha! Ha! offer for the services of Soucl. Chief of the Elkwan Crees, to bring the northern hunters to the schooner at Christmas?"

"Well! I'll say he's a cool one," aughed McDonald. "He comes right inside our wire to our trenches and wants to bargain. The Hudson's Bay probably haven't offered him much But he's trying to sell us what we'll get anyway."

"What's his price?" demanded Skene. The Interpreter talked rapidly with Souch, then replied with a grin; "He say he wan' t'ree rifle, t'ree goose-gun, and trade-good' for ten prime black fox. Hees own fur he trade, al-so."

"Ten black fox-two thousand dollurs in trade-goods? Nonsense!" Mc-Donald scowled fiercely into the bony face of the old shaman with its leather-like skin, mapped with lines. The beady eyes of Souci, unwavering, gave look for look. For a space the cold blue eyes probed the black inscrutability of the Cree's stare, Slowly the caliber of Saul Soucl rose in appraisal of the white man. Here was an Indian of parts-nerve, brains, power. As a medicine man, of use, if his service were needed. But his price was ridiculous-his help not necessary. They had Joe Mokoman. It was enough

"Suppose, by chance, the strait should close this year?" threw out

"It never has, so early." McDonald thought a space, then turned to the Interpreter. "Offer him the guns and the value of five black fox."

The face of old Souci darkened as the interpreter communicated the offer. He shook his head in anger.

"Well, that's our limit," said Mc-Donald, rising. "Tell him we don't need him, but we'll pay him a good price for his fur if he'll bring it in at once."

Silent in his disappointment, Souci went on deck, followed by the others. Freeing his impatient dogs, the old chief turned to the men watching from the rall and said quietly in English: "Bo'-lo'! Tomorrow I tak' de fox to

Elkwan." "Goin' to fly or swim?" laughed Skene, joined loudly by the group on

lean face of the dog-drive framed in its fur hood was wooden in its placidity, as he coolly said: "De strait freeze hard two sleeps back!" And cracking his long whip, he leaped on the tall of his toboggan and was

"What! The strait is closed?" gasped McDonald, seizing Skene by the shoulder. "Frozen solid, he said! Hallo, there, Souci !" cried the excited trader to the fast-traveling dog-team. You, Pierre! Get after him and bring him back. Tell him we'll give him his price. Strait frozen! H-l, Skene! Now we've got to fight for that fur!"

Skene was over the rail with the shricking interpreter and running to ward the sled, which had come to a stop. Slowly the old man turned his

#### dogs toward the schooner.

#### Mouth Kept Open to Protect Ear Drums

That an explosion may result in serious injury to the human ears is a well-known fact. Gunners often open their mouths to protect their ear drums while firing large guns, says a writer in the Pathfinder Magazine. When the mouth is open the air waves set in motion by the discharge of the gun enter the throat as well as the ears. Consequently the sudden pres sure against the outside of the drums is counteracted by an equal pressure against the Inside. Such, however, is not the practice in the United States navy. Men working in the turrets are well protected from concussion. Those in the more exposed positions usually use pledgets of cotton in their ears to protect the drums. Some use patent ear stoppers such as are manufactured by various commercial firms. Although special ear protectors and cotton are

#### Nebraskans

By act of its legislature April 4. 1895, the state of Nebraska was styled "Tree Planters' State." However, references we have consulted also include the following nicknames: "Antelope," "Black Water" and "Corn Husker." It would seem that the only two names that would be suitable to designate a resident of Nebraska would be either "Tree Planter" or "Corn Husker,"

also used, at the coast artillery target practices it is a custom for the personnel taking part to open their nouths during the actual firing of the guns in order that the pressure on the ear drums may be equalized. The men also stand on their toes to relieve the body as much as possible of the shock of the explosion.

#### Lucretia Mott's Diplomacy

Lucretia Mott, who helped to form the anti-slavery society in Philadel phia in 1833 and who soon afterward founded the Female Anti-Slavery soclety, took an active part in the affairs of these societies. When a New York anti-slavery society session was broken up by a mob, many of its speakers were roughly handled. Percelving that many of the women were afraid, Mrs. Mott said to ber escort. "Won't thee look after some of the others?"

"But who will take care of you?" he asked.

"This man," laying her hand on the arm of one of the roughest of the mob. "He will see me safely through." The astonished man, with respectful manner, took her to a place of safety. -Kunsas City Stor.

Over \$50,000,000 worth of European art treasures were imported by American dealers last year.

"The clever beggar!" exclaimed McDonald in admiration. "Played us like a salmon. Waited to spring his trump card, and got his own price without a haggle! Knew he was shrewd-nervy! Speaks English, too! The old wlzgrd! He's the chap we need now. Our little job is to stop a stampede across that Ice for the Christmas feast that Guthrie has

promised the Crees at Elkwan." Skene swung over the rail and announced to his chief: "Souch says he'll start north at once and agrees to hold his relations and most of the rest. on the terms he offered. He wants to bind the bargain with you, person-

"Good!" And McDonald vanited ver the schooner's rall, followed by Skene and Breault.

"The strait was closed two sleeps back? Where?" he demanded of the

"Ovair de shoal at Beeg point," "You saw it?"

"I cross to de Elkwan," "What? You've crossed the Ice to

the post?" The Indian nodded, his stone hard features an enigma to the men who sought to rend them.

"What did you learn?" "Dis Guthrie know de ice set, and all de Cree cum to Elkwan. He say he geve me not'ing to work for heem.' Saul Souci grinned into the gaping faces surrounding him. "Onlee Sau! Souci get you all dat fox from de

pord, now."

McDonald thrust out a red, mitless hand. "It's a bargain! You bring that trade here and you get three rifles, three shotguns, and the value of ten prime black fox in trade,"

Dropping his rabbit-skin mitten on its neck thong, Souci took the extended hand of the trader. "Klyam appowlyn, it ees good," he said, solemnly. Thrusting his hand into the hanging mitten, he cracked the whip of plaited caribou thongs over his lead dog's ears, and again started for the shore, leaving behind him on the ice an arguing group of mystified and ex-

#### CHAPTER VII

The morning subsequent to the nights of withering frost which clinched the grip of the ice on the west coast, Garth and Etienne, muffled in blanket capotes and fur robes, drove their five-dog team, hitched to a runner sled for ice-work, out of the closed delta of the Elkwan and down the coast. Inland, the wide marshes reached the ripples of drift, like a white sea, to the outguards of the space, or lay, parti-colored, patches of dead grass brushed of snow, splashing the white levels with ochre and dun. Splitting the frozen shell of the strait broken by pressure ridges and heaps of shattered ice, a streak of black to the east marked the still open channel. Beyond, the hidden sun, breaking from the bay, rimmed the

barrens of Akimiski with fire. But it was to the south, where the great point of the Island pushed its bulk Into the strait that Garth hoped to find that the abnormal December cold had built a bridge of ice to Akimiskl. Over the easy going of windhammered snow and shore ice, the dogs romped past the frozen beaches. At a sandspit strewn with boulders Garth stopped. With a hand from Etlenne, he reached the top of a large rock and taking his binoculars from their case, studied the miles of icesheathed shoals which followed the thrust of Big point toward the mainland. As he looked, his lips moved in a muttered note of surprise. Could it be that luck had come to Elkwan-to Garth Guthrie, in the shape of a road of ice from Akimiski before Christmas?

"Come up here, quick!" he called to the man at the sled. The halfbreed scrambled to the top of the boulder. "I can't make out open water over there," sald Garth, exultantly. You take a look, It was a mile wide the day before the blow."

Dropping his mittens, Etlenne took the proffered glasses. Until his hands reddened with cold, he stood as if hewn from the boulder. Then, when the column of his frosted breath misted the lenses, he handed the glasses to Garth, his eyes snapping with excitement. "De ice set ovalr dem bar; we cross today and hunt old Souci!" he cried, sliding from the boulder and running to the impatient dogs.

"We'll take rations for a week," sald Guthrie, "round up the Elkwan hunters Saul is sure of, and chase them over the ice. McDonald may not know for days that the strait is closed here. He's thirty miles away."

The willing huskies, urged by the crack of Etienne's whip, took the back trall to the post on the run. The success of the undertaking hung largely on speed, and while Murie loudly be wailed the rushness of the crossing. seconded by the vehement protests of old Anne, tent, robes and provisions were hurriedly stowed and tashed.

When Anne opened the gate, with a leap Shot reached Guthrie, busy part. with a sled lashing, and man and dog rolled in the snow. Shielding his face with a mittened hand from the attacks of a hot tongue, Garth finally calmed the delirious dog, while Etlenne checked the yelping huskles, keen to punish such familiarity with the factor Santa Fe.

ITO BE CONTINUED.)

#### SOUTH-WEST **NEWS NOTES**

The \$65,000 grade school building, inder construction at Artesia, N. M., will be completed and ready for occupancy by November 15.

Mrs. E. S. Wilkins is in the hospital in Artesia, N. M., suffering injuries received when attacked by a pet bull on her farm near Cottonwood. Automobiles were banned in the

Old Timers parade which was a feature of the Chaves County Cotton 'arnival, held in Roswell Oct. 5 to 8. Both the Sierra County High school and the Hillsboro grade school, at

secause of an infantile paralysis out break in Hillsbore. Litigation over the proposed new \$73,000 sewer system for Alamogordo. N. M., has been dropped and with the contract let to an Amarillo company.

the town board has authorized that work be started at once. Preparations have been completed to entertain 350 delegates to the seventh annual convention of the southwest district of Kiwania International, to be held in Santa Fe Oct.

14 and 15, it was announced recently, Timber sales on the Lincoln national forest, which amounted to \$9, 688 during the past fiscal year, are expected to be doubled this year, because lumber operations are approach ing federal timber tracts, forest officials stated in Alamogordo a few days

Dr. Homer Leroy Shantz, professor of botany at the University of Illinois, has acknowledged acceptance of the presidency of the University of Arizona, according to Regent Louis Kempf, secretary of the board. Notification to this effect was received in l'ucson a few days ago.

Recent surveys show that it is possible to construct an earth-and-rock fill dam on the Canadian river below the mouth of Conchas creek, which will impound 1,062,000 acre feet of water and will effectually control the floods of that river, State Engineer H. W. Yeo announced in Santa Fe.

New Mexico State Treasurer Warren R. Graham stated in Santa Fe that the next New Mexico Legislature will probably be asked to pass a law that the state be held responsible for losses of state money where such losses have been incurred in follow ing the advice of the state's attorney general.

When school teachers of southern Arizona arrive in Nogales on October 14th, there will be approximately 600 school 'marms from Douglas, Bisbee, Benson, Tombstone, Tucson and other southern cities there, according to an advice given out in Nogales by J. B. Bristol, secretary of the Nogales Chamber of Commerce.

Leo, the "flying movie lion," whose aerial trip to New York was interrupted when his plane, piloted by Marty Jensen, crashed into a mountain near Tonto Basin, arrived at Roosevelt lodge on a sled. Four days were spent in transporting the lion to the lodge, which is seventy-five miles northeast of Phoenix, Ariz.

M. L. Shellenberger, rancher, is in jail at Nogales, Ariz., following a verdict of a coroner's jury that the death of John Yoast was caused by a firearm in Shellenberger's hands. Shellenberger gave up to the sheriff in Nogales, declaring that he shot Yoast in self-defense, The shooting took place at roundup corrais, near Salero, Of twenty-two states represented at the secretaries of state conference, held in Sacramento last month, but two had women secretaries. These secretaries were Miss Jennie Fortune. New Mexico, and Miss Gladys Pyle, South Dakota, Miss Fortune was the younger of the two and was termed the "baby secretary," she smilingly admitted on her return here.

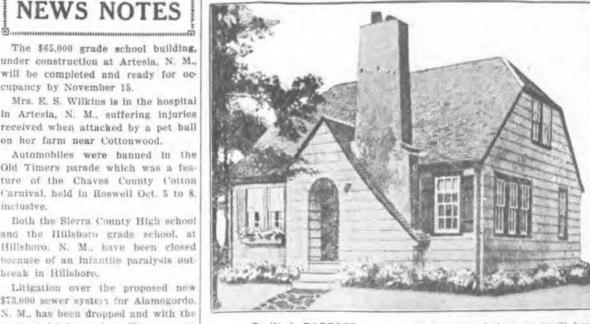

The total amount of direct taxes levied in the state of Arizona for the year of 1927, for all purposes, is \$20,-048,060, according to a report issued in Phoenix by the State Tax Commission. The report shows that the average tax rate paid in Arizona for all purposes is \$2.98 on each \$100 of assessed valuation for property. The total valuation of all property for taxation purposes is \$673,127,777.

According to the figures upon which 1927 tax levies have been compiled, the total assessed value of property in New Mexico is \$315,373,405, a decrease of about \$150,000 under the valuation of 1926, which was \$315,-528,209 The figures do not include the private car companies' valuation for either year. For the year 1926 the private car valuation was \$2,235, 749 and the total assessment of prop erty for that year was \$317,763,958. About half of the counties show increased valuations.

The first unit of the new Elks home of Spanish design is nearing completion at Gallup, N. M., and plans have been made for its dedication Oct. 12, in which prominent lodgemen from Arizona and New Mexico will take

Catron county, N. M., abolished by an act of the last New Mexico Legislature, but still making a fight for its existence, lost the first round of its fight when Judge Reed Holloman sustained a demurrer to the complaint of citizens of the county, filed in

#### Cozy Cottage Often Pictured, but Which Seldom Develops Into Reality

By W. A. RADFORD

Mr. William A. Radford will answer COST on all subjects pertuining to practical baws building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these sub-lects. Address all Inquiries to William A. Radford, No. 1827 Prairie avenue Chicago, Ill., and only inclose two-cent stamp for reply.

Who could resist the appeal of such a cozy little cottage as this? It simply charms you right from the start and makes you feel as though you were looking into a picture book instead of at a real life-size house. And it is a real life-size house, too, for in spite of its "picture-book" appearance it contains a big living room,

26 feet long by 13 feet, 3 inches wide, and four other rooms of proportion-

Though this little house measures but 26 feet wide and 28 feet deep, its proportions are so good that it carries an air of real dignity and beauty in contrast with the box-like appearance

#### Particular Heed Should

Be Paid to Home Wiring Electrical wiring in a new home is only a small item of the total cost, but it is one of the most important things a prospective home builder should consider when planning his

wiring can be done before the plaster is applied to the walls. Your architect will draw a wiring plan with the plans for your home. Take these plans and consult some good wiring contractor. Don't leave these detalls to the man from whom you buy your

the wiring job and only takes it because he wants to help you after you have purchased the fixtures from him. He would much rather you get an accredited electrician to do the wiring and thus take the work off his hands.

dences start from improper wiring. A well-known electrical contractor might charge a little more than some amateur for his services, but when it is completed you may depend on it you have a job which will pass underwriters' inspection.

#### Poor Flooring Will Show

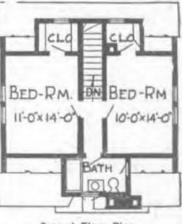

eracks; it does not give the depend sired by the builder,

Home builders should be sure that the lumber they buy will require a minimum of carpenter work of planing, sawing and sorting,

pourds is oak, which muy be laid in an irregular manner with boards of siternate widths to give an antique effect. It displays nature's beauty in grain and construction, blending over the entire lustrous floor expanse.

of so many of the very small houses we see. The high, snub-nosed gables create a snug appearance without any suggestion of flatness. The walls covered with shingles laid wide to weather are most appropriate, and the chimney worked into the entrance detail gives that individuality which is the secret of charm of the place.

It is, perhaps, this entrance detail and chimney that first catches the eyes. The chimney itself has a satis-

fying solidity without appearing in the least too heavy for so small a house. It suggests a broad fireplace where, in winter and on chilly autumn evenings, the family will gather about a cheery, crackling fire. Within, we find this fireplace as a feature of the big living room which extends across the entire front of the house.

To the rear of the living room are the dining room and kitchen. The latter is provided with a rear entry and a commodious pantry. Busement stairs are placed in a passage between kitchen and dining room, while from the dining room itself, a stairway as-

cends to the floor above. On this upper floor we find two large sleeping rooms, each measuring 14 by 11 feet and each provided with a large closet, lighted by an outside window. On this floor, too, is a bathroom of the most modern type, easily accessible from bedrooms.

One of the most popular floor

Oak lends dignity to any room; it harmonizes with woodwork and with furniture of whatever period. It is the proper background for rugs. It is permanent. Time only improves its nellowness. It is easily kept in perfect condition; is cleanly and saves nousework. The cost is negligible compared with temporary floor cov-

#### Color of Floor May Be

Darker Than Wall Tone There is as much opportunity to display decorative taste in the coloring of a floor as there is in the treatment of walls, woodwork, furniture and drapes, and these opportunities can be taken advantage of with the many colored floor finishes now available.

The theory of interior decorative treatment suggests that the floor be darker in tone than the walls, the idea being that the lower portion of the room should have an appearance of greater solidity than the uppea While the idea of light colors for

floors is contrary to theory, probably you have been impressed pleasantly with the beauty of colorful rugs. Gradually we are getting away from the usual dark floor. Perhaps you have a room that has not pleased you. Often the floor is at fault, or, if not at fault, often a change in the color of the room will make the room more attractive. The idea is worthy of

In floor finishing, color is but one consideration. The surface must be properly prepared for refinishing, the proper finish must be used, and rhen the floor must be given intelligent care.

#### Mineral Lumber Should

Be Used as Fire Stop Necessity for installing fire-stopping between a brick veneer exterior and the sheathing of a wood frame house can be eliminated through the use of an incombustible mineral sheathing. Such a sheathing provides its own firestop on the inside of the structure. Nor can a blaze travel farup the air space between the brick and the shenthing because of the facing of incombustible materials on both sides.

In laying up brick veneer over mineral sheathing the brick are tied in with metal ties, which are nailed into the sheathing with no more difficulty than the same ties are nalled into wood. This is made possible by the gypsum composition of the incombustible sheathing.

Mineral sheathing comes in large panels, which are tongue-and-grooved and which, in consequence, make possible a wall that is sealed against the infiltration of wind and which cuts down the escape of furnace heat.
