U. S. IS LEADING MINING NATION

Not only is the United States the greatest producer of mineral products of a country in the world, but it is also the greatest consumer. L. S. Cates, vice president of the Utah Copper Company, points out that consumption per person in the United States in 196 was 15 pounds of copper, 13 pounds of lead and 10 pounds of zinc. We use more than double the amount of copper consumed by other leading nations, with relative proportions of zinc and lead.

Further development of home markets, exportation of surplus minerals, necessity for an equitable basis of taxation, both state and national, are matters of deep import to the mining industry.

SCHOOLS FOR INDUSTRIAL DEMOCRACY

It is estimated more than 27,000,000 boys and girls are attending public schools at an expenditure of \$2,000,000,000 from the taxpayers to operate schools and school property valued at \$5,000,000,000. What about a more contented, useful, and practical result in the way of the citizenship product of these schools?

One great hopeful outlook for better results lies in the line of industrial training. In the San Mateo-Burlingame Union High school district of California as high as 62 per cent of the boys are learning trades and occupations necessary to the life of the community. Without interfering with regular studies, boys in the industrial department are earning 30, 40 and 50 cents an hour.

Many farming districts have courses where boys study farm machinery and erection of farm buildings—all such undertakings spell a new era in industrial education.

MUST CURB IRRESPONSIBILITY

The California division of motor vehicles canceled 41 drivers' licenses in two months for offenses running the gamut from false statements made when applying to various traffic violations. This is the only way reckless, incompetent and criminal automobile drivers can be weeded out of our highways.

All the compulsory liability insurance laws in the world cannot have half the effect of such examples of the result of irresponsibility and unworthiness. In this age the auto is a necessity, and a driver will think twice before taking chances when he knows that he runs the risk of having his driver's license revoked.

Compulsory automobile liability insurance is not fair to the companies, or the great majority of drivers, who are sane and careful. A few months of wholesale revocation of licenses when good cause is shown, will do more to cut down accidents than years of compulsory insurance.

HOW TO GO BROKE

There is no end of lists of what to do and what not to do; how to keep healthy; how to get rich, and so on. It remained for the agricultural college of the University of Tennessee to compile a list of ways for a farmer to go broke, a part of which we quote:

- "Grow only one crop.
 - "Keep no livestock.
 - "Regard chickens and a garden as nuisances.
 - "Don't plan your farm operations. It's hard work thinking. Trust to luck.
 - "Hold fast to the idea that the methods of farming employed by your grandfather are good enough for you.
 - "Be independent. Don't join with your neighbors in any form of cooperation.
 - "Mortgage your farm for every dollar. It will stand to buy things you would have cash to buy if you followed a good system of farming."
- By following these few simple rules carefully any farmer may go broke easily and quickly.

AIRPLANE THIEVES BUSY

Guy Jones, Homer Serrif and George Moore wanted to make a "flying trip" from Troy, O., to Berea, Ky. which they did in an airplane, which it is charged that they "did unlawfully steal, take and carry away." It seems that the day of the airplane has not yet come for the future.

BE CAREFUL AT HOME

As many, or more, people are killed right in their own residences than on the streets and highways. Hundreds of communities, national organizations, state bodies and local associations are trying to cope with the traffic problem but practically nobody is worried about the national toll taken by home accidents. More than 18,500 men, women and children met accidental deaths in their own homes last year.

NEWEST THING IN BOOZE

Washington folk who drink bootleg liquor have somewhat lost their zest for the stuff lately. It has been discovered that a lot of alcohol formerly used to preserve snakes and other reptiles in the Smithsonian Institution has been stolen from the bottles and jars. The bootleggers are believed to be using it in their concoctions.

THE NEW ZEROLENE
Reason why (1 OF MANY)
STABILITY—Lubricates correctly—never "breaks down!"
The modern oil for modern motor cars.

STANDARD OIL COMPANY OF CALIFORNIA

ARE LAWYERS TRUTHFUL?

Omaha lawyers objected to a wise crack on a slate in front of a filling station, which read: "all the truth to your lawyer and he will lie for you." The bar association sued the oil company for libel, asking \$475,000 damages, but finally considered its honor vindicated when the oil people did a Henry Ford—that is, apologized.

SENATOR AT 100 YEARS OF AGE

Senator George Desaulles of Ontario was opposed for that office because he was 79 years old at the time he became a senator. He is now 100 and is still a senator, with 21 years of service as such to his credit, which again illustrates that it is difficult to judge a man's fitness by his age alone.

PRESIDENT DIES EVERY 20 YRS.?

It is a curious historical fact that the five presidents of the United States who died in office were elected in 1840, 1860, 1880, 1900 and 1920—at 20-year intervals. We wonder if this peculiar circumstance will cause any superstitious aspirants to say "I do not choose to run in 1940."

Camel
The cigarette that leads by billions

Just to state a great truth in another way—Camel is so exactly what so many smokers want that no other brand is even a close second.

If all cigarettes were as good as Camel you wouldn't hear anything about special treatments to make cigarettes good for the throat. Nothing takes the place of choice tobaccos.

© 1927, R. J. Reynolds Tobacco Company, Winston-Salem, N. C.

FACTS

-AND THE OPEN MIND

THE MOST important element in business success—and the most difficult—is to be sure that you have all the facts before you act.

TO GET them all, from every possible source, is the first objective in General Motors. The Research Laboratories contribute some. These are nuggets, left in the crucible, after hundreds of ideas that looked good have been burned away. The Proving Ground contributes others. Dealers contribute. The public contributes. Every department contributes. Through the whole organization runs a spirit of inquiry and of rigid insistence on proof.

OUT OF such thinking come the new models announced from time to time by Chevrolet, Pontiac, Oldsmobile, Oakland, Buick, LaSalle, Cadillac—all with Fisher Bodies. And by Frigidaire. Each new model is a tested step forward. Nothing goes into it as a result of habit or guess or pride of opinion.

Nothing counts but hard-won facts, gathered and used with an open mind.

GENERAL MOTORS

"A car for every purse and purpose"

GENERAL MOTORS (Dept. A), Detroit, Mich.

Please send without any obligation to me, your illustrated booklet, "Where Motor Car Facts Are Established," together with information about the particular General Motors product or products I have checked at the right.

- CHEVROLET OAKLAND CADILLAC
- PONTIAC BUICK FRIGIDAIRE
- OLDSMOBILE LASALLE DELCO-LIGHT

Name _____ Address _____

A junk company, which made a contract four years ago with the French government to salvage barbed wire, corrugated iron, cannon, machine guns and other debris left by the war in the Argonne region, has not yet half finished the job. They will have to hurry to get the place cleaned up in time for the next war.

We can readily believe the report that Rev. Jordan of Georgia, charged with having five living wives who will appear at his trial, is in "a highly nervous condition."

Mr. Fastidious Dresser

You will be interested in knowing that now you can have that faultless appearance in individually made suits, topcoats and overcoats at a price that is unquestionably far below what you have dreamed quality clothes could be purchased for.

I handle the following for Santa Cruz and Cochise counties: J. B. Simpson, Inc., of Chicago, two lines—\$23.50 pure virgin wool suits and overcoats; \$31.50 de luxe virgin wool suits and overcoats.

The Nogar line of 2-piece suits and overcoats at \$12.50 and \$13.50. A wear-resisting fabric that is incomparable.

The Howard line of fine shirtings that will appeal to the immaculate taste.

I hope to see you soon, but in the event that I don't, a post card addressed to me will insure my prompt appearance.

RALPH C. McINTYRE

What's New?

A newly invented penknife really has a fountain pen built into it.

The world's largest searchlight, of more than a billion candlepower, will be used as a beacon for aviators at Charlottesville, Va.

To keep small boats from sinking, an automatic balling system has been invented.

After 30 years of breeding, the International Canary Breeders' Association has developed a white canary.

Ugo Zaccchini of Turin, Italy, has invented a cannon from which he permits himself to be shot into a net several yards away.

Interesting News Notes

Next year 1250 British descendants of the Mayflower Pilgrims expect to visit America.

President Coolidge may attend a conference of American nations to be held in Havana next January.

Manufacture of perfumes and toilet articles in the United States is six times as great as 10 years ago.

Products displayed in a recent Japanese exhibit in Constantinople were afterwards given to Turkish charitable organizations.

Much American news is picked up by radio and published in newspapers of South Africa.

"I agree with George White that Luckies are the best"

Said Flo Brooks to Lou Holtz while waiting for their cue to appear in "Manhattan Mary."

Photo by G. Mallard Keasler
George White, Producer of George White's Scandals, writes:

"In the theatre world, Luckies have become almost universal. Stage folks are very critical—voices must be kept in condition, throat irritation is a handicap. In 'George White's Scandals,' most actors and actresses whose voices are important smoke Luckies both for voice protection and finer flavor. For these reasons I prefer them, too."

You, too, will find that LUCKY STRIKES give the greatest pleasure—Mild and Mellow, the finest cigarettes you ever smoked. Made of the choicest tobaccos, properly aged and blended with great skill, and there is an extra process—"IT'S TOASTED"—no harshness, not a bit of bite.

"It's toasted"

No Throat Irritation - No Cough.

NEWS REVIEW OF CURRENT EVENTS

Opponents of Obregon in Mexico Lead Revolt—One Is Executed.

By EDWARD W. PICKARD

REVOLT flared up in Mexico last week, the anti-re-electionists in many parts of the country taking arms against the government, which supports Obregon for the presidency. Parts of the garrisons of Mexico City and Torreón and troops in the state of Vera Cruz mutinied under the leadership of many of their officers, and there were uprisings in other towns. Gen. Arnulfo Gomez, one of Obregon's rivals for the presidency, was at the head of the entire movement, and Gen. Francisco Serrano, the other opposition candidate, was declared to be in full sympathy with the revolt. The mutineers from the capital were soon defeated by loyal troops and Serrano, with a dozen of his aids, was either captured in Cuernavaca or seized in Mexico City and taken there secretly. The prisoners were immediately tried by court martial and shot, and the same fate was meted out to many other officers who were caught.

Gomez, however, for a time eluded the Calles troops and at this writing is reported at the head of a considerable force and marching to attack the city of Vera Cruz. He had been joined by Gen. Hector Almada, leader of the Mexico City mutineers. Federal troops were advancing on a part of the rebel forces at Perote, and the strong Vera Cruz garrison, commanded by Gen. Jesus Aguirre, was reported ready to meet the attack of Gomez. The prospects at this time are that Gomez will be defeated, and if he is captured it is almost certain that he will be executed. President Calles is apparently so strongly supported that there is small chance for the success of a rebellion. The greater part of the army is loyal to him, as is the navy, and the Mexican Federation of Labor is pledged to support him.

This attempted revolt has at least cleared the presidential situation in Mexico, for since Obregon is supported by President Calles and his only two rivals are now eliminated, the election of the former president seems an absolute certainty. Immediately after the start of the uprising 25 deputies who opposed Obregon were expelled by the congress.

FRANK O. LOWDEN received at his Mississippi farm several thousand central Illinoisans who urged him to announce his candidacy for the Republican nomination, supporting the plea already made by delegations from Nebraska, Iowa and other states. Mr. Lowden entertained his guests handsomely but the most they could get from him concerning his candidacy was a reiteration of his previous statement, namely: "I know of no man in all our history who has run away from the Presidency, and no one who appreciates the solemn responsibility of that high office will run after the Presidency." Mayor Thompson of Chicago has let it be known that if Lowden enters the preferential primaries in Illinois, he will present himself as a candidate, and his friends said if he did this he would capture large numbers of Southern delegates in the national convention. An immediate result of the Thompson announcement was the almost complete elimination of Chicago from the list of cities seeking the convention. San Francisco and Cleveland now seem to be in the lead, with Minneapolis and Detroit still in the running. The Republican national committee will decide on the location December 6, according to Chairman Butler. That gentleman and other members of the committee were the guests of President Coolidge at a breakfast and obtained the impression that he was sincere in his determination not to accept renomination. Conferences of the leaders in Washington brought out the opinion that Hoover would run better than Hughes in the West and South, though the latter would have the bet-

ter chance to defeat Smith in New York.

Frederick I. Thompson, Democrat and the publisher of five Alabama newspapers, in an interview in New York, said the Republicans could break the solid South by nominating Hoover, providing the Democrats name Al Smith. The campaign for Smith has been actively opened in several Western states, notably Kansas and South Dakota.

CABINET members, high army and navy officers and hundreds of other persons, gathered at the Aberdeen proving grounds, near Washington, Thursday, and witnessed demonstrations of the newest things in weapons and automotive equipment, the most elaborate display of the kind since the World War. Tanks, tractors, bombs, smoke curtains, anti-aircraft guns, machine guns, field artillery, weapons and rifles were exhibited and tested. Many of the models shown have been available for some time but lack of funds has prevented their adoption. It is hoped this condition will soon be remedied.

Ordnance officers state that in the field of artillery new weapons have been produced which are far superior to the old in range, accuracy, and breadth of the field of fire. In some cases, notably that of the newly perfected 75-millimeter pack howitzer, ordnance experts say the new weapon is so far superior to the ones it was built to replace that there is virtually no comparison. Another example disclosed was that of the new American 75-millimeter gun, which, ordnance experts say, has a range almost twice as great as the famous French 75-millimeter gun used during the war.

The newest anti-aircraft gun automatically sights its target. It is controlled by a sensitive instrument which detects the position of a moving airplane by sound waves. At night a huge searchlight throws its beam directly upon the airplane simultaneously with the discharge of the gun.

FRANCE'S tariff increases continue to be the subject of official notes, semi-official statements and unofficial arguments and protests, and a settlement of the controversy is not in sight. Meanwhile our Treasury department announces the assessment of countervailing duties on certain French products, as a direct result of the higher French tariff rates.

The action was mandatory under six paragraphs of the Fordney tariff act, which makes provision for countervailing duties. Under these paragraphs the articles affected bear specified rates of duty or are on the free list subject to a proviso that if any nation imposes a higher duty, imports of the particular commodity from that nation shall be subject to that rate. The same action has been taken in the case of a few German products.

DESPITE the rigid censorship imposed by the Peking government, the correspondents in China have sent over enough information to prove that Peking is in grave danger of capture by the armies of Shansi province, which are allied with the southern Nationalists and are led by Yen Hsi-shan, military governor. Yen took Kalgan and the Manchurians withdrew before his advance, planning to make a stand at the Great Wall or at the Nankow pass about forty-five miles northeast of Peking. Marshal Chang sent his aviation and heavy artillery units from Peking to Tientsin and it was thought he might be preparing to evacuate the capital. The situation caused considerable concern in Washington and London. Dispatches from Tokyo said the Japanese government was seriously considering the sending of troops from Manchuria to Peking and Tientsin if matters in China grew worse.

MOSCOW ignored two friendly notifications from Paris that the Soviet ambassador, Rakovsky, was at a breakfast and obtained the impression that he was sincere in his determination not to accept renomination. Conferences of the leaders in Washington brought out the opinion that Hoover would run better than Hughes in the West and South, though the latter would have the bet-

ter chance to defeat Smith in New York.

Dr. V. N. POLOVINA, a woman, Soviet representative of the Russian Red Cross in London since 1921, was expelled from England by order of the home office. She is the first woman to be denied the privileges of the country since the raid on the Russian Trading company's headquarters by Scotland Yard men in search of propaganda.

THIRTY persons, who were said to be members of a Communist lobby, were detected trying to "bore from within" at the annual convention of the American Federation of Labor in Los Angeles. One of them, Sid Bush, was arrested and booked on suspicion of criminal syndicalism. The police said Bush had in his pocket a letter from William Z. Foster, secretary of the Communist party of America, instructing him to obtain the introduction of certain resolutions in the convention and naming the Communists with whom he was to work.

One of the most important developments at the convention was the withdrawal of the building trade department of the federation from association with the national board for jurisdictional awards in the building industry on the grounds that the board had failed to render definite decisions.

COAL miners of Illinois and Iowa ended their long strike and went back to work, having reached a compromise with the operators whereby they are to receive temporarily the same wages as under the Jacksonville agreement. A joint board is to take up the wage question in each state. It was believed a similar agreement would end the strike in Indiana mines.

THREE German aviators and an actress from Vienna started from Berlin in a huge Junkers plane to fly to America via Lisbon and the Azores. They were not after a record, so they stopped first at Amsterdam for fuel. Then, flying southward, the plane was forced to descend into the sea off Cape Roer, Portugal. A tug was sent to the rescue and it was announced that the plane was uninjured and the flight would be resumed.

William A. Yackey, war-time ace, president of an aircraft company and a close friend of Col. Charles A. Lindbergh, was killed at Maywood, Ill., when a plane he was testing crashed and burst into flames. The son of a St. Louis business man, Yackey was a member during the war of the Italian flying forces and later of the American army.

GEORGE REMUS, ex-convict and former super-bootlegger, is in the limelight again. Last Thursday, as he and his wife were on their way to court in Cincinnati to settle their domestic difficulties, Remus fired a volley of bullets into the taxicab in which were the woman and her adopted daughter. Mrs. Remus sustained several wounds and died in a hospital. Remus had accused the woman of "framing" him and having him railroaded to the Atlanta penitentiary four years ago, and after his release she filed suit for divorce, charging cruelty.

LAST week it was the turn of Great Britain and King George to entertain the American Legion tourists known as the "good will party," and the job was well done. On their arrival in London the Legionnaires formed in procession on the Embankment and led by Howard P. Savage, retiring commander, marched to the Cenotaph, where Mr. Savage deposited a wreath. They then proceeded to Westminster abbey, where another wreath was laid on the grave of the Unknown Warrior. The first entertainment was a luncheon given by the British Legion and presided over by the prince of Wales, who assured the Americans that they were as welcome as they were ten years ago. Following this was a series of functions, including a reception by the king and queen.

Before going to England the Legionnaires visited Belgium and were warmly received by King Albert and Queen Elizabeth.

Popularity of Legume Crops

Accounted for by Depth to Which Roots Penetrate Soil in Building.

Popularity of sweet clover and alfalfa for use as soil builders can be accounted for by the depth to which their roots penetrate the soil, says H. A. Lunt, of the soils and crops department, college of agriculture, University of Illinois.

"Measurements made on the Hartsburg experiment field of the college showed that the maximum depth of roots of various legumes in the fall following spring planting were: Common sweet clover 34 inches, alfalfa 30 inches, Grundy county sweet clover 23 inches, red clover 22 inches, alsike 16 inches, dalea 10 inches, lupinus 9 inches and Korean lespedeza 8 inches."

Two Other Requirements.

Vigorous growth and thorough inoculation with the proper bacteria are two other requirements which, along with deep root penetration, must be met by a legume that is to be used for building up the soil. Lunt pointed out. Responsibility for the last point, that of inoculation, rests upon the farmer himself, rather than upon the legume. The soils may or may not be already inoculated. If not, the farmer must supply the bacteria. If the nitrogen fixing property of the legume is to be utilized,

"A legume that makes a vigorous growth will add more easily decomposable material to the soil when it is plowed under than will a legume that makes a small growth. The object is to incorporate into the soil as much material as possible which will decompose rapidly and leave in the soil considerable humus containing plant food elements for future crops.

Building Up Soil.

"For instance, a ton of legume hay, such as clover or alfalfa, when added to the soil is far more effective in building up the nitrogen and organic matter content of the soil than is an equal amount of straw or corn stalks. This is true because: (1) the legume contains five to six times as much nitrogen as does straw, and (2) there is a smaller loss of organic matter during the decomposition of the legume than there is in the case of straw or corn stalks.

"Deep root penetration is essential in order that the potential plant food in the subsoil may be brought nearer to the surface. Furthermore, deep roots probably are a factor in opening up the tighter subsoil, their roots when decomposed making the soil more porous and building up the organic matter content of the soil."

Build Up Bee Colonies

Before Winter Weather

The poor honey flow of the past season will mean weak colonies if the bees are not properly prepared for winter weather. Those young bees that will live through the winter and make up the colony next spring are being reared before the first killing frost, states L. Sams, beekeeping specialist in the North Carolina State college. Older bees will die during the cold weather and will be of little value to the colony and so anything that interferes with brood rearing during October will result in the colony being in poor condition for winter.

"The successful beekeeper, therefore, sees to it that each colony has a good, prolific queen," says Mr. Sams. "A queen that has been reared during the past season is preferable. There should also be enough work or bees to care for four or five combs of brood. Each colony needs to have at least 20 pounds of honey so that brood rearing will not be restricted for lack of stores and extra room should be added for the storage of nectar in those sections where there is a fall flow of honey. When these conditions have been met, the bees will see to it that enough young bees are reared to winter the colonies."

Agricultural Items

Good seed is good crop insurance.

Lime and legumes are the best friends.

A farmer reaps what he sows. Plant out with wheat and you will reap the same.

The character of the people determines more than anything else the progress of the community.

Farmers who aim for the bull's-eye in their farming methods are the ones who will come out with a high score.

Lime does the same thing for soil that sugar does for a cup of coffee—sweetens or corrects the acidity of the soil.

The wise farmer is usually prepared for a corn crop failure. His silo will run into silage either a crop killed by drought or a green crop that can't be stored.

One of the best green podded beans is the Stringless Green Pod Bifurcated, an improvement over the old Red Eye, yielding as well and being a stringless variety—as not all the stringless beans are.

"Sanitary" Pigs Top Southern Market

Parasite Control in Animals Almost Complete.

(Prepared by the United States Department of Agriculture.)

The system of swine sanitation developed by the United States Department of Agriculture in Illinois is now being used successfully in Georgia, according to Dr. E. M. Nighbert, federal specialist in swine-parasite investigations, stationed at Moultrie, Ga. One five stock owner recently marketed his second crop of pigs raised under the swine-sanitation plan. Ten pigs, approximately six months old and averaging close to 200 pounds in weight, topped the market.

The system of raising the pigs involves methods which control infestation from parasite worms. Tests showed that the parasite control in the pigs marketed was almost complete, which accounts largely for their healthy condition from time of birthing to the finishing and marketing date. The system of swine sanitation has also stimulated interest in pure-bred breeding stock. When parasites are effectively controlled, the superiority of well-bred live stock over inferior kinds is so apparent that progressive swine owners quickly improve their herds.

Farm Machinery Outlay

Makes Care Important

The average farm carries an investment of about \$800 worth of implements and machinery. It has been found by many farmers that there is profit on time spent in caring for machines representing so large an outlay.

By this time of year most of the field implements have been put under cover, if they are going to be housed at all. Whatever remains outside contributes to the enormous annual loss of machinery due to water and rust.

Good care is the factor which lets one farmer get twice as much use from equipment as another does.

A few essentials in making machinery last until it wears out return a substantial profit to the farmer. For this reason the provident man keeps his implements under a tight roof when they are not in use. During the winter all surfaces are protected with oil or paint and thus the machine is kept ready for use next season.

Very often a field implement needs some repair or adjustment before it will be ready for another season. One of the most effective systems devised for taking care of such jobs is to tag the part needing attention. Then, during some slack period in winter, the actual repairing is done. Tagging eliminates the need of remembering jobs which so often ends in their being forgotten.

Fire Useful to Destroy Weed and Insect Pests

To destroy weeds at this time is the most effective way to prevent heavy infestations next year, says Charles F. Rogers, deputy Colorado state entomologist for weed control.

Weeds that have been cut should be partly dried before they are raked into piles. Later when they are burned, care should be taken that no seeds or stems are left unburned. There is another and less obvious way to be served in burning weeds in the fall. Many insects are harbored over winter in the stems of weeds. Where weeds are mowing in the late summer or early fall, insects will be plentiful the next season in such weed-free areas, because they lack winter quarters and because many of them will be killed when the plants are burned.

Weeds in waste places and along ditch banks are the most common "winter resorts" for insects. The use of fire in these places is almost the only way to control both weed and insect pests at once.

Bright Green Alfalfa

Hay Is Equal to Meal

In an Ohio pig-feeding experiment bright green alfalfa hay fed in a rack proved fully equal to alfalfa meal in rate and economy of gain. One lot of 103-pound pigs was fed corn, tankage, salt, limestone, linseed meal, and alfalfa meal. The pigs gained 121 pounds daily, consumed 385.7 pounds of feed per hundred pounds of gain, at a cost of \$5.87. The pigs consumed 13.6 pounds of alfalfa meal for each 100 pounds gain. Another lot of pigs had the same feeds except that alfalfa hay fed in racks was substituted for the alfalfa meal. These pigs gained 132 pounds daily, consumed 362.2 pounds of feed for each 100 pounds gain at a cost of \$5.58. The pigs consumed 27.4 pounds of alfalfa hay for each hundred pounds gain. The difference in the quantity of alfalfa consumed made only 1.8 pounds difference in the amount of tankage and linseed meal consumed.

Sweet Clover Pasture

"During recent years in many parts of Canada and the United States, sweet clover is being recommended to solve pasture difficulties. Undoubtedly this crop has proven a boon on many occasions and apparently has many desirable qualities. There are some serious drawbacks to its use, chief of which is its bitterness. If stock can be induced to eat it, before it becomes too coarse its abundant growth provides a large carrying capacity.

Pilgrims Go to Palestine

In connection with the war memorial unveiling in Jerusalem a large party of pilgrims is journeying on a modern pilgrimage to that city. The war graves and battlefields of Palestine and Egypt are included in the itinerary, and all places of Biblical interest around Jerusalem will be seen. The stop there has been limited to coincide with the unveiling of the memorial by Lord Allenby. The party will visit the pyramids and Cairo, and later will stop at Rhodes, Crete, Cyprus, Malta, Naples and other places of interest.

Keep Stomach and Bowels Right

By giving baby the harmless, purely vegetable, infant and children's regulator, MRS. WINSLOW'S SYRUP brings assimilating, gratifying results in making baby's stomach digest food and bowels move as they should at all times. Guaranteed free from narcotics, opiates, alcohol and all harmful ingredients. Safe and satisfactory.

Some One at the Door

"It sounds as if some one was coming for lunch," said Mrs. Maude Newfield, San Francisco woman, to her husband, as she started to the door. The guest was a big steam roller. It had run wild three blocks down a hill to the Seefeld home, and finding the door not open, the guest smashed the front of the house, splintered a partition, knocked down the hostess, and almost demolished the place. There may have been a time when home was a safe place, but that was before man began scowling around in seamy-ton trunks and three-ton airplanes.—Copper's Weekly.

People will promise a great deal to get rid of an annoying person.

RIGHT LIVING IS 90% RIGHT EATING

Eat right, if you wish to live long, prosper and enjoy life to the very limit. You don't have to go on a restricted diet or eat things you do not care for. There are scores and scores of delicious, healthful, nourishing foods that can be made with Calumet Baking Powder. Foods that you will relish. That are rich with body and vigor building elements of the highest value. Eat your way to health. Let Calumet help you.

Color Interpretation in Styles

IF THERE is one thing more than another that the present styles excel in, it is color interpretation. Especially are the new wools enchantingly colorful. Bordered fabrics which feature ombre stripes are among the cutting wools which court favor for daytime modes.

A very charming adaptation of ombre-striped wool poplin is presented in this illustration. In this two-piece model the border stripes are arranged as a border the blouse about the hips, and the skirt at the hemline. The blouse is also prettily trimmed with stripes and the tie of self-material carries the color scheme also. The solid portion of the original frock here pictured is in beige, the bordering carried out in tones of brown. This attractive material is also featured in beige with green striping.

The two-piece styling is becoming almost standardized for sportswear.

Simple blouse and plaited skirt construction as here pictured is outstanding. Some of the smart new blouses specialize on diagonal frontings. In fact the surplus movement is becoming more and more pronounced.

A distinguishing feature of many an autumn two-piece costume is the fact of the blouse being a novelty woven, posed over a skirt in solid coloring.

Lightweight woolsens for frocks are in the foreground of the autumn mode. An interesting entrant into the realm of smart fabrics is wool crepe. Wool georgette is also a popular theme with the couture of Paris. Both of these fabrics give excellent service, and possess delightful wearing qualities for the schoolgirl.

Among woolsens stressed for the making of the millitairian dress, one seen considerably navy reps. It shows up handsomely stitched with red. One gets satisfaction out of its excellent wearing qualities as well as delight, in that it does not retain dust and lint.

Kasha is another favorite cloth, being especially popular in beige and brown shades. Novelty stripes are prominently featured in kasha.

Smart daytime ensembles use kasha for the dress, also for the lining of a matching velveteen coat.

Half-colored imported fabrics shed glory upon the daytime mode. For the three-piece ensemble they are advantageously used in the making of the blouse, the skirt and jacket being fashioned of a blended solid coloring.

JULIA BOTTOMLEY.
(©, 1927, Western Newspaper Union.)

Pickled Beets

Pickled beets, which contain a high proportion of vinegar, are easy to can and may be processed in the water-bath canner. For pickling, select young tender beets of uniform size; cook and peel them, and pack in a mixture of hot vinegar and brown sugar in the containers. Process the pickled beets in the water bath for 30 minutes. Beets canned without vinegar should be processed in the steam-pressure canner at 240 degrees F. for 40 minutes if packed in quart glass jars, or for 35 minutes if in pint glass jars or No. 2 and No. 3 tin cans.

Timely Hints

Vegetables canned are an "ounce of prevention" against monotonous winter meals.

A good bread pudding is better and more nutritious than many higher-priced desserts.

Fresh pineapple and strawberries make as good a beginning to a breakfast as an end to a dinner.

It isn't much more trouble to install a pump in the kitchen than in the back yard, but it means miles less walking in the course of a year.

Substitute whole wheat flour for half of the white flour the next time you make biscuits and get a new flavor that is as delicious as it is wholesome.

Fitting the Dress

Using a Skirt Gauge in Fitting a One-Piece Dress.

(Prepared by the United States Department of Agriculture.)

The points on which attention is centered in fitting a one-piece dress are the shoulders, the under-arm seams, the sleeves, the neck, and the hemline. Any decorative features must be planned with care so that they are of the right size to harmonize with the entire costume and the build of the wearer, and they must be located with reference to the other lines of the garment as well as to their use. For example, the length of the front opening, or the depth of set-in plaited sections, or the size and position of pockets, are matters to be decided for each individual.

Shoulder Seam Acts as Anchor.

A properly placed shoulder seam acts as an anchor to a well-fitted garment. It influences the set of the waist and sleeves and the hang of the skirt. Therefore it should be located most carefully, and the shoulders should be the first part fitted.

The under-arm seam in a one-piece dress should be perpendicular to the floor. If it tilts backward or forward, the back or the front of the dress will swing out correspondingly at the bottom. Sometimes this defect is corrected by taking darts in the front section below the armhole and at the hip line, and sometimes it may be necessary to raise the back of the dress at the shoulders and trim out the armhole, rather than to turn up the hem at points where the bottom seems to sag.

When ready to turn up the hem it helps to place the dress on a form on a table, so that the fitter can measure the distance accurately to the level surface of the table. If a dress is to have a belt, a tape-line or other means of confining the waistfulness it should be correctly placed on the form before measurements from the floor are begun, or the finished dress will be shorter than was intended and possibly uneven. A rigid skirt gauge is a help, either one made especially for the purpose or a ruler, but not a tape measure. The height of the skirt from the floor is partly a matter of the height, weight and figure of the person who is to wear the garment and partly a matter of the dress's styles.

Basting, Stitching and Pressing.

Accurate basting and stitching and careful pressing are essential in a well-fitted garment. Stitching must follow near enough to the line of basting that the size of the garment will not be altered. Press each seam as it is finished, especially when working with silk or wool materials. One final pressing will not produce the same results. Turn the shoulder and underarm seams toward the front if they are not pressed open. Turn the armhole seam and shoulder darts toward the neck. Many other fine points about fitting and making a dress will be found in Farmers' Bulletin 1530-F, "Fitting Dresses and Blouses," which may be obtained by writing to the United States Department of Agriculture at Washington, D. C.

Current Wit and Humor

HARD TO CHOOSE

Once there was a woman who had three suitors. She didn't know which one to marry. One was a grocer, one a doctor, and one a preacher.

If she married the grocer, she could get her groceries for nothing.

If she married the doctor, she could be well for nothing.

If she married the preacher she could be good for nothing.—Progressive Grocer.

MAKING SURE

"The cook says she is going to leave."

"Nothing will change her mind?"

"Nothing."

"All right. Then I'll go down to the kitchen and discharge her."

Hymn of Hate

A guy I hate
Is Johnny Nash.
Quotes: "He who steals
My nurse steals trash."

A Variation

Mr. Billyuns—So you are giving my wife painting lessons? What sort of a pupil is she?

Artist—I find her very apt to say the least.

Mr. Billyuns—That's queer! I always find her very apt to say the most.

It Should, but—

Father was having a round of golf with a friend and little Joan came along with mother to look on.

After watching her daddy on the green for some time, Joan asked:

"Mustn't the ball go into that little hole, mummy?"—Boston Post.

Catty

"My husband," she said, "always wants me to look my best, no matter what it costs."

"Why?" her friend replied, "one can hardly blame him for feeling as he does."—Boston Transcript.

Following Precedent

"Why is it a man always has to wait for a woman?"

"Did not Adam have to wait until Eve was made up?"

ANY GOOSE CAN DO THAT

Speaker (emphatically)—"You can't produce eggs without hens!" Boy in Audience—"Aw, any goose knows how to do that!"

Good By, Jack

He wagged on a pony
That likes a dusty track;
But the rain came down in torrents—
"Twas good-by to his Jack.

Save the Pieces

"What a pretty name your maid has!" remarked the visitor.

"Oh, that isn't her real name," was the reply; "we call her 'Dawn' because she's always breaking!"—Congregationalist.

A Traitor

Interviewer—What do you think of the voter who casts his vote for the one he thinks is the best man?

Politician—He's a traitor to our party!—Vancouver Province.

Worse Than Pining

"Is this rich young widow pining for her husband?"

"Not exactly, but from the way she is making his money fly, it might be said that she is wasting away."—Boston Transcript.

Question

Wife—Did you miss me while I was away?

Hubby—Yes, I'd often feel homesick. But I'd look at your photograph and I wouldn't feel homesick any more.

The Traffic Officer

It's a safe bet that the cars which step-out with the "go" signal are equipped with Champions—the better spark plug. If every car owner used Champions there would be fewer traffic jams.

Champion is the better spark plug because of its double-ribbed filament core—its two-piece construction and its special analysis electrodes.

CHAMPION Spark Plugs

TOLEDO, OHIO
[For your protection be sure the Champions you buy are in the original Champion cartons.]

His Discovery

Kerzog—I found out this morning that four of my most devoted friends were broke.

Ziggshy—How did you find out?

Kerzog—Oh, I tried to borrow a few dollars, you know.—New Bedford Standard.

Date and Nut Cake.

1 lb. nut meats, 1 lb. dates, 5 eggs, 2 C. sugar, 2 C. flour, 2 level tsp. Cinnamon Baking Powder, 1 level tsp. salt, 2 tsp. vanilla.

Mix nuts, sugar, dates and thoroughly beaten egg yolks. Stir flour, baking powder and salt together several times and add to the above mixture. After this is thoroughly mixed, fold in stiffly beaten whites and flavoring. Bake in steam pressure cooker or oven the same as any fruit cake.

Plants Containing Sugar

It is an interesting fact that sugar exists not only in the cane, beet-root and maple, but also in the sap of about one hundred and ninety other plants and trees.

Silk Stockings

Kiddies' Bedtime Story

By MARY GRAHAM BONNER

Ada was six and a half years old. She had dark hair and gray eyes, and her arms and legs and mouth and nose and ears were much like those of her friends if you were trying to describe them, though Ada really didn't look much like any one.

Nothing had ever happened in Ada's life that was interesting to other people. That seemed too bad, for so much had happened in Ada's life that was extremely interesting to herself.

There were all the games she liked to play, and the people she loved seeing and all the places she enjoyed visiting, and around all of these there were most delightful happenings.

But alas, only to herself. Sometimes she thought of something she might do that would make others notice her; for example, she thought of fainting away.

That would certainly make people pay attention to her. She had heard that if you put wet blotting paper in your shoes you would faint away.

She tried it once. But she hadn't fainted.

She had only felt uncomfortable with the wet crumbling blotting paper next to the soles of her stockings.

And when her mother had discovered her wet stockings she had merely been punished and there was no fun in that.

It was a pity the way families had of always discovering wet feet.

Now, who in the world would think of discovering wet feet when the shoes weren't wet, and when the wetness wasn't in plain sight? And yet they could.

It was certainly a pity.

So she thought she would have to go off somewhere and have very wonderful adventures. The more she thought about it the more she liked the idea.

She began thinking of those who would like adventures, too.

There was Angelina Adorable, her beloved doll.

There was Teddy, her brother.

There was Grandma.

There was the clock that struck so cheerily down on the dining-room sideboard.

There was Crystal, her little sister.

There was Conky, the cook, who could make such delicious things, but who might be a bit too cranky for adventures.

There was Mr. Applecore, who sold sweets and candies and biscuits.

He would give them things to eat—

Her Mother Had Discovered Her Wet Stockings.

If they gave him money in return. There was Nip, the lame chicken.

There was Mrs. Cackle, the brown hen. She could never leave her pets behind.

There was Peter Murray, the fox terrier dog.

There was Saucy Susy, the friendly cow.

There was Mr. Todd, the gardener.

There was Joe-Joe, Crystal's beloved woolly lamb.

And there were friends, too. But most important of all was the fact that really and truly Ada should have adventures.

(Copyright.)

Curtains for Double Windows

(Prepared by the United States Department of Agriculture.)

Two or more living-room windows placed in a group are usually curtained as one unit. Depending on the height of the ceiling, and the appearance of breadth given by the group as a whole, they may have only enough side draperies to give the effect of a frame for the whole group, connected by a valance at the top of the window, or there may be a separate pair of side draperies at each window. In the latter case only one valance would be used, extending from side to side of the group. Great care would be necessary to see that the repetition of vertical lines in using individual hangings for each win-

dow in a large group did not become monotonous or distort the lines of the entire room.

Making Corned Beef Hash

A good many people do not know exactly how to make an appetizing corned beef hash. There are several "tricks" to it, according to the bureau of home economics. One is having about equal amounts of cooked meat and potato. Another is in grinding the meat and potato together. A third point is in flavoring with a little minced onion and a dash of cayenne pepper for piquancy. Generally there is enough salt in corned beef to season the mixture.

SEASONABLE RECIPES

By NELLIE MAXWELL

Can we know too much about the delicious nut which comes so sweet and meaty to us in the glossy brown skin after Jack Frost has pinched their burrs? There are so many ways of serving them that the recipes might well fill a book.

Chestnuts With Brown Sauce.—Here is a dish that will enhance any meat dish, or in fact any vegetable.

First remove the shell and cover a pint of chestnuts with boiling water. Blanch fifteen minutes, then peel off the brown skin. Now cover the nuts with boiling stock and cook until they are soft enough to pierce with a fork. When done drain and save the stock in which they were boiled. Put one

tablespoonful of butter into a frying pan, add one tablespoonful of flour and mix until smooth and brown. Then add a cupful of the stock in which the nuts were cooked, stir until smooth, add salt and pepper to taste, pour over the chestnuts and serve.

Sweet Pickled Chestnuts.—This is a delicious condiment: Take seven pounds of chestnuts from which the shells and skins have been removed, to three pounds of sugar. Pack the uncooked chestnuts in jars. Boil the sugar in sufficient vinegar to fill the jars, making allowance for waste in boiling. If the vinegar is very strong dilute it with a little water. When the sugar and vinegar have come to a boil, pour over the chestnuts and let stand twenty-four hours. Repeat this for three days.

Chestnut Patties.—After boiling and blanching a pint of chestnuts, add one-half cupful of cream to two rounded tablespoonfuls of butter, one and one-half cupfuls of milk, two well-beaten eggs, one-fourth cupful of sugar and salt to season. Pour into patties tins and bake quickly.

Marrons Glace.—We find these now in our best shops and they are well worth the price asked for them: Shell and blanch the nuts and thoroughly dry them. Boil until not too tender. When cool insert a toothpick in each nut. To make the glaze put one pound of granulated sugar and one scant cupful of water in a saucepan and let stand until the sugar is dissolved. Set over the heat where it may boil without stirring or jarring. When bubbles begin to look heavy, drop a teaspoonful of the syrup into a cupful of cold water. If it is brittle and makes a clicking sound, add two tablespoonfuls of vinegar and lift at once from the fire. Set the pan in hot water and dip the chestnuts one by one into the syrup. Remove the toothpicks and place on oiled paper to harden. If the glaze is not good, dip again.

THE SEWING CORNER

(Prepared by the United States Department of Agriculture.)

While it is not always possible to devote an entire room especially to sewing, during the period in the fall and spring when sewing is done in sunny houses, on an extensive scale. It is a good idea to arrange at least a corner of a convenient room for this work. There should be a good light, to begin with, and space enough should be planned so that partly finished garments on the dress form or on hangers may be left as they are from one sewing period to the next. Having a nearby closet with plenty of shelves, or a roomy chest of drawers in which to keep materials, findings and incomplete work also is an aid to orderly and rapid dressmaking.

All sewing tools, including the sewing machine, should be in good order before the beginning of that busy season just preceding the opening of school and college. Some of the supplies to be checked up are: Sharp scissors, accurate tape line, plenty of pins, needles, threads and sewing silk of different sizes, elastic, tape, dress shields, bolting, bias binding and other materials you are in the habit of using. If you are making any underwear requiring buttons, keep a supply of common size on hand. Pro-

vide a few extra buttons if possible for any garments subjected to ordinary laundering, for the washer often takes its toll.

Make a plain foundation pattern to

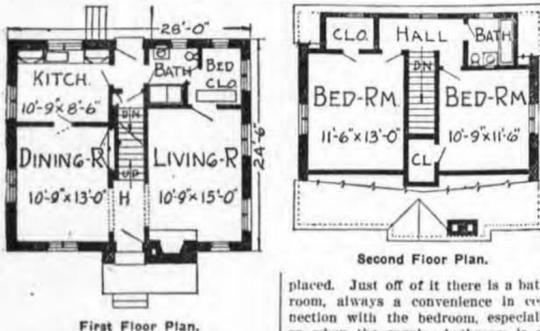

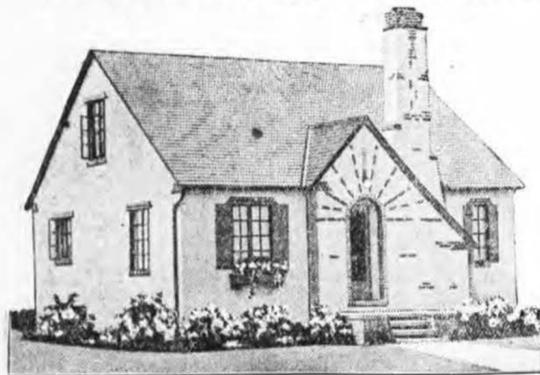

Set Machine Near Light.

keep on hand for each member of the family whose clothes you are accustomed to make. The bureau of home economics will give you help in doing this if you write to the Department of Agriculture.

Handsome Stucco Cottage Gives Six-Room Efficiency in Five-Room House

By W. A. RADFORD
Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1327 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

Here is a cozy little stucco house of five rooms but offering all the convenience and efficiency of a six-room house. This is accomplished by the fact that there is a bed-closet provided off the living room. During the day a bed is concealed in this bed-closet, but at night it may be rolled or swung out into the living room to convert that room to a different, nighttime function.

This bed-closet is also large enough to serve as a dressing closet where a dresser or chest of drawers may be

placed. Just off of it there is a bathroom, always a convenience in connection with the bedroom, especially so when the regular bathroom is on the floor above. This bathroom is also a convenience to the lady of the house, for whom it will save many tiring trips up and downstairs during the course of the day.

In addition to these special features, the first floor contains a living room of ample proportions, made homelike by an open fireplace, a dining room and a kitchen of the compact modern type which eliminates many steps in the preparation and serving of the meals.

Above the stairs this story and a half house affords space for two bedrooms of ample proportion, in the two gables, and also a bathroom. Both of the bedrooms have large closets of the sort which are a delight to every woman.

As for the exterior of this house, it is highly effective in its simple lines, attractively tinted stucco coat, the decorative brick of entrance and chimney, and its charming, shuttered casement windows.

Woodwork in Home Now Painted in Light Color

The increasing attention which is being given to interior decoration has come with a fuller appreciation of the value of attractive surroundings.

Cheerful interiors are the rule for modern homes with their light backgrounds and gay decorations. The most artistic effects are achieved through attractively combined settings and furnishings. Each detail is necessary to a perfect whole. No one of these makes a more important contribution than woodwork.

The day of cheap imitations is happily past. At one time it was unusual to attempt to make birch look like mahogany or gum like walnut. But this practice has been replaced with an effort to enhance natural beauty. Thus a natural or a stain finish is now given to gumwood, redwood, cedar, mahogany, walnut, oak, cherry, rosewood, or chestnut. In some cases, however, when the wood has not been carefully selected for grain, figure and color, one will be left with no choice, as only paint or enamel can cover up these defects.

Any type of wood may be painted or enameled, but of course there is no object in selecting the rarer and more expensive kinds for this purpose. Pine, spruce, cottonwood, cypress and redwood are commonly used where such a finish is desired.

If you are fortunate enough to have a hardwood trim several interesting effects may be had—a weathered or silvered finish, for instance, is quite easy to produce.

The wood should be coated with a light brown stain that has been grayed slightly by the addition of a black stain, and when quite dry, treated with a coat of paste filler which has had either white or aluminum paint added to it in generous quantity. When this has been allowed to set for half an hour or so the wood should be wiped across the grain. After 12 hours the surface may be varnished or waxed or rubbed. Or a quite different and very artistic effect may be had by the use of stain and contrasting color in the filler over hardwood. These finishes are especially attractive for dining rooms.

Painted woodwork is gaining increasing popularity with the growing demand for cheerful and colorful interiors, and many combinations are now accepted which were formerly held quite unconventional. Jade green woodwork with light buff walls, burnt orange with blue gray, Chinese gold with French blue, and the like. Stippled finishes, too, offer an attractive variation.

A thin glaze coat of contrasting color is applied after the three usual ground coats are entirely dry, and stippled with a large stippling brush. Light buff with olive green, white

with orange, Venetian red with mahogany, golden oak with very dark blue, or silver with blue-black, are artistic combinations for this purpose.

Due to the extreme thinness of the color glaze the durability of these finishes will be greatly increased if a coat of varnish is applied. In fact, varnish is very desirable to preserve woodwork painted in any manner.

In planning your interior let the woodwork be distinctive but not obtrusive. It should be as a frame for a picture, conservative enough to be secondary to the object which it frames, yet handsome enough to enhance the whole.

Shades Play Important Part in Home Beauty

The importance of the part which windows play in making or marrying the beauty of a home cannot be overestimated.

And yet many housewives will spend time, thought and money in choosing beautiful draperies and then spoil their appearance by placing them next to ugly shades. It was believed at one time that the window shade was a necessary evil, the ugliness of which must be tolerated for the sake of its usefulness.

But the worst of it was that they were not durable. They cracked and faded from rain or sun, and soiled so quickly that constant replacements were necessary.

With the new materials on the market every home owner can now have shades which are beautiful, which harmonize with and augment the decorations, and at the same time are strong enough to withstand the roughest usage. The fact that up-to-date shades are made without "filling" increases their durability and the wide range of colors available adapts them to any home.

Daylight Lamps Save One From Eyestrain

People whose eyes tire easily should try daylight lamps, according to the bureau of standards at Washington. The bureau has made certain observations which lead it to conclude that some individuals need this particular type of lamp for light reading and that if many are of this type "it is apparent there would be a great field of usefulness for artificial daylight in increasing human happiness and efficiency."

Mortar Color in Walls

Every builder accepts the fact that the color of brick adds much to the appearance of the home—but there are a few who still fail to realize mortar and its color affect the appearance of the wall almost as much as the brick. One-fifth of the wall is mortar. Why neglect its color?

"For Sale or Exchange"

By JANE OSBORN

(Copyright.)

REMODELED farmhouse, in perfect condition—For Sale or Exchange." Sally Humphrey read the sign thus worded as she spun along the highway one midsummer's day. An arrow on the sign pointed away from the highway up a hillside lane and, as Sally's eyes quickly followed the direction of the arrow, she saw a low-roofed little house peeping from the side of a knoll of oak trees on the hill. She and her roadster had been steadily mounting since she left home an hour and a half before, and there was a welcome freshness about the air that had made her wish that she might spend long days in this hill country.

Since Sally had left art school she had devoted her talents to the decoration of lampshades and dinner cards. When Sally's old aunt had died six months ago, just after Sally had left off her art studies, she had found herself possessed of a rather small but very solid red brick house as her home even though it was placarded with the enormous "For Sale" sign.

Apparently no one wanted to buy the house, for so far there hadn't been a nibble. But there, up that hill with the red arrow pointing to it, was just the house she wanted. With her car she could get away from the city occasionally now—now she was driving over hills and down dales to get mountain laurel which she needed to eoply in decorating some shades that had been ordered. Sometimes she went in her car far out in the country where she might catch little glimpses of woodland scenery that would do for her place cards.

With the laurel stowed in the back of her car Sally was coming back an hour later and, still remembering the charming little house, she drove slowly when she came to the sign. "Or exchange"—that was the part of the sign that took her eye now. She drove up to the roadside, stopped her car and got out. Of course there wasn't a chance that the owner would like to exchange this lovely country house for her red brick city place, but she would be safe in asking. Sally walked up two hundred feet or more to the house on the little hill.

That was when she saw David Gage for the first time—Doctor Gage, in spite of his youthful looks and not very professional manner. She said she had called to see about the house—and the young man asked her to sit down and told her that he was very glad he happened to be in.

"It was the real estate agent who put the sign up. I wouldn't have said the house was in perfect condition, and it is only partly remodeled."

But whatever shortcomings the little house may have had they did not displease Sally. "Now I'll tell you what I have to offer," said Sally after their tour of inspection. "You probably wouldn't be interested—"

"I wouldn't unless it is something in a city or big town—preferably in a busy, congested neighborhood."

"That is just what it is," said Sally. "It is in Malford—once a nice quiet neighborhood but now, I'm bound to admit, in a rather crowded section."

Then David explained that he had just completed his work as interne at a hospital, and that he was about to start out on his career as a general practitioner of medicine. Alone in the world, he had spent practically all he possessed in completing his education—until some months before an old uncle had died leaving him this house. He had hoped to sell it and with what he got pay something down on a house where he could begin his career as a doctor. No use trying to get enough patients there in the country. But no one had wanted to buy it—so the agent had suggested the possibility of an exchange.

That very afternoon Sally drove David back to see her little house, and the next day she came back to the country house. Then David came back to see the little house in the city—there was much to talk about and consider even before going to the real estate agent for the terms of the exchange. And as David saw and admired the tastefully furnished little house in the city Sally saw new charms about it, and as she praised the little country house David began to wonder whether he would really be content to sell it.

There were several more meetings when Sally and David told each other far more about themselves than would have been appropriate under any other circumstances.

Then a week later, when David was drinking tea at Sally's, Sally began to waver. She had spent a lot of time furnishing the little house—after all, it had belonged to her own people—maybe she oughtn't to sell it after all. "I want to live there in the country—yet it breaks my heart to leave this place."

David suddenly looked embarrassed. Then he laid his tea cup on the tea table and moved his chair near to Sally's.

"Why shouldn't we both keep both houses?" he said. "I think it might be done—I've been thinking, hoping. I hope you won't think I am conceited even to think that you might ever be interested in me."

"I'm interested now," said Sally; "and now we'll have a town house and a country house and a car—a little money and enough coming in from the lampshades to keep going."

And so it was agreed.

Improved Uniform International Sunday School Lesson

(By REV. P. R. FITZPATRICK, D.D., Dean Moody Bible Institute of Chicago.)
(©, 1927, by Western Newspaper Union.)

Lesson for October 16

ELIJAH IN NABOTH'S VINEYARD

LESSON TEXT—1 Kings 21.
GOLDEN TEXT—Be sure your sin will find you out.
PRIMARY TOPIC—Elijah's Message to a Wicked King.
JUNIOR TOPIC—The Wages of Sin.
INTERMEDIATE AND SENIOR TOPIC—The Rebuke of Wrong.
YOUNG PEOPLE AND ADULT TOPIC—Opposing Official Corruption.

I. Ahab Covets Naboth's Vineyard (v. 1-6).

1. Location of the vineyard (v. 1). It joined Ahab's summer home in Jezreel. He wanted to transform it into an herb garden and thus round out his property.

2. Ahab's proposal (v. 2). He offered to buy it outright for money, or give in exchange a better one.

3. Naboth's refusal (v. 3). He had a twofold reason: (1) regard for the paternal estate; (2) obedience to God's law (Lev. 25:23-28, cf. Num. 36:7-9). It doubtless would have been profitable to Naboth to have sold his vineyard, but loyalty to God was more important to him than money.

4. Ahab's behavior (v. 4). He came into his house, lay down upon his bed and refused to eat. The king was sulking like a spoiled child.

5. Jezebel's inquiry (vv. 5, 6). Apparently she came with the sympathy of a wife, inquiring as to the cause of his behavior. But when she knew of Naboth's refusal she was angry.

II. Ahab Taking Possession of Naboth's Vineyard (vv. 7-16).

1. Jezebel's treachery (vv. 7-15). (1) Her contemptuous question (v. 7). She taunted him for his cowardice. The fear of being thought weak moves a weak man quickly. Scorn is a powerful weapon in the hands of unscrupulous persons.

(2) Her exhortation to Ahab (v. 7). "Arise and eat bread, and let thine heart be merry." A wife has great influence over her husband. Many a man has been saved from discouragement and therefore defeat through his wife's influence. Unfortunately in this case the influence of the wife was bad.

(3) Her promise to Ahab (v. 7). "I will give thee the vineyard of Naboth."

(4) Her wicked scheme (vv. 8-15). She wrote letters in Ahab's name, sealed them with his seal, and sent them to the elders and nobles who were dwelling in the city with Naboth, asking them to proclaim a fast, as though some great calamity had befallen the nation, and place Naboth before the public as the one who was the cause of it all. They were instructed to find two false witnesses who would testify against Naboth. The charge they brought was blasphemy against God and the king. Naboth's only offense was his refusal to sell his estate. When they had thus stoned Naboth and his sons to death (2 Kings 9:26), they came and told Jezebel, who in turn came to Ahab with the information and directed him to take possession of the vineyard. It was the custom for the property of those who were condemned to death for blasphemy to revert to the king.

2. Ahab goes to Jezreel to take possession of Naboth's vineyard (v. 16). Ahab had not killed Naboth, but he eagerly accepted the prize without inquiring as to how it was secured. Many today are like Ahab, too cowardly to commit wrong themselves, but are willing to reap the benefits of the wrongdoing of others.

III. Elijah in Naboth's Vineyard, Announcing Doom Upon Ahab (vv. 17-28).

Elijah told him the dogs should lick his blood in the place where they licked the blood of Naboth. It would seem that Naboth's body was thrown out to be devoured by the dogs. Evil was to fall upon Ahab and his posterity, even to wipe out his seed and name. Ahab stood in that vineyard guilty of all the sins which Jezebel had committed, though he had been silent and inactive. God held him responsible for Jezebel's acts, for he was king and head of the nation. The day of reckoning did come to Ahab (1 Kings 22:38). Ahab's question to Elijah when confronted by him in the vineyard showed that his conscience was not wholly dead.

2. Doom upon Jezebel (vv. 23-26). She likewise should be eaten by the dogs by the wall of Jezreel. This was literally fulfilled (2 Kings 9:33-37): "Be sure your sin will find you out;" "Whatever a man soweth, that shall he also reap."

IV. Ahab's Repentance (vv. 27-29).

Because of this God promised to withhold judgment during his lifetime.

A New National Holiday?

STATUE OF THOMAS JEFFERSON

NEW national holiday will be added to the list of days officially recognized by the government for patriotic observance if congress heeds the recommendations made by the Thomas Jefferson Centennial commission at its meeting held in connection with the sessions of the Institute of Public Affairs at the University of Virginia, Charlottesville, recently. These recommendations were to celebrate April 13 each year as Jefferson's birthday, to assure the preservation of Monticello, the home of Jefferson, to establish an appropriate shrine in Washington where may be preserved records and relics connected with the adoption of the Declaration of American Independence and to continue the nonpartisan work of patriotic education conducted by the Thomas Jefferson Memorial foundation.

Thus the name of Thomas Jefferson, author of the Declaration of Independence and third President of the United States, would be immortalized along with that of Washington and Lincoln as the only Presidents whose birthdays are national holidays and Monticello would take its place with Mount Vernon and the house in Springfield, Ill., as a patriotic shrine. Although Jefferson is regarded as the "patron saint" of one of the two major political parties and the term "Jeffersonian democracy" is a part of our current speech, this proposal to honor him should have the support of all Americans because it is strictly nonpartisan. The officers of the commission, appointed under an act of congress, are: President Coolidge; Vice President Dawes; Nicholas Longworth, speaker of the house; George P. McLean (R.), senator from Connecticut; Joseph T. Robinson (D.), senator from Arkansas; Simon D. Fess (R.), senator from Ohio; Royal S. Copeland (D.), senator from New York; Finis J. Garrett (D.), representative from Tennessee; John Q. Tilson (R.), representative from Connecticut; R. Walton Moore (R.), representative from Virginia; Robert L. Bacon (R.), representative from New York; and Dr. Edwin A. Aldema; Claude G. Bowers; Mrs. Anthony Wayne Cook; Henry Ford; Stuart G. Gibbons; Thomas F. Ryan, and Felix M. Warburg.

Through the work of the Thomas Jefferson Memorial foundation Monticello is being gradually restored to its original condition and visitors there find it easy to believe that they are living in the past of more than a century ago. One aid especially in establishing that atmosphere is the large number of Jefferson relics which have been presented to the foundation within the last few months and which will be on exhibition at Monticello henceforth. The foundation recently made this announcement:

The original mahogany bedside, candle-table used for many years at Monticello and which originally belonged to James Randolph Jefferson, mother of Thomas Jefferson.

Thomas Jefferson's original writing and drafting desk used by him for many years at Monticello. This desk has a double top with a sliding board on the side and discloses a number of the ingenious features used by Thomas Jefferson in his design for the little desk on which he wrote the draft for the Declaration of Independence.

The following articles were donated by Miss Fanny M. Burke, of Alexandria, a descendant of Thomas Jefferson: Thomas Jefferson's paint box, used by him at Monticello, particularly for his architectural drawings. Many of these drawings are still preserved, as he is the father of American architecture.

Thomas Jefferson's ivory memorandum leaflet pads, a locker with Jefferson's hair, a number of personal trinkets, buttons, buckles, etc., and three pillows from Jefferson's bed, two of which were under his head when he died.

Mrs. Victor Kauffman, wife of the editor of the Washington Star, has donated three dining room chairs, formerly belonged to Jefferson, and she has delegated Mrs. Rose Gouverneur Hoos, of Washington, chairman of the Jefferson committee in that city and a descendant of James Monroe, to present the chairs in her behalf to Monticello.

In addition the foundation acknowledges presentation of a very unusual and interesting colored drawing of Monticello, made many years ago in France from the recollection of a visiting Frenchman. This drawing was purchased by and presented to the foundation by Mrs. Martin W. Littleton of New York city.

The foundation also acknowledges presentation of a handsome silk Virginia flag, presented to Monticello by the women's committee who had charge of the replica of the Jefferson house on High street at the Sesqui-centennial exposition in Philadelphia, of which committee Miss Caroline Binger was chairman, and which committee was represented by Miss Agnes Morrison and a delegation which formally delivered the flag to Monticello.

Of interest, too, to all Americans was the recent announcement by President Nicholas Murray Butler of Columbia university upon his return from Italy that he was bringing with him as a gift to the Columbia library a hitherto unpublished letter of Jefferson's. This letter, ordering a packet of books for Jefferson's private library, dated Monticello, April 19, 1821, and addressed to Messrs. De Bares Freres, Rue Serpente, Paris, gives an interesting and instructive view of the wide and varied range of Jefferson's intellectual activities and interests. The letter follows:

Monticello, April 19-21.
Messrs. de Bares Freres:
The packet of books you were so kind as to send me the last year came safely to hand, and I duly note the balance of \$37.48 to my debit. I now engage my friend, John Vaughan of Philadelphia to place 100 Dollars in Paris at your order, and request you to send me the books at the back hereof, or so many of them as the remittance will pay for, curtailing the catalogue at the end, so as to bring it within the limit of the remittance. It is arranged with a view of omitting those which I am the least anxious to possess, but retain in your hands the sum necessary to procure the Dion Cassius from Germany if not to be had nearer. Villiers in his "Etat de la Literature en Allemagne en 1807," pa. 23, says "le savant M. Fr. Guili. Sturm a publie en 1807, un "Dion Cassius" and a "catalogue de la Librairie Grec, Latine, Allemande," which I possess, announces it in these words: "Dionis Cassii Historiæ Romanæ, ad Sturmæ Lipsiæ in 8vo (sans presser) the title page of this catalogue being lost, I know not its date of time & place, but I suspect it to be German, and of the date of 1815, as I see articles of that date in it and none later. I must request your endeavor to procure this edition. Let the bindings be all solid and handsome."

I have seen announced a "Recueil et catalogue des edifies de tout genre, anciens et modernes par I. N. Durand & l'ecole Polytechnique," books of this kind are so often at extravagant prices, that one is afraid to ask them without knowing their price. If it does not cost more than 40. of 50. fr. and if more I pray you to write me the cost, that I may judge whether to put it into my next invoice, as I wish to get it if within reasonable bounds.

Be so good as to dispatch these books with as little delay as possible, that they may arrive before the storms of autumn or winter, and accept the assurance of my esteem & respect.

TH. JEFFERSON.

Doctor Butler's announcement led to the revelation by John Uri Lloyd, president of the Lloyd library in Cincinnati, that his library also had a hitherto unpublished Jefferson letter. The discovery of this letter came about in a dramatic manner. Several years ago the Lloyd library purchased in Paris the first volume of "North American Sylva" by F. Andre Michaux, a noted French traveler and botanist. When Miss Edith Wycoff, present curator of the library, was cataloguing the book, she discovered securely pasted in it a letter written by Jefferson to M. Michaux. This letter written eight years earlier than the Columbia letter as a token of esteem to the President's friend, in France, also reveals in a manner fully as interesting as the other communication one of the interests of the many-sided Jefferson, viz. his keen appreciation of any contribution to the existing scientific knowledge of the time. The text of the letter follows:

Monticello, Dec. 14, 1813.

Sir:

My interior situation among the mountains, and great distance from any seaport town, is extremely unfriendly to punctual correspondence with the other side of the Atlantic. Vessels bound to that quarter are generally gone before I learn their destination by the public papers. I have resorted from you, at different times, several librarians of your excellent work on the forest trees of America, to wit the 1st and 2nd sur les Pins et Sapins et sur les Chenes and the 8th and 10th on the Betula, Castanea, Fagus, Diospyros, etc. I have gone over them with great pleasure and received from them much information which had escaped my own notice, although the subjects lie under my eye. They contain a valuable addition to the knowledge of American trees and claim for you the thanks of all who interest themselves in this most interesting branch of science. I pray you to accept my portion of that tribute as being among those who set the highest value on your work.

I have not seen the work of M. Tessier, mentioned by you on the subject of the Marquis, but that race of sheep is multiplying among us most extensively. The general attention paid to them will soon render their wool an article of export, altho' our own manufactures are fast increasing also and will soon make us independent of England for manufacture of wool and cotton, as well as for many other articles. Besides the domestic benefit to be derived from this economy, the political advantage of weakening permanently a bitter and permanent enemy are of real importance. With every wish for the successful prosecution of the valuable labors you are engaged in be pleased to accept the assurance of my great respect and esteem.

TH. JEFFERSON.

New South American Nut

People of the United States are now buying small quantities from South America of which is known as a "paradise nut." It resembles a Brazil nut in shape, but is said to be a little finer in flavor. There is an interesting story told about this nut, which grows in a large round pod with a small cap at one end. As the story goes, the gas which forms in the pod after it has fallen to the ground forces the cap

with a loud report. This report attracts the monkeys, who then search for the nuts in the thick undergrowth, where they have been blown by the force of the explosion. This is given as the chief reason for the small supply of paradise nuts brought to our markets.

Proper Place to Look

During the moving a portrait of one of the ancestors of the Bledgett family had got lost. No one could find it at either the old or the new

house, and there was great consternation. William Blodgett, aged ten, was offered a "treat," value not announced, for any hint that would lead to the return of the missing grandfather.

At noon he came home from school breathless. "I think, mother," he said, "I think we can find grandfather's picture."

"Where?"

"Downtown. I saw a notice on a shop window and it said: 'Paintings restored within.'"

Safety

A safe auto driver keeps his hands on the wheel and his eyes on the road. A safe Christian keeps his hand on the Bible and his eyes on God.—T. C. H.

Men Marooned

STORY FROM THE START

Garth Guthrie, Canadian war veteran, having to live in the open on account of weakened lungs, is factor of a Hudson's Bay post at Elkwan. He came back from the conflict with a permanently scarred face, which he realizes cost him the love of his fiancée, Edith Falconer. Sir Charles Guthrie, his brother, is a millionaire war profiteer. With Etienne Savanne, half-breed, his firm friend, Garth meets Doctor Quarrier, geologist, and his sister Joan. Quarrier complains he has been robbed by a man known as "Laughing McDonald." At Elkwan an Indian girl, Ninda, tuberculosis victim, whom Garth has befriended, is dying. Joan, trained war nurse, cares for Ninda, but the girl dies. Three of McDonald's party visit Elkwan seeking to buy gun shells. From them Garth learns of evil talk among the Indians concerning him and Ninda. With Etienne's help Garth wins the friendship of Saul Souci, "medicine man" of the Crees, and gets his promise to persuade the Crees to take their furs to Elkwan instead of to McDonald. Garth is ambushed by Joe Mokoman, Ninda's reputed father. "Shot," Garth's aide-de-camp, saves him, and the Indian is taken, a prisoner, to Elkwan. Garth sends Mokoman to McDonald with a message of defiance, and the war is on.

CHAPTER VII—Continued

South of the Big Point shoals, the great Attawapiskat, carrying the drainage of a vast hinterland, debouched through two mouths, a wide delta, and, eight miles to the south, a single channel, the Lowaski. Snug in his tight little post above the delta of the upper mouth of the river, Graham, the factor, independent of the fox skins of Akimiski, waited for the rich trade from the interior to come to him. But some of the hunters trading at the post always wintered on the island and before he crossed in search of Saul, Guthrie wished to get the latest news from Albany and arrange for the dispatch of a dog-team, informing his chief of his crossing to the island. How far the crew of the schooner were prepared to go in the struggle for the trade, he had no means of knowing, but of their energy and daring there was no doubt. If Souci were successful and the free-traders attempted to interfere with the hunters crossing to Elkwan, there might be an ugly row. So the fast dog-team doubled back down the coast ice and before noon drew in to the high shore at Attawapiskat.

Graham looked up in surprise to see the tall figure of his neighbor to the north walk into the trade-room. Graham was old and waiting only for his service pension. His days with the dogs on the shore ice or inland over the white barriers were over. If McDonald were wintering on the island there would be little Akimiski fox traded at a Hudson's Bay post that year. Of that he was sure. He couldn't see how crossing to the island after the strait closed would help the matter. The schooner would get the Christmas trade and pick up the fur through the winter as it was trapped. It was hard on Elkwan, but he had his upriver trade. McDonald couldn't touch that. Thus Graham, who lacked but two years of retirement, and loved the comfort of his snug quarters.

"Well, what brings you here in thirty-below weather?" he replied to Guthrie's salutation. "I've been hugging a fire for a week, trying to thaw out."

Guthrie laughed. "I'm on my way to the island, Graham. I want you to relay this letter to Cameron."

"The island?" Graham gasped in surprise. "How—you mean the strait's closed—set over the shoals?"

"Yes!" And Guthrie hastily outlined the situation on Akimiski and his plans.

"You think Souci will control the Elkwan hunters? Why should they cross the ice to you when McDonald will pay more for their pelts?"

Guthrie's face reflected his irritation. "Graham, I'm employed to get fur—not smoke by the stove and wait for it to come in. As Cameron expects this letter and Christmas is only ten days away, I'll thank you to start a team with it at once."

The victim of Guthrie's sarcasm red-dened under the ruthless characterization of his sedentary tendencies, but his pension was near, and the risk of a dash over the young ice was Guthrie's, not his, so he magnanimously overlooked the thrust.

"I'll send a team, yes. If that's Cameron's orders. I'll say you're a fool, though, to cross. A good wind will break up that new ice and cut you off. It's never in my memory closed before January. Still, it's your job, not mine. Go ahead and get yourself drowned, if you want to."

"Some of your people winter there?"

"Oh, yes! Six or eight families. But I can't help that."

"No, you can't," agreed Guthrie, catching Etienne's furtive look. "Well,

we'll have just about light enough to cross in, so I'll start."

As the dogs hurried over the wind-brushed shell of the strait, broken by drifts and hummocks, split by tide cracks, irregular with crushed ice masses lifted into pressure ridges, the eyes of the men on the light sled were focused far out on what, the week before, had been impassable black water. Eight miles out, half way across, its drift ice, thrall to tide and wind, had threatened with swift ruin the eggshell of a canoe, which challenged its barrier. But now, over the shoals, the channel had been sealed. As the dog-team reached the newly frozen gap, Etienne and Guthrie went ahead to test the ice with axes. In defiance of the tide, the fierce frost had set three-inch ice. Anxiously the men swept the width of the channel with glasses. There were no breaks. So, led by the scampering aide-de-camp and Guthrie, with Etienne driving the huskies from the tail of the sled, they took the crossing on the run.

A half-mile out when fear of thin ice had left him and he swung along with Shot in front, Garth suddenly felt the ice vibrate beneath his moe-

Graham Looked Up in Surprise.

casins. The sled with the dogs would go through, unless they came with a rush. Turning as he ran, he waved to Etienne—their agreed-upon signal for speed.

"Marche! mes enfants!" The long caribou thong cracked on the lead dog's ears. With a surprised yelp Casor, spreading his feet, came with the team at a wild gallop. On they rushed, straining, slipping huskies, nails scratching the ice for footing, and swinging toboggan, urged on by Etienne, for a break through meant swift drowning for the dogs from the drag of the sled, and freezing in the stinging wind for the driver, if he reached firm ice.

A hundred yards of mad scramble and the second dog slipped, slid sideways, jerking the leader off his feet. The sled swung in a wide skid. Passing the his thrashing huskies on the run, Etienne called them to follow. Before the sled stopped its swing, the dogs were up and bawled on their master's heels. A hundred yards and they reached the heavier ice—minutes of suspense, and the lead was crossed.

The two friends gripped hands beside the panting dogs.

"Did you feel it?" cried Guthrie. "Thought I was going through! Felt like running on stretched canvas!"

"I saw it geeve undair you, and crack de wheep before you turn. We go too fast on that channel, and pout! We nevalre care eef McDonald Ha! Ha! get de fur or not, eh?"

Somewhere north of Big point in a valley sheltered by the tundra from the winds of the ice fields, the sons of old Souci had a base camp. But the Indian had given Garth no rendezvous in case he managed to cross the strait before Christmas, for Souci carried a roving commission, and his work lay where he found the Elkwan hunters. To Garth the island was unknown country, but Etienne had trapped there and they started up the shore ice, bound for the mouth of the Ptarmigan, a river which headed deep in the interior, confident of learning Souci's whereabouts from the first Indian they met. For news of the coming of the old chief to the island would be passed swiftly from hunter to hunter, valley to valley. And now the closing of the strait had greatly enhanced the value and importance of Souci's embassy to the Crees. Those loyal to the old company could cross for the New Year's feast at the post, bringing their pelts; those wavering in the direction of the trade goods of McDonald could not now meet Saul's appeals with the objection that a barrier of open water, running with tide, would crush their canoes. But the longer he dwelt on the attractions of the schooner at the cove, the less con-

fidant he grew of saving much of the fox trade. Few of the fickle Crees would resist the blandishments of the free-trader's agents. Then with a start he realized that he was ignoring the scheme the old chief had outlined to Etienne, and wondered if the magic was working—if the mad medicine of the sorcerer had conjured a tabu against the schooner. In the valley of the Ptarmigan they would find a camp and learn.

As the huskies trotted smartly up the coast of the island white Shot, free lance, ranged widely along shore in search of adventure, Guthrie's thoughts temporarily deserted his mission on Akimiski to dwell—now that he had seemingly burned his bridges—on his status at home. For it would not be foreign to his brother's egotism and reverence for the conventions to read Garth out of the family, since he had written refusing to return. The gossip, following his failure to join the staff of the Guthrie Steel company and lead Ethel Falconer in all her blond loveliness to the altar, would be galled to the palate of the recently knighted head of the Guthries. The neglect of his express command to the exile to shake the mud of James bay from his sealskin boots and assume the responsibilities of a family man and a man of family would, in all likelihood, mean that on his return to Montreal there would be no position in the works—no brother's house open—to the rebel. His personal means, inherited from his father, were modest. Charles' fortune was the result of his own efforts—and a fortuitous war. That was why Charles demanded wholesome respect and absolute obedience from his younger brother. At the thought the younger brother smiled in his fur hood, ringed with rime from his frozen breath. From the man who had led his platoon at the Somme and his battalion in front of Amiens, the dignity and swiftly made fortune of Charles commanded no deference and little respect. On his return—his return? He had committed himself to making good at Elkwan for his employers—for his own self-respect. What he had started he would see through. There might be no return—unless a certain letter in the Christmas mail should—.

Then his thought, until the dogs swung off the sea-ice and into the broken going at the mouth of the Ptarmigan, were of three swift days at Elkwan and two on the coast—of eyes, abstracted, perplexed, at times wistful, and a dark head silvered with moonlight, on the high shore above the Albany.

As the dog-team left the coast and followed the rough river trail into the hills, its toll began, and Etienne's wisdom in bringing a toboggan instead of a sled equipped with runners was vindicated. For once under the lee of hills, they found snow deep on the shell of the river and in places, where wind eddies had dipped into the valley, new drift, through which they broke trail on snowshoes for the sled, while the dogs, who had galloped over the brushed sea-ice, wallowed in willows and alders the black spruce scrub reached back up the slopes to fade and disappear under the shoulders of the barrens. There low Junipers and hardy Labrador tea alone survived the hammering of the winds on the undulating miles of blueberry heath and caribou moss, swept, over exposed areas, of all snow.

Suddenly, as they rounded a bend which had shut off all view upstream Etienne, who was ahead breaking trail, shouted and stopped, pointing in the direction of some thick scrub in the distance.

"Camp up here!"

(TO BE CONTINUED.)

Hidden Treasure Mute Reminder of Tragedy

When installing a bathroom in an old house in Vienna not long ago, an attic was disclosed above a closet which was supposed to reach clear to the roof. In it were the remnants of an old baker's oven and a wooden dough trough covered with grain sacks bearing the date 1923. Remnants of household effects that evidently had belonged to a well-to-do middle-class family, such as linen garments, dishes, cups, jewelry, 350 gold coins and 1,143 silver coins. Among the former were several ducats. The most recent of the coins were dated

Easy for This Student

A school inspector in Hampshire, England, having set the children some questions to do, and having gathered the answers for correction, demanded silence, during which the class might write a description of a cricket match. Looking up a moment later he saw a boy with folded arms, regarding his paper with satisfaction. "Well, my boy," he said, "surely you can find something to say about cricket." "Oh! I've finished, sir!" was the answer, and the essay was handed up. This is what the inspector read: "Match postponed on account of 'the wet.'"

Marks of Malnutrition

An official bulletin of the United States children's bureau in describing symptoms of malnutrition in a child says, "Because of lack of muscular tone his shoulders are usually rounded, the shoulder blades sometimes standing out to such an extent as to produce the deformity known as 'wings.'"

Olympics of 1928 Give Borah Chance at Paddock

Charles Borah, southern California's sprinting sensation, has a definite purpose in view in directing his attention to the 1928 Olympics in Amsterdam, Holland, next summer. He is anxious to settle the discussions which have been flying through sport-dom concerning his 100-yard races with Charles Paddock and Chester Bowman. Borah will get a shot at both at the same time at the next Olympiad.

When in 1926 Paddock was given the decision over Borah in a questionable finish, Paddock and not Borah got credit for a 9.5 seconds hundred "Hard luck," the fans said. A world's record is a big thing to lose by a narrow margin.

And then Borah figured in a 9.6 seconds century at the A. A. U. championships. Although Borah was first announced as winner, a 5-to-4 vote by judges gave not only the gold medal, but a tie for the A. A. U. record to Bowman. A few years hence fans will see only Bowman's name in the books and forget about the close race.

Paddock and Bowman both placed at the 1924 meet. They, with Borah, will probably be in the 1928 affair. There will be no previous meeting between them.

Has "Winning Spirit"

The acute brain of Etienne strove to solve the riddle of the squaw's secret amusement. At last he decided that Joe Mokoman had won over their men to the free-trader, but why Souci had not appeared on the Ptarmigan was a mystery.

"Do you know the strait has closed? You can cross to Elkwan for the New Year's feast," he hazarded.

The women smiled. "We go to the trader at Seal cove with our fox pelts," said the old squaw. "There we get honest prices for fur—from the trader who always laughs."

It was evident that here Joe Mokoman had done his work well. Then Etienne cautiously began his countermining. His dark face set in a look of surprise and horror. "Did you not hear?" he cried.

"No!"

"Why this trader brought that face from the land of demons across the Big Water? He angered them. He is a sorcerer and bewitches those who bring him their pelts." Etienne hastily interpreted the conversation to Guthrie as he watched the effect of his bombshell on the startled faces of the squaws.

"He makes bad medicine!" gasped the women.

Savanne gravely nodded his hooded head, then added: "He has bewitched Joe Mokoman to betray the Cree hunters and bring them to his boat. Those who go will never love their wives and families again," he remarked with finality.

At the last the faces of the squaws visibly grayed. They chattered together excitedly. Etienne's explanation of the cause of the mutilation of McDonald had struck deep into the marrow of their superstitions. He hastily drove his advantage home.

"Saul Souci will tell you that the trader McDonald Ha! Ha! is a friend of demons."

"Saul Souci?" cried a squaw in protest. "He is a shaman and friend of the trader who laughs."

It was the turn of Savanne to have his mental balance jarred. Souci the friend of McDonald? What could they mean? But he was equal to the emergency.

"Souci, the friend of McDonald Ha! Ha! Mokoman tells that tale to the hunters because he fears Souci the shaman."

Disturbed though she was, the Cree woman laughed in Etienne's face. "Mokoman was here this morning—there are his sled tracks. One sleep ago he says Souci was at the schooner of the trader and they shook hands. Souci is the friend of McDonald Ha! Ha!"

Olympics of 1928 Give Borah Chance at Paddock

Charles Borah, southern California's sprinting sensation, has a definite purpose in view in directing his attention to the 1928 Olympics in Amsterdam, Holland, next summer. He is anxious to settle the discussions which have been flying through sport-dom concerning his 100-yard races with Charles Paddock and Chester Bowman. Borah will get a shot at both at the same time at the next Olympiad.

When in 1926 Paddock was given the decision over Borah in a questionable finish, Paddock and not Borah got credit for a 9.5 seconds hundred "Hard luck," the fans said. A world's record is a big thing to lose by a narrow margin.

And then Borah figured in a 9.6 seconds century at the A. A. U. championships. Although Borah was first announced as winner, a 5-to-4 vote by judges gave not only the gold medal, but a tie for the A. A. U. record to Bowman. A few years hence fans will see only Bowman's name in the books and forget about the close race.

Paddock and Bowman both placed at the 1924 meet. They, with Borah, will probably be in the 1928 affair. There will be no previous meeting between them.

Has "Winning Spirit"

Art Fletcher, former fiery Grand shortstop and Philly manager, who is now coaching for the Yanks, has always been known as possessing a real "winning spirit."

In a recent game Babe Ruth came to bat in the ninth inning, with his team nine runs on the deficit side of the books.

"Come on," screeched Fletcher from the first-base coaching lines. "Nine to tie and ten to win! Let's get 'em, Babe!"

Ruth, steaming hot with perspiration and ready to drop prone on the field with weariness, cast an ugly eye on the vociferous coach and remarked pointedly, "That guy has been out in the sun too long."

Olympic Club Players to Meet Californians

Former University of California football stars will play against their alma mater when the Olympic club of San Francisco faces the California varsity on October 22. Among these ex-Californians are Jimmy Dixon, crack halfback, and John Sargent and Ed Giddings, stalwart guards, all of whom played on last year's Golden Bear machine.

The annual contest between the California varsity and the Olympic club has assumed increasing importance each year, especially since 1925, when the clubmen handed the Golden Bears their first defeat since 1919.

This year's game will witness the unusual occurrence of a former club player performing in a California uniform. The player in question is Lee Eisan, clever quarterback, who led the Olympic club to its victory over the Golden Bears in 1925.

Lefty Grove's Control Is Quite Remarkable

Lefty Grove's control against the Yanks recently was phenomenal. At one stage of the game he pitched the ball over the plate nineteen times in succession before umpire McGowan had to call a "ball."

In the course of this streak of plate-cutting Grove fanned Jim Meusel, Lazzari and Dugan on ten pitched balls. The latter, after two strikes, fouled one off. Then came Dugan's third strike, retiring the side. Starting the third inning, Grove pitched nine straight pitches, all of which were strikes except those hit by the batters for flies and grounders. During the string of nineteen "strikes" no Yank reached first base. When they hit the ball they were retired.

Philippine Fighter Is After the Bantam Title

Ignacio Fernandez, the latest Philip pine bantamweight to invade America, can neither read nor write, even in his own language. He never went to school. A thumb print accompanied by an "X" is his signature on a contract.

But Fernandez never makes a move without consulting his friend and advisor, Senor Thomas Cortez, graduate of an American university in Manila. Cortez supplies the business sense for the combination.

Fernandez, in his American debut knocked out Alie Atwell Gulstren winning a mile-wide decision by whipping over a finishing blow in the seventh round.

SOUTH-WEST NEWS NOTES

The 1928 conference of the district of nineteen Rotary clubs will be held in Prescott on April 30 and May 1.

The Aztec Light and Power Company plant and the mill adjoining burned recently at an estimated loss of \$30,000.

The second annual convention of the New Mexico department Reserve Officers' Association was held in Roswell on October 8.

A planing mill is being built at Tularosa, N. M., for use by the Tularosa Tie and Lumber Company in connection with its timber operations.

The Jawzoo ranch near Hillsboro, N. M., purchased at public sale for \$626,000 by J. A. Wigmore of Cleveland, Ohio, may be converted into a dude ranch.

Bids for the 1928 automobile license plates will be received by the Arizona State Highway Department October 30. Bids are asked for 100,000 license plates, it was stated.

Cash prizes were offered for anything from an embroidered house dress to red chili in the Elephant Butte project fair, which was held October 19 to 22, inclusive.

A combination airplane, automobile and launch of all-metal construction, the invention of Joseph A. Capier of Phoenix, has been given a basic patent by the United States patent office.

More than 299 persons have protested to the State Corporation Commission against the proposed abandonment of the New Mexico Central of its tracks between Willard and Torrance.

M. Marshall, negro ranch laborer of the Yuma valley, Arizona, was arrested by deputy sheriffs on a murder charge, based on his alleged complicity in the shooting of J. M. Hurt, negro, of Yuma.

J. H. Pifer, 69, hanged himself from a rafter in an outbuilding at his home in Phoenix. Members of his family could assign no reason for the suicide, although he had not been employed for some time.

The total property valuations for taxation purposes in the state of New Mexico for the year 1927, is \$315,375,405, John Joerna, secretary of the State Tax Commission announced in Santa Fe recently.

The Kalbush forest deer controversy between the State of Arizona and the federal government has bobbed up again with the announcement that an order allowing the state to appeal the decision given in the case to the United States Supreme Court had been signed by Federal Judge Fred C. Jacobs.

A Spanish diary, 230 years old, describing the villages of San Francisco Xavier Del Bac and of Tusuni Moho, or Tusuni Momo, probably the beginning of Tucson, has just been turned over to the University of Arizona for investigation and safekeeping. The owner of the document is Carlos R. Linca, of Cajeme, Sonora.

One of the most interesting and novel features of the twenty-third annual Arizona State Fair, to be held in Phoenix, November 7 to 12, will be the Boys' and Girls' Club Department which will display the work of nearly 1,500 4-H youngsters. Cash prizes offered in this department will total more than a thousand dollars, according to A. B. Ballantyne, the superintendent.

Fifty-five thousand motor vehicle licenses have been issued in New Mexico so far this year and it is safe to predict that 57,000 cars will be registered by the close of 1927, a state highway department bulletin issued in Santa Fe says. "According to a recent survey made by the State Bureau of Public Health and population of New Mexico is 353,290, a motor vehicle for every 6.2 persons," the bulletin says.

Suits to collect delinquent taxes (totaling \$234,569) have been filed by the State of New Mexico between June 15 and September 15, J. Frank Curns, special attorney for the State Tax Commission, stated in Santa Fe recently. The suits range from \$5 to more than \$100,000 in the case of the Cevillita De La Joya Land Grant in Socorro county, he said. Twenty of the suits are for less than \$20 and 11 for less than \$10.

The constitutionality of the motor vehicle certificate of title law as enacted by the eighth Arizona state legislature in the highway code is attacked in an answer filed by James H. Kerby, secretary of state, to the suit brought against him in the Supreme Court by a writ of mandamus to compel him to turn over the records and data relating to the operation of the certificate of title law.

Five hundred gate signs have been received for use by members of the Dona Ana county, New Mexico, farm bureau, according to W. P. Thorpe, manager. Each sign carries the name of the farm bureau and the name of an individual member.

Indians from the Mesquero-Apache Indian reservation in native costume and giving exhibitions of their native dances were among the many and varied features arranged for the entertainment of visitors at the fifth annual Chaves County Cotton Carnival held in Roswell last week.

HOW MRS. WEAVER WAS HELPED

By Taking Lydia E. Pinkham's Vegetable Compound

As Mrs. Weaver herself says, "I was never very strong." This is a mild statement describing her condition, for, according to her letters, she was subjected to no small amount of ill health. Fortunately, however, she was familiar with Lydia E. Pinkham's Vegetable Compound and begged Mrs. Weaver to try it. "After three or four weeks," writes Mrs. Weaver, "I felt a great difference in myself. I would go to bed and sleep sound, and although I could not do very much work, I seemed stronger. I kept on taking it and now I am well and strong, do my work and take care of three children. I sure do tell my friends about your wonderful medicine, and I will answer any letters from women asking about the Vegetable Compound."—Mrs. LAWRENCE WEAVER, East Smithfield St., Mt. Pleasant, Pa.

If you knew that thousands of women suffering from troubles similar to those you are enduring had improved their health by taking Lydia E. Pinkham's Vegetable Compound, wouldn't you think it was worth a trial? In some families, the fourth generation is learning the merit of Lydia E. Pinkham's Vegetable Compound.

Hanford's Balsam of Myrrh

Since 1846 Has Healed Wounds and Sores on Man and Beast

Money back for first bottle if not suited. All Dealers.

Stop Coughing

The more you cough the worse you feel, and the more inflamed your throat and lungs become. Give them a chance to heal.

Boschee's Syrup

Has been giving relief for sixty-one years. Try it. 50c and 90c bottles. Buy it at your drug store. G. G. Green, Inc., Woodbury, N. J.

Mysterious

"A parcel of gents, masked and robed, came to my house last night and beat and hammered on the door," related Gap Johnson of Rumpus Ridge. "I lifted up a board in the floor and slipped out with my gun, rounded the house and sprayed the weepin' amonst 'em some. Part of 'em went away and next morning I went out and found the rest had stayed."

"Well, what in tunket did they want?" asked a bearer. "I haint the slightest idy. Didn't you just hear me say they had masks on."—Kansas City Star.

Kitchen Tyranny

Mrs. A.—Two is company, so they say. Mrs. B.—Yes, our cook never allows us to invite more than that.—Boston Transcript.

A big policeman can bluff almost any one except his wife.

The BABY

Why do so many, many babies of today escape all the little fretful spells and infantile ailments that used to worry mothers through the day, and keep them up half the night?

If you don't know the answer, you haven't discovered pure, harmless Castoria. It is sweet to the taste, and sweet in the little stomach. And its gentle influence seems felt all through the tiny system. Not even a distasteful dose of castor oil does so much good.

Fletcher's Castoria is purely vegetable, so you may give it freely, at first sign of colic, or constipation, or diarrhea. Or those many times when you just don't know what is the matter. For real sickness, call the doctor, always. At other times, a few drops of Fletcher's Castoria.

The doctor often tells you to do just that; and always says Fletcher's. Other preparations may be just as pure, just as free from dangerous drugs, but why experiment? Besides, the book on care and feeding of babies that comes with Fletcher's Castoria is worth its weight in gold.

Children Cry for
